As with regard to other rights (see above) Jewish Law defines this not as a right, but as an obligation: an obligation is incumbent upon the individual and upon society not to violate the property or proprietary rights of another person. The most striking command on this matter already appears in the Ten Commandments, “You shall not steal” (Exod. 19:13) (see *Theft), alongside of which there are dozens of other rules and commandments, e.g., the prohibition of theft applying to all of mankind (see *Noachide Laws), the prohibition of unlawful encroachment (see *Hassagat Gevul), and many others. Theft and robbery that violate the property rights of an individual are severely forbidden even when the offender intends to restore the property to its lawful owner (Maim., Yad, Genevah 1:2; see also *Theft and Robbery).

Based on the obligation to protect the property of another person, Jewish Law set down an important principle, according to which, in certain situations, even public interest may be set aside by the property rights of an individual. This principle is already anchored in the Talmud, which asks the rhetorical question, “Is the community a band of robbers?” and forbids the community to encroach upon the property of an individual in order to build a road (BB 100a).

Like other human rights, the right of possession is not absolute. In certain situations, permission is granted to violate the property of an individual in punishment for an offense that he had committed, for which purpose it was stated “property declared ownerless by the court is ownerless” (Git. 59b; Git. 36b; TJ Pe’ah 5:1; and see *Hefker). It was similarly established that the king is vested with the power to violate the property of individuals and to expropriate fields and their produce for the needs of his kingdom. This authority is based on the “king’s law” found in Scripture (1 Sam. 8:11), echoes of which are heard in the story of Naboth and King Ahab (1 Kings 21). It is similarly established in the Mishnah that a king may “breach a fence” for the purpose of road-building, even when such action violates the property rights of an individual, and even to build “the king’s road that has no measure” (M. Sanh. 2:4). The medieval halakic authorities disagreed about the scope of this authority. Some, such as Rashi, greatly expanded it, explaining that the king is vested with this authority even in times of peace, and that he may violate the property rights of an individual even for the purpose of his own convenience (e.g., to provide himself with a shorter path to his fields; Rashi, at Yev. 76b). Other commentators severely restricted this authority, limiting it to “an appropriate purpose,” where the king has no alternative, and only as “an emergency measure.” In addition, an obligation was placed upon the king to compensate the individual for damage caused to his property (*Yad Ramah*, Sanh. 20b; Maim., Yad, Melakhim 4:6).

Regarding the expropriation of private property for public purposes, an obligation was imposed upon the ruling authority (the king, the community) to compensate the titleholder with money or alternative property (see 1 Kings 21:2). Similarly, the tendency was to limit the cases in which private property may be expropriated (*Tosafot*, Sanh. 20b, s.v. *melekh*).

These principles served as the basis for the attempts made by later generations of Sages to restrict the authority to violate the property rights of an individual by way of communal enactments or arguments of public interest (*Resp. Ramaz*, no. 37). To illustrate this idea, mention was made of the purchase of the cave of Machpelah by the patriarch Abraham, who paid for the property in full despite the promise that he would inherit the entire land, and the purchase of the Temple Mount by King David from Ornan the Jebusite for the purpose of building the Temple.

In Israeli courts. The principles of Jewish Law forbidding the violation of the property rights of an individual served as guidelines for various laws and judicial rulings in Israel. Thus, emphasis was placed on the obligation falling upon the public authority to compensate the owner of property expropriated for public purposes. The courts interpreted the expropriatory power of the public authority and, based upon the principles of Jewish Law, the courts obligated the public authority to compensate the owners for property expropriated for public purposes. In one case, the Supreme Court ruled that, if the public purpose that served as the basis for the expropriation ceased to exist, the expropriation is liable to be nullified. Justice Cheshin based his ruling, among other things, upon the scriptural account relating to Naboth and the talmudic principle, according to which “the community is not a band of robbers” (HC 96/2390, *Kerasik et al v. the State of Israel*, PD 55(2) 644. See also CA 119/01 *Akunas et al v. the State of Israel*, (unpublished) (Justice M. Naor) AA Tel Aviv-Yafo) 1146/02 *Eitan et al v. National Planning and Building Board* (unpublished) (Justice S. Dotan)). In another case, the Supreme Court, per Justice E. Rubinstein, cited sources of Jewish Law prohibiting the violation of an individual’s property rights through expropriation, when it is possible to reduce the violation, whether by desisting from such expropriation, or by offering fitting compensation to that individual (AA 0989/04 *Local Planning and Building Committee of Petah Tikvah et al v. N.M. Zitman and Sons, Inc.* (unpublished)).

SOCIAL RIGHTS. As in the case with respect to other rights, so too regarding social rights, Jewish Law speaks of social obligations, rather than social rights. Thus, Jewish Law obligates almsgiving in order to help another person – every person – to live in dignity; it similarly imposes an obligation upon the individual and upon society to provide children with an education. Jewish Law also recognizes the workers’ right to strike in certain situations, though it places greater restrictions on that right than are found in modern law (see *Labor Law). Similarly, Jewish law recognizes a person’s right to education, to basic health care (see *Human Dignity and Freedom), to quality of life, to live in dignity, to strike.

Balancing the Various Rights

One of the most important principles regarding human rights is that all of the various rights are *relative*, rather than *absolute*, and that every right must be balanced against other rights

and values. Thus, for example, sec. 13 of the Secret Monitoring Law states that, while evidence attained through secret monitoring is generally inadmissible in court owing to the infringement upon privacy that is involved, in exceptional cases, for example, “in a criminal proceeding regarding a serious felony,” the court is authorized to rule that the evidence is admissible after having been persuaded, for the special reasons that it spells out, that in the circumstances in question, the need to arrive at a clarification of the truth outweighs the need to protect privacy.

This approach of balancing among the various values is firmly rooted in the world of Jewish Law. Thus, despite the extreme caution that Jewish Law takes regarding a person’s right to privacy, this is set aside by the right to protect the health and welfare of the community. For that reason, a physician is permitted to publicly disclose that a certain person is suffering from an infectious illness, when the disease is liable to spread and endanger the health of the community. Similarly, despite a person’s right to life and the wholeness of his body, Jewish Law did not refrain from administering corporal punishment and judicial execution. A person’s right of property is also set aside by the various monetary penalties that may be imposed upon him (see *Punishment, *Capital Punishment). Similarly, a person’s right to freedom of movement does not preclude the use of arrest or imprisonment, provided that these steps are taken for appropriate cause and not in excess of what is necessary (see *Imprisonment). So, too, the right of property may be set aside by the right of the public authority, in certain cases, to expropriate private property for purposes of the public needs.

On the basic level, this balance of interests is evident in all legal systems, but the method of balancing and its operation in specific cases differs from one system to the next. Inasmuch as it is a religious legal system, Jewish Law establishes a balance different from that found in modern legal systems. Thus, for example, in contrast to American and Israeli constitutional law, Jewish law assigns priority to the value of life over that of personal autonomy (Shefer ruling; see also *Medicine and Law; Euthanasia), and in certain cases prefers a person’s right to a good name and his right to privacy over the public’s right to know and freedom of expression.

[Aviad Hacohen (2nd ed.)]

The Right to Privacy

PROTECTION OF PRIVACY UNDER ISRAELI LAW. The right to privacy is one of the most important human rights (see: Cr.A. 1302/92 *The State of Israel v. Nahmias*, 49(3) PD 309, 353; Cr.M. 2145/92 *The State of Israel v. Viktor Guetta*, 46(5) PD 704; S.D. Warren & L.D. Brandeis, “The Right to Privacy,” 4 Harv. L. Rev. (1890) p. 193) a right that extends to “those matters of the individual that, according to social consensus, the individual is entitled to keep to himself without someone else giving them public expression without his consent” (Introduction to the draft bill for the Protection of Privacy Law, 5740 – 1980, *Sefer ha-Hukkim* 1453, p. 206). The constitutional right of a person

to privacy is derived from his dignity as a human being and from the nature of the State of Israel as a Jewish and democratic state. This right is also an integral part of international law and is anchored in several major international treaties (see, e.g., section 12 of the Universal Declaration of Human Rights from 1948; section 17 of the International Covenant on Civil and Political Rights; section 8(1) of the European Convention on Human Rights from 1950). The right to privacy embodies the individual’s right not to have his private life disturbed by others, and includes the individual’s interest to keep a degree of anonymity and intimacy for himself, such that his private affairs will be protected from another’s view. The scope of the right to privacy includes the individual’s right to manage his life within his own home without interference. Over the years, the right to privacy has become rooted in the decisions of the Supreme Court of the State of Israel as a basic legal right and has a considerable, although not absolute, degree of force. Its status as a supra-legal constitutional right was established in the Basic Law: Human Dignity and Freedom (*Sefer ha-Hukkim* 5792 – 1992, 150), Section 7 of which provides as follows:

7. (a) All persons have the right to privacy and to intimacy.
- (b) There shall be no entry into the private premises of a person who has not consented thereto.
- (c) No search shall be conducted on the private premises of a person, nor in the body or personal effects.
- (d) There shall be no violation of the confidentiality of conversation, or of the writings or records of a person.

The court accorded quasi-constitutional status to the right to privacy even before it was anchored in the Basic Law: Human Dignity and Freedom. Because of its standing as a basic legal right, the governmental authorities ordered that it be respected, and it may not be infringed without express authority from the legislature; however, after being entrenched in the Basic Law, it received additional weight. The right to privacy already received express legal anchoring prior to the enactment of the Basic Law. The technological developments that facilitate invasion of the individual’s domain with relative ease while concealing the fact of the invasion, and the apprehension regarding the transformation of personal affairs into public property and the harm that will be caused thereby to the individual’s quality of life, to his personal security and to his autonomy, led the legislature to adopt the Secret Monitoring Law 5739 – 1979 (*Sefer ha-Hukkim* 5739 – 1979, 118) and the Protection of Privacy Law, 5740 – 1980. Both laws share largely similar goals and means for achieving them: defining actions that constitute an unauthorized intrusion into the private domain as criminal offenses; establishing rules defining those limited circumstances under which infringement of privacy will be permitted, whether in advance or retroactively; and determining that material gathered as a result of an invasion of privacy is inadmissible as evidence in legal proceedings. The exclusionary rule in the Secret Monitoring law may only be deviated from under certain, limited statutory conditions, in

those cases where the goal is the thwarting of a serious felony or the promotion of the direct goal of the law – the eradication of secret monitoring by the prosecution of those who engage in it. The Protection of Privacy Law allows the deviation from the exclusionary rule at the request of the injured party or at the discretion of the court.

Protection of Privacy in Jewish Law

Based on the consecutive placement of two verses in the Torah, the Midrash derives the teaching that "...a person shall not enter another's home unless [the other] says to him: 'enter'" (*Midrash Lekah Tov (Pesikta Zutra), Vayikra, 1*). The Talmud (Pesaḥim 112a) relates that Rabbi Akiva instructed his son Rabbi Joshua as follows: "My son... do not enter your own home suddenly, and all the more so another's home." In other words, there is a moral obligation to safeguard privacy, not only with respect to another person and his domain, but even in one's own home shared with one's own family. This respect of privacy became a binding norm during the period of the Talmud. Regulations were promulgated and prohibitions established to protect a person from the invasion of his privacy by others, with the goal of creating an orderly society in which people would be able to live together (see in detail, Menachem Elon, *Human Dignity and Freedom in the Execution of Court Decisions: The State of Israel's Values as a Jewish and Democratic State* (2000), p. 32 n. 88). We will present examples below of protection of privacy in Jewish Law, which served as a basis for the decisions of the Israel Supreme Court in general, and of the Deputy President, Justice Menachem Elon, in particular.

THE LACK OF SUPERVISION OF THE INDIVIDUAL WITHIN HIS OWN DOMAIN. According to Jewish Law, a person's private deeds and thoughts were not subject to supervision. This area was left to the accounting a person was required to render to his Maker – and to Him alone. In support of this approach, Rabbi Emanuel Rackman cites the words of the Talmud (Ket. 72a): "Rabbi Hinena b. Kahane said, in the name of Samuel: Whence do we learn that a *niddah* [a menstruant woman, who is ritually impure] counts for herself? It is said: 'And she shall count for her' – 'for herself.'" According to the *halakhah*, both men and women may become impure as a result of certain bodily secretions, and are subsequently required to immerse themselves in water; but before doing so they must count seven "clean days." In noting this obligation, the Torah states "and he shall count *for himself*" for a man and "and she shall count *for herself*" for a woman: that is, the counting is personal. There is no supervision or examination of this process to ensure that they do not cheat and thereby expedite the process of "purification." Jewish Law prefers trusting the individual over intrusion into his privacy. Refraining from supervision in these cases does not only stem from pragmatic concerns, such as the difficulties of supervising and absence of resources; the rabbinical courts could have encouraged informants or used inducements to entrap those who did not act as required. Jewish Law recognized such tactics, but only

permitted them in one situation: regarding a person who instigated and led others astray to perform idolatry. What characterizes this exceptional situation is the threat to the integrity of Jewish society inextricably entwined in this offense. The inducement is designed, not to reveal the opinions of the criminal for their own sake, but rather to prevent him from leading others astray to follow his path and thereby damage the character of Jewish society (see below).

SLANDER. The duty to protect the individual's rights to dignity, a good name and privacy, are expressed in the legal realm in the laws of slander and gossip. Rabbi S.R. Hirsch (*Horeb* (1965), 253–59) explains the rationale and principles underlying of these laws. He claims that the prohibitions against slander and gossip are meant to protect the image that a person creates for himself in society, an image that is important for his happiness and self-fulfillment. According to Rabbi Hirsch, a society in which there is no protection of the values of human dignity and privacy is one that will bring upon itself "an eternal destruction of human life, and a bane of justice and integrity, happiness and peace" (see above on the right to a good name). In a case involving slander, Jewish Law gives the court authority to order, in addition to the punishment, destruction of the slanderous material or a prohibition on its distribution (see Resp. *Devar Moshe*, Pt. 2, no. 91, and see at length *Slander).

GOSSIP AND THE BAN OF RABBENU GERSHOM. One who reveals another's secret has committed an offense comparable to one who bears tales (Yoma, 4b). The prohibition on revealing secrets gave rise to the rule that "there is a prohibition on asking and searching in the private affairs of another" (Rabbi Jacob Ḥagiz, Resp. *Halakhot Ketannot*, vol. 1. no. 276). An important regulation based on this principle was enacted by Rabbenu Gershom, Me'or ha-Golah, cited in the responsa of Maharam of Rottenburg as follows: "Seeing a letter that one has sent to another without his knowledge is forbidden, and if he threw it away it is permitted" (*Takkanot Rabbenu Gershom Me'or ha-Golah*, as quoted in Resp. Maharam b. Rabbi Baruch, printed in Prague, at the end). A number of reasons are given for this regulation in the responsa literature (See: U. Ḥagiz, *Sefer Halakhot Ketannot*, pt. 1, no. 276; Rabbi Ḥayyim Palaggi Resp. *Ḥikekei Lev*, YD. Pt. 1. no. 49; Maharhash, *Torat Hayyim*, Pt. 3, no. 47). One reason is rooted in the overarching principles applying to all interpersonal behavior: "You should love your neighbor as yourself" and "That which is hateful to you, do not do to your fellow man." The second factor involved is the transgression of the rule "do not go bearing tales among your people" – in other words, there is a prohibition on searching among the hidden things of another. The third is because of theft, insofar as a person owns his personal information and another does not have the right to take it contrary to his wishes and without his knowledge. Regarding the sanction for this prohibition, it is written that "because there has been an increase among those who secretly open letters belonging to others, the court should establish a boundary and

punish those who transgress as it sees fit” (Maharhash, *Torat Hayyim*, Pt. 3, no. 47, and Resp. Beit David, יד, no. 158). On this basis, Rabbi Sherman, a *dayyan* of the Rabbinical Court of Appeals of the State of Israel concluded that “it is clear that there is a halakhic prohibition on secret monitoring and a boundary must be established and those who transgress should be punished.”

MEANS OF COLLECTING A DEBT. The fashioning of means for debt collection in Judaism was influenced by the right to privacy (see in detail *Imprisonment for Debt; *Execution, Civil; and the opinion of Justice M. Elon in HC 5304/92 *Perah 1992 Siu'ah le-Nifga'ei Hukim ve-Takkanot le-Maan Yisrael Aheret – Amuta v. The Minister of Justice*, 47(4) PD 715, pp. 734–43; M. Elon, *Kevod ha-Adam ve-Heruto be-Darkhei ha-Hoza'ah le-Po'al* (2000). Regarding the relationship between creditor and debtor, Jewish Law establishes a clear and unambiguous position (Deut. 24:10–11): “When you lend your brother anything, you shall not go into his house to fetch his pledge. You shall stand outside, and the man to whom you lent shall bring out the pledge to you.” These verses embody the halakhic ideal – honoring the fundamental right of the debtor to privacy and personal freedom. The creditor’s right to receive his money and to take the law into his own hands was limited, in that he was prohibited from entering the debtor’s house. However, this arrangement did not stand the test of reality in the face of the socio-economic necessity to guarantee the payment of debts. Jewish Law takes the stand that a person’s privacy in his own home is a right which deserves to be defended by law; however, it may not be exploited to impinge upon the rights of others and to obstruct the execution of the law. Thus, from the talmudic era, there is a balancing of the biblical injunctions while preserving privacy by means of transferring the authority and discretion to the judicial authority, so that only an emissary of the court may impinge upon an individual’s privacy.

VISUAL TRESPASS. The Babylonian Talmud praises the people of Israel for protecting and guarding the privacy of the individual (Baba Batra 60a; for more detail on the subject see under “*Hezek Re'iyah*,” in: *Encyclopedia Talmudit*, 8:659): “Rabbi Johanan said . . . ‘And Bilam lifted up his eyes, and he saw Israel abiding according to their tribes’ (Num. 24:2). What did he see? He saw that the openings of their tents were not facing one another. He said: These [people] are worthy of having the *Shekhinah* dwell among them.” This custom constituted the moral basis for enactment of the regulation regarding protection from *hezek re'iyah* (“visual trespass”; see *Nuisance) that constitutes an important element in the protection of personal privacy in Jewish Law. According to the Torah law, a person is only liable for compensation to another for damage if he performed a positive action. However, the Sages included within the prohibition of causing injury even that which stems from impingement on one’s privacy – “visual trespass”; i.e., the damage caused by one person looking to another person’s property. This damage is derived both from common sense and

from the tradition, and was renewed by way of the regulation of the Sages. The broadening of the protection of privacy beyond the physical invasion of another’s domain to include a prohibition even against looking at it from a distance, even from the property of the one looking, stems from the rule that “you shall do the upright and the good.” Various reasons are given in the literature of the *rishonim* for the “visual trespass”; among others, there were those who viewed it as a kind of “*giri dilei*” (lit: throwing arrows). This concept relates to a situation in which a person commits an act on his own property (throwing arrows), as a result of which harm is caused to someone in a different place. From this, some of the *rishonim* argued that visual trespass is damage caused directly from one person observing another. A person is not interested in being exposed to the gaze of another while on his own property, nor in his personal details being known to others. The infringement of a person’s privacy occurs, not only when his personal space is physically violated, but also when he is observed on his own property from outside. Moreover, the principle of the “visual trespass” also includes the obligation to avoid the very possibility of such observation which infringes upon the other’s right to privacy, inasmuch as the very existence of such a possibility disturbs a person from acting in his home and in the surrounding property as he desires. Hence, one whose privacy has been infringed by the fact that his neighbor has opened a window facing his home and property is entitled, not only to receive an injunction against his neighbor prohibiting him from standing at his window and looking into his property, but the injured party is also entitled to demand that the situation be returned to its original state, in such a way that he will not suffer further injury. (See *Nuisance)

INFRINGEMENT OF PRIVACY IN MARITAL RELATIONS. Jewish law preserves the autonomy and privacy of each spouse in a marital relationship. This is true in the personal as well as in the monetary sphere. Jewish Law recognizes that the wife is entitled to respect, privacy and to autonomy over her body. These rights of the wife are at the basis of the *halakhah*’s prohibition of coerced cohabitation. The Talmud (Eruvin 100b) states: “Rami bar Hama said in the name of Rav Assi: ‘A man may not force his wife to perform a *mitzvah* . . .’” This opinion is the authoritative position, accepted by all Talmudic authorities as well as by the later halakhic codifiers. From this we learn that, despite the fact that a wife is obligated in the marriage agreement to cohabit with her husband, and despite the fact that non-fulfillment of the obligation may constitute grounds for the husband to breach the agreement and to declare the wife a *moredet* (rebellious wife), none of this serves as license for the husband to perform an act that infringes upon her body, her dignity, her freedom, and her privacy. There is no doubt that married couples are expected to behave openly with one another and to live together with love, harmony and fellowship, but the obligation of openness in the couple’s relationship does not allow one party to infringe upon the privacy of the other, even when the obligation of fellowship is breached

(see: N. Rakover, “*Yahasei Ishut bi-Kefiyyah bein Baal le-Ishto*,” in: *Shenaton Ha-Mishpat ha-Ivri*, 6–7 (1979–1980), 295).

The status of the obligation “and they will not hide them ... from one another,” contained in the prenuptial agreement (*tenaim*) (*Nahalat Shiva*, no. 10) is a point of disagreement among the halakhic decisors. According to Rabbi Joseph Colon (Resp. Maharik no. 57), this portion of the prenuptial agreement has a normative binding status. On the other hand, Rabbi Shlomo Kluger (Resp. *Tuv Ta’am ve-Da’at* (3rd ed.), No. 181) is of the opinion that this portion of the agreement does not have the status of a normative binding provision, but is rather considered as part of the opening comments. Rabbi Dikhovsky of the Rabbinical Court of Appeals of the State of Israel (S. Dikhovsky, “*Ha’azanot Seter*,” in: *Tehumin*, 11 (1990), 299ff., at 303) expands the applicability of this condition to personal obligations and not just to monetary obligations.

SEARCHING A PERSON’S BODY. The question of conducting a search on a person’s body arose in Jewish Law in the context of one who entered the Temple chambers to contribute his *shekalim*. According to one opinion (Tosef. Shekalim 2:2), it was customary to search the body and clothing of one entering the chamber, in order to preempt a claim, in the event that money was found in his possession on his way out, that he had brought his own money with him. According to another opinion (M. Shekalim 3:2), one who enters should not be humiliated by a search of his clothing and his body, and it is sufficient that he take care not to enter the chamber with clothing or possessions that would be likely to cast suspicion upon him. The Tosefta, *supra*, explains this difference of opinion as follows: The opinion that no search of a person’s clothing should be made is the opinion of Rabbi Akiva, who states: “And you shall do that which is right and good in the sight of the Lord” (Deut. 6:18) – good in the eyes of Heaven and right in the eyes of man.” In other words, indeed a person has to do what is good in the sight of the Lord and to be clean in the eyes of Israel as well, that is, not to bring suspicion upon himself, but he must also take care to do what is right in the sight of man, and therefore not to be humiliated by a search, because conducting a search on a person’s body is not right in the sight of man. (See M. Elon, *Ha-Mishpat ha-Ivri* (1988³), pp. 512–15; *Jewish Law*, (1994), 624–28, and the notations there.) On the other hand, Rabbi Ishmael follows the first opinion, that “doing what is right refers to what is right in the sight of the Heavens” (Tosefta, *supra*) – in other words, that both the good and the right refer to the good and the right in the sight of Heaven, and what is good and right in the sight of Heaven will be so in any event in the sight of man – and therefore a search should be conducted in order to ascertain that he did not embezzle money belonging to the Chamber. The law was decided according to Rabbi Akiva, that a search not be conducted (Yad., Shekalim, 2. 10; and see *Ha-Mishpat ha-Ivri*, *supra*, 512–13; *Jewish Law*, 624–25).

The preservation of human dignity and the prohibition against humiliating people is applicable, not only to innocent

members of society, but even to those suspected of having committed a crime. Where the Jerusalem Talmud (Sanhedrin 7:8) states that a suspicion based on an unsubstantiated charge that a certain person killed someone is sufficient to arrest the suspect until the charges are clarified, Rabbi Yose questions that statement: Do they apprehend someone in the marketplace and humiliate him? Rather, only where there is *prima facie* evidence regarding the commission of a crime by the suspect may he be placed in detention until his witnesses come (see the decision of Justice Menachem Elon in Cr.M. 71/78, *The State of Israel v. Rivka Abukasis*, 32(2) PD 240, pp. 248–49). The arrest of a person in the marketplace is a humiliation, and it is only permitted in the event that there is a suspicion regarding a serious crime, such as murder, in which case public safety is endangered if the suspect continues to walk about freely.

Jewish law also dealt with searches on and in a person’s body. According to the teachings of the Sages, a person’s dress is regarded as his dignity and his privacy: “For a person’s dignity is his clothing” (Exodus Rabbah 18. 5).

Regarding Rabbi Johanan it was told that he called his clothing “my dignity,” because “they dignify their owner” (Shabbat 113a, and Rashi ad loc; Bava Kamma 91b; Sanhedrin 94a). In addition, walking about naked is considered impure and an abomination: “There is nothing more impure and abominable to God than one who walks about naked in the marketplace” (Yevamot 63b). Against this background, Jewish Law specifically discusses the injury to human dignity caused by a person removing his clothes in public.

The Torah states: “You shall not wear a garment of diverse kinds, of wool and linen together” (Deut. 22:11; Yad., Kila’im, 10:1). In the Talmud (Berakhot 19b), the question is asked whether one who discovers mixed wool and linen fabric (*sha’atnez*) in his clothes while walking in the marketplace is required to remove the garment immediately so as not to transgress this prohibition, or only after he arrives home, because disrobing in the marketplace harms his dignity and humiliates him. In this context, the principle is cited: “Great is human dignity for it supersedes a prohibition written in the Torah.” According to this principle, one may postpone removing the garment until arriving home. The Babylonian Talmud rules that a distinction must be made between the case in which the garment is of the kind of mixture that is forbidden according to the Torah and that forbidden by rabbinic law alone. In the latter case, the person need not remove the garment in the marketplace, for his dignity takes precedence over a transgression which is not of biblical force (*d’oraitah*); but in the case of *sha’atnez* that is forbidden according to the Torah, it is preferable not to transgress the prohibition, based on another principle: “There is no wisdom or understanding or counsel against the Lord” (Prov. 21:30). According to the passage in the Jerusalem Talmud (Kila’im 9:1), the principle of human dignity even overrides a negative commandment of *de-oraita* force, and not only one of rabbinic force (*de-rabbanan*). The simple reading of this passage is that there is a

disagreement between the Jerusalem Talmud and the Babylonian Talmud, as set forth in the commentary of R. Elijah of London, according to which one of the *amoraim* is of the opinion that human dignity supersedes even a prohibition of the Torah (*Perush Rabbenu Eliyahu mi-Londrish*, ed. M.J.L. Zaks (1956), p. 2). A brilliant explication of this is given in the rulings of the Rosh, where it is stated: “Regarding *kilaim* (mixtures) that are prohibited by the Torah – clearly if one finds *kilaim* in his clothes, there is no wisdom or understanding against the Lord and he must remove the garment even in the marketplace. But if a person sees *kilaim* in another’s garment, and the one wearing it is unaware, he should not be told in the marketplace until he arrives at his home, and he should be silent for the sake of his dignity and not require him [immediately] to cast off an inadvertent transgression.”

PLANTING CONCEALED WITNESSES – ENTRAPMENT. In the view of the *halakhah*, enticing others to idolatry is an extremely serious offense. One who entices others to alien worship (Deut. 13:7–12) subverts the character of the Jewish society. His deed is particularly dangerous, inasmuch as it is done secretly and he entices his friends who are loyal to him and will not be quick to turn him over to the authorities or testify against him in court. Therefore, the rules of procedure regarding one who entices others to idolatry are more lenient in several aspects, one of which is relevant for our purposes. Ordinarily, it is prohibited to conceal witnesses or to use detective devices with the goal of following one who commits an offense and to gather evidence regarding such commission; however, this prohibition does not apply regarding one suspected of enticing others to idolatry. Because the enticer carries out his deeds in the utmost privacy and his offense strikes at the very foundations of the society, the *halakhah* is forced to use extraordinary means to expose him, by creating an artificial situation in order to trap him. In an article dealing with the subject of secret monitoring, Rabbis Dikhovsky and Dasberg disagree as to whether such concealment of witnesses is permitted regarding other offenses as well (see Dikhovsky, “*Ha’azanat Seter*,” in: *Tehumin* 11 (1990), 299, and Dasberg’s response at the end of the article). Relying on the Rambam, Rabbi Dikhovsky argues that “...the difference between an enticer and others who commit capital crimes is only that with regard to an enticer there is an *obligation* (*mitzvah*) to entrap him, whereas with regard to others who have committed capital crimes, it is *permitted* to do so.” Rabbi Dasberg, on the other hand, argues that “such entrapment is only permitted with regard to an enticer, and only when he cannot be dissuaded from commission of the offense by warnings and by opening a door to repentance. However, concealment of witnesses is forbidden with regard to any other offense, because the one who puts the entrapment in place violates the injunction ‘do not place an obstacle before the blind’ and disregards the *mitzvah* of reproaching another for his waywardness.” The deputy president of the Supreme Court, Justice Menachem Elon, is also of the opinion that it is permissible

to carry out entrapment in other exceptional cases, and he argues that under special circumstances secret monitoring is a *mitzvah*, such as in order to create evidence in a case of serious crime (incitement and enticement), and that it is permitted in order to create evidence regarding any criminal activity whatsoever (see Rabbi Joseph Babad, *Minhat Hinukh*, on the *Sefer ha-Hinukh* §462). Justice Elon also relies on the *halakhah* that permits opening another person’s letter where there is basis for suspecting that the one who wrote the letter intends to defraud the addressee of his money, and that the situation may be clarified by opening and reading the letter (see Rabbi Hayyim Palaggi, *Resp. Hikekei Lev*, Pt. I, YD 49; Rabbi Joseph Colon, *Resp. Maharik*, no.110; *Haggahot Rema* to YD 228.33; cf. Justice Menachem Elon’s opinion in FH 9/83 *Military Appeals Tribunal v. Vaknin*, 42(3) PD 837, para. 9.).

PROTECTION OF PRIVACY IN DECISIONS OF THE ISRAEL SUPREME COURT. The Israeli Supreme Court dealt with the question of privacy in a number of decisions. These decisions were based *inter alia* on sources in Jewish Law. One of the questions discussed in the *Afangar* case (Cr.A. 360/80, *The State of Israel v. Ya’akov Afangar*, 35(1) PD 228) was the question of the criminal liability of one who was enticed to commit a crime. Justice Elon based the rule set forth in Israeli case law, according to which one who was enticed is not thereby absolved of his criminal liability, on the above-cited sources of Jewish Law. The *Vaknin* case (FH 9/83, *Military Court of Appeals v. Vaknin*, 42 (3) PD 837) involved an incident in which military policemen forced a soldier to drink salt water against his will in order to determine whether he had swallowed a bag containing illegal drugs. The Court again reiterated that the Israeli law did not adopt the American doctrine of “fruit of the poisoned tree” even after the enactment of the Protection of Privacy Law and the Covert Listening Law. Considerations of educating those in positions of authority and protection of a defendant’s dignity and his freedom are not sufficient to justify ignoring objective facts when the court must make a ruling regarding the legal truth. In that decision, Justice Elon elaborated on the position of Jewish Law regarding the question of the protection of privacy. He issued a call to the judges that “the material found in Jewish Law regarding protection of privacy, as well as many additional sources, should be used as a source to resolve various dilemmas regarding the protection of privacy.” In another case (Cr.A. 2145/92 *The State of Israel v. Victor Goetta*, 46(5) PD 704), the police conducted a search on Victor Goetta, whom they suspected of possessing illegal drugs. It was alleged that the police stripped him and conducted a search of his body parts in order to ascertain if he was concealing drugs in his private parts. In that case, Justice Elon wrote a leading decision regarding body searches, based on sources in Jewish Law. The rules set forth there distinguish between permitted searches on the visible parts of a person’s body, as opposed to a search in his internal organs, which is forbidden unless there is an explicit legal provision that permits it. In addition, even a permitted search must be

conducted in such a manner that the person's dignity is respected, so that the image of God within him not be debased and humiliated.

The Attitude to Non-Jews

In the *Naiman* case (EA 3, 2/84, *Naiman v. Central Elections Committee, Chairman; Avneri v. Central Elections Committee, Chairman*, 39 (2) PD 225), the deputy president of the Israeli Supreme Court, Justice Menachem Elon, stated (at p. 298) that:

One of the fundamental principles in the world of Judaism is the idea of man's creation in the Divine image (Gen 1:27). This is how the Torah begins, and from it the *halakhah* derives basic principles regarding the value of the human being – every human as such – and the right of every person to equal and loving treatment. “He [R. Akiva] would say: Beloved is man, for he was created in the image [of God]; it was an act of greater love that it was made known to him that he was created in the image [of God] in that it is stated ‘In His image did God make man’ [Gen. 9:6]” (M. Avot 3:18).

There is a highly instructive dispute between two of the leading *tannaim* regarding the essence of the most fundamental principle in the realm of man's relation to his fellow man: “You shall love your neighbor as yourself” [Lev 19:18]. Rabbi Akiva said: “This is a fundamental rule of the Torah.” Ben Azzai said: “This is the book of the generations of man [in the day that God created him in his image]” [Gen. 5:6]. This is even more fundamental than the former” (*Sifra, Kedoshim* 4:10). According to R. Akiva, the highest value in inter-personal relations is the love of man and of one's fellow human being; while according to Ben Azzai, the greatest value is human equality, stemming from the creation of every person in the image of God.

Justice Elon continues:

The two values taken together – human equality and love of humanity – became as one in the Hebrew nation, and together they constitute a fundamental principle of Judaism, throughout its generations and eras. The fundamental principle “you shall love your neighbor as yourself” is not only a matter of subjective feeling, an abstract love with no practical requirements, but a way of life in the practical world. It is this principle that is formulated in Hillel's words: “That which is hateful to you, do not do to your fellow man” (Shab. 31a).

Based on this approach, Rabbi Abraham Yitzhak Hacohen Kook wrote that,

Love of humanity must be alive in one's heart and soul – love for each individual separately, and love for all nations [together with], desire for their advancement for their spiritual and material progress ... An inner love from the depths of one's heart and soul, [a longing] to be beneficent to all nations to add to their material wealth, and increase their happiness. (*Middot ha-Re'iyah, Ahavah*, sec. 5).

These basic and fundamental world-views also determined the attitude of Jewish sources to the national minority living under Jewish rule. A whole series of basic commandments of Judaism are explained in the Torah in terms of the historical memory of the people and its suffering as a minority under the rule of others: “for you were strangers in the land of Egypt” (Exod.

23:9; Lev. 19:30; 22:20; 23:9; and passim). Moreover: “You shall not abhor an Egyptian, for you were a stranger in his land” (Deut. 23:8). Racism, which has to this very day claimed so many victims over the course of human history, is unknown in the world of Judaism, and totally rejected thereby.

The Book of Leviticus (19:33–34) states, “and when a stranger dwells among you in your land, you shall not oppress him. Like a sojourner among you shall be the stranger who lives with you, and you shall love him like yourself, for you were strangers in the land of Egypt; I am the Lord your God.” In the Book of Exodus (22:20), the prohibition is couched in somewhat different language: “You shall not wrong or oppress a stranger, for you were strangers in the land of Egypt.” The prohibition against oppressing the stranger is addressed both to the individual in his relations with others and to governmental authorities and the general public. Rabbi Samson Raphael Hirsch saw the use of the singular as addressed to the state as a body, while those verses phrased in the plural were addressed “to the nation as a whole, also as an aggregate of individuals” (see Rabbi S.R. Hirsch, *Commentary to the Pentateuch*, on Exod. 22:20). The Torah emphasizes the prohibition against oppressing the stranger in order to express the value of equality in society, specifically with regard to members of other religions, and to warn man repeatedly not to surrender to the temptation of exploiting the weakness of those lacking in power or influence, as expressed well by Hirsch in his *Commentary* (*ibid.*, from the English translation of I. Levy (Gateshead, 1973), vol II, p. 373):

It is not race, not descent, not birth or country or property, altogether nothing external or due to chance, but simply and purely the inner spiritual and moral worth of a human being, which gives him all the rights of a man and of a citizen. This basic principle is further ensured against neglect by the additional motive, [that you were strangers in the land of Egypt] ... Your whole misfortune in Egypt was that you were *gerim*, “foreigners,” “aliens” there; as such, according to the view of other nations, you had no right to be there, had no claims to rights of settlement, home, or property. Accordingly, you had no rights in appeal against unfair or unjust treatment. As aliens you were without any rights in Egypt, out of that grew all your.. slavery and wretchedness. Therefore beware, so runs the warning, from making rights in your own State conditional on anything other than on that simple humanity which every human being as such bears within him. With any limitation of these human rights the gate is opened to the whole horror of Egyptian mis-handling of human beings.

Most of the halakhic sources interpreted the oppression of the stranger as referring specifically to the proselyte who was attached to the people of Israel in every respect – i.e., the *ger tzedek*, the righteous proselyte. Yet this interpretation presents a number of difficulties. The first of these is that the Torah prohibits oppressing any person from Israel, “You shall not oppress each man his fellow” (Deut. 25:124), so that the prohibition against the oppression of the proselyte seems superfluous, as they are in any event included within the totality of Israel. The second difficulty relates to the reason given for the pro-

hibition, whether in Exodus, Leviticus, or Deuteronomy: “for you were strangers in the land of Egypt.” The Israelites were certainly not “righteous proselytes” in Egypt, for they did not go there to settle permanently, but to reside temporarily until the famine would pass, as confirmed by the fact that they did not assimilate within the Egyptian people. Hence, there were those who interpret the Torah as prohibiting the oppression of the stranger who lives among us, even if he did not accept Torah and *mitzvot*. And indeed, it was thus that Ibn Ezra interpreted it (in his shorter commentary, to Exod. 22:20): “And the phrase ‘you shall not oppress the stranger’ refers to the resident stranger, because there is no one to help him from his own family, and any of the residents can deprive him of his wealth or of his home, and also bring pressure upon him by testimony, as Scripture says, ‘you shall not oppress your neighbor’” (Exod. 20:12).

Who then are these “resident strangers” (*gerei toshav*)? Rav Kook thought that the Muslims living in the Land of Israel fall under the rubric of *ger toshav* (see Resp. *Mishpat Kohen*, no.58), and Rabbi Isaac Halevi Herzog ruled similarly in his wake, emphasizing that “even though they were not formally accepted before a Jewish court, and even though we do not accept a person as a *ger toshav* in this era... an entire nation that took upon itself the seven [Noachide] *mitzvot*, even today, are subject to the rule of *ger toshav* (Resp. *Heikhal Yizhak*, EH, Pt 1.12). This rule also applies to the Christian Arabs in Israel (see Rabbi I. Herzog, “Minority Rights According to the Halakhah,” in: *Teḥumin*, 2 (1981), 172 (Heb.); on the issue of Christian faith and the seven Noachide commandments, see Rabbi Y. Harlap, “Idolatry through *Shituf* Among Noachides” (Hebrew), *Teḥumin*, 19 (1999), 148). Above and beyond the halakhic discussion regarding the status of the resident stranger – the attitude towards non-Jewish minorities and their freedom of religious practice is established by the principle in Jewish law of “ways of peace.” As noted by the Talmud (Gittin 61a): “Our Rabbis taught: One provides sustenance to the poor among the non-Jews together with the poor among the Jews, and one visits the sick of the non-Jews together with the sick of Israel, and one buries the dead of non-Jews together with the dead of Israel, because of ways of peace” (see Rabbi Judah Gershuni, “Minorities and Their Rights in the State of Israel in Light of the Halakhah,” in: *Teḥumin*, 2 (1981), 180, 192 (Heb.)). Hence, Jewish law recognizes the option of appointing a non-Jew to public office; this, because, despite the original prohibition against doing so was because of the dominion they might exert over the public. Today, when the power of office derives from the people, it does not present a problem (see Elisha Aviner, “The Status of the Ishmaelites in the State of Israel in Light of the Halakhah,” in: *Teḥumin*, 8 (1987), 337, 358 (Heb.)).

One should note, vis-à-vis the freedom to practice their own religion on the part of the minorities living in the land, that the Hebrew nation does not engage in “missionizing” in order to add members of other peoples to its own ranks (see Micah 4:5; Yad., Melakhim 8:10). This fact expresses, among

other things, the tolerance that Judaism affords to members of minority groups to live according to their own tradition and culture. The practice accepted in the ancient world – and in more recent times as well – was that the majority forcibly assimilates members of minority groups into the majority religion of the state – based on the accepted principle that “Cuius Regio Cuius Religio,” i.e., he who rules is the master of religion. This practice led to the persecution of minorities to the extent of forcing them to accept the religion of the dominant majority. This practice was absolutely forbidden in the world of *halakhah*. For that reason, during those periods when Jewry enjoyed power, “the Court did not accept proselytes all the days of David and Solomon. In the days of David – lest they came out of fear; and in the days of Solomon – lest they came because of the kingship and greatness and material good which were then seen in Israel” (Yad, Issurei Bi’ah 13:15). These matters were summarized by Justice Elon in the *Naiman* case as follows (301–2):

The national minority of a member of another people is defined in the *halakhah* as having the status of a resident alien (*ger toshav*), the only requisite demanded of him is to abide by the “Seven Noachide Laws” – the elementary rules of a legal order which the members of all civilized nations are commanded to observe, and which the Sages saw as a kind of universal natural law (Yad, Issurei Bi’ah 14:7 and cf. Melakhim 8:10–11; Sanhedrin 56a; Ramban, *Commentary on the Torah* to Gen. 34:13; and cf. M. Elon, op cit., 183ff.). The national minority is entitled to all of the civil and political rights of the other inhabitants of the country: “though he be a stranger, or a sojourner; that he may live with thee” (Lev. 25:35). “A *ger toshav* is to be treated with the same respect and kindness accorded a Jew, for we are commanded to let them live... and since one is obligated to let the *ger toshav* live – he must be given medical treatment without charge” (Yad, Melakhim 10:12; *ibid.*, Avodat Kokhavim 10:2). And the Sages further said: “One does not settle a *ger toshav* on the frontier, or in an undesirable dwelling, but in a desirable dwelling in the center of the Land of Israel, where he may practice his trade. As is said, ‘He shall dwell in your midst, in a place which he shall choose in one of your gates [settlements] in your midst, wherever he pleases, you must not oppress him’ [Deut 23:17]” (Masekhet Gerim 3:4) ... Jewish rule and dominion – not in order to rule over the world, nor in order to dominate the Gentiles, but so that Israel will not be subject to any oppressor, but will engage in Torah and wisdom, and the land will be filled of knowledge. In these great words of the leading Sages of Israel are encapsulated the destiny and image of the Hebrew state.”

ISRAELI LAW. The law does not explicitly mention the prohibition against oppressing the convert (*ger*), the foreigner or member of a minority group, but he does enjoy special protection under the provisions of a number of laws, such as the regulation that a work contract with a foreign worker must be in a language that is known to him and must include many of the details that are fixed in the law, including the employer’s obligation to provide the foreign worker with medical insurance and suitable living accommodations (Section 1C of the Foreign Workers (Illegal Employment and Assuring Suitable Condi-

tions) Law 5751 –1991. For the prohibition against withholding the passport of a foreign worker, see Section 376. of the Penal Law 5737 – 1977, and the remarks of Judge Arad in AA 1459/02, *Butcherman v. Best Yizum u-Benyah* (unpublished)). It also states that information about available positions in the State service, tenders of public bodies, and criteria for receiving subventions from the government budget must be made available to the Arab public, through their publication in Arabic (see: Amendment 15(b) to the Obligation of Tender Regulations 5753 – 1991, sec 6:1, for the procedure for submitting requests for support from the government budget in public institutions and discussion thereof, as amended in Official Publications (*Yalkut Pirsumim*) 5760, 3264). Similar rules were introduced in recent years requiring suitable representation in the government service and in the directorates of government companies and public corporations (sec 15a of State Service (Appointments) Law, 5719 – 1959, and Section 18 (a 1) of the Government Companies Law, 5735 – 1975).

The issue of oppression of the proselyte in Israeli law was discussed in a ruling, when Shoshanah (Susan) Miller, who had immigrated to Israel from the United States after converting to Judaism within the framework of the Reform Judaism, asked to be registered in the population registry as a Jewess. The Minister of the Interior, following legal consultation, ruled that there was no way of avoiding her request, but that hereon in, in similar cases, there would be a notation in the section for religion and nationality on the identity card: “Jew (converted).” The President of the Supreme Court, Justice Shamgar, ruled that the registration official had no power to add anything to the accepted form of registration in the sections of religion and nationality, and therefore accepted Miller’s appeal and ordered that she be registered as a Jew without further addition. Justice Elon added the following to his words: (HC 230/86 Miller v. Interior Minister et al, PD 40(4), pp. 447–48):

In my opinion, this “parenthetical” addition, intended as a completion or “description” in every case of conversion, following the word Jew, *also has absolutely no place or source in terms of the halakhah*. There is no person concerning whom the Torah warns us so frequently – in 36 separate places – as it does regarding the oppression of the proselyte, whether in speech, in action, or by way of halakhic-legal statements and notations... One does not mention to a proselyte his previous status and deeds, one does not treat lightly the respect due to him.... One of the recent halakhic sages said the following: “Every person whose behavior towards the proselyte differs from his behavior to any other Jewish person – violates this positive commandment, as is written: ‘He shall be a sojourner among you... and you shall love him as yourself’” (Rabbi Jeroham Fischel Perla’s *Commentary* to R. Saadiah Gaon’s *Sefer ha-Mitzvot*, no. 82). And there is no doubt that, by adding the word “converted” in parentheses – which is not done regarding a “regular” Jew – we are not behaving in the same manner as we do regarding every other Jew; hence we are prohibited from doing so.

In the wake of the Six-Day War and the liberation of places holy to the three religions, the Israel Knesset passed the Protection of Holy Places Law, 5727 – 1967, Section 1 of which states

that: “The holy places will be protected against all desecration and all other harm and anything that might impinge upon the freedom of access of members of all religions to those places holy to them, or their sentiments towards those places.” Section 2 states: “One who desecrates the holy place or harms it in any other way is liable to imprisonment of seven years,” and that “one who performs an action that is liable to harm the freedom of access of members of religions to places holy to them or their sentiments regarding those places, is subject to five years imprisonment.” In view of the legislation of this law, it would appear that the purpose of the law was to ensure the freedom of access and worship in these historical, holy sites, that were just recently liberated, to each one of the religions.

In light of these provisions, Justice Elon ruled, regarding the controversy surrounding the *Kach party (*ibid* – *Naiman*, p. 302), that:

The content of the Kach platform and the purpose of its promoters and leaders, as reflected in the material presented to us, stand in blatant contrast to the world of Judaism – its ways and perspectives, to the past of the Jewish nation and its future aspirations. They contradict absolutely the fundamental principles of human and national morality, the Declaration of Independence of the State of Israel, and the very foundations of present-day enlightened democracies. They come to transplant in the Jewish State notions and deeds of the most decadent of nations. This phenomenon should cause grave concern among the people who dwell in Zion. This court is charged with the preservation of the law and its interpretation, and the duty of inculcating the values of Judaism and civilization, of the dignity of man and the equality of all who are created in the divine image, rests primarily upon those whom the legislature and the executive branch have chosen for the task. When, however, such a seriously dangerous phenomenon is brought to our attention, we may not refrain from sounding the alarm against the ruinous effects of its possible spread upon the character, image and future of the Jewish State. The remedy lies, in the first place, in a reassessment of the ways of educators and pupils alike, in all walks of our society

In its judgment, the Court decided not to disqualify the Kach list, for reasons of *lack of judicial authority*, to do so. In relating to this matter, Justice Elon further wrote (*ibid*, 303):

It was not, therefore, for lack of sensitivity to the gravity of the Kach list phenomenon that we refrained from endorsing its disqualification, but because the legislature has not empowered us or the Central Elections Committee to disqualify a list from participating in elections to the Knesset on ground of the content of its platform....

The consequence of not disqualifying the Kach list is difficult and saddening, considering the content of its platform, but it is right and proper not only in terms of our respect for the rule of law but also because it precludes the drawing of undesirable conclusions in such an important and complex matter.

[Menachem Elon (2nd ed.)]

Pluralism in the World of Halakhah

As opposed to other religions, Judaism always attributed intrinsic importance to a multiplicity of opinions in the reli-

gious-halakhic-and philosophical dimension. We related to this phenomenon, to a certain extent in the entry *Majority Rule, and will devote some additional comments in the current context. There seems to be no more apposite expression of this than the statement made by the Sages regarding the controversy between the School of Shammai and the School of Hillel that “these and these are the words of the living God” (Eruvin 13b; TJ Berakhot 1:4; TJ Yevamot 1:6). Despite the fact that, in terms of practice and obligatory norms, the *halakhah* generally follows the School of Hillel, the opinions of the School of Shammai continue to constitute a legitimate and substantive opinion in the world of *halakhah*. This approach was one of the basic features of the *halakhah*. The “rebellious elder,” even after the Sanhedrin – the High Court of the nation – had ruled against his opinion, was permitted to adhere to his own view “and to adhere to his own opinion,” provided only that he did not rule thus for others in practice (M. Sanhedrin 11:2; TB Sanhedrin 86b). Moreover, the opinion of the minority, which is not followed in practical life, may at some future time have its day and become the accepted view according to which people will behave. R. Judah said: “The [dissenting] opinions of individuals are only mentioned among those of the majority, so that if some day they are needed, they may be relied upon” (Tosef., Eduyyot 1:4 (ed. Zuckermann)). And the same teaching appears in M. Eduyyot 1:5; as stated in the commentary of R. Samson of Sens, ad loc: “Although the view of a single person is not accepted at first, and many disagree with him, at another time the majority may accept his reasoning and the law be decided accordingly, for the entire Torah was so given to Moses at times to forbid and at times to permit, and when he was asked: “until when shall we deliberate?” he answered: “follow the majority; however both are the living word of God” (cf. M. Elon, *Ha-Mishpat ha-Ivri* (1988), 870–878; *Jewish Law* (1994), 1061–1072). This plurality of views is not a negative phenomenon or defect, but is substantive to the world of the *halakhah*. “There is no instability or shortcoming, such as to say that he causes more than one law to exist, Heaven forbid! On the contrary – such is the way of the Torah, and both are the words of the living God” (R. Hayyim ben Bezalel, introduction to *Vikku'ah Mayim Hayyim* (Prague, 16th century); and see in detail Elon, *Ha-Mishpat ha-Ivri* at 1145–1149; *Jewish Law*, 1375–1379). Moreover, plurality of views and approaches has the power to create harmony and unity out of difference. As the last of the codifiers, R. Jehiel Michal Epstein, said at the beginning of the 20th century (*Arukh ha-Shulhan*, *Hoshen Mishpat*, Introduction):

All the disputes of the *tannaim* and the *amoraim*, of the *geonim* and the codifiers, are truly the words of the living God, and all are aspects of the *halakhah*. Indeed that is the glory of our pure and holy Torah, the entire *Torah* is a song, and the glory of a song is when it is sung in different voices. And this is the essence of its pleasantness.

Indeed this basic conception that “both are the words of the living God” has at all times exerted a decisive influence on the mode and substance of halakhic codification as well as deci-

sion. I have dealt elsewhere with the subject and need not expand upon it here (Elon, *Ha-Mishpat ha-Ivri* at 870, and the references in *Jewish Law*, 1061 n. 94).

In the *Naiman* case, Justice Elon noted that the plurality of views plays a material and fruitful role generally in the life of a just society. The rabbis even composed a special benediction to fit the secret encompassed in this notable phenomenon of a plurality of views in society: “If one sees a large crowd of people, one should say: Blessed is He who is wise in secrets; for neither their faces nor their thoughts are alike” (Tosefta (Zuckermann), *Berakhot* 7:5; and see *Berakhot* 58a). This is a blessing for wisdom and creativity: “Just as the nature of creation still renders the countenances of all people different, so also are we to believe that wisdom is still shared by men each differing from the other” (*Vikku'ah Mayim Hayyim* (introduction)). Such a plurality of views should be respected by our leaders and government, as the following midrashic comments instructively indicate (Numbers Rabbah, *Pinhas* 21:2; Tanhuma, *Pinhas* 10):

Just as the countenances (of people) are not alike, so also their views, and each person has his own opinion ... Thus on the point of death Moses begged of God: “Master of the Universe, the views of every one are well known to you and your children’s views are not all alike. When I depart from them, I pray, appoint them a leader who will be tolerant of each person’s view.”

Justice Elon expressed this idea in the *Naiman* case: “That is the lesson of leadership and government in the heritage of Israel – tolerance for every individual and every group, according to their opinions and outlooks. And this is the great secret of tolerance and listening to the other, and the great potency of the right of every individual and every group to express their opinions, that they are not only essential to an orderly and enlightened regime but also vital to its creative power. For in the real world ‘two opposing elements converge and fructify; how much more so in the spiritual world’ (Rabbi A.I. Kook, *Ha-Nir* (Jerusalem, 1909) 47; *Eder ha-Yakar*, 13 ff.)”

True, halakhic Judaism does not recognize the legitimacy of alternative streams that do not accept the binding yoke of *halakahah*. However, Deputy President of the Supreme Court Menachem Elon calls for tolerance in this area and attempts to find a balance between the practice that had developed within halakhic Jewry, the freedom of opinion that is a basic value in Judaism, and the avoidance of injury to the feelings of religious people.

An instructive example of this is his ruling in the matter of the Women of the Wall. In that incident, Justice Elon wrote:

In the holy places there is no other option – where there is conflict between the freedom of worship of the various worshippers among themselves – but to attempt to find a common denominator among all worshippers, even if as a result the freedom to worship of one group may be realized at the expense of the freedom of worship of the other. The unique solemnity and dignity that adheres to the holy places and their sanctified character re-

quires that worship be conducted in the holy places with quiet and dignity, without rancor and dispute, so that each person may serve his Creator without harming the worship of his fellow. There is no way of achieving this goal other than by finding the common denominator of all the worshippers.

Thus, regarding that issue, Justice Elon did not allow the Women of the Wall to worship at the Western Wall Plaza, and said the following: "It is obvious and self-evident that the petitioners are entitled to pray in their way in their own communities and synagogues, and no one will prevent them from doing so. The petitioners' freedom of worship remains as it always was. But due to the uniqueness of the Western Wall and the great sensitivity of this holiest place for the Jewish people, prayer must be conducted in this unique and special place according to a common denominator that allows the prayer of every Jew as such; and this means that the custom of the place as it has existed for generations – must be maintained."

[Menachem Elon (2nd ed.)]

RIGLER, LEO GEORGE (1896–1979), U.S. physician and educator. Born in Minneapolis, Minnesota, Rigler was appointed professor of radiology at the University of Minnesota in 1927. From 1957 to 1963 he was executive director of Cedars of Lebanon and Sinai Hospitals, Los Angeles, and in 1963 was appointed professor of radiology at the University of California at Los Angeles, where in 1970 he founded the Leo G. Rigler research laboratory.

He was the first Jew to be president of the Radiological Society of North America. He was chairman of the Jewish Family Welfare Association, Minneapolis, Minnesota, and national vice president of the American Friends of the Hebrew University. Rigler's works include *Outline of Roentgen Diagnosis* (1938) and *The Chest* (1946). He arranged and edited the second U.S. edition of H.R. Schintz's *Lehrbuch der Roentgendiagnostik* (6 vols., 1928, 1965⁶; *Roentgen Diagnosis*, 1968²).

RĪHĀNIYYA, AL-, Circassian-Muslim village in northern Israel, on the Almah Plateau in Upper Galilee. It is one of the two Circassian villages west of the Jordan (the other is *Kafr Kāmā). It was founded by Circassians (Muslims from Caucasus) who left their homeland in the second half of the 19th century when it was annexed to Christian, czarist Russia. The houses of the picturesque village are laid out around a single, large, closed quadrangular courtyard. In 1969 Rihāniyya had 415 inhabitants; in 2002, 947.

[Efraim Orni]

RIJEKA (It. **Fiume**), Adriatic port in Croatia, until 1918 in Austro-Hungary; after World War I until 1945 in Italy. There were some Jews in Fiume during the 16th century under Austrian rule. Fiume was declared a free port in 1717 and attracted more Jews. When in 1776 it became attached to Hungary as its port, Jews from Hungary began to settle there, but until the mid-19th century the majority of Jews were Sephardim from *Split and *Dubrovnik, who followed the *minhag Ispalatto* (Spalato, "Split"). After 1848 with the influx of Hungarian, German, Bohemian, and Italian Jews, Italian and German rites were also used. A *hevra kaddisha* was founded in 1885; there were three cemeteries and a modern style synagogue was built in 1902. In 1900 there were 2,000 Jews in Rijeka. The congregation remained the only independent Orthodox one in Italy after the 1930 reforms. Children were sent to public schools – German, Hungarian, Italian, or Croatian ones – due to the heterogeneous composition of the population. The sermons were also delivered in German or Italian. In 1920 there were 1,300 Jews in Rijeka and in nearby Abbazia (Opatija), dropping to just 136 on the eve of the war.

Holocaust Period

In 1938 the racial laws of Fascist Italy were promulgated; Jews

with Italian citizenship were subject to discrimination, and foreign Jews were to be interned in camps. Giovanni Palatucci, head of the foreigners' section of the Fiuman police, procured "Aryan" papers for Jews and sent many Jews to his uncle, a bishop in southern Italy, and later to institutions for people rendered mentally incompetent by the war. After the conquest of Yugoslavia by the Germans in April 1941, the Italian Second Army occupied Dalmatia and some other parts of the quisling "Independent Croatian State." Some Italian officers collaborated with Palatucci and his group, sending to him some 500 Jewish refugees from Croatia who were thus saved. When Italy capitulated to the Allies in September 1943 and Germans occupied all Italian territories, Palatucci remained at his post, destroyed his files, and warned the Jews of their imminent arrest. Most of them survived. Palatucci was arrested in September 1944 and died in Dachau in 1945.

Contemporary Period

When Rijeka became part of Yugoslavia in 1945, many Italian-speaking Jews left for Trieste and Italy; in 1947 there were some 170 Jews in Rijeka and the surrounding area. The community numbered 99 in 1969. Following the evacuation of Bosnian Jews from the war zone in 1992, around 60 families reconstituted the community, but many subsequently left for Zagreb and other localities in northern Croatia, leaving fewer than 100 Jews in 2004.

RIKLIS, MESHULAM (1923–), financier. Born in Istanbul, Turkey, Riklis was taken to Palestine as a child. He became a member of a kibbutz, and during World War II served in the British Army. After the war he emigrated to the United States, where he received an MBA from Ohio State University. To pay for his tuition, he worked full time as a teacher of Hebrew and Jewish history. He began his business career working for an investment house in Minneapolis, Minnesota. In 1954, backed by a group of Minneapolis investors, he began to amalgamate corporations into giant conglomerates. McCrory and Glen Alden Corporation, in which Riklis held large interests, belonged to the leading holding companies in the field of manufacturing and distributing consumer goods. Known as the father of the leveraged buyout, Riklis used borrowed money to purchase undervalued companies, then used those assets to provide the leverage for larger takeovers. In the early 1980s he became chairman and CEO of the Riklis Family Corporation, the successor to Rapid-American, a former public company that he had been made private in 1981. Riklis then became chairman of the privately held retail chain McCrory. His other holdings have included companies such as the Riviera Hotel and Casino in Las Vegas. He also owns a large shopping mall in Virginia.

Riklis was married to entertainer Pia Zadora from 1977 to 1993. In 1988 the couple purchased Pickfair, the former

Beverly Hills estate of film legends Mary Pickford and Douglas Fairbanks. They generated a wave of criticism when they demolished the Hollywood landmark and rebuilt it to three times its size.

Riklis has been prominent in many Jewish institutions and active in the United Jewish Appeal. He was a generous supporter of the Jewish Theological Seminary of America, Brandeis University and of Martin Luther King's institutions as well as many public institutions in Israel.

RIMINI (Heb. אַרְמִינִי), city on the Adriatic coast of Italy. There is evidence of the existence of a Jewish colony in Rimini from the beginning of the 12th century, which dealt in local commerce and in trade connected with the port. Under the benevolent rule of the Malatesta, Jewish moneylenders appeared there in the 14th century and carried on their business successfully, showing considerable initiative. Accounts of Jewish moneylending in and around the town mention names of bankers from Rimini: one of them, Menahem b. Nathan, left money in 1392 for the repair of the walls of Rome, his native city, and for improvements in the harbor of Rimini. Jewish bankers from Rimini were also active in moneylending in Modena in 1393 and subsequently in Padua. A century later the Franciscan Bernardino da *Siena visited the town and unsuccessfully tried to rouse anti-Jewish feeling there. Between 1521 and 1526 Gershom *Soncino worked in Rimini where he printed eight books. Jewish association with Rimini presumably ended with the expulsion from the Papal States in 1569. In 1587–89, 17 Jewish loan banks were authorized to be set up there in consequence of the tolerant policies of Pope Sixtus V, but the Jews were driven out again by the reactionary bull of 1593. In the first stages of the Italian war of independence, a platoon including about 20 Jewish volunteers fought the Austrians at Rimini (1831).

[Ariel Toaff]

RIMMON, apparently an epithet used in Damascus for the chief Aramean god, Baal-Hadad. Naaman and his master, the king of Syria, are said to have worshiped in the "Temple of Rimmon" (11 Kings 5:18). Akkadian texts equate the Mesopotamian weather god, Adad, with the god Rammanu (perhaps derived from Akkadian *ramāmu*, "to thunder"), and it is thought that the Arameans may have transferred the latter name to their own chief god. The name Rimmon was used as a theophoric element in the names of both Tabrimmon (1 Kings 15:18), and Hadadrimmon (Zech. 12:11).

[Chayim Cohen]

RIMMON-PEREZ (Heb. רִמּוֹן-פֶּרֶז), an encampment of the Israelites in the wilderness of Sinai, situated between Rithmah and Libnah (Num. 33:19–20). The location of the camp depends upon the view taken of the route of the *Exodus. Those following the traditional southern route locate Rithmah at Bi'r al-Ratama and Libnah at Bi'r al-Bayḏā' (Ar. Bayḏā' and Heb. Libnah (*livnah*) "white"). Rimmon-Perez would then be situated near a well in the Wadi May'ayn, close to the Naqb al-Biyār, one of the main passages through the eastern mountains of Sinai, about 19 mi. (30 km.) west of Akaba. On the other hand, those who see a northern route look for some site east of Hazeroth ('Ayn Hasra?) near Jebel Halāl.

[Michael Avi-Yonah]

RIMOCH, ASTRUC (14th–15th century), physician from Fraga, Aragon. Rimoch was close to the circle of poets under Solomon da *Piera. During the anti-Jewish riots of 1391, he was active in collecting funds to ransom the community from the rioters. A letter of encouragement and comfort which he sent to a Jew of Monzón, dating from the same period, is extant. It states that his father and brother converted to Christianity and reveals interesting details on the divisions within many Jewish families as a result of the riots – when some of their members abandoned their religion, while others remained faithful. During the *Tortosa disputation Rimoch converted to Christianity and changed his name to Franciscus de Sant Jordi. After his conversion, he wrote a letter to his friend Shealtiel Bonafos in order to persuade him to convert as well. The poet Solomon *Bonafed, a friend of Bonafos, replied to this sharply.

RIMON, JACOB (1902–1973), Hebrew writer. Born in Poland, he was taken to Palestine in 1908 by his family. From 1921 he worked for the communal council of Jaffa-Tel Aviv and later became secretary of the social welfare department. He was among the founding members of *Ha-Po'el ha-Mizrachi and the *Torah va-Avodah movement. He published poetry, prose, and children's stories.

His books of poetry are *Hishtappekhut* (1926), *Arzi* (1928), *Seneh* (1946), *Ke-Leket Shibbolim* (1966), and *Bi-Shevilei he-Amal* (1968). Rimon is one of the few Orthodox Hebrew poets, and his poetry is imbued with a deep religious faith. His novels include *Arzenu ha-Kedoshah* (1935) and *Hulyot be-Sharsheret* (1957). Among his other works are *Yehudei Teiman be-Tel Aviv* ("Yemenite Jews in Tel Aviv,"

1933) and *Asher Sipparti le-Nekhdi* (1969), stories for young people.

BIBLIOGRAPHY: Kressel, *Leksikon*, 2 (1967), 870.

[Getzel Kressel]

RIMON (Granat), JOSEPH ZEVI (1889–1958), Hebrew poet. Born in Poland, he was educated in the yeshivot of Lida and Warsaw and came under the influence of Hillel *Zeitlin. He immigrated to Palestine in 1909, and served as secretary of Kolel Varsha ("the Warsaw community"). As a result of his association with members of the Second Aliyah, especially J.Ĥ. *Brenner and A.S. *Rabinovitz, he worked on the newspapers of the labor movement, *Ha-Po'el ha-Za'ir* and *Ha-Ahдут*. He became a teacher in the religious school Tahkemoni in Jaffa and worked as a librarian in Haifa. During World War I, he taught in Petaḥ Tikvah. In 1921, after being savagely mutilated by rioting Arabs, he secluded himself in the Ari Synagogue in Safed for many years, delving deeply into the study of the Kabbalah and of the Zohar. In 1939, he returned to Tel Aviv and his family. His first poem appeared in 1908 in *Ha-Perahim*, the weekly of Israel Benjamin *Levner. After his immigration to Palestine, he published his poems in most of the Palestinian newspapers. His volumes of poetry include: *Leket Shirim* (1910), *Devir* (1913), *Ba-Mahazeh* (1916) and *Ketarim* (1944). Rimon's poetry is religious in quality and has established for itself a unique place in modern Hebrew literature. The sole ambition of the poet, apparently, was to know God by the aid of asceticism and abstinence from the world of the senses, and by immersing himself in the depths of his inner being. His book, *Azei Hayyim*, essays on outstanding Jewish leaders, appeared in two volumes in Jerusalem (1946, 1950).

[Yonah David]

°RINDFLEISCH, German knight, instigator of the massacre of thousands of Jews in 146 localities in southern and central Germany in 1298. The background for the slaughter was a series of *blood libels in *Mainz (1281, 1283), *Munich (1285), Oberwesel (1287), and the accusation of Desecration of the *Host in Paris in 1290. On April 20, 1298, in the small Franco-nian town of Roettingen, 21 Jews were attacked and massacred by a mob led by Rindfleisch, who urged revenge for alleged Desecration of the Host. Rindfleisch subsequently went from

town to town, followed by a plunder-hungry mob, exhorting the burghers to annihilate the Jews. A wave of massacres swept through Franconia, Swabia, *Hesse, *Thuringia, and finally Heilbronn (Oct. 19, 1298). The protector of the Jews, Emperor Albert I of Austria, was preoccupied with warfare, and only after vanquishing his rival, Adolf of Nassau, did he proclaim a *Landfriede* ("peace of the land"), warning against further attacks. This proclamation was barely heeded, and Jews continued to be massacred at *Gotha (1303), Renchen (1301) and Weissensee (1303). The Jewry of *Augsburg was saved through the steadfast protection of the municipality, as was that of *Regensburg. In *Nuremberg, 728 Jews were slaughtered when a mob stormed the castle in which they had sought to defend themselves with the aid of the garrison. Among the victims of Nuremberg were *Mordecai b. Hillel, his wife, and children. The council thereafter banished 20 persons in perpetuity. A number of *kinot* and *seliḥot* were composed in commemoration of the tragedy, which was most fully recorded in S. Salfeld's *Das Martyrologium des Nuernberger Memorbuchs* (1898).

[Reuven Michael]

RINGEL, MICHAEL (1880–?), Zionist leader in Galicia and Poland. Born in Borislav, Galicia, Ringel began his Zionist activity in high school. He practiced law in Vienna and several Galician towns. In 1908 he settled in Lemberg. Ringel worked on behalf of the Zionist Organization in the election campaigns to the Austrian parliament. He wrote pamphlets and hundreds of articles in Polish-language Zionist journals to foster Zionist ideas in Polish-speaking circles, Jewish and non-Jewish alike. His greatest contribution was to the Zionist daily *Nowy Dziennik* of which he was a founder. He also wrote in the Yiddish press in Galicia. After World War I he was, together with L. *Reich, among the leaders of the Zionist Organization and participated also in the *Comité des Délégations Juives at the peace conference in Paris. In 1922–27 he was a member of the Jewish Club (Kolo Zydowskie) in the Polish senate. A collection of his speeches in the senate concerning the Jewish problems in Poland was published in 1928. He was one of the attorneys for the young Jew who was accused of attempting to kill the president of Poland (see *Steiger Trial). During the Soviet occupation of Lvov in 1939–41, he was deported to the Soviet interior and nothing is known of him thereafter.

[Getzel Kressel]

RINGELBLUM, EMANUEL (Menahem; 1900–1944), historian of the Warsaw ghetto. Born in Buczacz, eastern Galicia, Ringelblum graduated from Warsaw University and subsequently taught history at a high school. He published a

number of articles, mainly on the history of Warsaw Jewry, in which (influenced by the historian Ignacy Schiper) he stressed social and economic problems. He was a member of *YIVO, and in 1928 a founder of the "Circle of Young Historians" in Warsaw, which published the periodical *Der Yunger Historiker*. Throughout his life, Ringelblum combined public activity with his academic work. He was active in the left-wing Po'alei Zion and participated in the work of the Yiddish schools' association (*Tsentrale Yidishe Shul-Organizatsye*). From 1929 he was editor of *Folkshilf*, the publication of the Jewish cooperative funds. In 1938 the American Jewish *Joint Distribution Committee sent him to the frontier townlet of Zbaszyn, where 17,000 Jews who were Polish nationals living in Germany had been gathered and left destitute after being suddenly deported over the Polish border from their places of residence. They were caught in no man's land unable to enter Poland. Ringelblum directed relief work, collected testimonies from the deportees, and gathered information on events in Nazi Germany.

During the siege and air attacks on Warsaw, Ringelblum was a regular participant in the activities of the coordinating committee of Jewish-aid organizations. Later, when the Juedische Soziale Selbsthilfe (JSS) for self-help was formed out of this committee, Ringelblum headed the department to rally the Jewish population to mutual assistance, including help to the needy and shelter to the deportees and those whose homes had been destroyed. In the course of this work, Ringelblum kept in constant contact with active sources of information in the community at large, from whom he received reports and evidence on events in the capital and provincial towns at a time when there was no press other than the Nazi-approved and -controlled press.

Ringelblum understood that what was happening to Polish Jewry was without precedent and correctly perceived his efforts as providing the basic raw material for future histories of the ghetto and of Polish Jewry during the war. The work that Ringelblum directed is widely regarded as an essential manifestation of spiritual defiance, working against all Nazi efforts to eradicate memory and correctly believing against hope and against all odds that Jews somewhere, if not in Poland, would be able to write their own history of the killings and not rely on German documentation alone.

He recorded this information himself and directed his assistants, whose numbers steadily grew. Thus, a large and diversified enterprise was established for the collection of documents, reports, evidence, summaries, and even research work, memoirs, and literature produced during the period. The secretary of the underground archive reported that "every item, every article, be it long or short, had to pass through Dr. Ringelblum's hands." Most noteworthy is the collection of clandestine newspapers in various languages. The enterprise was given the code name Oneg Shabbat (literally "Enjoyment of the Sabbath") and employed dozens of workers directed and encouraged by Ringelblum. He also made efforts to have this material transmitted to London and through London

to the West. His efforts led to the first word of the killings at Chelmno and the deportations of Warsaw Jewry. After the massive deportation of the summer of 1942, Ringelblum became a believer in armed resistance. After the great deportations, he worked with renewed urgency; no longer dealing in details, he sought to grapple with the larger issues of ghetto life in an attempt to comprehend what was happening. He created biographical notes on some of the great figures in the ghetto. Before the ghetto was destroyed, collections of material were put in containers and buried in three – or perhaps more – caches.

Ringelblum left the ghetto with his wife and young son and returned to the ghetto alone during the Uprising. What precisely happened to him is not known but he was arrested and found in the Trawniki camp. Two people arranged for his escape and he was brought to Warsaw, where he was hidden with other Jews.

He worked to the very end. This work even continued in the “Aryan” district after the destruction of the ghetto. In hiding he composed his master work on Polish–Jewish relations during World War II. The Gestapo discovered his hiding place in the “Aryan” district on March 7, 1944, and he and his family were arrested and murdered.

After the war, only two caches were recovered from the ruins, the third never coming to light. The material discovered became the property of the *Jewish Historical Institute in Warsaw (there are photocopies in *Yad Vashem, Jerusalem, and the United States Holocaust Memorial Museum). In the 1990s extensive efforts were made to preserve this documentation and to translate and publish this invaluable material. The Oneg Shabbat material is the main source for research into the history of Polish Jewry under German occupation.

Ringelblum’s own notes, summaries, and essays, written during the occupation, were published after the war in *Ksovim fun Geto* (2 vols., 1961–63; *Notes from the Warsaw Ghetto*, ed. and tr. by J. Sloan, 1958). He also wrote *Kapitlen Geshikhte fun Amolikh Yidishn Lebn in Poyln* (1953) and *Di Poylishe Yidin in Oyfshtrand fun Kościuszko 1794* (1937).

RINGER, ALEXANDER L. (1921–2002), U.S. musicologist. Born in Berlin, Ringer was educated in Berlin and Amsterdam. Ringer was interned in the *Bergen-Belsen concentration camp in 1943–44. After World War II he emigrated to the U.S., where he received a Ph.D. from Columbia University in 1955. He held positions at various American universities until

he joined the faculty of the University of Illinois, where he was made professor in 1963, and remained until his retirement. In 1964 he was invited by the Hebrew University of Jerusalem to lay the groundwork for the first Department of Musicology in Israel. He was a founder and honorary member of the International Kodaly Society and general editor (together with others) of the collected edition of Schoenberg’s writings. Among his diverse research interests was his search for elements of “Jewishness” in the music of well-known Western Jewish musicians, such as *Mahler, *Mendelssohn, *Milhaud, E. *Bloch, *Kirchner, *Rochberg, and, in particular, Kurt *Weill and Arnold *Schoenberg, who received special attention in Ringer’s writings. He was also a great believer in music education. The figure who had most influenced his thinking and attitude in this respect was the Hungarian composer Zoltán Kodály, the initiator of a special method of teaching music.

Ringer represented a higher type of intellectual with wide learning and command of major European languages, and a versatile musicologist who was distinguished by a strongly individual character which impressed itself on everything he wrote. His 167 works spanned an incredible range of subjects, including many synthetic studies on historically, culturally, and esthetically important trends and styles, and sociological issues affecting music. Among his major works are *The Early Romantic Era: Between Revolutions, 1789 and 1848* (1990); *A. Schoenberg – the Composer as Jew* (1990); *Musik als Geschichte*; and his last book, published posthumously: *Arnold Schoenberg: Das Leben im Werk* (2002).

[Amnon Shiloah (2nd ed.)]

RINGL+PIT, German-born photography team consisting of **Ellen Rosenberg Auerbach** (1906–2004) and **Grete Stern** (1904–1999), who achieved fame as an avant-garde pair in the Weimar Republic in the 1930s and later had individual careers of distinction in the United States and Argentina.

Rosenberg, better known by her married name, Auerbach, was born into a liberal Jewish family in Karlsruhe, Germany. After high school, she decided to become an artist and studied sculpture for three years at an art school in Karlsruhe and, in 1928, at the Academy of Art in Stuttgart. While studying there, her uncle gave her a camera and she abandoned sculpture, primarily because she thought she might earn a living as a photographer. She sought out Walter Peterhans, a member of the Bauhaus design movement, in Berlin where he maintained a successful commercial studio, and asked to be his student. He agreed, and for these lessons she was joined by another private student, Stern. The young women quickly became friends. When Peterhans decided to close the studio, they took over the premises and operated as Ringl + Pit, a name that combined their childhood nicknames. Stern was Ringl and Rosenberg was Pit. The name had the advantage of being ambiguous in terms of gender and ethnicity. It was probably the first photographic business of its type founded by women.

To have combined their surnames, Rosenberg said, would have “sounded too much like a firm of Jewish dressmakers.”

At the time, the German advertising industry was booming and the team gained a reputation for innovative work. They also came to know – and photograph – leading cultural figures, such as Bertolt Brecht. Despite the commercial nature of their commissions, Ringl+Pit played with form and perspective to demonstrate the influence of Surrealism, as in their use in 1930 of a mannequin with a real hand to sell hair tonic. The firm was widely used by mainstream manufacturers to sell cigarettes and motor oil but in 1933, shortly after one of their still-life collages won first prize at an international photography exhibition in Brussels, they decided to leave Germany. Stern, who had a small inheritance, went to England and lent Auerbach money to go to Palestine. She was accompanied by her future husband, Walter Auerbach, a theater designer. They opened a children's portrait studio in Tel Aviv (a strong image of an Arab boy, snapped in the street in Jaffa, survives from 1934) and she took photographs for the Women's International Zionist Organization. Auerbach soon went to London and set up a studio but was unable to get a work permit. She then went to the United States and Stern to Buenos Aires, Argentina, in 1935. Relatively few examples of Ringl+Pit's work of the period have survived but they have become eagerly sought by museums and collectors. Politically, Walter Auerbach was an active leftist but his wife stayed out of politics, although she socialized with many left-wing artists. One of her more startling images shows Brecht at his typewriter with a light bulb sprouting from the back of his head. The Auerbachs, who had no children, divorced in 1945. Ringl+Pit were separated for ten years by World War II. They never worked together again but they remained lifelong friends.

In the United States, Ellen Auerbach took a number of powerful images of children but she never recaptured her professional status. Her growing interest in children led her to become a therapist, working with learning-disabled children, a career she pursued from 1965 until 1986, when she was 80. The rediscovery of her work was helped in part by the publication of two books of photographs, *Mexican Churches* (1987) and *Mexican Celebrations* (1990), which she had originally taken on a long journey in 1955 with a fellow photographer, Eliot Porter, brother of the artist Fairfield Porter.

In Argentina, Stern brought the idea of modernist photography to the country and was an important influence on the development of photography there. She made a long series of photomontages such as “Niño Flor” (Flower Child) in 1948 and “Made in England” in 1950 to illustrate a number of articles about psychoanalysis and dreams. She was also a portraitist, taking pictures of Brecht and Jorge Luis Borges, as well as documenting Argentine cities and regions.

In 1996 a documentary about Ringl+Pit won a number of awards and was shown in Berlin, Tel Aviv, London, and New York and on public television in the United States. Stern died in Buenos Aires, Auerbach in New York.

[Stewart Kampel (2nd ed.)]

RIO DE JANEIRO, state in the United States of Brazil; capital of the state and capital of the Republic until 1960 (when the capital was transferred to Brasília); area of the state: 43,696 km²; population: 14,391,282 (2000); population of the city: 6,094,183 (2005); estimated Jewish population: 30,000 (2000).

New Christians from Portugal immigrated to Rio de Janeiro from the 16th to the 18th centuries, and they played a significant role in the city's social and economic life. The Inquisition accused and prosecuted more than 300 New Christians in the city's region for practicing Judaism. With the proclamation of the independent Brazilian empire (1822) and the promulgation of the Constitution (1824), which espoused relative religious tolerance, some individual European Jewish dealers and immigrants began to appear in Rio de Janeiro, which was the capital and one of the most important harbors of the country. One of the prominent individuals among these first newcomers was Denis de Samuel (1782–1860), a young immigrant from England who gained great success and influence and earned the title of baron from the king of Portugal. Another prominent dealer who had business in Rio de Janeiro was Bernard Wallerstein.

The first attempt at communal organization was made in 1840–50 by Jews originating from Morocco who went to Rio de Janeiro from northern Brazil. The organization União Shel Guemilut Hassadim, which still exists, ascribes its origin to this attempt. In 1867 a council of the Alliance Israélite Universelle was established in the city. In 1873, Sociedade União Israelita do Brazil, a society for religious and welfare matters was registered; it continued its activities until 1893. Another institution of the imperial period was Sociedade Israelita do Rito Português (Jewish Society of the Portuguese Rite).

At the time of proclamation of the Republic (1889) the number of Jews in Rio de Janeiro was estimated at 200. In 1900 there were two synagogues, one formed by North African immigrants and the other by West European immigrants. In 1900 a new wave of Jewish immigration began, and by the end of World War I the city's Jewish population was estimated at 2,000.

A great wave of Jewish immigration to Rio de Janeiro occurred after World War I, and as the Jewish community grew, communal life became more diversified. The Jewish community established a well-organized institutional life and reached successful economic, social, and cultural integration into local culture and society.

In 1910 the Centro Israelita do Rio de Janeiro was founded; its principal objective was the establishment of a synagogue and a cemetery. The latter was founded in 1920 in Vila Rosali. The first philanthropic institution was established under the name Achiezer in 1912; its name was changed later (1920) to Sociedade Beneficente Israelita e Amparo aos Imigrantes (Hilfs-Ferein-Relief). The “Relief” was linked to ICA, HIAS, and Emigdirect, and in 1942 founded a Departamento de Seguro Mútuo Social (Department of Mutual Social Insurance), which in fact was a credit cooperative.

Other social institutions founded were: Sociedade das

Damas Israelitas (Jewish Women's Association – Froein Fa-rein, 1923); Lar da Criança Israelita (Jewish Children's Home, 1923); Policlínica Israelita (1937, that later became a hospital); and Lar da Velhice (Old Age Home, 1963), created by Sociedade das Damas Israelitas). Jewish women prostitutes founded in Rio de Janeiro the Associação Beneficente Funerária e Religiosa Israelita (Beneficent, Funeral, and Religious Jewish Association) that functioned from 1906 to 1968.

During World War II the Jewish community was active and founded the Comitê Hebreu-Brasileiro para as Vítimas da Guerra (Jewish Brazilian Committee for War Victims) and the Comitê de Socorro aos Israelitas Vítimas de Guerra (Aid Committee for Jewish War Victims). The writer Stefan Zweig immigrated to Brazil in 1936, joined the Jewish community, and wrote a famous book about the country: *Brasil, país do futuro*. His suicide in 1942 (together with his wife, Lotte), in the countryside city of Petrópolis, was a notable event in the life of the Jewish community and Brazilian history.

The community had its social and cultural center in the Praça Onze, close to the downtown area and the port, where an atmosphere of “*Yiddishkeit*” was present in daily life until the 1950s, when the Jews moved to other neighborhoods. The writer and Zionist leader Samuel Malamud is the main narrator of the memories from Praça Onze and of Jewish life in Rio de Janeiro. In Praça Onze, also the center of the local Carnival and a cultural and social meeting point for black people, almost 3,000 Jews frequented the socialist club Cabiras, the parties of the Azul e Branco Club, and other local non-Jewish institutions.

The Zionist movement and the socialist groups were both very active in Rio de Janeiro. The First Zionist Congress in Brazil took place in 1922 with the participation of four different movements, including Tiferet Sion (1919). In 1921 a Brazilian delegate took part in the 12th Zionist Congress in Karlsbad. In 1929 a Brazilian delegate to the 16th Zionist Congress was elected by 1,260 votes. In 1934 the elections drew 2,647 voters. In 1927 the Central Committee of the Po'alei Zion Party was founded and later the Grêmio Hebreu-Brasileiro (Hebrew-Brazilian League).

Many Jewish leftist movements and parties were very active in Rio de Janeiro, among them socialists, communists, and the Bund, in the Biblioteca Israelita Brasileira Scholem Aleichem (Jewish Brazilian Scholem Aleichem Library, 1915), Colégio Israelita Brasileiro Scholem Aleichem (Jewish Brazilian Scholem Aleichem School, 1928), Sociedade Brasileira Pró-Colonização Judaica na União Soviética – Brazkor (Brazilian Society for the Jewish Colonization in the Soviet Union, 1928), and Centro Operário Morris Vinchevsky (Morris Vinchevsky Labor Center, 1928). The last two organizations founded a workers' school (*Arbeter Shule*) and edited the newspaper *Der Onheib*. Other leftist organizations were the União Cultural Israelita Brasileira Ikuf, Clube dos Cabiras (1941–50), the Associação Feminina Israelita Brasileira Vita Kempner, and the Associação Kinderland. In 2005 the Associação Scholem Aleichem (ASA) was an active political and cultural center and edited the *Boletim da ASA*, the sole Jewish leftist publication in Portuguese.

The Yiddish press was very active in Rio de Janeiro with the publication of a few newspapers: *Dos Yidishe Vochenblat*, *Yidishe Presse*, and *Brazilianer Yidishe Tzaytung*. Other important publications in Portuguese were the weekly magazine *Aonde Vamos?*, and *O Reflexo*. Adolf Eizen was a Brazilian pioneer of comics.

Later Developments

The Jewish community of Rio de Janeiro is the second largest Jewish community in Brazil, after São Paulo. The community has a solid network of institutions and a very active religious, social, political, and cultural life and is well integrated in the city's and the state's social and cultural life.

In 2005 there were 80 entities affiliated with the Federação Israelita do Estado do Rio de Janeiro (Jewish Federation of the State of Rio de Janeiro – FIERJ, founded in 1947), among them 30 synagogues, five schools, four other non-formal educational institutions and youth movements, Zionist women's organizations, beneficent and social assistance entities, sport and cultural associations. These institutions include: Organização Sionista, B'nai B'rith, Sociedade Beneficente das Damas, Lar da Criança Israelita, Sociedade Beneficente Israelita Hospital Albert Einstein, Hebraica, Monte Sinai, and Clube Israelita Brasileiro. In 1979 a Jewish industrialist, Israel Klabin, became the mayor of the city of Rio de Janeiro. FIERJ has a weekly TV program and is very active in political issues concerning the Jews in Brazil.

According to official numbers of FIERJ, 3,000 students attended the Jewish day schools: Eliezer Steinberg–Max Nordau, Colégio Israelita Brasileiro A. Liessin–Scholem Aleichem, Bar Ilan (Zionist religious), ORT, and the Machané Or Isreal and Beit Menachem (both non-Zionist Orthodox).

Rio de Janeiro has a variety of synagogues, from ultra-Orthodox to Reform-Liberal, Ashkenazi and Sephardi, with imposing edifices and tiny *shtetls*. The Associação Religiosa Israelita (ARI) was founded by German Jewish immigrants in 1942 and follows a Liberal tradition. With a membership of 850 families, ARI supports Lar União – Associação Beneficente Israelita (founded in 1939) and the youth Zionist movement Chazit. ARI is the first synagogue in Brazil to have a woman as a rabbi and is very active in inter-religious dialogue and in cultural events in the city.

Congregação Judaica do Brasil (CJB) is a small Reform synagogue. Under the guidance of Rabbi Nilton Bonder, CJB was the most active Jewish presence at the NGO Global Forum during “Eco-92”, the United Nations ecological conference held in Rio de Janeiro in June 1992. Bonder is the author of many books about Judaism that became bestsellers in Brazil. There are programs for Jewish studies and Hebrew in both the Federal University and the State University of Rio de Janeiro.

Jewish Organizations in the Interior of the State of Rio de Janeiro

Niterói has had an organized Jewish community since 1916. Its activities include religious services, with a synagogue and

a cemetery, and it maintains a local school and organizes cultural and social activities. Petrópolis is a resort city for the residents of Rio de Janeiro. Its community is small, but it nevertheless established a yeshivah to train rabbinical students. In Nilópolis, situated on the route of the central railway of Brazil, a Jewish community was organized in the 1920s with a Centro Israelita (1936), the Sh. An-Ski complementary school, a synagogue, the Macabi club, Wizo, and a Yiddish theater group. In 1947, when Nilópolis became a city, there were 300 families, but later all the members moved to other cities. In Campos, the Sociedade União Israelita de Campos was established in 1929 by 40–50 families.

[Roney Cytrynowicz (2nd ed.)]

RISCHIN, MOSES (1925–), U.S. historian. Born in New York City, Rischin received his Ph.D. from Harvard University in 1957. His work was centered on American, intellectual, Jewish, social, immigration, and urban history. He was appointed professor of history at San Francisco State College (later University) in 1964, and was also director of the Western Jewish History Center at Berkeley, California. He became professor emeritus at San Francisco State in 2002 upon his retirement.

Rischin's works include: *Inventory of American Jewish History* (1954); *Our Own Kind: Voting by Race, Creed, or National Origin* (1960); *The Promised City: New York's Jews, 1870–1914* (1962); *The American Gospel of Success* (1965); *Immigration and the American Tradition* (1976); and *Jewish Legacy and the German Conscience* (with R. Asher, 1991). He also edited Hutchins Hapgood's *Spirit of the Ghetto* (1967); Abraham Cahan's *Grandma Never Lived in America* (1985); *The Jews of North America* (1987); and *Jews of the American West* (with J. Livingston, 1991).

[Samuel J. Hurwitz / Ruth Beloff (2nd ed.)]

RISHONIM (Heb. רִשְׁוֹנִים; lit. “the early authorities”), a term with many connotations – chronological, literary, ethical, and halakhic – serving to indicate the standing and authority of preceding scholars in relation to the scholars of the time in the domain of halakhic ruling and interpretation of the Torah. The distinction between “*rishonim*” and contemporaries is already found in the Talmud, which stresses the deterioration in worth of the generations as they progressively become further removed in time from Sinai; e.g., “If the *rishonim* were as an-

gels, we are as men, and if the *rishonim* were as men, we are as donkeys” (Shab. 112b). The natural ambivalence involved in the practical use of this term was first raised in the later geonic literature, which set against this assessment the halakhic rule that “the law is in accordance with the later authority” (*Seder Tanna'im ve-Amora'im*, no. 25), the reason being either because these “were more painstaking than the *rishonim* in clarifying the *halakhah*” (Tos. to Kid. 45b), or because these had already seen and taken into consideration the reasoning of their predecessors and were therefore, in the words of the well-known proverb, like “a dwarf sitting on the back of a giant” (see Zedekiah b. Abraham, introd. to *Shibbolei ha-Leket*, in the name of Isaiah di Trani, S.K. Mirsky, ed. (1966), 107f.). Various limitations were made to this rule in order to reconcile these two contradictory statements (see Rabbinical *Authority). Moses *Alashkar (Responsa nos. 53–54) already grasped the full import of this ambivalence, attempted to draw all the conclusions from it, and limited the application of the rule that the law is in accordance with the later authority to the pre-geonic period, but his was a solitary opinion.

Nevertheless, it is clear that the actual division into “periods” stems from the profound and general recognition that there is indeed a progressive decline in importance and authority with the passage of time. Hence it was also laid down, at least formally, that it is altogether impossible to controvert the early scholars in general and the *geonim* (see **Gaon*) in particular. In this matter, too, contradictory lines of approach have existed side by side throughout the generations. The term “*rishonim*” is now used to indicate a more or less well-defined period in the history of rabbinic literature; namely, the period between that of the *geonim* and the *rabbinate; the latter, called the period of the **aharonim*, continues to the present day. The exact dates establishing the limits to these periods are not precise and unchallenged, but neither are they of great practical importance. Historically the period of the *rishonim* commences with the eclipse of the Babylonian academies and the beginning of independent Torah centers throughout the Diaspora, and terminates shortly after the renewal of ordination (**semikhah*) by *Meir b. Baruch ha-Levi, which brought about a great change in Europe in the order of Torah study and its transmission from teacher to pupil. In general, the death of *Hai Gaon is accepted as the close of the geonic period. Accordingly, the period of *rishonim* begins in Spain with *Samuel ha-Nagid, in Germany with Gershom b. *Judah, and in North Africa with *Nissim b. Jacob and *Hananel b. Hushi'el. The last scholars who are regarded as *rishonim* are *Nissim b. Reuben and his pupil *Isaac b. Sheshet in Spain, the first members of the *Duran family in North Africa, and in Germany Jacob b. Moses *Moellin and Israel *Isserlein. The period of the *rishonim* thus extends from the middle of the 11th to the middle of the 15th centuries. Unlike the Middle Ages in general history, the intermediate period of the *rishonim* bears no implication of a transition from a period of cultural darkness to one of enlightenment. On the contrary, as stated, the generations are regarded as being on the decline, the spiritual stature of the early

scholars being held as greater than that of their successors. The chief significance of the division into periods is psychological, its importance being methodological and chronological and valuable mainly as a conventional nomenclature.

From the point of view of literary history, the period of the *rishonim* is differentiated from that of the *geonim* by a process of subdivision into separate literary genres; i.e., the composition of books with distinctive contents in distinctive literary forms in accordance with their contents, such as *ethics and philosophy, and in the domain of *halakhah*, **tosafot*, **pesakim*, **hassagot*, **haggahot*, **responsa*, novellae (**Hiddushim*), biblical exegesis, etc. This process which reached the zenith of its efflorescence in the 11th century, brought in its wake an improvement in the means of expression. In consequence, works belonging to the period of the *rishonim* cover a much wider spectrum than was normal with the *geonim*. They contain more extended discussions, an explicit reliance upon previous scholars, and a marked desire to preserve local traditions and customs. Apart from these general literary aspects, there are no specific phenomena characteristic of the *rishonim*, since there existed great individual differences between the scholars of the east and the west, as well as between those of the west itself, even with regard to such primary problems as the right attitude toward the *geonim*, the degree of authority to be attributed to local regulations, and the authority of great scholars to intervene beyond the borders of their own country.

A list of all the published works of the *rishonim* up to 1959 with subsequent addenda (the last in the Internet journal *Jewish Studies*, vol. 1, 2002, pp. 129–80) was published in *Sarei ha-Elef* (see bibl.).

Additional Publications 1969–1972

From 1969 to 1972, no fewer than about 100 complete halakhic works belonging to the period designated as that of the *rishonim* were published from manuscripts, both critical and partly critical editions, as well as about half as many fragments, both large and small. This remarkable output, equivalent to the appearance of a new work every 10 days, is striking evidence of the flourishing literary activity in this department of rabbinical literature. A new and comprehensive list of all the works of the *rishonim* published since the invention of printing was due to appear in 1973 in a new edition of *Sarei ha-Elef* edited by M. *Kasher. Only the more important of these works and fragments will be surveyed here. Since almost all of them were published since 1970 in Israel (mainly Jerusalem, Tel Aviv, and Bene-Berak, though in many cases this refers only to the actual publishing, the works having been prepared in New York), with a few actually published in New York, the year and place of publication will generally not be given. In the case of fragments, reference is given to the periodicals in which they appeared.

Most of the halakhic works surveyed consist of commentaries on tractates of the Talmud (with a few on Maimonides' *Yad*); about a quarter belong to the field of *responsa*, biblical exegesis (in halakhic vein), halakhic rulings, halakhic

monographs, and the like. This trend represents the publishers' desire to reach the tens of thousands of youths who study in the hundreds of yeshivot in Israel and the free world more than the aim of meeting the need for historical and literary research, in which field the number of scholars engaged is still very limited.

FRANCO-GERMAN SCHOOL. The *Tosafot ha-Rosh* (see *Asher b. Jehiel) to the Talmud has almost been completed with the printing of his commentaries to tractates *Shabbat* (published twice; see below), *Eruvin*, *Rosh Ha-Shanah*, *Gittin* (a complete critical text, based on three MSS), *Kiddushin*, and *Sanhedrin* (see also below). Much progress has been made with the *tosafot* of *Perez b. Elijah of Corbeil with the publication of his *tosafot* to *Berakhot*, *Pesahim*, *Bezah*, and *Bava Mezia*. The publication of the **tosafot* of English scholars (*Hakhmei Angliyyah*; see *Tosafot*, 15: 1281), have been virtually completed with the publication of these works on tractates *Pesahim*, *Bezah*, *Megillah*, *Gittin*, *Kiddushin*, *Bava Kamma*, *Sanhedrin*, *Avodah Zarah*, and *Niddah*. The *tosafot* to the *halakhot* of Isaac *Alfasi by *Moses b. Yom Tov of London on *Kiddushin* have also appeared.

In addition to these actual *tosafot*, important works by the Franco-German tosafists have also appeared. Of great importance is "A Commentary from the School of Rashi on Tractate *Sukkah*" (*Sinai*, 63 (1970)). The *tosafot* of Sens (see *Samson b. Abraham of Sens) to *Makkot*, *Avodah Zarah* (printed in *Shittat ha-Kadmonim* to *Avodah Zarah*) and *Mishnah Shevi'it*, chapters 1–5 (by K. Cahana in *Heker Ve-Iyyun*) completes the considerable number of these *tosafot* hitherto unpublished. The *Tosafot Yeshanim* to the first chapter of *Yevamot* has now appeared in full (HUCA, 40/41 (1970)) and also to *Rosh Ha-Shanah*. Although in effect they belong to the *tosafot* literature, they are not as comprehensive as the first group.

Among the works of the Franco-German scholars that do not belong to *tosafot* literature, the following may be mentioned: *Piskei R. *Jehiel of Paris* (in serial form, *Moriah* (1970/71)); *Piskei R. *Isaac of Corbeil* (*Sinai*, 67 (end of 1970)); a new responsum by *Hayyim b. Isaac, "Or Zaru'a" (*Sinai*, 66 (1970)); a series of compilations on regulations concerning the writing of Scrolls of the Law, *tefillin*, and *mezuzot* has been published in the important *Kovez Sifrei Setam*. This contains *Kitvei Otiyyot Tefillin* by R. *Judah he-Hasid, an amended edition of the *Barukh she-Amar* by Samson b. Eliezer, and a fine text of the *Tikkun Tefillin* by Abraham of Sinzheim and the *Alfa Beta* of Yom Tov Lipmann *Muelhausen. The unique project of re-editing the *Aguddah* of Alexander *Suslin from manuscripts continues, and the following have thus far appeared: tractate *Berakhot* and the Mishnah of the other tractates to the order *Zera'im*, all the tractates of *Mo'ed*, and *Bava Kamma* and *Bava Mezia*. Of special importance are two anonymous early prayer books from the German school, published under the titles *Siddur Rabbenu Shelomo mi-Germeiza* and *Siddur Hasidei Ashkenaz*, which include Ashkenazi material that in some small part ante-date Rashi. In addition, the first com-

plete edition from manuscripts and printed sources of *Jacob b. Asher's biblical commentary, *Ba'al ha-Turim*, has appeared. A large new collection of halakhic rulings and responsa by early Franco-German scholars of the 12th and 13th centuries is about to be issued by the *Mekize Nirdamim.

SPANISH SCHOOL. An important achievement is the reissuing of the halakhic works of great Spanish scholars. Although most of the works of *Naḥmanides have long been available, the existing edition is very defective, both as regards mistakes and omissions. About two years ago, Makhon ha-Talmud ha-Yisre'eli ha-Shalem began the comprehensive project of publishing a critical edition of all Naḥmanides' novellae to the Talmud, based on all extant manuscripts and printed editions. Those to the tractates *Makkot*, *Avodah Zarah*, and *Sanhedrin*, with a monograph on *Dinei de-Garme*, have already appeared. A similar project in respect of the works of *Yom Tov b. Abraham Ishbili, the *Ritba*, is being planned by Mosad ha-Rav Kook. A sample page of *Eruvin* was published in *Sinai*, 67 (1970). Of Naḥmanides' works, the following have been published for the first time: *Tashlum Derashat ha-Rambam* "Torat ha-Shem Temimah," the end of which was previously missing (*Tarbiz*, 40 (1971)); supplements to his commentary on the Torah (*Ha-Ma'yan*, 9 (1969)); the hitherto missing fragments from the first 11 pages of *Bava Me'zia* (*Mattityahu*, Yeshivat Netanyah (1972)); *Kelalei ha-Ramban* by S. *Abramson, published by Mosad ha-Rav Kook, a collection gathered from the works of Naḥmanides, with some notes.

Works by other Spanish scholars published include a new and critical edition, based on an excellent manuscript, of the *Hukkot ha-Dayyanim* of Abraham b. Solomon ibn Tazarti, a pupil of Solomon *Adret, the previous edition of which was very faulty (two volumes, the Harry Fischel Institute); the completion of the *siddur* of *Judah b. Yakar, the teacher of Naḥmanides; the commentary of Rabbenu Perez ha-Kohen, the teacher of *Nissim b. Reuben, on the tractate *Nazir*, and to the same tractate by R. Todros b. Isaac of Gerona, early 14th century; the important commentaries of Nissim b. Reuben to tractates *Eruvin* and *Pesahim*; the commentary of *Aaron b. Joseph ha-Levi of Barcelona to tractate *Avodah Zarah* and the *Nimmukei Yosef* of Joseph *Ḥabiba to the same (in the *Shitah Mekubbezet* to that tractate); *Shitah le-Va'al ha-Zerurut* to tractate *Taanit* by *Ḥayyim b. Samuel b. David of Tudela; and fragments from the commentary by an anonymous pupil of Naḥmanides to tractates *Yoma* and *Sukkah* (S.K. Mirski Memorial Volume, New York (1971)); worthy of note are the anonymous commentary to *Kiddushin* published under the title *Shitah Kadmonit* and to *Middah*, by an anonymous scholar of the school of Naḥmanides, published under the title *Hiddushei ha-Ra*. Of the Bible exegetes from this school, worthy of note are the commentary to Genesis and Exodus attributed to a pupil of Nissim b. Reuben and the continuation of the commentary of Abraham b. Isaac *Tamakh on Proverbs 31 (in the Mirski Volume) and on Lamentations 3 (*Ha-Darom*, 28 (1929)).

PROVENÇAL SCHOOL. In contrast to former years, there has been a decrease in the publication of works from the Provençal school, which continues to be largely *terra incognita*. A great amount of effort has been squandered in the republication of the *Beit ha-Behirah* of Menahem b. Solomon *Meiri to about ten tractates based on "manuscripts." Despite the fulsome praise of their editors for the new light they provide, they constitute no improvement of any value over the previous editions printed during the past 30 years and still freely available. Their publication testifies only to the great demand for Meiri's works in yeshivah circles. This superfluous republication borders ethically on an encroachment upon the rights of the authors of the previous editions and is without any justification. An exception, and one of great value, is the publication for the first time of the *Hiddushei ha-Meiri to Eruvin* (up to the end of chapter 4; the remainder in print) by Mosad ha-Rav Kook. The existence of the manuscript had been known for many years and its publication fills a great need. The hitherto unpublished portion of *Hassagot* on Maimonides' *Yad* by Moses ha-Kohen of Lunel to *Nashim*, *Kedoshah*, and *Shoftim*, supplementing the previously published portion to *Madda*, *Ahavah*, and *Zemannim*, has now appeared, and the work is now complete. Of a planned complete and critical edition of the *Sefer ha-Menuḥah* by *Manoah of Narbonne, *Hilkhot Keri'at Shema*, *Tefillah*, and *Berakhot* have already appeared. Other works of Provençal scholars published are *Ezrat Nashim* by *Jacob b. Moses of Begnols; *Hilkhot Ḥamezu-Mazzah ve-Seder Leil Pesah im Perush ha-Haggadah* by an anonymous Provençal scholar, these being published together with fragments of a sermon for Passover by *Abraham b. David of Posquières, which was not extant in manuscript, but has been collated from a number of sources. First published separately in *Ha-Darom* (1972), they have been published together in *Mi-Toratav shel Ḥakhmei Provencs u-Sefarad be-Hilkhot u-ve-Minhagei Pesah*. Important, too, is the recently published commentary by *Jonathan ha-Kohen of Lunel on Alfasi's commentary to *Kiddushin*. Two small fragments hitherto unknown are also worthy of note: a new letter by *Abraham b. Isaac of Narbonne, and the original letter of the scholars of Lunel to Maimonides, in which they asked him to send them "his other scholarly works" (*Tarbiz*, 39 (1970)). Finally, there is a criticism of the New Testament by Joseph b. Nathan *Official, which appeared in the Jubilee Volume for Isaac Kiev, New York (1972), after the *Sefer ha-Mekanne* was published.

ORIENTAL SCHOLARS. Of the works of Oriental scholars, note must first be taken of developments connected with *Maimonides. Seven new responsa have appeared (from a Parma MSS, not as stated from the *Genizah, *Tarbiz*, 39 (1970)), and a substantial part of his classical works, retranslated into Hebrew as part of a comprehensive project undertaken by Rabbi Y. *Kafah (who makes use of additional Arabic MSS), and most recently the *Sefer ha-Mitzvot* and the *Iggeret Teiman*. Kafah has also published a small work containing a detailed index of all biblical verses in all the Maimonidean literature, titled

Ha-Mikra be-Rambam. It is of exceptional value, and is the first of its kind in comprehensiveness and quality. Of importance for textual research on the works of Maimonides is the reissue of *Ḥasifat Genuzim mi-Teiman* and the facsimile edition (by “Makor”) of the unique and important Constantinople (1509) edition of the *Mishneh Torah*. Among the works of other Oriental scholars, note should be taken of the anonymous commentary to *Bava Batra – Perush Kadmon*; of the anonymous *Hilkhot Erez Yisrael min ha-Genizah* (in *Kovez al Yad*, 7 (1968)), and of the small fragment of the commentary of *Perahyah b. Nissim to Alfasi’s commentary on *Shabbat* (in *Seyata di-Shemaya* (1970)). Important is the commentary of *Hananel b. Samuel to the Alfasi on *Kiddushin*, printed in the *Shitah ha-Kadmonim* to this tractate. Erez Israel *halakhot*, dating from the pre-Moslem period, from Genizah sources, which throw considerable light on the specific *halakhah* of Erez Israel and clarify many hitherto obscure passages in the so-called *Sefer ha-Maasim* (see p. 330) and including new extracts from it – from the literary legacy of Prof. Mordecai Margalioṭ, collected by him over 20 years from all available sources – are now in the final stages of publication. Among Bible commentaries, mention may be made of the commentary to Job by Meyuḥas b. Elijah.

NORTH AFRICAN SCHOOL. The *editio princeps* of the *Rif* by Isaac Alfasi has now been published in facsimile by “Makor,” with an introduction. Twelve responsa by Isaac Alfasi were published in *Or ha-Mizrah*, 20 (1971), and an amended and critical edition of the *Seder Rav Amram Ga’on* (see *Amram b. Sheshna), the first that can be usefully consulted, has appeared; a new edition of the **Halakhot Gedolot* based on very many MSS (Mekize Nirdamim), and also a facsimile edition of the same work from the Paris MSS 1702 and a facsimile edition of the **Halakhot Pesukot*, from MSS Sassoon, both by “Makor.” Belonging to a much later period is the commentary of Simeon b. Zemah *Duran to *Berakhot*, published for the first time. Ch.D. Chavel has collated and published all extant fragments to the biblical commentary of R. Hananel ben Hushi’el.

ITALY. The great project of publishing the *Pesakim* of *Isaiah b. Mali (di) Trani and of his grandson, *Isaiah b. Elijah, continues. The following having been published recently: *Bezah*, *Rosh Ha-Shanah*, *Tàanit*, *Megillah*, *Ḥagigah*, *Mo’ed Katan*, and the *Halakhot Ketannot*. His Pentateuch commentary from a manuscript which belonged to R. Zedekiah *Anav was published lately with Anav’s annotations; new responsa by Joseph *Colon as well as his commentary on the Passover laws of Maimonides and of the *Sefer Mitzvot Gadol*, as well as his commentary on the Pentateuch; the *Arugah ha-Shelishit* (Order of Blessings) of the *Shibbolei ha-Lekket* of Zedekiah Anav, published from the literary remains of S.K. Mirski in his Memorial Volume.

A work of unique value for the period of the *rishonim*, which includes new fragments from every sphere of Jewish culture, is *Ḥasifat Genuzim mi-Teiman*, the individual proj-

ect of Judah Levi Nahum, an enthusiastic Yemenite who has for decades been collecting copies of Yemenite works from all periods and all subjects as well as pages of incunabula and fragments of old printed works extracted from the bindings of books originating in the Yemen. This work, of which only one part has been published thus far, contains among its 100 fragments very many from the works of *rishonim*, of which a considerable number deal with the work of Maimonides, which was especially popular in the Yemen. It is impossible to deal here with all the relevant fragments, but the commentary of David *Abudarham on *piyyutim* and *hoshanot* may be given as an example. The superiority of this work over the others mentioned above lies in the fact that it gives a facsimile of each fragment. This is especially important since lack of experience has caused a certain lack of precision in the reading of the fragments. It may be assumed that further volumes of this project, which is a kind of wandering *genizah* of Jewish literature, will make their appearance, and no doubt the copying of the fragments will be perfected.

Most of the books have been copied, edited, and published on the initiative and personal predilection of relatively young scholars, some of whom have had previous experience in this work, while others are new to it. Only a few have been published on the initiative of public Torah institutes, which have made long-term plans of great importance. As a result, together with the notable achievements there is a conspicuous and complete lack of coordination both among the editors themselves and between them and the organized institutions. At times, there is even open rivalry, with the result that sometimes the same work is published simultaneously more than once. The *Tosafot ha-Rosh to Sanhedrin* was published from the same unique manuscript simultaneously by B. Lipkin (posthumously; with supplements and notes by J. ha-Levi Lipschutz) in Jerusalem (1968) and by S. Ullman of Brooklyn in Tel Aviv (1969). The *Tosafot ha-Rosh to Shabbat* was also published twice: by I.S. Lange (of Zurich) in Jerusalem (1969) and by the same S. Ullman in Tel Aviv (1971), though in this case different MSS were used, the former using Parma and London MSS and the latter MSS in the New York Seminary and the Ginsberg collection. The *Tosafot ha-Rosh to Yoma* published in New York (1961; the main article in the EJ has 1965 – a typographical error) was republished from the same MSS by Ullman in Tel Aviv (1969), as though it were being published from the manuscript for the first time. Something similar has occurred with the publication of the Meiri (see above) and with the *Hashlamah* of Meshullam b. *Moses. More examples could be given.

Among institutes which have undertaken defined assignments in the period of the *rishonim* is the Makhon ha-Talmud ha-Yisraeli ha-Shalem, whose main projects are: the editing of the *Piskei Rid* and the *Riaz* (see above), following the order of the Talmud (thus far, *Berakhot* and all of *Mo’ed* have appeared); a series *Ginzei Rishonim*, within whose framework works of *rishonim* “that have never been published” are being printed, but there appears to be neither method nor system in the series, the printing of many of the works being inter-

rupted and left uncompleted; a project to issue the complete novellae of Naḥmanides (see above). Mosad ha-Rav Kook has sponsored the main work of Rabbi Y. Kafah, the issuing of new Hebrew translations of all Maimonides' Arabic works, and the editing of many works by *rishonim* of which he possesses single, or unique, manuscripts. It is also about to begin the printing of the series *Ha-Ritba ha-Shalem* on the Talmud (see above). Worthy of note is the project *Sanhedrei Gedolah* of the Harry Fischel Institute, which is reprinting all extant *rishonim* to tractate *Sanhedrin* or those whose subject matter refers mainly to that tractate. Hitherto four volumes have appeared and *Hukkot ha-Dayyanim* (see above). All the works published by these institutes have introductions, source references and notes by the editors.

The work of these individual scholars is of equal importance to the planned series. Quite a number of these scholars work according to their own private plan, e.g., Rabbi Ullman, who has published the remainder of the hitherto unpublished *Tosafot ha-Rosh* (without taking into consideration that some other person may be engaged in the identical task), and Rabbi Brizel, who has published the *Aguddah* with notes and source references. It is a cause for satisfaction that editors who were accustomed formerly to embellish their editions with an abundance of mostly superfluous notes have also recently begun to regard their principal work as simply the provision of a reliable text. As a result, the literature of *rishonim* is gradually returning to the original form in which it was always published in the past.

At present the editing of works by *rishonim* is wholly in the hands of yeshivah scholars and students of the Torah who are guided in their choice and in their work by the curriculum current in yeshivot. No work of any significance in this domain is being done in academic circles, although among them too are considerable numbers of rabbinical scholars. Any work needed for research into matters connected with rabbinical literature which does not fall within the curriculum of the yeshivot is still completely dependent on the possibilities (and the preferences) of the Mekize Nirdamim society, and on the very few publications, too fragmentary to have permanent value, in a few periodicals. There exists a great need especially for facsimile editions (either with or without their parallel printed transcription), since these are the foundations of all exact scientific research, relieving the researcher from dependence upon the editors' reading of the photostat of the mss. Because this task is not regarded as of significance for study in yeshivot, such works are well-nigh nonexistent. A praiseworthy exception is the Makor Publishing Company, which puts out excellent facsimile editions of those manuscripts (see above).

Among the chief workers in the field (of complete works) are: Rabbis Y. Kafah, A. Sofer, M. Herschler, M.J. ha-Kohen Blau and Ch.D. Chavel who are veteran scholars of great experience; also S. Greenbaum, A.D. Pines, A.L. Feldman, I. ha-Levi Lipschutz and S. Ullman. Others, in alphabetical order, are: A. Brizel, S.Z. Broida, K. Cahana, J. Cohen, M. Glazer,

M. Hildesheimer, D.Z. Hillman, W. Horowitz, H. Krauser, I.S. Lange, A. Liss, M.M. Meshizahav, I. Reinz, I. Rothstein, H. Segal, A. Shoshana, S. Sofer, and the *Seder Amram Ga'on* by Dr. Goldschmidt. Of publishers of fragments, particular mention may be made of A. Kupfer.

In contrast to the publication of texts, research has proceeded at a very slow pace. Nevertheless, many studies of value for the works of *rishonim* can be enumerated. It should first be noted that there has been a considerable general improvement in the standard of the introductions printed at the beginning of many of these books. Among studies of Maimonides, note must be taken of the *Ein Mitzvot*, a bio-bibliographical lexicon for the study of Maimonides' *Sefer ha-Mitzvot* and its commentators, by I.I. Dienstag (1969); also a list of all complete printed editions of the *Mishneh Torah* (in the Jubilee Volume for Kiev (1972), which, though not the first in this field, is a great improvement over its predecessors; the article "*Sefer Mishneh Torah... Its Aims...*" by I. Twerski, in *Israel National Academy of Sciences*, 5:1 (1972); and "*Mishneh Torah le-ha-Rambam in the Possession of the Jews of the Yemen*," by S.D. Pinhasi, in the *Ḥasifat Genuzim mi-Teiman* (1971). S.Z. Havlin has published a valuable article on the printed editions of the *Mishneh Torah* (introduction to the above-mentioned Makor facsimile edition). Note should be taken of the article "The Literary Creation of Joseph Ibn Migas," printed in *Kiryat Sefer*, 45/47 (1970–72); the study by I. Spiegel of *Sefer Maggid Mishneh* on the *Mishneh Torah* (*Kiryat Sefer*, 46 (1971)); the article by I. Markus on Isaac ibn Ghayyat (*Sinai*, 67/8 (1970)); of great value is the article "*Tosafot Gornish*" (*Sinai*, 68 (1961)), where not only is the subject illuminated for the first time but the nature of *pilpul* and its developments clarified; finally, the unsatisfactory article by I. Shtzipanski on "Rabbenu Ephraim and the Rif" (*Tarbiz*, 41 (1972)), which is of little value. Not only does it not make use of all available data on the subject but it "reveals" a considerable amount of material long known and fully discussed by scholars. In addition to these articles, several introductions to books have been printed which give all the available biographical material and the authors of the work. Particular note should be taken of Horowitz's introduction to the *Sefer ha-Menuḥah* (see above) and the *Seridei Derashot ha-Rabad*, and to the introductions of I. Lipschutz and S. Feldman. Of particular importance is the article "*Ha-Siddur le-Va'al ha-Semak* with the commentary of the author of the *Maḥkim*," by S.D. Bergmann (in the Mirski Volume, see above), containing information about German scholars of the 13th and 14th centuries. Lastly, note should be made of the article "*Le-Heker he-Arukh*," of *Nathan b. Jehiel of Rome, by S. Abramson in *Leshonenu*, 36 (1972), 100–22.

BIBLIOGRAPHY: M. Kasher and J.D. Mandelbaum, *Sarei ha-Elef*, (1959; a bibliographical list of the printed writings of the *rishonim*); addenda up to 1965, in: *Noah Braun Memorial Volume* (1970), 215–99; I. Ta-Shema, *Sifrei Rishonim* (1967); S. Poznański, *Babylonische Geonim im nachgaonäischen Zeitalter*, (1914), 79–111.

[Israel Moses Ta-Shma]

RISHON LE-ZION (Heb. רִישׁוֹן לְצִיּוֹן, “First in Zion”), city in central Israel, 7 mi. (12 km.) S.E. of Tel Aviv-Jaffa, founded in 1882 by ten pioneers from Russia headed by Z.D. *Levontin. The name Rishon le-Zion is based on Isaiah 41:27.

In acquiring the first 835 acres (3,340 dunams) of land for their village, the settlers were aided by Ḥayyim *Amzalak, then the British vice consul in Jaffa. It was the first settlement established by pioneers from outside Erez Israel. In the first year of its existence, the population grew to 100 when *Bilu pioneers joined the village after receiving some agricultural training at *Mikveh Israel. Their experience, however, was still insufficient and their sparse means were almost totally spent on the cost of the land and on primary investments. They soon faced a grave crisis. A particular difficulty was the lack of water, as attempts to find water in shallow wells had failed and drinking water had to be hauled from Mikveh Israel in a camel-drawn carriage. As a last resource, the settlers in 1883 sent an emissary, Yosef *Feinberg, to enlist the aid of Jewish communities in Europe. He met Baron Edmond de *Rothschild, whose first contribution, ₪25,000 (francs), was utilized to drill a deep well. Subsequently, Baron Rothschild maintained the settler families and after a review of the village’s farming program, introduced fruit growing, especially wine grapes, instead of grain cultivation. He sent agronomists and administrators to Rishon le-Zion, but a fresh crisis arose when the administrators regarded the settlers as hired workers and stifled their initiative. The vine strains brought from southern France proved unsuitable and the grapes had no market. Part of the vineyards were therefore replaced by almond plantations. The situation gradually improved after 1889, when the large Carmel Oriental wine cellars were installed by Baron Rothschild. The world’s first Hebrew kindergarten and elementary school were opened here in the 1880s. The moshavah’s holdings gradually expanded to 3,225 acres (12,900 dunams) in 1907 with a population of 500 in 1897, and 2,130 in 1917. Immigration from Eastern Europe and *Yemen brought additional Jewish laborers. Citrus groves became the principal farming branch. During World War I, the Turkish governor, in appreciation of the village’s achievements in reclaiming formerly barren terrain, ordered an area of 5,000 acres (20,000 dunams) of sand dunes stretching from Rishon le-Zion west to the seashore to be annexed to its boundaries. This transfer was endorsed by the British administration in 1921. Aside from the dunes, the village area grew to 4,250 acres (17,000 dunams) in 1932. In 1922 the moshavah received municipal council status. In the 1930s, industrial enterprises (silicate bricks, beer, and razor blades) were set up. By 1948 Rishon le-Zion had 10,500 inhabitants. Considerable land reserves, a rich groundwater table and the nearby Tel Aviv conurbation favorably influenced Rishon le-Zion’s further expansion. In 1950, it was given city status, and its population continued to increase rapidly, attaining 46,500 by 1970. By that time it had one of the country’s largest municipal terrains with a total of 17 sq. mi. (44 sq. km.). Industry expanded while farming still played a role in the city’s economy. By the mid-1990s, the population of Rishon

le-Zion was approximately 154,300 and in 2002 it was 211,600, making it the fourth largest city in Israel, with its land area now increased to 23 sq. mi. (60 sq. km.) as the city expanded to the west and many business areas spread throughout. Most residents found work in the Tel Aviv conurbation. Rishon le-Zion is considered one of the most congested cities in Israel.

[Tsevi Atsmon / Shaked Gilboa (2nd ed.)]

RISHON LE-ZION (Heb. רִישׁוֹן לְצִיּוֹן; “first of Zion”), a title given to the Sephardi head of the rabbis of Israel. His seat is in Jerusalem. The first scholar to be given the title was apparently Moses b. Jonathan *Galante (1620–89) when he and the other scholars of Jerusalem decided that their leader should bear the modest title of *rishon le-Zion*, mentioned in Isaiah (41:27), and not *rabbi* or *av bet din*. Until 1840 the authority of the **hakham bashi* (“chief rabbi”) in Constantinople extended over all the communities of the Ottoman Empire, including Erez Israel. From that year until 1920, the *rishon le-Zion* was granted the additional title of *hakham bashi* for Erez Israel by the Ottoman government. The first to bear this double title was Ḥayyim Abraham *Gagin. However, the grant of this additional title was not always made immediately on appointment.

RISHPON (Heb. רִשְׁפּוֹן), moshav in central Israel N. of *Herzliyyah. Rishpon was founded in 1936, in the framework of the Thousand Families Settlement Project (see *Israel, State of: Settlement), by immigrants from Eastern Europe. In 1970 Rishpon had 447 inhabitants, increasing to 540 in the mid-1990s and 794 in 2002 after expansion. Its economy was based on citrus groves, fruit plantations, flowers, vegetables, poultry and horse stables. The name is assumedly historical, and appears in the form “Rishponah” in an inscription of Tiglath Pileser III dating back to the year 732 B.C.E. It may be connected with the Canaanite deity Reshef.

[Efraim Orni]

RISIKOFF, MENAHEM (Mendel) HAKOHEN (1866–1960), rabbi and author. Risikoff, the son of Rabbi Zvi Yosef Hakohen *Resnick, was born in Zhetel (Dyatlovo) and studied in the yeshivot of Volozhin and Vilna, receiving *semikhah* at the age of 17 from some of the outstanding rabbis of the time.

Appointed rabbi of Kazan in 1895, he emigrated to the United States a few years later following pogroms in his community and served as rabbi in a number of Brooklyn synagogues, including Ohev Shalom and Williamsburg’s Moore Street Congregation.

Among the many volumes published by him on *halakhah*, *aggadah*, biblical commentaries, sermons, and responsa may be mentioned: *Shaarei Zevah* (1913), dealing with the laws of *shehitah* and *treifah*; *Shaarei Shamayim* (1937), a commentary on the Shulhan Arukh; and *Torat ha-Kohanim* (1948), an exhaustive study of the laws pertaining to Kohanim.

BIBLIOGRAPHY: B. Ayalon (ed.), *Yizkor Book Meitshet* (1973), 119–20; S. Gottlieb, *Ohelei Shem* (1912).

RISKIN, SHLOMO (1940–), rabbi. Born in Brooklyn, New York, Riskin entered Yeshiva University in 1956. There he found a mentor in Rabbi Joseph B. Soloveitchik (the Rav) and was impressed with his unique vision of Judaism, which proposed that *halakhah* (Jewish Law) actually deal with the most fundamental existential problems plaguing modern man.

Upon receiving his rabbinic ordination and graduating as valedictorian in 1960, Riskin was determined to open a new model of synagogue, one based on outreach and learning. This led to the opening of the renowned Lincoln Square Synagogue (LSS), established in a small apartment on the Upper West Side of Manhattan. Attendance grew and a permanent structure was established on Amsterdam Avenue. By the end of the 1970s, LSS had become one of the most vibrant centers for Judaism in New York and America. LSS as well as other educational institutions established by Riskin were the locus of Jewish life for thousands of Jews.

By 1983, however, Riskin decided to move to Israel. Criticized by some congregants for the move, Riskin explained his view that Israel was the only place where a Jew could live his/her life in a complete fashion. The Diaspora, he said, would always be a footnote in Jewish history, while Israel would be the nexus. He felt that the future of Jewish leadership would be based in Israel and he wanted to be a part of it, as well as to participate in what he called “the greatest expression of reclaiming our own destiny since the leaving of Egypt.”

In 1983 he moved to the new garden city of *Efrat near Jerusalem, which he founded together with Moshe Moskovitz. Guided by the idea of an open urban community between *Gush Etzyon and Jerusalem, Efrat would serve as a bridge between the bloc of Jewish settlements and Israel’s capital.

As chief rabbi of Efrat, Riskin established an educational institution called Ohr Torah Stone (OTS), comprised of yeshivah high schools and rabbinic and leadership training. OTS has grown into an all-encompassing educational organization. Its educational philosophy promotes Riskin’s vision of Judaism that is based on the teachings of his childhood and Rabbi Soloveitchik’s message of ethical monotheism that the Jew must impart to the world. For Riskin, Judaism presents the most fundamental notions of freedom, universal morality, and a code of ethics to the world. The importance of compassion and sensitivity in the practical application of a religious lifestyle is one of Riskin’s major doctrines. God’s law and its realization must express that love and compassion, within halakhic parameters.

Riskin was also a pioneer in the field of women’s Torah learning and halakhic rights, as reflected both in his writings as well as the make-up of his educational institutions. He holds a master’s in Jewish history and was awarded his Ph.D. from New York University’s department of Near Eastern languages and literature.

He is also the author of five books: *The Rebellious Wife: Women and Jewish Divorce* (1989); *Yad L’isha* (2004); *The Passover Haggadah* (1983); *Around the Family Table* (2005); and *Torah Lights – Genesis Confronts Life, Love and Family* (2005).

His regular columns and articles appear weekly in the *Jerusalem Post* as well as in dozens of newspapers and magazines throughout the world.

[Edward Jacobs (2nd ed.)]

RITT, MARTIN (1914–1990), U.S. director, producer, actor. Born in Manhattan’s Lower East Side, Ritt attended Elon College in North Carolina, where he played football and boxed. He was occasionally teased for being Jewish but had a good sense of humor and joked that the ham served on Fridays was actually turkey. Ritt left Elon after two years and went to St. John’s University in Jamaica, N.Y., to study law. He soon befriended director Elia Kazan and left St. John’s to act. After serving in World War II, where he acted and directed, Ritt worked in television. Between the 1940s and the early 1950s, Ritt appeared in more than 150 plays and directed 100 TV shows. Then, in the early 1950s, he was blacklisted for prior Communist Party involvement as part of the McCarthy-era “Red Scare.” Unable to find television work, Ritt began teaching at the Actor’s Workshop in Manhattan. In 1957, producer David *Susskind defied the blacklist and hired Ritt for his directorial debut, *Edge of the City*. Ritt went on to direct 25 more films. He directed and produced *Hud* (1963), starring Paul Newman, which earned Ritt a best director Academy Award nomination. One of Ritt’s former Actor’s Workshop students, Newman worked together with Ritt many times, including in *Paris Blues* (1961), *Hemingway’s Adventures of a Young Man* (1962), and *Hombre* (1967), which Ritt also produced. In 1976, Ritt directed *The Front*, a fictional story of the McCarthy blacklist, that starred Woody Allen. Other Ritt films include *The Sound and the Fury* (1959), *The Molly Maguires* (1970), *Pete ’n’ Tillie* (1972), *Norma Rae* (1979), and *Stanley and Iris* (1990).

[Susannah Howland (2nd ed.)]

RITTENBERG, DAVID (1906–1970), U.S. biochemist. Rittenberg, who was born in New York, was a member of the faculty of Columbia University from 1934 onward. He was professor of biochemistry at the university’s College of Physicians and Surgeons until 1956 when he became executive officer of the department of biochemistry. In 1965 he was appointed chairman of the department. He was one of the pioneers in the use of isotopes to label molecules and so trace their movements and chemical transformation in metabolism. By this

method, he and his co-workers showed that the constituents of the body, including its fat stores, are in a constant state of dynamic change. Rittenberg discovered, with the aid of isotopic labeling, that fatty acids and cholesterol originate in the body from small molecules such as acetate.

Rittenberg was associated with the U.S. Atomic Energy Commission and the Office of Research and Development. He was a member of the National Academy of Sciences and was a governor of the Weizmann Institute of Science in Israel.

[Mordecai L. Gabriel]

RITTER, IMMANUEL HEINRICH (1825–1890), German Reform rabbi. Ritter received an Orthodox education in Ratibor, Prussia, and studied history and philology at Breslau University. Unable to engage in an academic career in these fields, he became a teacher of religion in the Berlin Reform community and the successor of Samuel *Holdheim in his rabbinical post. Ritter established his reputation as defender of Jewish rights against the reactionary Prussian politician Wagener.

He wrote *Geschichte der juedischen Reformation* (4 parts, 1858, 1861, 1865, 1902), a history of the Reform movement which criticized Mendelssohn's lack of historical judgment (part 1, p. 53), as well as the first biographies of David *Friedlaender and Samuel Holdheim and the story of the Berlin Reform community.

RITZ BROTHERS (b. **Joachim**), AL (1903–1965), JIMMY (1905–1985), and HARRY (1908–1986), U.S. vaudeville comedy team. Born in Newark, New Jersey, the Ritz Brothers began public appearances as the Collegians. Their act, which remained fairly constant for decades, was comprised of precision dancing, tongue-twisting song parodies, ethnic humor, and physical comedy. Their slapstick succeeded in several Broadway revues, and their first film was *Sing, Baby, Sing* (1936). Other films were: *Life Begins in College* (1937), *One in a Million* (1937), *On the Avenue* (1937), *You Can't Have Everything* (1937), *The Goldwyn Follies* (1938), *Straight, Place and Show* (1938), *Kentucky Moonshine* (1938), *Pack Up Your Troubles* (1939), *The Gorilla* (1939), *The Three Musketeers* (1939), *Argentine Nights* (1940), *Behind the Eight Ball* (1942), *Never a Dull Moment* (1943), and *Hi 'Ya Chum* (1943). Their humor was better geared to a live audience, however, so they left the film industry and focused their attention on their nightclub appearances.

Harry and Jimmy were among the star-studded cast of *Won Ton Ton, the Dog Who Saved Hollywood* (1976). They all appeared on television.

[Ruth Beloff (2nd ed.)]

RIVA (di Trento), town on the Lake of Garda, N. Italy. A Jewish community existed there from the 14th century. Though expelled in 1520 as the result of the Simon of Trent blood libel, Jews returned to Riva soon after, but they were compelled

to wear the *badge, pay a capitation tax, and were subject to other restrictions. There was a Hebrew printing press in Riva, which was active between 1558 and 1562 and produced about 35 titles.

The press owed its success to the cooperation of three men: Cardinal Cristoforo Madruzzo, bishop of Trent, who had jurisdiction over the town and whose coat-of-arms appears on many of the Riva publications; Joseph b. Nathan *Ottolenghi, rabbi and *rosh yeshivah* at Cremona; and Jacob Marcaria, *dayyan* and physician, also of Cremona, who was the printer and contributed learned prefaces to his productions. The first work issued was Isaac Alfasi's *Halakhot* (1558), followed by other halakhic works, including two editions of Jacob b. Asher's *Turim* (1560 and 1561). With the Talmud banned in Italy, there was a need for these substitutes. The press also produced philosophic works, notably the first printing of Levi b. Gershom's *Milhamot Adonai* (1560), and ethical literature. The illiberal attitude of Cardinal Madruzzo's nephew and successor must have led to the abrupt end of Marcaria's venture. For about another year he continued to print non-Hebrew books, including some concerned with the Council of Trent (1545–64), though only one of them carried the printer's name. Joseph b. Jacob Shalit of Padua, who had been Marcaria's proofreader, took some of the unfinished works to Venice and had them printed there.

RIVERA, JACOB RODRIGUEZ (1717–1789), U.S. merchant and a founder of Yeshuat Israel Congregation in Newport, Rhode Island. Born in Spain, Rivera was naturalized in New York in 1746, but soon moved to Newport. There during the two prerevolutionary decades, Rivera became a distinguished merchant shipper, trading in numerous commodities, including slaves, but his chief – and quite possibly pioneering – interest was the spermaceti candle industry. A charter member in 1761 of the United Company of Spermaceti Chandlers, he led its efforts to regulate competition. His colleagues, mostly non-Jews, esteemed him enough to forgo Saturday meetings on his account. Around 1760, he took as his partner the Newport cultural leader, Henry Collins, a founder of the Redwood Library, which Rivera also supported. Rivera is best known for his association with his enterprising son-in-law, Aaron *Lopez, and shared in many of Lopez' ventures. During the American Revolution, he accompanied Lopez to Leicester, Massachusetts and took up farming there but, following Lopez' untimely death in 1782, Rivera reestablished himself at Newport.

RIVERS, JOAN (1933–), U.S. comedienne and actress. Born Joan Alexandra Molinsky in Brooklyn, New York, to Russian immigrants, Rivers acted in school productions at Barnard College, graduating Phi Beta Kappa with a bachelor's degree in English in 1954. Post-college jobs included working as a publicist for Lord and Taylor and as a fashion coordinator for Bond Clothing Stores, marrying the owner's son at 21; the marriage was annulled six months later. Rivers returned home and pursued her dream of becoming an actress, mostly working in off-Broadway plays. She soon shifted gears and tried stand-up comedy, at first using the name Pepper January and then performing as Joan Rivers. After working small East Coast clubs for seven years, she spent time in Greenwich Village coffeehouses developing an act that was sexually provocative and self-deprecating. Critics panned Rivers, but comedian Lenny Bruce encouraged her. From 1961 to 1962, she was a member of the improvisational group Second City, and then wrote material for *Candid Camera* and Phyllis Diller. In 1965 she was booked on the *Tonight Show* and after a successful set was asked back. Rivers soon became a Las Vegas headliner, and was named Las Vegas comedienne of the year in 1976 and 1977. Rivers wrote and starred in the film *Rabbit Test* with Billy Crystal in 1978, and in 1983 she was named Woman of the Year by Hadassah. That same year, the woman known for her trademark line "Can we talk?" parlayed her frequent appearances on the *Tonight Show* into a regular guest host slot. After Carson left the *Tonight Show* in 1986, Rivers started her own talk show, *The Late Show Starring Joan Rivers* (1986–87) and published her first autobiography, *Enter Talking*. Her second husband was suffering from chemical depression due to heart medication at the time; he took the cancellation of his wife's program personally and committed suicide a few months later. Her husband's death tainted Rivers professionally, especially after her agent canceled her contract. Rivers started performing in small clubs again, appeared in Neil Simon's *Broadway Bound* (1986), and then took a regular spot as the center square on the television game show *Hollywood Squares*, which she held until 1989. She hosted her own syndicated talk show, *The Joan Rivers Show*, from 1989 to 1993, and won an Emmy for it in 1990. Rivers returned to Broadway with a play she wrote about Lenny Bruce's mother, *Sally Marr ... and Her Escorts* (1994), which earned her a Tony nod for best actress. Rivers and her daughter starred as themselves in an NBC made-for-TV movie *Tears and Laughter: The Joan and Melissa Rivers Story* (1994), and the mother-daughter team has since become known for providing red-carpet commentary during the Oscars and other awards shows.

[Adam Wills (2nd ed.)]

RIVERS, LARRY (1924–2002), U.S. painter, printmaker, sculptor, writer, and musician. Born Yitzroch Loiza Grossberg in the Bronx to immigrant parents from the Ukraine, Rivers

initially made his reputation as a jazz saxophonist. After a brief stint in the U.S. Army during World War II (1942–43) he studied music theory and composition at the Juilliard School of Music (1944–45). Rivers started painting in 1945, and from 1947–48 he studied at the avant-garde Hans Hofmann School in New York. His initial work shows the influence of Abstract Expressionism.

In the early 1950s, Rivers began to paint autobiographical themes in pictures such as *The Burial* (1951, Fort Wayne Museum of Art, Indiana), a gesturally rendered canvas inspired by the memory of his grandmother's funeral, and *Europe I* (1956, Minneapolis Institute of Arts) and *Europe II* (1956, private collection, New York), the latter based on a formal portrait of Polish relatives. Parody enters his art in these years; in *Washington Crossing the Delaware* (1953, Museum of Modern Art, New York), for example, a canvas mocking the grand heroics of 19th-century American history painting, Rivers appropriates the imagery of Emanuel Leutze's iconic painting of the same name (1851, Metropolitan Museum of Art, New York) while also exploring paint application and other formal qualities. The Museum of Modern Art in New York acquired Rivers' version in 1951, his first painting to enter a major public collection.

This mode of parody also pervades *History of Matzah* (*The Story of the Jews*) (1982–84, private collection, New York), an ambitious project that attempts to tell the nearly four-millennium history of the Jews. Painted on commission, *History of Matzah* appears in a collage-like form with images and stories overlapping on three nine-by-fourteen-foot canvases in Part I, titled *Before the Diaspora*, Part II, *European Jewry*, and Part III, *Immigration to America*, all superimposed on a rendering of matzah. Other works influenced by Rivers' Jewish identity include a large mural, *Fall in the Forest at Birkenau* (1990), hanging in the United States Holocaust Memorial Museum; three posthumous portraits of the Holocaust memoirist Primo Levi (1987–88, Collection La Stampa, Turin, Italy); and the illustrations for a Limited Editions Club publication of Isaac Bashevis Singer's short story "The Magician of Lublin" (1984).

The multi-talented Rivers designed sets for the play *Try! Try!* (1951), written by Frank O'Hara, as well as a play by Le Roi Jones (1964) and Stravinsky's *Oedipus Rex* (1966). With O'Hara, Rivers also wrote the play *Kenneth Koch: A Tragedy* (1954). In 1957 he began making welded metal sculpture. Rivers wrote poetry, acted on stage, including a stint as Lyndon Johnson in Kenneth Koch's *The Election* (1960), and continued to perform in jazz bands throughout his life. His 1992 autobiography, titled *What Did I Do?*, chronicles his life in often lurid detail.

Rivers, *Larry Rivers: Art and the Artist* (2002).

[Samantha Baskind (2nd ed.)]

RIVISTA ISRAELITICA, Italian-Jewish scholarly periodical published in Florence between 1904 and 1915. *Rivista Israelitica: Periodico bimestrale per la scienza e la vita del Giudaismo* (“Bi-Monthly for the Science and the Life of Judaism”) was founded by Samuel Hirsch *Margulies. It appeared regularly until 1913, and in 1915 a double number marked its last issue. The journal provided a forum for the emerging research on the history and culture of Italian Jewry, which in 1913 was marked by the foundation of a Florence-based Società per la storia degli ebrei in Italia (“Society for the History of the Jews of Italy”) edited by Umberto Cassuto. The *Rivista Israelitica* separated, for the first time in the history of the Italian Jewish press, a scientific approach to Judaism from more general educational goals, which S.H. Margulies pursued instead in *La Settimana Israelitica* (published in Siena between 1910 and 1915). The two journals eventually merged with *Il Corriere Israelitico* of Trieste, resulting in the weekly *Israel* (1916–64), from which later stemmed both *Israel dei ragazzi* (1918–38), a monthly for the youth and *La Rassegna Mensile di Israel* (1925–). Many of the studies by the Italian and foreign contributors dealt with the history and culture of Italian Jewry. In 1904–06 an Italian translation of part of Abraham Berliner’s *Geschichte der Juden in Rom* (“Storia degli Ebrei in Roma”; “History of the Jews of Rome”) appeared in installments as an appendix. Contributors included: Moise Finzi (president of the Collegio Rabbinico Italiano and professor of statistics and political economy at the Istituto Tecnico of Florence), U. Cassuto, Elia Samuele Artom, Raffaele Ottolenghi, Samuele Colombo, G. Calò, G. Jaré, C. Castellani, Aldo Sorani, Edgardo Morpurgo, Giuseppe Levi, Israel Zoller and Aldo Cantone. The journal also attracted distinguished Jewish scholars from other countries. H.P. Chajes and I. Elbogen, who taught at the Collegio Rabbinico Italiano, contributed various studies.

[Tovia Preschel / Francesco Spagnolo (2nd ed.)]

RIVKES, MOSES BEN NAPHTALI HIRSCH (d. c. 1671/72), Lithuanian talmudist. It is not known when Rivkes went to Vilna, but he was one of those expelled from Vilna in 1655 (together with *Shabbetai b. Meir ha-Kohen, Ephraim Cohen, and Aaron Samuel *Koidonover) during the war between Poland and Russia. He reached the Prussian border but was prevented from proceeding further because of the Swedish army which was invading Russia. He then sailed for Amsterdam, where he was well received by the Sephardi community. Although most of the refugees were sent to Frankfurt, Rivkes, through the influence of Saul Levi *Morteira and Isaac *Aboab, remained in Amsterdam. He later returned to Vilna, where he died.

Rivkes’ fame rests upon his *Be’er ha-Golah*. At the request of Ephraim *Buono, “the distinguished doctor,” and Jacob Castello, he corrected the edition of the Shulḥan Arukh printed in Amsterdam, adding to it the sources and clarifying the reasons for conflicting opinions. The work (first published in the Amsterdam (1661–66) edition of the Shulḥan Arukh) became an integral part of the Shulḥan Arukh, appearing in all editions.

Rivkes also wrote additions to the Shulḥan Arukh and a commentary on the Mishnah, which were never published. In the sphere of Jew-gentile relations, Rivkes favored tolerance and mutual respect, condemning dishonesty toward non-Jews in commercial dealings and stressing the duty of Jews to respect Jews and gentiles alike, since Christians shared with Jews certain religious beliefs based upon the Bible. He was renowned for his personal piety and was called *he-Ḥasid* (“the pious”), an unusual appellation for that time. In his ethical testament he refers to his sons, Pethahiah, Joseph, and Judah, who died in his lifetime, and to his sister’s son, David Lida, rabbi of Amsterdam. Rivkes was an ancestor of Elijah Gaon of Vilna, who was supported by a legacy established by him.

[Itzhak Alfassi]

RIVKIN, BORUCH (pseudonym of **Boruch Abraham Weinrebe/Weinryb**; 1883–1945), Yiddish literary critic and essayist. Born in Jakobstadt, Courland (Jekabpils, Latvia), the son of a wagon driver, Rivkin became involved in the revolutionary activities of the *Bund, although he was more inclined toward philosophical anarchism. He suffered a year’s imprisonment in 1904 and fled to Switzerland, where he was active in anarchist circles and published in Russian. Only after reaching London (1911) did he begin to write in Yiddish. A year later he settled in New York and was invited by the poet A. *Reisen to write for his newly-founded literary weekly *Dos Naye Land*. Rivkin became coeditor of its successor, *Di Literarishe Velt*, and also assisted A. *Liessin in editing *Tsukunft*. He was on the staff of the New York daily *Tog* (1917–19 and 1940–45). In the U.S., Rivkin was associated with Po’alei Zion. He suffered poverty and published only one booklet during his life. After his death, his second wife, Yiddish poet Mina Bordo-Rivkin, collected and published his essays in six volumes, which included: *A Gloybn far Umgloybike* (“A Religion for the Irreligious,” 1947); *Yidishe Dikhter in Amerike* (“American Yiddish Poets,” 1947); *Grunt-Tendentsn fun der Yidisher Literatur in Amerike* (“Main Trends in American Yiddish Literature,” 1948); and *Undzere Prozaiker* (“Our Prose Writers,” 1951). Rivkin is primarily a literary critic, who holds that religion and art are identical and that divine truth emanates from imaginative creation. Hence, Torah is art and Jewish holidays are theatrical embodiments of a drama of redemption. The Jewish man of letters can ennoble the Jewish people and direct its energies to messianic goals. Rivkin propagated the idea that Yiddish literature could serve as a spiritual territory for the Jewish people in the Diaspora. Messianism and spiritualism were two of Rivkin’s main concerns. He was not a disciplined thinker but rather a passionate, dynamic critic who probed deeply into literary works, occasionally emerging with flashes of original insight.

[Sol Liptzin / Eugene V. Orenstein (2nd ed.)]

RIVKIN, ELLIS (1918–), U.S. historian. Born in Baltimore, Maryland, Rivkin received a doctorate in history from Johns Hopkins University. He taught Jewish history at Gratz College before being appointed professor of Jewish history at the Hebrew Union College–Jewish Institute of Religion, Cincinnati, Ohio. He acquired renown as a perceptive analyst of the interrelationships between Jewish life and that of the surrounding culture as well as for his application of new methodologies to the problems of Jewish historiography. Best known among these approaches are his reconstruction of the problem of the Pharisees (e.g., “Defining the Pharisees: The Tannaitic Sources,” in: HUCA, 40–41 (1969–70), 205–49) and his conception of the “unity principle,” which he regards as the major constant in Jewish history. He feels that the Jewish people have confronted and comprehended cataclysmic changes and increasingly complex diversity through the ages without loss of their identity or ideals. After retiring from teaching, Rivkin was named professor emeritus of Jewish history at Hebrew Union College.

Rivkin’s works include: *Leon da Modena and the Kol Sakhal* (1952); *Dynamics of Jewish History* (1970); *The Shaping of Jewish History: A Radical New Interpretation* (1971); *Hidden Revolution* (1978); and *What Crucified Jesus?* (1984).

ADD. BIBLIOGRAPHY: R. Seltzer (ed.), *Judaism: A People and Its History* (1989).

[Martin A. Cohen]

RIVKIND, ISAAC (1895–1968), librarian and scholar. Rivkind was born in Lodz, Poland, and studied at the yeshivot of Volozhin and Ponevezh. During World War I and after he helped organize the Mizrahi movement of Poland. In 1917 he founded the *Zēirei Mizrahi* in Lodz and in 1919–20 was a member of the Jewish National Council of Poland. In 1920 he was a delegate to the London Zionist Conference and from there proceeded to the U.S. to work on behalf of Mizrahi. In 1923 he began to work in the library of the Jewish Theological Seminary of America, New York, eventually becoming chief of the Hebraica section. He was a co-founder of the U.S. branch of the Yiddish Scientific Institute (YIVO); on the executive of the Hebrew PEN Club of the U.S.A.; and a fellow of the American Academy for Jewish Research. During World War II and in the immediate postwar years he was the national chairman in the U.S. of the League for Religious Labor in Palestine.

Rivkind was the author of significant studies and essays in many fields, notably in Jewish bibliography, ethnography and folklore, Yiddish philology, and Zionism. He contributed to numerous periodicals and publications in Hebrew, Yiddish, and English, including *Kirjath Sepher*, *Reshumot*, and *Yidishe Shprakh*. He wrote the following works: *Le-Ot u-le-Zikkaron* (“For a Sign and a Reminder,” 1942), a study on the history, development, and customs of bar mitzvah; *Der Kamf Kegn*

Azartshpilen bay Yidn (1946), on the fight against gambling among Jews, with special reference to Old Yiddish poetry; and *Yidishe Gelt* (“Jewish Money,” 1959), a Yiddish lexicological study on money in Jewish folkways, cultural history, and folklore. Other notable studies of his included *Ha-Naziv ve-Yihuso le-Hibbat Ziyyon* (“Rabbi Naphtali Zevi Yehuda Berlin and the Hibbat Zion Movement,” 1919), *Elokei Bialik* (“The Religion of Bialik,” in *Ein ha-Kor*, 1923), “Moses Provençal on Ball Playing” (“*Teshuvat...*,” in *Tarbiz*, 4 (1932/33, 366–76), and “A Responsum of Leon of Modena on Uncovering the Head” (in *Sefer ha-Yovel... L. Ginzberg* (1946), 401–23). He assisted scores of scholars in their research.

BIBLIOGRAPHY: M. Kosover and A. Duker (eds.), *Minḥah le-Yizhak* (1949), with bibl. of Rivkind’s works; A. Zeitlin et al. in: *Hadoar*, 44 (1965), 351–8.

[Tovia Preschel]

RIVLIN, distinguished Jerusalem family. The Rivlin family claims descent from Moses *Rivkes (d. 1671), son of Naphtali Hirsch Sofer of the Prague Jewish community, son of Pethaḥiah Sofer of that community, son of the scholarly Joseph, and from Moses b. David *Kramer (d. 1688), who was *av bet din* and head of the yeshiva in Vilna. Elijah Ḥasid (d. 1710), son of Moses Kramer, married the daughter of Pethaḥiah, son of Moses Rivkes. The original family name, Riveles, derived according to the then prevalent custom from the feminine name Riva, or Rivka. Apparently the name Riveles (= Rivlin) was first used by Solomon Zalman, son of Zevi Hirsch, who was the rabbi and head of the community of *Shklov in Belorussia in the middle of the 18th century. He was a grandson of Elijah Ḥasid, son of Moses Kramer. Two of the sons of Solomon Zalman were Elijah and Benjamin Riveles, who were leading Jews in Shklov at the end of the 18th century and the beginning of the 19th. Benjamin was a second cousin and disciple of *Elijah b. Solomon Zalman, Gaon of Vilna, and his descendants formed the branches of the Rivlins who were *Perushim*, or *Mitnaggedim*, and observed the customs of Elijah, Gaon of Vilna. On the other hand, the sons of Elijah Riveles, also known as Elijah Platkes, were followers of *Shneur Zalman of Lyady, and they and their descendants were *Ḥabad Ḥasidim. The descendants of the brothers Elijah and Benjamin Riveles were among the leaders of Lithuanian and Belorussian Jewry, especially in the cities of Shklov, Mohilev and Vilna.

According to family tradition BENJAMIN RIVLIN (Riveles), founded an association called Ḥazon Zion, which had the aim of encouraging immigration to Erez Israel. As a consequence, a group of the Gaon’s disciples went to Erez Israel, founded there the *kolel of the *Perushim* and renewed the Ashkenazi community in Jerusalem. Benjamin himself did not succeed in reaching the country, dying on the way in 1812. In addition to being a renowned Torah scholar, he also studied the natural sciences, particularly medicine and pharmacy, and traded in medicaments. Of his numerous works, only the small book *Gevi’i Gevi’a ha-Kesef* (Shklov, 1804) was

published. His son HILLEL (1758–1838), born in Shklov, was active in the Ḥazon Zion association. In 1809 he immigrated to Erez Israel at the head of a company of 70 people, among whom were disciples of the Vilna Gaon, and settled in Jerusalem. MOSES (1781–1846), son of Hillel, lived in Shklov, where he officiated as a *Maggid*. After his father immigrated to Erez Israel, he headed the Ḥazon Zion association. He came to Erez Israel himself in 1841 where he was appointed head of the Ashkenazi community in Jerusalem by the rabbis of Russia and Lithuania. Among his writings is *Beit Midrash*, published in Vilna in 1861 by his son ISAAC EISIK (?–1869). When Elijah Joseph Rivlin (1805–1865), grandson of Elijah Platkes, went to Jerusalem in 1847, the members of the Ḥabad branch of the family joined the family and Ḥabad Ḥasidim already in the country in such places as Jerusalem, Hebron, and Tiberias. Members of the family became heads of the *kolelim* and public institutions in Jerusalem and Hebron, such as *talmud torahs*, hospitals, and *gemilut ḥasadim* societies, and were among those who extended the limits of Jewish settlement in Jerusalem and other cities. Other members of the family traveled to Western Europe. There, too, branches of the family evolved, some of whose children moved to Jewish centers in America.

[Benjamin Rivlin]

RIVLIN, ALICE (Mitchell; 1931–), U.S. economist and government official. Born in Philadelphia, Rivlin was raised in Bloomington, Ind., and educated at Bryn Mawr College (B.A. 1952) and Radcliffe College, Harvard University (M.A. 1955; Ph.D. 1958). She had a crowded resume, having served ably in many positions, including several professorships, and numerous leadership positions in various think tanks and in federal government offices.

Rivlin devoted her career to the analysis of public finance and social policy, and particularly to the federal budget. Based mainly at the Brookings Institution, a privately-funded centrist-liberal think tank, her government service began as a consultant to the House Education and Labor Committee in 1961. Rivlin was probably best known as the first director of the Congressional Budget Office (CBO), founded by Congress to provide it with economic information and analysis independent of the executive branch. There she established a tradition of nonpartisan analysis that later earned her criticism from the Reagan administration, but that enabled the CBO to withstand for many years pressures to become a political tool of a congressional majority. During the Clinton administration, as the director of the Office of Management and Budget, Rivlin concentrated largely, and successfully, on reducing the federal deficit. As vice chair of the board of governors at the Federal Reserve, she was involved in monetary

policy, and encouraged greater use of electronic processing in the banking system.

Rivlin described her perspective as that of a “fanatical, card-carrying middle-of-the-roader.” She articulated her ideas in many articles, mainly in professional journals but also in more popular publications; in the early 1970s she wrote a newspaper column for the *Washington Post*. Among her many books are: *The Role of the Federal Government in Financing Higher Education* (1961), *Microanalysis of Socioeconomic Systems: A Simulation Study* (1961, with Guy Orcutt et al.), *Measures of State and Local Fiscal Capacity and Tax Effort* (1962, with Selma J. Mushkin), *Systematic Thinking for Social Action* (1971), *Caring for the Disabled Elderly: Who Will Pay?* (1988, with Joshua M. Wiener), *Reviving the American Dream: The Economy, the States, and the Federal Government* (1992), and *Restoring Fiscal Sanity: How to Balance the Budget* (2004, with Isabel Sawhill).

[Drew Silver (2nd ed.)]

RIVLIN, ELIEZER (1889–1942), historian and journalist in Erez Israel. Rivlin was born in Jerusalem into one of its old established families. He went into business and then became the secretary of the United Old Age Home in Jerusalem. As a young man, he became a correspondent for the New York Yiddish paper, *Morning Journal*, and also published studies on the history of Jewish settlement in Erez Israel, Jerusalem in particular, and in neighboring countries. In this field, Rivlin's major achievement was his revised and enlarged edition of Aryeh Leib Frumkin's *Toledot Ḥakhmei Yerushalayim 1490–1870* (“History of Jerusalem Sages, 1490–1870,” 3 vols., 1928–30), which he expanded into a history of all Jewish settlement in Erez Israel.

Rivlin also published selections from the Pentateuch commentary by the 16th-century Jerusalem rabbi and physician Raphael Mordecai Malkhi, *Likkutim mi-Perush ha-Torah shel R.M. Malkhi* (2 parts, 1923–24); a biography of Joseph Sundel *Salant (Heb., 1927); a new edition of the 17th-century work on Jerusalem, *Ḥorvot Yerushalayim* (1928); and *Sefer ha-Yahas le-Mishpaḥat Rivlin u-Mishpaḥat ha-Gra mi-Vilna* (1935–40; “Genealogy of the Rivlin family and the family of Elijah of Vilna”). His collection of material on Erez Israel in the responsa literature remained unpublished.

[Getzel Kressel]

RIVLIN, HARRY N. (1904–1991), U.S. educator. Born in New York, Rivlin was a schoolteacher before joining the department of education at the City College of New York. In 1939, he organized and headed the department of education at the newly-established Queens College. In 1957 he was appointed dean of teacher education for the newly-established City University of New York. In this post, he served as chief administrative officer of one of the largest teacher education programs in the country. As a coordinator for the Great Cities School Improvement Program, Rivlin studied the ways in which schools were dealing with the educationally and so-

cially disadvantaged. When he was chairman of the Committee on Urban Teaching of the American Association of Colleges for Teacher Education, he was instrumental in setting up a national clearinghouse for research in urban education. He served as acting president of City College during 1961–62. One of America's foremost experts on the problems of education in urban ghettos, Rivlin was chiefly responsible for the plan for training teachers for schools in low socioeconomic areas, which was accepted by the New York City Board of Education in 1966.

He was one of the editors of the *Encyclopedia of Modern Education* (1943), and his published works include: *Educating for Adjustment* (1936); *Teaching Adolescents in Secondary Schools* (1948, 19612) edited with Herman H. Remmers; *Growth and Learning* (1957); *New Teachers for New Immigrants* (1965); *Cultural Pluralism in Education* (with M. Stent and W. Hazard, 1973); *The Control of Urban Schools* (1974); *The College's Responsibility to Its Faculty* (1974); and *In Praise of Diversity* (with M. Gold and C. Grant, 1977).

[Ernest Schwarcz]

RIVLIN, JOSEPH JOEL (1889–1971), Israeli educator and scholar of Arabic language and literature. Born in *Jerusalem, Rivlin was the son of Reuven Rivlin, the last secretary of the general council of Keneset Yisrael. His mother, a sister of Avraham *Shapira, died when he was a week old. From 1910 to 1914, he taught at schools in Jerusalem. Rivlin was one of the main protagonists of spoken Hebrew, and he opposed the Hilfsverein and its domination of education in Erez Israel. When the network of national schools was established, he became its secretary in Jerusalem.

At the beginning of World War I, Rivlin was compelled to leave Jerusalem and hide with his mother's relatives in Petaḥ Tikvah. In 1917 he volunteered to teach in Kefar Sava the children of those who had been expelled from Jaffa and Tel Aviv. He was taken prisoner there by the Turkish government and imprisoned in Jerusalem and then in *Damascus. Freed through the efforts of the engineer Gedaliah Wilbuszewitz, who managed factories in Damascus for the Turkish army, Rivlin acted as his secretary until the end of the war. He remained there and taught in the Hebrew school for a time.

After the war, he took charge of the Damascus Hebrew girls' school established by the Zionist Organization. He was elected to the communal council of Damascus, together with Yehuda *Burla, who headed the boys' school; they represented the Zionist Organization in the city. In 1922 he returned to Erez Israel, then went to study Arabic language and Islamic literature at the University of Frankfurt. On his return to Jerusalem in 1927, he was appointed to the Institute of Oriental Studies of the Hebrew University, and was eventually promoted to professor. In 1928 he was elected to the central organization of Erez Israel Hebrew teachers and from 1930 to

1941 was its chairman. He was also a member of the Academy for the Hebrew Language. Rivlin participated actively in communal work, and was a founder and leader of many organizations, including the B'nai B'rith

At an early age, Rivlin began publishing stories, essays, criticisms, accounts of the settlement of Erez Israel and its personalities, etc. He translated the *Koran and *A Thousand and One Nights* into Hebrew and wrote on the culture of the Kurdish Jews. He published many articles and various books on Jerusalem and its personalities.

[Benjamin Rivlin]

RIVLIN, SHELOMO ZALMAN (1886–1962), *hazzan*, composer, and rabbi, son of Yosef *Rivlin. Rivlin studied liturgical music with A.Z. Idelsohn. For 60 years, he was *hazzan* of the Shirat Israel Synagogue in Jerusalem, and founded and directed its school for *hazzanim* and Jewish music. He endeavored to produce a unified musical style based equally on the European and Oriental traditions, which he published in *Shirei Shelomo-ha-Shirah ha-Me'uhedet* (1933). Rivlin's reputation as an outstanding teacher was spread by his students, many of whom became notable *hazzanim*. He also trained many of his pupils in homiletics and published the sermons he wrote for them to deliver in the Shirat Israel Synagogue in *Midrash Shelomo* (1953). His compositions and arrangements of traditional melodies were published in *Shirei Shelomo*, 3 vols. (1931–61). He also edited, together with J.C. Epstein, a Hebrew-English-Yiddish dictionary (1924).

[David M.L. Olivestone]

RIVLIN, YOSEF YIZHAK (1837–1896), leader of the Jewish community in Jerusalem. Born in Jerusalem, Rivlin was a fourth-generation descendant of Hillel Rivlin (see *Rivlin family), the leader of the disciples of the Vilna Gaon who settled in Erez Israel in the early 19th century. He entered public life at an early age, and from 1863 until his death was secretary – and, in fact, director – of Ha-Va'ad ha-Kelali Keneset Yisrael (General Committee of Keneset Yisrael), the central body of the Ashkenazi community in Jerusalem. As such he was instrumental in unifying the Ashkenazi community. Rivlin initiated the building of the first Jewish quarters in Jerusalem outside the Old City walls, e.g., Naḥalat Shiv'ah (1869), Me'ah She'arim (1874), and other housing centers in the west and northwest of the city. He took an active part in founding the first Jewish agricultural settlement, Petaḥ Tikvah. Rivlin's writings are mostly confined to publicistic commentary. His articles in Hebrew newspapers in Erez Israel and abroad described Jewish life in the Holy Land. He argued with those who criticized the social and economic conditions of the old *yishuv* and especially the *Ḥalukkah* system, for he favored gradual reform, rather than major changes. Rivlin also wrote some poetry about the redemption of Israel and the upbuilding of Jerusalem. A selection of his articles and essays appeared in

book form as *Megillat Yosef* (1966), edited with an introduction by N. Katzburg.

BIBLIOGRAPHY: P. Grajewski, *Ha-Rav Yosef Rivlin* (1926); Y. Rivlin, in: H.Z. Hirschberg (ed.), *Yad Yosef Yizhak Rivlin* (1964).

[Nathaniel Katzburg]

RIZAIEH (until the 1930s called **Urmia**), town in N.W. Iran, on the Persian-Turkish frontier. There was a Jewish community in Urmia in early Islamic days; it first came to the fore in the 12th century with the appearance of the pseudo-messiah David *Alroy, who found many adherents in the town. Nothing more is heard of the community until 1828 when *David d'Beth Hillel visited it. In his *Travels* he mentions three synagogues in Urmia and gives a detailed account of the community's suffering as a result of a *blood libel. Further details are provided by Christian missionary sources. Letters published by I. Ben-Zvi and an account by Z. Shazar throw further light on the history of Jews in Urmia in the last century. As attested by a letter preserved in Chorny's *Sefer ha-Massa'ot* (1884; pp. 240–2), they had contacts with the Jews in the Caucasus. The community was severely affected by a famine in 1871. In 1902, about 350 Jewish families lived in 200 houses in Rizaieh, in four separate quarters with a synagogue in each. With the establishment of the State of Israel, most of the Jews in Rizaieh immigrated there and the rest left the town after the 1979 Islamic revolution.

(in Persian).

[Walter Joseph Fischel / Amnon Netzer (2nd ed.)]

RIZPAH (Heb. רִצְפָּה), daughter of Aiah and concubine of Saul. After Saul's death, Rizpah probably withdrew to the palace of her son *Ish-Bosheth (Ishbaal) at Mahanaim, where *Abner took possession of her (II Sam. 3:7). Abner was reprimanded for this by Ish-Bosheth, whose anger may be explained in light of the custom that the king's harem used to pass on to his successor (cf. II Sam. 16:21), and should have therefore passed on to Ish-Bosheth. Abner's action can also be seen against the background of the Near Eastern custom that the marriage of a former king's wife bestows legitimacy even on an aspirant to the throne who has no sufficient claim (cf. 16:21; I Kings 2:17–22). Abner's action was thus regarded as a step toward claiming the throne.

At a later period in David's reign, a three-year famine broke out which was thought to have been caused by Saul's guilt in slaying the Gibeonites. The Gibeonites demanded the blood of the guilty house of Saul, and David made expiation by handing over seven of Saul's sons, among them the two sons of Rizpah, Armoni and Mephibosheth, to be hanged (II Sam. 21:1–9). The Gibeonites hanged them in the first days of the barley harvest, and brought the bodies to Gibeon to be ex-

posed. Rizpah displayed her devotion by keeping a constant vigil over the bodies to protect them from the birds of prey from the beginning of the barley harvest until the rain finally came (21:10). When David heard of Rizpah's fidelity, he brought her sons' bones to burial (21:13–14).

ROBACK, ABRAHAM AARON (1890–1965), U.S. psychologist and Yiddish scholar. Born in Russia, Roback was taken to the U.S. as a child. He taught at several universities and was associated with the Massachusetts State Department of Education (1926–49). He served as chairman and professor of psychology at Emerson College (1949–1958). Roback's primary importance to psychology was as a historian and systematist. An early opponent of behaviorism, he believed in a broadly humanistic approach to psychology. He was the first to investigate the historical antecedents of American, as opposed to European, sources of psychology. He also stressed the Jewish contribution to the history of psychology. In addition, he devised tests for superior adult intelligence, scientific ingenuity, comprehension, and sense of humor. He wrote on personality and folklore and became interested in the study of linguistics, especially of Yiddish.

Roback was the first to introduce an academic course in Yiddish literature in the U.S., at the Massachusetts University Extension (1929) and organized the Yiddish collection (over 10,000 books) at Harvard University Library (1929). He was editor of *Der Keneder Odler* in Montreal (1908) and first editor of *Canadian Jewish Chronicle* (1914).

Roback's extensive research into the character and literary value of Yiddish also showed the cultural and spiritual impact which this language has made upon Western culture. He showed how Yiddish is permeated by the *folkgeist* of its Jewish speakers and *Weltanschauung* of the shtetl. Roback wrote the *Jewish Influence in Modern Thought* (1929) and *Psychology Through Yiddish Literature* (1931) in which he expressed his belief in the role of Jewish thought in the modern age. Roback was active in many communal and Jewish organizations.

Apart from Yiddish research, he was a prolific writer in his own field. He wrote many articles and over 20 books on psychology. Among the most important were: *The Psychology of Character* (1927, 1952⁴); *Personality in Theory and Practice* (1949, 1957²); *A History of American Psychology* (1952, 1964²); *History of Psychology and Psychiatry* (1961, 1962²); *Aspects of Applied Psychology and Crime* (1964).

[Menachem M. Brayer]

ROBACK, LEA (1903–2000), Canadian feminist, union organizer, communist, peace activist. Roback was known in the Jewish community but earned her fame among labor activists and feminists in Quebec Francophone society. Born in Montreal to Yiddish-speaking Polish parents, she was raised

in Beauport, one of nine children. At home in French society, she went to the University of Grenoble for two years and then to the University of Berlin. Her association with the radical left began in Germany, where she witnessed the rise of Nazism and was herself beaten for her political activism. Returning to Montreal in 1932, she worked at the YWHA and then opened a Marxist bookstore. She became a labor organizer for the ILGWU and organized the Union of Electrical Workers. Given the anti-Marxist government of Duplessis, she continued her work underground when the bookstore was closed. Age did not diminish her enthusiasm or activism as she marched and spoke out for women's rights and against antisemitism, war, and the use of nuclear weapons. Even at age 92, she participated in the March of Bread and Roses. Friends and family set up an ongoing foundation in her honor that would raise money for education. Named to the Order of Quebec and honored by the YWCA and Temple Emanuel-Beth Sholom, Roback was listed as one of the 100 outstanding Quebecers of the 20th century in *L'Actualité*. She was the subject of a 1991 documentary film, *Des Lumières: Dans la grande noirceur*, by Sophie Bissonnette. Roback's papers are at the Jewish Public Library of Montreal. She never married but left a strong legacy that combined a fierce pride in being Jewish with a steadfast commitment to social justice, human rights, and peace. Her life stands as an example of Canadian multiculturalism at its best.

[Norma Baumel Joseph (2nd ed.)]

ROBBINS, HAROLD (1916–1997), U.S. author. Born in New York City and listed as Francis Kane on his birth certificate but abandoned on the steps of a Roman Catholic orphanage, he was raised in a foster home by a Jewish family named Rubins. He dropped out of high school and worked in a succession of jobs, including inventory clerk in a grocery store. When he was 19, he borrowed \$800 and started speculating on crop futures. He later said he was a millionaire by the time he turned 20 but lost it all gambling on the future price of sugar. In 1940, he got a job as a clerk in the New York warehouse of Universal Pictures and rose quickly. By 1942, he became executive director of budget and planning. He remained with Universal as an executive until 1957. He began writing at the age of 30. His first book, *Never Love a Stranger* (1948), drew on his own life as an orphan on the streets of New York and created controversy with its graphic sexuality. The book, later made into a film, was his first bestseller, and by his death he had sold more than 750 million books with more than 25 titles in 32 languages. *The Dream Merchants* (1949) was about Hollywood's film industry, from the first steps to the sound era. In it Robbins blended his own experiences, historical facts, melodrama, sex, and action into a fast-moving story. His 1952

novel, *A Stone for Danny Fisher*, about a sensitive boy growing to manhood while being victimized by circumstances, drew respect from some critics, unlike most of his other writings. The film version (1958) had the setting moved from Chicago to New Orleans; it was renamed *King Creole* and starred Elvis Presley. Among his best-known books was *The Carpetbaggers*, loosely based on the life of Howard Hughes. It took the reader from New York to California, from the aeronautical industry to the glamor of Hollywood. Robbins also wrote *Never Leave Me* (1953), *79 Park Avenue* (1955), *The Betsy* (1971) and *Dreams Die First* (1977). As his bankroll swelled, Robbins began living the sybaritic lifestyle of his characters, luxuriating on his yacht, maintaining villas on the French Riviera, Acapulco, and Beverly Hills, gambling at the world's casinos and marrying at least five times. Robbins said he had experienced all the vices he chronicled in his novels, many of which revolved around disguised versions of the rich and famous, including Aristotle Onassis, Porfirio Rubirosa and Lana Turner.

[Stewart Kampel (2nd ed.)]

ROBBINS (Rabinowitz), JEROME (1918–1998), U.S. dancer, choreographer, director, and producer considered by many the greatest American-born ballet choreographer and the best choreographer on Broadway. Moreover, his works embrace a wide range of styles and moods. Robbins was born in New York, studied ballet and modern dance, had violin and piano lessons, and was interested in marionettes. In 1940, he joined the Ballet Theatre (later the American Ballet Theater) and danced his first important role as Petrouchka in 1942. He subsequently proved an outstanding interpreter of comic and dramatic characters. His first choreographic work *Fancy Free* (1944), in a style based on contemporary movement, was an immediate success and was expanded into a musical, *On the Town*. Robbins choreographed *Interplay* (1945), *Facsimile* (1946), and other works for the Ballet Theatre. In 1948 he joined the New York City Ballet, where he was associate artistic director from 1949 to 1961, and created nine works for its company, including a reworking of Nijinsky's *Afternoon of a Faun* (1953) and *Concert Chopin* (1956). He later choreographed many works for the company, including Bach's *Goldberg Variations* (1971); Stravinsky's *Requiem Canticle*; and Philip Glass's *Glass Pieces* (1983). From 1944 onward, Robbins was also active in the Broadway theater, where his choreographic successes included *West Side Story*, in collaboration with composer Leonard Bernstein (1957), which made him world famous. From 1958 to 1961, Robbins headed his own company, Ballets U.S.A., which played in Europe and America. In 1964, his direction of the musical *Fiddler on the Roof* was outstandingly successful. In 1952, Robbins assisted in the establishment of the *Inbal dance company in Israel. In 1966, he founded the American Theater Laboratory for the development of new forms in the musical theater.

Robbins was Chevalier de l'ordre des arts et lettres (France, 1964); was awarded an honorary doctorate from the City University of New York (1980); and received the Hans

Christian Andersen award (1988) and the Handel Medallion of the City of New York (1990).

[Marcia B. Siegel / Amnon Shiloah (2nd ed.)]

ROBERT (Levin), LUDWIG (1778–1832), German playwright. Born into a prosperous and “enlightened” Berlin family, Robert was the younger brother of Rahel *Varnhagen von Ense. Rejecting a business career to become a writer, he devoted himself mainly to the drama, and was the first Jew to have his plays performed on the German stage. Although he converted to Christianity, he was never allowed to forget his Jewish origin, and his lack of success was partly due to the prejudices of his contemporaries. Neither his adaptation of Molière’s *Les Précieuses Ridicules* (staged in Berlin, 1804) nor his verse tragedy *Die Tochter Jephthas* (staged in Prague, 1813) aroused much enthusiasm. His staunch German patriotism during the Napoleonic era found expression in his verse collection, *Kaempfe der Zeit* (1817), whose technique influenced some of the poems of his young friend Heinrich *Heine. Robert’s outstanding work, the tragedy *Die Macht der Verhaeltnisse* (1819), reflects the ambiguity of his position as a converted Jew. Based on the controversy between Achim von Arnim and Moritz Itzig that led to a duel in 1811, the play deals with class conflicts and the avenging of insults and was the forerunner of the great social dramas of Hebbel and Ibsen, but was not appreciated in its time. His correspondence with his sister Rahel Varnhagen appeared in 2001, edited by C. Vigliero.

[Sol Liptzin]

ROBERT OF READING (second half of 13th century), London Dominican friar, an excellent preacher, deeply skilled in Hebrew, who converted to Judaism, was circumcised, and, taking the name Haggai, married a Jewish woman. Summoned before the king and arguing boldly, he was handed to the archbishop of Canterbury for discipline. This entry for 1275 appears in the Worcester chronicle, derived with few additions from a lost Winchcombe chronicle. In his conversion Robert was not unique. Roth (see Bibliography) draws attention to Samuel Usque’s reference in his *Consolaçam...* (Ferrara, 1553) to this episode.

[Joe Hillaby (2nd ed.)]

ROBERTS, TONY (1939–), U.S. actor. Born in New York City, the son of a well-known radio announcer, Roberts stud-

ied acting at Northwestern University and then struck out for New York, working in commercials. He got a regular stint on the television soap opera *The Edge of Night* and then began a long-term friendship and professional relationship with the comedian-writer-director Woody *Allen when he was cast as Diane Keaton’s husband in Allen’s Broadway production *Play It Again, Sam* (1969). Roberts appeared in such Allen works as *Annie Hall* (1977), *Stardust Memories* (1980), *A Midsummer Night’s Sex Comedy* (1982), and *Radio Days* (1987). In 1995 Roberts costarred on Broadway with Julie Andrews, playing a flamboyant homosexual cabaret entertainer in the musical version of Andrews’ 1981 movie *Victor/Victoria*. He continued in film and on Broadway throughout the early years of the 21st century.

[Stewart Kampel (2nd ed.)]

ROBIN, RÉGINE (1939–), sociologist, essayist, and fiction writer. Robin was born in Paris, France, to working-class immigrants from Poland. Named Rivka Ajzersztejn, she was hidden with her mother in the Paris suburb of Belleville. Both survived the war, as did her father, a French soldier. But some 50 relatives in Poland were killed by the Nazis, as were others from France, following “la grande rafle” (roundup) of Parisian Jews on July 18, 1942. These events left an indelible imprint on the infant Rivka, and would become obsessions for the writer that Robin eventually became. Thus, at the end of her short-story collection, *L’Immense Fatigue des Pierres* (1995), she inserted photos of 50 empty picture-frames to represent her eradicated Polish family. In the same collection, her story “Gratok, langue de vie, langue de mort” depicts the little girl’s hiding place and her French babysitter, Juliette, who fraternized with Nazis but never betrayed her. Robin grew up in a home where she imbibed radical ideas and a deep love for Yiddish. She completed a doctorate in history but switched to sociology. She was a university professor in France, then in Montréal after her father and mother died, respectively in 1975 and 1977. Her passion for Yiddish rekindled just as she began to divide her time between her new home and Paris. Nearly all of her writing, some 15 books, contains reflections on Yiddish language and culture. In 1984, she published *Pour l’amour du Yiddish: écriture juive et sentiment de la langue, 1830–1930*. In *Kafka* (1989), she discussed the fascination with Yiddish of the celebrated Czech writer. Her two novels, *Le Cheval Blanc de Lénine* (1979) and *La Québécoise* (1983), she labeled “auto-fiction,” a combination of family history, imaginary elements and self-reflexive passages on writing. The much-discussed latter book treats imaginatively the narrator’s complex search for identity between her Jewish roots, her French experiences and her efforts to integrate into Quebec society. This search resurfaces in *Cyberdémocraties: Traversées Fugitives* (2004). Among Robin’s most important studies are *Berlin chantiers: Essai sur les passés fragiles* (2001; Prix littéraire de la Ville de Montréal) and *La Mémoire saturée* (2003). Both deal extensively with the Holocaust in German historiography and memorialization. She won the prestigious Governor-General’s Award for

Le Réalisme socialiste: une esthétique impossible (1986). Robin is a fellow of the Royal Society of Canada.

BIBLIOGRAPHY: B.-Z. Shek, "Pour l'amour du yiddish. The Literary Itinerary of Régine Robin," in J. Sherman (ed.), *Yiddish After the Holocaust* (2004): 286–299.

[Ben-Zion Shek (2nd ed.)]

ROBINSON, EDWARD (1794–1863), U.S. Orientalist. In 1830, he was appointed professor of theology at Andover, and later taught in Boston and at the New York Theological Seminary. His travels to Egypt and Palestine in 1837 and 1852 resulted in *Biblical Researches in Palestine* (3 vols., 1841); *Later Biblical Researches in Palestine* (1857); and *Physische Geographie des Heiligen Landes*, published posthumously in 1865 (*Physical Geography of the Holy Land*, 1865). Robinson's travels initiated a new period of biblical research. He went straight to the Arab inhabitants of Palestine, noting the names of places and ruins preserved by them, and was thus able to identify correctly hundreds of forgotten biblical locations. As his archaeological training was insufficient, he was unable to identify a site correctly if it lacked an Arabic name. By leaving the beaten track of the pilgrims and examining early traditions, he shed new light on biblical topography. He was also openly critical of the topographical studies of Jerusalem and discovered important remains of the Third Wall. He was greatly aided in his researches by his assistant Eli Smith, a local missionary who was thoroughly acquainted with Arabic. Robinson discovered five of the six ruined cities in the Negev, identified Masada and transformed knowledge of biblical Palestine.

[Michael Avi-Yonah]

ROBINSON, EDWARD G. (Emanuel Goldenberg), 1893–1973), U.S. actor. Born in Bucharest, Romania, Robinson was taken to the U.S. in 1903. He made his first New York appearance in 1913 and came to prominence in the 1920s with the Theatre Guild, appearing on Broadway in such plays as *Samson and Delilah* (1921), *Peer Gynt* (1923), *The Adding Machine* (1923), *Androcles and the Lion* (1925), *The Firebrand* (1925), *The Brothers Karamazov* (1927), and *Kibitzer*, which he co-wrote with Jo Sterling (1929).

In his first starring film role, Robinson played a gangster in *The Racket* (1927), a portrayal that led to his being cast in the title role of *Little Caesar* (1931). His performance as a gang leader became a screen classic. He went on to play many such parts and was widely imitated. His film career continued through five decades. Among his more than 100 films are: *Kid Galahad* (1937), *Dr. Ehrlich's Magic Bullet* (1940), *The Sea Wolf* (1941), *Double Indemnity* (1944), *Our Vines Have Tender Grapes* (1945), *All My Sons* (1948), *Key Largo* (1948), *House of Strangers* (1949), *The Ten Commandments* (1956), *A Hole in the Head* (1959), *The Prize* (1963), *The Cincinnati Kid* (1965), and *Soylent Green* (1973).

Robinson returned to the stage on occasion, notably in *Darkness at Noon* (1951) and in Paddy Chayefsky's *Middle of the Night* (1956), for which he was nominated for a Tony Award.

In 1973 he was awarded, posthumously, an Honorary Academy Award, which is given for exceptional distinction in the making of motion pictures or for outstanding service to the Academy.

He was very active on behalf of various Jewish and Israeli causes. Robinson's autobiography, *All My Yesterdays*, was published in 1975.

BIBLIOGRAPHY: E.G. Robinson, Jr., *My Father My Son* (1958).

[Frank Emblen and Stewart Kampel / Ruth Beloff (2nd ed.)]

ROBINSON, JACOB (1889–1977), jurist, diplomat, and historian. Born in Serijai (Lithuania – then Russia), Robinson graduated from the law school of the University of Warsaw (1914), served in the Russian army (from 1914), and was for a time in German captivity. He returned to what became independent Lithuania, entered into Jewish public life, and pioneered in the building of a Hebrew school system. For three years, he was director of the Hebrew Gymnasium in Verbalis. In 1922 he was admitted to the bar and in the same year was elected to the Lithuanian parliament, holding office as chairman of the Jewish faction and leader of the minorities bloc until its dissolution in 1926.

With the foundation of the Congress of Nationalities, he became (1925–31) one of the spokesmen for the Jewish cause at international gatherings. He was legal adviser to the Lithuanian Foreign Office (1931–33), and represented Lithuania in the Memel Case before the Permanent Court of International Justice at The Hague (1931), as well as the German-Lithuanian Conciliation Committee.

With the emergence of the Nazi threat to European Jewry, he organized a secret committee for the protection of Jewish rights and used his connections for admission of German Jews to Lithuania. He left Lithuania at the end of May 1940, and later reached New York, where, in 1941, he established the Institute of Jewish Affairs sponsored by the American and the World Jewish Congress. He headed the Institute for seven years, in the course of which he undertook a number of special assignments as special consultant for Jewish affairs to the U.S. chief of counsel, Robert H. Jackson, in the trial of the major war criminals in Nuremberg, and as consultant to the UN Secretariat in the establishment of the Human Rights Commission. When the Palestine question was submitted to the UN, he became legal adviser to the Jewish Agency and later legal adviser to the Israel mission to the UN (1948–57). In 1952, he was in charge of drafting Israel's Reparations Agreement with West Germany.

From 1957, he was adviser to the Conference on Jewish Material Claims Against Germany (subsequently the Memorial Foundation for Jewish Culture) and coordinator of research activities and publications on the Holocaust for *Yad Vashem and *Yivo. He was recognized as a leading authority in this field. Before and during the Eichmann trial, he was special consultant to the attorney general on problems of the history of the Holocaust and of international law.

Robinson was the author of numerous books and articles on international law and organization, and Jewish affairs. These include: *The Metamorphosis of the United Nations* (1958; a course given to the Hague Academy of International Law); *Guide to Jewish History under the Nazi Impact* (a bibliographical work with Philip Friedman, 1960); *And the Crooked Shall be Made Straight* (1965), which was a reply to Hannah *Arendt's *Eichmann in Jerusalem*; and *International Law and Organization* (1967). He also served as consultant editor and adviser to the Holocaust Department of the *Encyclopaedia Judaica*.

ROBINSON, NEHEMIAH (1898–1964), international lawyer. Born in Vištyš, Lithuania, he studied law and political science at the University of Jena, Germany, and from 1927 practiced law in Kovno with his brother Jacob *Robinson. Soon after his arrival in New York (December 1940), he joined the Institute of Jewish Affairs and was appointed its director in 1947, in which post he continued until his death. He published a number of books and numerous articles on contemporary Jewish affairs, the United Nations, prosecution of war criminals, and indemnification of the victims of Nazi persecution. Robinson was International Law Adviser to the *World Jewish Congress. In the negotiations of the *Conference on Jewish Material Claims Against Germany with German authorities at The Hague, Robinson acted as chief adviser in formulating the agreement on indemnification, and later contributed to its legislative and judicial implementation. He also represented Jewish bodies in negotiating agreements on indemnification with the Austrian authorities.

Among his works are: *Indemnification, Reparations, Jewish Aspects* (1944); *Problems of European Reconstruction* (1945); *Ten Years of German Indemnification* (1964, includes biography and bibliography of his works on indemnification); *United Nations and the World Jewish Congress* (1956); *Genocide Convention* (1960); and *Universal Declaration of Human Rights* (1958).

BIBLIOGRAPHY: World Jewish Congress, *Dr. Nehemiah Robinson* (Eng. 1964); N. Goldmann in: *Ten Years of German Indemnification* (1964).

ROBISON, SOPHIA (1888–1969), U.S. sociologist and criminologist. Born in New York, Sophia Robison was a professor

at the New York School of Social Work from 1940 until her retirement in 1958. She did significant studies in the field of juvenile delinquency; her major publications in this field are *Can Delinquency Be Measured?* (1936) and *Juvenile Delinquency: Its Nature and Control* (1960). She also did pioneering work in the field of Jewish demography: her *Jewish Population Studies* (1943) present a thorough statistical analysis of a number of Jewish communities in the northeastern United States. Sophia Robison was a member of the Conference on Jewish Relations since its inception; she cooperated closely with the founder of the conference, Morris Raphael *Cohen.

[Werner J. Cahnman]

ROBLES, ANTONIO RODRIGUES (c. 1620–1690), Marrano merchant. Robles, who was born in Fundão, Portugal, of a family which had suffered at the hands of the Inquisition, settled in London as a merchant in the mid-17th century, but played no part in the crypto-Jewish community. When, however, his property was seized as that of an enemy alien after outbreak of war with Spain in 1656, he successfully obtained exemption on the grounds that although uncircumcised he was not a Spaniard but a Portuguese “of the Hebrew nation.” The successful outcome of the “Robles Case” established the right of professing Jews to live in England without interference.

[Charles Reznikoff]

ROBSON, WILLIAM ALEXANDER (1895–1980), British political scientist. Born in London, Robson was the son of a pearl dealer and became the manager of one of Britain's first airports. There, he gave George Bernard Shaw his first ride in a plane in 1916, and, at Shaw's suggestion, went to the London School of Economics after he was demobilized from the Royal Air Force at the conclusion of World War I. Robson became a barrister in 1922 and lectured in administrative law at the London School of Economics from 1926 to 1947, when he was made professor of public administration. During World War II he held senior administrative positions in government service, becoming assistant secretary to the Air Ministry in 1943.

Robson's writings were principally concerned with the problem of modernizing English administrative law, the bureaucracy, and local government in the era of the welfare state. He strongly favored the coordination of the academic study of administration and government with the realities of practical politics and was founder and editor (from 1930 to 1975) of the *Political Quarterly*, which was designed to serve this purpose. He was also the author of over 25 books on public administration including *Justice and Administrative Law* (1951³), *The Development of Local Government* (1954³), *The Government and Misgovernment of London* (1948²), *The Civil Service in Britain and France* (1956), and *Nationalized Industry and Public Ownership* (1962²). From 1952 to 1955 he was president of the International Political Science Organization.

ROCAMORA, ISAAC DE (1601–1684), Spanish Judaizer. Born into a Marrano family of Valencia, Rocamora became a Dominican friar, known as Vincente de Rocamora. His eloquence and reputation for piety led to his appointment as confessor to Princess Maria of Spain, subsequently the empress of Austria. In 1643, Rocamora disappeared from the Spanish peninsula. He made his way to Amsterdam and proclaimed himself a Jew, circumcising himself and adopting the name Isaac. In Amsterdam, Rocamora studied medicine and embarked on a successful career as a physician. He also played a significant role in the communal and cultural life of Amsterdam Jews. Designated an arbiter in the *Academia de los Sittibundos*, a literary society founded by Manuel de *Belmonte, Rocamora himself wrote Spanish and Latin verse. He provided administrative and medical services for Abi Yetomim, the community orphanage, and for the Maskil el Dal, the immigrant relief society. His son, SOLOMON, was also a physician in Amsterdam.

ROCHBERG, GEORGE (1918–), U.S. composer. Born in Paterson, N.J., Rochberg studied composition with George *Szell, Leopold *Mannes, and Gian Carlo Menotti. In 1948 he joined the faculty of the Curtis Institute, where he remained until 1954. In 1960 he became chairman of the music department of the University of Pennsylvania and after resigning the chair in 1968, he remained at the university as professor of music. In 1979 he was named Annenberg Professor of the Humanities. In 1985 Rochberg was elected to the American Academy and Institute of Arts and Letters. His style evolved from Schoenbergian serialism of the 1950s to the blending of Modernist and Romantic elements in the 1980s and 1990s. Rochberg contributed many articles to professional periodicals; a collection of his writings, *The Aesthetics of Survival: A Composer's View of Twentieth Century Music*, was published in 1984. His compositions include symphonies, piano works, chamber music and songs.

ROCHELLE, LA, capital of the department of Charente-Maritime, W. France. The presence of Jews in La Rochelle is mentioned from the first half of the 13th century. The expulsion planned by *Alphonse of Poitiers in 1249 does not appear to have been carried out; in 1251 a Jew, Haquot, who had been banished for personal reasons, was recalled to La Rochelle from Bordeaux. The Jews were definitely expelled from La Rochelle in 1291. The medieval community occupied the Rue

des Juifs, later known as Rue de l'Evêché. The apostate Nicholas *Donin, who instigated the campaign against the Talmud, originated from La Rochelle. It was here also that *Manasseh Ben Israel was born, his parents having stayed in the town after fleeing from Portugal. From the beginning of the 18th century, the Lameira family, originally from Portugal, lived in La Rochelle; it maintained connections with the Sephardi community of Bordeaux, whose *mohel* served La Rochelle. During World War II Jewish property was confiscated. The Jewish community in La Rochelle numbered approximately 200 in 1969.

[Bernhard Blumenkranz]

ROCHESTER, industrial city in New York State.

Early History

Established in 1812 as a mill town at the falls of the Genesee River in western New York, Rochester attracted its first Jewish residents some three decades later. The construction in the early 1820s of the Erie Canal, which crossed the Genesee at Rochester, opened a trade route west from the Hudson River and spurred migration to the area, including a number of Jewish merchants with packs on their backs. These young men, recently arrived from Germany, were located at first in the smaller canal towns of Brockport and Lockport, among others, but the booming settlement at the falls, which secured its first city charter in 1834, prompted several of these men to move there within the next decade.

Among four Jews listed in the city's 1844 directory was Meyer Greentree, generally regarded as Rochester's pioneer Jewish resident. Born in Bavaria in 1819, he had gone to Rochester as a peddler from New York in the early 1840s and soon married a local seamstress. They quickly combined their skills with those of three young newcomers, Joseph and Gabriel Wile and Hirsch Britenstool, in establishing Rochester's first ready-to-wear clothing firm.

As the number of Jewish residents increased, the need for religious services became more urgent, and twelve young men met in 1848 to organize Rochester's first congregation. The B'rith Kodesh Society eventually leased a former Baptist church, which it later purchased and remodeled as a temple. The number of Jews listed in the Rochester directories increased to 39 by 1850. Marcus Tuska became the first resident rabbi in 1851.

Increasing in numbers, the Jews of Rochester organized a Hebrew Benevolent Society which held its first public festival at Palmer's Hall in 1856. A half dozen of their most enterprising merchants had opened ready-to-wear men's clothing stores on the north side of Main Street bridge, a business that was rapidly becoming Rochester's second most important industry. A Hebrew, German and English Institute, also established in 1856, taught the increasing number of Jewish children until

their parents decided, after the end of the Civil War, to rely on the public schools. A Harmony club, formed in 1868, assumed leadership in the social life of the Jewish community, which was now centered in the sixth ward on the city's northeast side. In 1865 the first Jewish alderman, Joseph Beir, was elected.

Modernizing tendencies at B'rith Kodesh prompted the withdrawal in the late 1860s of a conservative faction to form a second but short-lived synagogue. The original congregation brought Max Landsberg to Rochester as its rabbi. While Rabbi Landsberg progressively led his congregation, housed after 1876 in a new temple on the east side of town, into fuller conformity during the next decade with the Reform synagogues of Chicago and elsewhere, a group of newly arrived Polish Jews successfully established the more Orthodox Temple Beth Israel in 1879. A split in the old Harmony club produced the Phoenix club in the mid-seventies and the Eureka club a few years later, but while the German Jews who dominated these clubs hesitated to admit the newly arrived Polish and Russian Jews to membership, they quickly formed a committee in 1882 to raise funds for the relief of a new wave of destitute refugees from Eastern Europe. A move for the creation of the Western New York Jewish Orphan Asylum attracted its chief support at Rochester where it opened in 1885 on North St. Paul Street. Some of the sons of the first Jewish settlers joined two years later in establishing the Young Men's Jewish Association to assist newcomers in mastering the English language and adjusting to American ways.

East European Immigration

With the passage of years, as Beth Israel erected a new temple on Park Avenue on the city's more salubrious southeast side, where its members were moving, a new influx of Jews from Eastern Europe took their places in the old Jewish quarter and established several new Orthodox temples and institutions in that crowded district. The division between the several groups was aggravated after the turn of the century because of labor-management difficulties within the clothing industry. Many destitute newcomers, unable to find jobs except in the factories and sweatshops of their more fortunate predecessors, resented the proffered assistance of the United Jewish Charities and other German Jewish agencies and proceeded in 1908 to organize the Associated Hebrew Charities to maintain independent institutions of their own. The Jewish Sheltering Home they established gradually displaced the older Jewish Orphan Asylum and later, as the Jewish Children's Home, served the entire community until the growing demand for adoptions dispensed with the need for such shelters. A Jewish Home for the Aged, founded under Orthodox leadership in 1920, quickly expanded, and called the Jewish Home and Infirmary, maintains an enlarged and modern institution on St. Paul Street (1970). The rivalries among these and other Jewish welfare agencies were overcome and forgotten in 1924 with the establishment of the Rochester Council of Social Agencies, at which time the Community Chest assumed the fund-raising responsibility for all local welfare services.

Post-World War II

Jews of Rochester achieved a stronger unity in the mid-1940s as the struggle for the establishment of a Jewish homeland developed. All supported the State of Israel in 1948, and thereafter. Most Jewish residents were clustered in the southeastern city wards and in adjoining towns where they built many substantial homes and three new synagogues and schools in the sixties. In 1970, the Jewish population was 21,500 (3% of the total population).

Prominent Jews

Numerous Rochester Jews have played active roles in the broader community. In 1892 Max Brickner, a member of one of the city's leading clothing firms, which were nearly all controlled and staffed by Jews, was elected president of the Chamber of Commerce, the first of several Jews in Rochester and elsewhere in America to hold that position. Isaac L. Adler, a leader of the Good Government forces, became acting mayor of Rochester in 1930, and a decade later Samuel B. Dicker held that office for 16 years. Congressman Meyer Jacobstein and Louis Wiley (who left Rochester to become publisher of the *New York Times*) were Rochester Jews who attained national distinction. Rabbi Philip Bernstein, head of B'rith Kodesh from 1926, was prominent in national and international Jewish causes. He was deeply involved with the post-liberation care of survivors. Rabbi Abraham J. *Karp of Temple Beth-El was an American Jewish historian and bibliophile. Sol Linowitz was a native of Rochester and headed the Xerox Corporation before entering American diplomacy.

[Blake McKelvey]

The Rochester Jewish community of the new millennium continues to thrive. While stable in population – a demographic study sponsored by the Jewish Community Federation of Greater Rochester in 2000 records 22,850 Jewish residents – the community is characterized by a high degree of participation and affiliation in Jewish life.

The Federation, the modern center of Jewish philanthropy and community planning for the area, supports five beneficiary agencies in the Jewish community of Rochester: the Jewish Community Center, Jewish Family Service, the Jewish Home of Rochester, Hillel Community Day School, and Hillel of Rochester Area Colleges.

The JCC of the early 21st century is a modern facility in which a high percentage of Jews in the area hold membership, taking advantage of family programs, summer camps, senior activities, cultural arts, and athletic facilities. The old Jewish Home and Infirmary on St. Paul Street was a precursor to the Jewish Home of Rochester, a state-of-the-art nursing home with rehabilitation facilities, day treatment programs for seniors, and a separate complex for independent living.

There are a total of 12 synagogues in the Rochester area and a comparatively high number of residents (54%) belong to synagogues. This family-oriented community also has a high (20%) number of residents who are 65 or over. The Rochester Jewish community, which comprises about 3% of the Greater

Rochester area of over 1 million, is relatively affluent and gives generously to Jewish and other charitable causes.

The migration from city neighborhoods to Rochester's eastern suburb of Brighton that took place in the 1960s–1970s led to the significant presence of Jewish institutions and synagogues in that area. As of the year 2000, 48% of Jews lived in the community of Brighton, down from 55% in the late 1980s; Jews were dispersing to other eastern suburbs as well as communities in western Monroe county and areas of the city of Rochester.

The Rochester Federation, in addition to funding local Jewish agencies and social and humanitarian programs in Israel and around the world, houses the Center for Holocaust Awareness and Information (CHAI), which supports Holocaust education in the public schools. CHAI also sponsors educational workshops and events commemorating the Holocaust in the community. The Federation has a Jewish Education Services department that provides programming for families, teens, and Jewish adults; area synagogues also sponsor many programs in Jewish education. The Rochester Jewish community is heavily involved in Israel affairs and interfaith initiatives.

Professions among Jewish residents of Rochester are manifold. In addition to contributing to the high tech industries that have a foothold in Rochester (such as Xerox, Kodak, and Bausch & Lomb), Jews are counted among the faculty of several area colleges and universities. Jews in Rochester are well represented in the professions of medicine, law and finance, in addition to real estate.

A professorship at the University of Rochester was named after Rabbi Phillip Bernstein; William Scott Green was named the Phillip S. Bernstein Professor of Judaic Studies in 1991. Joel Seligman, a leading authority on securities law, took on the presidency of the University of Rochester in 2005. Dan Carp set Kodak onto the path of becoming a digital photography powerhouse as CEO of the company from 2000 to 2005.

ROCHESTER, seaport in S.E. England. Jews are recorded here from 1187 onward and are mentioned as a group in 1231. At the entrance to the cathedral chapter house, there is a fine specimen of the conventional medieval statues representing Church and Synagogue, the latter as a dejected female bearing a broken staff and the Ten Commandments. In modern times, Rochester lost its primacy as a port to adjacent *Chatham. No organized Jewish community remains in Rochester today.

ROCHMAN, LEIB (1918–1978), Yiddish journalist and novelist. Born in Minsk Mazowiecki (Poland), he began his career writing for Warsaw's Yiddish daily, *Varshever Radio*. His diary of the perilous years 1943–44 was published in Paris as *Un in Dayn Blut Zolstu Lebn* ("And You Should Live in Your Blood," 1949). In 1950, he settled in Jerusalem, where he worked on the Yiddish broadcasts of Israel radio and as a correspondent for the New York daily, *Forverts*. His novel *Mit Blinde Trit Iber der Erd* ("With Blind Steps across the Earth," 1969) deals with the wanderings of Jews through Europe before reaching Israel.

[Sol Liptzin]

ROCKEFELLER MUSEUM, name popularly given to the Palestine Archaeological Museum built in Jerusalem during the British Mandatory Administration from a gift of \$1,000,000 by John D. Rockefeller, Jr., who also gave another \$1,000,000 as an endowment fund. The building, designed by Austen St. B. Harrison, with stone plaques designed by Eric Gill around the central court, stands in about ten acres of land facing the northeast corner of the Old City walls. In addition to exhibition space, accommodation was provided for study galleries, record offices, a library, auditorium, photographic studio, workrooms, laboratories, storage rooms, and the offices of the Department of Antiquities. An ancient cemetery was discovered on the site, and a number of tombs were excavated, dating from the fifth century B.C.E. to the sixth century C.E. The museum was opened to the public in 1938.

During the Mandatory administration, the building and museum were administered by the Government Department of Antiquities. Before the termination of the mandate in 1948, the building was entrusted to an international board. In November 1966, however, the government of Jordan nationalized the museum and took possession of the building and its contents. After the Six-Day War (June 1967), the Israeli government entrusted the building and its contents to the Israel Department of Antiquities, which invited the Israel Museum to operate the exhibition galleries.

The exhibition is arranged chronologically, starting with the Stone Age, through the historical periods, to the year 1700 C.E. The exhibits include material from all the important excavations before 1948. Some of the highlights are the Galilee Skull, and prehistoric skeletons from the Mt. Carmel caves; the head of a statue in unbaked clay, painted and with inlaid shell eyes, from Jericho; a pottery mold for casting bronze implements and weapons from Sheḥem (Nablus); a decorated ewer with dedicatory inscriptions from a temple of Lachish; ivory carvings from Samaria and Megiddo; the *Lachish ostraca; Phoenician and Persian objects; Roman statues; Jewish ossuaries; and a representative collection of pottery and glass of all periods.

[Avraham Biran]

ROCKER, U.S. family in Cleveland. SAMUEL ROCKER (1864–1936), who was born in Goerlitz, Austria, emigrated to the United States in 1891. Five years later he founded the *Jewish Star*, a Yiddish newspaper, in Cleveland and in 1908 he founded the *Jewish Daily Press* (later *Jewish Daily World*, 1913), serving as editor and publisher of this first successful Yiddish newspaper in Cleveland. The *World*, published until 1943, became a spokesman for the East European Jews in the city. Samuel Rocker wrote *Divrei Hakhamim* (“Words of Our Sages,” 1920), among other works.

His son, HENRY A. ROCKER (1883–1967), born in Hungary, practiced law with the firm Rocker, Zeller & Kleinman. He served as president of Park Synagogue congregation for more than 20 years beginning in 1929; president of the Jewish Welfare Federation of Cleveland; member of the board of directors, American Jewish Joint Distribution Committee from 1948 to his death; and member of the board of overseers of the Jewish Theological Seminary from 1951 to his death.

°**ROCKER, RUDOLF** (1873–1958), German-Christian anarchist, editor, writer, and translator. Rocker, who was born in Mainz, grew up in a Catholic orphanage, and became a disciple of Prince Peter Kropotkin, the Russian anarchist. In 1895 he went to Liverpool, where he founded and briefly edited the Yiddish monthly of social theory, *Germinal*. In 1898 he settled among the Jewish community of London’s East End, and became both editor of the Yiddish anarchist newspaper *Der Arbeter Fraynd* and a leading figure in the Jewish anarchist movement. Rocker edited the paper until the outbreak of World War I, when he was interned as an enemy alien by the British. The paper was suppressed, and the anarchist club closed. After the war Rocker was deported to Germany. He was forced to flee when Hitler took power and subsequently went to the U.S. (1933).

Rocker translated works by Maxim Gorki, Jean Grave, Kropotkin, Friedrich Nietzsche, Fritz Lemmermayer, Johann Most, and Max Nordau into Yiddish for the benefit of his fellow anarchists. He also wrote a three-volume autobiography in Yiddish. A portion of this, dealing with his experiences in the Jewish anarchist movement, was translated into English and published as *The London Years* (1956).

BIBLIOGRAPHY: W.J. Fishman, *Jewish Radicals: From Czarist Stetl to London Ghetto* (1975); P. Wienand, *Der “geborene” Rebell...* (1981); H.M. Becker, in: *Schriften der Erich-Mühsam-Gesellschaft*, 7 (1995), 43–62; M. Graur, *An Anarchist “Rabbi”...* (1997).

ROCKET. The rocket mentioned in the Bible and in rabbinical literature is the garden rocket, *Eruca sativa*, a plant of the Cruciferae family which grows wild in Israel, but is also cultivated as a salad vegetable or for the extraction of a kind of mustard from its seeds. It is the *orot* (“herbs”) mentioned in the Bible as the plant which one of Elisha’s disciples went to gather during a year of famine; instead he found *pakku’ot* (colocynths) which were poisonous (11 Kings 4:39). The Peshitta renders *orot* as *mallows, but the Targum explains that it re-

fers to garden vegetables in general (cf. Kimḥi to Isa. 26:19). It seems R. Meir’s identification of *orot* with *gargir*, the mishnaic (and also the Arabic) name for the garden rocket is correct, and Johanan explained that “they were so called because they enlighten the eyes” (*or*, “light”; Yoma 18b). This plant, particularly the species growing wild by the wayside, was considered to be a remedy for eye ailments, and R. Sheshet, who was blind, testified to its efficacy (Shab. 109a). Pliny too notes that eating rocket helps the sight (*Natural History* 20:125). Aphrodisiac qualities were also attributed to it (Yoma 18a–b). The plant is also mentioned by Josephus, who describes the shape of its leaves (Ant. 3:174).

[Jehuda Feliks]

ROCKLAND COUNTY, New York State county on the Hudson River, 30 miles north of midtown New York City. Rockland County is 174 square miles in area. It has 35,670 acres of parkland and 60 lakes and ponds. The 2003 population projection was 292,989. There are five towns in Rockland: Clarkstown, Haverstraw, Ramapo, Orangetown, and Stony Point. The Jewish population of Rockland was estimated at 92,000. At 31% of the total population, the Jewish community has a major and significant presence in business, cultural, political, religious, and communal life.

Early Jewish settlers came in the late 1890s as peddlers and small retail shopkeepers. Congregation Sons of Israel was established in Nyack in 1891 and was the first synagogue in the county. Congregation Sons of Jacob in Haverstraw was established around the same time. During the 1930s and 1940s the Jewish population expanded as families who spent their summers in Rockland decided to relocate permanently to the suburbs. These people came predominantly from the five boroughs of New York City and Yonkers. A plurality came from the Bronx and kept moving north.

In December 1955, the Tappan Zee Bridge opened. Within the next 20 years, the general population increased from 90,000 people in 1950 to 229,903 in 1970 and approached 290,000 by the end of the 1990s. The Jewish population increased as well. Young families, many of them professionals, moved from the five boroughs of New York City northward to the suburbs. They came in search of affordable housing with large yards for their children, safety and security, and excellent schools.

This growth included Jews of all affiliations. The most significant growth occurred within the Orthodox Community, which expanded from a few hundred families in the early 1960s to over 5,000 families by 2005.

The Community Synagogue, under the leadership of Rabbi Dr. Moshe Tendler, firmly established the “Up the Hill” community of Monsey in the late 1950s. “Down the Hill Monsey” had also grown from its earlier roots in Spring Valley. Yeshiva of Spring Valley, Beth Jacob of Spring Valley, Ashar, and

Bais Shraga provided private educational opportunities for the growing Orthodox community. By 1983 there were more than 3,000 Orthodox families in Spring Valley, Monsey and its northern neighborhoods. Twenty years later the Orthodox community had nearly tripled its size – from 15,000 people to close to 45,000, some of it attributable to a high birth rate and the rest to the attractiveness of the community for Orthodox Jews. Many new neighborhoods have developed with synagogues in walking distance to large neighborhood population centers. As one example, the Forshay neighborhood grew from 25 families and a single Orthodox synagogue in 1983 to close to 1,000 families and more than a dozen Orthodox houses of worship by 2005. The number of schools rose as well, since virtually all the Orthodox population attend yeshivot or Jewish day schools. In addition to the Modern Orthodox, Agudah, and Chabad Orthodox communities, several ḥasidic villages have been established. These include New Square and Kaiser (Vizhnitz).

The rise in the Orthodox population has created several political changes and challenges including the issue of density/down zoning and affordable housing, and the delicate situation in the East Ramapo school district, in which only 9,200 of the close to 25,000 students attend public schools.

Beyond Monsey's large Orthodox community, there are 14 established Conservative, Reform, and unaffiliated congregations. These exist primarily to the east of Route 45.

The trajectory of the Conservative Jewish population in Rockland reflects that in the country as a whole. During the 1950s, 1960s, and 1970s the movement was large and thriving, sustaining at least eight congregations. Today, there are five. New City Jewish Center, with 900 families, is the largest Conservative congregation in the county. Established in 1958, Rabbi Henry Sosland served the congregation for 43 years, becoming emeritus in 2005. Rabbi Craig Scheff who grew up in Rockland County leads Orangetown Jewish Center.

Reuben Gittelman Hebrew Day School was chartered in 1971 as the Solomon Schechter School of Rockland County. The school was housed in the Jewish Community Center of Spring Valley, a Conservative congregation that subsequently closed. In 1985, it moved to its present location on New Hempstead Road, where it was renamed. The school serves students in preschool through the eighth grade.

Camp Ramah in Nyack, is one of three day camps in the United States affiliated with the Jewish Theological Seminary, the Conservative movement's primary educational institution. The day camp serves children entering kindergarten through eighth grades from Rockland and surrounding counties.

The largest of the Reform congregations include Temple Beth Shalom, Temple Beth El, and Beth Torah Congregation. These synagogues have rich cultural, religious, educational, and social action programs for their congregants and the community at large. Several operate preschool programs in addition to their religious school programs.

The geographic makeup of the Rockland Jewish community has given rise to a new term called "this side, that side, or

both sides of 45." Ninety percent of the Orthodox community resides on the west side of Route 45 and at least two-thirds of the non-Orthodox community lives east of Route 45.

At the geographic and philosophical center of the community are the Jewish Federation of Rockland County and its constellation of agencies – the JCC-Y and the Jewish Family Service. Established in 1984 the relatively young Jewish Federation – serves to support the UJC and Israel and overseas agencies nationally and internationally. Additionally the Federation has helped to establish and continues to support local communal agencies and programs. Beyond the JCC-Y and the Jewish Family Service, the Federation has focused locally to create and fund the Center for Jewish Education of Rockland, the Jewish Community Relations Council, and the *Jewish Reporter*, a monthly newspaper, which is distributed to over 15,000 households.

In late 2006, the Rockland Jewish Community Campus is scheduled to relocate to a larger facility in West Nyack. The 15-acre, 135,000-square-foot facility will house the JCC-Y, Jewish Family Service, Jewish Federation and its agencies and programs, Hadassah, and Huvpac.

The Jewish population is heavily represented in most professions in the county.

More than one-third of the physicians and dentists in the county are Jewish as are the attorneys and accountants. About 25% of the Jewish work force works within the county while the remainder of the professionals generally work either in New York City or in Northern New Jersey.

The Rockland Jewish Community prides itself on the concept of *unity* and has established several initiatives that address this subject. In the late 1990s almost 10,000 people participated in a "We Are One" Event at the Rockland Community College. The community comes together annually for a Yom ha-Shoah observance under the umbrella of the Rockland Holocaust Museum and Study Center. Rockland County proudly participates in the annual (June) New York Salute to Israel Parade with a consortium of more than a dozen synagogues and organizations.

By 2010 it is estimated that the Jewish population will surpass 100,000 people and represent 33% or more of the community. Rockland, a rural area before 1955, has now become a major Jewish population center with a large and extremely diverse Jewish population.

[Shimon Pepper (2nd ed.)]

RODAN, MENDI (1929–), Israeli conductor. Born in Romania, he studied the violin and conducting with Silvestri at the Bucharest Academy of Music (1945–7), then took a degree at the Arts Institute there (1947–9). He made his debut when he conducted the Romanian Radio Orchestra in 1953. He immigrated to Israel in 1961. He has often conducted the Israel Philharmonic Orchestra and appeared in many countries abroad. From 1963 to 1972, Rodan was chief conductor of the Israeli Broadcasting Orchestra presenting new Israeli works. In 1965 he founded the Jerusalem Chamber Orches-

tra and, as its permanent conductor until 1969, toured with it in Europe, East Asia, Australia, South Africa, and the United States. In 1962 he began to teach at the Jerusalem Academy of Music and Dance, where he became pedagogic director (1973), and from 1984 to 1993 the head of the academy. From 1977 he took over the musical directorship of the Beersheba orchestra and served as chief conductor of the Belgian National Orchestra in Brussels (1983–89). Between 1993 and 1997, he was also co-conductor of the Israeli P.O. Rodan was guest conductor of major orchestras, including Suisse-Romande Orchestra, Oslo Philharmonic, Vienna Symphony Orchestra, Brussels Radio Television Orchestra, Bergen Festival Orchestra, and Berlin Symphony Orchestra. He appeared with soloists such as *Rubinstein, *Barenboim, Rampal, *Perlman, and *du Prè and received the Musician of the Year award from the Israeli Ministry of Education and Culture (1997). He made a series of recordings with the Jerusalem Chamber Orchestra, including a collaboration with the harpsichordist Frank *Pelleg of music by Bach and his sons. In 2006 he won the Israel Prize.

RODANIM (Heb. רֹדָנִים; possibly Rhodians, inhabitants of the island of Rhodes), descendants of Javan (Gen. 10:4). In 1 Chronicles 1:7 and in the Samaritan, Syriac, and Septuagint versions of Genesis 10:4 they are called Rodanim, while in the Masoretic Text of Genesis 10:4 they are called Dodanim. It is likely that this is the result of an onomastic-ethnographic or epigraphic (between *r* and *d*) confusion. It is possible that the Rodanim should be equated with the Dananians (?) who are mentioned in the *El-Amarna letters (J.A. Knudtzon, *Die El-Amarna Tafeln*, 1 (1907), 151, lines 48–58, letter from Tyre) and in the Karatepe Inscriptions (see Donner and Roellig, in bibl.) or with *Yadnāna*, perhaps Cyprus (cf. *Elishah). However, the most plausible, although not entirely satisfactory, explanation remains that the Rodanim were inhabitants of Rhodes.

[Pinhas Artzi]

RODA RODA, ALEXANDER (Sándor Friedrich Rosenfeld; 1872–1945), Austrian author and humorist. Born in Zdenci, Slavonia, he was the son of a Jewish landowner and of a non-Jewess. From 1892 Roda Roda was an officer in the Imperial Austrian army, but was dishonorably discharged 10 years later because of his unacceptable opinions. He then became a journalist and, as a roving foreign correspondent, traveled through Western Europe, serving on the Austrian front during World War I. He worked in the U.S.S.R. and other countries until 1933, when he severed his connection with the

German-language press, and in 1939 emigrated to the U.S., where he remained until his death.

A prolific writer of comedies, satirical novels, and short stories, Roda Roda contributed to humorous magazines such as the *Simplizissimus* of Munich and was an outstanding exponent of the Viennese comic art. He excelled in lampooning the old Hapsburg *Kaiserreich* and is best remembered for *Der Feldherrnhuegel* (1910), a comedy about the Austrian officer caste written in collaboration with Carl *Roessler which was suppressed by government censors. His other works include *Der Schnaps*, *der Rauchtabak und die verfluchte Liebe* (1908), a best-selling novel; the autobiographical *Roda Rodas Roman* (1925, 1950²); *Die Panduren* (1935); and *Die rote Weste* (1945). He edited, in collaboration, a six-volume anthology of world humor (1910–11); and a collected edition of his works, in three volumes, appeared in 1932–34.

RODBELL, MARTIN (1925–1998), U.S. biochemist and Nobel laureate. Rodbell was born in Baltimore and received his B.A. at Johns Hopkins University (1949) after his studies were interrupted by Navy service in World War II, and his Ph.D. in biochemistry at the University of Washington, Seattle (1954). His first postdoctoral appointment was in the department of chemistry at the University of Illinois, Urbana. After research in Brussels and Leiden, Rodbell worked at the National Institutes of Health until 1985, apart from a period as professor at the University of Geneva (1981–83). In 1985 he was appointed scientific director of the National Institute of Environmental Health. His main research interest concerned transduction, the process by which cell membrane receptor binding by hormones and other stimuli is converted into an appropriate cell response. He received the Nobel Prize for medicine and physiology in 1994 (jointly with Alfred *Gilman) for delineating the contribution of guanine nucleotides (GTP) and magnesium ions to cell signaling. Rodbell had broad scientific and cultural interests, increased by his European connections.

[Michael Denman (2nd ed.)]

RODE (Rosenzweig), WALTHER (1876–1934), Austrian jurist. Born in Czernowitz (Chernovtsy), Rode was the son of Leon Rosenzweig, writer and deputy to the Austrian Reichsrat. He became a prominent criminal lawyer and was well known for his vehement attacks on the Austrian judiciary under the nom de plume Pamphilus.

In 1929 he published a collection of essays *Justiz*, and in 1931 *Knoepfe und Voegel*, a book of literary notes on crime, criminals, and penal courts. Rode worked as journalist in Geneva, and wrote *Frieden und Friedensleute* (1931), criticizing the League of Nations, and *Deutschland ist Caliban* (1934).

[Josef J. Lador-Lederer]

RODELL, FRED M. (1907–1980), U.S. legal scholar. Rodell, who was born in Philadelphia, served as a special legal adviser to Governor Gifford Pinchot of Pennsylvania until 1933. From then he taught at Yale Law School (professor, 1939–73)

for 41 years. As a teacher, Rodell specialized in constitutional law, labor law, administrative law, federal taxation, and the legal profession.

Rodell is renowned for his cynical assessment of legal articles entitled "Goodbye to Law Reviews," published in 1936 in the *Virginia Law Review*. Not mincing words, he stated: "There are two things wrong with almost all legal writing. One is its style. The other is its content."

That article notwithstanding, Rodell was a prolific contributor to law reviews and general magazines. He also wrote *Fifty-Five Men: The Story of the Constitution* (1936); *Woe Unto You, Lawyers* (1939); and *Nine Men: A Political History of the Supreme Court, 1790–1955* (1955). Regarded as the "bad boy" of American legal academia, Rodell was noted for the ease and clarity of his writing, along with intemperate attacks on those with whom he disagreed. In his highly controversial *Nine Men*, Rodell developed as his central theme that the justices of the U.S. Supreme Court reach their decisions on the basis of essentially political considerations.

ADD. BIBLIOGRAPHY: K. Vinson, "Fred Rodell's Case against the Law," in: *Florida Law Review*, 24 (1996); L. Ghiglione, R. Newman, and M. Rodell (eds.), *Rodell Revisited: Selected Writings of Fred Rodell* (1994); "In Honor of Fred Rodell," in: *Yale Law Journal*, 84:1 (1974).

[Julius J. Marcke / Ruth Beloff (2nd ed.)]

RODENBERG (Levy), JULIUS (1831–1914), German author and editor. Born into a well-to-do family in Rodenberg, Hessen (a town that inspired his later change of name), he sought complete integration into German life. Rodenberg was educated at several German universities, and after spending a number of years in Paris, London, and Italy, settled in Berlin in 1862. In 1874, he founded the *Deutsche Rundschau* and succeeded in attracting to this literary monthly many distinguished writers. He wrote verse collections, novels, short stories, feuilletons and travel sketches.

A keen observer of city life, Rodenberg described Europe's great capitals in *Pariser Bilderbuch* (1856), *Alltagsleben in London* (1860), *Wiener Sommertage* (1875) and, above all, in the three volumes of *Bilder aus dem Berliner Leben* (1885–88). This last work reflects the early years he spent in Berlin, the disappearance of old landmarks, and Berlin's transformation into a noisy dynamic capital. His autobiographical works include *Erinnerungen aus der Jugendzeit* (2 vols., 1899–1901) and *Aus der Kindh* (1907). For his biblical drama, *Sulamit* (1899), based on the Song of Songs, Anton *Rubinstein wrote a musical setting. His correspondence with Conrad Ferdinand Meyer appeared in 1918, edited by A. Langmesser. His correspondence with Georg Brandes, edited by K. Bohnen, appeared in 1980.

[Sol Liptzin]

RODENSKY, SHEMUEL (1902–1989), Israeli actor. Born in Poland, Rodensky was an actor with Habimah and played a variety of roles, often Jewish folk types. After playing Tevya in *Fiddler on the Roof* in Israel, he did the same in West Germany to high praises. In 1984 he was awarded the Israel Prize for theater arts.

RODGERS, MARY, U.S. composer and author (1931–). Born in New York, the daughter of the composer Richard *Rodgers, she studied music at the Mannes College of Music in New York and at Wellesley College. She was married in 1951 and had three children before divorcing in 1957. Her 1959 stage musical, *Once Upon a Mattress*, was a huge hit in New York and helped launch the career of Carol Burnett, the comic actress. In 1961 Rodgers married a motion picture executive, Henry Guettel, and had two sons, one of whom, Adam, is a successful composer for the musical theater. Rodgers wrote for both the stage and the movies. Her children's book, *Freaky Friday*, was one of the most successful children's books from the 1950s through the beginning of the 21st century, and Rodgers wrote the screenplay for the film version, which was also a major success. Rodgers also wrote lyrics, music scores and playscripts. Her books for children frequently center on humorous and fantastic plots. Both *Freaky Friday* and *Billions for Boris*, a follow-up, involve adolescents and their relationships with adults. Often, the young people in her books assume more responsibility than the adults and the children have to cope with a parent's benign neglect. Rodgers also compiled the popular album *Free to Be You and Me*.

DOROTHY FEINER RODGERS (1909–1992), the wife of Richard Rodgers and the mother of Mary, came from an upper-middle-class Jewish background. A magazine writer and author of books on home decoration, Dorothy Rodgers had a background in the arts and conceived the permanent exhibition at the Jewish Museum in New York. She invented two basic household items. An avid seamstress, Rodgers sometimes sewed her husband's silk shirts. She found pattern stays made of tissue to be unsatisfactory. So she invented a pattern stay made of plastic that became a commercial success under the name Basic Try-On Dress Patterns. Her more famous invention was the Jonny Mop, a small mop to clean toilets with a disposable sponge at the "business end." Rodgers, considered the financial brains in the family, won a suit for patent infringement against

Johnson and Johnson, which tried to market a similar mop. Rodgers turned over the royalties to her daughters.

[Stewart Kampel (2nd ed.)]

RODGERS, RICHARD (1902–1979), U.S. composer. Born in New York, Rodgers studied at Columbia University and at the Institute of Musical Art. In collaboration with the lyricist Lorenz Hart, he wrote many musical comedies including: *The Girl Friend* (1926), *Babes in Arms* (1936), *The Boys from Syracuse* (1938), and *Pal Joey* (1940, revived 1957). When Hart died, Rodgers began his long-time partnership with Oscar *Hammerstein II, with whom he created, among others, the greatly successful musicals: *Oklahoma* (1943) which won a Pulitzer prize, *Carousel* (1945), *Annie Get Your Gun* (1946), *South Pacific* (1948), *The King and I* (1951), *The Flower Drum Song* (1958), and *The Sound of Music* (1959). The Rodgers and Hammerstein works established a style of music that proved highly influential and popular. Rodgers also composed *No Strings* (1962) and wrote the music for the television documentary for *Victory at Sea* (1952). Rodgers was one of the five recipients of the first award of the Kennedy Center Honors granted in December 1978.

BIBLIOGRAPHY: D. Taylor, *Some Enchanted Evenings: The Story of Rodgers and Hammerstein* (1953); D. Ewen, *Richard Rodgers* (Eng., 1957), incl. bibl.; Baker, *Biog Dict* (incl. supplement).

RODIN, ELISHA (1888–1946), Hebrew poet. Born in Mstislavl, Russia, Rodin became a bookkeeper. Between 1905 and 1907, he was active in the Jewish revolutionary movement in Lithuania and Poland. Excelling in Yiddish composition as a child, he published several collections of Yiddish poems in the Soviet Union in the early 1920s. His Hebrew poems and literary sketches began to appear in *Erez Israel* in *Davar*, *Haaretz*, and *Gilyonot* (1929–38), which ultimately caused him to be imprisoned by the Soviet authorities. A book of poems and essays, *Bi-Fèat Nekhar* (“In a Foreign Corner”), appeared in 1938 and expresses his devotion to the Hebrew language. The book includes “Prison Poems”, a poem dedicated to Bialik (Rodin attributes his adoption of Hebrew in the late 1920s to Bialik’s influence), and a poem on Elisha b. Avuyah. Rodin’s son, to whom he was deeply attached, volunteered for the front in World War II and was killed in 1942. Poems to his son, written before and after his death, were collected in *La-Ben* (“To My Son”), and were published in *Erez Israel* in 1942–43. After the war he worked briefly as a translator for the Jewish Anti-Fascist *Committee. In 1954 A.Y. *Kariv published all of Rodin’s works (together with those of Hāyīm *Lensky) in *He-Anaf ha-Gadu’a* (“The Severed Branch”, 1954). Kariv prefaced the collection with a biographical sketch of Rodin, one of the last poets in the Soviet Union to write in Hebrew.

RODIN, JUDITH (1944–), U.S. psychologist, educator, and administrator. Born in Philadelphia, Rodin earned her bachelor’s degree from the University of Pennsylvania in 1966 and her Ph.D. from Columbia University in 1970. She joined the

faculty of New York University in 1970 as an assistant professor of psychology. In 1972 she began a 22-year career at Yale, becoming an associate professor in 1975. She was named full professor of psychology in 1979 and professor of medicine and psychiatry in 1985. She served as chair of the department of psychology and dean of the Graduate School of Arts and Sciences before becoming provost in 1992. Rodin’s academic work concerns the relationship between psychological and biological processes in human health and behavior. The author of numerous articles for academic journals, she also published several books, including *Body Traps* (1992), which explores the role of physical appearance in women’s psychological health.

In 1994 Rodin was appointed as the seventh president of the University of Pennsylvania, the first alumna to be named president. She also held faculty appointments as a professor of psychology in the School of Arts and Sciences and as a professor of medicine and psychiatry in the School of Medicine. As president, Rodin facilitated several international health initiatives, which included a collaboration with the government of Botswana to build a hospital, and projects in Saudi Arabia and India to address women’s health issues. At the same time, she chaired an international research network studying health and behavior for the John D. and Catherine T. MacArthur Foundation. During her tenure, the University of Pennsylvania launched an extensive neighborhood revitalization program and established several interdisciplinary institutes as well as international educational programs and collaborations.

In 2005 Rodin was named president of the Rockefeller Foundation, where it was expected that she would guide extensive efforts to combat global disease and hunger through initiatives that promote economic development, education, and disease prevention. She previously served on President Bill Clinton’s Committee of Advisors on Science and Technology, and she chaired the Council of Presidents of the Universities Research Association. She has served on the boards of Electronic Data Systems Corporation, the Brookings Institution, Catalyst, Air Products and Chemicals, and the Greater Philadelphia First Corporation. Rodin was elected to the American Academy of Arts and Sciences, the American Philosophical Society, and the Institute of Medicine of the National Academy of Sciences.

[Dorothy Bauhoff (2nd ed.)]

RODKER, JOHN (1894–1955), English writer and publisher. Rodker was born in Manchester to a recent immigrant who then moved to London’s East End. In his youth, Rodker associated with other young Jewish intellectuals in London of similar background, including Isaac *Rosenberg, and, from 1922, became a professional writer. Rodker’s poems appeared in *The Egoist*, *The New Age*, and other periodicals, and in a collection, *Poems* (1914), printed privately. Deeply influenced by the French poets of the late 18th and early 19th centuries, he translated much of their verse. He spent his later years in Paris as a publisher specializing in the avant-garde and then exporting these works to Britain. He became particularly in-

terested in producing translations of works by Freud and his followers. The best known of many publishing houses with which he was associated was the Imago Press.

One of his novels, *Montagnes Russes*, was first published in a French translation in 1923, and his *Collected Poems 1912–1925* appeared in Paris in 1930. After World War I, he devoted himself largely to publishing and in 1920, at his Ovid Press, issued limited editions of poems by T.S. Eliot and Ezra Pound. Under the imprint of the Imago Press, he published the complete works of Sigmund Freud. Rodker's own writings include *The Future of Futurism* (1926). A new edition of his *Poems* and *Adolphe* (a novel he wrote in 1920), with an introduction by Andrew Crozier, was published in Manchester in 1996.

BIBLIOGRAPHY: *The Times*, London (Oct. 11, 1955).

[William D. Rubinstein (2nd ed.)]

RODKINSON, MICHAEL LEVI (Frumkin; 1845–1904), Hebrew writer and editor. Born in Dubrovno, Belorussia, his first books were tales of the Ḥasidim. After a short stay in St. Petersburg he moved to Königsberg, Germany, where he began publishing various Hebrew periodicals between 1876 and 1880, including *Ha-Kol* (1877–78), *Kol ha-Am* (in Yiddish), *Asefat Hakhamim* (1877–78), and *Ha-Me'assef*. He was a careless editor, but his collaborators, who included E.W. Rabinowitz and M. Vinchevsky, obtained contributions from such Haskalah Hebrew writers as Lilienblum, Kaminer, J.L. Gordon, and others. In 1879 *Ha-Kol* was banned in Russia and soon ceased publication. In the early 1880s Rodkinson published several books advocating religious reforms as a means of solving the “Jewish question.” In 1889 he emigrated to the United States, where he attempted to revive his periodicals (*Ha-Kol* (1889) and *Ha-Sanegor* (1890)). In his later years he devoted himself to translating the Talmud into English. The value of this translation, printed in two editions, lies only in the fact that it is a pioneering effort. He was the brother of Israel Dov *Frumkin.

[Yehuda Slutsky]

RODNEY, RED (Robert Chudnick; 1927–1994), U.S. jazz trumpeter. Rodney received his first trumpet as a bar mitzvah gift from an aunt and uncle. He became one of the premier bebop trumpeters, playing alongside Charlie Parker and other giants of the music, but he also was a heroin addict who spent seven years in prison and rehab centers.

The Philadelphia-born Rodney got his first musical training at Mastbaum High, where his classmates included John Coltrane and Buddy DeFranco. Rodney quickly mastered his instrument and was playing professionally with Jimmy Dorsey at age 15. He would be a featured trumpeter with many other dance bands of the 1940s, culminating in a stint with Woody Herman's bop-influenced Second Herd. Then Parker invited

him to join his quintet in 1949. It was perhaps the most highly visible trumpet gig in jazz and, although the compulsively modest Rodney tried to turn Parker down, Bird insisted. When the band played the segregated South, Bird passed off the red-haired, freckle-faced Rodney as a “blues singer” named “Albino Red.” Although Parker repeatedly warned his young trumpeter not to follow his lead into heroin, Rodney became a drug addict. Rodney supported his habit with steady musical work for a while before turning to non-violent crimes. When he kicked the drug, he enjoyed considerable financial success leading society bands out of Las Vegas, but the pleasure of banking regular checks was outweighed by the boredom of the musical drivel he was forced to play. In the late 1970s he reteamed with longtime collaborator Ira Sullivan, and the two were responsible for several brilliant albums of post-bop jazz in the 1980s.

[George Robinson (2nd ed.)]

ROD OF AARON, Aaron's staff with which he used to perform signs before Pharaoh in order to convince him that he and Moses were sent by the Lord, the God of the Israelites (Ex. 7:8ff., 19–20; 8:1, 12). On another occasion, God caused a rod inscribed with Aaron's name to blossom and bear almonds in order to demonstrate his choice of Aaron for the priesthood and to quell the mutterings of the Israelites against God in the wilderness (Num 17:16–26).

[Shlomo Balter]

In the Aggadah

The Bible ascribes similar miraculous powers to the rods of Aaron and of Moses. One rabbinic opinion even regards the two as identical (Yal., Num. 763, Ps. 869). This staff bore the Ineffable Name (Num. R. 18:23).

The rod, with its blossoms and fruit, was created in the twilight between the sixth day and the Sabbath of creation (Pes. 54a). It was previously used by Jacob when crossing the Jordan, and it was also the staff which Judah gave to Tamar (Yal., loc. cit.).

Because it bore the Ineffable Name it blossomed overnight and yielded ripe almonds thus validating Aaron's claim to the priesthood (Num. R. 18:23). The almond, which is the first tree to blossom, indicated that God would quickly punish those who venture to usurp the priesthood (*ibid.*, Tanh. Aḥarei 8). This rod, which never lost its blossoms or almonds, was utilized by the kings of Judah until the destruction of the Temple when it disappeared. In the future, Elijah will reveal it and hand it over to the Messiah (Num. R. 18:23).

BIBLIOGRAPHY: Ginzberg, *Legends*, 7 (1938), 3.

ROD OF MOSES, Moses' wonder-working rod. When he drove Jethro's flock into the wilderness of Horeb (Ex. 3:1), the

Lord appeared to Moses and ordered him to cast his staff to the ground, and it became a serpent; then he was ordered to seize the serpent by the tail, and it became a rod again (4:1–5). Moses subsequently repeated this and other signs before the Israelites and then before Pharaoh to convince them that he was sent by the Lord. He manipulated the staff in the performance of various miracles in Egypt (Ex. 7:14ff.; 10:13), as well as the splitting of the Sea of Reeds (Red Sea; 14:16), and the producing of water from a rock in the wilderness (Num. 20:9ff.).

[Shlomo Balter]

In the Aggadah

The rod used by Moses in performing his miracles was created during the twilight of the eve of the first Sabbath of creation (Avot 5:6) from a branch of the tree of knowledge in the Garden of Eden (ARN, ed. Schechter, 157). On it were engraved the letters of the Ineffable Name (PDRK 19:140a, PDRK 42), the ten plagues inflicted upon the Egyptians, and the patriarchs, matriarchs, and twelve tribes (Targum to Ex. 14:21). The people originally thought that the staff could engender only destruction, since through its agency Moses had brought the plagues upon the Egyptians in Egypt and the Red Sea. When, however, Moses used it to smite the rock at Horeb, they learned that the rod could also produce the blessings of water (Ex. R. 26:2). With the rod, Moses smote and killed Sihon and Og (Deut. R. 11:10). He was also able to chastise the Angel of Death with it when the Angel came to take him (Deut. R. *ibid.*). In the next world, Moses was rewarded with the scepter which God had employed in the creation of the world. The rod which Moses used in this world was shaped and engraved in the image of this scepter (*Midrash Petirat Moshe*, in: A. Jellinek, *Beit ha-Midrash*, 1 (1938²), 121).

One opinion identifies the Rod of Moses with the Rod of *Aaron (Yal., Num. 763, Ps. 869).

RODRIGUES, BARTHOLOMEW (Jacob de Sequeira; d. 1692), Anglo-Indian merchant, son of the well-known merchant, Gomez Rodrigues (d. 1678). Bartholomew Rodrigues left London in 1683 for Fort St. George (Madras), the center of the diamond trade. Though originally an “interloper,” he was admitted as freeman of the East India Company in 1684. His widespread commercial transactions in diamonds, precious stones, amber, and coral, and the extent of his trade with Manila, Pegu (Burma), Bengal, and China are documented in the records of the Madras Company up to 1692. As the representative of the “Hebrew merchant colony” in Madras, he served as alderman of the Madras Corporation in 1688. On his death, he was buried in the garden of his house in Mint Street, Madras. His brother Alphonso Rodrigues (d. 1716) was also a notable East India merchant and diamond importer in London.

[Walter Joseph Fischel]

RODRIGUES, DIONISIUS (Diniz; d. 1541), Marrano physician to the kings Emanuel and John III of Portugal. In 1518 he engaged in a once-famous controversy with the French physician Pierre Brissot on the rival systems of bloodletting of Galen and Hippocrates. Threatened as a Judaizer by the Inquisition (which subsequently burned him in effigy), he fled first to London where he was a member of the crypto-Jewish community under Henry VIII, then to Antwerp, and finally to Ferrara, where he died. He was the father of the eminent medical writer Manuel *Brudo.

BIBLIOGRAPHY: H. Friedenwald, in: *Bulletin of the History of Medicine*, 7 (1939), 460–7 (= idem, *Jews and Medicine*, 2 (1944), 460–7); L. Wolf, *Essays in Jewish History* (1934), 78.

[Cecil Roth]

RODZINSKY, ARTUR (1892–1958), conductor. Born in Split, Dalmatia (Yugoslavia), Rodzinsky first conducted the Warsaw Philharmonic and Opera Orchestra, and settled in the United States in 1925. In that year he became assistant conductor to Leopold Stokowski of the Philadelphia Orchestra, and in 1937 he organized the NBC Symphony Orchestra for Toscanini. He was appointed permanent conductor of the New York Philharmonic in 1943 but resigned in 1947. He conducted the Chicago Symphony Orchestra for a year, and after 1948 lived in Rome and toured in Europe and South America.

ROEDELHEIM, former town near Frankfurt on the Main. In 1290 Roedelheim received permission from Rudolf *II to accept six Jews, and in 1371 there is evidence of a Jewish settlement there. From that time until the middle of the 17th century, there is no record of the presence of Jews in the town. Before the end of the 17th century, however, services were conducted in a prayer room. In 1711 refugees from the conflagration at the *Frankfurt ghetto joined the Jews of Roedelheim, and in 1730 a synagogue was built; the community maintained a cemetery and an inn as well. About 1750 the Hebrew printer Karl Reich transferred his press from *Homburg to Roedelheim. In 1799 Wolf *Heidenheim established what was called an “Oriental and Occidental printing house,” where he published, among other things, classical editions of liturgical texts. After his death in 1832, his partner Lehrberger printed S. *Baer’s famous *Siddur, Avodat Yisrael* (1868) and other liturgical works. The clear Roedelheim texts were still being reproduced more than a hundred years later. In the years 1837–38, a new synagogue was erected in the town. About 400 Jews, mainly livestock merchants, lived there and constituted 33% of the total population. The community subsequently declined to 236 in 1880 (6% of the population) and to 100 in 1932, being later absorbed by the Frankfurt community.

ROEDERER, COUNT PIERRE LOUIS (1754–1835), French politician and economist, born in Metz. When a member of the Constituent Assembly, Roederer sided with *Clermont-Tonnerre, Robespierre, and others in support of the Jewish claim for political equality (1789–91). He had become familiar with Jewish matters when, as a councilor in the parliament of Metz, he organized the contest sponsored by the Société Royale des Sciences et Arts of Metz, on the theme: “Are there means of rendering the Jews more useful and happier in France?” Roederer expressed his own views on the subject in a private memorandum written for the participants in the contest. “In calling an ancient and considerable people to the service of our society,” he wrote, “we cannot flatter ourselves that we are calling it to virtues which are superior to their own.” Nevertheless, he advised the participants to consider the “moral causes” of the negative social and political characteristics of the Jews, in order to correct them.

[Emmanuel Beeri]

ROEHRICHT, REINHOLD (1842–1905), German scholar, teacher, and researcher into the history of the Crusades. His publications include: *Deutsche Pilgerreisen nach dem heiligen Lande* (1880); *Bibliotheca Geographica Palaestinae* (1890), a standard bibliography of travelers’ literature and cartographical sources; *Regesta Regni Hierosolymitani* (1893–1904; *Geschichte des Koenigreichs Jerusalem*, 1898), described on the basis of original documents.

[Michael Avi-Yonah]

ROESSLER, CARL (pseudonym of **Franz Ressler**; 1864–1948), Austrian playwright, author, and actor. Roessler was born in Vienna and joined the Elf Scharfrichter group, which created the “Ueberbrettl” satirical theater, of which the dramatist Frank Wedekind was also a member. For a short while he was a free-lance writer in Munich. Roessler wrote a number of successful plays but is mainly remembered for his comedy, *Die fuenf Frankfurter* (1912), set in the Frankfurt Judengasse. Roessler also wrote two novels, *Die drei Niemandskinder* (1926) and *Wellen des Eros* (1928). After the Austrian *Anschluss* in 1938, Roessler settled in London.

ROEST, MEIJER MARCUS (1821–1889), Amsterdam bibliographer and journalist. Having been trained as a religious teacher in the Haskalah-oriented Nederlandsch Israëlitisch Seminarium in Amsterdam, Roest became one of the first in the Netherlands to embrace the *Wissenschaft des Judentums*. From his early thirties he contributed numerous articles to Dutch and Jewish periodicals. From 1855 till 1870 he was employed by the auctioneer Frederik Muller, for whom he compiled catalogues of, inter alia, the Joseph Almanzi and Jacob Emden libraries (*Beth ha-Sefer*, 1868) and edited the Dutch journal *De Navorscher*. His magnum opus *Catalog der Hebraica und Judaica aus der L. Rosenthal’schen Bibliothek*, whose model of description closely resembled that of Joseph Zedner, was published in 1875. After the collection was presented to the Amsterdam municipality and incorporated in the university library, Roest became its first custodian, a position he continued to fill until his death.

In reaction to current Reformist tendencies, Roest founded (together with the seminary’s rector and later chief rabbi J.H. *Dünner) the *Nieuw Israëlitisch Weekblad* (1865) and *Israëlitische Nieuwsbode* (1875), through which they hoped to promote a moderately conservative Judaism, supported by *Wissenschaft des Judentums*. In addition to these weeklies, Roest founded and edited the quarterly *De Israëlitische Letterbode* (1875–86), which served as a platform for international, historical as well as bibliographical, scholarship.

[Frederik Jacob Hirsch / Irene E. Zwiep (2nd ed.)]

ROGACHEV, city in Gomel district, Belarus. The number of Jews counted as paying the poll tax in 1766 was 200. The community of Rogachev came under Russian domination in 1772. In 1797 there were 888 Jews in Rogachev (approximately 80 percent of the total population). The community was under the influence of *Chabad Ḥasidism. At the close of the 19th century and in the early 20th century, the community grew larger as the result of its commerce in wood. The number of Jews rose in 1897 to 5,047 (55 percent) and it was doubled by the eve of World War I. During the civil war years, the economic situation of Rogachev deteriorated so that by 1926 there were fewer Jews, 5,327 (47.5 percent), declining to 4,601 in 1939 (30.3 percent of the total population). Under the Soviet regime, the public and religious life of the Jews was stifled. A Jewish artisans’ union with 150 members conducted its official activities in Yiddish. There were three Jewish kolkhozes. A Yiddish school with 320 pupils functioned there. Germans entered the town on July 3, 1941, and gathered the Jews into a

ghetto, where they suffered from overcrowding, hunger, and disease. Between November 1941 and March 1942, 3,500 Jews were executed. The 1959 census gave no indication of Jews living in Rogachev, though their number was estimated at about 750. Rogachev was the native town of Joseph *Rozin, known as “the Rogachover.” It was also the birthplace of the painter Tanhum Kaplan and the Yiddish poet Shmuel *Halkin; after Halkin’s death in 1960 a street was named after him.

[Yehuda Slutsky / Shmuel Spector (2nd ed.)]

ROGATIN (Pol. **Rohatyn**), city in Ivano-Frankovsk (Stanislavov) district, Ukraine; formerly within Poland, it passed to Austria in 1772, and was incorporated within Stanislawow province, Poland, between the two world wars. One of Poland’s oldest cities, Rogatin suffered severely from the depredations of the Tatars. A Jewish community apparently existed there from early times; in the 16th and 17th centuries, Jews from other parts of Poland attended fairs which took place in Rogatin. Within the framework of the Council of Four Lands (see *Councils of the Lands), Rogatin was within the “province of Russia.” At the beginning of the 18th century, there were a number of Shabbateans in Rogatin. Jacob *Frank had many adherents there. The town was one of the three towns allocated to the Frankists by King Augustus III. A noted Frankist, Elisha Schoor (*Wolowski) lived in Rogatin. There were 797 Jews living in Rogatin in 1765 and the number increased during Austrian rule (1772–1919): the community numbered 3,192 (48.9 percent of the total population) in 1887; 3,217 (about 46 percent) in 1912; 1,294 (22.6 percent) in 1921; and 3,002 in 1931.

During World War I, the city was in the battle zone and did not recover during the period of the independent Polish republic. The Jews suffered from the discriminatory policy of the Polish government and the economic depression of the 1930s. Jews took part in the social and political life of the city, and their representatives were elected to the city council in 1927 and 1933. In the elections to the community council of 1933, the Zionists gained the most seats.

[Shimshon Leib Kirshenboim]

Holocaust Period

After the outbreak of World War II, during the period of Soviet rule (1939–41), Jewish community institutions were dissolved, political activity was banned, and restrictions were placed on private enterprise. Some Jews were deported to the Soviet interior. During the German campaign against the Soviet Union, Rogatin was captured by the Germans on July 2, 1941. On July 6 Ukrainian police attacked the Jews, and by the end of 1941 a ghetto was established. Its inhabitants suffered from hunger and from a typhus epidemic in which 30 to 40 persons died daily. Shlomo Amaran was head of the Judenrat. On March 20, 1942, 2,000 persons were murdered near the city. On Sept. 21, 1942, some 1,000 persons were deported to the *Belzec death camp. In October Jews from Bukaczowce, Bursztyn, and Bolszowce were brought to the Rogatin ghetto.

On Dec. 8, 1942, an *Aktion* took place in which 1,250 persons, including the medical corps and patients from the Jewish hospital, were deported to Belzec. In January 1943 the ghetto area was reduced. The survivors in the community prepared bunkers and hideouts, and it was difficult for the Germans to search them out. On June 6, 1943, the Germans began to liquidate the ghetto. They surrounded it, set houses on fire and threw hand grenades into them. Some Jews were able to escape and reach the forests; the others were murdered and buried in mass graves near the new cemetery.

[Aharon Weiss]

BIBLIOGRAPHY: *Kehillat Rohatyn ve-ha-Sevivah* (Heb. and Yid., 1962), incl. Eng. summary. **ADD. BIBLIOGRAPHY:** *Pinkas ha-Kehillot Poland*, vol. 2, *Eastern Galicia* (1980).

ROGERS, BERNARD (1893–1968), U.S. composer. Born in New York, Rogers studied with Ernest *Bloch. His symphonic poem *To the Fallen* (1918) won him a Pulitzer traveling scholarship. He became an instructor at the Eastman School of Music, Rochester University, in 1929. Rogers wrote several operas, among them, *The Warrior* (1944), based on the story of *Samson and Delilah; choral works such as *The Exodus* (1932); an oratorio, *The Passion* (1942); and orchestral and film music. His *Art of Orchestration* appeared in 1951.

ROGERS, CLAUDE MAURICE (1907–1979), British painter. Rogers was born in London, the son of a dentist, and lived as a small child in Buenos Aires before returning to London, where he was educated at St. Paul’s School and the Slade School of Art. Together with William Coldstream and Victor Pasmore, he founded an art school in London which gave rise to the “Euston Road Group” of painters, an English version of Sensitive Impressionism. After service in World War II, Rogers made a distinguished career as a teacher; from 1949 to 1956 at the Slade School and from 1963 to 1972 as professor of fine art at Reading University. A member of the London Group, of which he was president 1962–1965, he was also a member and vice chairman of the British Section of the UNESCO International Association of Artists. At different periods, he was a member of the Arts Panel of the Arts Council of Great Britain and of the National Council of Diplomas and Design. Rogers is represented in important public collections, including the Tate Gallery and the Victoria and Albert Museum.

ADD. BIBLIOGRAPHY: ODNB online; J. Pery, *The Affectionate Eye: The Life of Claude Rogers* (1995).

[Charles Samuel Spencer]

ROGERS, ERNESTO (1909–1969), Italian architect and critic. Rogers was born in Trieste. He belonged to BBPR, a partnership of four modern architects who became internationally known for their sanatorium at Legnano (1937–38). The group also designed housing, industrial buildings, and exhibition architecture. Their Torre Velasca, Milan (1957), created a stir by its apparent abandonment of functionalism. Rogers was editor of the architectural journals *Domus* and *Casabella*.

ROGINSKI, SIMON ZALMANOVICH (1900–1970), Russian physical chemist. Roginski taught at the Dnepropetrovsk University's Mining Institute from 1923 to 1928 and from 1925 was also attached to the Ukrainian Institute of Physical Chemistry. From 1928 to 1941, he was at the Leningrad Polytechnic and the Institute of Physical Chemistry of the U.S.S.R. Academy of Sciences in Leningrad, and from 1941 at the corresponding institute in Moscow.

His fields of research were catalysis, including the "theory of super-saturation," kinetics of explosions, isotopes, and free atoms of hydrogen, oxygen, and nitrogen. He wrote *Adsorbtsiya i kataliz na neodnorodnykh poverkhnostyakh* ("Adsorption and Catalysis on Heterogeneous Surfaces," 1948).

[Samuel Aaron Miller]

ROGOFF, HARRY (Hillel; 1883–1971), U.S. Yiddish journalist and editor. Born in Berezino, Belorussia, Rogoff immigrated to New York at the age of ten with his parents. In 1906 he became a reporter for the *Forverts*, and except for short absences, remained on its staff (as editor after the death of Abraham *Cahan) until his retirement in 1962. In his journalism and editorial writing, he interpreted and commented on political events and sociological trends in the U.S. His major books, *Civics: Vi Azoy Amerike Vert Regirt* ("Civics: How America Is Governed," 1918), and the highly regarded, five-volume *Geshikhte fun di Fareynigte Shtatn* ("History of the United States," 1928), helped to familiarize his largely immigrant readership with their adopted country. Rogoff wrote abundant literary criticism; a short-lived literary magazine, *East and West*, which he edited in 1915–16 was one of the earliest attempts at introducing Yiddish literature to American readers. His English publications, signed Harry Rogoff, include *An East Side Epic: The Life and Work of Meyer London* (1930), later rewritten in Yiddish, and *Nine Yiddish Writers* (1931), a collection of critical essays.

BIBLIOGRAPHY: Rejzen, *Leksikon*, 4 (1929), 58–60; E.H. Jeshurin, *Harry Rogoff Bibliography* (1958). **ADD. BIBLIOGRAPHY:** LNYL, 8 (1981), 303–4; A. Cahan, *Bleter fun Mayn Lebn*, 4 (1928), 466.

[Ruth Wisse]

ROHATYN, FELIX G. (1928–), U.S. financier. Born in Vienna, Austria, Rohatyn and his family fled Austria in 1935 for France and left in 1940, going to Casablanca, Lisbon, and in 1941, Rio de Janeiro, before arriving in the United States in 1942. He received a B.S. in physics from Middlebury College in 1949 and joined the New York office of the investment bank Lazard Freres under Andre Meyer. During the Korean War, he served in the U.S. Army in Germany, attaining the rank of sergeant and returned to Lazard, one of the most influential financial institutions in the world. He was made a partner in 1961 and rose to managing director, the top office in the firm, earning a reputation as a world authority on mergers and acquisitions. During that time he advised many notable financial figures, including Harold Geneen, then head of ITT, and

Lew *Wasserman, head of the talent agency MCA. At the same time, from 1968 to 1972, he served on the board of governors of the New York Stock Exchange and on the boards of directors of a number of multinational corporations. He led the Stock Exchange's crisis committee through a period of great instability in the 1970s, working to find financing that kept tottering companies from collapse. New York City, where he lived, was suffering population decline during that period, like many urban centers, and saw an erosion of its industrial base. Race riots in the 1960s had also left their mark and by the 1970s the city had gained a reputation as a crime-ridden relic of history. In 1975, the city government was on the brink of financial collapse. The mayor, Abraham D. *Beame, asked Washington for assistance and was told, in a famous headline in *The Daily News*: "Ford to City: Drop Dead." Rohatyn was summoned to help the city. Through the Municipal Assistance Corporation, which he headed, Rohatyn forced the city to restructure its debt and the city had to accept increased scrutiny of its finances by an agency of New York State called the Financial Control Board. Rohatyn is credited with managing the negotiations with unions that put up their pension funds to back the city's debt as the city issued revenue and tax anticipation notes. The city survived, and the 1980s saw a rebirth of Wall Street with the city reclaiming its role at the center of the worldwide financial industry. Rohatyn headed the agency from 1975 to 1993. In 1997, when he retired from Lazard, Rohatyn was appointed United States ambassador to France by President Bill Clinton. He served until 2000 and was named commander of the French Legion of Honor. He was a member of the Council on Foreign Relations and the American Academy of Arts and Sciences. He also served as vice chairman of Carnegie Hall in New York and was a trustee of the Center for Strategic and International Studies in Washington. He established Rohatyn Associates in 2001 to provide financial advice to corporations. Among the boards he served on were those of LVMH Moët Hennessy Louis Vuitton, Publicis Group, Groupe Lardere, and Rothschild Continuation Holdings.

[Stewart Kampel (2nd ed.)]

RÓHEIM, GÉZA (1891–1953), U.S. psychoanalyst and anthropologist. Born in Budapest, he was for a time affiliated with the ethnological department of the Hungarian National Museum. In Berlin, he worked under F. von *Luschan and studied the theories of *Freud. In 1915, he underwent his first psychoanalysis at the hands of Sándor *Ferenczi and became the first ethnologist employing and advocating a psychoanalytic interpretation of culture, and during the next three years wrote a series of papers on his theories. About this time, he was appointed professor of anthropology at the University of Budapest. His treatise, *Nach dem Tode des Urvaters (Imago)* (1923), 83–121, adjusted the Freudian theory in the light of anthropological data. In 1925 and 1926, he wrote two books on the psychoanalytic study of Australian totemism.

With Freud's encouragement and assistance, from 1928 to 1931 Róheim did fieldwork in Central Australia, Normanby

(Melanesia), on the Sipupu Island in Somaliland, and among the Yuma Indians in Arizona. On the basis of this research Róheim was enabled to produce a revision of psychoanalytic theory. Some of the products of this study appear in *Animism, Magic, and the Divine King* (1930) as well as various articles in the psychoanalytic journals of the early 1930s. His two books, *Riddle of the Sphinx* (1934) and *The Origin and Function of Culture* (1943), deal with folklore and the interpretation of myths. Between 1932 and 1938, he taught anthropology and psychoanalysis at the Budapest Institute of Psychoanalysis.

In 1938 he left for the United States and became affiliated with the Worcester State Hospital as an analyst. After 1940 he joined the New York Psychoanalytical Institute as a lecturer and engaged in private practice as a psychoanalyst.

In his studies of mythology and magic, he placed primary stress on sexuality but with some deviations from the Freudian doctrine. On the basis of both his fieldwork and his clinical experience, Róheim tended to reject Freud's theory of the primal family and the hypothesis of inherited racial memories as an explanation of totemism and other social data in religion and social structure. He moved toward an ontogenetic theory of culture explaining it on the basis of prolonged dependence of the human infant and child on the mother which results in emotional and social ties.

Róheim also developed a dream theory interpreting various phenomena of anxiety, ambivalence, and aggression as part of the human experience of mother separation. In 1949 he wrote "Technique of Dream Analysis and Field Work in Anthropology" and in 1950 *Psychoanalysis and Anthropology*. In *Magic and Schizophrenia* (1955), Róheim set out his belief that both individuals and societies evolve from a stage of magical symbolic thinking that he related to schizophrenia.

[Ephraim Fischhoff]

ROHLING, AUGUST (1839–1931), antisemitic polemicist. A fanatical ultramontanist priest from the Rhineland, Rohling published in 1871 his *Der Talmudjude* (based on J.A. Eisenmenger's *Entdecktes Judenthum*), a collection of deliberately corrupted quotations, imaginary statements, and forgeries against the Talmud. The book appeared in successive editions and became very popular. When Franz Holubek, a leader of the Viennese artisan movement, was sued for inciting a crowd against the Jews (April 4, 1882), he pleaded not guilty, claiming that he had obtained his information in good faith from the books of Rohling, a full professor at the German University of Prague. Rohling's academic appointments were obtained through the intercession of high Church dignitaries. Holubek's acquittal was a victory for the growing political antisemitism. Rohling and his works acquired further notoriety through the *Tiszaeszlar blood libel affair, when Rohling volunteered to

testify that Jews required Christian blood for their ceremonies. After Franz *Delitzsch, the renowned Protestant Orientalist, had revealed Rohling's ignorance and baseness, Rohling accused Delitzsch of being a Jew and then castigated Adolf *Jellinek and Moritz *Guedemann as cunning knaves for denying Holubek's charges.

Rohling's challenger was Joseph Samuel *Bloch who, after repeated sorties against him, published a series of articles in July 1883 under the title, "An Offer to Commit Perjury," in which he branded Rohling a liar and perjurer. Forced by public opinion to sue Bloch for libel, Rohling enlisted the aid of two antisemites, Brimannus (a Romanian-Jewish renegade who had taught Rohling Hebrew and was author of the scurrilous *Der Judenspiegel* under the pseudonym "Justus") and Ecker (a convicted forger, priest, and professor at an obscure seminary in Paderborn). Neither could attend the trial. Bloch recruited the respected Orientalists Theodor Noeldeke and Karl August Wuensche, who completely demolished all Rohling's academic pretenses. Even Paul *Lagarde condemned Rohling's works. In 1885, shortly before the trial was due to open, Rohling withdrew his suit after Bloch had collected an immense amount of material against him. He paid the costs of the trial, lost his academic chair, and left the public scene, nevertheless continuing to publish antisemitic tracts. Rohling's *Talmudjude* was translated into several European languages; E. *Drumont wrote the introduction to the French edition. The work continued to be published for more than 50 years, and served as a source for Nazi antisemitic doctrines.

Delitzsch, *Was Rohling beschworen hat und beschwoeren will* (1883); idem, *Schachmatt den Blutluegnern Robling und Justus* (1883); *Akten und Gutachten in dem Prozesse Rohling contra Bloch* (1890–1901); J.S. Bloch, *My Reminiscences* (1923); M. Grunwald, *Vienna* (1936), 430–7; J.G. Pulzer, *The Rise of Political Antisemitism in Germany and Austria* (1964); D. van Arkel, *Anti-semitism in Austria* (Ph.D. thesis, Leiden University, 1966), 14–33.

ROITMAN, DAVID (1884–1943), **hazzan* and composer. Roitman was born in Dorozhinki, Russia, and studied with several *hazzanim*, notably Jacob Samuel *Morogowski (Zeidel Rovner). He was *hazzan* in Vilna (1909–12), St. Petersburg (1912–17), and Odessa, before emigrating to the U.S. in 1921. From 1924 until his death, he officiated at Congregation Shaare Zedek in New York. Roitman had a light, flexible, lyric tenor voice with an exceptional falsetto. He was noted for his clarity of rendition and his power of improvisation, while still maintaining an overall simplicity of expression. His compositions *Ashamnu mi-Kol Am* (in: G. Ephros (ed.), *Cantorial Anthology*, 2 (1940), 145–6) and *Raḥel Mevakah al Baneha*, both deeply moving liturgical laments, achieved widespread popularity. In 1961, L. Avery published *Selected Recitatives of Cantor David Roitman*.

ROJAS, FERNANDO DE (c. 1465–1541), Spanish Converso author. Rojas was born in Puebla de Montalbán near Toledo,

studied in Salamanca and settled in Talavera de la Reina. In 1517 he was a witness in defense of a man accused of Judaizing and in 1525 the Inquisition objected to his serving as lawyer for his Converso father-in-law, Alvaro de Montalbán, because he was a New Christian. Acclaimed as the “father of the Spanish novel,” Rojas is generally recognized as the author of all or most of one of Spain’s greatest literary works and the earliest Spanish tragedy, *La Celestina* (first-known ed. Burgos, 1499). Though written completely in dialogue, this is more a novel than a play. The first edition was an anonymous 16-act *Comedia de Calisto y Melibea*. In the third-known edition (Seville, 1501), Rojas hesitantly reveals his authorship in a prefatory letter and in some acrostic verses, stating that he found a fragment of the first act and continued the work. The various editions dated 1502 (although printed later) contain a new prologue and five added acts, as well as numerous textual changes. The title was also changed to *Tragicomedia de Catisto y Melibea*. Rojas himself suggests that the first act may have been by Juan de Mena or Rodrigo de Cota de *Maguaque. He probably wished to obscure his own part in the writing because of the work’s anticlericalism. From 1519 the play was known as *La Celestina*. The fact that Rojas was a Converso has been adduced to explain the pessimism of his work, unequaled in any contemporary production. The *Celestina* has probably inspired more studies than any other Spanish book with the exception of *Cervantes’ *Don Quixote*, to which alone it is placed second. It has been translated many times into English (first by James Mabbe in 1631).

Norton, *Printing in Spain 1501–1520* (1966).

[Kenneth R. Scholberg]

ROKACH, ELEAZAR (1854–1914), Erez Israel pioneer and writer. Rokach, the grandson of Israel *Bak, was born in Jerusalem. He also studied there, but moved to Safed after his marriage, whereupon he began contributing articles on Safed Jewry to the Hebrew press abroad (mainly anonymously) and later wrote for *Havazzelet on many issues. He advocated working the land and was among those who initiated the acquisition of the village Gei-Oni (later *Rosh-Pinnah), where he was one of the first settlers. Rokach went abroad in 1880 and lived first in Romania, and then in Galicia, calling upon the Jews to settle in Erez Israel. He was an unusual mixture of romantic and realist – a dreamer yet a fighter for his beliefs – who was unappreciated in his time. From 1901 until the end of his life, he wandered all over Galicia, lecturing and writing. He died in Drohobycz.

Rokach wrote a pamphlet entitled *Mazzav ha-Ir ha-Kedoshah Zefat ve-Toshaveha ha-Ashkenazim* (“The Conditions of the Holy City of Safed and its Ashkenazi Inhabitants,” Jerusalem, no date). He also published several Yiddish and Hebrew newspapers while abroad (*Yisrael*, Jassy-Piatra, 1881; *Talpiyyot*,

Jassy, 1898–99; and *Ha-Yarden*, Buczacz, 1906, in which his coeditor was S.Y. Agnon).

[Getzel Kressel]

ROKACH, SHIMON (1863–1922), leader of the Jaffa Jewish community. Born in Jerusalem, the grandson of Rabbi Israel *Bak, Rokach moved to Jaffa in 1884 to control the travel tax imposed upon travelers from Jaffa to Jerusalem, a post which he and his father had leased from the Turkish authorities. Together with his brother Eleazar *Rokach, he established the Ezrat Israel Society to assist immigrants passing through Jaffa. In 1887 he was founder of the first modern Jewish quarter in Jaffa, Neveh Zedek, and among those instrumental in unifying the city’s Sephardi and Ashkenazi communities in 1890; he later served as president of the community. One of the pioneers of citriculture in Erez Israel, in 1900 Rokach was a founder of the cooperative citrus-marketing company, Pardes, and served as its director. He utilized his extensive contacts with the Turkish authorities and with Arab notables for the good of the Jewish community. During World War I, he obtained a contract to supply wood for fueling Turkish army trains and employed many Jews to exempt them from Ottoman military service.

[Yehuda Slutsky]

His son, ISRAEL (1896–1959), Israeli public figure and mayor of Tel Aviv. Born in Jaffa, Rokach graduated in Lausanne, Switzerland, as an electrical engineer. He belonged to the non-labor camp of the *yishuv* and dedicated most of his years to the Tel Aviv municipality. He was elected to the first Tel Aviv municipal council in 1922 and served without interruption until 1953 (from 1929 as deputy mayor to *Dizengoff and in 1937–53 as mayor). Under his leadership, Tel Aviv grew from a garden suburb into the principal city of the country. In 1947, Rokach was held for several months in a British detention camp, together with the mayors of Ramat Gan and Netanyah and other *yishuv* leaders, for having aided underground activities against the Mandatory government. Politically he was a leading figure of the General Zionists (ב) and from 1949 served as one of their members in the Knesset. In 1953–55 Rokach was minister of interior and in 1957–59 deputy speaker of the Knesset.

Another son, ISAAC (1894–1974), was active in business affairs connected with the citrus industry and was general manager of the Citrus Growers Cooperation society.

ROKEAḤ, DAVID (1916–1985), Hebrew poet. Born in Lvov, Rokeaḥ settled in Palestine in 1934, working as an engineer, and first published lyrical poems in 1935.

His books of poetry are: *Be-Gesher ha-Yi'ud* (1939), *Yamim Ashenim* (1941), *Mo'adei Ergah* (1954), *Arar alei Shaham* (1958), *Kinno shel Yam* (1963), *Mi-Kayiz el Kayiz* (1964), *Shahar le-Helekh* (1965), *Einayim la-Sela* (1967), and *Ve-Lo Ba Yom Aher* (1969). Many of his poems appeared in German translation by prominent poets such as Paul Celan and Erich Fried, and Rokeah was indeed one of the first Hebrew poets to be published in postwar Germany. For a full listing of Rokeaḥ's works in English translation, see Goell, *Bibliography*, 1191–207.

[Getzel Kressel]

ROKEAḤ or **ROKAḤ** (**Landau**), **ELAZAR BEN SHMELKE** (1665–1741), rabbi. Rokaḥ was born in Cracow, and after serving as rabbi in Rakov (1705) and Tarnow (1709), he was appointed *av bet din* (c. 1714) and subsequently rabbi of Brody. The Jewish community of Brody flourished greatly during this period. It possessed a *Klaus*, which was composed of kabbalists and talmudic scholars, and during his period of office, the first group of adherents of *Israel Ba'al Shem Tov was established in Brody. At this time also a considerable number of scholars from Brody and the neighborhood, such as R. *Abraham Gershon of Kutow and R. *Perez b. Moses, immigrated to Erez Israel.

In 1735 Rokaḥ accepted a call to Amsterdam, despite the violent controversy which had raged there since the death of the previous incumbent, R. Abraham Judah of Halberstadt. Rokaḥ was very well received, and a medallion was even struck in his honor, which roused the antagonism of R. Jacob *Emden. This was not the only dispute which surrounded him, and as a result, in 1740 he decided to immigrate to Erez Israel. He settled in Safed, where he became the head of the small Ashkenazi community, applying himself to their immediate needs to such an extent that they accorded him the title "the Nasi of Erez Israel," which was given to those who devoted themselves to the support of the *yishuv* in the country.

Rokaḥ was a determined and unwearied opponent of every sign of the Shabbatean heresy. While still in Brody, he violently attacked Moses Ḥayyim *Luzzatto, whom he accused of this heresy, and gave his approval to the banning of his works. In Safed he became so involved in a conflict with a group of Shabbateans there that he thought of emigrating

from Erez Israel, but he died suddenly exactly a year after his arrival here.

With his death the position of the Ashkenazi community deteriorated and they appealed for help to the *Council of Four Lands, mentioning the great help which Rokaḥ had obtained for them as a result of his contacts with Poland and Amsterdam.

Among Rokaḥ's works are *Ma'aseh Rokeaḥ* on the composition of the Mishnah (Amsterdam, 1740) and on the Pentateuch (Lemberg, 1850), and *Arba'ah Turei Even* (Lemberg, 1789).

[Jacob Barnai]

ROKISKIS (Heb. and Yid. **Rakishik**), city in Lithuania near the Latvian border. Situated on the Daugavpils-Liepaja railroad, it served as a commercial center for a large rural area and a point for the export of wood, grain, and flax. In 1847 there were 593 Jews in the town and in 1897 2,067 (75% of the total population). During World War I most of the Jews fled to the interior of Russia. The city was reestablished after the war. Jews numbered 2,013 in 1923, and although Rokiskis developed rapidly, its Jews had to contend with harsh competition from the Lithuanians, who were supported by the government. In 1939 there were 3,500 Jews in Rokiskis (40% of the total population). They were mostly *Ḥabad Ḥasidim. During the period of Lithuanian independence (1918–40), there were two Hebrew schools. When the Germans occupied the city in 1941, the Jews were deported to the ghetto of Joniskis and killed there. Rokiskis is the birthplace of the commander of the Soviet Air Force and Hero of the U.S.S.R., Yaakov *Shmushkevich.

[Yehuda Slutsky]

ROLAND-MANUEL (**Roland Alexis Manuel Levy**; 1891–1966), composer and writer. Born in Paris, Roland-Manuel studied with Roussel and Ravel, and in 1947 became professor of aesthetics at the Paris Conservatory. In 1947 he was elected vice president of the International Society for Contemporary Music, and in 1949 president of the International Music Council of UNESCO. His music is a blend of classicism and modernism, avoiding romantic tendencies. His writings include three books on Ravel, and the valuable popularization *Plaisir de la musique* (1947–55) in four volumes.

ROLL, MICHAEL (1946–), British pianist. Roll was born in Leeds to Viennese parents and studied the piano from the age of six with Fanny Waterman. At 12, he made his debut at the Royal Festival Hall, playing the Schumann concerto with Sir Malcolm Sargent. In 1963, the youngest of 88 competitors, Roll won the first Leeds International Piano Competition and thereafter performed with such conductors as Barbirolli, Boulez, Giulini, Gergiev, Haitink, Leinsdorf, Masur, *Previn, and Sawallisch, in many European cities and in Israel. His American debut occurred in 1974 with the Boston Symphony and Sir Colin Davis, appearing in Boston and New

York. He appeared at leading international festivals such as Aldeburgh, Bath, Edinburgh, Granada, Hong Kong, Vienna, and the Klavier-Festival Ruhr. He holds a professorship at the Folkwang Hochschule in Essen. His three CD recordings of the Beethoven Piano Concertos with the Royal Philharmonic Orchestra under Howard Shelley were highly praised by critics.

[Max Loppert / Israella Stein (2nd ed.)]

ROLNICK, JOSEPH (1879–1955), Yiddish poet. Born near Mir (Belorussia) into a miller's family, Rolnick was indelibly marked by the landscape of his youth. He emigrated to New York in 1899, debuted as a Yiddish poet in *Forverts* in 1900, and returned to Europe in 1901, re-emigrating to New York in 1907. Rolnick was one of the first American Yiddish poets to break with the dominant tradition of didactic social poetry, paving the way for impressionism and symbolism. The insurgent literary group Di *Yunge hailed him as a precursor of its ideals and poetic theory and welcomed him into the group. Rolnick avoided complex moods or complicated situations. In simple quatrains he conveyed a single mood or thought with maximum clarity and fidelity. As a mature lyric poet, his resignation was no longer the expression of despair but of a purer and deeper recognition and understanding. The creator of tranquil lyrics whose symbols emerge from village landscape and life, Rolnick has been compared to Robert Frost.

[Sol Liptzin / Eugene V. Orenstein (2nd ed.)]

ROM, YOSEF (1932–1997), aeronautical engineer. Born in Poland, Rom immigrated with his parents to Erez Israel in 1935. He studied aeronautic engineering and became dean of the Faculty of Aeronautic Engineering of the Technion in Haifa. He served as engineering consultant to many research and development institutions and to the defense industry in Israel, and developed supersonic wind tunnels. Rom was awarded the Israel Prize in 1976 for service to technology and applied engineering. He was elected to the Ninth Knesset in 1977, representing the Likud.

ROMAIN, JONATHAN A. (1954–), British rabbi and historian. A leading Progressive rabbi in Barkingside and in Maidenhead, Berkshire, and director of the Jewish Information and Media Service, Romain is also well-known for his publications on Jewish history and life, including (with Dr. Anne J. Kershen): *Tradition and Change: A History of Reform Judaism in Britain, 1840–1995* (1995), *Faith and Practice: A Guide to Reform Judaism Today* (1991), and *The Jews of England: A Portrait of Anglo-Jewry Through Original Sources and Illustrations* (1985).

[William D. Rubinstein (2nd ed.)]

ROMAN, town in Bacau province, Moldavia, N.E. Romania. According to a popular tradition, the first Jews settled in Roman in the second half of the 15th century. Another source attributes the beginning of the Jewish settlement there to the early 16th century. In 1579 the Jews were expelled, according to this source, by the prince of Moldavia. Jews in Roman are first mentioned in Romanian documents from the beginning of the 18th century, and the oldest Jewish tombstones there date from this period. In 1714 a case of blood *libel occurred in Roman. In 1825 priests demanded that the Jewish cemetery should be closed claiming that it was in the center of the town, but the Moldavian ruler rejected their request. The priests then brought several actions against the community, resulting in 1849 in compulsory closure of the cemetery which was subsequently also desecrated. In 1846 the community acquired land for a new cemetery. At first the “Jewish guild” assumed the community functions; subsequently some of them were taken over by the *hevra kaddisha* whose minute book is preserved from 1793. There were 16 prayerhouses, including the Great Synagogue (The Taylor's Synagogue). In 1875 the hostel for travelers (*hekadesh) was converted into a modern hospital and old-age home. The community bath (*mikveh*) also served as a public bath for Christians, being the only one in town.

The Jewish population numbered 288 in 1803, and 1,200 in 1831; it had increased to 6,432 by 1899 (39% of the total population). Persecutions led many Jews to emigrate in 1900 and the following years. The number of the Jews in Roman had decreased to 4,728 by 1910. In 1930 they numbered 5,963 (28% of the total population). At the beginning of the 19th century, the majority of the Jews were occupied in crafts; the number of those engaged in commerce increased by the early 20th century.

In 1865 Jewish educational institutions in Roman included a *talmud torah* and 20 *hadarim*, some belonging to the craftsmen, and others to the Hasidim. A modern Jewish elementary school, opened on directions of the authorities in 1860, was subsequently closed. In 1893, when Jews were expelled from the public schools, a new modern elementary school was opened with the aid of the Jewish Colonization *Association (ICA), and in 1899 a school for girls was founded. Among rabbis in Roman were David Isaacson, who officiated from 1839 to 1907, and his nephew, Solomon Isaacson (1910–47).

After World War I the community underwent reorganization. From 1926 its board was appointed by the government from among Jews who were members of the ruling party. Jews also served on the local council but as representatives of the Romanian parties. Antisemitism was strong in Roman especially between the two world wars, encouraged by the bishop, Lucian Triteanu, one of the leading antisemites in Romania. In 1910 A. *Cuza, the head of the antisemitic party, was elected deputy in this city, and in 1930 as representative of Roman in the Romanian parliament.

The community was not liquidated in the Holocaust. The Jewish population numbered 7,900 in 1947, and 4,500 in 1950.

Most of them left for Israel and by 1969 there were about 150 Jewish families. Two synagogues were in existence.

[Theodor Lavi]

ROMAN, JACOB BEN ISAAC (c. 1570–1650), bibliographer and writer; born in Constantinople of Spanish descent. While in Basle, Roman met Johannes *Buxtorf the Younger, who utilized the former's bibliographical knowledge for the appendix to his father's *Bibliotheca Rabbinica*, which he had edited. For a short while the two maintained correspondence, and the two extant letters by Roman were published in the *Revue des Etudes Juives* (8 (1844), 87–94). His plan to reestablish a Hebrew press in Constantinople did not reach fruition.

Roman compiled an Arabic-Turkish and an Arabic-Hebrew dictionary and composed a Hebrew prosody, "*Mozenei Mishkal*." He also translated some of Jonah ibn Janah's works from Arabic into Hebrew: none, however, was published.

[Victor A. Mirelman]

ROMANELLI, SAMUEL AARON (1757–1817), Italian Hebrew poet and traveler. Born in Mantua, he acquired a knowledge of ten languages including English, French and Spanish. He began his journeys through Europe at an early age. By his late 20s, he reached London where he wrote a Hebrew translation of Pope's *Essay on Man*, *Massah al ha-Adam*, and a lament on the death of Moses Mendelssohn (1786). On his way back to Italy in 1787, he decided to tour Morocco. While there he took up employment wherever he could find it and at the same time wrote his travelogue, *Massa ba-Arav* (Berlin, 1792; repr. with introd. by H. Schirrmann in *Romanelli, Ketavim Nivharim*, 1968; Eng. trans. by Schiller-Szinessy, *Romanelli's Travels in Morocco*, 1887). It is for this attractive description of Jewish life in Morocco written in a biblical Hebrew style that he is best known. In 1790 he left for Europe where he eventually settled in Germany. There he befriended the principal "*me'assefim*" (see **Me'assef*), e.g., I. *Euchel and D. *Friedlaender. While there he composed an allegorical play in three acts, *Ha-Kolot Yeh'dalun* (Berlin, 1791), for the marriage of one of the Jaffe Itzig family. The same year, he published his philosophical poem *Ru'ah Nakhon*, concerning the existence of the soul and God. In 1793 he worked as a proofreader in Vienna, where he published a play for the marriage of Charlotte Arnstein, *Alot ha-Minḥah*, which appeared with an Italian translation. After the French conquest of northern Italy, Romanelli returned to his homeland and settled in Mantua in 1807. The

same year, and in Napoleon's honor, he published *Zimrat Arizim, Raccolta di inni ed odi*, Italian translations of poems and prayers composed by members of the Sanhedrin. In 1808 he published *Maḥazeh Shaddai... Illusione felice ossia visione sentimentale*, a metaphysical poem with an Italian translation (Turin, 1808). His latter years he spent in wandering through northern Italy, finally settling in Casale Monferrato where he died. Many of his works are still in manuscript, including his Hebrew translation of the Italian playwright Metastasio's play *Temistocle* under the title *Talmon*.

ROMAN EMPERORS. It is impossible to make generalizations about the attitude of the Roman emperors toward the Jews. Different attitudes were adopted by different emperors and even the same emperor would change his views, sometimes dependent upon whether it was directed to the Jews in Erez Israel or in other parts of the empire. On the other hand, it is possible to make a sufficiently clear distinction between the attitude of the pagan emperors on the one hand and the Christian on the other.

In general, the pagan emperors were tolerant toward the various foreign religions and even Cicero stated: "*Sua cuique civitati religio est, nostra nobis*" (*Pro Flacco*, 28). Augustus (27 B.C.E.–14 C.E.) continued the favorable policy toward the Jews initiated by *Julius Caesar. Under Tiberius (14–37), as a result of the influence of the powerful Sejanus, the young Jews of Rome were deported to Sardinia to fight brigandage, and a large number of them died there. The Senate decreed that all Jews who would not abjure their faith be banished from Italy and that their articles of religious worship be confiscated. The decree, however, was not put into effect, and in 31, after the death of Sejanus, the protective edicts of Caesar and *Augustus were reconfirmed. Under *Caligula (37–41), Jewish insurrections took place in Erez Israel and Egypt, after the emperor, who desired to be worshiped as a god, had his statue erected in the Temple. The danger was averted due to the efforts of the delegation from the Jews of Alexandria, headed by Philo, and more by the sympathetic legate to Syria, Petronius *Publius. *Claudius (41–54), who did not claim divinity, restored the edict of tolerance to the Jews and extended it to the whole Roman Empire. In 49–50, he decided to expel

from Rome the Jews who, perhaps because of conflicts with the Christians, had disturbed the public order (*Iudaeos impulsore Chresto assidue tumultuantis Roma expulit*; Suetonius, *De vita Caesarum*, Claudius, 25); the expulsion, however, was applied to a few individuals only. In 66, during the reign of *Nero (54–68), the disturbances in Palestine became a full-scale war which ended with the destruction of the Temple (70). Nevertheless, according to Josephus, when *Titus became emperor (79–81), he wished to show a benevolent attitude toward the Jews; in Jewish tradition, however, he remains “Titus the Wicked.” Vespasian instituted the **fiscus judaicus*. It was collected with particular harshness by Domitian (81–96), under whose reign the Jews suffered both in life and property. The meek *Nerva (96–98) started to protect the Jews again, and abolished the stringency of the collection of the *fiscus*. *Trajan (98–117) harshly repressed the Jewish revolt in Palestine, Egypt and Cyrenaica.

The attitude of *Hadrian (117–138) has been the subject of much controversy. Under his reign the *Bar Kokhba Revolt broke out. According to *Dio Cassius, the immediate cause of the revolt was the decision of Hadrian to transform Jerusalem into a Greek city and the Temple into a temple of Jupiter, but, according to Spartianus, it was caused by the prohibition against circumcision. The Midrash (Gen. R. 64:10) attributes it to the breach of promise to reconstruct the Temple, as a result of Samaritan pressure. According to Eusebius, however, the Jews were regarded as responsible for the outbreak of the war, and in consequence anti-Jewish measures were taken. The agitation of the Jews continued also under *Antoninus Pius (138–161), despite his conciliatory attitude which included the repeal of the prohibition against circumcision; as non-Jews were severely punished for circumcision, this signified, in practice, the prohibition of conversion. In fact, conversions were looked upon with disfavor by the emperors and punished with different penalties (for example, the edict of Septimius *Severus in 204). In 212, with the *Constitutio Antoniniana* of Caracalla (211–217), the Jews of the empire also became Roman citizens. Alexander *Severus (222–235) was so favorable in his attitude toward the Jews that a synagogue in Rome was named after him and he was nicknamed the *archisynagogus*. *Diocletian (284–305), the harsh adversary of Christians, Manicheans, and Samaritans, was in contrast friendly toward the Jews, as is affirmed by the Talmud.

With the triumph of Christianity in 313, the empire became ever more intolerant; religious liberty declined. A period of persecutions and juridical and political restrictions began toward the Jews, who were regarded as of a lower degree than pagans and heretics. Theoretically, for example, the destruction of a synagogue was still considered a crime, but in practice the penalties laid down were only partially observed and numerous offenses were perpetrated by the Church. There was an interval of tranquility and a restoration of religious liberty with *Julian the Apostate (361–363), who entertained the idea of rebuilding Jerusalem and the Temple, but with his death there was a religious reaction. In 399 *Honorius tried in vain

to sever the bond between the Jews of the Roman Empire in the West and their brethren in Palestine. In vain did *Theodosius I (379–395) declare that it “could not be ascertained that the sect of the Jews was prohibited by any law”; the Church Fathers rebelled against him and the emperor was forced to retract his declaration. As a result of Theodosius’ *Novella*, 3 (Jan. 31, 438), ascribed to the emperors Theodosius II and Valentinian, the juridical capacity of the Jews in the public sector was completely exhausted. In their codices, Theodosius II (in 438) and Justinian (between 529 and 533) assembled the decrees of the various Christian emperors with regard to the Jews: Justinian even attempted to intervene in the very internal life of the Jewish community. To a greater or lesser degree, every Christian emperor followed, henceforth, the program of an empire become confessionist, endeavoring to impose the Christian faith on its subjects and repressing all which did not conform to it.

[Alfredo Mordechai Rabello]

ROMANIA, country in East-Central and South-East Europe, in the Carpatho-Danubian region, north of the Balkan Peninsula, partly on the littoral of the Black Sea. The territory comprising Romania was known as Dacia in antiquity; Jewish tombstones, other inscriptions with Jewish and Palmyrean names written in Greek or Latin from the Roman period (1st–3rd centuries C.E.) and a coin from the period of Bar Kochba’s revolt with an inscription in Hebrew were discovered in the counties of Transylvania and Oltenia. Jewish and Palmyrean names are also present in some Greek inscriptions discovered in the county of Dobrogea, known in antiquity as the Roman province Moesia Inferior. Early Christian missionary activity in Dacia and the Hellenistic towns of Moesia may have been due to the existence of Jewish groups there. Later, the Carpatho-Danubian territory was mentioned in some Hebrew sources from the 10th to 12th centuries. A Jewish presence is attested in the 14th century in the port towns of the Southern Bessarabia county on the Black Sea. In the 15th century, there were Karaite communities in the same towns, one of them, Akkerman (in Romanian: Cetatea Albă; in Russian: Belgorod Dnestrovskij) called in Hebrew *Ha-Ir ha-Levanah* (“the white city”). The Karaite Jews continued to live there until the middle of the 18th century. Occasional temporary presence of Ashkenazi Jewish merchants in Moldavia (called in Romanian: Moldova, principality located in the North-East, between the Oriental Carpathians and the Dniester and the Black Sea, founded at the beginning of the 14th century) occurred in the second half of the 15th century and in the beginning of the 16th century. In the second half of the 16th century, some Sephardi Jews from the Ottoman Empire visited Wallachia (called in Romanian: Țara Românească, the second Romanian principality, located in the South, between the Southern Carpathians and the Danube, founded at the beginning of the 14th century) as exporters of cattle to

the Ottoman Empire, dealers of wine, importers of textiles, and moneylenders. Some of them settled in Bucharest, the capital of Wallachia. Jewish creditors from Constantinople loaned money to candidates to the thrones of the principalities: they needed the money to pay the amount demanded by the Turkish sultan to obtain the princely function, since the principalities had become vassals to the Ottoman Empire in the first half of the 15th century. Some of those Jewish creditors accompanied the new princes to the principalities to make sure that they would repay their debt. Other Sephardi Jews from Turkey and from Italian states served as physicians or diplomats at princes' courts. In 1594–1595 the princes Mihai Viteazul (Michael the Brave) of Wallachia and Aron Tiranul (Aron the Tyrant) of Moldavia killed their Jewish and Muslim creditors to avoid paying their debts to them.

As Moldavia was on the trade routes between Poland-Lithuania and the Ottoman Empire many Jewish merchants traveled through it. Some settled there. In the 16th century there were Jewish communities in several Moldavian towns. More intensive waves of Jewish immigration resulted from the Chmielnicki massacres (1648–49). Beginning in the 17th century Moldavian princes granted special charters to Jews; known is a charter given to Jews from Jassy in 1666. The Great Synagogue of Jassy was built about 1670.

In the last decades of the 18th century, more Jews from Galicia began to settle in Moldavia as a result of demographic changes, the partition of Poland, Austrian emperor Joseph II's toleration edicts, and the economic growth of the Romanian principalities after the Küçük-Kainargi Russian-Turkish peace treaty (1774). It was the beginning of a new wave of immigration. Many of them were Ḥasidim. These Jewish craftsmen and merchants obtained special charters. They helped to re-establish war-ravaged towns or to enlarge others. Some of them settled at crossroads and founded commercial centers, the so-called burgs; in this activity they were encouraged by landowners. Many Jews were occupied in buying and selling agricultural products from neighboring villages to towns, and bringing and selling industrial products to peasants. The burgs were founded as a part of the economic development toward a commercial economy and the urbanization process. After the settlement of the Jews, landowners gave them charters including advantages, such as exemption from taxes, land for prayer houses, ritual baths, and cemeteries. When two counties of Moldavia were annexed by their neighbors (Bukovina by Austria in 1775 and Bessarabia by Russia in 1812), some Jews from these counties preferred to move to Romanian Moldavia, where they were not harassed by the authorities and had both family and business connections. Among the Jews occupied in commerce (in towns, but especially in burgs), there were also many craftsmen, such as furriers, tailors, boot makers, tinsmiths, and watchmakers; they settled mainly in the towns. There were also Jewish exporters of agricultural products and importers of industrial and luxury products, and Jewish moneylenders, who later on became bankers. In villages, Jews leased inns and brandy distilleries. The process of urbaniza-

tion and the immigration of Jews continued in the first half of the 19th century. Many immigrants also arrived from Russia, partly as a result of the forced conscription in the period of Czar Nicholas I. The number of Jews grew in Moldavia as did the number of the so-called "Jewish burgs"; later part of them became insignificant. Jewish immigration into Wallachia was from Moldavia only (a re-emigration) and some Sephardi Jewish immigration from the Ottoman Empire as a result of the political and economic changes in the Balkan part of that empire.

Among the rabbis and Torah scholars present in Moldavia and Wallachia in the period from the 17th to the beginning of the 19th centuries may be mentioned Solomon ibn Aroyo, a kabbalist and also a physicist (Jassy, at the beginning of the 17th century); Nathan Hanover (Jassy, second half of the 17th century); Haim Thierer (present in some towns of Moldavia, second half of the 18th century); Eliezer Papo (Bucharest and Siliistra, beginning of the 19th century).

From early on commercial competition was one of the main reasons for anti-Jewish hatred in Romania. In 1579 the sovereign of Moldavia, Petru Schiopul (Peter the Lame), ordered the banishment of the Jews on the grounds that they were ruining the merchants. In the Danube harbors it was the Greek and Bulgarian merchants who incited riots against the Jews, especially during Easter. Anti-Jewish excesses in the neighboring countries often extended to the Romanian principalities. In 1652 and 1653 Cossacks invaded Moldavia, attacking many Jews from Jassy. In 1714, there was a small pogrom in Bucharest and the synagogue (built of stones) was destroyed on the order of the sovereign of Wallachia, Stefan Cantacuzino. Greek Orthodox Christianity also preached intolerance toward Jews and shaped the first code of law: the Church laws of Moldavia and Wallachia in 1640, of Byzantine inspiration. Both proclaimed the Jews as heretics and forbade any relations with them. The state and the Church encouraged the conversion of Jews to Orthodox Christianity and offered economic and social advantages to the converts. With the exception of physicians, Jews were not accepted as witnesses in trials. In the codes of 1746 and 1780 the Jews are scarcely mentioned. On the other hand, the first books of anti-Jewish incitement of a religious character appeared around this time: *Alcatuirea aurita a lui Samuil rabbi jidovul* (The Golden Order of Rabbi Samuel the Jew) and "A Challenge to Jews" (Jassy, 1803). The image of the Jew in Romanian folklore includes satanic aspects: the Jews were satanized under the influence of the church. In the course of the rebellion against the Turks (1821), Greek volunteers crossed Moldavia on their way to the Danube, plundering and slaying Jews as they went (in Jassy, Herta (now Gerts), Odobesti, Vaslui, Roman, etc.).

The judicial status of the Jews in the principalities was of an ethnical-religious guild (in Romanian: *breasla*, called *breasla jidovilor* in Moldavia, and *breasla ovreiasca* in Wallachia). There were guilds set up according to nationality and religion (e.g., Armenians, Catholic-Kiprovitchian Bulgarians, Jews) and others organized according to profession (which in-

cluded Moldavian or Wallachian Christian-Orthodox craftsmen or merchants from towns). The system was based on the Ottoman system of “isnafs” (in Turkish: *isnaf*). The guild took care of tax collection proportionate to the number of persons organized in it; the Jews (i.e., the Jewish Guild) were obliged to pay a poll-tax for the right to settle. This system, known from 1666 in Jassy (the right to settle was granted by the sovereign through a gold-charter, in Romanian: *hrisov*) may have existed some decades previously in Moldavia. The head of the guild was the “senior” (in Romanian: *staroste*; in Hebrew: *rosh medinah*). The “senior” was responsible for tax collection. The system was based on that existing in Poland: the Ashkenazi Jews, of Polish origin, maintained their tradition. The “senior” was exempted from payment and had some advantages, granted by the sovereign through a special charter. Later the abuses began: the “seniors” were elected from among members of the same family. In the 1830s the tax paid in Moldavia was called – in Romanian – the *crupca* (also a system of Polish origin; in Polish: *korowka*). The sovereigns preferred to put the rabbi in charge of collecting the tax, with him exempted from paying. Later (last decades of the 18th century) his administrative function was called in Turkish *hakham-bashe* and he was named *hakham-bashi* (the rabbi, who was the chief of the Jewish guild). Every rabbi, however, had to pay bribes (officially) to be recognized in his function. In Moldavia, the rabbis were from the same family: descendents of Rabbi Naphtali ha-Kohen of Posen, whose son, Bezalel was appointed as rabbi of Jassy community in 1719. In Wallachia the “senior” maintained his administrative and fiscal function, but consulted the rabbi of Jassy for halakhic problems and became his representative in Bucharest. The collective tax, set by the guild in agreement with the tax-collector, was paid from the tax on kosher meat, taxes on religious ceremonies, and contributions from every family head. The expenses of the institutions (*talmud torah*, *hekdesh*, cemetery) were covered by the remainder. The rabbi’s salary was set according to the number of slaughtered cattle, of religious ceremonies, and of boys learning in the *talmud torah*.

The situation changed once again at the end of the 18th–first decades of the 19th centuries. Owing to the competition among the rabbis for this function and to the fact that many Jews considered the *hakham bashi* as insufficiently learned in Torah, his prestige was low, and learned rabbis were considered by the Jews as their real spiritual leaders. The growing number of immigrants from Galicia and Russia at the beginning of the 19th century opposed the *hakham bashi*, since such an institution was unknown to them and many of them were followers of Ḥasidism and led by *zaddikim*. As they were foreign subjects they asked their consuls to intercede, and in 1819 the prince of Moldavia decided that the *hakham bashi* should have jurisdiction only over “native” Jews. The Ḥasidim did not buy meat slaughtered by a non-Ḥasidic slaughterer, because his knife was not polished. So, they bought meat from “illegal” slaughterers and did not pay the tax on kosher meat. The collective tax paid by the Jewish guild to the state was smaller.

Finally, after agreements with the representatives of the immigrant Jews (Ḥasidim), because of permanent strife among the diverse groups of Jews and their complaints to the authorities, the latter decided in 1834 to abolish the *hakham bashi* system and institution in Moldavia. In Wallachia, although the *hakham bashi* institution was not abolished, it remained inactive. Jewish communal life and organization were changed. The Ottoman system was changed to the Russian system. The Jewish guild became the Jewish community, called “the Jewish nation” (in Romanian: *natia ovreeasca*). Since the fiscal system could not be changed radically, the method of collective taxation on kosher meat remained in use but was carried out by representatives of the government for a relatively short period. After around a decade it was changed, proving impractical: only the wealthy Jews bought meat, while the poor consumed mainly vegetables. The functions of the community devolved on to the various prayer houses and the artisans’ guilds and sometimes on the *hevra kaddisha* or the Jewish hospital.

(For the early history of the other regions which later made up Romania see *Bessarabia, *Bukovina, and *Transylvania).

Emerging Romania

The Russian-Turkish peace treaty of Adrianopol (1829) canceled the interdiction of the export of some Moldavian and Wallachian agricultural products from the Ottoman Empire and decreed freedom of commerce. Between 1829 and 1834 Moldavia and Wallachia were occupied by Russia. A nearly similar constitution (the so-called Organic Law) was prepared for both principalities during that period and promulgated in 1832. The constitution was similar to the one already existing in Wallachia and Moldavia. From 1832 to 1856 the two principalities were protectorates of Russia. The Organic Law of Moldavia (together with additions promulgated between 1834 and 1856) also dealt with the position of the Jews. Their communal organization was on the Russian model (*kahal*). Jews were forbidden to own property in the villages. Additions to the laws promulgated in 1839 and 1843 gave the authorities the right to determine which Jews were useful to the country, the others being declared vagrants and expelled. However, the Organic Law of Moldavia stipulated that Jewish children could attend public schools if they dressed like the Christian children. Jews were exempted from military service. The number of Jews increased owing to emigration from Galicia and Russia. The number of Jewish burghs in Moldavia also grew. In Bucharest (Wallachia) the community was fragmented. In the early 1840s the Sephardi Jews of Bucharest left the community and founded their own community with their own traditions. The Ashkenazi Jews of Bucharest who were Austrian and Prussian subjects also left the community and founded a community supported by the Austrian and Prussian consuls, in order not to pay taxes. The “native” and Polish (Russian) Jewish subjects remained as the Ashkenazi community. Later on, these two Ashkenazi communities reunited.

In the 1848 revolutions of Moldavia and Wallachia, di-

rected against the Russian protectorate and against absolutism and serfdom, the revolutionaries appealed to the Jews to participate. They distinguished, however, between useful and non-useful Jews (the latter being nominated for expulsion) and proposed the “emancipation of the Israelites and transformation into useful citizens,” proclaiming their civic equality. Some Jews took part in the 1848 revolution of Wallachia (see Davicion *Bally), but the majority of Jews did not participate in the revolutions. However, under the influence of revolution, some “progressive” Jews revolted against the leadership of the Ashkenazi community and took over for a short period. The revolutions were suppressed (in Moldavia immediately by the sovereign, in Wallachia after three months by the Russian and Ottoman armies).

Independent Romania

The peace treaty of Paris (1856), which concluded the Crimean War and granted the principalities a certain autonomy under the suzerainty of the seven European powers, proclaimed *inter alia* that in the two Danubian principalities all the inhabitants, irrespective of religion, should enjoy religious and civil liberties (the right to own property and to trade) and might occupy political posts. Only those who had foreign citizenship were excluded from political rights. The leaders of the Moldavian and Wallachian Jews addressed themselves both to the Romanian authorities and to the great powers, asking for the abolition of the discriminations against them. However, the opposition of Russia and of the Romanian political leaders hindered this: the special assembly decided that only Christians would obtain citizenship. The two principalities united in 1859; Bucharest became the capital of the new state (United Principalities, and from 1862 Romania); Alexandru Ioan Cuza, who was a member of the 1848 revolutionaries’ group and not antisemitic, became their sovereign. The number of Jews was then 130,000 (3% of the total population). In 1864 native Jews were granted suffrage in the local councils (“little naturalization”); but Jews who were foreign subjects still could not acquire landed property. Political rights were granted to non-Christians but only parliament could vote on the naturalization of individual Jews – but not a single Jew was naturalized.

In 1866 Alexandru Ioan Cuza was ousted by anti-liberal forces. A new sovereign, Carol of Hohenzollern-Sigmaringen, was elected and a new constitution adopted. Under the pressure of demonstrations organized by the police (during which the Choir Temple in Bucharest was demolished and the Jewish quarter plundered), the seventh article of the constitution, restricting citizenship to the Christian population, was adopted. Even the visit to Bucharest of Adolphe Crémieux, president of the Alliance Israélite Universelle, who delivered a speech in the Romanian parliament, had no effect. In the spring of 1867 the minister of interior, Ion Bratianu, started to expel Jews from the villages and banish noncitizens from the country. In the summer of the same year Sir Moses Montefiore arrived in Bucharest and demanded that Prince Carol

put a stop to the persecutions. But these continued in spite of the promises given. Hundreds of families, harassed by humiliating regulations (e.g., a prohibition on building *sukkot*), were forced to leave the villages. Local officials regarded such persecution as an effective method of extorting bribes. Neither the repeated interventions of Great Britain and France nor the condemnatory resolutions in the parliaments of Holland and Germany had any effect. The Romanian government reiterated that the Jewish problem was an internal one, and the great powers limited themselves to protests.

At the Congress of Berlin (1878), which finalized Romanian independence, the great powers made the grant of civil rights to the Jews a condition of that independence in spite of opposition by the Romanian delegates. The Romanian representatives threatened the delegates of the Jewish world organizations, as well as the representatives of the Jews of Romania, by hinting at a worsening of their situation. Indeed, after the Congress of Berlin other antisemitic measures were introduced, and there was incitement in the press and public demonstrations organized by the authorities on the Russian model, in order to prove to the great powers that the people were against Jewish emancipation. Their aim was also to create an antisemitic atmosphere on the eve of the session of parliament which was to decide on the modification of the article in the 1866 constitution concerning Jewish naturalization. Prince Carol, opening parliament, declared that the Jews had a harmful influence on economic life and especially on the peasants. After stormy debates parliament modified the article of the constitution which made citizenship conditional on Christianity, but stated that the naturalization of Jews would be carried out individually, by vote of both chambers of parliament. During the following 38 years 2,000 Jews in all were naturalized by this oppressive procedure; of those, 883 were voted in *en bloc*, having taken part in the 1877 war against Turkey.

This caused the great powers to refuse for a time to recognize independent Romania. However, they finally followed the example of Germany, which took the first step after having received pecuniary compensation from the Romanian government through the redemption of railway shares belonging to Silesian Junkers and members of the German imperial court – at six times their quoted value. The situation of the Jews continued to grow worse. Up to then they had been considered Romanian subjects but now they were declared to be foreigners. The Romanian government persuaded Austria and Germany to withdraw their citizenship from Jews living in Romania. The Jews were forbidden to be lawyers, teachers in public schools, chemists, stockbrokers, or to sell commodities which were a government monopoly (tobacco, salt, alcohol). They were not accepted as railway officials, in state hospitals, or as officers. Jewish pupils were later expelled from the public schools (1893). Meanwhile political intimidation continued. In 1885 some of the Jewish leaders and journalists who had participated in the struggle for emancipation, among them Moses Gaster and Elias Schwarzfeld, were expelled from Romania. Both major political parties in Romania – the Liber-

als and the Conservatives – were antisemitic, with only slight differences. In 1910 the first specifically antisemitic party, the National Democratic Party, was founded, under the leadership of the university professors A.C. Cuza and Nicolae Iorga.

Hasidism, Haskalah, Religious Reform

The majority of the Jews of Moldavia were Hasidim. Most of them followed the *admor* of Ruzhin, Rabbi Israel *Ruzhin Friedmann. Others, especially those of Russian origin, were Hasidim of the Chabad movement. In 1809, Rabbi *Abraham Joshua Heshel of Opatow settled in Jassy, having been invited by the local leader and moneylender Rabbi Michel ben Daniel; he left the town in 1813. The next year another Hasidic rabbi, Joseph David Ha-Kohen from Zwolew (1750–1828) settled in Jassy. In 1834, at the suggestion of the *admor* Rabbi Israel of Ruzhin, the Hasidic Rabbi Joseph Landau was invited to Jassy, where he became the town's rabbi until his death (1853). Owing to the large number of appeals to the rabbinical tribunal, another Hasidic rabbi, Aharon Moses *Taubes, was invited to Jassy and settled there; he died in Jassy in 1852. In 1852 the *admor* Menahem Nahum Friedman settled in Stefanesti and founded the Hasidic dynasty and “court” of Stefanesti. In 1866, the *admor* Isaac ben Shalom Friedman settled in Buhusi and founded the Hasidic dynasty and “court” of the same name, which became the central Hasidic court in Romania. Later, *admorim* from the same family founded other Hasidic dynasties and “courts” in Romania, such as Pascani, Adjud, and Focsani. Other *admorim* and Hasidic rabbis from the Gutman, Halpern, Derbaremdige, Landman, Zilberfarb, Wahrman, Teumim, Drimer, Frenkel, and Sulitzer-Moscovici families also settled in Romania in the 19th–first half of the 20th centuries.

The presence of *maskilim*, many of them having emigrated from Galicia, is also attested from the 1830s. Later they became more active and began to organize. One of them was Michel Alter Finkelstein of Jassy, fighter for cultural integration, modernization, and changing of Jewish East-European manner of dress. An important *maskil* from Bucharest was Judah ben Mordechai (Julius) *Barasch, a physicist and also a writer in the Hebrew, German, and Romanian languages. The first Jewish school functioning with a Haskalah movement curriculum was founded in Bucharest in 1851, in the Jewish community holding Austrian and Prussian citizenship, with Julius Barasch as its principal; in 1852 in Bucharest (in the community of “native” and Polish Jews) Naftaly K. Popper became a Hebrew teacher; in Jassy (1853) Benjamin Schwarzfeld became the principal. A “Society for Israelite Culture” was founded in 1862 in Bucharest, functioning for only one year. At the end of the 1850s and in the 1860s some *maskil* Hebrew writers were active in Moldavia: Matitiahu Simha Rabener (editor of the Hebrew review *Zimrat Ha'aretz*; Mordechai Streslisker (Marvad Sat); Hillel Kahane; Hirsh Mendel Pineles (Ha-Shalash) and others.

Some *maskilim* adopted the idea of also reforming religious worship. They advanced their proposals in the 1850s in Bucharest. After a conflict with *Malbim, the rabbi of Bucha-

rest from 1858, they succeeded in influencing the Romanian government to expel him, maintaining that he was against progress (1864). However the majority of the Jews were Orthodox and remained loyal to him. In 1866, the reformists opened the “Choral Temple” in Bucharest; its first preacher was Antoine Levy. In the same period the Choral Temple “Beth Ya'aqov” was opened in Jassy, founded by the baron Jacob Neuschatz. In 1889 the Sephardi reform temple (Cahal Grande) was founded in Bucharest. However the trend was only of moderate reform: most of the reform rabbis were graduates of the Breslau seminary. This trend continued after World War I in the period of the first chief rabbi, Dr. Jacob Isaac *Niemirower.

At the end of the 19th century, the currents of radical Haskalah, Jewish socialism, and Jewish nationalism also appeared in Romania. Activists for Jewish nationalism were Karpel Lippe, a Hebrew writer; Samuel Pineles; Menahem-Mendel Braunstein (Mibashan), also a Hebrew writer, who later immigrated to Palestine; and Israel Teller. At the end of December–beginning of January 1882, a conference of Ishuv Eretz Israel organizations in Romania took place in the town of Focsani.

Internal Organization

Because of conflicts between Hasidim and *maskilim*, and also due to the integrationist trend, Jewish communities ceased to exist or became inactive at the beginning of the 1870s. A new form of organization became necessary. The first general Jewish representative body, after the dissolution of the Jews' Guild and the internal strife in the communities, was the Brotherhood of Zion society, the forerunner of the B'nai B'rith, created in 1872 under the influence of Benjamin Franklin Peixotto, the first American diplomat in Romania. He thus succeeded in shaping a cadre of leaders for the Jewish institutions, but did not see any solution for the masses but emigration. For that purpose he initiated a conference of world Jewish organizations which convened in Brussels (Oct. 29–30, 1872). Under the influence of assimilationist circles, emigration – considered to be unpatriotic – was rejected as a solution of the Jewish problem. The conference suggested to the Jews of Romania that they should fight to acquire political equality. After some years, however, a mass movement started for immigration to Erez Israel.

The political organization founded in 1890, under the name The General Association of Native Israelites, tended to assimilation and strident patriotism, claiming citizenship only for those Jews who had served in the army. Under pressure by a group of Jewish socialists it extended its demands, claiming political rights for all Jews born in the country. In 1897 antisemitic students attacked members of the congress of the association and caused riots in Bucharest. The association ceased its activity, and an attempt at reorganization in 1903 failed. Under the pressure of increasing persecution accompanied by an internal economic crisis, in 1900 a mass emigration of Jews began; they traveled on foot as far as Ham-

burg and from there went to the United States, Canada, and Great Britain. Up to World War I about 70,000 Jews left Romania. From 266,652 (4.5% of the total population) in 1899 the Jewish population declined to 239,967 (3.3%) in 1912. The 1907 revolt of the peasants, who at first vented their wrath on the Jews, also contributed to this tendency to emigrate; Jewish houses and shops were pillaged in many villages and cities of Moldavia, 2,280 families being affected. At the same time the persecution of the Jews increased. Their expulsion from the villages assumed such proportions that in some counties

of Moldavia (Dorohoi, Jassy, Bacau) none remained except veterans of the 1877 war.

In 1910 the political organization called Uniunea Evreilor Pamanteni (The Union of Native Jews), UEP, was founded to combat anti-Jewish measures and to achieve emancipation. Its first head was Adolphe Stern, former secretary of B.F. Peixotto. The UEP tended toward integration in Romanian society. It operated by intercession with politicians, through petitions to parliament, and by printed propaganda against antisemitism. In a single case it was successful through direct intercession

with King Carol I, who held up the passage of a bill discriminating against Jewish craftsmen (1912).

At the end of the 19th century there began the organization of Jewish communities, together with the creation of a Jewish school system as a result of the expulsion of Jews from the public schools (1893). The impoverishment of the Jewish population also created a need for social assistance which could not be provided by the various existing associations. To achieve the legalization of the communities, several congresses of their representatives were organized (April 1896 in Galati, 1902 in Jassy, and 1905 in Focsani), but they could not agree on the proper nature of a community. Some claimed that it should have an exclusively religious character; others wanted a lay organization dealing only with social welfare, hospitals, and schools. The different Jewish institutions (synagogues, religious associations, hospitals) endeavored to preserve their autonomy. There was a struggle for the tax on meat, too, each demanding this income for itself. At the same time assimilationist groups of students and intellectuals launched a drive against the community, which they defined as an isolationist instrument; in this move they were joined by antisemites who called the community a "state within a state," a Jewish conspiracy aiming to establish supremacy over the Romanians. Some proposed putting the communities under the Ministry of the Interior. An attempt in 1897 to introduce into parliament a bill on the Jewish communities, its purpose being defined by the proposer as "to defend the Jewish population against its ignorant religious fanatics," failed because of the opposition of the liberal government of the day. Later the principle of autonomy prevailed at Jewish community congresses, owing to the influence of the Zionists, especially Rabbi J. [Jacob] Nacht and J. Niemirower. Protests were lodged against the interference of the local authorities (mayors, chief commissioners of police, etc.) as well as against the oath *more judaico*. The principle of autonomy finally triumphed, owing to the young Zionists who penetrated the local communities, especially in the country.

The Struggle for Naturalization

Following World War I Romania enlarged her territory with the provinces of Bukovina, Bessarabia, and Transylvania. In each of these the Jews were already citizens, either of long standing like those who had lived in the Austro-Hungarian Empire, or more recent like those from Bessarabia who achieved equality only in 1917. Indeed, the naturalization of the Jews of Romania was under way in accordance with the separate peace treaty concluded with Germany in the spring of 1918. In August 1918 the Romanian parliament passed an act concerning naturalization with many very complicated procedures, the latter being, moreover, sabotaged when they had to be applied by the local authorities. After the defeat of Germany, Prime Minister Ionel Bratianu realized that at the peace conference the naturalization of the Jews would be brought up again, so he tried to resolve the problem in good time by issuing a decree of naturalization on Dec. 28, 1918, proclaim-

ing individual naturalization on the lines adopted after the Congress of Berlin. The decision had to be made by the law courts instead of parliament, on the basis of certain certificates which were very difficult to obtain. Though threatened by the government the Jewish leaders rejected the law, and, following their warning, the Jewish population abstained from putting in applications to the court. Their demand was for citizenship to be granted en bloc by one procedure – after a declaration by every candidate at his municipality that he was born in the country and held no foreign citizenship, the municipality would have to make out the certificate of citizenship.

Although the Romanian government continued to assert that the Jewish problem was an internal one, of national sovereignty, when the delegation led by Ionel Bratianu appeared at the peace conference in Paris (May 1919) Georges Clemenceau reminded him that after the Congress of Berlin Romania had not implemented the provisions concerning the political rights of the Jews. This time the great powers decided to include guarantees in the peace treaty. A Jewish delegation from Romania, composed of UEP, Zionist and Jewish socialist representatives, arrived in Paris. They joined the Jewish delegations participating in the peace conference and claimed that the peace treaty should lay down the kind of obligatory laws concerning naturalization which Romania should pass. To prevent the conference's imposition of naturalization of Jews, Ionel Bratianu wired to Bucharest the text of a law (promulgated as a decree on May 22, 1919), according to which citizenship could now be obtained by a declaration of intent in writing to the law court, the latter being obliged to make out a certificate of confirmation which conferred the exercise of political rights. Those who did not possess foreign citizenship, those who satisfied the requirements of the enlistment law, and those who had served in the war were declared citizens, together with their families.

The peace conference did not, however, fail to include in the treaty the obligation of Romania to legislate the political emancipation of the Jews, which no other measure should abrogate. Bratianu resigned in protest, and only after an ultimatum sent by the peace conference did the new Romanian government led by Alexandru Vaida-Voevod sign the peace treaty. In Bukovina 40,000 Jews were threatened with remaining stateless, on the pretext of their being refugees who had only recently entered the country. A professor of the faculty of law at Jassy published a study in 1921 asserting that this naturalization was anti-constitutional. In 1923 there began a new struggle for the enactment of naturalization in the new constitution. Adolphe Stern, the president of the UEP, was elected as a deputy to parliament and had to fight the law proposed by the Bratianu government which in effect canceled most of the naturalizations already acquired. After hard bargaining, not without renewed threats on the part of the government, the naturalization of the Jews was introduced into the constitution on March 29, 1923, thus also confirming the naturalization of those from the newly annexed territories who would otherwise have been threatened with expulsion. Nevertheless there

was a great difference between the laws and the way in which they were implemented. In a regulation published two months after the passing of the constitution, many procedural restrictions on the Jews living in the new provinces were introduced. In practice, the civil service, the magistracy, university chairs, and officers' corps remained closed to Jews. UEP became the Union of Romanian Jews (Uniunea Evreilor Români – UER) and Wilhelm *Filderman became its president.

Increasing Antisemitism

Growing social and political tensions in Romania in the 1920s and 1930s led to a constant increase in antisemitism and in the violence which accompanied it. Antisemitic excesses and demonstrations expressed both popular and student antisemitism and cruelty; they also served to divert social unrest to the Jews and show Western public opinion that intervention on their behalf was bound to miscarry. In December 1922 Christian students at the four universities proclaimed *numerus clausus* as their program; riots followed at the universities and against the Jewish population. As was later revealed in parliament, the student movements were organized and financed by the Ministry of the Interior. The leader of the student movements was Corneliu Zelea Codreanu, the secretary of the League of National Christian Defense which was headed by A.C. Cuza. The students formed terrorist groups on the Fascist model and committed several murders. In 1926 the Jewish student Falic was murdered at Chernovtsy. The assassin was acquitted. In 1927 Codreanu broke away from A.C. Cuza and founded the Archangel Michael League, which in 1929 became the Iron Guard, a paramilitary organization with an extreme antisemitic program.

On Dec. 9, 1927, the students of Codreanu's League carried out a pogrom in Oradea Mare (Transylvania), where they were holding a congress, for which they received a subsidy from the Ministry of the Interior: they were conveyed there in special trains put at their disposal free of charge by the government. Five synagogues were wrecked and the Torah scrolls burned in the public squares. After that the riots spread all over the country: in Cluj eight prayer houses were plundered, and on their way home the participants in the congress continued their excesses against the Jews in the cities of Huedin, Targu-Ocna, and Jassy. At the end of 1933 the liberal prime minister I.G. Duca, one of the opponents of King Carol's dictatorial tendencies, dissolved the Iron Guard and after three weeks was assassinated by its men. The guard was reformed under the slogan, "Everything for the Country." Codreanu's ties with the Nazis in Germany dated from that time. Carol II later aided other political bodies with an antisemitic program in an attempt to curb the Iron Guard. From 1935 Al. Vaida-Voievod led the Romanian Front, and made use in his speeches of such slogans as the blood libel, the parasitism of the Jews, their defrauding the country, their international solidarity, and the Judaization of the press and national literature.

After Hitler came to power in Germany (1933), the large Romanian parties also adopted antisemitic programs. In 1935

the new National Christian Party announced that its program included "the Romanization of the staff of firms and the protection of national labor through preference for [our] ethnic element" – that is to say, the removal of Jews from private firms. Gheorghe Bratianu, leading a dissident liberal party, demanded "nationalization of the cities, proportional representation in public and private posts, in schools and universities, and revocation of Jewish citizenship." In July 1934 the "Law for Employment of Romanian Workers in [Private] Firms" was enacted, and in fact established a *numerus clausus*. The Ministry of Industry and Trade sent all firms special questionnaires which included a clause on "ethnic origin." In 1935 the board of Christian Lawyers' Association, founded that year by members of the bar from Ilfov (Bucharest) gave an impetus to antisemitic professional associations. The movement spread all over the country. Its program was the *numerus nullus*, i.e., revoking the licenses of Jewish lawyers who were already members of the bar and not accepting new registrations. At the universities students of the Iron Guard forcibly prevented their Jewish colleagues from attending lectures and the academic authorities supported the *numerus clausus* program, introducing entrance examinations; in 1935–36 this led to a perceptible decrease in the number of Jewish students, in certain faculties reaching the *numerus nullus*. In other professional corporations no Jews were elected to the board; they were prevented by force from participating in the elections. The great Romanian banks began to reject requests for credits from Jewish banks as well as from Jewish industrial and commercial firms, and the Jewish enterprises were burdened by heavy taxes, imposed with the aim of ruining them. Jewish firms were not granted import quotas for raw materials and goods. Meanwhile Germany financed a series of publications and newspapers aimed at fastening an alliance between the two countries and removing Jews from all branches of the professions and the economy. Many a Jewish merchant and industrialist was compelled to sell his firm at a loss when it became unprofitable under these oppressive measures.

Jewish Political Life

Despite the attempts of the older assimilationist and established Jewish groups, the inclination of Romanian Jewry – thanks largely to the trends among Jews of the newly annexed provinces and to the impact of Zionism – was toward a clear-cut Jewish stance in politics. In 1919 the Union of Romanian Jews, led by W. Filderman, recommended that the Jews vote for those Romanian parties which would be favorable to them. As none of the parties formulated an attitude toward the Jewish problem, the Union decided that the Jews should withhold their votes. In the 1920 elections the Union joined the Zionists to form a list which conducted its election campaign under the symbol of the *menorah*. As the elections were rigged, not a single candidate succeeded in entering parliament. The Union managed to send Adolphe Stern to parliament in 1922 through joining with the Peasants' Party. From 1923 the Zionists pressed for a policy of a national minority

APEL CĂTRE ROMANI

FRATI CREȘTINI,

Marele român și patriot profesorul universitar **A. C. CUZA** a acceptat să candideze pentru locul de deputat de Roman. Cinstea, ce i se face acestuia județ atât de horospiț și atât de slab reprezentat în stăruț lării, este mai presus de orice. De acum, vom avea în parlament omul care pe lângă pășările și nevoile județului, va spune în parlamentul României interesele, dărerile și nevoile întregii noastre țări.

Ca minte lui luminașă, ca talentul lui oratoric, ca simțul omului politic și cu dorința de apărare a românismului, glasul lui va răsună puternic și demn, (cauză de la un copil, la alături al țării) trezind conștiința națională atât de adormită în parlamentul, unde zilnic se aude urletul zărilor al jidărilor Rosenbergs, Pastiner, Siraucher, Mayer Ebner, Nimerowier, Zipslein etc. etc. (compatrioții fostului dictator al Rusiei „Loiba Trotschki”).

Profesorul **A. C. CUZA** de 40 de ani stă neclintit, cu o silă de gram în mijlocul oceanului bălăz marea de fărâși, fără a-l putea mișca ceva sau cineva. Este omul dintr-o bucată, care s-a sacrificat pentru neamul românesc, disprețuind lucruri de arginți ai țării sau mărțire ce i se cereau, punând patria mai presus de ori și ce. În orice ocazii și ori când a ordănt, a demonstrat, a preoduzat pe icăvial cel mare ce amenință însă și existența neamului românesc... „Jidani”.

Prevederile lui din nenorocire s-au realizat. Jidăni cu ajutorul politicianilor din diferite țări au pus stăpânire pe țara ceia ce este românească, adăncit țara în halul de mizerie și jidănie în care se găsește.

Astăzi aflând de dăruța sa candidatură și pentru a fi pe placul jidănilor, partidele, liberalii (deși rețraș din parlament) și național-țărănescii au pus căte 4 candidaturi, făcând tot ceia ce le oa fi posibil, pentru ca d-l **A. C. CUZA** să nu poată pătrunde în parlament.

Frati Români! Neamul românesc, a suferit fel de fel de nădări dușmane, și le-a înfruntat, dar nici un popor n-a fost mai neclintit, mai tăcșos, mai neomenos, mai periculos ca jidanii. Acesta caulă 85 distragă (nu cu armele) cu ajutorul aurului lui ce are o nație mai scump, mai bun: religie, familie, obștețari, onoare, suferințe de patrie, introducând ura, țălcăria, dușmănia, seghăzarea, anarhia, comunistă („Vezi Rusia”).

Iată ce ne așteaptă mergând cu partidele, cari au făcut cărdășie cu ei. Români treziți-vă până nu e târziu! Meditați-vă oădă de pu ochi. Dacă țineți cu adărețul în această țară unde n-ajă născut și crescut, pământul cu sângele a milioane de înaintași, dacă vă mai sunt dragi ce adărețul copilăgi voștri și dacă vreți să se mai încheie istoria lui Creștin, atunci (fii) alături de oăcel ce vă orăță pericolul și scăpăreața țării cu țigăni sădă drăgășii ridicat de marile apăsări al românismului, de patrioțal **A. C. CUZA** cu deviza „România Românilor”.

Alexandru I. Cuza n-oa scăpat țara de robie și bici, Alex. C. Cuza n-oa scăpa țara de robia jidănoască.

În ziua de 4 MAI 1930 puneți stămpila pe lista No. 1 cu semnul — (drum drept) ca și gândurile noastre drepte, pentru a-i trimite pe D-l **A. C. CUZA** în parlament LA DATORIE.

L. A. N. C. Jud. Roman

status for the Jews. Their proposal was not accepted by the Union.

In 1926 the first National Jewish deputies and senators were elected from Bukovina, Transylvania, and Bessarabia. As a consequence of these successes the National Jewish Club, in which representatives of the Zionist parties also participated, was founded in Bucharest. Such clubs were established in all the cities of the Old Kingdom. In 1928 four National Jewish deputies were returned to parliament (two from Transylvania, one from Bukovina, and one from Bessarabia). They formed a Jewish parliamentary club. In 1930 the Jewish Party (Partidul Evreesc) was established in the Old Kingdom and on May 4, 1931, it held its general congress. Adolphe Stern joined this party. In the elections to parliament, a month later, the Jewish Party gained five seats, and in the 1932 elections it again obtained five. The situation of the Jewish parliamentarians was far from easy, because they were not only interrupted during their speeches but were often physically attacked by the deputies of the antisemitic parties. After 1933 there were no more Jewish members of parliament, except for J. Niemirower, who in his capacity of chief rabbi was officially a senator.

In 1913, the Ashkenazi Jewish community of Bucharest was founded as a modern association open to all the Ashkenazi Jews in the capital. Similar communities were founded in other towns of the Old Kingdom. In 1921 the Union of the Jewish Communities of the Old Kingdom was founded. Yet the undefined legal status of the Jewish communities in Romania tempted local authorities to meddle more and more in their affairs. A rabbi from Bucharest, Hayyim Schor, proclaimed himself chief rabbi. He demanded recognition of a separate Orthodox community everywhere in Romania, and was willing to be satisfied with the status of a private association for the Jewish community, thus abandoning the demand for its recognition as a public body. The Union and the Zionists opposed him. On May 19, 1921, the congress of Jews from the Old Kingdom met in Bucharest and elected Dr. Jacob Itzhak Niemirower as chief rabbi. In 1922 Jewish representatives demanded that two communities be recognized: the Ashkenazi and the Sephardi (and for Transylvania an Orthodox community too, as was traditional there). Only in 1928 did parliament pass the Law of Religions applying the provisions of the constitution, which recognized Judaism as one of the eight historical religions and the community as a juridical person in public law. On the basis of this law all the property of the religious institutions was transferred to the ownership of the communities. In January 1929 the minister of religions limited the application of this law, instructing that communities become juridical persons only after the approval of their statutes by the ministry; he also permitted communities of “diverse rites,” and not only the Ashkenazi or Sephardi, and in Transylvania the Orthodox type, thus accepting the program of Rabbi Schor. Mayors and police commissioners thought that this gave them a legal cover to dissolve the elected boards of the communities and to appoint others to their liking, although the Ministry of Religions issued a circular prohibiting interference by local authorities. Only in 1932 did the communities gain general recognition as juridical persons in public law. In 1936, the unions of Jewish communities from all the provinces of Romania (also the Orthodox and Sephardi unions of communities) founded a representative organization for all the Jews of Romania: the Federation of the Unions of Jewish Communities of Greater Romania.

The certificates of Jewish schools were not recognized and their pupils had to pass state examinations, paying a fee (which was a charge on community budgets as they covered this fee for the poor) until 1925, when the certificates of Jewish schools were recognized if the language of tuition was Romanian. (Although Romania had signed the Minorities Treaty in Paris, it had never implemented it.) All Jewish schools were maintained by the communities; in Bessarabia, Tarbut maintained Hebrew schools. The Ministry of Education contributed only a token subvention. The Jews of annexed Transylvania used the Hungarian language in the Zionist press, even under Romanian rule, those of Bukovina German, while in Bessarabia the language of the Jewish press was Yiddish. Each province kept its traditions, autonomous structure, and cultural

life, within the framework of the all-Romanian Federation of Jewish Communities. Culturally, the deeply rooted Jewish life of Bessarabia, with its Hebrew teachers, writers, and journalists, had a great influence, especially in the Old Kingdom.

In 1924 there were 796,056 Jews in enlarged Romania (5% of the total population): 230,000 in the Old Kingdom, 238,000 in Bessarabia, 128,056 in Bukovina, and 200,000 in Transylvania. In 1930 their number was 756,930 (4.2% of the total population): 263,192 in the Old Kingdom, 206,958 in Bessarabia, 92,988 in Bukovina, and 193,000 in Transylvania.

Social Structure

The Jewish population of Old Romania was for the most part an urban one. According to the 1899 census, 79.73% of the Jews lived in cities, forming 32.10% of the whole urban population of the country. Only 20.27% lived in villages, forming 1.1% of the whole rural population. This phenomenon was a result of the ban on Jews dwelling in a rural area. In the Moldavia province, where the Jews were most heavily concentrated, they formed a majority in several towns. In Falticeni they were 57% of the total population; in Dorohoi, 53.6%; in Botosani, 51.8%; in Jassy, 50.8%. In several smaller towns of that region their proportion was greater: in Gertsa, 66.2%; in Mihaileni, 65.6%; in Harlau, 59.6%; in Panciu, 52.4%. The Romanian population was 84.06% farmers, the Jews constituting the middle class. According to 1904 statistics, 21.1% of the total number of merchants were Jews, but in some cities of Moldavia they were a definite majority, such as in Jassy, 75.3%; Botosani, 75.2%; Dorohoi, 72.9%; Tecuci, 65.9%, etc. Jews represented 20.07% of all artisans, and in several branches they were a majority: 81.3% of engravers, 76% of tinsmiths; 75.9% of watchmakers; 74.6% of bookbinders; 64.9% of hatmakers; 64.3% of upholsterers, etc. Industry was not advanced in Romania before World War I. There were 625 industrial firms altogether, 19.5% of them owned by Jews. Jews were 5.3% of the officials and workers in these industrial enterprises. In several branches of industry there were Jewish factory owners: 52.8% of the glass industry; 32.4% of the wood and furniture industry; 32.4% of the clothing industry; 26.5% of the textile industry. Of the liberal professions only medicine was permitted to Jews. They constituted 38% of the total number of doctors. The occupational distribution of the Jews was as follows; agriculture, 2.5%; industry and crafts, 42.5%; trade and banking, 37.9%; liberal professions, 3.2%; various occupations, 13.7%.

There are no detailed statistics of the period between the two world wars. The provinces of Bessarabia, Transylvania, and Bukovina were annexed to Old Romania, increasing the Jewish population threefold. In every province their occupational structure was different as the result of historical development. In the two annexed provinces, Transylvania and Bukovina, the Jews had enjoyed civil rights from the days of the Austro-Hungarian Empire, and were also represented in the liberal professions. On the other hand, their situation in Bessarabia in czarist times was worse than in Old Romania – a fact which also influenced their occupational structure. The

few known figures refer to Greater Romania, with all the annexed territories. The only census taken in Bessarabia was in 1930, and according to those figures the occupational distribution of the Jewish population was as follows: industry and crafts, 24.8%; trade and banking, 51.5%; liberal professions, 2.9%; miscellaneous, 8.2%. It should be noted that Jewish bankers (such as the bank of “Marmorosh-Blank”) invested money in the developing industry of Greater Romania. Some industrial enterprises, comprising several factories such as the sugar, metal, and textile works, etc., were owned by Jews. In the late 1930s, under the influence of Nazi Germany in Romania, the whole occupational structure of the Jews collapsed because of persecution on the economic level, which preceded political persecution and murder.

Cultural Life

Since most Romanian Jews were of Polish or Russian extraction, their religious and cultural traditions were similar to those of the Jews of Eastern Europe. Their rabbis and teachers, as well as their religious trends came from there. The spoken language of the Ashkenazi Jewish population was Yiddish; Judeo-Spanish was used by Sephardi Jews; Romanian became more widely used among them only in the second half of the 19th century, at the time when the first Romanian universities were established (Jassy in 1860 and Bucharest in 1864). In that period, too, the development of modern Romanian literature began. In 1857 Julius Barasch published the first newspaper in Romanian and French – *Israelitul Român* – whose function was to fight for equal civil rights for Romanian Jewry. In 1854 another two newspapers – *Timpul (Di Tsayt)*; Bucharest) and *Gazeta Româno-Evreească (Jassy)* – appeared in Romanian and Yiddish, but all three papers ceased publication before the end of a year. Other such attempts met the same fate. Only in 1879 did the weekly *Fraternitatea* begin to appear, lasting until 1885, when it ceased publication upon the expulsion from Romania of its chief editors, Isaac Auerbach and Elias Schwarzfeld, for their stand against persecutions. This paper, which represented the assimilationist trend, was opposed to the incipient pre-Zionist movement which sponsored the establishment of the colonies of Zikhron Ya'akov and Rosh Pinnah in Erez Israel. Then two papers in Romanian also appeared, supporting *aliyah*: *Apărătorul*, which was published in Bucharest from 1881 to 1884 with A.S. Gold as editor, and the weekly *Stindardul*, which was published in Focsani from 1882 to 1883. The Yiddish paper *Ha-Yo'ez* which appeared in Bucharest from 1874 to 1896 also supported *aliyah*. Eleazar Rokeah, an emissary from Erez Israel, published as special organs of the pre-Zionist movement the Hebrew paper *Emek Yizre'el* in Jassy (1882), and the Yiddish *Di Hofnung* in Piatra-Neamt (1882), and *Der Emigrant* in Galati (1882). Of the Jewish press in Romania the weekly *Egalitatea*, edited by Moses Schwarzfeld, survived for half a century. The weekly *Curierul Israelit*, edited by M. Schweig, began to appear in 1906 and continued up to 1948, becoming the mouthpiece of the Uniunea Evreilor Români (Union of Romanian Jews) after World War I. In the

time of Herzl several Zionist papers appeared in Romania but did not last long. In 1913 the monthly *Hatikva* in Romanian was issued in Galati under the editorship of Leon Gold who gathered round him the outstanding Jewish authors in Romanian. Apart from original articles they also published translations of a high literary standard from modern Hebrew poetry and classical Yiddish literature. After World War I, from 1919 to 1923, there was published in Bucharest a daily newspaper in Romanian with a Zionist national tendency, *Mântuirea*, edited by A.L. Zissu, with Abraham Feller as chief editor. This paper stood for the idea of a Jewish political party and sharply attacked the tendencies of assimilationist circles. The weekly *Renasterea Noastră* (1923–42, 1944–48), edited by Samuel I. Stern, continued in this direction subsequently. The Zionist Federation published the weekly *Știri din Lumea Evrească*, edited by I. Ludo and later by Theoder Loewenstein. Between the two world wars the Zionist students' association published the monthly *Hasmonaea*. The number of Jewish journalists grew between the two wars, some of them even becoming chief editors of the great democratic papers. They included Constantin Graur, B. Branisteanu, Em. Fagure, G. Milian (Bucharest); A. Hefter (Jassy), and S. Schaferman-Pastoresu (Braila). After they had acquired a knowledge of Romanian, several Jewish scholars at the end of the 19th century became distinguished in the field of philology and folklore: Lazar Saineanu (Sainéan), compiler of the first practical dictionary of Romanian (1896); M. Gaster, who did research on early Romanian folklore; Hayman Tiktin, author of a scientific grammar of Romanian in two volumes (1893–94). This tradition continued down to later times. I.A. Candrea also compiled a Romanian dictionary (1931), as did J. Byk and Al. Graur after World War II. A number of these scholars also devoted time to research on the history of Romanian Jewry. The pioneer in this field was J. Psantir, whose two Yiddish volumes contained Hebrew headings: *Divrei ha-Yamim le-Arẓot Rumanye* (Jassy, 1871) and *Korot ha-Yehudim be-Rumanye* (Lemberg, 1877). A society for research into the history of Romanian Jewry was established in 1886 and named for Julius Barasch. Among its active members were J. Psantir, M. Gaster, Lazar Saineanu, Isaac David Bally, Elias Schwarzfeld, Moses Schwarzfeld, and others. In the three publications of their bulletin they published source material, memoirs, and bibliographical notes, as well as some combined research and monographs of Jewish communities. Although the society ceased activities after four years the scholars continued their researches. Part of their works appeared in the 19 volumes of the annual *Anuarul pentru Israeliți* and in the weekly *Egalitatea* published by M. Schwarzfeld. Frequently, the articles are apologetic or polemic, their authors being interested in demonstrating the length of the Jewish presence in Romania as an element justifying Emancipation. Between the two world wars Meir A. Halevy published several monographs on the history of the Jews of Romania. The Templul Coral (“Choir Synagogue”) then erected in Bucharest a museum, library, and archives for the history of Romanian Jewry. In some bulletins of these institutions and in the annual

Sinai (1926–32), edited by Meir A. Halevy, there also appeared researches on the history of Romanian Jewry.

The Jewish theater also developed in Romania. The first Judeo-Spanish play written by Moshe Kofinu was presented in Giurgiu and published in Bucharest in 1862. The Yiddish theater was founded in Jassy in 1876, by Avrum Goldfaden, writer, producer and actor.

Holocaust Period

German penetration into the Romanian economy increased as the Nazis moved eastward with the *Anschluss* of Austria (1938), the annexation of Czechoslovakia (1939), and the occupation of western Poland at the outbreak of World War II. A considerable number of Romanian politicians agreed to serve German interests in exchange for directorships in German-Romanian enterprises, and German trade agreements with Romania always demanded the removal of Jews in the branch involved. In this way, Jews were expelled from wood commerce and industry.

In the summer of 1940 Romania succumbed to German and Soviet pressure (after the Molotov-Ribbentrop treaty) and transferred Bessarabia and part of Bukovina to the Soviet Union. Following the Hitler-Mussolini agreement, in September 1940 northern Transylvania was transferred to Hungary, and southern Dobrudja to Bulgaria. On June 30, 1940, 52 Jews were murdered in Dorohoi by a retreating Romanian regiment. Hoping to ensure its borders after the concessions, Romania, which had not been invaded by the German army, became a satellite of Nazi Germany. The first result of this move was the cancellation of Romanian citizenship for Jews, a measure taken by the government, which included members of the Iron Guard, under German pressure in August 1940. On September 6, when King Carol abdicated, Ion Antonescu, who had been minister of defense in the Goga government, came to power. His government included ministers from the ranks of the Iron Guard, and Romania was declared a National-Legionary State (the members of the Iron Guard styled themselves “legionnaires”). There followed a period of antisemitic terrorism that lasted for five months. It began with the confiscation of Jewish-owned shops, together with the posting of signs “Jewish shop” and picketing by the green-shirted “legionary police.” The reign of terror reached its height when Jewish industrial and commercial enterprises were handed over to the members of the “Legion” under pressure from the Iron Guard. The owners of the enterprises were arrested and tortured by the “legionary police” until they agreed to sign certificates of transfer. Bands of “legionnaires” entered Jewish homes and “confiscated” any sums of money they found. This resulted in a mortal blow to the Romanian economy and chaos that frightened even the German diplomats. Antonescu tried on several occasions to arrest the wave of terrorism, during which a number of Romanian statesmen opposed to the Iron Guard were killed.

On Jan. 21, 1941, the Iron Guard revolted against Antonescu and attempted to seize power and carry out its antisem-

mitic program in full. While part of the “Legion” was fighting the Romanian army for control of government offices and strategic points in the city, the rest carried out a pogrom on Bucharest Jews, aided by local hooligans. Jewish homes were looted, shops burned, and many synagogues desecrated, including two that were razed to the ground (the Great Sephardi Synagogue and the old *bet ha-midrash*). Some of the leaders of the Bucharest community were imprisoned in the community council building, worshipers were ejected from synagogues, the Palestine Office of the Zionist Organization was attacked and its director murdered, and wealthy Bucharest Jews were arrested, according to a previously prepared list. Those arrested were taken to centers of the Iron Guard movement: some were then taken into the forests near Bucharest and shot; others were murdered and their bodies hung on meat hooks in the municipal slaughterhouse, bearing the legend “kosher meat.” The pogrom claimed at least 125 Jewish lives. There were no acts of violence in the provinces because the army was in firm control and fully supported Antonescu. This was also Hitler’s reason for supporting Antonescu. Romania held an important role in the war contemplated against the Soviet

Union, not only as a supply and jumping-off base, but as an active partner in the war.

A period of relative calm followed the Bucharest pogrom and permitted Romanian Jews to gather strength after the shock of the violence. Antonescu, however, was thereafter under constant German pressure, for when their revolt failed, members of the Iron Guard found refuge in Germany, where they constituted a permanent threat to his position, as he now lacked his own party to serve as a counterbalance. In January 1941 Manfred von Killinger, a veteran Nazi known for his antisemitic activities, was appointed German ambassador to Romania. In April he was joined by Gustav Richter, an adviser on Jewish affairs who was attached to Adolf Eichmann’s department. Richter’s special task was to bring Romanian anti-Jewish legislation into line with its counterpart in Germany.

During the War

On June 22, 1941, when war broke out with the Soviet Union, the Romanian and German armies were scattered along the banks of the Prut River in order to penetrate into Bukovina and Bessarabia. Romania, under the government of Marshal

Antonescu, was an ally of Germany and fought with the Nazi army in the war against the Soviet Union. The declared purpose of Romania's involvement in the war was to retrieve the Romanian territories (Bukovina and Bessarabia). One week after the war started, on June 29 and 30, 1941, the large Jewish community in Jassy was shattered by a pogrom unprecedented in all of Europe. Over 14,000 Jews lost their lives during the massacres in the city, massacres initiated and supervised by the army and the local police. In addition, many perished in the subhuman conditions of the death trains that transported Jews who had been arrested.

The Jewish population of Bessarabia (approximately 200,000) and Bukovina (93,000) was considered hostile, foreign, and destined for "elimination" in the program of "cleansing the land" conceived by Antonescu. This intensely antisemitic propaganda campaign, conducted on all levels of the state hierarchy and especially in the army, portrayed this population – and, by extension, all Jews – as the embodiment of the "Bolshevik danger." The Jews in the reacquired territories were held responsible for mistreating, humiliating, and even killing many Romanian soldiers during the retreat in the summer of 1940.

A completely different fate, though no better, befell the Jews in Transylvania (approximately 200,000, including those in Banat). In northern Transylvania, under Hungarian rule, the Jews shared the fate of Hungary's Jews during the war, most of them being deported and exterminated at Auschwitz. Of the 200,000 Transylvanian Jews, 160,000 (mostly Orthodox) were in the northern part. Until close to the end of the war, the fate of the Jews in southern Transylvania, which was still part of Romania, was similar to that in the other Romanian regions – Moldavia and Wallachia, known as the Regat.

The armies' combined advance through Bessarabia, Bukovina, and the Dorohoi district was accompanied by massacres of the local Jewish population. At the beginning of August 1941 the Romanians began to send deportees from Bukovina and Bessarabia over the Dniester River into a German-occupied area of the U.S.S.R. (later to be known as Transnistria). The Germans refused to accept the deportees, shooting some and returning the rest. Some of these Jews drowned in the river and others were shot by the Romanian gendarmerie on the western bank; of the 25,000 persons who crossed the Dniester near Sampol, only 16,500 were returned by the Germans. Some of these survivors were killed by the Romanians, and some died of weakness and starvation on the way to camps in Bukovina and Bessarabia. Half of the 320,000 Jews living in Bessarabia, Bukovina, and the Dorohoi district (which was in Old Romania) were murdered during the first few months of Romania's involvement in the war, i.e., up to Sept. 1, 1941.

After this period the Jews were concentrated in ghettos (if they lived in cities), in special camps (if they lived in the countryside, or townlets such as Secureni, Yedintsy, Vertyuzhani, etc.). German killing squads or Romanian gendarmes, copying the Germans, habitually entered the ghettos and

camps, removing Jews and murdering them. Jews living in villages and townlets in Old Romania (Moldavia, Wallachia, and southern Transylvania) were concentrated into the nearest large town. The Jews of northern Moldavia, which bordered on the battle area, were sent to the west of Romania: men under 60 were sent to the Targu-Jiu camp and the women, children, and aged were sent to towns where the local Jewish population was ordered to care for the deportees (who owned nothing more than the clothing on their backs). The homes and property of these deportees were looted by the local population immediately after they were deported.

On Sept. 16, 1941, those in camps in Bessarabia began to be deported to the region between the Dniester and the Bug rivers called Transnistria, from which the Germans had withdrawn, handing control over to the Romanians under the Tighina agreement (Aug. 30, 1941). The deportations included 118,847 Jews from Bessarabia, Bukovina, and the Dorohoi district. At the intervention of the Union of Jewish Communities in Romania, an order was given to stop the deportations on October 14; they continued however until November 15, leaving all the Jews of Bessarabia and Bukovina (with the exception of 20,000 from Chernovtsy) and 2,316 of the 14,847 Jews from the Dorohoi district concentrated in Transnistria. In two months of deportations 22,000 Jews died: some because they could walk no further, some from disease, but the majority were murdered by the gendarmerie that accompanied them on their journey. All money and valuables were confiscated by representatives of the Romanian National Bank. The Jews then remaining in Old Romania and in southern Transylvania were compelled into forced labor and were subjected to various special taxes. The prohibition against Jews working in certain professions and the "Rumanization of the economy" continued and caused the worsening of the economic situation of the Jewish population.

According to the statistical table on the potential victims of the "Final Solution" introduced at the Wannsee Conference, 342,000 Romanian Jews were destined for this end. The German embassy in Bucharest conducted an intensive propaganda campaign through its journal, *Bukarester Tageblatt*, which announced "an overall European solution to the Jewish problem" and the deportation of Jews from Romania. On July 22, 1942, Richter obtained Vice Premier Mihai Antonescu's agreement to begin the deportation of Jews to the Belzec extermination camp in September. From November 1942, however, it was obvious that the Romanian authorities were delaying this plan. Eventually they abandoned it entirely, owing to pressure both from Allied forces and the Romanian opposition, which was summoned especially by W. *Filderman, the most respected leader of the Romanian Jews. Pressure was also exerted by diplomats from neutral countries, as well as by the papal nuncio, Andreas Cassulo. Nevertheless, Eichmann's Bucharest office, working through the local authorities, succeeded in contriving the deportation of 7,000 Jews from Chernovtsy and Dorohoi and groups from other parts of Romania to Transnistria because they were "suspected of Communism" (they were of

Bessarabian origin and had asked to return to the Soviet Union in 1940), had “broken forced-labor laws,” etc.

At the beginning of December 1942 the Romanian government informed the Jewish leadership of a change in its policy toward Jews. Defeat at Stalingrad (where the Romanians had lost 18 divisions) was already anticipated. In 1942–43 the Romanian government began tentatively to consider signing a separate peace treaty with the Allies. Although a plan for large-scale emigration failed because of German opposition and lack of facilities, both small and large boats left Romania carrying “illegal” immigrants to Palestine, some of whom were refugees from Bukovina, Poland, Hungary, and Slovakia. Between 1939 and August 1944 (when Romania withdrew from the war) 13 boats left Romania, carrying 13,000 refugees, and even this limited activity was about to cease, as a result of German pressure exerted through diplomatic missions in Romania, Bulgaria, and Turkey. Two of the boats sank: the *Struma* (on Feb. 23, 1944 with 769 passengers) and the *Mefkure* (on Aug. 5, 1944 with 394 passengers).

Despite German efforts, the Romanian government refused to deport its Jews to the “east.” At the beginning of 1943, however, there was a return to the traditional economic pressures against the Jews in order to reduce the Jewish population. This was achieved by forbidding Jews to work in the civilian economy and through the most severe measure of all, forced labor (from which the wealthy managed to obtain an exemption by paying a considerable sum). In addition, various taxes were imposed on the Jewish population in the form of cash, clothing, shoes, or hospital equipment. These measures, particularly the taxes to be remitted in cash – of which the largest was a levy of 4 billion lei (about \$27,000,000) imposed in March 1943 – severely pressed Romanian Jewry. The tax collection was made by the “Jewish Center.” W. Filderman, chairman of the Council of the Union of Jewish Communities, who opposed the tax and proved that it could never be paid, was deported to Transnistria for two months.

At the end of 1943, as the Red Army drew nearer to Romania, the local Jewish leadership succeeded in obtaining the gradual return of those deported to Transnistria. The Germans tried several times to stop the return and even succeeded in bringing about the arrest of the leadership of the clandestine Zionist pioneering movements in January and February 1944; however, these leaders were released through the intervention of the International Red Cross and the Swiss ambassador in Bucharest, who contended that they were indispensable for organizing the emigration of those returning from Transnistria and refugees who had found temporary shelter in Romania. In March 1944 contacts were made in Ankara between Ira Hirschmann, representative of the U.S. War Refugee Board, and the Romanian ambassador, A. Cretzianu, at which Hirschmann demanded the return of all those deported to Transnistria and the cessation of the persecution of Jews. At the time, the Red Army was defeating the Germans in Transnistria, and there was a danger that the retreating Germans might slaughter the remaining Jews. Salvation came at

the last moment, when Antonescu warned the Germans to avoid killing Jews while retreating. Concurrently, negotiations over Romania’s withdrawal from the war were being held in Cairo and Stockholm, and thus Antonescu was eager to show goodwill toward the Jews for the sake of his own future. In the spring Soviet forces also conquered part of Old Romania (Moldavia), and they made an all-out attack on August 20. On August 23 King Michael arrested Antonescu and his chief ministers and declared a cease-fire. The Germans could no longer control Romania, for they were dependent on the support of the Romanian army, which had been withdrawn. Eichmann, who had been sent to western Romania to organize the liquidation of Jews in the region, did not reach Romania.

The question of the number of Romanian Jews and of those in the territories under Romania’s control who were murdered during the Holocaust is a complex issue, requiring more research. An International Commission on the Holocaust in Romania concluded in 2004 that between 280,000 and 380,000 Romanian and Ukrainian Jews were murdered or died during the Holocaust in Romania and the territories under its control. The Israeli historian Jean Ancel, author of essential studies on the topic, disagreed with this evaluation, and based on his extensive research, estimated that the number is considerably higher, at least 420,000 Jewish victims. These statistics of the Report include more than 45,000 Jews – probably closer to 60,000 – who were killed in Bessarabia and Bukovina by Romanian and German troops in 1941. At least 105,000 – other findings state as many as 120,000 – of the deported Romanian Jews died as a result of the expulsions to Transnistria. At least 130,000 indigenous Jews – or according to other statistics as many as 180,000 – were liquidated in Transnistria (especially in Odessa and the districts of Golta and Berezovka). Sometimes Romanian officials worked with German help, but more often they required no outside guidance. Nazi Germany was also responsible for killing Romanian Jews in Bessarabia, Bukovina, and mass killings in Ukraine and later in Transnistria. The Romanian authorities were accomplices in varying degrees to these murders. The documents do record numerous instances of Romanians – both civilian and military – rescuing Jews. But these initiatives were isolated cases, and in the final analysis were exceptions to the general rule. Of the 150,000 Jews of Northern Transylvania, 135,000 were killed in Nazi concentration camps after being deported by the Hungarian gendarmerie; no Romanian authority was involved in this operation.

Jewish Resistance

PREPARATORY STEPS. As soon as Hitler assumed power in Germany (1933), Jewish leaders in Bucharest decided not to remain passive. In November the congress of the Jewish Party in Romania decided to join the anti-Nazi boycott movement, disregarding the protest raised by the Romanian press and antisemitic groups, but the Union of the Romanian Jews (UER) did not participate in the campaign. The necessity for a united political, as well as economic, struggle soon became obvious. On Jan. 29, 1936, the Central Council of Jews in Roma-

nia, composed of representatives of both Jewish trends – the UER and the Jewish Party – was established for “the defense of all Jewish rights and liberties against the organizations and newspapers that openly proclaimed the introduction of the racial regime.” At the end of the year the Council succeeded in averting a bill proposed in the parliament by the antisemitic circles suggesting that citizenship be revoked from the Jews. During the same period the Romanian government attempted to suppress the state subvention for Jewish religious needs, as well as the exemption from taxes accorded to Jewish community institutions. The Council could not obtain the maintenance of the subvention, and it was finally reduced to one-sixth of its allotment.

When Goga’s antisemitic government came to power, the Council began a struggle against it, gaining support and attention outside Romania. Filderman, president of the Council, left at once for Paris, where he mobilized the world Jewish organizations with headquarters in France and England and informed local political circles and the League of Nations of events in Romania. At the same time the Jews in Romania began an expanded economic boycott, refraining from commercial transactions, withdrawing their deposits from the banks, and delaying tax payments. The outcome was “large-scale paralysis of the economic life,” as the German minister of foreign affairs stated in his circular of March 9, 1938. Thus the dismissal of the Goga government after only 40 days was motivated not only by external pressure, but by the effects of the Jewish economic boycott.

THE UNION OF THE JEWISH COMMUNITIES. Following the downfall of the Goga government, King Carol’s royal dictatorship abolished all the political parties in Romania, including the Jewish Party and the Union of Romanian Jews. The single body of the Jews in Romania was the Union of the Jewish Communities, whose board was composed of the leaders of both Jewish currents. The Union assumed the task of fighting against the increasing number of anti-Jewish measures promulgated by the Romanian authorities under pressure from local antisemitic circles and the German government. In some cases its interventions were successful; for example, it achieved the nullification of the prohibition against collecting contributions to Zionist funds, and, as a result of its protests, the restrictions against the Jewish physicians and the Jewish industrial schools were abrogated. In the summer of 1940, after Romania ceded Bukovina and Bessarabia to the Soviet Union, the Romanian police tried to eject Jewish refugees from those two provinces. The Union’s board succeeded in moving the Ministry of the Interior to annul the measure. When the interdiction of ritual slaughter was decreed, the board obtained an authorization for ritual slaughtering of poultry. The cancellation of the prohibition against Jews peddling in certain cities was also achieved. When the antisemitic newspapers incited against the leaders of the Union, the police began to search their homes.

Ion Antonescu’s government, with the participation of

the Iron Guard, closed several synagogues (those with less than 400 worshipers in cities and 200 in villages) and transferred the property to Christian churches. The disposition was canceled after three days, however, as a result of an audience between the Union’s president, Filderman, and Antonescu; simultaneously the minister of religion, who ordered the measure, was forced to resign. These acts took place during the first period of the new regime, dominated by the Iron Guard, when trespasses were committed against the Jews daily. The Union’s board constantly informed Antonescu and the diverse ministries of these acts, pointing out their illegality and arbitrariness. The argument that constantly recurred in the memoranda presented by the Union’s board was that the confiscation of Jewish shops and industrial companies caused the disorganization of the country’s economic life. Antonescu used the information provided by the board to support his stand against the trespasses. The Iron Guard responded with a terror campaign against the Jewish leaders; some were arrested and tortured by the “legionary police,” others were murdered during the revolt against Antonescu.

The Zionist leadership negotiated with Antonescu about organizing the emigration of Romanian Jews (see Zionism in Romania). The minister of finance proposed that the emigration be financed by Romanian assets, which had been frozen in the United States, because Romania had joined the Axis. The transaction had to be accomplished through the American Jewish Joint Distribution Committee (JDC), whose representative in Romania was also the president of the Union. In every city the Jewish community had to register those who wanted to emigrate and were able to pay the amount demanded by the government. The Union’s board utilized this agreement as a leverage for achieving certain concessions, especially after Romania joined Germany in the war against the Soviet Union (June 1941). For example, when the evacuation of Jews from villages and towns began, the Union secured the government’s agreement not to send these Jews to concentration camps (as had previously been ordered), but rather to lodge them in the big cities, where they were to be cared for by the local Jewish communities. Another achievement (on Aug. 14, 1941) was the liberation of the rabbis, leaders of communities, and teachers employed in Jewish schools, who had been arrested after the outbreak of war with the U.S.S.R., from the Targu-Jiu concentration camp. The Union raised the argument that the plans concerning the release of the Romanian properties in the United States were dependent upon those local leaders. On Aug. 2, 1941, the board achieved the cancellation of the order that Jews wear the yellow badge and other measures, including the creation of ghettos in the cities and mobilizing women for forced labor, in which Jewish men were already engaged. Richter insisted on the reintroduction of repressive measures, and on September 3 the order to wear the yellow badge was re-endorsed. This time, in addition to intervention by the Union’s leaders, Chief Rabbi Alexander Safran appealed to the head of the Christian Orthodox Church, Patriarch Nicodem, and on September 8 Antonescu annulled the order. Nevertheless,

the yellow badge was maintained in a number of Moldavian cities, as well as in Chernovtsy (Cernauti), the capital of Bukovina, where the German influence was strong.

During this period, when Romania suffered great losses on the front and Germany called for an increase in Romanian participation, the Union's board employed the argument that Romania, being an ally of the Third Reich, and thus a sovereign state, did not have to accept anti-Jewish laws that were applied only to German satellite countries. Hungary and Italy, allies that did not apply such measures at that time, were presented as examples. It is known from von Killinger's reports that Antonescu raised these objections in his dealings with the Nazi government.

After Jews began to be deported from Bessarabia and Bukovina to Transnistria, the board delegated Chief Rabbi Safran to intervene with the queen mother, Patriarch Nicodem, and the archbishop of Bukovina and induce them to intercede with Antonescu to halt the deportations and permit aid to those who had already been transported over the Dniester. Until a decision could be achieved through their intervention, and against the opposition of von Killinger, the 17,000 Jews who remained in Chernovtsy were not deported. However, the steps taken, with permission to provide assistance to those who had already been deported to Transnistria were sabotaged by difficulties raised by lower authorities. The Union also endeavored to gain the support of the U.S. ambassador, who interceded with the Romanian government. Nevertheless, when the ambassadors of Brazil, Switzerland, and Portugal proposed to the U.S. ambassador the initiation of an international protest against the Romanian anti-Jewish excesses, the latter reported to Washington that he did not possess enough exact information. Later on, however, in another report (Nov. 4, 1941), he described in detail the massacres committed in Bessarabia and in Bukovina and the cruelties that were committed during the deportations to Transnistria. The description was based on the information received from the Union. (It was only at the end of 1941 that Romania broke off relations with the United States, under German pressure.) The antisemitic press – financed and inspired by the German embassy – including the German-language *Bukarester Tageblatt*, then intensified the incitement against the Jewish leaders and their constant interventions against anti-Jewish measures.

At the end of 1941 the Union of the Communities was dissolved under pressure from Richter, and the Centrala evreilor (Central Board of the Jews) was set up at his suggestion in January 1942. Its leaders were appointed by Radu Lecca, who was responsible for Jewish affairs in the Romanian government, but they were actually subordinate to Richter. Nearly all of the new leaders were unknown to the Jewish public, with the exception of A. Willman, who shortly before his appointment had published a number of pamphlets proposing a kind of neo-territorialist plan to be accomplished with the aid of Nazi Germany. From the outset, the Jewish population expressed its distrust of the new organ. The former leaders of the Jewish institutions formed a clandestine Jewish Council with Chief Rabbi Alexan-

der Safran as its president. The Council leaders handed memoranda personally to, or interceded individually with, Antonescu or his ministers, who went on to deal with them because the government did not trust the Central Board either.

In the spring of 1942 changes were made in the framework of the Central Board. Willman and some of his followers were removed and replaced by others appointed from among the leadership of the Zionist movement and the Union of the Romanian Jews (UER). Thus the Central Board was prevented from taking any harmful initiatives against the Jewish population. In the summer the Zionist Organization was dissolved at the request of the Germans, and this was a sign that the Germans disagreed with the Romanian policy, which aided Jewish emigration. In order to avoid the Nazi plan of deportation to Belzec, the queen mother was convinced by Safran to intercede with Ion Antonescu. Others were also requested to intercede on behalf of the Jews, such as the papal nuncio, Andreas Cassulo; the Swiss ambassador, René de Weck; and even Antonescu's personal physician. The nuncio's efforts were supported by the Swedish and Turkish ambassadors, and by the delegates of the International Red Cross. At the same time the Jewish Council achieved the annulment of the order to deport to Transnistria 12,000 Jews accused of having committed crimes or breaches of discipline.

THE STRUGGLE TO REPATRIATE DEPORTED JEWS. After overcoming the danger of deportation to the extermination camps in Poland, the Jewish leaders began to request the return of those who had survived the deportations to Transnistria. The dealings with the Romanian government began in November 1942 over the question of a ransom to be paid by Zionist groups outside Romania. Eichmann's unceasing interventions prevented a clear-cut decision until, on April 23, Antonescu – under German pressure – issued the order that not a single deportee should return. The Jewish leaders then initiated the struggle for a "step by step" resolution to the problem, asserting that a series of categories had been deported arbitrarily, without previous investigation. The Romanian government ordered a detailed registration of categories. At the beginning of 1943 an official commission was appointed to classify the deportees. In July Antonescu authorized the return of certain cases (aged persons, widows, World War I invalids, former officers of the Romanian army, etc.). Implementation of the order, however, encountered difficulties raised by the governor of Transnistria, who was under the influence of German advisers. Only at the beginning of December did the deportees begin to return, according to categories; yet it was a struggle against time, as meanwhile the front had reached Transnistria.

From the beginning of 1944 the clandestine Zionist Executive dealt separately with Antonescu on the question of emigration. Its efforts had an influence on the general situation, as the Romanian authorities made the return of the deportees conditional upon their immediate emigration.

THE COMMITTEE OF ASSISTANCE. Whole strata of Romanian Jewry were pauperized because of the anti-Jewish eco-

conomic measures. The former committee of the JDC continued its activity clandestinely under the control of the Union of the Jewish Communities and afterward of the Jewish Council. In October 1943 it was officially recognized within the framework of the "Jewish Central Board" as the Autonomous Committee of Assistance. Assistance was thus provided to the Jews evacuated from towns and villages who could not be maintained by the local communities. The most important accomplishment, however, was the aid in the form of money, medicines, utensils for craftsmen, coal, oil heaters, window glass, clothing, etc. transmitted to Transnistria. In order to cover the budget, money and clothing were collected in the regions not affected by deportations. These means, however, were far from adequate. Only owing to the important amounts acquired from the JDC, the Jewish Agency, and other world Jewish organizations was the Autonomous Committee of Assistance able to continue its activity.

In addition to all the official difficulties raised by the Romanian central authorities (the compulsory transfer of money through the National Bank at an unfavorable exchange rate, and the obligation of paying customs for the objects sent), the transports were frequently plundered on the way or confiscated by the local authorities in Transnistria. The assistance, however, was in itself an element of resistance. The mere fact that the deportees knew that they had not been abandoned, at least by their fellow Jews, contributed to the maintenance of their morale. The aid in its various forms saved thousands of lives. Through clandestine correspondence, carried by non-Jewish messengers, reports were received concerning the situation of the refugees. This means of providing information was insufficient, however, and the Autonomous Committee of Assistance therefore wanted to review the situation directly on the spot.

As early as January 1942 authorization was obtained from the Ministry of the Interior for a delegation of the committee to go to Transnistria; nevertheless, due to the opposition of the governor of Transnistria, the representatives could not get there until Dec. 31, 1942. The governor received them in audience at Odessa and tried to intimidate them by means of threat, telling them that their behavior would determine whether or not they would return to Romania. He gave them permission to visit only three of the camps in which deported Jews were concentrated. The delegates of the committee responded by requesting a regional conference with representatives of all the camps. During the railway journey to Mogilev, the delegates visited the Zhmerinka camp and received information about the surrounding camps. Upon their arrival at Mogilev (Jan. 8–9, 1943), a regional conference took place with the participation of about 70 delegates. Before the conference opened, the prefect and the commander of the gendarmes warned the delegates not to complain about their situation, adding the threat that complaints might endanger the further receipt of aid. However, the delegates clandestinely submitted a written report concerning the real situation to the representatives of the committee. From Mogilev the delegation left for

Balta, where it did not receive a license for a regional conference, but each delegate from the ghettos or camps of the area was authorized to report individually about the situation. Back in Bucharest, after this two-week tour in Transnistria, the delegates presented their report, which was also sent to Jewish organizations abroad.

In December 1943 representatives of the Autonomous Committee of Assistance again left for Transnistria to organize the return of the deportees, taking with them wagons of clothing. One group of representatives left for the north, to Mogilev and its surroundings; another for the south, to Tiraspol. The central administration of Transnistria did not display any goodwill, but the local authorities provided wagons for the transport. On Feb. 15, 1944, two delegations started out to aid the return of the orphans. On March 17, 1944, another two delegations set out for Transnistria, but they could not reach their destination as the area had already become a front area, the northern part occupied by the Red Army.

The delegates installed themselves in Tighina (Bessarabia), whence they made contact with Tiraspol on the eastern bank of the Dniester River and succeeded in saving almost all those concentrated there. The Germans still had the time to organize a last massacre, murdering 1,000 Jews who were in detention in the Tiraspol jail. When Transnistria and Bessarabia were reconquered by the Soviets, the deportees who followed the armies were the last to succeed in returning to Romania, for afterward, at the end of June 1944, the Soviets closed the frontier. It was reopened only in May 1945 for a last group of 7,000 deportees, after prolonged dealings in Bucharest between the Jewish leaders and General Vinogradov, the head of the Soviet armistice commission.

[Theodor Lavi / Lucian-Zeev Herscovici and Leon Volovici (2nd ed.)]

The Early Post-Holocaust Years

When Romania broke with Nazi Germany and entered the war on the side of the Allies (Aug. 23, 1944), Romanian Jewry had been considerably decreased as a result of the Holocaust and it was about to decrease even further through emigration. The struggle for Jewish independence in Palestine influenced Romanian Jews, and the goal of *aliyah*, which had been deep-seated in the community in the past, became a powerful force. The decisive factor in the life of Romanian Jews after World War II, however, was the political regime in Romania, which exercised its authority over the community life of Romanian Jewry, determined the structure of its organization, and limited its aspirations. Government control was prevalent during the first period – from Aug. 23, 1944, until the abolition of the monarchy (Dec. 30, 1947) – and even more so in succeeding periods, through all the internal changes that altered the regime in Romania.

The Communist Period

For a few years after the abolition of the monarchy, Romania closely followed the line dictated from Moscow. This situation continued until the end of the 1950s, when the first signs

of an independent Romanian policy began to appear. Until 1965 the pattern of this policy gradually solidified, and from then, with the personal changes after the death of the general secretary Gheorghe Gheorghiu-Dej, Romania entered with a more independent policy. All the changes in government and policy also left their on Jewish community life. The situation of Romanian Jewry always had a special character. Even in the days of complete dependence on Moscow, when the tools and institutions of national Jewish identity were destroyed and expression of Jewish aspirations was repressed, Romanian Jewry was not compelled to be as alienated from its national and religious identity as were the Jews of the Soviet Union. At the end of the 1960s the Jewish community in Romania found itself in an intermediate position. Its activities displayed indications of free community life as well as the limitations imposed by the government. Variations in the government's policy also reflected the connection between the status of Romanian Jewry and the official attitude of Romania toward Israel. This mutual influence was expressed in all the areas of Jewish life and especially through the central issue of the right to leave the country and settle in Israel.

POPULATION. The characterizing factor of the demography of Romanian Jewry during this period was the constant decrease in the community's size. The only source on the size of the Romanian Jewish community at the end of World War II is a registration (the results of which were published in 1947) that was carried out on the initiative of the World Jewish Congress. According to the registration, there were 428,312 Jews in Romania at the time. This number was the balance after the losses caused by the Holocaust, the annexation of Bessarabia and North Bukovina by the U.S.S.R., and the migration to Palestine during the war. The professional composition of the community at that time (1945) was as follows: 49,000 artisans, 35,000 employees, 34,000 merchants and industrialists, and 9,500 in the free professions. Ten years later the Jewish population had been reduced to about a third. According to the census taken on Feb. 21, 1956, there were 144,236 Jews in Romania, of whom 34,263 spoke Yiddish. But these figures are probably lower than the true numbers, as it is known that in the above-mentioned census members of minority groups were not allowed to identify freely with their national group. The drastic reduction in the size of the Romanian Jewish community was largely a result of mass emigration, especially during the years 1944–47. The means of emigration were dictated by the conditions of the war and its aftermath. At the end of the war thousands of Jews, terrified by the Holocaust, fled Romania through its western border, which was still open, and reached the West by their own means. In addition to this spontaneous migration, 14 refugee boats left Romanian ports carrying 24,000 "illegal" immigrants to Palestine. A portion of Romanian Jewry, including thousands who left Romania of their own volition immediately after the war, was also among those who boarded refugee boats to Palestine in other European ports. From the establishment of the State of Israel (1948)

until the end of the 1960s, over 200,000 Romanian Jews settled in the new state. In addition, it should be noted that not all the Jews who emigrated from Romania went to Israel; about 80,000 others were scattered throughout other countries. At the end of the 1960s the Romanian Jewish community numbered no more than 100,000.

THE LIQUIDATION OF JEWISH ORGANIZATIONS. On Aug. 23, 1944, when Romania joined the Allies, the Zionist movement came up from underground to operate legally and openly through all its currents and institutions. The same was true of the Jewish Party, which was reorganized as the representative body of Romanian Jewry and headed by the Zionist leader A.L. Zissu. In 1945 an extension of the Communist Party was established among the Jewish population under the name the Jewish Democratic Committee (*Comitetul Democrat Evreesc*). For about four years the Zionist movement maintained regular activities in the fields of organization, education, training farms, and Zionist funds, as well as through international ties. In 1948 there were 100,000 members in the movement and 4,000 in *He-Halutz*, with 95 branches and 12 training farms. The Zionist Organization in Romania participated in the world Zionist Congress in Basle in 1946. A general representation of Romanian Jewry (including delegates from the Jewish Democratic Committee) was present at the Montreux conference (1948) of the World Jewish Congress. These were the last regular contacts of Romanian Jewry with Jewish organizations abroad; afterward the ties were severed for an extended period.

The more the Communist Party strengthened its power, the more Zionist activity in Romania turned from "permitted" to "tolerated," until it was finally outlawed completely. The instrument of this process was the Jewish Democratic Committee, which never succeeded in striking roots among the Jewish population, in spite of the support it received from the authorities. The cue to abolish Zionist activities was given in the decision of the central committee of the Communist Party on June 10–11, 1948, in the midst of Israel's War of Independence. The decision stated that "the party must take a stand on every question concerning the Jews of Romania and fight vigorously against reactionary nationalist Jewish currents." As early as the summer of 1948 the liquidation of Zionist training farms was begun, and the process was completed in the spring of 1949. In November 1948 the activities of the Zionist funds were forbidden. On Nov. 29, 1948, a violent attack on the branch of the Zionist Organization in Bucharest was organized by the Jewish Communists. On Dec. 12, 1948, the party decision was again publicized, including a clear denunciation of Zionism, "which, in all its manifestations, is a reactionary nationalist movement of the Jewish bourgeoisie, supported by American imperialism, that attempts to isolate the masses of Jewish workers from the people among whom they live." This statement was published in the wake of a bitter press campaign against Zionism during November and December 1948.

The persecution of the Zionist movement was also expressed by the imprisonment of *sheliḥim* from Erez Israel. On Dec. 23, 1948, a general consultation of Zionists was held and resulted in the decision to dissolve “voluntarily” the Zionist organizations. Following this decision, the Zionist parties began to halt their activities, with the exception of Mapam, the youth movements, and He-Halutz. The World Jewish Congress also ceased to operate in Romania. Those organizations that did not close down at the time continued to operate formally until the spring of the following year. On March 3, 1949, however, the Ministry of Interior issued an order to liquidate all remnants of the Zionist movement, including youth movements and training farms. With this order the Jewish community in Romania was given over completely to the dominance of the government alone – at first by means of the Jewish Democratic Committee, until it too was gradually dissolved. In April 1949 the youth movement of the Jewish Democratic Committee was disbanded just as the Communist Party Youth (UTM) was organized, and the committee itself was disbanded in March 1953, together with all other national minorities’ organizations in Romania. In 1949–50 the activity of the American Jewish Joint Distribution Committee in Romania was discontinued by order of the government. The hostile attitude toward the Zionist movement was also expressed in Romania’s attitude toward Israel, which gradually hardened and led to the frequent imprisonment of previously active Zionists. The periods of time when emigration was ceased (April 1952 until 1956) were led by violent anti-Zionist campaigns. Zionist organizations were banned as of 1949. Yet the new Communist regime brought about a radical change: a significant number of Jews became prominent in the political and administrative hierarchy of the new regime, among them the long-time Communist militant Ana *Pauker.

There were ups and downs, however, especially in the area of propaganda, until the situation in general began to improve at the beginning of 1967.

COMMUNITY LIFE. With the liquidation of the Zionist Movement and the dissolution of the Jewish Democratic Committee, the religious communities (*kehillot*) were the only organized bodies left in Romanian Jewry. The legal foundations for their activities were laid down even before other Jewish frameworks were destroyed. In 1945 the “Regulations on Nationalities” were passed and declared the formal equality of members of all national minority groups before the law. Regulations of the activities of the recognized religions, including Judaism, were set down in the Aug. 4, 1948, order of the presidium of the Grand National Assembly (which also served as the presidency of the state). The regulations of the Federation of Communities of the Mosaic Religion, which were approved by the Assembly’s presidium on June 1, 1949, were based upon this order. Dr. Moshe Rosen became chief rabbi in 1948. He was instrumental in organizing massive Jewish emigration from Romania as well as in establishing a satisfactory community

life even within the Communist regime and the threat of fast diminution of Jewish communities.

The Federation’s scope of activity was limited to the area of religious worship alone. In the first years of the Communist regime and its complete dependence upon Moscow, Jewish Communists infiltrated into the Federation, but afterward their participation in Jewish religious bodies decreased, although it did not cease altogether. The Federation of Communities was responsible for maintaining synagogues and cemeteries and supplying religious objects, unleavened bread for Passover, kosher food, and the like. It was not authorized to deal in matters of Jewish education, however, although it did have the right (according to a decision of the department of religions on Nov. 13, 1948) to set up seminaries for training rabbis, and for a few years it maintained a yeshivah in Arad (Transylvania). According to the registration of 1960, there were 153 communities throughout Romania that maintained 841 synagogues and *battei midrash* (56 of which were no longer in use), 67 ritual baths, 86 slaughterhouses, and one factory for unleavened bread (in Cluj). From 1956 the Federation also published a tri-language biweekly (in Romanian, Yiddish, and Hebrew) entitled *Revista Cultului Mozaic din R.P.R.* (“Journal of (Romanian) Religious Jewry”). From 1964 the chief rabbi Rosen officiated as the chairman of the Federation and was also a member of the National Assembly. Thus the Federation became the general Jewish representative in the country.

EDUCATION. With the renewal of Jewish life after the war, Jewish education also began to operate again. In 1946 the total number of Jewish schools was 190 with 41,000 students. In 1948 five yeshivot, 50 *talmud torah* schools, 10 Bet Jacob schools, one elementary school of Tarbut, five dormitories for students, 14 dormitories for apprentices, the agricultural training institute (Cultura Agricola), three vocational schools in Bucharest, and three vocational schools in provincial cities (Huși, Sibiu, Radauti) were supported by the American Jewish Joint Distribution Committee. A substantial number of educational institutions were maintained by the various Jewish communities without outside support. The network of Jewish education was destroyed in the autumn of 1948, when all schools in Romania were nationalized. At that time a small number of schools in which the language of instruction was Yiddish were established (in Bucharest and in Jassy) and remained open until the 1960/61 school year. After the nationalization Jewish education remained in the hands of *melammedim*, whose activities were tolerated by the authorities. In 1960 there were 54 *talmud torah* schools, in addition to the yeshivah that was established in Arad in 1956. By the end of the 1960s the number of educational institutions had very considerably decreased.

CULTURE. At the beginning of the period under discussion, the language of Jewish writers and poets, including those who wrote about Jewish subjects, was Romanian. During the first

years after World War II the Jewish press was fairly large. The most important newspaper was *Mântuirea*, which began to reappear after Romania joined the Allies and continued to be published until the Zionist movement ceased to exist. In 1945 the press of the pro-Communist "Jewish Democratic Committee" began to appear, and its major newspaper was *Unirea*, in Bucharest, which lasted until 1953. As long as Zionist activity was permitted, the Zionist publishing house Bikkurim and the He-Halutz publishing house, as well as the Yavneh Company for the distribution of books on Jewish history and Hebrew literature, continued to operate. In Jewish contributions to Romanian literature, art, and music, the influence of the memories of the Jewish milieu was sometimes felt. The writers and poets A. Toma, Maria Banus, Veronica Porumbacu, Barbu Lazareanu, and others belonged to this group. Among the writers who wrote in Yiddish were Jacob Groper, Alfred Margul Sperber, and Ludovic Brukstein. The most outstanding Jewish artists were Josif Iser, M.H. Maxy, and Jules Perachim. Well-known Jewish musicians were Matei Socor, Alfred Mendelsohn, and Max Eisikovits. The only Jewish cultural institution was the Jewish theater in Bucharest. It was established as a state institution in 1948. The Jewish theater in Jassy, which was established at the same time, closed down in 1968. During the 20 years of its existence, the theater produced 107 plays including works by A. Goldfaden, Shalom Aleichem, Yiddish playwrights, and others. In 1968 the Bucharest Jewish theater performed on tour in Israel.

Israel-Romania Relations to the End of the 1960s

In September 1948 the first Israel representative to Romania, the painter Reuven Rubin, arrived in Bucharest, but neither he nor his successors succeeded in substantially developing the relations between the two countries for a number of years. Until 1965 the relations were regular but cool, especially because of the attitude of the Soviet Union toward Israel, which was strictly followed by Romanian foreign policy. Every so often the relations between the two countries were shaken by crises that were felt on the level of diplomatic representation (the extended absence of a minister at the head of the mission) or were expressed by the expulsion of Israel diplomats. Cultural ties were not developed during the period, and trade also remained static at a modest level (in the climax year, the mutual trade balance between Israel and Romania reached \$4.5 million). These relations improved considerably, however, as Romania grew more independent of the U.S.S.R. in international affairs. From February 1966 a Romanian minister again headed the Romanian mission in Israel. In March 1967 a high-level Romanian economic delegation visited Israel for the first time, and afterward an Israel economic delegation, headed by the finance minister, went to Bucharest; full trade agreements were signed. In 1968 the trade balance between the two countries reached \$20,000,000, and subsequently trade increased. Cultural relations also expanded (Israeli musicians, choirs, etc. visited Romania and the countries exchanged art exhibitions), as did tourism from each country to

the other. The Six-Day War (1967) served as a decisive test in the relations between Israel and Romania. On June 10, 1967, a consultation of all East European nations, including Yugoslavia, was held in Moscow and resulted in a denunciation of Israel's "aggression." The participating states also decided to sever diplomatic relations with the State of Israel. Romania, however, refused to sign the denunciation and also refused to carry out the conference's decisions. She did not sever diplomatic relations with Israel and refrained from taking part in the anti-Israel Soviet propaganda campaign. Romania repeatedly expressed her stand that the Arab-Israel dispute must be settled by political means, taking into consideration the just rights of both sides. In August 1969 Romania and Israel elevated their diplomatic missions to the rank of embassies.

[Eliezer Palmor]

Contemporary Period

The official census published in June 1977 gave the Jewish population as only 25,600; despite the fact that according to the statistics given by the Federation of Jewish Communities, which based itself on a registry of those in need of the community's services, the number was approximately 45,000, and its files did not include those Jews who had no connection with the communities. If these Jews are included, it would bring the total Jewish population to approximately 70,000. The Jewish community of Romania is an aging one; 25.51% of all Jews in Romania belong to the age category 41–60 and 46.2% to the age category 60–80. The majority of the Jews of Romania are professionals.

The institutions of the community, both local and central, have continued to function. The Federation of Jewish Communities, on which all the communities throughout Romania are represented, was recognized by the authorities and headed by Chief Rabbi Dr. Moshe Rosen who was a member of the Romanian Parliament.

Romania continued to be until the late 1980s the only country within the Soviet sphere of influence whose Jewish community maintained contact with international Jewish organizations and with communities outside Romania; close ties existed with the World Jewish Congress, the Joint Distribution Committee and others, as well as with Jewish communities throughout the world. Representatives of Romanian Jewry participated in the conference of the European branch of the World Jewish Congress which took place in Madrid (Dec. 4–6, 1976), and a delegation of the Federation of Communities, headed by Rabbi Rosen, participated in the Synagogue Federation Conference held in Jerusalem in February 1978. The Jewish State Theater in Bucharest continued to produce plays in Yiddish despite the dwindling of the potential audience. Several books in Yiddish have also been published.

In an earthquake which struck Bucharest on May 4, 1977, the Choral Temple and Malbim synagogue were damaged. During his official visit to Romania on Aug. 1, 1977 (see

below), Prime Minister Menahem Begin participated in the Sabbath services in the Choral Temple and addressed the large congregation.

RELIGION AND CULTURE. Synagogues throughout the country (about 150) continued to function. In addition to the chief rabbi, there were two other rabbis, Rabbi Yitzhak Meir Marilus in Bucharest and Dr. Ernest Neumann in Timisoara. Kosher meat was provided by ritual slaughterers who visited the various communities weekly.

In the latter part of December 1977 the Museum for the History of the Jews in Romania was opened in Bucharest, along with a center for documentation and research. In the same year the centenary of the founding of the Jewish theater in Romania was celebrated by a gala performance at which *Tevye der Milchiger* by Shalom Aleichem, *The Dybbuk* by Anski, and Lessing's *Nathan the Wise* were presented. A history of the Yiddish theater in Romania by Israil Bercovici was published in Yiddish and in Romanian (1976, 1981).

In September 1981 Romania was the site of the convention of the European Rabbinical Conference, the first time a major Jewish gathering had been held in an East European country since World War II. The chief rabbis of England, France, Italy, and Holland were among the participants. The 25th anniversary of the publication of *Revista Cultului Mozaic* was celebrated in September 1981. The state publishing house has published a bibliographical work on the Jewish press in Romania, *Yiddishe Presse in Rumunye* by Wolf Vladimir Tamburu. An annual in Yiddish, *Bukarester Shriftn*, including Yiddish literature and studies on the history of Romanian Jews, was published between 1978 and 1988.

Research in the history of the Jews of Romania has been undertaken by a group of Jewish historians. Their activities center on the Federation of Communities' biweekly and deal especially with the role of the Jews in Romanian history. They also conduct research in municipal archives and the Jewish archives of the Federation. Several significant historical papers and collections of documents were published, edited by experienced historians (Itzik Şvarţ-Kara, Lya Benjamin, Victor Eskenasy).

RELATIONS WITH ISRAEL. Political relations between Israel and Romania were strengthened with statesmen exchanging visits, and particularly visits by Israelis. Romania consistently campaigned for a political settlement of the Near East conflict, for the implementation of the November 1967 Security Council resolution, and for a solution that will guarantee the territorial integrity and independence of all states in the region and lead to the withdrawal of Israeli forces from territories occupied after the Six-Day War. Romania also underscored the need to solve the problem of the Palestinian Arabs in conformity with their national interests. The fact that the Romanian government adopted a policy quite different from that of the U.S.S.R. and the other East European governments and did not brand Israel as an "ag-

gressor" permitted Romania and Israel to maintain normal relations.

In August 1977 Prime Minister Begin paid an official visit to Romania. He held wide-ranging talks with his counterpart Manea Manescu, with Foreign Minister Macovescu, and held two lengthy political talks with the President of Romania, Nicolae Ceausescu. The Begin-Ceausescu meeting played an important role in the decision of the president of Egypt to visit Jerusalem in November 1977, and Romania was the only East European country which expressed open support for the Israeli-Egyptian peace initiative. Two unscheduled meetings were held between the Romanian President and Moshe Dayan, Israeli foreign minister, in April 1978. Economic and trade agreements and an agreement for technical and agricultural cooperation was signed by both countries. The latter agreement, which was renewed in February 1977, is designed particularly to train experts in various agriculture-related fields or to supplement their knowledge. In 1980 Israeli exports to Romania amounted to \$35 million, while Israel imported from Romania goods worth \$48.5 million.

Post-Communist Period

The central development in Romanian life and especially in the life of the ever-dwindling Jewish community was the overthrow of the Communist regime and the attempts at introducing democracy into the country along Western lines. The change of rule did not bring in its wake any real changes in the life of the few Jews left in the country. Until his death in May 1994, the dominating figure in Jewish life continued to be Chief Rabbi Moses Rosen. The remnants of the Romanian Jewish community welcomed the overthrow of Ceausescu and the community journal published a special issue expressing joy at the change.

In the new spirit of freedom Rabbi Rosen was the object of personal attacks by antisemitic groups, which accused him of close cooperation with the communist regime. Two antisemitic newspapers waged this campaign, which the chief rabbi saw as an attack on the entire community. *Romania Mare* ("Great Romania") and *Europa*, weeklies publishing virulent antisemitic material, aimed their barbs personally at Rabbi Rosen. In order to quash the harsh complaints about active antisemitism, President Ion Iliescu invested effort, internally and externally, to placate Chief Rabbi Rosen. In 1993 he took the rabbi with him to the opening of the Holocaust Museum in Washington, DC, and before that participated in a memorial service for Holocaust victims held in the Bucharest Choral Synagogue, where Iliescu spoke and condemned antisemitism.

Upon the immigration to Israel of Rabbi Pinhas Wasserman of Dorohoi (1989), the home for the aged and the *kasher* restaurant there were closed. Otherwise, all the institutions, restaurants, and homes for the aged were still in operation – 10 restaurants and four homes (two in Bucharest, and two smaller ones in Arad and Timisoara). Needy Jews receive packages of food and clothing. All this activity is financed

by the JDC, fighting a rearguard action to maintain the few remaining Romanian Jews. The situation of the elderly has worsened considerably as their pension's value has eroded to nothing because of inflation, and without the Joint's help they would be starving.

Despite the declining number of Jews, the communities run smoothly and without assistance from the Federation, whose central place has been taken under the prevailing circumstances by the Joint. In addition to the Bucharest community, there are organized communities in the Transylvania region, in Cluj, Oradea, Arad, Timisoara. and in eastern Romania in Piatre-Neamt, Botosani, Jassy, Braila, Galati, Constanta, Ploesti, Brasov, Sighet, Satu-Mare, and a number of small communities. 10 *kasher* canteens were still operated by the communities and *kasher* meat was provided by three ritual slaughterers.

Romania lost its special status regarding relations with Israel, since it was no longer the only Eastern bloc country to have diplomatic relations with the Jewish state. Relations continued to be normal and friendly, with efforts at increasing bilateral trade. From the late 1990s Jewish life throughout Romania continued to revolve around the synagogues and the *kasher* restaurants, operated by the Federation of Romanian Jewish Communities and funded by the Joint Distribution Committee.

Since the establishment of the State of Israel some 300,000 Romanian Jews have emigrated there. The more the number of Jews in Romania shrinks, the more difficult it is to obtain reliable current Jewish population figures. The Federation of Communities, whose numbers are used by the Joint, estimate that there is a total of 15,000 Jews, 8,000 of whom are in Bucharest, the capital. Timisoara (in Transylvania) and Jassy each has a community of some 900 people; all the others are scattered among a Romanian populace of 22 million people. The official 1992 government yearbook, citing statistical data from a kind of census, states that there are 9,000 Jews. It may be that not all Jews were counted or admitted to being Jewish, particularly those in mixed marriages. Even though the total number of Jews is small, emigration to Israel continues.

The death of Rabbi Moses Rosen in May 1994 significantly affected the remaining Jews of Romania. The passing at age 83 of the man who for over 40 years had served as chief rabbi and head of the federation of Romanian Jewish communities signified the end of an era which included the collapse of the Communist regime in the country.

The feeling of stagnation which followed the death of the Rabbi Rosen prompted the representatives in Romania of the AJDC, which essentially administers to Jewish life there, to find a new chief rabbi quickly. Among the five candidates, all from Israel, they chose in May 1995 the Romanian-born professor Yehezkel Marek, a lecturer in literature at Bar-Ilan University. After his return to Israel in 1999, Menahem Hachen became chief rabbi.

Rabbi Rosen's death also put an end to the concentrated centrality of the Federation of communities and allowed for greater freedom to the individual communities. The Federation was no longer headed by the rabbi but by Prof. Nicolae Cajal, a well-known scholar and member of Romanian Academy. After his death in 2004, Dr. Aurel Veiner, an economist, was elected as president of the community.

The community biweekly was revamped and changed its names to *Realitatea evreiască* ("Jewish Reality"). Yiddish is no longer used, and the paper now appears in Romanian, English, and one page in Hebrew, for a total of 12 pages presenting information on the Jewish world with emphasis on Jewish culture and many quotations from Israeli newspapers translated into Romanian. The editor is Dorel Dorian, while the veteran editor, Chaim Riemer, who immigrated to Israel some years ago and then returned to Romania as an emissary of the Joint, was appointed "Honorary Director" and writes the Hebrew page. The Hasefer publishing house, sponsored by the Jewish Federation, is dedicated to topics connected to Judaism, Jewish culture and history, as well as to the study of the Holocaust.

In recent years antisemitism in Romania has been on a back burner, mainly in intellectual circles and, with few exceptions, is not accompanied by violent acts. Its most prominent spokesman was Corneliu Vadim Tudor, editor of the weekly *Romania Mare*. Especially during the 1990s, the journal and the political party of the same name incited against the Jews, against Israel, and also against the democratic forces in post-Ceausescu Romania. The Romanian president Ion Iliescu worked to block any rising antisemitism, especially when considering America's decision regarding the granting of economic concessions as a most favored nation. The Jewish community's attitude, as expressed by Cajal, differs from that held in the past by Rabbi Rosen. Cajal did not declare a general, vocal war on antisemitism, but focuses on providing information to convince the Romanians of the great contribution the Jews made to the Romanian people and to the country. The main important universities (Bucharest, Cluj, Iași, Craiova) set up special departments and centers for the study of Judaism, Jewish history, and for teaching Hebrew. However, public discourse was constantly fed by numerous antisemitic publications, which placed a special emphasis on denying crimes committed by the Antonescu regime against the Jewish population. An international commission of historians to study the Holocaust in Romania was set up in 2003 and chaired by Elie Wiesel. The conclusions of the Report issued by the commission were accepted by President Ion Iliescu as well as by his successor, Traian Băsescu. A National Institute for the Study of Holocaust in Romania was inaugurated on October 10, 2005, as one of the first significant implementations of the commission's recommendations. Several expressions of Holocaust commemoration were officially initiated in Romania, especially on October 9, established as official date for commemorating the Holo-

caust (on which date in 1941 the deportations to Transnistria began).

ROMANIAN LITERATURE.

Biblical and Hebraic Influences

Unlike the languages of surrounding peoples and cultures in the area, Romanian is of Latin or Romance origin, dating back to Roman colonization of Dacia (present-day Romania and Bessarabia). Although Romania's national movement could not discard the dominant Orthodox Christianity, which was a legacy of Slavic influence in the Balkans, Calvinism was a significant religious factor in the 16th century (as also in neighboring Hungary and the disputed territory of Transylvania), and this had interesting literary repercussions. Under the impact of the Hussite movement and the Reformation, attempts were made to replace Church Slavonic (see *Bulgarian Literature) with services in the vernacular and to translate the Bible into Romanian. Thus some of the earliest extant texts in Romanian are of a religious character. They include two versions of the Psalter: *Psaltirea Scheiana* (1482) and *Psaltirea Voronețeană* (1580), so named after the monasteries in which the manuscripts were discovered.

Early Writings

Of all the books of the Bible the Psalms were especially favored and inspired numerous translations. The first extant Romanian

printed texts are the “Psalms of Coresi” (1568, 1578), published by Coresi, a friar-printer of Brașov. The Psalms were generally translated as *Psaltirea Sfintului Prooroc și Impărat David* (“The Psalter of the Holy Prophet and Emperor David”). Two of the best-known translations were a versified rendering by the Moldavian metropolitan Dosoftei (Unieș 1673) and a version by the erudite metropolitan Antim-Ivireanu (1694). During the 18th century alone, some 30 editions of the Psalter appeared in Transylvania, Moldavia, and Muntenia (Greater Walachia). The *Cartea a Profeților* (“Book of the Prophets”) was also printed in 1673. The first complete translation of the Bible, *Biblia lui Șerban*, named in honor of its patron, Prince Șerban Cantacuzino, was published in Bucharest in 1688. Written in the Muntenian dialect, this work was based on the Septuagint and not only inspired all subsequent Romanian Bibles, but was also a formative influence on the Romanian language. In this, the Șerban Bible may be compared with the German version of Martin *Luther, the English Authorized Version, and Reformist texts in other lands. Later Romanian Bibles were published by the historian Samuil Micu (1795) and by Ion Eliade Rădulescu (1858). Gala *Galaction and Vasile Radu produced an excellent 20th-century translation (1938).

In the sphere of religious literature there were also several widely distributed works on biblical history and exegesis, such as Veniamin Costache's *Istoria Scripturii Vechiului Testament* (“History of Old Testament Scripture,” 1824) and Filaret Scriban's *Istoria Sfintă a Vechiului Testament* (“Sacred History of the Old Testament,” 1872³). The Bible, particularly the Psalms, was the foundation of Romanian poetry, Dosoftei's verse translation of Psalms being considered its earliest monument, mainly because of the numerous lyrical variations on the original text.

A version of Genesis and Exodus, embellished with legends and known as the *Palia* (Paloea), was published in Romanian translation in 1882. The great Romanian-Jewish folklorist, Moses *Gaster, traced this to the Jewish legends of the *Sefer ha-Yashar* and the *Pirkei Rabbi Eliezer*. In view of the large number of translations, biblical influences on Romanian literature may well have been much stronger. In the earlier, preliterate period, this influence was mainly one of style. The chroniclers of the 17th and 18th centuries often used biblical expressions, drew many of their similes from the Bible, and also quoted biblical maxims. Dimitrie Cantemir (1673–1723), the humanist prince of Moldavia, a brilliant linguist who became a member of the Berlin Academy of Sciences, made constant use of biblical quotations in his philosophical treatise, *Divanul sau gâlceava înțeleptului cu lumea* (1698).

Later Influences

Modern Romanian literature came into existence toward the middle of the 19th century, in the era of Romanian national resurgence. Ion Eliade Rădulescu (1802–1872), one of the first great literary figures in modern Romania, published a version of the Bible, translated *Byron's *Hebrew Melodies* (in 1834), and

Tasso's *Jerusalem Delivered* (in 1847). He also wrote many religious, philosophical, and political commentaries on biblical texts (*Biblice*..., 1858). Following his example, other writers also turned to the Bible. They include G.G. Filipescu, who published a novel about the *Wandering Jew (1835); J.A. Vaillant, a French professor who settled in Romania, author of *Legenda lui Aman și Mardoheu* ("The Legend of Haman and Mordecai," 1868); and G. Gârbea, who wrote a dramatic poem about Job (1898). Job also inspired Nicolae Davidescu (1888–1954) to produce a verse play (1915), his other works including the poem *Judeea* (1927). Alexandru Macedonski (1854–1920) and Cincinat Pavelescu (1872–1934) collaborated in the tragedy *Saul* (1893), based on the Hebrew king's dramatic conflict with the prophet Samuel. Other works of note on biblical themes are *Eliezer* (1908), a biblical one-act play by Eugen Lovinescu (1881–1943), and re-workings of the Song of Songs by Corneliu Moldovanu (1908) and Marcel Romanescu (1925). The evocation of Divine majesty in the numerous psalms of Tudor Arghezi (1880–1967) elevated Romanian poetry to new artistic heights. The poems of George Cașlinescu (1899–1965) abound in references to biblical characters and incidents, as well as to the landscape and flora of Canaan, which he described in many poems of great artistry. Another eminent writer, Gala Galaction, was steeped in the Bible, which inspired his mystical prose and several biblical novels, including *Roxana* (1930).

Romanian-Jewish writers did not particularly distinguish themselves in the field of biblical literature. The Zionist poet Enric *Furtuna (1881–1965) wrote the dramatic poem *Abişag* (1963) and other biblical verse, while Camil *Baltazar (1902–1977) published *Biblice* ("Poems from the Bible," 1926), a collection notable for its sensual treatment of figures such as Ruth, Tamar, Esther, and the Shulammitte. Two poets inspired by the Songs of Songs were Marcel Breslaşu (1903–1966), whose *Cîntarea Cîntărilor* (1938) was staged as an oratorio, and Maria *Banuş.

The Image of the Jew

While Romanian writers presented a positive image of the Hebrews or Jews of Bible times, their treatment of the contemporary Jew was often less favorable and even undisguisedly hostile. In the words of Queen Elizabeth of Romania (1843–1916), known to literature as Carmen Sylva, "all draw from the Bible and persecute the people that gave it." The popular conception of the Jew originated in religious and other works translated from Greek, Latin, and Church Slavonic and disseminated from the second half of the 18th century. In popular tales and anecdotes the Jew was said to be damned for having rejected the Christian savior, and Romanian folklore added antisemitism to theological antipathies by describing Jews as agents of the Devil, covetous of Christian blood, money-grubbing, cowardly, and villainous. Jewish intelligence and inventiveness were acknowledged with an invariable sneer. The roots of Romanian antisemitism were basically those found elsewhere: religious prejudice and intolerance, economic competition, and chauvinistic xenophobia. Only the pretexts var-

ied according to circumstance. Thus it was alleged that the "invasion of Russian and Polish Jews would place Romanian commerce in their hands"; there was resentment of Jewish appeals to Western countries for the ending of persecution; and indignation over the insistence of these nations on the extension of civil and political liberties to the Jews of Romania following the peace treaties of 1878 and 1919. Such "injustices" intensified native antisemitism, which was especially fostered by certain writers. Ironically enough, the most violent anti-Jewish fanatics were often those whose own ethnic origin was least reliably Romanian.

THE CLASSIC STEREOTYPE. For literary antisemites the Jew was responsible for all the ills of the Romanian people. In the case of the eminent nationalist writer Vasile Alecsandri (1821–1890), the titles of some of his plays are significant – *Liptorile satelor* ("The Village Leeches"), *Herşcu Boccegiul* ("Hershel the Peddler"), and *Năvălirea Jidanilor* ("The Invasion of the Yids"). The poet Mihail Eminescu (1850–1889) viciously attacked the Jews' "anti-national" character; the scholarly Bogdan Petriceicu Haşdeu (1838–1907), who was himself of partly Jewish descent, considered Jews a plague within society; and Costache Negruzzi (1808–1868) even resented their alleged dislike of nature and flowers.

Both before and after World War I the Romanian intelligentsia was poisoned by such anti-Jewish sentiments. Three university professors – A.C. Cuza (1857–1946), Bogdan-Duică (1865–1934), and Nicolae Iorga (1871–1940) – also spread the idea that the Jews of Romania were descendants of the *Khazars, who had once dominated parts of Eastern Europe.

During the 1930s, under the growing influence of Nazism, Romanian antisemitic movements (which included many students) increased their strength. Other writers who succumbed to the doctrines of racism included Nael Ionescu (1890–1940), once a friend of the Jews, and Nicolae Davidescu, the poet steeped in the Song of Songs, who became the antisemitic theoretician of *Vremea*, a review which had formerly published many works by Jewish writers. Ion Alexandru Brătescu-Voineşti (1868–1946), who abandoned pacifism for xenophobic nationalism, concluded that all Jewish writings were pornographic and aimed at the destruction of family life. The poet Octavian Goga (1881–1938), who was also prime minister of Romania, injected his anti-Jewish venom into *Mustul care fierbe* ("The Boiling Must," 1927), and another writer, Nichifor Crainic (1889–1972), who was Romania's minister of propaganda during World War II, expressed his hatred of the Jews in religious terms as editor of the review *Gândirea* (1926–44). In his novel *1907* (1937), Cezar Petrescu (1892–1961) blamed the Jews for the peasants' rebellion of that year, while another novelist, Ionel Teodoreanu (1897–1954), created amoral Jews who speak a mutilated Romanian. Even the Socialist Panait Istrati (1884–1935), a disciple of the humanitarian Romain Rolland, who wrote mainly in French, predicted the downfall of the Jews because of their supposed identification with the Communism he had rejected.

OBJECTIVE ATTITUDES. Literary societies did not, however, adopt antisemitism as a policy. Although *Semănătorul*, the review of Nicolae Iorga, received contributions from many antisemites, it remained impartial. So did *Viata Românească*, which reflected the popular-democratic views of writers such as Constantin Stere (1865–1936), Mihail Sadoveanu (1880–1961), and G. Ibraileanu (1861–1936). Political issues were also excluded from *Flacăra*, *Convorbiri literare*, *Viața Novă*, and *Sburătorul Literar*, which were only concerned with aesthetic problems.

Among Romanian writers who showed understanding for the Jew's position were the democratic historian Nicolae Bălcescu (1819–1852), Alexandru Odobescu (1834–1895), and the revolutionary hero Aleco Russo (1819–1859), who wrote in his *Cugetări* ("Reflections," 1856) that "it is not wise to oppress the Children of Israel." *Junimea*, the literary society that created the "New Direction" in modern Romanian literature, did not espouse antisemitism, although most of its members toed the anti-Jewish line. This was due to the firm control of the founder, Titu Liviu Maiorescu (1840–1917), a conservative prime minister and Romania's first great literary critic. He was supported by Petre P. Carp (1837–1918), a translator of Shakespeare, who admired Jewish talent. Ion Luca Caragiale (1852–1912), who scorned antisemitism as a bestial aberration, was the first great Romanian writer to present a Jew's state of mind in a work of literary importance. His masterly short novel, *O făclie de Paști* ("An Easter Candle," 1889), is a psychological study of a Jewish innkeeper, Leiba Zibal, terrorized by his would-be murderer one Easter night.

SYMPATHETIC PORTRAYALS. The outstanding prose writer Mihail Sadoveanu (1880–1961), who was a prominent figure in Romanian cultural life, actively opposed the antisemites. His attitude led to the burning of his works by bands of hoodlums who nicknamed him "Jidoveanu" (i.e., the Jew-lover, Sadoveanu). Whole passages of his works deal with the life of Jews whom he had come to know in his native townlet. One of his best stories, "Haia Sanis" (1909), explores the painful state of mind of a Jewish girl in love with a gentile.

Liviu Rebreanu (1885–1944), one of the great Romanian novelists, published the impressive novella *Ițic Strul dezertor* ("Itzik Shtrul the Deserter," 1921), the tale of a Jewish soldier who is driven to commit suicide when his superior officer involves him in a fictitious desertion. However, in 1938, Rebreanu succumbed to Fascist influence and published the novel, *Gorila* ("The Gorilla"), in which one character presents antisemitic prejudice in a very favorable light. On the other hand, the religious writer Gala Galaction published many books and articles about Judaism and in support of Zionism and often described poverty-stricken Jews, endowing them with moral distinction. In his best novel, *Papucii lui Mahmud* ("Mohammed's Slippers," 1932), Galaction was optimistic about the peaceful coexistence in the future of Christians, Muslims, and Jews. This was also the case with Victor

Ion Popa (1895–1946) in his play, *Take, Ianke, și Kadîr* (1933). Another leading opponent of antisemitism was the critic Eugen Lovinescu, leader of the review and literary group entitled *Sburătorul literar*. Many distinguished Jewish writers received their literary training under this exponent of French culture and modernism.

A particularly courageous stand was taken by George Călinescu (1899–1965), one of the most eminent of modern Romanian writers. In 1939, when antisemitism was reaching its peak, he expressed his opposition in a famous article entitled "Evreii" ("The Jews"), which appeared in his Jassy review, *Jurnalul literar*. Călinescu's vast *Istorie a Literaturii Roâmne* ("History of Romanian Literature," 1941) included details of all the Jewish writers officially removed from the annals of Romanian literature by the fascist Antonescu regime and dealt with their works in an objective spirit. His attitude led to violent demonstrations by antisemitic students and to the public burning of his books. In 1941 a notorious anti-Jewish journalist, Pamfil Șeicaru, denounced his opus as "a national scandal." The Jewish characters in Călinescu's fiction – novels such as *Enigma Otiliei* ("Otilia's Enigma," 1938) and *Scrinul negru* ("The Black Chest," 1960) – have the virtues and vices of people despised and rejected by their host society.

Treatment by Jewish Writers

Apart from their output of polemics against antisemitism, Romania's Jewish writers were also concerned with projecting a favorable image of Jews and Jewish life in works of fiction. Among the poets, Avram Axelrad and Alexandru Dominic stressed the melancholy situation of their people in an alien and hostile environment, a theme especially elaborated by Adolf Rodion *Steuerman, whose volume of collected Jewish verse, *Spini* ("Thorns," 1915), highlighted the spiritual conflicts of the Jewish intellectual. The question of Jewish survival assumed major importance in prose. The most significant work by Moïse *Roman-Ronetti was his play *Manasse* (1900), which dealt with the conflict between the old and the new Jewish generations and between Jews and gentiles. Its performance gave rise to antisemitic student disorders, and moved Adrian Vereea to write a sequel to Roman-Ronetti's drama (1915). Henric *Sanielevici used his literary and scientific gifts to combat Nazi race theories with *In slujba Satanei* ("In the Service of the Devil," 1930–35); while Isac Iacovitz *Ludo, a veteran Jewish publicist who made his peace with the Communists after World War II, fiercely satirized leading Romanian antisemites and demolished their portrayal of Jewish types. A positive image was presented by the novelists Ion *Călugăru, whose works constitute a vast fresco of Romanian Jewry, and Isac *Peltz, who wrote pioneering and successful novels about Jewish ghetto life in Bucharest. A few of the latter's works, such as *Calea Vacaresti* (1933) and *Foc în Hanul cu Tei* ("Fire at the Khan Inn," 1934), went through several editions. *De două mii de ani* ("For the Past 2,000 Years," 1934), by Mihail *Sebastian, was a moving description of a Jewish intellectual's antisemitic

ordeals and spiritual torment. Although its hero is unable to accept either Zionism or Communism, the book contains some excellent description of pre-World War II Jewish life in Romania. A rare instance of Jewish self-hatred was the novelist Ury Benador (1895–1971), whose Marxist convictions led him to portray Romanian Jewry, in works written after the Holocaust, in a generally hostile manner. On the other hand, Iulia Soare, a writer of the postwar generation, produced an objective study of a middle-class Jewish family during the second decade of the 20th century.

Jewish Contribution to Romanian Literature

In so culturally backward a land as Romania, Jews naturally played an important literary role from the late 19th century, despite the prejudices and restrictions that operated against them. In philology, folklore, and bibliography they were acknowledged pioneers, and many Romanian Jews who later gained distinction as poets, playwrights, and novelists, began their career in journalism. By common admission, Romanian philology was largely the creation of Jewish scholars. Heinrich *Tiktin and Lazăr *Săineanu (L. Săinéan) were experts of international renown, the former producing the first – and to date the most scientific – Romanian grammar, the latter publishing the first comprehensive dictionary of the Romanian language. Denied Romanian citizenship, Tiktin moved to Berlin and Săineanu to Paris, both men broadening their work to include general philological research. I.A. Candrea Hecht (1872–1950) was also a lexicographer of the first rank. In folklore two outstanding figures were Moses Gaster and Moses *Schwarzfeld. Gaster's many learned works include the pioneering *Literatura populară română* (1883) and *Chrestomația română* (1891). A staunch Jewish nationalist, he antagonized the Romanian government with his protests against antisemitism and in 1885 was expelled and settled in England. E. Schwarzfeld, an eminent historian of Romanian Jewry, was also expelled and settled in Paris. Two other great philologists and linguists were A. Grauer (Brauer; 1900–?) and J. Byck (1897–1964).

LITERARY PIONEERS. Curiously enough, the first significant Jewish contribution to Romanian literature was made by a semiliterate peddler, Moise *Cilibi (Ephraim Moses b. Sender), whose annual books of folk wisdom, dictated to the printer, enjoyed an extraordinary success from 1858 until his death. Although objective critics stressed the important role of emerging Jewish writers as apostles of avant-garde ideas and techniques, those less sympathetic to Jewish literary aspirations could always find fault with their work. Some claimed that the Jews dealt with Romanian national themes that they could not possibly appreciate, while others maintained that they unjustifiably neglected specifically Jewish questions. While it is undeniable that many Romanian-Jewish writers showed greater concern for Romanian than for Jewish issues, it is worth recalling that Roman-Ronetti's dramatic masterpiece, *Manasse*, which did investigate the problems of Roma-

nian Jewry, was driven off the stage of the Romanian National Theater by antisemitic nationalist demonstrators. During the years preceding World War I, when Titu Maiorescu's aesthetic theories were dominant, Constantin *Gherea-Dobrogeanu, a literary critic and Socialist writer, introduced his own social and materialist conception of art, inaugurating a new school of scientific criticism. The same period saw the emergence of other Jewish literary scholars and critics, notably Ion Trivale, whose brilliant career was cut short by World War I, and Henric Sanielevici, one of Romania's most erudite and incisive polemical critics.

POETS. Among creative writers, Barbu *Nemțeanu introduced a Heinesque note into the poetry of his time, while D. Iacobescu ushered in French symbolism. The few poems printed at that time by Tristan *Tzara and his review, *Simbolul*, already foreshadowed the future rebel and creator of Dadaism; while the verse of Felix *Aderca proclaimed the poetic innovator, though not the great novelist that he was to become between the two world wars. Another remarkable poet of the time was Eugen *Relgis who later inaugurated the intellectual current of humanitarianism in Romania. Other leading poets were Leon Feraru, Enric Furtună, A. Toma, and the versatile Samson Lazar, who settled in Israel. Jewish suffering especially preoccupied two other poets, Avram Axelrad and Adolf Rodion Steurman.

Immediately after World War I, the economic prosperity which followed Romania's annexation of Transylvania, Bukovina, and Bessarabia was accompanied by an unusual literary boom. The euphoria of a hard-won emancipation also contributed to the increasing activity of Jewish writers. Benjamin *Fondane, known in his earlier Romanian years as Beniamin (Wechsler) Fundoianu, wrote poems about the countryside, but his works were suffused with Jewish inspiration. Even after his emigration to France in 1923, Fondane occasionally published Romanian verse. The collection *Priveliști* ("Landscapes"), one section of which describes life in the Moldavian *shtetl*, was published in 1930. The new lyrical themes and imagery introduced by Camil Baltazar during the 1920s led him to be acknowledged as one of the most gifted poets of his time. He was closely followed by Ilarie *Voronca, whose review, *75 HP*, inaugurated the new integralist trend in 1924. Another avant-garde poet was Sașa *Pană (1902–1981); his highly nonconformist verse appeared in the review *Unu*, whose guiding spirit he was during the years 1928–32. Marcel Breslașu wrote biblical poetry, while Maria Banuș with her verse collection *Tara fetelor* ("The Maidens' Land," 1937) revealed herself to be Romania's outstanding poetess. By contrast, a forerunner of the absurd in poetry was Alexandru Robot (Alter Rotman, 1916–1943). Classical verse was published during the 1920s and 1930s by Andrei Tudor (1907–1959), and by Virgiliu Monda and Emil *Dorian, both of whom became better known as novelists, as well as by Leon Feraru and Alexandru Dominic, whose poem "Israel" (1920) was hailed by the critics as a masterpiece.

PLAYWRIGHTS AND NOVELISTS. Writers of the period between the world wars include the playwrights B. Luca and Adrian Verea, who also published verse. Isaia Răcăciuni (1900–?) wrote social novels such as *Mâl* (“Swamp,” 1934) and *Dați-ni-l înapoi pe Isus* (“Give Us Back Jesus,” 1936) and *Paradis uitat* (“Forgotten Paradise,” 1937), as did Sergiu *Dan and Cella Serghi. Mihail Sebastian, one of the most prolific and versatile prose writers in Romania, wrote essays, criticism, novels, and plays. His drama *Steaua fără nume* (“The Nameless Star,” 1943) was the only work by a Jew staged (albeit under an assumed name) during the era of Nazi persecution. With his novels and poems Marcel *Blecher was a pioneer of surrealism and existentialism, while Ion Călugăru and Isac Peltz portrayed Jewish life in Romania’s towns and villages. Abraham Leib *Zissu, a leading Zionist, wrote novels and sketches exclusively on Jewish themes.

THE NAZI ERA AND ITS AFTERMATH. Although Jewish writers in Romania suffered less from the Nazi “Final Solution” than Jews in most other lands under Hitler’s domination, their works were suppressed and they had to spend the war years (1941–44) in hiding or anonymous seclusion. The restrictive atmosphere so prevalent in the country already led many Jewish writers to emigrate after World War I and a remarkable number of talented Jewish writers made their way to France, notably Benjamin Fondane, Isidore Isou (1925–), Adolphe Orna (1882–1925), Claude Sernet (1902–1968), Tristan Tzara, and Ilarie Voronca. Fondane, who was murdered in the Birkenau death camp, was the most consciously Jewish among them. Two other Romanian-Jewish writers who emigrated to France were the talented novelist Sorana *Gurian and the critic Aureliu Weiss. Enric Furtună ended his life in Brazil and Eugen Relgis settled in Montevideo in 1947. Three who moved to Israel were Samson Lazar, A.L. Zissu, and the poet Mayer *Rudich (1913–), who resumed his literary and journalistic career in Tel Aviv in 1959.

Several Jewish writers who had risen to eminence before World War II, including Baltazar, Ludo, and Peltz, dutifully conformed to the requirements of Romania’s postwar Communist regime. Ludo’s attacks on the former royal family and the hostile accounts of the Jewish bourgeoisie published by Ury Benador were devoid of literary value. On the other hand, Maria Banuș and Marcel Breslașu, though faithful to the party line, maintained a higher ethical and artistic standard in their works, as did Samuel Gregore with his fantastic novel *Dincolo* (“Beyond,” 1944). The new writers of the post-World War II era did not, in general, pay much attention to Jewish questions. Many adopted Romanian names, obscuring their Jewish origin. As authors and critics, they made an important contribution to the development of neo-realistic literature. Among the literary historians and critics who held leading posts on the editorial boards of various reviews were Vera Călin, Paul (Cohn) Cornea (1924–), Ovid Crohmălniceanu, Samuil (Druckman) Damian (1930–), B. (Bernstein) Elvin (1927–), Silvian Iosifescu, Mihail Petroveanu (1923–), Lucian

(Leibovici) Raicu (1934–), Nicolae Tertulian, and Henri Zalis (1932–). Elvin published books on Sebastian (1956), Anatole France (1957), and Chekhov (1961) and studies of Ionesco and Camus; Petroveanu in his *Studii literare* (1966) wrote on Fondane; while Zalis wrote on Flaubert (1968). In drama, Aurel *Baranga (1913–1979), Alexandru Mirodan, and Dorel Dorian wrote plays that were highly praised and often performed on the Romanian stage.

Representative prose writers of the period were Radu Cosășu, Sorana Gurian, Norman Manea (1936–), Ieronim Șerbu, Cella Serghi, Alexandru Sever, Iulia Soare, and Vladimir Colin (1921–1991), a state prize winner, whose stories for children and adolescents were widely appreciated. When the Communist regime relaxed its stringent demands in the 1960s, several Romanian-Jewish poets were able to tackle themes about human relationships with skill and sensitivity. Such writers included Veronica *Porumbacu, Nina Cassian, George Toma Maiorescu, Petre Solomon (1923–1991), Stefan Jures (1931–), and Florin Mugur, who was awarded an international poetry prize at Sarajevo, Yugoslavia, in 1969.

Literature of the Holocaust

In Romania, as in other lands once under Nazi control, a special literature arose reflecting the era of the European Holocaust. Non-Jewish novelists who dealt with this theme included Eusebiu Camilar (1910–1965), who described the mass murder of Jews in *Negura* (1949), and George Calinescu, whose *Scrinul Negru* (1960) dealt with Jewish deportation to and life in the camps of Transnistria. The latter work also contains a powerful description of the massacre of the Jews from Odessa. After their visits to former death camps in Poland, George Bogza (1908–1993) and Eugen Jebeleanu (1911–1991) wrote moving poems about the Nazi atrocities, while Ion Grigorescu’s novel, *Obsesia* (“Obsession,” 1960), concludes with the suggestion that a new Wailing Wall be erected at Auschwitz.

The Holocaust was the one Jewish theme that inspired a significant number of Jewish writers in postwar Romania. Documentary works were published by Filip Brunea-Fox (1898–1977) who disclosed details of the Bucharest pogrom organized by Romanian Nazi legionaries in his *Orașul Măcelului* (“City of Slaughter,” 1944); by M. Rudich in *La braț cu moartea* (“Hand in Hand with Death,” 1945), which described the deportations from Bukovina and Bessarabia; and by Aurel Baranga, who collected data on the most significant acts of terror perpetrated by Romania Nazis in *Ninge peste Ucraina* (“Snow falls over the Ukraine,” 1945¹, 1946²). Other Jewish writers wrote novels and shorter prose works on Nazi war crimes. Emil Dorian’s novel *Otrava* (“Poison,” 1946) described the early antisemitic outbreaks in Bucharest; while Sergiu Dan in *Unde începe noaptea* (“Where the Night Begins,” 1945) and *Roza și ceilalți* (“Rosa and the Others,” 1947), Ieronim Serbu in *Nunta în stepă* (“Wedding on the Steppe,” 1955), and Isac Peltz in *Israel îns-ingerat* (“Bloodstained Israel,” 1946) reach a climax with detailed descriptions of life in the

Transnistrian camps. Matei Gall's novel *Masacrul* (1957) described the murder of a group of Jewish communists by an SS unit and Arnold Dagani's diary of the deportation, *Groapa este în livada de vișini* (1947), was one of the most impressive accounts of its type. Another survivor, Oliver Lustig, wrote two novels on his experiences in Auschwitz, while Maria Arsene (Arthur Leibowici, 1909–1975) published various works about the Nazi terror in Romania, including the novels *Hotel Ambasador* (1967) and *Los* (1968). Other works on the Holocaust were written by Cella Serghi, G.T. Maiorescu, and Alexandru Jar (1912–1988), whose novel, *Trădarea lunii* ("The Moon's Treason," 1968), is set in Nazi-occupied Vilna. Finally, poems on Jewish suffering at the hands of the Nazis were written by Camil Baltazar, Maria Banuș, Sașa Pană, Veronica Porumbacu, and Mayer Rudich.

Consciously or unconsciously, Jewish writers in Romania revealed their spiritual heritage in such characteristics as their interest in research, their spirit of innovation, their predilection for philosophical reflection, and their ability to grasp the torments of the human soul. Even their inclination toward social revolt has its ethical roots in the Bible. Although they may have drifted far from religious tradition, only a very few Romanian-Jewish writers advocated total assimilation. Most of the non-Zionists merely submerged themselves in the themes and ideals of their era without renouncing their ties with the Jewish people. This is also true of the more recent writers whose lack of specifically Jewish appeal is attributable to the limitations imposed by Romania's Marxist theoreticians rather than to their own free choice and mode of expression. It is significant that, after 1967, Romania's friendly relations with Israel – unique among communist states of Eastern Europe – brought about an upsurge of Jewish consciousness among the country's younger writers.

ROMANIN, SAMUELE (1808–1861), Italian historian. Born in Trieste, Romanin went to live in Venice at age 12, living there for the rest of his life. He became famous as the author of *La Storia dei Popoli Europei dalla Decadenza dell'Impero Romano*, and especially *Storia Documentata di Venezia*, a work in 10 volumes written between 1853 and 1861.

ROMANIN JACUR, LEONE (1867–1928), Italian politician. He was a leading light of Paduan Jewry. Romanin Jacur was senator of the Kingdom of Italy from 1880 to 1913. He became famous for the attention he paid to the issues related to the modernization of the countryside. He opposed Zionism and on the occasion of Theodor Herzl's visit to Italy refused to arrange for him an audience with Pope Pius x, which had been asked for by Felice Ravenna. Romanin Jacur was on good terms of friendship with Pius x dating back to the times when the future pope was a parish priest in the Padua countryside. Romanin Jacur also held the office of minister of public works from 1894 to 1896 and was undersecretary at the Ministry of the Interior in 1899.

ROMANIOTS. The name Romaniots is employed to define the original Jewish population of the territories of the Byzantine Empire, Constantinople, the Balkans, and Asia Minor, and their descendants in all matters relating to their customs, language, and tradition. The family names of the Romaniots were Greek, their synagogues were known by Greek names, and they were considerably influenced by Greek culture and especially the Greek language, which had also been adopted in their synagogue services. In 1547 a translation of the Torah in Greek and Ladino was published in Constantinople. The Greek translation was printed in square characters (see *Judeo-Greek). The customs and special versions of the Romaniots' prayers were collected in the "*Maḥzor Romania*" which includes the New Moon prayer given in Judeo-Greek. For many years, they read the Book of Jonah on the Day of Atonement in Hebrew and in Greek. It was also the custom to read Ruth, Lamentations, the tractate *Avot*, and a commentary to the Song of Songs in Greek. From the 16th century, the Romaniots were on the defensive culturally and socially against the waves of immigrants who arrived from the European countries, notably from *Spain and *Portugal, and who gradually imposed their way of life and customs on the existing population. The number of their synagogues decreased and their Greek dialect became limited to the Greek Jews in the towns of Kastoria, Ioannina, and Chalcis and to the *Karaites of the Haskoy district of Constantinople. The synagogue of the "Gregos Community" continued to exist in Constantinople until 1660, that of *Sofia until 1898, and that of *Adrianople until it was burnt down in 1905. Among the customs and traditions of the Romaniots may be mentioned the seven wedding blessings that are recited at the betrothal (*erusin*) ceremony, whereas the usual custom is to recite it at the actual marriage ceremony. Originally, the husband did not inherit from the wife but later the marriage contract was amended according to which the husband shared the wife's inheritance with her offspring.

ROMAN LITERATURE. Although there is information concerning the Jews in Rome as early as 139 B.C.E., the first Latin writers to mention the Jews or Judaism in their writings are *Cicero and Varro, who lived at the end of the republic. It is significant that Cicero does not mention the Jews or Judaism in his philosophical works, but only in his orations – in his speech in defense of Flaccus (*Pro Flacco*) of 59 B.C.E., and in his *De Provinciis Consularibus* of 56 B.C.E. – in both instances his remarks are derogatory. The Jewish religion he defines as a *superstitio*, and the Jews themselves are described as a people born to slavery, but there is no need to draw far-reaching conclusions from his polemical thrusts since they arose from the fact that the Jews were to be found in the opposite camp from the one Cicero was representing. In similar situations, other nations received no more sympathetic treatment at the hands of the great orator. The stereotyped antisemitic complaints of the Hellenistic period are, at any rate, not mentioned by him. In contrast to Cicero, Varro, the foremost scholar in the period of the late republic, treats the Jewish way of life with respect. He praises Jewish religious worship which opposed all pictorial and plastic representation, and compares it with the early Roman practice which similarly rejected them in their worship of the gods.

The growth of the Jewish population in Rome in the time of Augustus is reflected in the mainstream of contemporary Roman literature. The poet Tibullus alludes to the Jewish Sabbath; Horace refers to the missionary fervor of the Jews and to their gullibility; the historian Livy speaks of the Temple of the Jews in Jerusalem and stresses that the worship therein is unique in that it contains no representation or any idol whatsoever of the godhead. Ovid was familiar with the Jewish Sabbath, and Augustus himself mentions it in a letter to Tiberius, although – like many of the Greeks and Romans of those days – he was under the impression that it was customary for the Jews to fast on the Sabbath.

The longest description of Judaism extant from the writers of the age of Augustus is that found in the epitome of *Pompeius Trogus' "Universal History." He relates the history of the Jews, the origin of their religion and their commonwealth, as well as a description of the physical properties of their land, in his description of the Seleucid Empire. He deals with the origin of the nation at length, but only cursorily with its later history. The treaty between Judea and Rome (161 B.C.E.) is considered to have been a decisive step toward the achievement of independence from the Seleucid yoke on the part of the Jews. His description of the beginnings of the Jewish people is a potpourri of information gleaned from the Bible, from a Damascene source, and from the well-known Greco-Egyptian tradition concerning

their origin. Trogus, without doubt, utilized sources written in Greek.

Roman literature of the Augustan age does not yet contain ideological antisemitism. This enmity begins to develop somewhat later, and *Seneca would seem to be its first representative. Other protagonists are such famous writers as Quintilian, *Tacitus and *Juvenal. They belong to the period (the end of the first and beginning of the second centuries C.E.) in which the attraction toward Judaism among the gentiles reached its height. At this time, there were many Romans – both men and women – who accepted to a greater or a lesser extent the practices and the beliefs of Judaism. In the eyes of many representatives of the Roman aristocracy, Judaism and its offshoot, Christianity, were undermining the very foundations of Roman society. Most of the Roman writers who attacked Judaism also expressed dissatisfaction with the spread of the Eastern cults and their penetration into Roman society.

Seneca looked upon the Jews as a wicked people, whose customs had spread throughout the entire world and thus "turned the vanquished into the vanquishers." He inveighs against the Jewish Sabbath and against the lighting of lights in honor of the godhead on the Sabbath day, since the gods are in no need of this light. Seneca's younger contemporary, the satirist Persius, saw the practices of Judaism as one of the expressions of the superstition reflected in other rites originating from the East, such as those in Phrygia and in Egypt.

A frontal attack upon Judaism and those who believe in it, and particularly upon its followers and sympathizers among the Romans, may be found in Tacitus' famous description of the Jews at the beginning of Book 5 of his *Historiae*. Tacitus there brings six different explanations concerning the origin of the Jews, but relates at inordinate length the tradition which originated in the rabidly antisemitic Hellenistic circles in Egypt (see *Greek Literature, Ancient). Tacitus does not hide his extremely negative attitude toward Judaism. He describes the Jews as outstanding in their hatred of other peoples while at the same time equally notable for their solidarity among themselves. Those who become proselytes learn the ways of the Jews and become similarly disdainful of the gods and indifferent to the welfare of their former country and families. Tacitus notes the Jewish conception of monotheism, and its opposition to the fashioning of any statue or pictorial representation of God, but does not indicate his reaction to this. He is familiar with the identification of the Jewish religion with the Dionysic rites but rejects it out of hand. Tacitus' geographical description contains nothing very specific and concentrates upon a description of the Dead Sea, its balsam and bitumen. The historical description ignores the early period of independence and pictures the Jews as a people who have usually been subject to foreign domination. According to Tacitus, Antiochus was prevented from extirpating the Jewish superstition because of his involvement in a war with Parthia, and it was the international political constellation which was instrumental in enabling the Jews to found their own polity.

This was of a priestly nature and it nurtured their superstition. He concludes that Judea eventually acquired all the negative characteristics of an Oriental monarchy. However, it should be noted that in his description of Roman rule in Judea, Tacitus does not attribute a particularly rebellious character to the Jews; he blames corrupt Roman procurators, such as Felix and Florus, for the outbreak of the Jewish War (66–70 C.E.), rather than Jewish insubordination.

Tacitus' antipathy – like that of his contemporary, Juvenal – does not confine itself to Judaism but rather encompasses other Eastern religions as well, such as that of Egypt. What does particularly disturb him is the success of the proselytizing movement, which to his eyes was a serious menace to Roman society. He looked upon the threat to the Roman social fabric posed by Jewish religious propaganda as being incomparably more serious than the political or military danger posed by Jewish arms. A similar attitude toward Jews and Judaism is reflected in the works of the Roman satirist Juvenal. In his satires is reflected the impression which the Jewish beggars in Rome made upon him, but they also include the most impressive description found anywhere in Roman literature of the “downward path” toward Judaism taken by the Roman populace, which began with the observance of the Sabbath on the part of the father and ended with the complete proselytizing of the son. The events of Trajan and Hadrian's reigns and the widespread diffusion of Christianity weakened both the proselytizing movement and the sympathy for Judaism. Hence Jewish religious propaganda ceased to be a burning issue, anti-Christian polemic taking its place. Nevertheless, Roman writers still continued to take an interest in Judaism. Some of them persisted in the anti-Jewish attitude of the preceding period, but a more moderate approach can also be discerned. Disdain for Judaism is clearly the stand of the African-born Latin writer Apuleius (d. 160 C.E.), in contrast to the respect which he shows toward other Eastern religions, particularly the Egyptian rites in honor of Isis.

A negative attitude toward the figure of the Jew as such, as well as echoes of Seneca's approach, are also reflected in the works of the representative of the pagan Roman aristocracy of the early fifth century C.E., *Rutilius Namatianus. However, in the *Historia Augusta*, the reaction to the Jewish phenomenon is quite different. This is a historiographical work produced in the Roman aristocratic circles of the very end of the classical period. The ideal emperor described therein – Alexander Severus – is represented as treating the patriarch Abraham with respect and positively emphasizing Jewish sayings and customs. For further details, see the respective individual articles.

ROMANO, JUDAH BEN MOSES BEN DANIEL (It. **Leone de Ser Daniel**; 14th century), Italian philosopher and translator. Judah's contemporary, Immanuel of *Rome, wrote a poem and a composition in rhymed prose in his honor (*Maḥbarot*, vol. 1 (1957), no. 12, pp. 217ff.), and also praised him elsewhere in his *maqāmāt* and his biblical commentaries. According to information contained in manuscripts (Paris, Bibliothèque Nationale, Cod. Hébr. 1079, and Budapest, Kaufmann Ms. 281), Judah prepared translations for Robert II of Anjou, king of Naples, though this is not altogether certain. Moses *Rieti, who lived in the 15th century, reports that the king studied the Bible in the original Hebrew under Judah's guidance. Judah took pains to spread a knowledge of philosophy among the Jews, and to acquaint them in particular with the works of Christian scholars. He was the first to compare the language of Isaiah with that of Cicero. The Latin works, some of which were translations of Arabic originals, were translated by him into Hebrew for the purpose of making them known to the Jews.

As far as is known, they include the following: Pseudo – Aristotle's *Liber de causis* (*Sefer ha-Illot*; in some manuscripts also entitled *Ha-Tov ha-Gamur* or *Pirkei ha-Elohut*); Averroes' *De substantia orbis* (*Ma'amar be-Ezem ha-Shamayim*); Thomas Aquinas' *De ideologia* (*Ma'amar ha-Hemshelim*); the treatise ascribed to Boethius, *De unitate et uno* (*Ma'amar ha-Eḥad ve-ha-Aḥdut*); some shorter works of Albertus Magnus, Thomas Aquinas, Aegidius Colonna, Alexander of Alexandria and Angelo of Camerino. Judah often added his own observations and comments to his translations. He also wrote:

- (1) a philosophical commentary on the story of creation in Genesis;
- (2) explanatory notes on the *Kaddish* and *Kedushah*;
- (3) an introduction to the prophetic books, written in a philosophic vein;
- (4) *Ben Porat*, a commentary on the first four chapters of Maimonides' *Sefer ha-Madda*;
- (5) a Hebrew-Italian glossary of philosophic terms;
- (6) explanatory notes to various passages in the Bible. It is possible that he also wrote a commentary on the *Ma'arekhet ha-Elohut* of Perez ha-Kohen b. Isaac. Except for some fragments, none of Judah's translations or original works has been published.

[Umberto (Moses David) Cassuto]

ROMANO, MARCO (1872–1942), Bulgarian Zionist leader and lawyer. Born in Plovdiv (Philippopolis), he participated in the first Zionist convention in Plovdiv (1898) and contested the *Alliance Israélite Universelle concerning the Jewish national character of schools. The controversy resulted in the dismissal of teachers and their replacement by Hebrew teachers. Romano was the representative of Bulgaria's Jews at the Zionist Congresses, even when he lived in Italy. He established and edited the official Zionist weekly in Bulgaria, *Shofar*, which existed intermittently until 1940. In 1927 and 1938, Romano wrote several essays on the political problems of Zionism, Arab-Jewish relations, and the Mandatory government in Palestine (in French). He settled in Palestine in 1937.

[Getzel Kressel]

ROMANO, SAMUEL (1906–1941), Yugoslav author, editor, and translator. Born in Sarajevo and raised in an observant Sephardi family, Romano studied at the Hochschule fuer die Wissenschaft des Judentums in Berlin. He later became a teacher of religion in the high schools of Zagreb and remained active in the profession until his death, which coincided with the Nazi invasion of Yugoslavia. As a writer and educator, Romano did much to widen the scope of Jewish knowledge and culture, and much of his literary work is concerned with Jewish national themes.

In his youth, he wrote lyric poetry in Serbo-Croatian and hundreds of children's poems, some of which were collected in *Bajke, priče, slike Šemuela čike* ("Tales, Stories, and Pictures of Uncle Samuel," 1938). During the 1920s and 1930s, he also edited the Zagreb children's monthly *Ha-Aviv* and the literary supplement of the Jewish weekly *Židov*, in which many of his outstanding translations of modern Hebrew prose and poetry appeared. His translations of stories by Burla and Hameiri also appeared in book form. Romano was the first to collect and publish the proverbs of the Bosnian Sephardim, and his study of Solomon ibn Gabirol appeared in 1930. He also helped to translate an anthology of modern Hebrew literature by Rabinson and Bistriski (*Antologija novohebrejske književnosti*, 1933).

[Cvi Rotem]

ROMANOS MELODOS (first half of sixth century), hymnographer and composer. Romanos was born of a Jewish family in Emesa (the present Homs), Syria. It is not known whether his parents had already converted to Christianity or whether he did so himself in youth. He became a deacon at Berytus (Beirut) and during the reign of Anastasius I (491–518) went to Constantinople, where he joined the clergy of the Theotokos church. According to legend, he was inspired by a vision of Mary to write, and immediately sing, the work which became his most famous one – "the First Kontakion on the Nativity," thus also creating the poetical-musical form which was to remain the foremost vehicle of Byzantine liturgical po-

etry until the seventh century. The kontakion (essay) is a long strophic poem, often of 24 equistructural stanzas prefaced by an introduction, the *koukoullion* (lit. "hood"), which furnishes the refrain. About 85 of the hundreds of kontakia ascribed to Romanos have been proved to be by him but his authorship of the most famous hymn of the Byzantine Church, "*Akathistos*," is still in doubt, nor can it be ascertained whether any of his original melodies have survived in manuscripts or in the traditional repertoire. Romanos' kontakia are elaborately constructed "poetical sermons" on subjects from the New and Old Testament, and were greatly influenced by the forms established by St. Ephraem the Syrian. Links with the contemporary rise of the synagogal *piyyut may well be possible but need further investigation. Romanos, considered by tradition and scholarship alike as the "father of Byzantine hymnology," was canonized and his feast day is October 1st.

[Bathja Bayer]

ROMAN-RONETTI, MOÏSE (originally **Aharon Blumenfeld**; 1847–1908), Romanian author. Born in Oziran, East Galicia, Roman-Ronetti emigrated to Romania in 1867 (using the identity papers of a dead Romanian peasant named Roman). He earned his living by teaching Hebrew and Jewish studies, but in 1869 some friends helped him to get to Germany, where he was given a scholarship by the Alliance Israélite *Universelle. He studied a variety of subjects, including medicine and philology, before returning to Bucharest in 1874. For a time he was a schoolteacher and then became a translator at the foreign ministry, but in 1882 he left the city and became a farmer. During the peasants' revolt of 1907, he fled with his family to Jassy, where he learned that the peasants had burned his home and destroyed all his property. He never recovered from the shock. Roman-Ronetti had already begun publishing articles on Judaism and Talmud in Hebrew periodicals before he left Oziran, and he continued to contribute to such periodicals as *Ivri Anokhi* (Brody, Ukraine) and *Ha-Maggid* (Lyck, Poland), signing himself Moshe Roman.

His first published work in Romanian was a poem, "Rusia," which appeared in the newspaper *Reforma* in 1877. In the same year he put out a pamphlet, *Domnul Kanitverstan* ("Mr. Kanitverstan"), attacking the notorious antisemitic writer V.A. Ureche, in whose school he had been a teacher. In 1898 he attacked the antisemitic policy of the government in the widely read newspaper *Adevarul*. Discussing Jewish survival, he opposed official Romanian policy toward the Jews who, in his opinion, were entitled to a national life of their own. These essays were later collected in *Două măsurî* ("Two Measures," 1898). Roman-Ronetti's most important work was the play *Manasse* (1900), which had a dual theme: the conflict between three generations of Jews and the antagonism between gentiles

and Jews. Performed before the Romanian royal family, the play had a warm reception by leading critics, but it provoked serious unrest among antisemitic students, who were opposed to its production at the Bucharest National Theater. *Manasse* was translated into several languages, including Hebrew and Yiddish, and was staged in many countries. The English version is entitled *New Lamps for Old* (1913).

[Dora Litani-Littman]

***ROMANUS I LECAPENUS**, Byzantine emperor, 920–944, and co-ruler with *Constantine VII Porphyrogenitus. Romanus decreed that the Jews in the realm should be forcibly baptized, partly to demonstrate that, although he had come to the throne by usurpation, he was following the traditions set by the emperors *Basil I and *Leo VI. Romanus was also exhorted to take this step by the patriarch of Jerusalem in 932. The communities of Otranto and Oria in southern Italy were severely affected by the decree, although it is not mentioned in the Hebrew chronicle *Megillat *Aḥima'az*. This may be because further consequences of Romanus' decree were prevented by the intervention of *Ḥisdai ibn Shaprut, to whom a letter addressed to Helena, wife of the co-emperor Constantine VII, has been attributed. The Arab chronicler al-Masudi states that in 943–944 Jews from all parts of the empire fled to Khazaria whose Jewish king “slew many of the uncircumcised” in a vain attempt to force Romanus to stop the persecution. The statement in the Vision of Daniel (see *Daniel, Vision of) relating that Romanus troubled the Jews by expulsion “not by destruction but mercifully” remains a problem for clarification.

[Andrew Sharf]

ROMBERG, MORITZ HEINRICH (1795–1873), German neurologist, born in Meiningen. He made fundamental contributions in the field of neuropathology.

His *Lehrbuch der Nervenkrankheiten des Menschen* (1846) is considered to be the first systematic textbook in the field of neurology (English translation, *A Manual of the Nervous Diseases of Man*, 2 vols., 1853). He discovered a pathognomonic sign of locomotor ataxia: the inability of ataxics to stand firm or reach the destination of the intended movement when their eyes are closed (Rombergism). He described facial hemiatrophy or trophoneurosis called “Romberg’s disease,” and a complex of symptoms caused by dilatation of blood vessels in the splanchnic area. He was the first to describe ciliary neuralgia.

In 1838 he became associate professor of internal medicine at the University of Berlin.

[Suessmann Muntner]

ROMBERG, SIGMUND (1887–1951), composer. Born in Nagykanizsa, Hungary, Romberg began his musical career as a child prodigy. He was commissioned a lieutenant in the Austrian army, and then studied music in Vienna with Victor Heuberger. In 1909 he went to the United States and worked in various restaurant and theater orchestras. In 1911 he wrote his first successful song, “Memories,” and then began to compose musical shows and operettas. Romberg composed over 70 operettas, in a tuneful vein indebted equally to the Viennese tradition and to Victor Herbert, the founder of the genre in the U.S. His best-known works include *The Student Prince* (1924), *The Desert Song* (1926), *The New Moon* (1928), and *Up in Central Park* (1945). Many of his operettas were filmed, and Romberg himself also adapted other composers' operettas and even operas for the film. He was president of the Song Writers' Protective Association. A fictionalized biography of Romberg, *Deep in My Heart*, was written by E. Arnold (1949).

ROME, capital of Italy.

The Classical Period

THE MIDDLE AND LATE REPUBLIC. The earliest record of contact between Jews and the Roman Republic is the embassy sent by *Judah the Maccabee to Rome, headed by Eupolemos ben Joḥanan, and Jason ben Eleazar. The two ambassadors arrived in Rome, and there concluded an alliance with the Roman Republic (1 Macc. 7:23–29, Jos., Ant. 12:417–19 and War 1:38). Successive Hasmoneans renewed the treaty. Jonathan sent two envoys to Rome, Numenius son of Antiochos and Antipater son of Jason, to renew the treaty with Rome (1 Macc. 12:1–23, and Jos., Ant. 13:164–170). Simon sent another embassy, perhaps headed by the same Numenius, envoy of Jonathan (1 Macc. 14:24, Jos., Ant. 13:227). Also John Hyrcanus renewed the alliance in 132 B.C.E. (Jos., Ant. 13:259–66). In the treaty mentioned by Josephus, the Roman Republic recognized the conquests of Simon the Maccabee.

These treaties, however, are not evidence for the presence of Jews and even less so a Jewish community in Rome. However, Valerius Flaccus (1, 3:3) mentions that in 139 B.C.E. the praetor peregrinus G.C. Hispanus expelled Chaldeans, astrologers, and Jews who “attempted to contaminate the morals of the Romans with the worship of Jupiter Sabatius.” It is thus clear that according to the Roman author there was a presence of Jews other than the Hasmonean envoys, trying to proselytize.

The first nucleus of a Jewish community probably consisted of Jews arriving at the end of the second century B.C.E. and early first century B.C.E. These were joined by the Jewish prisoners brought in 61 B.C.E. by Pompey after his campaigns

in Judea against the Hasmonean state (Philo, *Legatio* 23:155). Aristobulus II, who precipitated the war against Pompey, embellished the Roman warlord's triumph (Plutarch, *Life of Pompey* XLV). When L.V. Flaccus, propraetor of the Province of Asia in 62 B.C.E., was accused of the embezzlement of funds, which included the half-shekel sent by the Jews of Asia to the Temple of Jerusalem, Cicero took his defense. In the oration (*Pro Flacco* 67–68), Cicero mentions that “Jews sent gold also from Italy” to Jerusalem and also notes the “aggressiveness of the Jewish mobs at political gathering.” It is probable that by then there existed an organized Jewish community in Rome, which included Jews who had arrived before 63 B.C.E. and of course the Jewish prisoners of Pompey who had been freed. The legal status of the Jews living in Late Republican Rome thus varies from that of citizens, *liberti* (freed slaves possessing Roman citizenship), *peregrines* or foreigners, and of course slaves. The community was organized as a collegium, with a special status. Moreover this community regularly sent the half-shekel tax to the Temple in Jerusalem, like all the other organized Jewish communities in the Diaspora. Last but not least, it is possible that some of the Jews living in Rome took the side of the “*populares*,” at least according to Cicero. It seems that Rome's Jews supported Julius Caesar. This is quite possible, as the latter restored in part the glories of the Hasmonean state tarnished by Pompey. In addition, Caesar exempted the Jewish synagogues from the laws he enacted to curb the power of the Roman collegia. It is no surprise then that according to Suetonius (*Julius Caesar* LXXXIV), Jews as a group mourned at Caesar's funeral in the middle of the Roman Forum.

The Early Empire

Only with Augustus is there clear-cut evidence of an organized Jewish community in Rome. By then Judea was firmly under the rule of King Herod, a staunch ally of Rome. Thus Augustus recognized the Jewish community as a *collegium licitum*, with privileges. Jews could send to Jerusalem both the half-shekel and the first fruits. The Roman state assisted poor Jews with the *annona* (free distribution of money or grain). If the distribution was made on the Sabbath, Jews were entitled to get the money or grain the next day (Philo, *Legatio* 156–58). Most of the Jews lived in an area across the Tiber, the Transtiberinum. At least three synagogues can be dated to the Augustan period, the congregations of the Augustienses, of the Agrippienses, and of the Herodians. Jews were quite conspicuous in Augustan Rome. The proselytizing activity of the Jews aroused the interest of the poet Horace (*Saturae* 1, 4:140–43).

Under the rule of the Julio-Claudians (14 C.E.–68 C.E.) a number of incidents connected with the Jewish community in Rome are worthy of mention. Thus, under Tiberius, it seems that Sejanus, the *praefectus praetorius* tried to expel the Jews from Rome. The occasion arose when a Roman matrona, Fulvia, wife of the senator Saturninus (Jos., *Ant.* 18:81–84) was victimized by four Jews. Consequently Tiberius ordered the banishment of the Jews from Rome in 19 C.E., and around 4,000, were to be sent to Sardinia to fight against the bandits

(Tacitus, *Annales* II, 85:4). However, it seems that Jews who were Roman citizens were not affected. Thus only foreign Jews were expelled. On the other hand the Jews who were sent to Sardinia had the status of freedmen. With Sejan's execution the ban was probably revoked. Under Claudius, Suetonius records that Claudius expelled “*Judaeos impulsore Chraesto*” (*Claudius* 25:4). This sentence had been the subject of various interpretations. It seems that only Judeo-Christians were expelled, or those Jews who took part in brawls with Christians. Josephus mentions that under Nero, as member of an embassy from Judea, he was graciously received by the empress Poppaea under the protection of the Jewish actor Alityros, a favorite of Nero (Josephus, *Life* 3).

The Jewish War of 66–70 C.E. deeply affected the Jewish community in Rome. First a great number of Jews arrived in Rome as prisoners. These prisoners, some of them later freed, significantly augmented the Jewish population of Rome. The Jewish leaders *Simon bar Giora and *John of Giscala walked in chains during Titus' triumph (Jos., *War* 7:118–57). Moreover, the gold from the Temple in Jerusalem was used to finance various building projects, the most important being the Flavian amphitheater known as the Colosseum. The new ruler, Vespasian, enacted a law that obliged the Jews living in the Roman Empire to pay a new poll tax, the *fiscus Judaicus*, to the Temple of Jupiter Capitolinus, instead of the half-shekel paid to the Temple in Jerusalem, now destroyed. The handling of the tax was administered by an official whose title was *procurator ad capitularia Judaeorum*. Vespasian did not enact any other discriminatory law against the Jews, nor did any anti-Jewish rioting occur following the war in Rome, as in other cities of the empire, most notably in Alexandria and Damascus. Domitian the last Flavian ruler, is remembered for his strict and harsh enforcement of the *fiscus Judaicus* (Suetonius, *Domitianus* 12:2). When the emperor discovered in 95 C.E. that Flavius Clemens and his wife, Flavia Domitilla, both members of the imperial family, were probably proselytes to Judaism, he had Flavius executed and his wife exiled. It is not clear if this was a measure directed against Jewish proselytism, or only an episode connected to members of the Imperial family. During Domitian's reign the poet Martial was active in Rome. In his poetry the degraded social condition of some of the Jews then living in Rome is reflected. Martial thus remarks that Jews are begging (XII, 57:13) and writes about his Jewish slave (VII, 35:3–4). It is in this period that the Jewish patriarch Rabban *Gamaliel II, with three scholars, *Joshua ben Hananiah, *Eleazar ben Azariah and Rabbi *Akiva visited Rome (Mish., *Ma'as. Sh.* 5:9, *Er.* 4:1; *TB, Suk.* 23a, 41b, *Mak.* 24a; *Sifrei Deut.* 43; *TJ Er.* 1, 19b, *Suk.* 2:4, 52d; *Avot de Rabbi Nathan* 1:14, 32a).

After Domitian's murder the new emperor, Cocceius Nerva, abolished all abuse connected with the enforcement of the Jewish tax. Coins bearing the legend *Calumnia Judaica sublata* were minted. Trajan, although he repressed a revolt in Judea, and in the last year of his rule had to face the huge Diaspora revolt of Cyrenaica, Cyprus, and Egypt, did not modify

the legal situation of the Jews living in Rome. On the contrary he appears in a positive light as the protagonist of various Midrashim. Hadrian, Trajan's successor, enacted around 131 C.E. a law banning circumcision. Although there is no other data, it is probable that this law also affected the Jewish community living in Rome. During the reigns of Trajan and Hadrian the Roman poet Juvenal was active. His *saturae* reflects the prejudices of the Romans towards the Jews. Thus once again Juvenal gives a picture of Jewish beggars camping near the Egeria grove (3:12–16), asking for alms near synagogues (3:296), or telling fortunes to passersby (6:542–47). Juvenal also despises the Roman proselytes who fear the Sabbath, represented as a day of idleness (14:96–106). However, Juvenal's poetry does not reflect any special anti-Jewish feeling. Like most Romans, Juvenal despised foreigners. His invectives against other ethnic groups coming from the provinces, like Egyptians and Orientals, are even stronger than those against Jews.

THE LATE EMPIRE. For Late Antiquity, classic texts are supplemented by epigraphic and archaeological evidence. Antoninus Pius, the first ruler of the Antonine dynasty, abolished Hadrian's ban on circumcision. However, he enacted harsh decrees forbidding the Jews to proselytize. It seems that Marcus Aurelius and Commodus opened public offices to Jews. According to Callistus, the future pope, he broke into a synagogue to disrupt the Sabbath service. The Roman authorities reacted swiftly, and Callistus was sentenced by the praetor to forced labor in the mines of Sardinia. Under Septimius Severus and his dynasty the government attitude towards the Jews continued to be positive. Thus Septimius Severus renewed Marcus Aurelius' decree to allow Jews to be eligible for public office, and he exempted them from such duties as might interfere with their religious practice (*Digesta* 27, 1.15.6; 50, 2.3.3). However, Septimius Severus once more forbade Jewish proselytism (Spartianus, *Severus* 17:1). His son Antoninus is remembered for his "Constitutio Antoniniana," which granted Roman citizenship to all the free inhabitants of the Roman Empire, including Jews. The Jewish community in Rome was probably affected, because Jews living in Rome under the status of *peregrine* now became Roman citizens. According to Lampridius (*Antoninus Heliogabalus* 3:4–5), Heliogabalus wished to observe both Judaism and Christianity. Alexander Severus was known as the "Syrian archisynagogus" by his enemies (Lampridius, *Alexander Severus* 28:7), stressing a tie, true or imagined, with the Jews. Moreover he had a high regard for both Judaism and Christianity. Rome's Jews probably suffered from the anarchy and the economic situation of the third century C.E. following Alexander Severus' murder. But that affected the other peoples of the Roman Empire as well. In 284 Diocletian became emperor. His reorganization of the Roman Empire did not affect the Jewish community of Rome legally. However, with Constantine, who emerged as the Roman emperor in the West in 313 C.E., the legal situation of the Jews began to change for the worse.

In Late Antiquity there were various synagogues in

Rome. To the synagogues of the Augustienses, the Agrippienses, and the Herodians, new synagogues were added, such as the synagogue of the Calcarensians, the Campensians, Elaea, Hebrews, Secenians, Siburensians, Tripolitans, Vernacleansians, Volumnesians, and perhaps of Severus. Synagogue membership thus united the congregations according to various criteria. Hence some congregations were created by clients or liberti of a Roman personality (like the synagogues of the Augustienses, the Agrippienses, the Volumnesians, and of Severus), other congregations were composed of members coming from the same place (like the synagogue of the Tripolitans), and still others perhaps took their names from the profession of most of the congregation's members (like the synagogue of the Calcarensians or lime burners) or from its location in Rome (Campensis from the Campus Martius quarter, Siburensians from the Subura quarter). Other synagogues' names indicated a social group, such as the synagogue of the Vernacleansians, or of Roman-born Jews. The synagogue of the Hebrews probably took its name from the fact that its members were Hebrew-speaking.

It is not certain that the Roman Jewish community had a central body as did, for example, the Jewish community of Alexandria. Most of the scholars do not believe they did. Each synagogue was headed by an *archisynagogus*, assisted by *archontes*. It is possible that some congregations had a *gerousia*, or council of elders. Then the *gerousia* was headed by the *gerousiarches*. The *grammateus*' office was probably that of secretary of the congregation. The titles Pater Synagogae and Mater Synagogae were honorary and these were given to some of the members of the congregation.

The Roman Jewish community was on the whole Greek-speaking. Very few inscriptions are in Latin, or in Hebrew. The names of Ancient Rome's Jews reflect this situation. Most of the names are characteristic Greek names used by Jews, such as Alexander, Theodoros, Theodothos, and Zosimos. Latin names are translations of Jewish names like Benedicta and Vitalis as well as genuine Roman names like Aurelius and Julius. Sometimes double names are used. Few names are Jewish, like Isaac, Judas, or Sarah. The professions of the Roman Jews are unknown for the more wealthy members. The more humble were painters, actors, lime burners, and even a soldier, a certain Rufinus. In all probably about 10,000 Jews lived in Late Imperial Rome.

Epigraphy also throws light on the existence of spiritual life in Ancient Rome. Thus through epitaphs some "Teachers of the Law" as well as "Students of the Sages" are known. The Talmud indeed mentions a Jewish sage from Rome called Josa Todros (probably *Theodosius). He introduced the *minhag* of including in the meal on Passover eve a roast lamb in commemoration of the paschal lamb sacrificed in Jerusalem (TJ, Pes. 7:1, TB, Ber. 19a). The sages grudgingly accepted the practice.

Roman Jews used *catacombs to bury their dead. Six Jewish catacombs have been excavated around Rome. The Monteverde Catacombs situated between the ancient Via Aurelia

and the Via Portuense, the Catacombs of Vigna Cimarra, Vigna Rondanini, and Via Appia Pignatelli (although research shows that it was used by non-Jews), all situated near the Via Appia, the Labicana Catacombs situated near Via Labicana, and the Catacombs of Villa Torlonia situated near the ancient Via Nomentina. These catacombs together contain about 100,000 graves. Approximately 600 inscriptions have been found in Greek, many more in Latin, and formulae in Hebrew. The catacombs consist of a complex of subterranean corridors and chambers with loculi and arcosolia. Some of the catacombs (Vigna Rondanini and Villa Torlonia) are decorated with ceiling paintings combining pagan (Nike, peacocks, dolphins) as well as Jewish symbols (*menorah*). The inscriptions are sometimes decorated with the *menorah*, the Torah ark, the *etrog* and the *lulav*. Some sarcophagi have been found. Again pagan iconography such as the Four Seasons and theater masks are blended with obviously Jewish *menorot*. Clay lamps as well as glass objects decorated with Jewish symbols have been excavated.

The Jews of ancient Rome lived in an environment that even today could be characterized quite open and friendly. Imperial law protected them, although with some limitations (the ban on proselytism). Moreover, with the exception of the *Fiscus Judaicus* Jews were not discriminated against. Even in times of tension, such as during the 66–70 war, the imperial government did not revoke any of their privileges. The local population was never physically hostile (as for example in Alexandria), even if sometimes the Jews were seen in a negative light, but only because some of them were foreigners or poor and not because they were Jews. Rome's Jews were thus successful in assimilating many elements of the surrounding Roman-Italic society, both in the organization of the community and in their material culture, but they still held clearly to a separate cultural identity.

[Samuele Rocca (2nd ed.)]

In Talmudic Literature

The relationship between Rome and the Jews living in the Land of Israel was often characterized by periods of strain and war. Thus Pompey's campaigns in the East ended with the conquest of the Hasmonean kingdom. The Roman administration of Judea between 6 C.E. and 66 C.E. was often characterized by cruel and corrupt officials. Moreover the Great Revolt against the Romans (66–74 C.E.), which ended in the destruction of the Temple and Jerusalem, and the Bar Kokhba War (132–135 C.E.), which ended in the destruction of almost all the Jewish settlements in Judea, could only contribute to a totally negative image of Rome. It is not surprising then that Rome is referred to in rabbinic literature by various negative designations – *Edom, Esau (see *Esau, In the *Aggadah*), *Amalek, Seir, *Tyre; the guilty kingdom; the wanton government; the fourth kingdom; and other epithets, mostly denigratory. It is compared, among other things, to the pig and the eagle, both impure animals (both animals appeared on the Vexilla (standards) of the Roman legions based in the Land of Israel).

The first sages, however, who lived between the destruc-

tion of the Temple and the Bar Kokhba War, were already divided in their attitude towards Rome. Scholars like *Zechariah b. Avkilus and activists like Akiva as well as R. *Simeon bar Yoḥai took a totally negative view. The attitude of the moderates found expression in *Joḥanan b. Zakkai's dictum not to be hasty "to demolish the high places of gentiles lest they be rebuilt by your hands" (Tanḥ. ed. Hoffman, p. 58; ARN² 31, 66).

While in the time of the *tannaim*, in the second century, a time of prosperity for the Roman Empire, there were those who argued: "The government takes in abundance and gives in abundance" (Sif. Deut. 354), in the period of the *amoraim*, in the third and fourth centuries, a time of distress for the Roman Empire, they came to deride the hypocrisy of Rome which robs and puts on an appearance of innocence and compassion to the poor (Ex. R. 31:11; Tanḥ. Mishpatim 14; PDRK 95b; Mid. Ps. to 10:6). They were well aware in former times of the extortion practiced by provincial government officials (ARN¹¹ 11, 46, 47).

The rabbis were aware of the great wealth of Rome (ARN¹ 28, p. 85; Git. 58a) but also of its arrogance and pride (Sif. Num. 131). They said that the Romans' claim that they were brothers to Israel was mere hypocrisy (Pes. 118b).

The Roman emperor, the ruler of the empire, has a place apart in talmudic literature. Many Roman emperors are mentioned, such as *Nero, *Vespasian, *Titus, *Trajan, *Hadrian, *Antoninus, Septimius *Severus, and *Diocletian. Though many of the statements about them are legendary, it is not always so (cf. the story that Trajan's wife gave birth to a son on the Ninth of Av – TJ, Suk. 5:1, 55b – with the statement that his daughter was born on the day the Temple was destroyed – Suetonius, Titus, 5). It is interesting that most emperors, with the obvious exception of Titus and Hadrian, are depicted often in a neutral and even positive way.

It is important to stress that most of the sages lived in a period of quite friendly relations between Rome and the Jews living in the Land of Israel, mainly Galilee, symbolized by the relationship between *Judah ha-Nasi and the legendary Antoninus. Thus, beginning with the end of the second century C.E., the sages began to enjoin not to anticipate "the end of days," which is concealed (Sanh. 97b; DE, ed. Higgen, p. 313); they also said that there was an oath extracted from the Jews not to rebel against the government and that one must even honor the government (Mekh. Pisha 13). There were also scholars who actively called for prayers for the welfare of Rome, "since but for the fear of it, men would swallow each other up alive" (Avot 3:2; cf. Av. Zar. 4a). On the other hand stringent criticism was also heard against the *Pax Romana* of "this guilty kingdom," "which is engaged in war the whole time" (Mekh. Be-Shallah 1 (89), Amalek 1 (181)) and which "levies recruits from every nation" (PDRK, Ha-Kodesh ha-Zeh, 7–89–90). These criticisms were leveled against Rome in general and not because of a specific problem between the Roman government and the Jews. In a bold homily, either of praise or of delicate ironic sarcasm, Simeon b. (Resh) Lakish

praises the government of the country, saying that it is very good, better than the kingdom of heaven, because it exacts justice for men (Gen. R. 9:13). The criticism of the government of Rome as inferior to that of heaven (cf. Ber. 28b) is probably connected with the fact that from the close of the first century C.E. *emperor worship became official in Rome. They stressed that Israel was not subject to Rome but to the will of God. The sages were divided on the question of the political status of Rome. Some claimed that “this nation has been enthroned by Heaven” (Av. Zar. 18a) and that one should submit to it even at a time of religious persecution.

In everyday life, Rome as such was known to the Jews and the rabbis living in the Land of Israel through its provincial administration. Thus the Romans seen in the Land of Israel were more often than not the governor and the various magistrates responsible for the application of Roman law, officials responsible for taxation, and of course the omnipresent Roman soldiers. For example, Roman court procedure, including methods of investigation, tortures, and punishments, are described at length in rabbinic literature, which also recognizes that in general the Empire was indeed administered according to the law (with its defects) but that in times of persecution the protection of the law was completely removed (Mekh. Shirata 7; cf. Sif. Deut. 24 and 323). Many descriptions have been preserved of the deeds of tyrannical and cruel Roman officials, who on behalf of the government confiscated Jewish lands after the destruction of the Temple and after the Bar Kokhba Revolt (see, e.g., Kil. 7:6; BK 117a; Sif. Deut. 317; 357; BM 101a; Lam. R. 5:4).

Roman taxation, mainly in the difficult third century, is treated at length in talmudic literature. The sources speak of the *baleshet* (“inspectorate”) and *balashim* (“inspectors”), who came chiefly in connection with the payment of tolls and taxes (see *Taxation), and of collectors and tax collectors, who were suspected of misappropriating the property of the inhabitants (Tosef., Bezah 2:6; Toh. 7:6; Tosef., Toh. 8:5). For this reason most *tannaim* held it permissible to avoid payment of tolls and even to swear falsely to the tax collectors (Ned. 3:4; Tosef., Shevu. 2:14; TJ, Ned. 3:4–5, 38a; BK 113a); only on rare occasions during a period of good relations with Rome, is the reverse opinion heard (Pes. 112b). In a still later period the *halakhah* was laid down, out of fear of harsh persecutions, that he who cheats the tax is as though “shedding blood... as if worshiping idols, acting immorally, and desecrating the Sabbath” (Sem. 2:9; cf. Lev. R. 33:6). Instructive descriptions have also been preserved of the methods both of the tax collectors and of those who avoided the tax (see, e.g., Tosef., Kel. 1:1, BM 3:9, BM 7:12, 8:25), and special halakhic arrangements were also made to facilitate the orderly collection of taxes (TJ, Ket. 10:5, 34a, 13:2, 35d). Jewish publicans and inspectors who cooperated with the government were regarded as guilty of grave transgressions and were reckoned as robbers whose repentance was exceptionally difficult.

On the other hand there were different and conflicting views with regard to Jews, including scholars, serving in the

Roman service, whether perforce or of choice (see *Eleazar b. Simeon, *Ishmael b. Yose b. Halafta, *Joshua b. Korḥa). Another problem was whether it was permitted to hand over Jews wanted by the Roman authorities (see *Joshua b. Levi; cf. Tosef., Ter. 7:20). Nevertheless, *informers who acted willingly were regarded as exceptionally degenerate and compared with heretics and apostates (Tosef., BM 2:33, Sanh. 13:5).

The influence of the Roman Law is discernible to a considerable degree in the *halakhah* and is reflected in many various and unusual spheres, such as the disqualification of a bill of divorce that has not the proper Roman date (Git. 8:5; cf. Tosef., BB 11:2 and Git. 8 (6):3; Yad. 4:8) “because of peril” (TJ, Git. 8:5, 49c), originally introduced for good relations with the state; or the disqualification of “coin of the revolt” as a substitute for the second tithe (**ma'aser sheni*; Tosef., Ma'as. Sh. 1:5–6: “Coins of Bar Kokhba and coins of Jerusalem may not be substituted...”). Although in these cases the halakhic possibilities were limited by the existence of the Roman government, the reverse is also true.

The Roman legions are viewed sometimes with open admiration, as in a homily in the Pesikta of Rabbi Kahana, where the Ten Plagues are compared to a Roman Legion besieging a city (Pesikta of Rabbi Kahana 7:11). However the deterioration in the quality of the Roman soldiers at the end of the second and the beginning of the third century C.E. was observed. Thus even in the view of *Judah ha-Nasi, the friend of Rome, the Roman legion was of no value (Tanḥ. Va-Yeshev 3).

Roman culture in the Hellenistic East and of course the Land of Israel was not as widespread as in the Latin West.

The Latin language was seldom used in the East, where Greek was commonly used also by the Roman administration. It is significant that Latin words are much less frequent in rabbinic literature than Greek (the proportion being approximately 1 to 8). Most of the sages could not even speak Latin and were naturally ignorant of its literature. In their view the Latin language was good for “war” (i.e., it was merely the language of the army; TJ, Meg. 1:11, 71b; see also S. Krauss, *Lehnwoerter*, 1, xix, xxi).

Characteristic Roman buildings adopted in the Greek East were the bathhouse, the theater (inherited by the Greeks), and the amphitheater. In principle Roman bathhouses were permitted. Thus it was permitted to bathe in a small gentile bathhouse immediately after the Sabbath if there was “a local authority” in the town, since it could be assumed that the heating of the water, was done for the non-Jews (Makhsh. 2:5). However, if the bathhouse served a pagan temple it was forbidden (*avodah zarah*). The sages forbade the Jews to go to the theater or the amphitheater, the former because it was considered a waste of time, the latter because the sages were averse to bloodshed in every form and gladiatorial games were not considered at all in a positive light. However, attending both the theater and amphitheater was permitted for reasons of state or the saving of lives.

After the Constitutio Antoniniana of 212 C.E., the Jewish

ruling class in the Land of Israel received Roman citizenship. One of the symbols of this new status was the wearing of the toga. The sages warn against assimilating to the Roman costume: “that thou say not: since they wear the toga, I too will wear it” (Sif. Dent. 81 and cf. *ibid.* 234). It was also forbidden to adopt the Roman tonsure, except for scholars who were “in contact with the government,” and for the same reason (Sot. 49b), they were permitted to learn Greek and “to look into a mirror” (TJ, Shab. 6:1, 7d).

The sages particularly warned against the excessive esteem in certain circles toward Roman law and culture: “Perhaps you will say: They have statutes and we do not have statutes?... there is yet place for the evil inclination to reflect and say: Theirs are more suitable than ours!...” (Sifra to Aḥare Mot 13:9).

In conclusion the sages were divided in their evaluation of Rome and its activities. Judah said “How becoming are the deeds of these people: they built markets, they built bridges, they built bathhouses”; however, Simeon b. Yoḥai replied: “Whatever they built they merely did for themselves; they built markets to settle harlots in, bath houses to delight themselves in, bridges to take tolls” (Shab. 33b; cf. the *aggadah* on Rome in judgment before the Holy One in the time to come – Av. Zar. 2b). In the opinion of Reuben b. Strobilus: “the public buildings and baths and streets which this wicked kingdom makes, were their intentions for the sake of heaven, they would have been worthy to possess the world, but their sole intention is for their own needs” (Mid. Hag. to Gen. 44:24); and according to Gamaliel: “the kingdom feeds on four things – tolls, baths, theaters, and taxes” (ARN¹ 28, 85).

Joshua b. Levi, who visited Rome, there saw “pillars covered with tapestry so that in winter they should not contract and in summer they should not split, but in the market he saw a poor man wrapped in a single mat – others say in half an ass’ pack saddle” (Gen. R. 33:1).

In the diversity of their views on Rome the rabbis are no different from their contemporaries, as can be seen by comparison with the evaluations of the Greeks, the Church Fathers, and even the Romans themselves. The dialogues between the sages and eminent Romans preserved in rabbinic literature are instructive since these conversations have an actual historical, political, social, or ideological background. It is immaterial whether they actually took place; what is important is that the subjects of these conversations are not accidental but characteristic of the time and of the speakers.

[Moshe David Herr / Samuele Rocca (2nd ed.)]

The Christian Empire

With the adoption of Christianity by the Roman emperors the position of the Jews changed immediately for the worse. While Judaism remained officially a tolerated religion as before, its actual status deteriorated, and every pressure was brought on the Jews to adopt the now-dominant faith. In 387–388, a Christian mob, after systematically destroying heathen temples, turned its attention to the synagogues and burned one

of them to the ground. The same took place later under Theodoric (493–526) when, in consequence of the punishment of some Christian slaves for the murder of their Jewish master, the Jews were attacked, their synagogue burned, and that of the Samaritans confiscated. When Rome was captured by the Vandals in 455, the Jerusalem Temple spoils preserved as trophies in the Temple of Jupiter were carried off to Africa. Thereafter the city ceased to be regarded as capital of the empire, and it lost greatly in importance, prosperity, and population. There is no detailed information of the lot of the Roman Jews at this period, but it must be imagined that they suffered and declined economically with the rest of the inhabitants.

Following the fall of the Roman Empire in the West, the Christian bishop of Rome, the pope, became the dominant force in the former imperial city and the immediate neighborhood, with moral authority recognized, to a greater or lesser degree, over the whole of western Christendom. Hence, over a period of some 1,400 years, the history of the Jews in Rome is in great part the reflection of the papal policies toward the Jews. However, down to the period of the Counter-Reformation in the 16th century, there was a tendency for the papal anti-Jewish pronouncements to be applied less strictly in Rome than by zealous rulers and ecclesiastics abroad, while on the other hand the papal protective policies were on the whole followed more faithfully in Rome itself than elsewhere. The keynote to papal policy was set by *Gregory I (the Great; 590–604), who firmly proclaimed that while the Jews should not be allowed to presume to more than was allowed them by law, the minimal rights accorded them of maintaining their synagogues and performing their religious rites should in no circumstances be infringed. The Roman Jews (who apparently at this time were engaged in foreign trade extending to the south of France) were in a position to approach the pope on behalf of their brethren abroad in case of emergency and to secure his intervention. His policies were presumably followed by succeeding popes.

Scholarship and Literary Activities

It was about this period that the revival of Hebrew studies took place in Italy. The scholars of Rome begin to figure in tenth-century rabbinic sources, which mention with respect talmudic scholarship centered on a local yeshivah Metivta de Mata Romi. The first scholar of note was R. *Kalonymus b. Moses, father of R. *Meshullam b. Kalonymus the Great (second half of the tenth century) who apparently taught in Rome before settling in Lucca; then came R. Jacob “Gaon” of Rome, who headed the yeshivah. Hebrew poetry, following the tradition established in Erez Israel, found one of its principal exponents in *Solomon b. Judah “the Babylonian.” Italian-Hebrew learning reached its climax with R. *Nathan b. Jehiel of Rome whose great talmudic dictionary, the *Arukh*, bears testimony to the wide rabbinic learning and linguistic range of educated Roman Jewry at this time. The Roman Jews received their traditions mainly from Erez Israel, passing them

on in turn to France and Germany. This was the case, in particular, with the liturgical tradition (see *Liturgy) originally called the *Minhag Romi*, later the Italian rite, which with the expansion of Roman Jewry became widely established in Italy and in one or two places overseas and was the parent of the Ashkenazi rite. The formulation of this is associated with the name of R. *Menahem b. Solomon b. Isaac, author of the popular *Midrash Sekhel Tov*.

Learning continued to flourish in Rome in the succeeding centuries, mainly being centered in the ancient Anav (Anav) family, including Zedekiah b. Abraham *Anav (13th century), author of the *Shibbolei ha-Leket*; his brother Benjamin b. Abraham *Anav, physician and talmudist, author of the *Massa Gei Hizzeyyon*; Jehiel b. Jekuthiel *Anav author of the *Ma'lot ha-Middot*; and several others. *Immanuel of Rome (1260–c. 1328) introduced the complexities of the Spanish tradition of Hebrew poetry to Italy, and was also a prolific writer of verse in Italian – probably by no means the only one.

In 1020 the Jews were said to have caused an earthquake in Rome by mocking a crucifix, and a number were savagely punished, but the details are vague and the story may be legendary. On the other hand, from 1130 to 1138 *Anacletus II, a grandson of the converted Roman Jewish capitalist *Pierleoni, was able to maintain his authority for some time as anti-pope because of the support of the Roman populace. *Benjamin of Tudela, who spent some time in Rome c. 1159, found there a community of about 200 whom he described as being of high status and paying no special taxes, some of them being in the papal service; he singled out Jehiel, grandson of the author of the *Arukh*, and mentioned, in addition, half a dozen other scholars whom he considered outstanding. Since Benjamin specifically mentioned that one of them lived in Trastevere, it appears that the Jews now resided on both sides of the river. A building still standing on the right bank of the Tiber is believed to be one of the synagogues in use at this period.

Papal Legislation

The anti-Jewish legislation of the Fourth *Lateran Council (1215) inspired by Pope *Innocent III does not seem to have been strictly enforced in the papal capital. Nevertheless, the record of the community was checkered. There is some evidence that copies of the Talmud were burned here after its condemnation in Paris in 1245 (see *Talmud, Burning of). In 1270 the cemetery was desecrated. The wearing of the Jewish *badge was imposed in 1257 and the city statutes of 1360 ordered male Jews to wear a red tabard, and the women a red petticoat. There was brutal horseplay against the Jews in the carnival period, in the Circo Agonale and Monte Testaccio; this abuse was ended in 1312 when the community agreed to make an annual payment, thereby constituting an unfortunate precedent for special humiliating taxation. In 1295 Pope Boniface VIII set the example abusing the Jewish delegation

which went to congratulate him on his accession. In 1298, R. Elijah de' Pomi[s] was judicially murdered by the Holy Office on a trivial charge. From 1305 to 1378 the papacy was transferred to Avignon and Rome was left for a time to its own devices. When Emperor Henry VII came to Rome in 1312, the Jews went to greet him bearing the Scrolls of the Law, thereby setting a precedent which was long followed. In 1320 orders were sent from Avignon for the expulsion of the Jews from Rome, and although a deputation headed by the prolific poet and translator *Kalonymus b. Kalonymus secured the withdrawal of the decree, it appears that before the news was received Roman Jewry en masse was driven temporarily into exile. In 1322 the Talmud was again burned in Rome in obedience to a papal order.

Pope *Boniface IX (1389–1404), who tried to restore papal authority in the Italian possessions of the Holy See, was on the whole exceptionally tolerant. He favored a succession of Jewish physicians, and in 1402 granted a charter of protection to the Roman community in which their rights as citizens were specifically recognized. His immediate successors, exposed to the legislation of the *Church Councils of Constance and Basle and to the pressure of the *Franciscan friars, were ambivalent in their attitudes. *Martin V (1417–31) authorized the Roman community to distribute part of its financial burden among the other communities of the Papal States, employed Elijah b. Shabbetai as his personal physician, and tried to restore peace in the Roman community by appointing the surgeon Leucio as its responsible head. *Eugenius IV (1431–47) embodied the anti-Jewish legislation of the 19th session of the Council of Constance in a bull of such severity that there seems to have been an exodus of Roman Jews to the marquisate of Mantua. At the moment of crisis the Italian Jewish communities decided to raise an emergency fund in order to back up their efforts to have the bull withdrawn; the community of Rome, however, was ultimately left to shoulder the whole burden, notwithstanding the efforts of its rabbi, the poet-physician Moses da *Rieti. *Nicholas V (1447–55) renewed the former anti-Jewish legislation, and patronized the anti-Jewish activities of John of *Capistrano. In 1450, Capistrano staged a religious disputation in Rome against one Gamaliel, and boasted so overwhelming a victory that he offered the pope a ship in which to transport the remnants of the community overseas. This did not eventuate; but on the accession of Capistrano's pupil *Calixtus III in 1455, a riot took place against the Jewish delegation who, according to custom, came to congratulate him.

The Renaissance Community

The period of the High Renaissance witnessed the heyday of Roman Jewry. The popes were strong enough to resist pressure and more influenced by political motives or cultural interests than by religious preconceptions. Every pope had a Jewish physician in his employment in Rome: outstanding were Samuel Sarfati at the court of Sixtus IV and Bonet de

*Lattes as that of *Leo x. Whereas elsewhere in Italy Jewish loan-bankers were admitted only on a contractual basis, in Rome the number was not limited. However, the majority of the community consisted of craftsmen. A professional census taken in 1527 reveals that 44 Jewish householders out of the 104 whose callings were indicated engaged in various branches of the clothing industry. In 1541 the Jewish and non-Jewish tailors' guilds came to an agreement for the regulation of their activities, so as to avoid competition.

David *Reuveni was magnificently greeted and received when he came to Rome in 1524, even by Pope Clement VII, who was greatly impressed also by Solomon *Molcho and extended barely credible protection to him. In 1524, under the auspices of the same pope, Daniel da *Pisa, a member of the famous Tuscan banking family then living in Rome, drew up a new intercongregational constitution for the Roman Jewish community at large.

Cardinal *Egidio da Viterbo (c. 1465–1532) had a profound interest in the Kabbalah, a considerable knowledge of Hebrew, and maintained Elijah *Levita in his home as his Hebrew tutor. Jacob *Mantino, personal physician to Paul III, was nominated lecturer in medicine in the Sapienza in Rome in 1539 – one of the very few authenticated instances of a Jew holding an academic appointment before the age of Emancipation.

The expulsion from the Spanish dominions in 1492 brought a large body of refugees to Rome who were reluctantly received by the native community, nervous for their own position. Henceforth, by the side of the communities following the indigenous Roman liturgy, there were also synagogues according to the Aragonese, Castilian, Catalanian, and Sicilian liturgical traditions, and for a time also French and Ashkenazi synagogues.

The Counter-Reformation and the Ghetto Period

The entire tenor of Roman Jewish life suddenly changed for the worse with the Counter-Reformation. In 1542 a tribunal of the Holy Office on the Spanish model was set up in Rome and in 1553 Cornelio da Montalcino, a Franciscan friar who had embraced Judaism, was burned alive on the Campo dei Fiori. In 1543 a home for converted Jews (House of *Catechumens), later to be the scene of many tragic episodes, was established, a good part of the burden of upkeep being imposed on the Jews themselves.

On Rosh Ha-Shanah (September 4) 1553 the Talmud with many more Hebrew books was committed to the flames after official condemnation. From now on, notwithstanding occasional periods of relaxation at the outset, talmudic literature as a whole was banned in Rome, with disastrous consequences on Roman Jewish intellectual life. Most of this anti-Jewish action was inspired by Cardinal Caraffa, the embodiment of the spirit of the Counter-Reformation, who became Pope *Paul IV on May 23, 1555. Shortly afterward, he issued his bull *Cum nimis absurdum* (July 12, 1555) which reenacted remorse-

lessly against the Jews all the restrictive ecclesiastical legislation hitherto only intermittently enforced. This comprised the segregation of the Jews in a special quarter, henceforth called the *ghetto; the wearing of the Jewish badge, now specified as a yellow hat in the case of the men, a yellow kerchief in the case of the women; prohibitions on owning real estate, on being called by any title of respect such as signor, on the employment by Christians of Jewish physicians, and on dealing in corn or other necessities of life; and virtual restriction to dealing in old clothes and second-hand goods. This initiated the ghetto period in Rome, and continued to govern the life of Roman Jewry for more than 300 years.

There were periods of relaxation e.g., in the pontificate of Pius IV (1559–65) and of Sixtus V (1585–90). On the other hand, Pius V (1566–72) not only renewed the severity of the system, but by his bull *Hebraeorum gens* of 1569 excluded the Jews from the cities of the Papal States, except Rome and Ancona; a good part of their population took refuge in Rome, where Di Capua, Di Segni, Tivoli, Terracina, Tagliacozzo, Recanati, and so on, commemorating their former places of residence, became characteristic surnames. Similarly, *Gregory XIII (1572–85) renewed and regulated the iniquitous system of the conversionist sermon, henceforth usual in Rome for many generations (see *Sermons to Jews). Whereas before the mid-16th century the Roman Jewish community had probably enjoyed more favorable circumstances than that of almost any other city in Italy and perhaps in Europe, from now on, in the age of the ghetto, the reverse was the case.

The area chosen for the Roman ghetto was a low-lying dank site on the left bank of the Tiber, subject to intermittent flooding and therefore highly insalubrious. The total Jewish population, which at its peak probably exceeded 5,000 – the highest in any city in Italy – was crowded in this circumscribed area. The rapacity of gentile landlords was, however, to some extent mitigated by the development among the Jews of the *jus gazaga* or proprietary right on houses, recognized also by the non-Jewish authorities. Originally the ghetto was supposed to have only a single entrance, but this was found impracticable and ultimately there were several. However, at night, on major Christian holidays, and in the Easter period, from Holy Thursday to the Saturday, the gates were closed and no Jew was allowed out of the quarter. The bull of 1555 permitted the Jews only one synagogue: this was, however, evaded by having five synagogues (or *Scuole*) according to the different rites under a single roof.

Among themselves the Jews, as elsewhere in Italy, spoke a *Judeo-Italian dialect, retaining old local forms and incorporating Hebrew or Spanish terms and written generally in Hebrew characters. The Jewish loan banks were finally suppressed in 1682; henceforth the occupation of the vast majority of Roman Jews was dealing in old clothes and second-hand goods, for which purpose they perambulated amid insults and contempt in all the quarters of the city. There were also a few tailors and petty shop-

Jewish population of Rome

Year/Period	Population
Late Roman	10,000
1159	200
16 th cent.	5,000
1682	1,750
18 th cent.	6,000
1873	4,880
1886	5,600
1910	10,000
1936	13,000
1943	10,000
1948	11,000
1965	12,928
2005	18,000

keepers and a very small number of better-established merchants.

Occasional raids were made as late as the 18th century on the ghetto to ensure that the Jews did not possess any “forbidden” books – that is, in effect, any literature other than the Bible, liturgy, and carefully expurgated ritual codes. Each Saturday selected members of the community were compelled to go to a neighboring church to listen to conversionist sermons, running the gauntlet of the insults of the populace. In some reactionary interludes, the yellow Jewish hat had to be worn even inside the ghetto. Pressure was placed on the Jews to become converted, and it was forbidden for a Jew to pass under the windows of the House of Catechumens lest he should attempt to communicate with any of the occupants. Kidnapping children for the purpose of baptism was retroactively endorsed as valid, and thereby encouraged. At the carnival season Jews had to participate in a foot race down the Corso, amid the jeering of the crowd. Each new pope was humbly greeted near the Arch of Titus by a delegation of the elders of the community who presented him with a *Sefer Torah*, which he returned to them with contumely. The Jews were not allowed to sing psalms or dirges when they escorted their dead to the traditional burial place on the Aventine hill nor to erect tombstones over their graves. It is not remarkable that in the age of the ghetto there were few scholars or communal leaders of any distinction, the case of the courageous and erudite Tranquillo Vita *Corcos (1660–1730) being exceptional.

The popes, in accordance with their former humane tradition, still indeed protected the Jews against such accusations as the *blood libel, which was virtually unknown in Rome; but in other respects the lot of the Roman Jews was increasingly pitiable. The *Editto sopra gli Ebrei* (1775) of Pope Pius VI reiterated all of the previous restrictions with accumulated humiliations, down to the last detail. When in 1783 two orphans were kidnapped for baptism on the demand of a remote relative who had been converted, there was a veritable revolt in the ghetto, followed by widespread arrests. A

petition presented to the pope imploring for some alleviation in conditions, supported by a memorandum presented by 12 courageous Christian advocates, proved fruitless. The leaders of the community now canvassed the possibility of organizing systematic emigration to some less bigoted land such as England.

Freedom, Reaction, and Eventual Emancipation

When the reactions of the French Revolution reached Rome, there were widespread arrests among the Jews, and in January 1793 the ghetto narrowly escaped total sack – a providential deliverance thereafter commemorated by an annual celebration. On Feb. 21, 1798 the occupying French forces proclaimed equality for the Jews, but with the subsequent changes of regime, conditions remained precarious until 1809, when Rome was annexed to the Napoleonic Empire, and a *consistory on the French model was set up in 1811. However, in 1814 the rule of the popes was reestablished and from then on the ghetto and the restrictive practices of the ghetto period were once again enforced, excepting only the enforcement of the wearing of the Jewish badge. With the election of Pope Leo XII in 1823, conditions became grimmer still. Jews who had opened shops outside the ghetto had to close them, attendance at conversionist sermons again became compulsory, Jews were forbidden to employ Christians even to light fires for them on the Sabbath, and enforced baptisms again became common. On the accession of Pius IX in 1846, the gates and walls of the ghetto were removed, but thereafter the once-kindly pope turned reactionary and relentlessly enforced anti-Jewish restrictions until the end. During the Roman Republic of 1849, under Mazzini, Jews participated in public life, and three were elected to the short-lived Constituent Assembly; but within five months the papal reactionary rule was reestablished to last, without any perceptible liberalization, until the capture of Rome by the forces of united Italy in 1870. On October 13 a royal decree abolished all religious disabilities from which citizens of the new capital had formerly suffered, and the Jews of Rome were henceforth on the same legal footing as their fellow Romans.

Released prisoners obviously could not recover overnight from the legacy of the long centuries of ghetto humiliation. Some of the more gifted naturally were now able to find a proper outlet for their talents, and, in addition, the capital of united Italy attracted ambitious Jews from other cities who entered into government service, commerce, and industry. Many of the erstwhile peddlers became shopkeepers and even antique dealers. Thus a new sort of society began to be formed at the apex of the Jewish community, strongly affected, however, as in other cases, by assimilation and indifference. But still the bulk of the Roman Jewish community remained street merchants, familiar figures in the thoroughfares and on the steps of the ancient monuments, as they had been ever since classical times. Hence demographically the Roman Jewish community remained the healthiest in Italy. While other historic Jewish centers diminished through emigration, and

those who remained barely maintained their numbers, Rome was increased both by immigration and by the vigorous state of its Jewish proletariat – the only one remaining in Italian Jewry which could be so designated.

Yet in other respects the progress of Roman Jewry was slow, notwithstanding all efforts. The city corporation took the lead in destroying the old ghetto quarter, a magnificent new synagogue with an organ being built on the site in 1900–04 to replace the old *Cinque Scuole* (“Five Synagogues”) which were accidentally burned around this time. After a succession of rabbis brought from the Levant (Judah de Leon (Leoni di Leone), 1796–1830; Israel Moses *Hazzan, 1847–52) and even vacancies in the office, the Italian-trained Moses Ehrenreich was appointed in 1890; he was succeeded by Ḥayyim *Castiglioni (1903–11), one of the last of the Italian school of Hebrew poets, and he in turn by the courageous Angelo *Sacerdoti (1912–34). In 1887–1904 an unsuccessful attempt was made to reestablish in Rome the once-distinguished rabbinical seminary of Padua (see *Collegio Rabbinico Italiano); it was to return to Rome definitely on a more secure basis in 1930 after a brilliant interlude in Florence. But it was only during the period after World War I, with the remarkable development of Rome itself, that Roman Jewry may be said to have regained the primacy in Italian Jewish life which it had enjoyed in the remote past.

[Cecil Roth]

Hebrew Printing

In the opinion of most scholars nine or ten *incunabula printed in square type without date or place-name, probably before 1480, should be ascribed to Rome. Among them are the Pentateuch commentaries of Rashi and Naḥmanides, Maimonides' Code *Mishneh Torah* and *Guide of the Perplexed*; Nathan b. Jehiel's *Arukh*, Moses b. Jacob of Coucy's *Sefer Mitzvot Gadol*, Solomon b. Abraham Adret's responsa, Levi b. Gershom's commentary to Daniel, and David Kimḥi's *Shorashim*. Only one Hebrew Press was licensed in Rome in the 16th century, and few Hebrew books were brought out by non-Jewish printing houses. The one Jewish press was run by Elijah Levita who, with the help of the three sons of his kinsman Avigdor Ashkenazi Kaṣav and under a papal privilege, printed here in 1518 three of his grammatical works. Around 1508 a prayer book was produced by J. Mazzochi and perhaps a Hebrew grammar a few years later. Between 1540 and 1547 Samuel Sarfati, Isaac b. Immanuel de Lattes in partnership with Benjamin b. Joseph d'Arignano, and Solomon b. Isaac of Lisbon printed a number of works with Antonio Bladao. Among them were Hebrew grammars by David ibn Yaḥya, then rabbi in Naples, and David Kimḥi: the *Mahalakh*; responsa by Nissim b. Reuben Gerondi, and smaller works. Between 1578 and 1581, Francesco Zanetti, with the help of Levita's baptized grandson Giovanni Battista *Eliano, printed editions of Genesis, the Five Scrolls, and Psalms. Owing to the reactionary atmosphere which henceforth prevailed in Rome in the 17th century, only some missionary tracts in Hebrew

were printed in Rome, and in 1773 a Psalter for non-Jewish use with an Italian translation by Ceruti.

Holocaust Period

A few days after the Germans occupied Rome on September 9–10, 1943, ss Chief Heinrich *Himmler ordered immediate preparations for the arrest and deportation of all Jews in Rome and the vicinity – more than 10,000 persons. As a first step, ss Major (soon to be Lieutenant Colonel) Herbert Kappler, the ss commanding officer in Rome, demanded 50 kilograms of gold from the Jewish community on September 26, to be paid within 36 hours. Otherwise, he informed the community, 200 Jews would be arrested and deported to Germany. The Jews collected the gold, with some help from sympathetic non-Jews, and delivered it on time. Nevertheless, a special German police force broke into the offices of the Jewish community on September 29 and looted the ancient and contemporary archives, seizing, among other things, lists of members and contributors. On October 13, the Germans returned to loot the priceless libraries of the community and the rabbinical college.

Most Roman Jews were still not alarmed enough to go into hiding. Many were confident that the presence of the pope in the city would protect them, since the Germans would not dare take anti-Jewish actions under his windows. Moreover, the Jews lacked any precise information about Nazi death camps. Although they listened illegally to the BBC, it did not broadcast any specific news on that subject. The Jews also believed that the ongoing diplomatic discussions of Rome's status as an open city would save them from hostile Nazi actions.

On October 16, 1943, German ss police under Kappler and ss Captain Theodor Dannecker launched a massive roundup of the Jews of Rome. Provided with carefully prepared lists of names and addresses, the police made house-to-house searches throughout the city and arrested all the Jews they could find. Some of the non-Jewish population helped Jews escape, but 1,259 men, women, and children were nevertheless caught and held for two days at the Collegio Militare in Lungara Street. About 252 of them were released because they were the children or spouses of mixed marriages, foreigners from neutral countries, or non-Jews arrested by mistake. The remaining 1,007 Jews were deported to Auschwitz on October 18. Only 17 of them survived.

On the morning of October 16, Pope *Pius XII received Princess Enza Pignatelli, who informed him of the ongoing roundup. He immediately asked the Vatican Secretary of State Cardinal Luigi Maglione to summon the German ambassador to the Holy See, Ernst von Weizsaecker. Maglione met with the ambassador that same day and asked him to stop the arrests of Jews in order that the pope not be obliged to protest. The ambassador replied that for the sake of good relations between Germany and the Holy See, he preferred not to convey Maglione and the pope's threat of a protest to Berlin. Maglione accepted this. Jews continued to be arrested and deported. Pius XII never protested publicly.

Between October 16, 1943, and June 4, 1944, the day of the liberation of Rome, the methodical roundup of Jews hiding in the homes of non-Jewish friends or in Catholic institutions continued. In this latter period, perhaps as many as 1,200 additional Jews were caught and deported to Auschwitz, where most of them died. Another 75 Jews were among the 335 prisoners executed in the Fosse Ardeatine, outside Rome, as a German reprisal measure for an Italian partisan action in the via Rasella on March 23, 1944, in which 33 German soldiers were killed.

Some 4,000 individual Jews are believed to have hidden in Catholic institutions in Rome, including Vatican properties. A small number were sheltered behind the walls of Vatican City itself. There is no evidence that Pius XII or his chief advisors gave instructions for this rescue effort, or even knew its extent.

[Daniel Carpi / Sergio Itzhak Minerbi (2nd ed.)]

Contemporary Period

When the Allies entered Rome on June 5, 1944, the Jewish population numbered 11,000. That same day a solemn prayer that united the Roman Jews who had survived a year of terror and the Jews serving in the U.S. 5th Army, was led by Rabbi David Panzieri in the small synagogue of the Tiberine Island, which had been used clandestinely during the German occupation. An unknown future faced the community. The chief rabbi, Italo *Zolli, who had abandoned his flock during the war to find a haven in the Vatican, converted to Catholicism. Only in 1946 did Rabbi David *Prato take the place of the apostate rabbi. Under his firm leadership the Jewish community of Rome could look to a better future. Moreover, Jewish units from Palestine assisted the community. Rabbi Prato sponsored a moving ceremony the day the State of Israel was proclaimed on May 14, 1948, under the Arch of Titus. From that moment on, for the Jews to pass under the arch that symbolized the Diaspora was no longer a humiliation. In the following years the community grew due mainly to the natural increase. In 1953 Elio Toaff succeeded Prato as chief rabbi of Rome and Italy. From 1956 to 1967, after the *Six-Day War, about 3,000 Jews arrived from Libya. Some of them subsequently immigrated to Israel but the majority was absorbed by the community. In 1965 the Jewish community reached a total of 12,928 (out of a total of 2,500,000 inhabitants).

The geographic distribution of the community is still influenced by the continued existence of the traditional ghetto in the S. Angelo district and adjoining parts of the city, although there is a growing movement to the outlying residential areas. The community of Rome is the only one in Italy that shows a demographic increase, with a fertility rate not far below that of the Italian population as a whole, a fairly high marriage rate, and a limited proportion of mixed marriages. Occupational changes from the traditional fields to new technical specializations and to the free professions were rather slow but by the year 2000 it could be considered accomplished. A very serious episode of antisemitism dark-

ened the life of the community on October 19, 1982, when Palestinian terrorists opened fire on worshipers leaving the Great Synagogue. A child, Stefano Tache, was killed and others were wounded. On April 13, 1986, Pope *John Paul II visited the Great Synagogue, and was welcomed by Chief Rabbi Toaff.

In the early 21st century the community numbered about 18,000 Jews, still tied by strong bonds of affection to Jewish traditions. The chief rabbi of Rome and Italy was Riccardo Di Segni. Apart from the Great Synagogue of Italian rite, the Lungotevere Cenci houses a Sephardi synagogue and the Jewish Museum, and there are another two prayer houses of Italian rite, one on the Tiberine Island, the other, the Oratorio Di Castro, in Via Balbo. An Ashkenazi synagogue is located in the same building. Among the Jewish institutions there is a kindergarten, the Vittorio Polacco elementary school, and a high school. There are many relief organizations, the Pitigliani orphanage, a Jewish hospital, and a home for invalids. Rome is the seat of the chief rabbinate of the Union of the Italian Jewish Communities (UCEI), and of the Italian Rabbinical College. The following Jewish journals are published: *Israël*, *Shalom*, *Karnenu*, *Portico d'Ottavia*.

ROME, DAVID (1910–1996), Canadian historian. Rome was born in Vilna, Lithuania. From his first experiences in Canada the 11-year-old was, in his words, “thrown into Canadian Jewish history” as, due to a sudden change in Canada’s Immigration Law, boatloads of Jewish immigrants in the fall of 1921 were detained in the Halifax immigration sheds. The four members of the Rome family finally arrived in Vancouver in December 1921.

Rome obtained a B.A. in English literature at the University of British Columbia in 1936 while working as editor for the *Jewish Western Bulletin*. After studying literature at the University of Seattle in Washington between 1936 and 1938, he obtained a degree in library science from McGill University (1939) and in English literature from the Université de Montréal (1962).

Upon his initial arrival in Montreal, which he later made his home, Rome was the national director of the Labor Zionist organization from 1939 to 1940. Following a two-year stint in Toronto as editor of the *Daily Hebrew Journal*, Rome returned definitively to Montreal in 1942, joining the Canadian Jewish Congress as press officer and editor of the *Congress Bulletin*. He also served as secretary of the Committee for Jewish-French-Canadian Relations from 1942 to 1953, beginning what became an enduring commitment to English-French and Christian-Jewish dialogue. During his early years at CJC he worked with many of the shapers of the Canadian Jewish community: Samuel *Bronfman and Saul *Hayes, H.M. *Caiserman and Louis *Rosenberg. During those years he became something of a spokesman and representative for the Canadian Jewish community, even ghostwriting for CJC’s general secretary H.M. Caiserman and other community figures.

From 1953 to 1972, Rome enjoyed a more public role, for which he is remembered by many, as director of the Montreal Jewish Public Library. During these years, he also lectured in the Department of Religion at the forerunner of the current Concordia University in Montreal. He then returned to CJC in 1973 to become the archivist and later historian of the organization. In his later years, he was officially honored on several occasions, receiving CJC’s H.M. Caiserman Award in 1980, being invested as a Knight in the Order of Québec in 1987, followed by the Prix d’excellence award by Government of Quebec Ministry of Cultural Communities and Immigration in April 1991, and an Honorary Doctorate of Laws by Concordia University, in June 1991.

David Rome is the author of *Les Juifs du Québec, bibliographie rétrospective annotée*, with Judith Nefsky and P. Obermeir (1979), co-author with Jacques Langlais of *Les Juifs et les québécois français: 200 ans d’histoire commune* (1986) (Eng., 1991), and *The Stones that Speak/ Les pierres qui parlent* (1992). Between 1974 and 1994, he authored over 60 monographs on Canadian Jewish history, in the *Canadian Jewish Archives, New Series* and *Clouds in the Thirties, On Anti-Semitism in Canada (1929–1939)*. His last years were devoted to the compilation and translation of articles from Canadian Yiddish sources.

From his desk at the National Archives of CJC, David Rome continued until his 1994 retirement, and indeed, despite failing health, until the end of his days, to instruct and to absorb the experience of Canadian Jewish history in a changing society.

[Janice Rosen (2nd ed.)]

ROMM, family of printers and publishers in Vilna. In 1789 BARUCH B. JOSEPH (d. 1803) received permission to establish a press in Grodno. He opened a second plant in Vilna in 1799. After his death, his son MENAHEM MANNES (d. 1841), directed the operation and between 1835 and 1854 published an edition of the Babylonian Talmud. This caused a dispute with a press operated by the Shapiro family of Ḥasidic rab-

bis in Slavuta and more than a hundred rabbis were involved in the resulting litigation. In 1836 the Russian government closed all but two Jewish printing houses, the Romm plant being the only one left in all of Lithuania and Belorussia. In 1841 the plant burned down. JOSEPH REUBEN and his son DAVID headed the company from 1841 to 1862. After their deaths, David Romm's widow DEBORAH (d. 1903) headed the company, together with her two brothers-in-law. This is the origin of the name of the company, which came to be known as "Defus ha-Almanah ve-ha-Aḥim Romm" (The Press of the Widow and Romm Brothers). The firm prospered from 1867 to 1888 under the leadership of its literary director, the Hebrew writer Samuel Shraga Feiginsohn (known as שפ"ן הסופר). Modern presses were installed, rights to various manuscripts purchased, many reprints were published, and painstaking editorship prevailed. Most of the firm's income came from the publication of religious works in editions of tens of thousands of copies. Among the more important publications was the Babylonian Talmud with over a hundred commentaries and addenda ("The Vilna Shas," first ed., 1880–86). Romm also published popular works in Yiddish, such as the books of I.M. *Dick, *Shomer, and Haskalah works.

After the death of Deborah Romm, the firm declined. The heirs were not interested in running it and Feiginsohn was reinstated as director. He remained with the firm even after it was sold to Baron D. *Guenzburg in 1910 and resold several years later to the firm of Noah Gordon and Ḥaim Cohen. During this period, a complete edition of the Jerusalem Talmud was published. The Romm Press continued in Vilna until 1940. With the Soviet conquest, the plant was confiscated and turned into a Russian-Lithuanian printing house.

[Yehuda Slutsky]

ROMNY, city in Sumy district, Ukraine. The beginnings of a Jewish community date from the 18th century. In 1803 there were 127 Jews in the town, and in 1847 the Jews numbered 759. The community developed rapidly after the opening of the Romny-Libava railway line (1874), which became one of the important trade arteries of western Russia. From 1863 to 1901, Eliezer Arlosoroff served as the local rabbi. Tensions arising from economic competition between Jews and Christians resulted in pogroms in 1881 and, most seriously, on October 19–20, 1905, when 8 Jews were killed and 30 injured. In 1897 there were 6,378 Jews in Romny (28.3 percent of the total population); on the eve of World War I the number was estimated at 13,400 (43 percent of the total population). During the war, thousands of refugees from the battle areas fled to Romny. In 1919 *Denikin's troops organized a pogrom with loss of Jewish life and property. Under the Soviet regime, Romny declined economically; many Jews went to work in textile factories and on the railway. By 1926 the

number of Jews had declined to 8,593 (about 33 percent of the population) and dropped further to 3,834 in 1939 (15 percent of the total population). Jewish public life was stifled. Romny was occupied by the Germans on September 10, 1941. In early November they concentrated the Jews in army barracks, and on November 19 they murdered 3,000 Jews, and by January 1942 they had killed another 700. In 1959 there were about 1,100 Jews (about 3 percent of the total population) living in Romny. Romny was the native town of P. *Rutenberg and Ch. *Arlosoroff. During the Second *Aliyah period, the "Romny Group," associated with Trumpeldor, which figured in the early development of the kibbutz movement in Palestine, was organized in the city.

[Yehuda Slutsky / Shmuel Spector (2nd ed.)]

RONA, PETER (1871–1945), biochemist. Rona was born in Budapest, Hungary, and from 1906 worked at the City Hospital in Berlin. From 1922 until the coming of the Nazis in 1933, he was professor of medicinal chemistry at the University of Berlin and director of the chemical department of the Pathological Institute, and consultant to the Charité Hospital. In 1935 he went to Budapest. In 1944 he was under the protection of the Swedish Embassy there, but he died in early 1945, probably murdered by the Nazis.

He contributed papers to scientific journals, dealing with blood serum, alkaloids, adsorption, enzymes, poisons, and sugars. From 1920 to 1935 he was the editor of *Berichte ueber die gesamte Physiologie und experimentelle Pharmakologie*, and from 1923 to 1924 of a parallel *Jahresberichte*. He was author of *Praktikum der physiologischen Chemie*, 3 vols. (1929–31), and of *Praktikum der physikalischen Chemie insbesondere der Kolloidchemie fuer Mediziner und Biologen* (1930).

[Samuel Aaron Miller]

RÓNAI, JÁNOS (1849–1919), first head of the Zionist movement in Hungary. Born in Alba-Iulia, Transylvania, he worked as a lawyer in Fogaras and Balazsfalva. Rónai wrote a book against the antisemitic movement in Hungary, led by the member of parliament G. *Istóczy, entitled *Kosmopolitismus és Nationalismus különös tekintettel a zsidóság jelenkori állására* ("Cosmopolitanism and Nationalism with Special Consideration of the Jewish Situation in Our Time," 1875), in which he justified Jewish national consciousness and the need to preserve it. In 1897, before the First Zionist Congress convened in Basle, he published *Zion und Ungarn*, a polemical book against the opponents of Zionism. He took part in that Congress and spoke there on the situation of the Jews of Hungary, warning against the swelling reaction and anti-semitism in spite of the existing liberal regime. He founded

Zionist associations in Hungary and Transylvania and was persecuted by the government, which sought the assimilation of the Jews for political reasons. In the Zionist Conference of Hungary held in 1902 in Pressburg (Bratislava) with Herzl as chairman, Rónai was chosen the first chairman of the Zionist Organization in Hungary and later became its honorary president. He published articles in *Die Welt* and in the Hungarian press.

RONLY-RIKLIS, SHALOM (1922–1994), Israeli conductor. Born in Tel Aviv, Ronly-Riklis studied piano under Vincze-Kraus at the Rubin Academy of Music at Tel Aviv University. He took conducting courses with Igor Markevich in Salzburg from 1953 to 1956. He played the horn in the orchestra of the Jewish Brigade during World War II and built up the Israel Defense Forces Orchestra which he conducted until 1960. From 1957, he conducted the Gadna Youth Orchestra, taking it on tour to Holland and both Americas. From 1961 to 1971, he was director of the Kol Israeli Orchestra, Jerusalem, and in 1971 became artistic coordinator of the Israel Philharmonic Orchestra. He was sent by the Foreign Ministry to Singapore to form a national symphony orchestra there. Ronly-Riklis conducted many Israeli orchestras as well as others abroad. He again conducted the Jerusalem Symphony Orchestra and the Israel Young Philharmonic Orchestra from 1984 to 1988. From 1970, he was head of the orchestra department at the Rubin Academy of Music at Tel Aviv University. Ronly-Riklis recorded with several orchestras, including the Israel Kibbutz Chamber Orchestra and the Tasmanian Symphony Orchestra.

[Uri (Erich) Toeplitz and Yohanan Boehm / Israela Stein (2nd ed.)]

°ROOSEVELT, FRANKLIN DELANO (1882–1945), 32nd president of the United States. As governor of New York (1928–32), Roosevelt's strong advocacy of old-age pensions endeared him to the Jewish community which shared with him an overriding commitment to the welfare state. His election to the presidency in 1932 was followed by a deluge of liberal New Deal legislation. His overwhelming victory in 1936 included the support of the vast majority of Jews. In the elections of 1940 and 1944 Roosevelt lost much of his earlier support from ethnic groups, but American Jews delivered over 90% of their votes to him. Jewish loyalty to the New Deal was reciprocated. Roosevelt maintained close liaison with Rabbi Stephen Wise. An unprecedented number of Jews were appointed to high positions within his administration. The pejorative epithet "Jew Deal" became popular among antisemitic elements.

The verve characteristic of Roosevelt's early reform program was little in evidence in response to the foreign problems of the 1930s. In October 1937, he attempted to probe isolationist strength by delivering his "quarantine the aggres-

sors" address, but adverse reaction may partly account for his subsequent reluctance to lead public opinion toward a firmer posture against the Axis. The Japanese attack on Pearl Harbor ultimately solved Roosevelt's dilemma. Roosevelt openly detested Nazism and recalled Ambassador Wilson from Germany in protest at the November 1938 pogroms. He felt unable, however, to admit more refugees being restricted by existing law and public opinion. In March 1938 he called a conference on refugees to meet at Evian les Bains (see *Evian Conference) to bring order into the chaos caused by Nazi policy and worldwide immigration restrictions, but he accepted British requests not to discuss Palestine as a haven there or later at the *Bermuda Conference of 1943. During World War II Roosevelt, as the ally of Great Britain which administered Palestine, would not act against British policy there, thus possibly also alienating Arab leaders, on whose neutrality the Allies counted. He unsuccessfully attempted to promote some settlement of the Palestine question favorable to Jews and acceptable to Arab leaders, principally King Ibn Saud of Saudi Arabia. Later he assured the Arabs that they would be consulted before any decision on Palestine was reached. The President also issued various pro-Zionist statements to American Jews, particularly before the 1944 elections.

Roosevelt's response to the Holocaust was similarly cautious, and he used the State Department as a foil against agitation directed toward himself on this subject. In January 1944, after Secretary of the Treasury Henry Morgenthau Jr. presented conclusive evidence that the State Department was sabotaging rescue efforts, he established the War Refugee Board with special powers to quicken rescue work. However, it came on the scene too late to save the major part of European Jewry.

[Henry L. Feingold]

His wife was ANNA ELEANOR (1884–1962), U.S. diplomat, humanitarian, and author. She became active in the Democratic Party in the 1920s and remained politically active until her death. A prominent international figure, Mrs. Roosevelt served as U.S. representative to the United Nations General Assembly from 1945 to 1952 and as a delegate in 1961. In 1946 she was elected chairman of the United Nations Commission on Human Rights, serving until 1953. She defended minority groups against discrimination and received numerous awards for her humanitarianism. An outspoken advocate of a Jewish state in Palestine, she opposed the U.S. embargo of arms shipped to Israel during the 1948 War of Independence and urged the U.S. to support Israel during the 1956 Sinai campaign with defensive arms and diplomatically. Mrs. Roosevelt was a patron of *Youth Aliyah. In her *India and the Awakening East* (1954), she recorded her visit to the Middle East, during which she was impressed with the Israel spirit of dedication and purpose.

Steinberg, *Mrs. R.: The Life of Eleanor Roosevelt* (1958).

°**ROOSEVELT, THEODORE** (1858–1919), 26th president of the United States, 1901–09. During his early career, Roosevelt shared the disdain of his class for the Jewish mass immigration then arriving at Ellis Island. This bias gradually disappeared as Roosevelt came to understand the hardships of ghetto life during his political service in New York as Governor of New York State. His respect for Jewish valor was increased by the performance of 17 Jewish Rough Riders under his command during the Spanish-American War. The president's acquaintance with "uptown" Jews was an intimate one and many of these wealthy Republicans followed his progressive leadership even to the point of supporting Roosevelt's 1912 Bull Moose revolt. During the neutrality period of World War I, Roosevelt denounced "hyphenated Americans," but he understood that Jews retained fewer Old World loyalties than other ethnic groups.

Roosevelt had more personal contact with Jews than any previous president. He appointed the first Jew (Oscar S. Straus) to the Cabinet, and William Loeb served as his private secretary. In his closing years he supported the Balfour Declaration despite the fact that this stand aligned him with his political archfoe, President Wilson.

[Selig Adler]

ROP CZYCE (Yid. **Ropshits**), town in Rzeszow province, S.E. Poland; in the period between the two world wars in Cracow province, W. Galicia. Jews settled in the town soon after its foundation. King Sigismund III Vasa (1587–1632), complying with the demands of the townsmen who wanted to remove Jewish competition, prohibited Jews from residing in Ropczyce, excepting those who leased the crown taxes. The prohibition was annulled by King John II Casimir in 1662, and subsequently Jews again settled in Ropczyce, numbering 663 by 1765. During the 19th century the Jewish population increased, by 1909 numbering 1,054 (29.4% of the total population). It decreased during World War I and had dwindled to 311 (10%) in 1921. At the beginning of the 19th century, Ḥasidism had a strong influence in the community. The celebrated *Zaddik*, Naphtali Zevi (*Ropshitzer), established his "court" in Ropczyce. A report of the head of the police in *Lvov (1827) mentions Rabbi Asher of Ropczyce, and also states that the influence of Ḥasidism had diminished.

[Shimshon Leib Kirshenboim]

Holocaust Period

On Sept. 7, 1939, Ropczyce was occupied by the Germans. They immediately set fire to the synagogues including their Torah scrolls, and proceeded to confiscate Jewish property, deny Jews the rights of citizens, and send them to forced labor. In the

spring of 1942 some of the Jewish males were transferred to the Pustkow labor camp. On June 22, 1942, a ghetto was established in Ropczyce where the Jews suffered from overcrowding, hunger, and disease. On July 2, 1942, they were deported. The aged and sick were shot near the city, and the others sent to the *Belzec death camp.

[Aharon Weiss]

ROPSHITSER (of **Ropczyce**), **NAPHTALI ZEVI** (1760–1827), Ḥasidic *Zaddik*, and founder of Ḥasidic dynasties. A participant in the "holy company" whose mentor was *Elimielech of Lyzhansk, Naphtali Zevi was one of the main leaders of Ḥasidism in Galicia after the death of *Jacob Isaac ha-Ḥozeh (the Seer) of Lublin (1815); he is also considered as a pupil of Israel, the *Maggid* of *Kozienice and Menahem Mendel *Rymanower. Recollections of him were preserved only in folktales and stories which drew as much on imagination as truth. His admirers perceived esoteric and symbolic allusions in his every word and deed. According to Ḥasidic tradition, Naphtali Zevi feared that the rise of Napoleon would have bad effects for the Jews of Poland, such as military service, attendance at gentile schools, and the spread of unbelief, while his teacher Menahem Mendel held that Napoleon's victory would bring them deliverance.

His works are *Ohel Naftali* (1910), a collection of his talks and stories about him; *Ayyalah Sheluḥah* (1862), a commentary on Genesis and Exodus; and *Zeta Kodesh* (1868), sermons on the Pentateuch and for the festivals.

His son ELIEZER OF DZIECKOWITZ (Dzikow; d. 1861), his disciple and successor, was a colleague of Issachar Baer *Radoshitzer and Hirsch *Rymanower. In his last days he cut himself off from almost all contact with his Ḥasidim. Naphtali Zevi's other son, JACOB OF MALITSCH (d. 1839), officiated as a rabbi in Kolbuszowa and Malitsch and from 1827 became a *Zaddik*. By virtue of the miracles ascribed to him, he was known as the "Little Ba'al Shem Tov."

[Esther (Zweig) Liebes]

ROSALES, JACOB (first half of 16th century), Portuguese merchant and shipowner who, after the expulsion of the Jews from *Portugal (1497), went to *Morocco. Rosales shipped imported textiles and resins from *India for varnish, mainly to Larache and *Salé-Rabat, the large port of the kingdom of *Fez. His commercial house in *Lisbon was well known. After the expulsion he probably lived in Fez. The court of Fez benefited from Rosales' commercial affairs and he maintained good relations with the court of John III of Portugal. When Moulay Ali ben-Hassan became sultan in May 1526, he invited Rosales to take up his residence in *Meknès. Rosales used his influence to protect his coreligionists and the Megorashim (exiles from the Iberian Peninsula) regarded him as their

leader. When, in September 1526, Moulay Ahmad dethroned his uncle Moulay Ali ben-Hassan and assumed the sultanate at Fez, he chose Rosales as his confidant. From then onward, Rosales was entrusted almost exclusively with political relations with the Christian world and was sent officially to Portugal in 1529. Rosales appears to have been the initiator of diplomatic relations between Morocco and *France. Pierre de Piton, the French ambassador, arrived in Morocco with a shipment of Jewish books for the community (such consignments were absolutely prohibited by the Church and this breach was like providing the enemies of Christianity with weapons). In 1534 the sultan entrusted Rosales with opening important negotiations with John III; he was in charge of the negotiations in Portugal for two years; they led to the signing of a peace treaty on May 8, 1538, at Arzila. In the meantime Rosales died, probably in Portugal. His successor as counselor, ambassador, and foreign minister was Jacob (I) *Rote.

[David Corcos]

ROSALES, JACOB HEBRAEUS (Immanuel Bocarro Frances; c. 1588–c. 1668), Portuguese physician, astronomer, astrologer and poet. Born in Lisbon, Rosales was the son of a Marrano physician (Ferdinand Bocarro) and member of a family that included the poets Jacob *Frances and Joseph Frances. He studied medicine, mathematics and classical languages at Montpellier, after which he returned to Lisbon, where he attained a considerable reputation as a physician. Among the many noble personages he attended was the Archbishop of Braga. In addition to a thriving medical practice, Rosales developed a serious interest in astronomy, publishing in 1619 *Tratado dos Cometas que aparecciao en Novembro de 1618*. Five years later, he published a far more influential astrological work, *Status Astrologicus sive Anacephalaeosis da Monarchia Lusitania* (Lisbon, 1624), written in verse. The work is dedicated to King Phillip III of Spain and praises Portugal's kings and nobility. In 1625, together with other Marranos, Rosales left Lisbon for Rome, possibly out of fear of the Inquisition. In Rome he cultivated a friendship with Galileo, who had a profound influence upon him and inspired him to write *Regnum Astrorum Reformation* (Hamburg, 1644). During the early 1630s, Rosales made his way to Hamburg, where there was a settlement of Marranos. On July 17, 1647, Emperor Ferdinand III bestowed upon him the title of count palatine in recognition of his scientific achievements. Later, in Leghorn, Rosales openly called himself a Jew, having assumed the name Jacob Hebraeus. As a consequence, he was denounced to the Inquisition in Lisbon in 1658 together with other notable Marranos.

Among his other works are *Poculum poeticum*, a poem in honor of his friend, Abraham *Zacuto, printed in the lat-

ter's treatise, *De medicorum principum historium* (Amsterdam, 1629–42); *Carmen intelektuale* and *Panegyrycus in laudem eximii*, which appears in *Zeror ha-Hayyim*; *Menasseh ben Israel de Termino Vitae* (Amsterdam, 1639).

ROSANES (Rosales), Spanish family originating in the town of Castellvi de Rosanes, near Barcelona. With the expulsion of the Jews from Spain, the members of this family emigrated to Portugal. There they were compelled to convert to Christianity, changing their family name to Rosales. The members of this family were then dispersed in the Oriental countries and those of Eastern and Western Europe. The most prominent members of this family included: JACOB *ROSALES (beginning of the 16th century) in Fez; JACOB HEBRAEUS *ROSALES (17th century); ZEVI HIRSCH *ROSANES (18th century); and ABRAHAM ABELE ROSANES of Minsk. JACOB ROSANES (19th century), the German mathematician, also belonged to this family.

A large part of the family settled in *Turkey and the Balkan countries. ABRAHAM B. MEIR ROSANES (1635?–1720) was a leading rabbi in Constantinople. He was born there and studied under Yom Tov *Zahalon and Solomon ha-Levi ha-Zaken. Between 1659 and 1677, he was rabbi in Adrianople, where he was the leader of the rabbis who issued a *Herem* ("ban") against *Shabbetai Zevi. His son-in-law was his nephew JUDAH B. SAMUEL *ROSANES, who mentioned some of the teachings of his father-in-law in his work *Mishneh la-Melekh* on Maimonides' *Mishneh Torah*. At the end of Abraham's life, he managed the press of his father-in-law, R. Samuel Franco, in Constantinople. He wrote notes and novellae as well as criticisms on *Giddulei Terumah* by Azariah *Figo. ISAAC B. DAVID ROSANES (1660?–1749) was a rabbi in Constantinople and settled in Jerusalem in 1733. A number of his responsa were published in the works of contemporary *Hakhamim*. ABRAHAM B. HAYYIM ROSANES (1665?–1744) was a rabbi and *posek*, the disciple of his uncle, R. Judah Rosanes. In 1718 he became chief rabbi of Constantinople. In 1743 he settled in Jerusalem, where he died. His responsa are scattered in the works of his contemporaries, such as the *Battei Kehunnah* by Isaac ha-Kohen *Rappaport. ABRAHAM B. JOSEPH ROSANES (1686–1757?) was a rabbi and *posek* in Constantinople and fought the Shabbatean movement. His responsa and novellae were published in the works of contemporary *Hakhamim*. ISAAC B. HAYYIM ROSANES was a wealthy merchant and purveyor to the Turkish army; he was assassinated in 1758 because of a debt which was owed to him by the vizier Valalodin Pasha.

ABRAHAM B. ISRAEL ROSANES also known as Ha-ABIR (from the acronym Ha-Rav Abraham ben Israel Rosanes; 1838–1879), was a *Hakham* and merchant. He was born in

Ruschuk (now Ruse), Bulgaria, where he engaged in commerce and established a yeshivah. In 1867 he emigrated to Erez Israel. He sent letters on his impressions of Erez Israel to his friend Menahem Farhi, which were published in *Ha-Maggid* (11–12 (1867–68)) under the title *Masot he-Ḥakham Ha-Abir* and a second time by A.M. Habermann (see bibliography). In these letters, he describes the towns of Safed, Tiberias, Jerusalem, Hebron, and their surroundings. After a short while he returned to his native town. His brother, MORDECAI ROSANES, financed the paving of the Western Wall area in Jerusalem in 1874. Abraham's son SOLOMON *ROSANES was a scholar and historian of the Jews of the Oriental countries.

[Abraham David]

ROSANES, JUDAH BEN SAMUEL (1657–1727), Turkish rabbi, *posek* and preacher. Rosanes was born in Constantinople. He studied under R. Solomon ha-Levi the Elder and R. Joseph b. Isaiah Trani (grandson of Joseph b. Moses *Trani). In his youth, he worked in the business of Abraham Rosanes, his uncle and father-in-law, who had business connections with the Turkish army. After his uncle's death, Judah engaged in business with his two brothers, Ḥayyim and Aaron. Later he was appointed to the rabbinate of Constantinople, where he served until his death. He was regarded as one of the greatest Turkish rabbis of his time and was among the rabbis of Constantinople who persecuted the Shabbateans there. In 1714 he was one of the signatories to the ban of excommunication against Nehemiah Ḥiyya *Ḥayon that was circulated to the whole Diaspora. In 1725, however, three Constantinople rabbis, of whom Judah was one, released Ḥayon from the excommunication on condition that he abandon the study of Kabbalah and Shabbatean beliefs. The rescinding of the excommunication angered the other rabbis of the town. Apparently this was the reason for zealots' breaking into his house and destroying his writings. What remained of his writings was collected after his death and prepared for publication by his pupil, Jacob *Culi. His *Mishneh la-Melekh*, novellae and disquisitions on Maimonides' *Mishneh Torah*, was first published in Constantinople in 1731 and later reprinted together with the text and other commentaries. Since then his commentary has been published in most editions of the *Mishneh Torah*. Rosanes' fame rests upon this work, one of the most erudite and penetrating commentaries on the *Mishneh Torah*. Rosanes' second work, published by Culi, was *Parashat Derakhim* (Constantinople, 1728), containing 26 sermons on *halakhah* and *aggadah*, and appended to his *Derekh Mitzvotekha* on the 613 commandments of the Torah according to the enumerations of Maimonides, *Naḥmanides, and *Moses b.

Jacob of Coucy. The book also contains his notes and glosses to *Sefer ha-Ḥinnukh*, attributed to Aaron ha-Levi of Barcelona. Excerpts from the *Parashat Derakhim* were published also in the *Mikhlah Yofi* (Frankfurt on the Oder, 1775) of Isaac b. Ben Zion of Apta. Some of his responsa are to be found in the works of his contemporaries. A definite trend toward leniency is discernible in his rulings and commentary. He even regarded apostates as having been compelled to change their religion by *force majeure*.

Rosanes is not to be confused with the Shabbatean Judah Rosanes who lived in the mid-17th century and was one of the Constantinople scholars who excommunicated the two Smyrna rabbis Aaron *Lapapa and *Solomon (Nissim) b. Abraham Algazi I in 1666, after they excommunicated *Shabbetai Zevi.

[Abraham David]

ROSANES, SOLOMON ABRAHAM (1862–1938), historian. He was born in Ruschuk (Ruse), Bulgaria. While still in his teens he began to engage in money changing, and in 1878 he was attacked by robbers and seriously injured. After his recovery, acting upon a vow he had taken, he devoted himself to writing, but had to combine his studies with business as his father died and he had to support his family. During his many business trips, he managed to pursue research in libraries and archives in various localities. During World War I, he settled in Sofia, where he served as librarian of the Jewish community and resided until his death. Rosanes contributed to Hebrew, Ladino, Romanian, and Bulgarian publications, writing chiefly on the history of the Jews in the Balkans. His works include a genealogy of the Rosanes family (French, 1885); *Shekel Yisrael*, a treatise on ancient Jewish coins; and a history of the Jewish community of Ruschuk (Ladino, 1914). His major work was *Korot ha-Yehudim be-Turkyah ve-Arẓot ha-Kedem* ("A History of the Jews in Turkey and in the Orient," 6 vols., 1930–45), of great importance because of the wealth of source material it contains. Part of it appeared under its original title, *Divrei Yemei Yisrael be-Togarmah* (1907–14). Rosanes, who knew many languages, also wrote *Safah Aḥat u-Devarim Aḥadim* (1928–29), a study on the beginnings of human speech, in which he propounded the view that all languages had developed from a pre-biblical Hebrew.

[Tovia Preschel]

ROSANES, ZEVI HIRSCH BEN ISSACHAR BERISH (1733–1804), Polish rabbi; grandson of Jacob Joshua *Falk. He was rabbi of Bolechow and in 1787, on the death of Mordecai Zēev Ornstein, was appointed rabbi of Lemberg, as his grandfather had been. He was the only rabbi of Lemberg after

Mordecai Ze'ev Ornstein who was not a member of the Ornstein family. Rosanes' considerable influence is shown by the large number of authors who sought his approbation of their works. Of particular interest is his enthusiastic approbation of the *Ahavat David vi-Yhonatan* of David ha-Kohen (Lemberg, 1801). This work, as its title indicates, is a commentary on the novellae of Jonathan *Eybeschuetz, of whom his grandfather was one of the greatest opponents. His *Tesha Shitot* (*ibid.*, 1800), a work distinguished for its acumen and profundity, also contains his father's novellae, entitled *Hezkat Ahavati*. His wife Judith was a well-known personality and managed a printing works in Lemberg.

[Itzhak Alfassi]

ROSARIO, second-largest city in Argentina, comprises the second-largest Jewish community in the country: according to data of Vaad Hakehilot, there were some 1,600 Jewish families out of a total population of about 1,012,000 (2000). The first Jewish families settled in Rosario in 1887. Several years later their number was increased by the arrival of immigrants who had failed to adapt to the conditions in the Jewish agricultural settlement Moiseville, as well as by new immigrants, both Ashkenazim and Sephardim. A group of 28 persons established the Asociación Israelita de Beneficencia on Sept. 6, 1903, to attend to religious and welfare needs. Acquiring the first Jewish cemetery in 1909, the Asociación Israelita gradually became the central organization for both Ashkenazim and Sephardim in Rosario. In 1909 the total number of Jews in Rosario was 3,059. By that time the community already had a Zionist center (founded 1904) as well as a *Talmud Torah* which served as the foundation for the large Hayyim Nahman Bialik School. Both the Sephardim and the Ashkenazim established their own synagogues apart from the one belonging to the Asociación Israelita de Beneficencia. A socialist workers' organization, founded in 1909, opened the Yiddische Arbeter Bibliotek in the same year. In 1919, during the pogroms in *Buenos Aires (the "Tragic Week," January 7–13; see also *Argentina), the Jews in Rosario were identified with "Russians" and "Bolsheviks," and popular incitement against them reached such intensity that only the timely intervention of the authorities averted serious damage and disorder.

Between the two world wars, Rosario's Jewish community increased in number; in 1943 its population was estimated at 10,000. As a consequence of this growth, new community organizations were formed and the older ones were enlarged; the Po'alei Zion party was founded (1919), as were WIZO (1926) and committees for Keren Hayesod and the Jewish National Fund, while the Zionist movement grew more influential. Welfare organizations and activities also became more diversified. The first women's welfare organization, founded in 1909, was augmented by Hakhnasat Orhim and Bikkur Holim, which assisted poor immigrants and organized medical services for

the needy. In 1924 the library maintained by the left-wing workers, whose organization had become communist, was supplemented by the facilities of the Ateneo Juventud Israelita, an organization for Spanish-speaking youth, and by the athletic facilities of the Maccabi sports club. As a result of Aaron Schallman's initiative, the Yiddish weekly *Rosarier Lebn* began publication in 1924, and it continued to be published in Spanish and Yiddish at least until 1968. It was the only Jewish newspaper in all the cities of the Argentine interior which was published periodically.

During the inter-war period, the Jews were engaged principally as peddlers and businessmen. The Jewish community's tendency toward cooperative organization created important financial institutions, some of them continued to function until the end of 20th century, including the Banco Cooperativo (founded 1926); the Cooperativa Mutual Fraternal (founded 1927), a business cooperative for peddlers; and the Banco Comercial Israelita (founded 1921), which was owned by central community institutions and has become an authorized bank. Amid this institutional diversity, the Asociación Israelita de Beneficencia continued to serve as the central Jewish organization. Although the Sephardim established separately such communal institutions as Ez Hayyim (1916), for Spanish-speaking Jews from Turkey; Shevet Ahim (1924), for Syrian Jews; and the Confraternidad Israelita Latina (1924), for Moroccan immigrants, they continued to share the cemetery and the educational facilities with the Asociación Israelita de Beneficencia. During the 1920s and 1930s, the Asociación expanded, built a large central building, and developed communal services with special emphasis on education, but refused to support leftist, anti-religious schools.

In 1971 the Asociación comprised 2,585 families of which only 168 were Sephardim. Its building houses both a large synagogue and the Bialik School. The latter contains a pre-school class, a kindergarten, an elementary school, and a secondary school offering both the general curriculum and Hebrew courses. As part of its cultural program, the Asociación maintains a full schedule of conferences, concerts, plays, and celebrations of Jewish holidays. In addition, it supports the activities of youth groups, administers the cemetery, and takes part in such community matters as the fight against antisemitism. Like the *kehillah* in Buenos Aires (*AMIA), but on a much more modest scale, the Asociación Israelita de Beneficencia serves as the central organization of the Jews of Rosario. Nevertheless, there are various other social-cultural organizations such as the Círculo Sefaradí, Hebraica, political organizations, youth movements, and welfare organizations. Social life is also enriched by the Aḥad Ha-Am Library and the Sociedad Hebraica. Many Jewish students attend the Universidad Nacional del Litoral, whose main faculties are located in Rosario.

[Lazaro Schallman]

ROSE (Heb. רֹזָה, *vered*, mishnaic), the genus *Rosa*. Two species grow wild in Israel, the white rose, *Rosa phoenicea*, which grows on the banks of rivers, in swamps and woods, and the *vered ha-kelev* – *Rosa canina* – which has pink and sometimes white blossoms and grows close to water. These wild roses have five petals and are not particularly beautiful or fragrant. The fragrant rose arrived in Erez Israel from Persia only during the Greco-Persian period. Its Persian name was *varda* whence its mishnaic name *vered* (Aramaic *varda*, Gr. ῥόδον). The rose is not mentioned in the Bible, even though according to tannaitic tradition Jerusalem possessed “a garden of roses [in which fruit trees also grew] that existed from the time of the early prophets” (Ma’as. 2:5; Tosef., Neg. 6:2; BK 82b), though it was otherwise forbidden to plant gardens in Jerusalem. The rose (*rodon*) is mentioned a number of times in the Greek translation of Ben Sira but, in the Hebrew fragments discovered in the *genizah* (Ecclus. 39:13; 50:8), the word *shoshan* (“lily”) appears. This substitution of *shoshan* or *shoshannah* for *vered*, even though erroneous (see *Flowers, of the Bible, Lily), already occurs in the Midrash which speaks of “a red *shoshannah*” (i.e., a rose, since the lily is white) and even mentions a “*shoshannah* of a *vered*” (Lev. R. 23:3). The source of this mistaken identification lies chiefly in the explanation of “the *shoshannah* among the thorns” (Song 2:2), which was understood to refer to the thorns on the stalk of the rose. The red rose is mentioned in the Apocrypha (1 En. 82:16; 106:2).

In rabbinic literature, the rose is frequently mentioned: the bridegroom wears a crown of roses (Meg. Ta’an. 327) and idolators decorate their shops with them (Av. Zar. 12b). There is an adage that “youth is like a crown of roses” (Shab. 152a). R. Johanan’s beauty was compared to a crown of red roses encircling a silver cup containing pomegranate seeds (BM 84a). A white rose is also mentioned (Git. 68b). A handsome man is called *vardina’ah* (“roselike,” Nid. 19b and cf. Git. 41a). The main use of roses was in the preparation of an aromatic oil made by soaking the petals in olive oil (Shev. 7:6, et al.). It was apparently also customary to soak rose blossoms in water. The Talmud describes a Persian noble’s concept of enjoying life as “sitting up to his neck in roses surrounded by naked harlots” (Av. Zar. 65a; Rashi: “sitting in a bath of roses”). Medieval halakhic literature speaks of “rosewater” as a medicament. Jam made from rose petals was a favorite food (Sh. Ar., OH 204:11).

[Jehuda Feliks]

ROSE, ALEX (Royz, Olesh; 1898–1976), U.S. trade unionist and politician. Rose, who was born in Warsaw, Poland, was the son of a wealthy tanner. Arriving in the U.S. in 1913, Rose found employment as a millinery operator and became active in the labor union. During World War I, he enlisted in the Jewish Legion and saw service in the Middle East. In 1923,

three years after his return, Rose became secretary-treasurer of the United Hat, Cap, and Millinery Workers Union, Local 24. He held this post until 1950, when he became the union’s president. Here, he was instrumental in overcoming the incursions of communists and labor racketeers, and in combating the chaotic competition so destructive of labor standards in the garment industries. Rose also became prominent in the field of labor and liberal politics. As New York State secretary of the American Labor Party (1936–44), Rose helped to steer a course away from independent labor and ideological politics toward balance of power and pressure politics. The party provided the margin of victory for New Deal candidates in New York, including Franklin D. Roosevelt, Herbert Lehman and Fiorello La Guardia.

As chief strategist for the Liberal Party from its founding in 1944, Rose came to embody a politics of compromise. The Liberal Party became a minor satellite party, fearful of innovation and excess, despite its position as New York State’s leading minor party. During the early 1960s, a period of decline set in but under Rose’s leadership the Liberal Party reasserted its decisive position in New York politics by providing the balance of power for John Lindsay’s election as New York City’s mayor in 1965 and 1969.

[Kenneth Waltzer]

ROSÉ, ARNOLD JOSEF (Rosenblum; 1863–1946), violinist. Born in Jassy, Romania, Rosé became concertmaster of the Vienna Opera and the Vienna Philharmonic at the age of 18, after conversion to Catholicism, and held these posts until 1938. In 1882 he founded the Rosé String Quartet, which won fame in Europe and in the United States. He also taught at the Vienna State Academy of Music until 1924. When the Nazis invaded Austria in 1938 he fled to England. Rosé married Gustav *Mahler’s sister, Justine. His brother EDWARD, a cellist, and his daughter ALMA, a violinist, died in a concentration camp.

ROSE, ARNOLD MARSHALL (1918–1968), U.S. sociologist. Born in Chicago, Rose taught at Bennington College and Washington University in St. Louis and from 1952 until his death was professor of sociology at the University of Minnesota. His interest was primarily in the field of social problems, especially those relating to the labor movement and race relations. In the latter field he was considered a leading authority. Rose first entered the complex area of race relations as an assistant to Gunnar Myrdal, the author and editor of *An American Dilemma* (1944). Rose published a condensed edition of this classic entitled *The Negro in America* (1948).

He also wrote *Studies in the Reduction of Prejudice* (1947, 1948²); *The Negro’s Morale* (1949); and *America Divided; Minority Group Relations in the United States* (with C. Rose, 1948, 1949²). He edited *Race Prejudice and Discrimination* (1951)

and *Human Behavior and Social Processes* (1962); and co-edited *Minority Problems* (1965). His other works include: *Union Solidarity: The International Cohesion of a Labor Union* (1952); *Theory and Method in the Social Sciences* (1954); and a widely-used text, *Sociology: The Study of Human Relations* (1956, 1965²). Rose was involved in a lawsuit in 1963–64 after having been denounced as a security risk because of his alleged communist activities. He won the case, which he described in *Libel and Academic Freedom, A Lawsuit against Political Extremists* (1968). One of his last works was *Power Structure; Political Process in American Society* (1967).

[Werner J. Cahnman]

ROSE, BILLY (William Samuel Rosenberg; 1899–1966), U.S. showman. Rose was born to a poor family in New York. He acquired an unusual mastery of speed at shorthand, which during World War I won him a job with Bernard *Baruch. After the war, Rose decided that songwriting was a lucrative field and, on studying successful lyrics, established that they either romanticized the commonplace or played on ordinary words. His “Ain’t Nature Grand” (1920) became a “hit,” and three years later, at 24, Rose was earning \$100,000 a year as a songwriter. He wrote lyrics for nearly 400 songs, about 50 of which were popular successes. In 1924 he opened a small nightclub and began to pioneer nightclub-style entertainment for people of moderate means. He also owned the Diamond Horseshoe in New York. In 1929 he married Fanny Brice, the Broadway musical star, the first of his five wives. From 1930, Rose produced shows on Broadway, among them *Jumbo* (1935), *Carmen Jones* (1943), and *Seven Lively Arts* (1944). He bought the Ziegfeld Theater (1954) and the National Theater (1958), which was renamed The Billy Rose Theater. Investing in real estate and stocks after World War II, he became the largest single stockholder in the American Telephone and Telegraph Company. He collected art on a grand scale, and in 1965 donated his sculptures to the *Israel Museum in Jerusalem, including works by Rodin, Jacob Epstein and Daumier, to be housed in the Billy Rose Sculpture Garden. He also donated a collection of paintings that included a Gainsborough, a Reynolds, a Romney and a Turner. His sister, Polly Rose Gottlieb, wrote his biography, *The Nine Lives of Billy Rose* (1968).

[Lee Healey]

ROSE, ERNESTINE POTOVSKY (1810–1892), U.S. feminist and social activist. Ernestine Potovsky was born in Piotrkow, Poland, the daughter of an Orthodox rabbi. Early in life she rebelled against her traditional upbringing and at the age of 17 she left home and traveled first to Europe and then to England in 1830. In 1832 she met the English social reformer Robert Owen, whose disciple she became; the same year she married another non-Jewish Owenite, William Rose, a jeweler and silversmith by trade. The couple moved to New York City in 1836 and Ernestine Rose traveled throughout the eastern

United States giving Owenite lectures on the science of government, religion, free schools, abolition of slavery and women’s rights. From 1843 to 1846, she and her husband lived in an Owenite commune near Syracuse, New York, while she continued to lecture. She campaigned especially for the passage of a married women’s property rights bill in New York State, which finally passed the legislature in 1848. In 1850 Ernestine Rose helped organize the first National Woman’s Rights Convention, which met in Massachusetts. An acquaintance and colleague of such abolitionists and feminists as Ralph Waldo Emerson, William Lloyd Garrison, Lucretia Mott, Elizabeth Stanton and Susan Anthony, she campaigned vigorously in the years to come all over the U.S. on behalf of women’s property rights, women’s suffrage and reform of divorce laws, especially in New York State. Together with Susan Anthony she was a leader of the more radical wing of the suffrage movement that refused to concede that other social issues, most notably abolition and rights of black Americans, had precedence over feminist questions, and as such she bitterly attacked the 14th and 15th amendments for constitutionally emancipating blacks but not women, and urged their rejection. Along with other militants, she helped found the Women’s Suffrage Society in 1869. In the same year she and her husband returned to England where she lived a life of semi-retirement because of bad health, though continuing to speak out on feminist issues. Although she seemed to attach no particular significance to her Jewish background, she did engage in 1863 in a long-published debate with Horace Seaver, the abolitionist editor of the *Boston Investigator*, whom she accused of antisemitic opinions.

[Hillel Halkin]

ROSE, FRED (Rosenberg; 1907–1983), Canadian communist activist, member of Parliament, spy. Rose was born in Lublin, Poland, and moved with his parents to Montreal in 1916. As a young man he found work in a factory and joined the Young Communist League and helped organize unions for the unemployed. Trained as an electrician, in 1929 Rose became national secretary of the Young Communist League and visited Moscow the following year. Back in Montreal, he was closely watched by the RCMP and in 1931 was arrested, charged with sedition, and sentenced to a year in prison. After his release, he became a member of the Communist Party of Canada’s covert leadership group and was an active political pamphleteer. He unsuccessfully stood for public office several times, but in 1943, with the Soviet Union a World War II ally of Canada, Rose stood for election to the House of Commons for the Communist Labor Progressive Party from the heavily Jewish Montreal Cartier riding. He won, defeating both David *Lewis and Lazarus *Phillips. Canada’s first and only communist Member of Parliament, Rose was reelected in the 1945 federal election. During this campaign, American singer Paul Robeson personally endorsed Rose and sang at his campaign headquarters. However, Rose’s parliamentary career

was cut short when he was accused by Soviet Embassy defector Igor Gouzenko of spying for the Soviet Union. Following a sensational trial, Rose was found guilty of espionage and served four and a half years of a six-year sentence. Released from prison in 1951, Rose went into exile in Poland. In 1957 the Canadian government revoked his Canadian citizenship. Rose died in Warsaw.

[Gerald Tulchinsky (2nd ed.)]

ROSE, HERMAN (1909–), U.S. painter, watercolorist, and educator. Born in Brooklyn, he studied at the Art Students League and the National Academy of Design and served in the WPA. Although Rose painted subjects in England, Israel, Spain, and Mexico, he is best known for depicting the architecture of New York City and Brooklyn in small cityscapes with a palette of sober colors. An oil painting like *Blake Avenue, Brooklyn* (1940) manages to evoke intimacy while also depicting the Brooklyn street of the title as a dynamic diagonal which plunges the viewer from foreground to background. Rose's work has a picturesque, quietly emotive quality which compares to that of the 18th-century English Romantics. The artist often utilized a painting technique which involved applying small spots of paint to the surface of his work, and then moving warm and cool tones over one another; this resulted in a low level relief in which the paint dabs retained their identity. For instance, the painting *Manhattan Tops*, which the artist painted from his New York rooftop studio, depicts the city skyline dominated by a thickly textured sky. Rose also painted portraits and still-lives. He carried the nuances of his vision from pale tonal impastos to thinner, more luminous washes throughout the years. His work has been exhibited at many museums and galleries, including the "Fifteen Americans" exhibition of 1952, the Pennsylvania Academy of Art and the Rutgers University Art Gallery. He received a Lee Krasner award in recognition of lifetime achievement. Many major museums and galleries own examples of his work, including the Newark Museum, the Museum of Modern Art, the Norton Museum of Art, and the Whitney Museum.

[Nancy Buchwald (2nd ed.)]

ROSE, IRWIN (Ernie) (1926–), U.S. biologist and Nobel laureate in chemistry. Born in New York, Rose grew up in Spokane, Washington, where he attended Washington State College before serving as a radio technician in the U.S. Navy in World War II. He graduated with a B.S. (1949) from the University of Chicago, where he also gained his Ph.D. after working on nucleic acid synthesis with Birgit Vennesland (1952). After fellowships at Western Reserve (now Case-Western Reserve) University and New York University, he became a member of the biochemistry faculty at Yale University (1954–63) before joining the division of basic science at the Fox Chase

Cancer Center in Philadelphia (1963–95). Since 1997, he has been a researcher in the Department of Physiology and Biophysics at the University of California, Irvine College of Medicine. He was awarded the Nobel Prize in chemistry (2004) jointly with Avram Hershko and Aaron Ciechanover for his contributions to characterizing the ubiquitins, the series of enzymes which govern the breakdown of cellular proteins. This research has major implications for understanding cell growth and proliferation in health and disease and for developing novel anticancer drugs. Rose's current research concerns the role of proton transfer in enzyme recycling, especially in carbohydrate synthesis. Rose was elected to the U.S. Academy of Sciences (1979). He is married to the research biochemist Zeldia Budenstein Rose.

[Michael Denman (2nd ed.)]

ROSE, LEONARD (1918–1984), U.S. cellist. Born in Washington, D.C., Rose began to study the cello with Walter Grossman at the age of ten. He was awarded a scholarship for further study with Felix Salmond at the Curtis Institute of Music, Philadelphia, where he remained until 1938 and where he was head of the cello department from 1951. At the age of 20, after only three weeks with the orchestra, he became first cellist of the NBC Symphony under Toscanini. He then went to the Cleveland Orchestra for a four-year period, and finally to the New York Philharmonic. He appeared as cello soloist with most of the major orchestras in Europe and America; and the trio which he formed with Isaac Stern and pianist Eugene Istomin was similarly acclaimed in chamber music concerts. Rose was also on the teaching faculty of the Juilliard School of Music, New York.

[Max Loppert (2nd ed.)]

ROSE, MAURICE (1899–1945), U.S. Army officer. Rose, who was born in Middletown, Connecticut, and whose father was a rabbi, served with the AEF during World War I as a second lieutenant. He advanced through the ranks and was promoted to brigadier general in 1943. From 1942 to 1943, as chief of staff of the 2nd Armored Division, he fought through the North African campaign and negotiated the unconditional surrender of the German forces in Tunisia. He was then assigned to command the 3rd Armored Division and was subsequently given the rank of major general. Rose led the 3rd in fighting through France, Belgium, and into Germany, where he was killed in action. Rose Memorial Hospital in Denver, Colorado, was named for him.

ROSE, MAURICE ("Mauri"; 1906–1981), Jewish race car driver, three-time winner of the Indianapolis 500. Rose was born in Ohio and began his career in the late 1920s racing on dirt tracks before moving to California. He finished second in Indianapolis in 1934 in his second outing. Rose's first Indy victory came in 1941 at a speed of 115 mph (185 kph) in the last race run before World War II. His other victories came back-to-back in 1947 and 1948. After his retirement from racing, he invented a device allowing amputees to drive an automobile.

He was named to the International Motorsports Hall of Fame (1994) and the Motorsports Hall of Fame of America (1996).

[Alan D. Abbey (2nd ed.)]

ROSEN (formerly **Rosenzweig**), **ABRAHAM** (1889–1974), Hebrew poet. Born in a village near Dunayevtsy (Podolia province), Rosen taught in various Russian towns from 1908 on, and in Chernovtsy (Bukovina) from 1921 to 1925. Settling in Erez Israel in 1925, he taught there until his retirement in 1957. From 1920, Rosen's poems appeared in Hebrew newspapers and periodicals, both in Israel and other countries.

His books of poetry are: *Im Loven Derakhim* (1933); *Yamim* (1937); *Le-Nir Avot* (1929); *Sheloshah ba-Moledet* (1941); *Shirim* (1950); *Shirim H'adashim* (1957); *Shivim va-Hamishah Shirim H'adashim* (1964). A book of his stories, *Temurot*, appeared in 1968. He was the editor of a volume commemorating the community of Kamenets-Podolski. He translated Pushkin's "Legends" into Hebrew (1947). A collection of poems (*Mivhar Shirim*) appeared in 1993.

[Getzel Kressel]

ROSEN, ALBERT LEONARD (Al; "Flip"; 1924–), U.S. baseball player. Rosen was born to Louis and Rose in Spartanburg, S.C., where his grandfather, a Polish immigrant, ran a department store. The family moved to Miami, where Rosen and his brother, Jerry, were raised by their mother and grandmother after their parents divorced. Rosen learned boxing in order to fight off antisemites in the neighborhood, and despite having his nose broken 11 times, was good enough to win the middleweight championship in a Florida high school tournament. Rosen attended Florida Military Academy, and was a four-sport man, excelling at football, basketball, boxing, and baseball. At 16, he was given a tryout with the Cleveland Indians. He attended the University of Florida and later the University of Miami, where he was an all-round athlete. Rosen spent two years in the Navy during World War II, emerging in 1946 as a lieutenant. He debuted in the Major Leagues on September 10, 1947, and became the Indians' full-time third baseman in 1950, having an outstanding rookie season: he hit 37 home runs, enough to set an American League rookie record and lead the AL in home runs in 1950, becoming the first AL rookie to win the home run title. Rosen also had 100 walks, 100 runs and 116 RBIs. His 37 HRs was a rookie record that stood until 1987. Rosen drove in 100 or more runs for five consecutive seasons (1950–54), and finished in the top seven in RBIs from 1950 to 1954 and the top seven in walks from 1950 to 1955. In 1953 Rosen failed to achieve by a whisker the exalted Triple Crown. He won the AL home run title with 43 and the RBI crown with 146, but his .336 batting average fell .0011 short of winning the American League batting title, which went to Mickey Vernon, whose teammates conspired to help him win. He was also first in runs (115), total bases (367), slugging (.613), OPS (1.034), runs created (153), extra base hit (75), and times on base (290). He was the first unanimous AL MVP in history. Rosen was elected to appear in the All Star Game from 1952 to

1955, winning MVP honors in 1954 when he hit two HRs and had five RBIs. Rosen's lifetime batting average was .285, with 192 HRs and 717 RBIs in 1,044 games. He also appeared on the cover of *Sports Illustrated* in 1955. "When I was up there in the majors," he once said, "I always knew how I wanted it to be. I wanted it to be, 'Here comes one Jewish kid that every Jew in the world can be proud of.'" Rosen suffered a broken finger in 1954 and had several other nagging injuries that forced him to retire in 1956. He later served as president of the New York Yankees (1978–79), Houston Astros (1980–85), and San Francisco Giants (1985–92), being named Major League Executive of the Year in 1987.

[Elli Wohlgeleitner (2nd ed.)]

ROSEN, CARL (1918–1983), U.S. apparel manufacturer. Rosen, a native New Englander, joined a small regional dress firm owned by his father, Arthur, and built it into one of the most successful apparel businesses in the U.S. At the time of Rosen's death, Puritan Fashions Corporation – founded in Boston in the first decade of the 20th century – had become a \$300 million-a-year business. Rosen, one of the garment industry's more colorful personalities, also owned thoroughbred horses and was a regular at tracks around the country. He was a benefactor of many institutions, including Brandeis University in Waltham, Mass., where he endowed the Arthur Rosen Chair in economics. He began his lifelong career at Puritan in 1936 when still a teenager, starting in the cutting room as a sweeper. He entered the U.S. Army as a private during World War II, emerging as an artillery captain. He returned to Puritan, became chairman and chief executive officer in 1953, and remained in those posts for the next 30 years. In the 1960s, Rosen foresaw the vast changes that U.S. social customs, dress codes, and retailing concepts were about to undergo. He was one of the first American apparel makers to realize the business potential of the Beatles, the rock group then taking England by storm but still relatively unknown in the U.S. Rosen secured a license to make Beatles T-shirts, knit shirts, and sweatshirts, then managed to sell them to the conservative J.C. Penney Co. chain. They were an instant hit. In 1965, Rosen opened Paraphernalia, a Madison Avenue store modeled after the boutiques then popular in London. Small and trendy, its mod fashions – vinyl miniskirts and neon bikinis, for example – helped launch the careers of such hip new designers as Betsey Johnson and Mary Quant. By 1968 there were 44 Paraphernalia franchises in the U.S., but the name had become diluted because of too-rapid expansion and the last one closed around 1976. In 1977, Rosen made perhaps his most astute move at Puritan, getting the license to produce Calvin Klein jeans for men and women. Within three years, Puritan was shipping 500,000 pairs of jeans a week. When Rosen died, his son Andrew, then 26, became head of the company. Later that year, Klein and his partner, Barry Schwartz, acquired Puritan, subsequently changed its name and in 1989 Andrew Rosen left to join the Anne Klein Apparel Group.

[Mort Sheinman (2nd ed.)]

ROSEN, CHARLES (1927–), pianist, author and musicologist. Rosen was born in New York City, where he studied the piano from the age of seven at the Juilliard School of Music, and later with the great virtuoso pianist Moriz Rosenthal. At Princeton University, he studied French literature (with special emphasis on the connections between music and poetry in 16th-century France), graduating with the highest honors. This led to his winning a two-year Fulbright scholarship to study medieval French music in Paris. On his return to the United States in 1953, simultaneously with teaching French literature at the Massachusetts Institute of Technology, he began his career as a concert pianist, the ultimate international success of which eventually reduced his teaching activities to a minimum. Rosen won an enviable reputation as a critic, regularly reviewing books on painting, literature and music for the *New York Review of Books*, and also as an author. His *The Classical Style* (1971), a study of the music of Haydn, Mozart, and Beethoven, received universal critical admiration and won the National Book Award for Arts and Letters in 1972. Rosen's deep understanding of the process of composition and personal insights in the music itself is also manifested in his study *Sonata Forms* (1980). His Harvard lectures on Romantic musical thought and composition were published under the title *The Romantic Generation* (1995). Rosen's wide range of musical sympathies as a pianist – from Bach and the classical composers through Liszt and the virtuoso school to the music of *Schoenberg and of modern composers such as Elliott Carter and Pierre Boulez – was complemented by a powerful technique and a profound intellectual grasp of the works he played. All these factors combined to make Rosen one of the most interesting and important performing musicians of his day.

ROSEN, FRED SAUL (1930–2005), U.S. pediatrician. He was born in Newark, New Jersey, and received his A.B. from Lafayette College (1951) and M.D. from Western Reserve University (1955). He was a member of the department of pediatrics of Harvard Medical School from 1966 where he was James L. Gamble Professor of Pediatrics from 1972 and head of the Boston Children's Hospital's division of immunology (1968–85). Rosen's main research concerned inherited immunodeficiency disorders in infancy and childhood on which he was an acknowledged international authority. He was chairman of WHO's committee on immunodeficiencies. He was an outstanding teacher and clinician. His honors included: the Mead Johnson award for pediatric research of the American Academy of Pediatrics (1970), election to the Institute of Medicine of U.S. National Academy of Sciences, and the American Academy of Arts and Sciences, and recipient of the inaugural Dana Foundation Award in Human Immunodeficiency Research (2005).

[Michael Denman (2nd ed.)]

ROSEN, HAIIM B. (1922–1999), Israeli linguist. Born in Vienna, Rosén received his Ph.D. from the Hebrew University

of Jerusalem in 1948; he taught from then at the university and became professor in 1968. His research interests cover a wide range from general and Indo-European linguistics and the linguistic and philological study of classical languages to the study of Israeli Hebrew. His *Ha-Ivrit Shellanu* (1956) was the first work to examine Israeli Hebrew as the object of modern linguistic analysis and stimulated much academic discussion. He was a member of the Israel Academy of Arts and Sciences and in 1978 was awarded the Israel Prize in the humanities.

ROSEN, JOSEPH A. (1877–1949), agronomist and social worker. Rosen was born in Moscow. He studied agriculture in Russia and Germany and emigrated to the U.S. in 1903. His discovery, the "Rosen rye," was introduced all over the U.S. In 1921 Rosen went to Russia for the *American Jewish Joint Distribution Committee (JDC) on a relief mission for Jews. He initiated a land settlement project in the Ukraine and Crimea in 1924 for poor Jews who had been deprived of Soviet citizenship rights. Heading the Agro-Joint, which was sponsored by the JDC for colonizing activities, he obtained the agreement and financial participation of the Soviet government for the project (1928), through which some 14,000 families were settled on the land by 1934. Artisan cooperatives, trade schools, and health stations were also organized. By 1938 the Agro-Joint was dissolved and its Russian Jewish staff was arrested and disappeared; most of the settlers either left the colonies for urban occupations or were killed by the Germans during the war. In 1939 Rosen was sent by the JDC on an investigation of British Guiana as a place for Jewish settlement. Later he spent some time guiding a JDC-sponsored settlement in the Dominican Republic.

[Yehuda Bauer]

ROSEN, JOSEPH BEN ISAAC (d. 1885), Russian rabbi and author. Rosen was born in Gorodok, Belorussia. His father intended him for a business career, but he early displayed unusual scholarly abilities and studied for the rabbinate. His first position was in Gorodok near Vitebsk, and in 1864 he was appointed rabbi of Telz (Telsiai). In 1873 he was appointed rabbi of Slonim, succeeding the renowned Joshua Isaac *Shapira, known as "Eisel Ḥarif." The period of his rabbinate at Slonim was exceptionally difficult for him. The *maskilim* of Slonim had begun to organize themselves and made considerable progress. Nevertheless, as a result of his moderation and conciliatory ways, his rabbinic authority remained unimpaired, and he enjoyed the respect of both the Ḥasidim and

the *maskilim*. In 1881 a fire broke out in the city, as a result of which about 75% of its Jewish inhabitants were left homeless. Rosen placed himself at the head of an organization to rehabilitate them, and through his organizational ability and moral influence he succeeded in effecting the rebuilding of the homes and the erection of new and modern communal buildings. Rosen's daughter married Isaac Jacob *Reines.

All his works, which display his profound learning, include his name in their titles. They are: *Edut bi-Yhosef* (Vilna, 1866), novellae to the Shulḥan Arukh, *Yoreh De'ah*; *Porat Yosef* (Warsaw, 1884), responsa and novellae to the Shulḥan Arukh, *Hoshen Mishpat*; and *She'erit Yosef* (*ibid.*, 1914), responsa and halakhic clarification.

[Itzhak Alfassi]

ROSEN, MATHIAS (1804–1865), banker and member of the Polish Council of State. Rosen was born in Warsaw and took over his father's banking business there in 1846. Because of his financial status and close relations with the government, he was appointed head of the Warsaw community in the 1840s. In this capacity he established philanthropic institutions and fostered the influence of *Haskalah in religious education. As a result of the increase of the Jewish population in Warsaw, the leader of the community became the representative of all the Jews in the country. For his services, Rosen was elected a member of the Council of Warsaw in 1862, and in the following year of the Council of State. He was entrusted by Grand Duke Constantine with the commission to study the moral, industrial and agricultural conditions of the Alsatian Jews. Rosen collaborated with the *Encyklopedia Powszechna* of S. Orgelbrand and with the *Biblioteka Warszawska*, being a member of the editorial board from 1849.

Shatzky, *Geshikhte fun Yidn in Varshe*, 2–3 (1948–53), indexes. **ADD. BIBLIOGRAPHY:** M. Fuks, *Zydzi w Warszawie* (1992), index.

ROSEN, MOSES (1912–1994), chief rabbi of Romania from 1948, when his predecessor, Rabbi Alexander *Safran, left the country, and chairman of the Federation of Jewish Communities of the Socialist Republic of Romania from 1964. Born in Moinesti, Moldavia, where his father, Rabbi Abraham Aryeh had served as rabbi, Rosen was ordained as a rabbi around the beginning of World War II. From 1957 he was a member of the Great National Assembly (the parliament) of Romania, his original constituency being a quarter of Bucharest that at one time had a large Jewish population. He was the editor of the *Journal of Romanian Religious Jewry*, the trilingual (Romanian, Hebrew, Yiddish) biweekly published by the Romanian Jewish community from 1956, the only Hebrew publication in Eastern Europe. Rosen's speeches and sermons were published in this periodical, which also contained items of Jewish news from abroad and articles on the contribution of

Romanian Jews to Jewish culture. Rosen's main achievement was the creation of legal conditions for adequate Jewish religious life in Romania.

[Eliezer Palmor]

ROSEN, MOSHE (1933–1999), Israeli physicist. Rosen was born in Czernowitz (Chernovtsy) and immigrated to Israel in 1948. In 1969 he was appointed associate professor of physical metallurgy and head of the Materials Engineering Department of the newly founded University of the Negev (now the Ben-Gurion University of the Negev) and in 1973 full professor. In 1974, he was also appointed rector. From 1968 to 1973 he was scientific coordinator and project engineer at the Research and Development in Physics and Metallurgy, Nuclear Research Center – Negev, Beersheba. In 1971 he became a member of the Subcommittee for Research of the Israel Atomic Energy Commission, Office of the Prime Minister. In 1982 he joined the faculty of Johns Hopkins University. In addition to serving as a department head there (1988–92) he was editor in chief of the scientific journal *Ultrasonics* and president of the Maryland Institute of Metals. In his research Rosen examined phase transformations in solids, elasticity and anelasticity in metals, composites and ceramics, and nondestructive characterization of materials and processes.

ROSEN, NORMA (1925–), U.S. novelist. Born in Manhattan, Norma Rosen grew up in Brooklyn, N.Y. She received a B.A. from Mount Holyoke College in 1946, and an M.A. from Columbia in 1953. In her book *Accidents of Influence* (1992), an essay uniquely describes her family's situation in relation to Judaism. Neither devout nor assimilated, her family "... stood in a proud and terrible place outside the 'two cultures.'" In 1959, she began writing seriously. Her first novel, *Joy to Levine!*, was published in 1962. The book, dealing with parental authority, is slightly sardonic, since it is in part a satire on the American pastime of "getting ahead." Her next book, *Green* (1967), a novella and eight short stories, deals with maturity in relation to the "sellout" of an artist to commercial art in advertising. The novella, according to Stanley Kaufman, demonstrates Rosen's ability to realize men and plunge into sentiment, "confident that genuineness and distillation will keep her from sentimentality."

In the 1960s, Norma Rosen began to confront the psychological damage of the Holocaust. As she later explained in a 1987 essay, the novel deals "with the response of those not involved directly with the Holocaust except through imagination, and examines its impact on them." Rosen's American women of the novel, *Touching Evil* (1969), are obsessed with the testimony of eye witnesses to the Holocaust. As S. Lillian Kremer states in a 2002 article on Norma Rosen, *Touching Evil* "... is distinctive in its deliberation on American Holocaust reaction and a feminine perspective."

Rosen's next long novel, *At the Center* (1982), touches on the theme of abortion and assistance to pregnant women. Robert Miner's review states that although Norma Rosen never

supports the “Right to Life” movement, hard questions about abortion still exist. And this is the book’s moral strength.

Norma Rosen’s novel, *John and Anzia: An American Romance* (1989), re-imagines a brief love affair between a Jewish immigrant, Anzia Yeziarska, and the American John Dewey. Helen A. Weinberger reviewed the novel and felt that Norma Rosen wrote a magical novel, “. . . mixing fact and fiction in a kind of transcendental philosophical poem about the cross between a real early 20th-century America and an always wished-for land.”

The author also published *Accidents of Influence: Writing as a Jew and a Woman in America* (1992), a volume of essays, and *Biblical Women Unbound* (1996), a re-staging of Old Testament stories.

[Mark Padnos (2nd ed.)]

ROSEN (Rosenblueth), PINHAS (Felix) (1887–1978). Zionist and Israeli politician, member of the First to Sixth Knessets. Born in Berlin, Rosen studied Law at the Universities of Freiburg and Berlin, receiving his degree in 1908. In 1905 he became active in the Zionist students’ movement *Bund Juedischer Corporationen*, which was later renamed *Kartell Juedischer Verbindungen*. In 1911 he was a cofounder of the Zionist youth movement *Blau-Weiss. Rosen served in the German army in World War I, and reached the rank of officer. In 1920–23 he served as chairman of the Zionist Organization of Germany. He emigrated to Palestine in 1923. In 1926 he became a member of the Zionist Executive in London, as head of the Organization Department, in which capacity he served until 1931, when he returned to Palestine. In Palestine he opened a private law practice and worked as a lawyer until 1948. In 1935 he was elected to the Tel Aviv Municipal Council in which he represented the immigrants from Central Europe, and continued to serve on the municipality until 1950. In 1940–48, he was chairman of the German and Austrian Immigrants’ Association. Rosen was active in *General Zionists (A), and was close to *Weizmann in his approach to Zionism. In 1940–41, he was a member of a committee established by the League for Jewish-Arab Rapprochement and Cooperation, that prepared a report for the Jewish Agency on constitutional development in Palestine, better known as the Bentov Report (see Mordechai *Bentov). The Committee’s report was based on the premise that Erez Israel would become a binational state (see *Binationalism). In 1942 he was one of the founders of the Aliyah Hadashah Party. In the period of the struggle for statehood, he objected to Jewish terrorism, and supported the 1947 UN partition plan. Rosen was elected to Asefat ha-Nivharim in 1944, and after the establishment of the state was one of the founders of the Progressive Party. He was elected to the First Knesset in 1949, and remained a member of the Knesset through the Sixth Knesset, on the Progressive list, then on the *Israel Liberal Party list, and finally on the *Independent Liberal Party list, when it broke off from the Liberal Party in 1965. Rosen served as minister of justice from 1948 to 1961, and was instrumental in organizing the judicial

and legal system of Israel. He was chairman of the Board of the Israel Philharmonic Orchestra until 1961, and published articles on Zionist themes in German, English, and Hebrew. A chair in constitutional law was established in Rosen’s name at Tel Aviv University in 1972. In 1973 he was awarded the Israel Prize for law.

[Susan Hattis Rolef (2nd ed.)]

ROSEN, SAMUEL (1897–1981), U.S. otologist. Rosen was born in Syracuse, New York, and originally studied law at the Syracuse Law School. He subsequently switched to medicine, however, graduating from the Syracuse Medical School in 1921. He specialized in otology at the Mount Sinai Hospital in New York, where he was consulting otologist and later emeritus clinical professor of otolaryngology.

In 1952 Rosen discovered a new method for restoring hearing to patients suffering from otosclerosis by an operation, the so-called Stapes-Mobilization procedure. As a result, thousands of patients regained their hearing, and Rosen demonstrated the method throughout the world, including Egypt, Israel, and the U.S.S.R. President *Nasser expressed his appreciation to him after he performed surgery at the Cairo Medical School. When Rosen expressed his surprise that Nasser had invited a Jew, he answered: “your work is above race and country.” Rosen was also elected a member of the Soviet Medical Academy.

In 1957, he received the Hektoen-Gold Award for “original work in medicine” of the American Medical Association as well as an award by the University of Bologna. In 1964, he was awarded the George-Arents Pioneer Medal for Excellence in Medicine by Syracuse University. He made several trips, with his wife, to a remote area of the Sudan to investigate the remarkable hearing ability of the Mabaan tribe. He was also a member of the first medical team in a quarter of a century to visit China, and lectured extensively on Chinese medicine and acupuncture.

His autobiography, published in 1973, was widely acclaimed.

BIBLIOGRAPHY: *The Autobiography of Dr. Samuel Rosen* (1973); A.M. Sackler, in: *Medical Tribune* (June 6, 1973); J.M. Lawrence, in: *Syracuse University Alumni News* (Summer 1973); B.G. Rudolph, *From a Minyan to a Community. A History of the Jews of Syracuse* (c. 1970), 252–54.

[Heinz Hartman]

ROSEN, SHELOMO (1905–1985), Israeli politician. Rosen was born in Moravska-Ostrava, Czechoslovakia and immigrated to Erez Israel in 1926. There, he was a founder of Kibbutz Sarid. While secretary of Ha-Kibbutz ha-Arzi from 1944, and a member of Mapam’s political committee, he was recognized as that movement’s foremost economist expert. He maintained that a prosperous settlement cannot be based only on agriculture, and he fostered the development of kibbutz industry. In 1965 he was elected to the Sixth Knesset and

was deputy speaker in the Seventh. Chairman of the Knesset's Social Services Committee, he became chairman of the subcommittee of the finance committee which dealt with state comptroller's reports. Appointed deputy minister of absorption in 1972, he became minister in March 1974, and sought to eliminate the confusing overlapping of functions between his ministry and the Jewish Agency. Subsequently he was named minister of housing. He continued to serve until the elections of May 1977.

ROSEN, YEHOShUA (1918–2002), Israeli basketball coach. Known in Israel as “Mister Basketball” and considered one of the outstanding coaches in the country, Rosen came to Israel with his family from Egypt in the 1920s and immediately began to play basketball. At the age of 14 he was already playing on the Maccabi Tel Aviv senior team, continuing with them into the 1940s. In 1947 he was named coach of Israel's national basketball team and led it to three European tournament finals. In 1953 he became the coach of Maccabi Tel Aviv, running the team 18 years and winning 12 national championships and nine state cups. In 1984 he led Hapoel Tel Aviv to the state cup. Rosen coached for 40 years, until his retirement at the end of the 1980s, mentoring some of Israel's top homegrown players, such as Mickey *Berkowitz and Doron Jamchi. He was awarded the Israel Prize in 1989 for his contribution to Israeli basketball.

[Shaked Gilboa (2nd ed.)]

ROSENAK, LEOPOLD (1869–1923/24), rabbi. Rosenak, who was born in Pozsonynadas, Hungary, was rabbi at Bremen, Germany, from 1896. Here he was especially active in aiding Russian and Polish Jewish refugees who passed through the port of Bremen on their way to the U.S. From 1915 to 1918 Rosenak was chaplain to the German army of occupation in Lithuania (Ober Ost), using his influence with the German authorities to alleviate the sufferings of the Jewish population. The yeshivah of *Slobodka, then in exile in the Ukraine, was reopened with his assistance, as was a Hebrew high school in Kovno. Rosenak died at sea on his return from a visit to the U.S., where he had sought aid for Ukrainian pogrom victims and for the new Bremen synagogue.

His thesis, *Fortschritt der hebraeischen Sprachwissenschaft vom 10.–13. Jahrhundert*, was published in 1898, and his talmudic novellae (*Ma'amar Mordekhai*) were printed in *Festschrift... S. Carlebach* (1915).

ROSENAU, WILLIAM (1865–1943), Reform rabbi. Born in Wollstein, Prussia, the son of a rabbi, he was educated in public school and came to the United States with his family in 1876, first to Boston and then to Philadelphia. Rosenau received his B.A. from the University of Cincinnati (1888) and was ordained a year later from HUC in Cincinnati. He served congregations in Omaha, Nebraska, for three years beginning

in 1889 and then went to Baltimore as rabbi of Ohev Shalom where he served for almost half a century until his retirement in 1939. Concurrently he studied at Johns Hopkins University where he received his Ph.D. in 1900 in Semitics and then joined its faculty, where he served until 1932.

Religiously liberal he was also politically a non-Zionist and a member of the American Council for Judaism.

For a time he was expected to be the leading candidate for the presidency of the Hebrew Union College after the retirement of Kaufmann *Kohler in 1921 but that was not to be. He lost in a close vote to Julian *Morgenstein and elected to remain in Baltimore rather than lead a more prominent congregation. He was deeply active in his community, concentrating on areas of general and higher education. He was a member of the Baltimore Board of Education of the Governor's Commission on Higher Education for Negroes. In national Jewish life, he was active in the Central Conference of American Rabbis and served as its president from 1915 to 1917. He was a member of the Associated Jewish Charities, a member of Baltimore's Federation, a founder of the Jewish Welfare Board and the Jewish Chautauqua Society, and edited the revised *Union Prayer Book* and *Union Haggadah*. He was a contributor to the *Jewish Encyclopedia*.

Among his works are *The Rabbi in Action* (1937); *Hebraism in the Authorized Version of the Bible* (1902); and *Semitic Studies in American Colleges* (1906).

BIBLIOGRAPHY: W.F. Rosenblum, *The Life and Work of Rev. Dr. William Rosenau* (1946); K.M. Olitzsky, L.J. Sussman, and M.H. Stern, *Reform Judaism in America: A Biographical Dictionary and Sourcebook* (1993).

[Michael Berenbaum (2nd ed.)]

ROSENBACH, ABRAHAM SIMON WOLF (1876–1952), U.S. bibliophile and bookdealer. Rosenbach was born in Philadelphia. His parents, Isabella Polock, the descendant of a distinguished Philadelphia family, and Meier Rosenbach, an immigrant from Germany, were observant Jews. Rosenbach attended the University of Pennsylvania, from which he obtained a doctorate in English literature. In his college days, he became a passionate bibliophile, and when his bookdealer uncle, Moses Polock, died in 1903, he took over the latter's stock and launched the Rosenbach Company, a rare-book concern. Combining erudition with personal charm and the risk-taking instincts of a gambler, Rosenbach soon rose to national prominence in the rare-book field. Dealing primarily in first and early editions of Americana and English literature, he acquired among his steady customers such millionaire collectors as Henry Huntington, Pierpont Morgan, Carl Pforzheimer, Lessing Rosenwald, Harry Widener, Edward S. Harkness, and Henry Folger, to whom he sold a first quarto edition of Shakespeare's plays in 1919 for \$128,000, reputedly one of the highest prices ever paid for a rare book up to that time. From the 1920s on, Rosenbach Company was the acknowledged leader in the rare-book trade in the U.S. and hardly a major auction took place in which it did not successfully and often spectacularly bid.

Rosenbach was a man of enigmatic contradictions. An astute businessman, he was also for much of his life a confirmed alcoholic; a person of deep Jewish interests, he lived in a permanent liaison with a Christian woman whom he reputedly refused to marry because she was not Jewish. He himself compiled a pioneer bibliographical study, *An American Jewish Bibliography* (1926), as well as a historical sketch of Congregation Mikveh Israel (1909), to which he and his parents belonged. For many years president of the American Jewish Historical Society, he was also a benefactor of Graetz College in Philadelphia and the Jewish Division of the New York Public Library, as well as a founder and first president of the American Friends of The Hebrew University. Among the several accounts he wrote of his adventures in the book trade were *A Book Hunter's Holiday* (1936) and *Books and Bidders* (1927). After his death, his private collection was installed in a library in Philadelphia under the auspices of the Rosenbach Foundation, which was established by his brother and junior partner Philip Rosenbach (1863–1953).

[Hillel Halkin]

ROSENBAUM, JONATHAN (1947–), U.S. scholar, administrator and rabbi; president of Gratz College from 1998. A graduate of the University of Michigan where he received his B.A. summa cum laude in 1968 and was elected to Phi Beta Kappa, Rosenbaum then earned rabbinical ordination and an M.A. at the Hebrew Union College-Jewish Institute-Jewish Institute of Religion in Cincinnati (1972) and a Ph.D. in Near Eastern Languages and Civilization from Harvard University working with Professor Frank M. Cross, Jr. on “A Typology of Aramaic Lapidary Script from the Seventh to the Fourth Centuries, B.C.E.” (1978). He taught in the Department of Religious Studies at the University of Nebraska and then went to the University of Hartford, where he was the Maurice Greenberg Professor of Judaic Studies, professor of history, and director, Maurice Greenberg Center for Judaic Studies, University of Hartford, from 1986 to 1998. He conceived and helped guide the Henry Luce Forum in Abrahamic Religions, a national program jointly sponsored by the University of Hartford and Hartford Seminary that is devoted to advancing scholarship concerning and mutual understanding among American Jews, Christians, and Muslims. In addition, Rosenbaum conceived and oversaw an awards program that recognizes the best teachers of Holocaust studies in New England.

He also taught in the graduate school at the University of Connecticut and at its law school as well as the Hartford Theological Seminary.

A rarity in the contemporary Jewish world, he has served as a rabbi in Reform, Conservative, and Orthodox Congregations. During his student years at HUC, he held a student rabbi position at Congregation Israel (Reform), Galesburg, IL, from 1970 to 1972. While at Harvard he was assistant rabbi, Temple Israel (Conservative), Swampscott, MA, (1972–76), and then a

part-time rabbi of Congregation Israel (Conservative), Danville, IL (1976–84). And finally as his commitment to Jewish law deepened he was rabbi (*marā' de-atra*) at Congregation Agudas Achim, a mainstream, century-old Orthodox congregation in West Hartford, CT, from 1994 to 1998.

Among the awards he received were doctor of divinity, *honoris causa*, by Hebrew Union College-Jewish Institute of Religion, in March 1997, and doctor of Hebrew Letters, *honoris causa*, from the Jewish Theological Seminary in November 1998.

Among his works are *Making a Life, Building a Community: A History of the Jews of Hartford* (co-authored with David G. Dalin, 1997) and a special issue of the *Journal of Jewish Communal Service* (78:4, 2002) devoted to Philadelphia Jewry that he co-edited with Dr. Ernest M. Kahn.

From 1995 to 1998 Rosenbaum served as a deputy director of the Ein Gedi Archaeological Expedition in Israel, an excavation co-sponsored by the Hebrew University of Jerusalem and the University of Hartford. At Ein Gedi he oversaw the excavation's academic program including two courses in archaeology and Near Eastern history. He also organized and chaired “Paleographical Studies in the Ancient Near East,” a scholarly section of the national meeting sponsored by the Society of Biblical Literature.

An administrator-scholar, at Gratz he instituted new programs, expanded the faculty and staff, renovated the academic plant, and balanced the budget. He renewed a distinguished institute and refashioned its mission in a changing academic climate. Prior to that at the University of Hartford he initiated the Greenberg Center and established a major in Judaic Studies along with a minor. He also expanded the full-time faculty to six and three adjunct faculty. All the while, he continued with his teaching and writing.

[Michael Berenbaum (2nd ed.)]

ROSENBAUM, MORRIS (1871–1947), English rabbi and scholar. Rosenbaum, who was born in London, received his early education in the Jewish Orphanage, London. Later he studied at Jews' College and University College, London. After doing communal work in London, Rabbi Rosenbaum became minister of the Jewish congregation of Hanley (Staffordshire), and shortly afterward of the community in Newcastle-on-Tyne. In 1905 he returned to London to become minister-secretary of the Borough Synagogue, a post he held until his retirement 30 years later. Rosenbaum's wide interests included mathematics, and he was a recognized authority on the Jewish calendar and was responsible for the authorized Jewish almanac. His labors in the field of Anglo-Jewish genealogy brought him inquiries from prominent historians. He was also active in freemasonry and held offices in the brotherhood. Rosenbaum, together with A.M. *Silbermann, translated Rashi's commentaries on the Torah into English: *Pentateuch with Targum Onkelos, Haphtaroth and Prayers for Sabbath and Rashi's Commentary* (5 vols., 1929–34).

[Alexander Tobias]

ROSENBAUM, MOSES HAYYIM LITS (1864–1943), Hungarian rabbi. Rosenbaum was born in Pressburg, and was ordained by Simḥah Bunim Sofer (see *Sofer family). He served as rabbi of two large communities, in Szilágysomlyó (Simleul Silvaniei), Transylvania, from 1888 to 1897, and from 1898 until his death in Kleinwardein. On the death of R. Koppel Reich in 1929, he was asked to represent Orthodox Jewry in the upper house of the Hungarian parliament but refused, preferring to devote himself to his large community. He was an excellent preacher in Yiddish, German and Hungarian.

He published *Meshiv Devarim* (2 parts, 1900–02), responsa on *Orah Hayyim* and *Yoreh De'ah* by his father Gershon, rabbi of Tallya, adding his own notes. He was also the author of *Lehem Rav* (1921), on the prayer book. The bulk of his writings, however, which fill 15 large volumes, remained in manuscript; among them is a diary, one chapter of which was published by N. Ben-Menahem in *Aresheth*, 1 (1958), that is of considerable interest. Although an extremist in religious matters, Rosenbaum did not ignore the *Haskalah literature, and sent a message of congratulation to Leopold *Zunz, founder of *Wissenschaft, on his 90th birthday. Of his two sons, Samuel, who succeeded him in Kleinwardein, perished in the Holocaust in 1944, and his grandson, Pinḥas Rosenbaum, published his responsa *Elleh Divrei Shemu'el* (1961).

BIBLIOGRAPHY: N. Ben-Menahem, in: *Aresheth*, 1 (1958), 486–8; idem, *Be-Sha'arei Sefer* (1967), 126–8.

[Naphtali Ben-Menahem]

ROSENBAUM, SAMUEL (1919–1997), cantor and organizational executive. Rosenbaum was born in New York City and received his B.A. from New York University in 1940. Simultaneously, he studied music and liturgy privately under renowned Cantor Jacob *Beimel. He began his cantorial career at the Queens Jewish Center, Queens Village, New York (1940–42), which was interrupted by military service in the U.S. Army during World War II. In 1946, Rosenbaum became cantor of Temple Beth El in Rochester, New York, where his innovative work in musical programming won him national recognition in the form of awards from the Cantors Assembly and the *United Synagogue (1965). Upon his retirement, he was awarded an honorary doctor of music degree from the *Jewish Theological Seminary in 1985.

Rosenbaum was active in the Cantors Assembly from its founding in 1947, serving as the editor of its journal, *The Cantor's Voice* (1951–66), before being elected president of the association (1956–59). Following his term of office, Rosenbaum was appointed the organization's executive director (1959–97). Under his leadership, the assembly grew to become the world's largest association of cantors and spearheaded the expansion of its members' roles beyond performing at services to becoming involved in congregational and educational programming. Rosenbaum was also a fellow at the Cantors Institute of the *Jewish Theological Seminary (1960), where he assisted in placing graduates. In 1970, he became managing editor of the *Journal of Synagogue Music*, published by the Cantors Assembly.

A prolific composer, Rosenbaum was commissioned by Conservative and Reform congregations to write some 30 solo and choral works. In 1973, his oratorio *Yizkor: In Memory of the Six Million*, written with Sholom *Secunda, was performed on ABC-TV's *Directions* and nominated for an Emmy Award. Rosenbaum also wrote books and narrated several record albums. He developed a new method for teaching biblical cantillation, which he set forth in *A Guide to Haftarah Chanting* (1973). His other books are *Sabbath and Festival Songs for the Young Singer* (1959) and *To Live as a Jew* (1960). He released *Four Holiday Recordings* in 1981. Other major musical compositions include: *Sing a Song of Israel* (with Issachar Miron, 1962); *Oneg Shabbat* (with Sholom Secunda, 1964); *A Singing of Angels* (with Charles Davidson, 1967) and *The Last Judgment* (with Lazar Weiner, 1967).

[Bezalel Gordon (2nd ed.)]

ROSENBAUM, SEMYON (Shimshon) (1860–1934), jurist and Zionist. Born in Pinsk, Rosenbaum practiced law there and in Minsk. In 1880s he joined the *Ḥibbat Zion movement, and was a delegate to the Zionist Congresses until World War I. At the Fourth Congress in 1900, he was elected to the Zionist General Council and served as a delegate of the Zionist center to the Minsk district. He organized the *Minsk Conference of Russian Zionists in 1902. Rosenbaum's point of view was close to that of the *Democratic Fraction in the Zionist Organization, and he helped to organize the first *Po'alei Zion groups in the Minsk district in Lithuania. He was among the leaders of *Ziyyonei Zion*, who actively opposed the *Uganda Scheme. At the *Helsingfors Conference in 1906, he was made a member of the Zionist central committee of Russia.

Rosenbaum held a central position in the League for the Attainment of Legal Rights for the Jews in Russia. He was elected to the first Russian *Duma in 1906 and joined the liberal Constitutional-Democratic ("Kadet") faction. When the Duma was dissolved, he was among those Duma members who signed the manifesto calling for civil disobedience and nonpayment of taxes and was sentenced to prison. After his release, he engaged in providing legal assistance to pogrom victims and to Zionists persecuted by the Russian authorities. After the outbreak of World War I, Rosenbaum moved to Vilna and was elected head of the Zionist organization there. He participated in the negotiations with the Turkish government concerning the future of Palestine after the war (1918). He also took part in the establishment of independent Lithuania in 1919. He was deputy minister of foreign affairs in the first Lithuanian government and a member of its delegation to the Versailles Peace Conference. He signed the peace treaty with the Soviet Union on behalf of the Lithuanian Republic. He was a member of the commission that drafted the Lithuanian Republic's constitution, which granted the Jews wide national autonomy. Rosenbaum was the president of the National Council of the Jews in Lithuania and in 1923 became minister of Jewish affairs. In 1924, after the annulment of the Jewish autonomy, he went to Palestine, where he engaged in

public activities in *General Zionist circles. He was chairman of the supreme Jewish peace court, and one of the founders of the Tel Aviv School of Law and Economics. He wrote many essays on Zionist and juridical subjects, including his research *Der Souveraenitaetsbegriff* (1932).

[Yehuda Slutsky]

ROSENBERG, ABRAHAM (1870–1935), U.S. labor leader. Born in Russia, Rosenberg immigrated to the United States in 1883. He worked as a cloakmaker in New York's sweatshops and by 1885 was active in the immigrant labor movement. Because the American Federation of Labor (AFL) neglected semiskilled and unskilled immigrants, Rosenberg joined in organizing a dress and cloakmakers' union as part of the Knights of Labor. Its failure led Rosenberg to help create the International Ladies Garment Workers' Union (ILGWU), the first permanent labor organization in the women's garment industry.

In 1908 Rosenberg was elected president of the ILGWU. He assumed control at a crucial moment. The panic of 1907 and the ensuing depression spread unemployment and decimated the union's ranks. Within three years however, Rosenberg helped to guide the ILGWU to victory in two major strikes, those of the waistmakers in 1909 and the cloakmakers in the following year. The latter strike was settled on the basis of the famous Protocol of Peace – a concept which Rosenberg helped to spread of labor-management bargaining supervised by impartial arbitrators representing the public.

As president of the ILGWU, Rosenberg was overshadowed by his secretary-treasurer John *Dyche. Dyche came into conflict with New York's rank and file cloakmakers, who were anxious to break the protocol outlawing strikes. The 1914 ILGWU convention, dominated by the socialists, deposed both Rosenberg and Dyche for being union conservatives and anti-socialist. In fact, while committed to peaceful collective bargaining and moderate union tactics, Rosenberg was a devoted socialist. He played no prominent role in union affairs after 1914. Rosenberg remained a general organizer of the union until his retirement in 1929. In 1920 he wrote his memoirs in Yiddish, *The Cloakmakers and their Union*, which show his direct, warm, and human approach to all the problems he had to deal with.

[Melvyn Dubofsky]

ROSENBERG, ABRAHAM HAYYIM (1838–1928), Hebrew writer. Born in Russia, he wrote articles for the Hebrew and Yiddish press. He emigrated to the U.S. in 1891, and operated a Hebrew printing shop.

Rosenberg's main achievement was the biblical encyclopedia in ten volumes, *Ozar ha-Shemot* (1898–1922). For a brief period of time, in 1897, he coedited (with A.M. Radin) the Hebrew monthly *Ner ha-Ma'aravi*, and between 1900 and

1902 *Ha-Modi'a le-Hodashim*, a Hebrew monthly (first together with H. Rosenthal, and in 1902 alone).

BIBLIOGRAPHY: Kressel, *Leksikon*, 2 (1967), 841.

[Eisig Silberschlag]

ROSENBERG, ALFRED (1893–1946), chief Nazi ideologist and head of the Nazi party's foreign policy department. Rosenberg was born in Reval (Tallin), Estonia. There is some doubt about the family's German origin though their name is German. Rosenberg studied architecture at Riga and Moscow and witnessed the Russian Revolution, which he believed to have been "engineered by Jewry." He fled to Germany and settled in Munich at the end of 1918, immediately became active in nationalist, antisemitic circles and published *Die Spur der Juden im Wandel der Zeiten* ("The Track of the Jews Through the Ages," 1920). When the German Workers Party (DAP), the precursor of the NSDAP (Nazi Party), was founded, he joined it even before *Hitler. Later, as a member of Hitler's inner circle, he became editor (1921) and later chief editor (1923) of the party's *Voelkischer Beobachter*. He impressed Hitler with his linkage of the Jews, the Bolsheviks, and the Masons as supposedly engaging in a conspiracy to destroy the foundations of German civilization. Rosenberg published antisemitic pamphlets and introduced the Protocols of the *Elders of Zion in Nazi propaganda. He participated in the 1923 beer hall putsch. In 1930 he published his main work, *Der Mythos des 20. Jahrhunderts*, which appeared in 24 editions by 1934, constituting a hodgepodge of ideas from Nietzsche and various racist theories. The book propounds the doctrine of an "Aryan race" as the creator of all values and culture. The protagonists of this "Aryan race" are the Germanic peoples, while the "Jewish race" had corrupted culture in different forms, one of them being Paulinic Christianity. Bolshevism, he claimed, was a new form of the Jewish quest for world rule, and, to rid themselves of Jewish corruption, the German people were obliged to replace Christianity by a new faith, based on "blood and race." With Hitler's advent to power, Rosenberg achieved renown, became head of all the party indoctrination organizations, and was later appointed by Hitler chief of the Nazi Party's foreign policy office (APA), where he ineffectually dabbled in diplomatic affairs. In fact, his office served only for disseminating antisemitic propaganda. In 1940 Hitler appointed Rosenberg head of the Hohe Schule, the future ideological University of Nazism. On its behalf Rosenberg's emissaries ransacked Jewish libraries all over Europe and concentrated their contents in Frankfurt. He headed a special staff which plundered objects of art and furniture belonging to Jews in occupied Western Europe and French art works from France, which were brought to Germany. At the outbreak of the war against Russia Rosenberg was appointed minister of occupied countries in the East and head of their civil administration (November 1941). He did not object to the annihilation of Jews, but came into conflict with the SS and their collaborators on the policy of murder, starvation, and repression of the non-Russian minorities in the occupied areas of the U.S.S.R., as it ap-

pears from correspondence in the so-called "Braune Mappe" (on the status of the local population in the Soviet territories occupied by the Germans, including correspondence with *Eichmann). He preferred more lenient methods in order to set the minority peoples against the Russians. Finally he accepted the harsher methods advocated by leading personalities of the Reich. Rosenberg, unrepentant and immovable at his trial, was hanged by sentence of the International Military Tribunal. *The Memoirs of Alfred Rosenberg* (ed. by S. Lang and E. Schenck) appeared in 1949, and Rosenberg's *Letzte Aufzeichnungen* was published in 1955.

Feist, *The Face of the Third Reich: Portraits of Nazi Leadership* (1970).

[Yehuda Reshef /Michael Berenbaum (2nd ed.)]

ROSENBERG, ANNA MARIE LEDERER (1902–1983), U.S. assistant secretary of defense; public relations and labor consultant. Born in Budapest, Hungary, the daughter of Albert Lederer and Charlotte Bacskai, Rosenberg moved with her family to New York City in 1912. She married Julius Rosenberg in 1919 and became a naturalized citizen the next year. As she became active in Democratic politics, then New York Governor Franklin Roosevelt sought her advice on labor matters. Rosenberg went on to serve in a number of capacities during the New Deal. She was an assistant to Nathan Straus, Jr., regional director of the National Recovery Administration (NRA) and succeeded him when Straus resigned. After Rosenberg served as New York regional director of the Social Security Board, President Roosevelt asked her to study industrial relations in both Great Britain and Sweden. Throughout her work on the Social Security Board, Rosenberg maintained a consulting firm. In 1942 the U.S. House Appropriations Committee investigated allegations of impropriety in holding two positions, but found Rosenberg to be innocent of any wrongdoing. Still, when she accepted the position of director of the War Manpower Commission for New York State that same year, she put her consulting practice in abeyance for the duration of the war. Her work on the War Manpower Commission included recruiting workers of all races to fill some 20,000 positions for the Pacific Coast Kaiser shipyards. As the war was winding down, Roosevelt sent Rosenberg to Europe to investigate what soldiers wanted after the war. Her report that they wanted to improve themselves through education helped lead to the GI Bill of Rights. President Harry S. Truman also called upon her expertise in evaluating the repatriation and demobilization of the troops. When Anna Rosenberg was appointed assistant secretary of defense, the first woman to hold that position, she had to survive a smear campaign claiming that she

was a communist, an allegation that was proved false. Rosenberg worked on increasing the number and use of women in the military and she helped draft the Universal Military Service and Training Act. When President Eisenhower replaced her, she returned to decades of consulting work at Anna M. Rosenberg & Associates. Rosenberg received many honors, including the Medal of Freedom in 1945; in 1947 she became the first woman to receive the Medal for Merit. The Department of Defense recognized her with its Exceptional Civilian Award in 1953, and in 1966 she received the Medallion of the City of New York for her beautification efforts. As early as the 1930s, she was known for her philanthropic work, serving on the National Council of Jewish Women, the ORT Reconstruction fund, and the women's division of the Joint Distribution Committee of Jewish Charities.

[Sara Alpern (2nd ed.)]

ROSENBERG, ARTHUR (1889–1943), German communist leader and historian. Born in Berlin, Rosenberg lectured in history at Berlin University and joined the German Independent Social Democratic Party (USPD) in 1918. Two years later, he became attached to the German Communist Party (KPD), in which he achieved considerable prominence as communist City Councilor of Berlin, a member of the Party Central Committee, and a member of the Reichstag from 1924 to 1928. Rosenberg joined the extreme left-wing faction but in 1927 left the Communist movement altogether largely in protest at the failure of the Soviet Comintern to deal with the question of China. He withdrew from political life, and devoted himself to scholarly work. After Hitler's seizure of power, Rosenberg left Germany and lived in Liverpool, England, where he was granted a fellowship at the university. He went to New York in 1938 and taught history at Brooklyn College until his death. Rosenberg converted to Christianity in his youth but later was active in Jewish student and academic circles in Germany and England. The fact that he became adviser to the Avukah Zionist Students Federation of America testifies to the radical change in his religious views.

His many publications include: *Geschichte des Bolschewismus von Marx bis zur Gegenwart* (1932; *History of Bolshevism*, 1934); *Demokratie und Sozialismus* (1938; *Democracy and Socialism*, 1939); *Geschichte der deutschen Republik* (1935; *History of the German Republic*, 1936); and *Die Entstehung der deutschen Republik, 1871–1918* (1928; *Birth of the German Republic*, 1931).

Schaefer (eds.), "Klassische" Antike und moderne Demokratie: Arthur Rosenberg... (1986); L. Riberi, *Arthur Rosenberg* (2001); M. Kessler, *Arthur Rosenberg* (2003).

[Noam Zadoff]

ROSENBERG, EUGENE (1907–1990), British architect. Rosenberg was born in Topolcany, Slovakia, went to England

in 1939, and from 1944 practiced as an architect. He made an important contribution to postwar building in Britain with his designs for over 50 primary and secondary schools, and a number of university buildings at Warwick, Oxford, Liverpool, Leeds and Rochdale.

His public buildings include the United States Embassy in London (together with Eero Saarinen Associates) and a series of new airports. He also designed hospitals, industrial buildings, department stores, offices, and a number of housing schemes. He designed the new building for Jews' College London, the synagogue in Belfast, and the London offices of the Jewish Welfare Board.

ADD. BIBLIOGRAPHY: Obituary in *The Architect's Journal* 22 (1990), 12.

[Charles Samuel Spencer]

ROSENBERG, HAROLD (1906–1978), U.S. art critic and scholar. Born in New York City, Rosenberg was educated at the City College of New York, and he received an LL.B. degree from St. Lawrence University in 1927. From 1939 to 1942 he worked for the Works Progress Administration in Washington, D.C., as a writer and lecturer, authoring the *American Guide* series. Rosenberg was deputy chief of the domestic radio bureau of the Office of War Information from 1942 to 1945. He directed the Longview Foundation from 1944.

Rosenberg lectured extensively throughout the United States on art and literature. He joined the University of Chicago as a professor of social thought in 1966. From 1967 until his death in 1978 he was art critic for *The New Yorker*, and in that capacity he influenced the critical reception of many of the emerging artists of the time, including Jackson Pollock and Willem de Kooning. Called one of the most provocative critics of his time, Rosenberg rejected the formalistic approach of other leading art theorists, including Clement Greenberg, placing the value of the work on the act of creation.

From the early 1950s Rosenberg had shown great interest in the work of a group of artists that included Pollock, de Kooning, and Arshile Gorky. Rosenberg coined the term “action painting,” now widely used in art history and criticism, to describe their work, which he described as “not a picture but an event.” His many reviews and essays were influential in the development of public awareness of the emerging Abstract Expressionist movement, and in the success of many of the Abstract Expressionists, including Mark Rothko, Hans Hoffman, and Philip Guston. At the same time, Rosenberg was a detractor of Pop Art and other art trends of the period and, while he rejected formalism, he was equally dismissive of the postmodern critique.

Rosenberg wrote several influential books, including *The Tradition of the New* (1959), *The Anxious Object: Art Today and Its Audience* (1964), *The De-Definition of Art* (1972), *Art on the Edge* (1975), and monographs on Willem de Kooning, Barnett Newman, Arshile Gorky, and Saul Steinberg. His articles appeared in numerous publications, including *Partisan*

Review, *Art in America*, *Kenyon Review*, *Tempes Modernes*, and *Art News*.

Rosenberg received numerous awards and honors, including the Frank Jewett Mather Award from the College Art Association of America in 1964 and the Morton Dauwen Zabel Award from the National Institute of Arts and Letters in 1976. He was a member of the International Society of Art Critics and of the American Academy of Arts and Sciences.

[Dorothy Bauhoff (2nd ed.)]

ROSENBERG, ISAAC (1890–1918), English poet and painter, who died on active service during World War I. The son of a peddler, Rosenberg was born in Bristol and brought up in the East End of London, where he was apprenticed to an engraver. In 1911 he went to the Slade School of Fine Arts but he felt that he got, in his own words, “more depth” into writing than into painting. In 1912 he produced the first of three privately printed pamphlets of verse, *Night and Day*, following it with *Youth* (1915) and *Moses* (1916). Although he had weak lungs, Rosenberg enlisted in the British Army on his return from a year in South Africa in 1915, and it was while serving in France that he wrote his so-called “Trench Poems,” several versions of his play *The Unicorn*, and many other poems and fragments.

Four years after his death, the first volume of Rosenberg's poems, with an introduction by the poet Laurence Binyon, appeared in print – his first publication apart from some scattered verse in anthologies. In 1937, his *Collected Works* were published with a brief, generous foreword by Siegfried Sassoon, who wrote of Rosenberg's “fruitful fusion between English and Hebrew culture.” Isaac Rosenberg was the first important poet to emerge from Anglo-Jewry and he remains a figure of major significance. Certain images and ideas, such as that of the root, recur throughout his work, giving coherence to his writing. Linguistically he is complex but the sense is controlled by his sensuous feeling. Rosenberg articulates the rootless condition of the Diaspora Jew most clearly in his poem “Chagrin.” In his three “God” poems, he moves from the figure of an acceptable and benign Authority to that of a malignant God. “Dead Man's Dump,” “Break of Day in the Trenches,” and “Daughters of War” are among the most powerful and subtle poems of World War I. Rosenberg is, however, not merely a realist of the trenches: there is in his poetry a streak of romantic lyricism and a love of beauty more reminiscent of Blake than of any 20th-century poet.

Three books about Rosenberg appeared in the summer of 1975. They were *Journey to the Trenches: The Life of Isaac Rosenberg 1890–1918* by Joseph Cohen, *Isaac Rosenberg* by Jean Liddiard, and *Isaac Rosenberg* by Jean Moorcraft Wilson. Cohen's book excels on the literary background and the nature of his Jewishness; Liddiard's on his paintings and drawings; and Wilson uses letters and memoirs extensively. The book by Cohen contains a useful bibliography. Rosenberg's self-portrait is exhibited at the National Portrait Gallery, London, and another was hung in the Tate Gallery in London in 1972. Further biographies and studies of Rosenberg continue to appear.

In January 1978 the trustees of the Imperial War Museum in London accepted 15 of his paintings and some 200 manuscripts, and in 1979 there appeared *The Collected Works of Isaac Rosenberg: Prose, Letters, Paintings and Drawings* (Oxford) in which he is referred to as “the best Jewish poet writing in English that our century has given us.” A plaque in Poets’ Corner in Westminster Abbey, London, commemorating the notable British writers who died in World War I, includes the name of Isaac Rosenberg, surely the only British Jew officially honored in an Anglican church, and a tribute to his stature and fame.

[Jon Silkin]

ROSENBERG, ISRAEL (1875–1956), U.S. Orthodox rabbi and communal leader. Rosenberg was born in Poland and attended the most prestigious *yeshivot* in Eastern Europe. Recognized as a prodigy, he was ordained in Russia in 1899 by Jehiel Michel *Epstein. He immigrated to the United States in 1902 and became the rabbi of a series of congregations: Poughkeepsie, N.Y. (1902–05); Bayonne, N.J. (1905–10); Burlington, Vermont (1910–12); Paterson, N.J. (1912–08); and Jersey City, N.J. (1919–20). In each community, he established a *talmud torah* school for young children. A leading authority on the laws of **kashrut*, he was appointed chief *kashrut* supervisor for several leading meat-packing companies.

Rosenberg was passionate about philanthropy. Under the auspices of the Agudat Harabbonim (*Union of Orthodox Rabbis of the United States Canada), he was instrumental in founding the Central Relief Committee (later absorbed by the American Jewish *Joint Distribution Committee) to help the poor. The following year (1915), he formed the Agudat Harabbonim’s Ezras Torah Fund, which supports needy Torah scholars and their families throughout the world. He continually solicited contributions for major *yeshivot* in Europe and Erez Israel (Palestine) and organized a high-level delegation, headed by Rabbi Abraham Isaac *Kook, comprising to conduct a fundraising campaign on their behalf in the United States in 1924.

Also concerned about the need to produce American-born Orthodox rabbis, Rosenberg was an active supporter of Yeshiva University’s Rabbi Isaac Elchanan Seminary, serving as its first vice president (1910–12) and as acting dean during a leave of absence taken by Rabbi Bernard *Revel (1922–23).

Throughout his career, Rosenberg held the highest leadership positions in the Union of Orthodox Rabbis of the United States and Canada, serving as its vice president (1910, 1913); chairman of its executive committee (1911–12, 1914–15); a lifetime member of the presidium (1926–28, 1940–56); a

two-term president (1928–30, 1940–43); and honorary president (1930–39). He traveled to Europe with a rabbinic delegation in 1919 to organize relief efforts for Jewish communities devastated by World War I and came to the rescue of Jewish refugees in Poland. He also headed the Talmud Publication Society of Agudat Harabbonim, which published a new edition of the Talmud to replace copies destroyed during the war. Years later, he represented Agudat Harabbonim as a member of a five-man commission that met with President Roosevelt in 1942 and received his assurance that Nazis guilty of perpetrating crimes against Jews would be punished.

Rosenberg was an ardent supporter of religious Zionism’s aspirations to settle Erez Israel and served as a *Mizrachi delegate to the World Zionist Congresses in London (1920) and Zurich (1929). He also contributed numerous articles on Jewish law to rabbinic journals, as well as essays to the Yiddish press.

[Bezalel Gordon (2nd ed.)]

ROSENBERG, JAMES NAUMBURG (1874–1970), U.S. lawyer, artist, philanthropist and author. Rosenberg, who was born in Allegheny City, Pennsylvania, engaged in private law practice until 1947; he then retired to pursue an art career; his paintings were subsequently hung in several major U.S. museums. Active in public and Jewish affairs, Rosenberg served as chairman of the Joint Distribution Committee in Europe (1921); founded the Society for Jewish Farm Settlements in Russia (1926), directing the population transfer of 30,000 Jews to Birobidzhan; helped found the Central Bank of Cooperative Institutions in Palestine; and founded the Agro-Joint. He was president of the Dominican Republic Settlement association formed to settle the 100,000 refugees that Trujillo’s government offered to accept at the 1938 Evian Conference. Rosenberg led the U.S. delegation (1947) that sponsored the Genocide Convention adopted by the UN General Assembly in 1948. An art patron as well as a painter, Rosenberg founded New York’s New Gallery which exhibited and sold the works of unknown artists. Rosenberg’s written works include: *Corporate Reorganization and the Federal Court* (1924); *On the Steppes* (1972); *Painter’s Self-Portrait* (1958); and *Unfinished Business* (1967), including personal papers.

ROSENBERG, LAZAR (1862–1936), painter. Rosenberg was born in Kaunas, Lithuania. At the age of 14, he entered the Vilna Art School, in 1879 he enrolled at the Koenigsberg Art Academy and in 1881 was admitted to the Academy in Berlin. There his painting of a copy of one of *Rembrandt’s religious works won him a gold medal and brought him into prominence. In 1890 he moved to Paris and enrolled at the Académie Julian where he was influenced by the work of the Impressionists. An article on his work in the Zionist monthly *Ost und West*, February 1904, written by Julius Levin in Paris, reveals a series of studies of children and old Rembrandtesque Jewish heads. His admiration for the great Dutch painter may have inspired his move to Holland, where he lived from 1910

to 1935, paying annual visits to his family in Lithuania. He gained considerable prominence as a painter and draftsman in Holland, but working outside the main centers of modern art and being of a retiring nature, he has been unfairly neglected. Rosenberg's mature work is largely concerned with Dutch subjects – landscapes, the fishing village of Volendam, fishermen and their wives, interiors of Dutch houses, etc. The influence of Rembrandt remained constant, in the rich, expressive manner of his oil paint; but in the interiors with figures there is evidence of his admiration for older Dutch artists like Vermeer, as well as of Jozef *Israëls in his sympathetic treatment of simple people.

[Charles Samuel Spencer]

ROSENBERG, LOUIS (1893–1987), Canadian demographer, Jewish community worker. Rosenberg was the foremost demographer of Canadian Jewish life and a pioneer in the social scientific study of Canadian Jews. He was born in Poland and raised and educated in Leeds in the United Kingdom. He graduated with a bachelor of arts degree and a teachers certificate from Leeds University in 1914, and moved to Canada in 1915. Throughout his life, Rosenberg shared three strong passions: Zionism, socialism, and the social scientific study of Jewish life.

In Canada Rosenberg settled first in Saskatchewan, where from 1919 to 1940 he was the director of settlements of the Jewish Colonization Association. He believed in the Labor Zionist credo of personal and Jewish redemption through agricultural collective settlement. While in the Canadian west, he also became involved with the Canadian democratic left and the CCF. In 1935 he published the bestselling *Who Owns Canada?* under the pen name of Watt Hugh McCollum. A second edition was released in 1947. The tract critically analyzed Canada's Anglo-Protestant corporate power structure. It was while living in Saskatchewan that Rosenberg also began the research and writing of his classic and pioneering text, *Canada's Jews*, published in 1939 by the Canadian Jewish Congress. This book, in over 400 pages and with 273 tables, presented a comprehensive socio-demographic portrait of the Canadian Jewish community, based largely on data from the 1931 census and other sources, collected by the Dominion Bureau of Statistics, now Statistics Canada. Unmatched in either Jewish or Canadian ethnic demography in terms of its detailed, comprehensive nature, this study was reissued by McGill-Queen's University Press in 1993.

From 1940 to 1945, Rosenberg served as executive director of the western region of the Canadian Jewish Congress. In 1945 he moved to Montreal, where he became national research director of the Bureau of Social and Economic Research of the Canadian Jewish Congress. In fact, Rosenberg was the Bureau and produced a steady stream of research reports on Canadian Jewish demographic, sociological, and economic characteristics. A pioneer in Canadian and Jewish demography, during his lifetime Rosenberg's achievements and commitment to Jewish scientific research were either undervalued

or unrecognized in both the Jewish communal world and in the general Canadian scholarly community.

[Morton Weinfeld (2nd ed.)]

ROSENBERG, LUDWIG (1903–1977), German trade union leader. Born in Berlin, Rosenberg was the son of a merchant, and received a commercial education. In 1925 he joined the Clerical Workers' Union and in 1928 became a full-time official of the union. After a course of study at the government school for economics and administration, Rosenberg was appointed head of the commercial section of the union. He went to Britain as a refugee in 1933, where he taught in the Workers' Educational Association and was a freelance journalist. During World War II, Rosenberg headed a section of the British Ministry of Labor. He continued to work for the revival of the German trade union movement and returned to Germany in 1946. In 1949, he became a member of the executive of the trade union movement, and was made the head of its foreign relations department in 1954. In 1959, he became vice president and, in 1962, president of the trade union movement. Rosenberg did much to bring the German trade union movement back into democratic politics, saying that it was not bad politics that affected character but bad character that corrupted politics. He enjoyed a high reputation in Germany and was the first president of the movement who did not come from the working classes. He visited Israel on several occasions and was instrumental in establishing friendly relations between the German trade union movement and the *Histadrut.

[Monika Halbinger (2nd ed.)]

ROSENBERG, MOISHE (1904–1940). Mexican journalist and Yiddish writer. Born in Yablone, province of Warsaw in Poland. At age 18 he moved to Warsaw, where he took general studies. Together with a group of young people he published a journal in Yiddish. In 1929 Rosenberg immigrated to Mexico and in the next year published the first number of the journal *Der Veg*, which became one of the most important information channels of the Ashkenazi community in Mexico. In the middle of 1932 he failed to transform his weekly publication into a daily newspaper, though after 1937 he did succeed in publishing it three times a week.

In 1929 Rosenberg took part in the organization of the youth Zionist movement *Tzeirei Yehuda*. His Zionist position was very evident in *Der Veg*, but he avoided identification with any political party.

At the end of 1937 he started the translation and publication of *The History of the Jews* by Heinrich *Graetz, and until his death he succeeded to publish nine volumes.

[Efraim Zadoff (2nd ed.)]

ROSENBERG, STUART E. (1922–1990), Canadian rabbi. Arguably the most influential rabbi in Canada in the 1960s,

Rosenberg is remembered mostly for the bitter power struggle between him and the officers of Beth Tzedec Synagogue in Toronto, which claimed then to be the largest congregation in the world. It is a harsh fate for a man who inspired thousands and was the driving force behind the creation of several important Toronto Jewish institutions.

Born in Brooklyn, New York, Rosenberg was educated at the Flatbush Yeshiva elementary school, a public high school, Brooklyn College (B.A.), Columbia University (Ph.D. in Jewish history), and the Jewish Theological Seminary (M.H.L. and rabbi). In 1946, he took his first pulpit, Temple Beth El in Rochester, New York, where his dynamism and forceful manner of speaking made an impact in the synagogue and in the community at large. In 1956, he was called to the pulpit of Toronto's Beth Tzedec, formed through the merger of the two upscale inner-city synagogues founded by Jews of Eastern European origin. The new congregation had just erected a cathedral synagogue in a suburban setting, a short distance from the (Reform) Holy Blossom Temple, and its board sought a rabbi who would enable the new synagogue to outdistance its neighbor in prestige and influence. The new rabbi did not disappoint.

In his early years at Beth Tzedec, Rosenberg strengthened the congregational school, established the Prozdor education program for high school and university students, pushed for the establishment of a day school at a time when most Conservative Jews opposed all-day Jewish schools, and spearheaded the drive to bring the Ramah camping movement to Canada. At his prompting, Beth Tzedec established the first Jewish museum in Canada and sponsored an impressive array of adult education programs including hosting Elie *Wiesel and David *Ben-Gurion. On an average Sabbath morning, more than 1,000 people heard Rosenberg speak from the pulpit.

The rabbi also established himself as a community leader by becoming a force in charitable and professional organizations in the Jewish and general communities. In 1967 he became the first rabbi to head Toronto's annual UJA fund drive. Six years earlier, he had journeyed to the Soviet Union. Despite community pressure, he spoke out publicly against the oppression of Soviet Jews and succeeded in bringing the issue to the forefront of the community agenda. Rosenberg supported University of Toronto students in their campaign for a Jewish Studies program and, together with lay leaders, set up the Canadian Foundation for Jewish Culture in 1965 to promote teaching and research in Jewish Studies. He served as president. He wrote a regular column in the *Toronto Star*, published 17 books, and wrote dozens of articles on Judaism, Canadian Jews, theology, Quebec separation, and other topics.

Not all of Rosenberg's initiatives were successful. Notable failures were his attempt to establish a Canadian branch of the Jewish Theological Seminary and his campaign to obtain public funding for Jewish day schools. And, as might be expected, the successes often left hurt and resentful people in their wake.

By the late 1960s, Beth Tzedec congregants inspired by the *havurah* movement and a young, new educational director, Rabbi Ben Hollander, began pressing for a more personal, more traditional, less rabbi-centered synagogue. Rosenberg resisted, and a bruising struggle between his supporters and opponents ensued, including lawsuits and accusations of both impropriety and criminal behavior. The suits were settled out of court. Rosenberg went on to Beth Torah, a small Toronto synagogue, but he never regained his former influence.

[Michael Brown (2nd ed.)]

ROSENBERG, YEHUDA YUDEL (1859–1935), Canadian rabbi and author. Rosenberg was born in Skaryszew, Poland, and acquired a thorough rabbinic and ḥasidic education. He also was exposed to maskilic literature and became fluent in Russian, earning an official permit to function as a rabbi in Poland. Having failed in business, he turned to rabbinic positions in Tarlow, Lublin, Warsaw and Lodz, where he attempted to create a ḥasidic following as the Tarler Rebbe (1909–13) before immigrating to North America. He arrived in North America in 1913, settling first in Toronto (1913–18), and then in Montreal (1919–35). In both cities he engaged in often heated disputes with other immigrant Orthodox rabbis over the supervision of kosher meat. In Montreal, he was instrumental in the creation of a united Orthodox rabbinate, and became vice president of the rabbinic council (Va'ad ha-Rabbanim) of Montreal's Jewish Community Council (Va'ad ha-'Ir) (1923–35).

Rosenberg was a prolific author in Hebrew and Yiddish in numerous genres. His rabbinic publications included a supercommentary on Tractate *Nedarim*, *Yaddot Nedarim* (1902), and *Me'or ha-Hashmal* (1924) on the halakhic issues surrounding electricity. He published several volumes of homilies, including *Ateret Tiferet* (1931), and *Peri Yehudah* (1935). A volume of responsa remains in page proof. He edited a short-lived rabbinic journal, *Kol Torah* (1908). He is best known for his re-edition and translation of the *Zohar* into Hebrew, entitled *Zohar Torah* (7 vols., 1924–30), and for his stories of the Maharal of Prague (*Nifla'ot Maharal im ha-Golem* (1909), and *Sefer Hoshen ha-Mishpat shel ha-Kohen ha-Gadol* (1913)), the first of which served to popularize the story of the Maharal and the Golem in the 20th century. In these works, he did not present himself as the author of the tales but rather as an editor of manuscripts emanating from a nonexistent "Royal Library of Metz." He further published tales of biblical heroes (*Sefer Elyahu ha-Navi* (1910) and *Sefer Divrei ha-Yamim le-Shelomo ha-Melekh* (1914)) and of ḥasidic leaders (*Tiferet Mahar'el mi-Shpole* (1912); *Der Greiditzer* (1913?)), and a medical book (*Sefer Refa'el ha-Malakh* (1911)) which reflected in part his practice of homeopathic medicine.

[Ira Robinson (2nd ed.)]

ROSENBERG CASE, U.S. spy case involving Julius Rosenberg (1918–1953), his wife, Ethel (1920–1953), Morton Sobell (1918–), and others. They were charged and convicted of conspiracy to deliver U.S. atomic bomb secrets to Russia (1951). The case was tried in New York before Judge Irving R. Kaufman, who declared he sought divine guidance before imposing sentence. The principal witnesses, judge, and chief prosecutor were Jews. The Rosenbergs were sentenced to death. There was a worldwide outcry: Some felt that the Rosenbergs were not guilty; others felt they should be permitted to live in case one day they might be persuaded to talk, and finally there were those who were against capital punishment in general or felt that peace-time spying should not be a capital offense. The case was carried to the U.S. Court of Appeals and then the Supreme Court. After executive clemency was denied by President Eisenhower, a further effort was made to secure a Supreme Court review. Justice Douglas granted a stay during the court's summer recess, but the court was summoned into extraordinary session and, by a narrow vote, set aside the stay and permitted the sentence to be carried out. Justice Felix Frankfurter wrote a dissenting judgment, protesting the unseemly haste and lack of full review. The Rosenbergs were the first civilians convicted as spies to be executed in the U.S. Sobell was not charged with transmission of the bomb secrets but with having agreed to supply national defense data. He was sentenced to 30 years' imprisonment. His wife and mother worked tirelessly on his behalf and enlisted many distinguished persons in his cause. His wife raised and spent \$1,000,000 on seven court appeals. Sobell was released by a United States Court of Appeals in 1969 after having served 17 and a half years. The case remained a highly controversial one, the subject of many books and articles by objective students as well as proponents of special causes. The Rosenbergs were executed on a Friday evening, which was regarded by some as evidence of antisemitism in the case; their children were raised under the name of their adoptive parents. Robert and Michael Meeropol have pressed for an opening of some secret records.

After the collapse of the Soviet Union and the opening of its archives, little doubt remains in the scholarly community over Julius' guilt, but the participation of Ethel is seen as marginal at most. Among those who switched positions was Smith College historian Allen Weinstein, who said that under today's circumstances Ethel would probably have not been indicted, let alone executed. She is listed in Soviet archives as Julius' wife but did not have a code name.

[Elmer Gertz / Michael Berenbaum (2nd ed.)]

ROSENBLATT, BERNARD ABRAHAM (1886–1969), U.S. lawyer and Zionist. Rosenblatt, who was born in Gorodok, Galicia, was taken to the U.S. in 1892. Rosenblatt, as a Columbia University student, established in 1905 the first Zionist student organization, the Columbia University Zionist Organization, and was a founder of the Collegiate Zionist League at the end of 1906. From 1911, he served as the secretary of the American Zionist Federation. In 1916 he was an unsuccessful Democratic candidate for Congress and in 1921 he was appointed a New York City magistrate. As founder and first president of the American Zion Commonwealth (1915), a land development firm dedicated to facilitating Jewish settlement in Palestine, he supervised the land acquisition for, and subsequent establishment of, the towns of Herzliyyah, Afulah, Balfouria, and settlement in the Haifa Bay region. In his capacity as the first U.S. delegate to be appointed to the World Zionist Executive (1921), he was responsible for floating the first issue of Palestinian bonds in the U.S., setting the pattern for subsequent Israel bonds sales.

He was chairman of the board of Tiberias Hot Springs, Ltd. (1935–40), president of both the Jewish National Fund (1923–37) and the Keren Hayesod of America (1941–46), and vice president of the Zionist Organization of America (1927–48). Rosenblatt wrote: *Two Generations of Zionism* (1967), his autobiography; *Social Zionism* (1919); *Federated Palestine and the Jewish Commonwealth* (1941); and *The American Bridge to the Israel Commonwealth* (1959).

BIBLIOGRAPHY: A. Friesel, *Ha-Tenu'ah ha-Ziyyonit be-Arzo'ot ha-Berit ba-Shanim 1897–1914* (1970), 155–7 and index; S.S. Wise, *Challenging Years* (1949).

ROSENBLATT, H. (pseudonym of **Hayyim Royzenblit**; 1878–1956), U.S. Yiddish poet. Born in Rishoshe, Poland, he emigrated to the U.S. in 1892. From the age of 13, he worked in a sweatshop. Having tried 15 different professions, Rosenblatt turned to poetry, with which he had always been preoccupied. From 1900, he published his lyrics in Yiddish periodicals. At first he was under the influence of Morris Rosenfeld and followed the realistic tradition of the “Sweatshop Poets,” but he also felt the impact of the Yiddish lyric masters S.S. Frug, Abraham Reisen, Yehoash, and of English and American poets. He reproduced in Yiddish verse the rhythms, alliterations, and assonances of Edgar Allan Poe's “The Raven” and Oscar Wilde's “Ballad of Reading Gaol.” In symbolism he discovered a more congenial style for his lyrics. The impressionistic literary movement, Di Yunge, then hailed him as its precursor and ally. In 1916 he edited the Detroit literary weekly *Detroyter Vokhnblat*, obtaining contributions from poets and novelists of Di Yunge. In 1921 he settled in Los Angeles where for more than a third of a century he was a central figure in Yiddish cultural life. The collected poems of his pre-California period

appeared in 1915, but his best lyrics, ballads, and contemplative verses were the later works included in the volumes *Odems Kinder* ("Adam's Children," 1944), *Mayn Likhtike Nesiye* ("My Illustrious Journey," 1944), *In Shenstn Tog fun Harbst* ("On the Nicest Day of Autumn," 1953), and *Far-Nakht* ("Evening," 1957). Rosenblatt discovered for Yiddish poetry the American West, especially California's deserts, mountains, and ocean, and versified legends of Native Americans. His poems, set to music by various composers, had a calm, optimistic attitude and a gentle humor.

[Sol Liptzin]

ROSENBLATT, JOSEF (Yossele; 1882–1933), *hazzan* and composer. Born in Belaya Tserkov, Russia, Rosenblatt toured Eastern Europe as a child prodigy, conducting synagogue services together with his father. When he was 18 years old he was appointed *hazzan* in Mukachevo. He moved to Bratislava in 1901 and to Hamburg five years later. In 1912 he emigrated to the U.S. and became *hazzan* of the Ohab Zedek Congregation in New York. Rosenblatt became widely known in the U.S. and Europe through extensive concert tours. In 1918 he refused, on religious grounds, to appear with the Chicago Opera Company in Halevy's *La Juive* at \$1,000 per performance, but in 1928 he did allow his voice to be heard in the first full sound film, Al *Jolson's *The Jazz Singer*. The most popular *hazzan* of his time, Rosenblatt earned huge salaries and concert fees. Nevertheless, he was almost continually in debt, giving much of his income to charity and to the support of members of his family. Naïve in business matters, he agreed to provide financial backing for a dubious Jewish newspaper venture. In 1925 he was forced to declare bankruptcy but undertook a rigorous schedule of appearances in vaudeville to pay off his debts. Rosenblatt's immense popularity with Jewish and gentile audiences never waned. He died in Jerusalem while working on a Yiddish film. Rosenblatt possessed a tenor voice with the exceptional range of two-and-a-half octaves of full voice combined with a remarkably agile falsetto. He constantly impressed his listeners with his brilliant coloratura coupled with the sweetness and control of his voice and his "sob" in devotional passages. He composed hundreds of liturgical melodies that reflect his Ḥasidic background in their tunefulness; many of these achieved great popularity and a permanent place in the repertoire of the synagogue. Some of his compositions, however, are of little melodic interest, while others demand a vocal range as wide as that of the composer and are therefore rarely sung by other *hazzanim*. Some of his best-known pieces appeared in the collection *Tefillot Yosef* (1907; 1927²).

The extent of his popular appeal and his influence on synagogue music may be gauged from the widespread distribution of his numerous recordings, which were repeatedly reissued even many years after his death.

[David M.L. Olivestone]

ROSENBLATT (Weizel), MORDECAI BEN MENAHEM (d. 1906), Lithuanian and Polish rabbi and author. Rosenblatt was born in Antopol, district of Grodno, and studied in the yeshivot of Semyatich and Pinsk. He occupied himself with Kabbalah and although unconnected with the Ḥasidic movement achieved renown as a *Zaddik whose blessings were effective. He served as rabbi in various cities – in Buthen, whence his designation as "the Zaddik of Buthen," in Korelitz from 1887, in Oshmyany from 1892, and from 1904 until his death in Slonim. Although he wrote many responsa and novellae to the Talmud, only one of his works, *Hadrat Mordekhai* (1899), containing responsa and novellae, has been published.

BIBLIOGRAPHY: A. Ben-Ezra, *R. Mordekhai mi-Slonim* (1958); Lichtenstein, in: *Pinkas Slonim*, 1 (c. 1962), 123–7.

ROSENBLATT, SAMUEL (1902–1983), U.S. rabbi and scholar. Rosenblatt, son of the famous *hazzan* Josef (Yossele) *Rosenblatt, was born in Bratislava and was taken to the United States in 1912. He was a *cum laude* graduate of City College (1921) and received a rabbinical degree from the Jewish Theological Seminary (1925); he studied in Jerusalem on a fellowship from the American Schools of Oriental Research; and received a Ph.D. from Columbia (1927). In 1926 he served as a rabbi in Trenton and then from 1927 onward Rabbi Rosenblatt served Congregation Beth Tefiloh in Baltimore, Maryland. He headed the Baltimore Board of Rabbis (1952); *Mizrachi (1938–42); and the American Jewish Congress (1942–47). He lectured at Columbia University from 1926 to 1928 and then was associated with Johns Hopkins University from 1930, Rosenblatt taught Jewish literature until 1947, and thereafter Oriental languages.

His writings include: *High Ways to Perfection of Abraham Maimonides* (2 vols., 1927–38); *Interpretation of the Bible in the Mishnah* (1935); a translation of Saadia Gaon's *Book of Beliefs and Opinions* (1948); and *Yossele Rosenblatt* (1954), as well as volumes of sermons and occasional writings. His memoirs appeared as "The Days of My Years," published in weekly installments in *Baltimore Jewish Times*, 1974 onward, and he was also the author of a weekly column in *Baltimore News-American* (1960), and a contributor to *Jewish Quarterly Review*.

ROSENBLATT, SOL ARIEH (1900–1968), U.S. lawyer. Rosenblatt was born in Omaha, Nebraska. In 1935 he began a private law practice in New York, in the course of which he handled the litigation of many celebrities. In 1934 Rosenblatt was appointed administrator of the National Recovery Administration's division on amusement and transportation codes. Later that year he became national administrator of code compliance and was responsible for setting the first minimum wage for theater performers. In 1940 Rosenblatt was general counsel to the Democratic National Committee, and from 1942 to 1945 he was a colonel in the U.S. Army Air Force. From 1935 to 1940 and from 1947 to 1968, Rosenblatt was impartial chairman of the New York coat and suit industry, responsible for supervising labor conditions.

[Edward L. Greenstein]

ROSENBLUM, CARROLL (1907–1979), businessman and U.S. National Football League team owner who ran some of the game's most successful teams from the 1950s to the 1970s, a friend of celebrities and known for gambling on football and horses. He worked in his father's shirt company in Baltimore after attending the University of Pennsylvania, where he was a member of Jewish fraternity ZBT. He was so successful he retired at 33. As World War II began, he returned to business and manufactured material for military work uniforms. In 1953, NFL commissioner Bert Bell, his football coach at Penn, convinced him to organize a group to rescue a failing franchise and create the Baltimore Colts. Rosenbloom's initial personal cash investment for 51 percent ownership was \$13,000. Five years later the Colts defeated the New York Giants 23–17 in the NFL championship, an overtime contest sometimes called "The Greatest Game Ever Played." The Colts repeated as NFL champions in 1959, and remained an elite team through the 1960s. The Colts went into Super Bowl III in 1969 against the American Football League's New York Jets as heavy favorites, but were defeated in one of the greatest upsets in U.S. sports history when Joe Namath led the Jets to a 16–7 victory. Rosenbloom and fellow owners Art Modell (Cleveland Browns), and Art Rooney (Pittsburgh Steelers) facilitated the NFL merger with the AFL by moving to the newly created AFC. The Colts won the first post-merger Super Bowl in 1971, and two years later Rosenbloom traded the Colts to Robert Irsay for the Los Angeles Rams, paying Rosenbloom a reported \$3 million on the side to seal the deal. An active owner, Rosenbloom made the Rams a successful team in the 1970s that won six consecutive division titles. Rosenbloom died in a mysterious drowning in 1979. His widow, Georgia, whom he had met at the Palm Beach home of presidential father and businessman Joseph P. Kennedy, became the Rams' majority owner. Rosenbloom, with business associates Morris Mac Schwebel and Lou Chesler, also acquired the film libraries of Warner Brothers and Twentieth Century Fox, major U.S. movie stu-

dios launched by Jews. The deals came under U.S. Securities and Exchange Commission scrutiny.

[Alan D. Abbey (2nd ed.)]

ROSENBLOOM, MAX EVERITT ("Slapsie Maxie"; 1904–1976), U.S. boxer, light heavyweight champion 1930–34, member of Ring Boxing Hall of Fame and International Boxing Hall of Fame. Rosenbloom was born in Leonard's Bridge, Conn., the son of Russian-Jewish immigrants, His family moved in 1907 to New York's Lower East Side, where Rosenbloom's father worked as a shoemaker, and later to Harlem. He started boxing at the Union Settlement House in Harlem, influenced by an older brother who fought as Leonard Rose, and held various odd jobs, such as elevator operator, railroad laborer, and lifeguard while continuing to box. Rosenbloom first fought professionally at 19 on October 8, 1923, and thereafter he fought often: by the end of 1925 Rosenbloom had fought 48 professional fights with only six losses, and was ranked 10th in the middleweight division in the 1925 annual rankings by *Ring Magazine*. Rosenbloom began his career as a slugger, but because he was not a strong puncher he soon developed an unorthodox hit-and-run style of smacking opponents with open gloves, which led New York sportswriter Damon Runyon to tag Rosenbloom with the nickname "Slapsie."

On October 21, 1929, two months after the massacre of Jews in Hebron, Rosenbloom – along with Ruby Goldstein and Jackie "Kid" Berg – fought at a benefit at Madison Square Garden on behalf of the "Palestine Relief Fund." Nearly 20,000 contributors paid \$101,000 to attend. On June 25, 1930, Rosenbloom beat Jimmy Slattery in 15 rounds to win the world light heavyweight championship, as recognized by the New York Athletic Commission. He was acclaimed the undisputed champion when he defeated Lou Scozza on July 14, 1932. Rosenbloom disliked training and was considered a playboy outside the ring. Nevertheless, he was the busiest titleholder in boxing history, fighting 109 times while champion – only seven were title defenses – the equivalent of one bout every 15 days. Rosenbloom lost the title on November 16, 1934, to Bob Olin, although many sportswriters at ringside believed Rosenbloom had won. It was the 10th and last title match ever between Jewish boxers. His final record in 299 bouts across 16 years was 210 wins (19 KOs), 38 losses, 26 draws, 23 no decisions, and two no contests. After his retirement from boxing, Rosenbloom parlayed his colorful reputation into a successful acting and night club career, often portraying a punch-drunk fighter. He also ran successful nightclubs, Slapsie Maxie's, in San Francisco and Los Angeles. Rosenbloom was inducted into the Ring Boxing Hall of Fame in 1972 and the International Boxing Hall of Fame in 1993.

[Elli Wohlgelernter (2nd ed.)]

ROSENBLOOM, SOLOMON (1866–1925), U.S. banker and philanthropist. Rosenbloom, born in Grodno, Russia, emigrated to the U.S. in 1889 and eventually settled in Pittsburgh.

Extremely active in Jewish affairs and a vigorous supporter of settlement in Palestine, he endowed Jewish studies at the Hebrew University (1922) and served as treasurer and board member of the Palestine Development Council. Rosenbloom was also a founder and president of the Hebrew Institute of Pittsburgh, as well as a trustee of the Jewish Theological Seminary of America and a member of the United Synagogue of America's executive council.

His wife, CELIA NEUMARK ROSENBLOOM, born in Lyck, Germany, was active with her husband in communal and philanthropic work. She donated the building of the Institute of Jewish Studies at the Hebrew University, on Mt. Scopus, Jerusalem, in her husband's memory. An executive board member of the American Friends of the Hebrew University, she was an organizer and honorary president of the Women's Division of the American Jewish Congress.

Their son CHARLES (1898–1973) was also a prominent financier and active in many Jewish causes. He was chairman of the United Jewish Appeal and president of the Jewish Federation of Charities in Pittsburgh. He was also chairman of commissioners of the housing authority in Pittsburgh.

ROSENBLUM, FRANK (1887–1973), U.S. labor leader. Born in New York, Rosenblum moved with his family to Philadelphia, Pennsylvania, where he learned the trade of cloth cutting and joined Local 110 of the United Garment Workers (UGW). In 1908 he settled in Chicago where, as a member of Cutters Local 61, he was active in organizing the clothing workers. During the 1910 general strike in the industry, Rosenblum was active as a strike leader, serving as secretary of the strike committee. The strike settlement, arrived at four months later, contained a provision for arbitration of disputes and an agreement not to discriminate against workers for union activities. In 1914, a split took place in the UGW and Rosenblum was elected vice president of one of the factions, the Amalgamated Clothing Workers of America (ACWA), and later director of its Western Organization Department.

During the 1930s, Rosenblum devoted his special organizing abilities to the new Committee for Industrial Organization. He served as a vice president of the Congress of Industrial Organizations (CIO) from 1940 until 1955, when it merged with the AFL. In 1940, when ACWA general-president Sidney Hillman took up a position in a government agency, Rosenblum was elected general secretary-treasurer, a post which he held until his retirement in 1972.

Throughout his career, Rosenblum was active in the struggle for world peace. He was one of the first major U.S. labor leaders to speak out against U.S. involvement in the Vietnam War and was a founder of the Labor Leadership Assembly for Peace in 1967 and of Labor for Peace in June 1972, both formed with the aim of bringing the Vietnam War to an end. In 1963, Rosenblum received the Clarence Darrow Humanitarian Award for services to the Chicago community. He was a staunch supporter of Israel and the Histadrut.

ROSENBLUM, HERZL (1903–1991), Israeli journalist. Born in Latvia, Rosenblum studied law at the University of Vienna. An associate of Ze'ev Jabotinsky, he made *aliyah* in 1935, after which he worked as a journalist on the Revisionist newspaper *Ha-Boker*. He was a leading member of the "Jewish State" Party, and as its representative signed the Declaration of Independence (signing with the Hebraized translation of his name, Herzl Vardi). Giving up a promising political career in the Knesset, Rosenblum was appointed editor of *Yedioth Aharonoth*, after the "putsch" in 1948 by its editor, Dr. Azriel Carlebach, and the founding of the *Maariv* newspaper. With the newspaper's newsgathering carried out by Dov Yudkovsky, Rosenblum's work comprised writing a signed editorial column which appeared daily until his retirement in 1983. Taking a Revisionist line, the widely read column, with its telegraphic style, also reflected popular Israeli opinion. In *Yedioth Aharonoth's* tradition of being the "nation's newspaper," Rosenblum ensured that the newspaper's op-ed pages were open to a broad spectrum of political opinion. His son and grandson, Moshe Vardi and Doron Rosenblum, were also journalists, Vardi becoming editor of *Yedioth*. His memoirs, *Tippot min Ha-Yam* ("Drops from the Ocean"), were published in 1988.

[Yoel Cohen (2nd ed.)]

ROSENBLUM, SIGMUND GEORGIEVICH (known as **Sidney Reilly** and often referred to as "**Reilly, Ace of Spies**"; 1874–1925?), British spy. Born in Bedzin, Russian Poland, as Shlomo ben Hirsh Rozenblum (and a descendant of the Vilna Gaon), Rosenblum came to London around 1895, and from 1899 was known as Sidney George Reilly. His first exploit occurred in 1895, while serving as cook for a party of three British officers, who were exploring the Amazon in Brazil. The officers were attacked by their bearers and guides, and Rosenblum came to their defense. Rosenblum returned with them to London, where he worked for the British Secret Service, especially in the Far East. He also earned a fortune as an armaments contractor. Before World War I, he played an important role in uncovering the secrets of the German armaments program. During the war (in which he received several medals), he was parachuted many times by the Allies into Germany, enlisted in the German Army, deserted when an assignment was completed, and reenlisted under another name. On one occasion, he murdered a German staff colonel for whom he served as a driver, dressed in the former's uniform, and took his place at a meeting where Kaiser William II and Generals Ludendorff and Hindenburg discussed war plans. Rosenblum was involved in an abortive plot to overthrow the Bolsheviks after the Russian Revolution. He also found time for philandering and in 1918 eight Russian women claimed him as their legal husband. His last mission to Russia took place in 1925. Rosenblum made contact with what he believed to be an anticommunist society, fell into a trap set by GPU (Russia's secret police), and was never heard of again. Reacting to a British television series, the Russians said he was executed in 1925. R.

Bruce Lockhart, however, a noted British agent, thought he was still alive in 1932 and cooperating with the Russians. The balance of evidence, however, suggests that he was executed by the Soviets in Moscow in November 1925. In the 1970s, a popular British television series, *Reilly, Ace of Spies*, was made about his life.

[Morton Mayer Berman]

ROSENBUSCH, KARL HARRY FERDINAND (1836–1914), German geologist. Rosenbusch, who was born at Einbeck, was appointed professor of petrography at Strasbourg University in 1873 and in 1878 became professor of mineralogy and geology at Heidelberg, where he spent the rest of his life. From the 1870s, when he began to publish important works on the subject, until his death, he was one of the great pioneers of petrographic research, and these years were often referred to in the profession as the “Rosenbusch period.”

His *Mikroskopische Physiographic der petrographisch wichtigen Mineralen* (1873; with E. Wuefling, 1904⁴) identified rocks by studying the morphological, physical and chemical properties of their mineral components. It became a standard textbook on the microscopic investigation of rocks for many generations of students and scholars. No less important was his *Mikroskopische Physiographie der massigen Gesteine* (1877, 1896), which made a fundamental contribution to the development of systematic petrography. Combining microscopic and chemical research with field observations, this book gave a strong impulse to the discussion of genetic problems and the passive or active behavior of the magma in mountain building. Rosenbusch’s most widely-used textbook was *Elemente der Gesteinslehre* (1898), which laid great emphasis on rock-chemistry and on the geodynamic processes in the formation of crystalline schists. In this field, he had made a classic contribution as early as 1877 through his study, *Steiger Schiefer und ihre Kontakt-Zone an den Graniten von Barr-Andlau und Hohwald*.

[Leo Picard]

ROSENCOF, MAURICIO (1933–), Uruguayan playwright, novelist, and poet. Born in Florida, Uruguay, he became one of the country’s leading writers and journalists. He was a leader in the underground National Liberation Movement (Tupamaros), and in 1972 he was detained by the military government and held as a political prisoner in complete isolation for more than 11 years. His memoirs as a detainee are compiled in the three-volume *Memorias del calabozo* (1987–88). Rosencof is a major dramatist in Uruguay. His works *Las ranas* (1961), *La valija* (1965), *El saco de Antonio* (1985), and *... y nuestros caballos serán blancos* (1985) are classics of 20th century Uruguayan theater. His early works almost exclusively consisted of a critical view of Uruguayan society and political processes with particular emphasis on the struggle for social justice. Many of his post-incarceration works may be classi-

fied as children’s literature, such as *Canciones para alegrar a una niña* (1985), *Leyendas del abuelo de la tarde* (1990), and *Los trabajitos de Dios* (2001). The novel *Las cartas que no llegaron* (2000) represents the author’s first effort to write a specifically Jewish-themed text. The novel is an intimate, personal memoir of his time spent imprisoned as a political detainee interwoven with his family’s connection to the Holocaust. In doing so, Rosencof joins a number of Latin American Jewish authors who find common ground in the persecution of so-called subversives, tortured and killed in concentration camps by neo-fascist military governments, and Jews murdered under European Nazism.

[Darrell B. Lockhart (2nd ed.)]

ROSENDALE, SIMON WOLFE (1842–1937), U.S. lawyer and public servant. Rosendale, who was born in Albany, New York, received his early education at the school maintained by Rabbi I.M. *Wise. He was admitted to the bar in 1863 and practiced thereafter in his native city. He was recorder of Albany (1868–72) and attorney general of New York State (1892–94). Rosendale was an active worker for the Union of American Hebrew Congregations and B’nai B’rith. He was a founder of the Jewish Publication Society of America and of the American Jewish Historical Society. He served as a vice president of the latter and contributed to its proceedings.

[Sefton D. Temkin]

ROSENFARB, CHAVA (1923–), Yiddish writer. Born in Lodz, Rosenfarb began writing at age eight and was educated at the Medem school and then at a Polish high school. In the Lodz ghetto, her poetry brought her to the attention of Simkha-Bunim *Shayevitsh, author of the epic poem “*Lekh Lekho*,” who became her mentor and introduced her to the writers’ group in the ghetto. Upon liquidation of the ghetto (August 1944), Rosenfarb was deported to Auschwitz, and thence to Sasel and Bergen-Belsen, where she was liberated. In 1950, she immigrated to Montreal. Her literary output after 1947 was prodigious, including four volumes of poetry: *Di Balade fun Nekhtikn Vald* (“The Ballad of Yesterday’s Forest,” 1947); *Dos Lid fun Yidishn Kelner Avrom* (“The Song of the Jewish Waiter Avrom,” 1948); *Geto un Andere Lider* (“Ghetto and Other Poems,” 1950), and *Aroys fun Gan-Eydn* (“Out of Paradise,” 1965). Her play *Der Foygl fun Geto* (“The Bird of the Ghetto”), about the final days of Vilna Ghetto leader Isaac *Wittenberg, was performed in Hebrew in Israel by Habimah in 1966. Dissatisfied with both poetry and drama as means of expression for Holocaust experience, Rosenfarb turned to fiction, publishing the trilogy *Der Boym fun Lebn* (1972; *The Tree of Life*, 1985), chronicling the destruction of Jewish Lodz in 1939–44; it won the Manger Prize in 1979. It remains one of the very few novels – as opposed to memoirs or diaries – written about the Holocaust by an actual survivor. While Rosenfarb’s next novel, *Botshani* (1982), is a prequel to *Der Boym fun Lebn*, the shadow of the Holocaust hovers prophetically over the novel,

as is the case in all of Rosenfarb's work (Eng. tr. in 2 vols., *Bociany and Of Lodz and Love*, 2000). Rosenfarb's novel *Brivtsu Abrashn* ("Letters to Abrasha," 1992) describes the horrors of the concentration camps. Most of Rosenfarb's essays and stories appeared in *Di Goldene Keyt*; some of the stories appeared in a translated collection, *Survivors: Seven Short Stories* (2004). Rosenfarb also published non-fiction in English, notably "Feminism and Yiddish Literature: A Personal Approach," which problematizes the double marginalization of a woman writer who is also a Yiddish writer. In 1994, she published a pamphlet called *Yiddish Poets in Canada*. Rosenfarb was one of the foremost Yiddish writers of the second half of the 20th century.

[Goldie Morgentaler (2nd ed.)]

ROSENFELD, ABRAHAM ISAAC JACOB (1914–1980s?), rabbi and *hazzan*. Rosenfeld was born in Jerusalem and studied at the Yeshivah Etz Hayyim and Merkaz ha-Rav there. He served as both rabbi and *hazzan* to the Finchley Synagogue in London (1941–70) and was appointed honorary president of the Cantors' Association of England. He served as an army chaplain and in 1971 was appointed rabbi of the Wellington, New Zealand, congregation, returning to Israel in 1978. His translation into English of the *Seliḥot* service (1956) and the *Kinot* for the Tishah be-Av (1965) received the approbation of the chief rabbi of England, Rabbi Sir Israel *Brodie. He composed a special memorial prayer for the victims of the Holocaust.

[Akiva Zimmerman]

ROSENFELD, AHARON (1846–1916), Hebrew writer. Born in Volhynia, Rosenfeld taught in various places and in his later years served as government rabbi of Bakhmut.

Rosenfeld, who usually signed his pieces "Avner," wrote poetry and stories and was chief assistant and stylist for the first Hebrew daily, *Ha-Yom*. He edited the popular children's reader *Gan Shaashu'im* (1880), which opened a new era in the field of children's literature in Hebrew. He also published an epic poem entitled *Hillel ha-Zaken* ("Hillel the Elder," 1881).

BIBLIOGRAPHY: Waxman, *Literature*, 4 (1960²), 442.

[Getzel Kressel]

ROSENFELD, FANNY (1905–1969), track and field athlete, Olympic gold and silver medal winner, Canada's Female Athlete of the Half Century (1950), and sports journalist. Rosenfeld was born in Russia in 1905 and immigrated with her family to Canada as a child. She grew up in Barrie, Ontario, before moving to Toronto in 1922. By 1925 Rosenfeld, widely known as "Bobby," had won several Canadian titles and set a number of Canadian track and field records. In 1924 she won the Toronto Women's Tennis Championship and was also a mem-

ber of several championship basketball, softball, and hockey teams, including some sponsored by the YMHA in Toronto.

Rosenfeld represented Canada at the 1928 Olympic Games in Amsterdam, the first time that women's track and field appeared on the Olympic program. She ran for Canada in three events, the 400-meter relay, the 100-meter dash, and the 800-meter race. She won a gold medal in the 400-meter relay and a silver in the 100-meter dash and took fifth place in the 800-meter race. Controversy arose over the finish in the 100-meter dash. Canadian fans were convinced that Rosenfeld actually won even though the medal went to American competitor Elizabeth Robinson. In the 800-meter race, she held back to run beside a faltering teammate in order to offer moral support. She came in fifth in that race when she could easily have won a gold or silver medal. Rosenfeld remains the only Jewish athlete to ever win a gold medal in track and field at the Olympics.

In 1929 Rosenfeld's sporting career was curtailed and finally ended in 1933 as a result of severe arthritis. In 1939 Rosenfeld began a 20-year career writing on sports for Canada's *Globe and Mail* newspaper. Her column, "Feminine Sports Reel," focused on women in sports and sport issues across Canada. In 1950, Rosenfeld was honored as Canada's Woman Athlete of the Half-Century. Public parks in Toronto and Barrie have been named in her honor, and in 1996, Canada Post issued a stamp in her memory. The annual Canadian Female Athlete of the Year awarded is also named in Fanny Rosenfeld's honor and in 2000 the Jewish Women's Archive in the United States named Rosenfeld one of their Women of Valor.

[Avi Hyman and Brenda Cappe (2nd ed.)]

ROSENFELD, ISAAC (1918–1956), U.S. writer and critic. Isaac Rosenfeld enters literary history as a footnote to the life and career of Saul Bellow. In the early 1930s, Bellow and Rosenfeld were schoolmates at Tuley High School in the Humboldt Park neighborhood of Chicago. As young men they went to New York together to make their careers. Bellow would emerge as one of the superstars in the American firmament, while Rosenfeld would be recalled in a Jungian way as his shadow.

Rosenfeld began publishing short stories in *Partisan Review* as early as 1944, the year of Bellow's novel *Dangling Man*. His novel, *Passage from Home* appeared in 1946, a year before Bellow's *The Victim*. He was also making a name for himself as a book reviewer for the *New Republic* in 1942, where he would remain for over 10 years, while also writing for *Partisan Review*, *Commentary*, the *Nation*, *Kenyon Review*, and *Harper's*, the major journals of opinion of his day. Those reviews, slashing and acerbic in the New York intellectual manner of their day, belied the more tender and vulnerable spirits that found voice in his fiction, a fiction largely of what his generation referred to as "alienation."

He was the son of one of those embittered and distant Jewish fathers that turn up all over Jewish fiction of his generation. Sam Rosenfeld, whom Isaac referred to as "Ozymandias,"

Shelley's king of kings, was a severe, dictatorial figure. Since his mother had died when he was just 22 months old, Rosenfeld drew such emotional nourishment as he could from two spinster aunts, who were the mainstays of childhood.

Passage from Home was an auspicious debut for a young writer (just 28 in 1946). A postwar disenchantment novel, typical of its time, it was a public exhibition of his alienation, in which he wrote passionately about his childhood, as if by doing so he could stanch his wounds and cleanse his spirit. The hero, Bernard Miller, a name Americanized as though to universalize him, is Isaac Rosenfeld in all but name, and his struggles with his father are the very same that had driven Rosenfeld from the home of Ozymandias. The Jewish family in *Passage from Home* is a weakened institution, in which the father's tyranny has been divorced from any semblance of religious authority. An American, Chicago born, Bernard Miller has learned – to borrow a formula from Abraham Joshua Heschel – the danger and gloom of this world but not the infinite beauty of heaven or the holy mysteries of piety.

Rosenfeld's essays and some short stories possessed fair amounts of traction and thrust, and much that remains memorable in his career can be found in posthumous collections titled *An Age of Enormity* (essays) and *Alpha and Omega* (stories).

Despite a certain dishevelment that marked his fiction, Rosenfeld was a vivid individual well remembered for his playfulness and his capacity for mimicry and invention. Bellow recalled his prevailing sense of life as one of "hard-headed gemütlichkeit." His writing at its best was saturated with his trademark blend of passion and intelligence. In his stories, essays, and journals, he performed a sort of Reichian character analysis, looking beneath the skin of writing or writers for blockages, symptoms, armor, and open corridors to feeling. He wrote as a physician of the will, and as a result his book reviews tended to be pathograms, CAT scans of malignant tissues.

Rosenfeld died in 1956 of a heart attack at the age of 38. But his legacy was to be memorialized by others, in memoirs by Irving Howe, Alfred Kazin, and William Barrett, in the novel *To An Early Grave* by Wallace Markfield, and, most notably in Bellow's "Zetland" story. Indeed, the character of the ill-fated poet Von Humboldt Fleisher in Bellow's novel *Humboldt's Gift* is thought by some to owe as much to Rosenfeld as to Delmore Schwartz.

Zipperstein, "The First Loves of Isaac Rosenfeld," in: *Jewish Social Studies*, 5:1–2 (Fall 98/Winter 99); idem, "Isaac Rosenfeld's Dybbuk and Rethinking Literary Biography," in: *Partisan Review*, 69:1 (2002).

[Mark Shechner (2nd ed.)]

ROSENFELD, JONAH (1880–1944), Yiddish novelist and short story writer. Born in the Ukraine, he was orphaned at 13, when both parents died during a cholera epidemic. He then wandered from town to town before settling in Odessa,

where his older brother arranged an apprenticeship for him with a turner. In 1904, encouraged by H.N. *Bialik and I.L. *Peretz, he wrote his first short story, *Der Lernyngl* ("The Apprentice"), based on his own experiences. His stories soon found an audience in Yiddish periodicals. After 1909, they were reprinted in book form, culminating in a six-volume edition of his *Gezamlte Shriftn* ("Collected Works," 1924), which also included descriptions of his experiences before he left Russia (1920). After his arrival in New York (1921), his story "Konkurentn" ("Competitors," in Howe/Greenberg) was dramatized and successfully staged (1922), followed by his comedy *Arayngefaln* ("Lapsed," 1924). His significant later works included *Er un Zi* ("He and She," 1927), "the diary of an ex-writer"; *Eyner Aleyh* ("All Alone," 1940; Heb. 1964), a vivid autobiographical depiction of Rosenfeld's early apprenticeship, highly praised in the Yiddish press. Rosenfeld was a perceptive portrayer of strange characters and their complex psychic states. He viewed himself as a Yiddish Maxim Gorky whose short stories and autobiographical fiction chronicled the inner life of the Jewish working class in Odessa and the Lower East Side tenements. He is one of the most original Yiddish prose writers of his generation.

[Moshe Starkman / Jan Schwarz (2nd ed.)]

ROSENFELD, MORRIS (1862–1923), Yiddish poet. Born in Suwalk, Poland, Rosenfeld survived a cholera epidemic that claimed the lives of 12 of his siblings. He learned the tailor's trade from his father, which he practiced until he could earn his living by his pen. After several abortive attempts at emigration to Amsterdam and London, he arrived in New York in 1886, where he resided until his death. There he worked in the city's burgeoning garment industry, and the sweatshop became his poetic muse. Rosenfeld lamented the punishing life of the immigrant worker and attracted a wide reading audience with his melodramatic-sentimental portraits of this existence, also composing a great many Zionist poems. Over the course of the next decade, he published: *Di Gloke* ("The Bell," 1888), *Di Blumenkete* ("The Flower Wreath," 1890), *Poeziyen un Lider* ("Poems and Songs," 1893), and *Lider Bukh* ("Book of Poems," 1897). It was this last volume that attracted the attention of Leo *Wiener. The following year Wiener published an English translation of the poet's works entitled *Songs from the Ghetto*, which aroused interest in Rosenfeld outside his already substantial Yiddish audience and catapulted him to international fame. In 1894 he co-edited a humorous, satirical weekly *Der Ashmeday*, and in 1905, the daily *New Yorker Morgenblat*. Rosenfeld's popularity continued to grow as his works were translated into a number of European languages. He contrib-

uted to many Yiddish publications, including regularly to the *Forverts* (1908–14). With the rise of Di *Yunge in the second decade of the 20th century, Rosenfeld was displaced from the canon of modern Yiddish poetry, his works dismissed as politically tendentious and sub-poetic. While this view may be accurate concerning his earliest poems, Rosenfeld's contribution to modern Yiddish literature was his engaging, emotional portrayal of the immigrant sweatshop worker, which eschewed politics and focused on the existential struggles of the community represented. Of his 20 published volumes, the most widely read were his collected works in six volumes, *Shriftn* ("Writings," 1908–10), *Gevelte Shriftn* ("Selected Writings," 1912), in three volumes, and *Dos Bukh fun Libe* ("The Book of Love," 1914). He also wrote biographies of Judah Halevi and Heinrich Heine, two poets who had exerted a great influence on his own lyrics. Like other Yiddish writers such as *Sholem Aleichem, Sholem *Asch, and Isaac *Bashevis Singer, Rosenfeld represented the world of the East European Jew to a wide international audience.

[Moshe Starkman / Marc Miller (2nd ed.)]

ROSENFELD, PAUL (1890–1946), U.S. author and critic. A New Yorker, Rosenfeld was born into a prosperous family originating in Germany. He studied at Yale and Columbia, worked briefly as a reporter, and turned to writing. He became a critic and editor specializing in literature, art, and above all music and co-editing the magazine *Seven Arts* (1916–17). He was among the first to recognize the talents of Ernest *Bloch, Leo *Ornstein, Aaron *Copland, Waldo *Frank and Alfred *Stieglitz.

His first book, *Musical Portraits* (1920), was followed by *Musical Chronicle* (1923), *Port of New York* (1923), *Men Seen* (1925), and *By Way of Art* (1928). He embodied the story of his early life in an autobiographical novel, *The Boy in the Sun* (1928). From 1920 to 1927, he was musical critic for the monthly magazine *The Dial*. In 1927 he joined Alfred Kreyborg and Lewis Mumford in editing *The American Caravan* – a yearbook of American literature – on which he was active from 1927 to 1935. Rosenfeld regarded criticism in the arts, not as a means of displaying academic erudition, or of instructing the artist, but as a way of arousing in the audience an appropriate emotional empathy and discriminating appreciation. His essays on Waldo Frank and Van Wyck Brooks, both old friends, remain notable for their rigor of judgment, penetrating psychological analysis, and timely prophetic forebodings.

Conscious of his own Jewish attachments, Rosenfeld was one of the earliest writers to react to the threat of Nazism. Though sometimes identified as a member of the Stieglitz circle, Rosenfeld was in fact, both as critic and patron, the center of a wide circle of his own, a group of varied talents. Although his last twelve years were undermined by the economic depression, the rise of Hitlerism, and World War II, some of his best work was done during this period, notably, *Discoveries of a Music Critic* (1936). Among the editors and critics of his day, it would be hard to pick out another figure who so consistently and selflessly found his own self-expression through serving his fellow writers and artists.

[Lewis Mumford]

ROSENFELD, SAMUEL (1869–1943), journalist. Born in Russia, he devoted himself to journalistic work on Zionism in Hebrew and in Yiddish. In 1900 Rosenfeld assumed responsibility for the Yiddish edition of the Zionist organ *Die Welt*.

He also published in Hebrew, *Ha-Congress ha-Bazilai ha-Shelishi* (1900), and *Ha-Congress ha-Ziyyoni ha-Sheneim Asar* (1922). He edited the Yiddish *Der Fraynd* and the Hebrew **Ha-Zefirah*. In 1923 he emigrated to the U.S. and joined the staff of the Yiddish daily *The *Jewish Day*. His monograph on Israel Salanter appeared in Yiddish, Russian and Hebrew.

[Eisig Silberschlag]

ROSENFELD, SHALOM (1914–), Israeli journalist. Rosenfeld was born in Poland and settled in Palestine in 1934. In 1948 he was one of the group of journalists who broke away from **Yedioth Aharonoth* following disagreements with its proprietor to found **Maariv* as a journalistic cooperative. He served as deputy editor (1960–74) and editor-in-chief (1974–79). He then headed the Journalism Studies Program at Tel Aviv University. In 1985 he founded and subsequently directed the Institute for the Study of Jewish Press and Communications, which later became part of the Andrea and Charles Bronfman Center for the Media of the Jewish People at Tel Aviv University. In 1987 he founded the Institute's journal, *Kesher*. In 1986 he received the Israel Prize for political journalism and essays.

ROSENHEAD, LOUIS (1906–1984), British mathematician. Born in Leeds, Rosenhead began his teaching career in 1931 as an assistant lecturer at the University College of Wales. In 1933 he was appointed professor of applied mathematics at Liverpool University, a position he returned to in 1946 after six years' war service at the Ministry of Supply. He was dean of the university's science faculty in 1945–47, a member of its council 1956–65, and pro-vice chancellor 1961–65. He spent the years 1956–60 at the Haifa Technion, Israel. Elected a fellow

of the Royal Society in 1946, he was on its council from 1956 to 1958. Rosenhead is best known for his work in the field of fluid mechanics, especially the flow of fluids and the motion of the surface of the earth. He made a significant contribution to the theory of the stability of Karman vortex streams. He was part-author of *Index of Mathematical Tables* (1946) and *A Selection of Tables for Use in Calculations of Compressible Airflow* (1952), and edited *Laminar Boundary Layers* (1963).

[Julian Louis Meltzer]

ROSENHEIM, ARTHUR (1865–1942), German inorganic chemist. Rosenheim was born in New York. He was a professor at the University of Berlin (1921–32). His main fields of research were the complex acids and salts of metals, the complex compounds of phosphorus, and thiocyanates and organic acids containing sulfur.

ROSENHEIM, JACOB (1870–1965), Orthodox leader. Born in Frankfurt on the Main, Rosenheim acquired by his own efforts a wide Jewish and general culture. He was first apprenticed to a bank, and later founded the Hermon Publishing House, which produced a wide range of religious literature. In 1906 he transferred publication of the weekly **Israelit*, which he had recently acquired, from Mainz to Frankfurt. Under his direction, it became the influential organ of German Orthodoxy for 30 years. Apart from taking a leading part in the Israelitische Religionsgesellschaft, the independent Orthodox Frankfurt congregation, Rosenheim revived the Freie Vereinigung fuer die Interessen des orthodoxen Judentums, founded by S.R. *Hirsch in 1886, as a platform for the different elements in German Orthodoxy. In 1906 he founded the Deutsch-Hollaendische Palaestinaverwaltung, which established a network of schools in Palestine before World War I. Rosenheim was one of the founders, ideologists and leaders of *Agudat Israel (Katowice (Kattowitz), 1912), and became its president in 1929. Rosenheim was also instrumental in the setting up of the union of Orthodox communities in Germany, and Prussia in particular. From 1940, he lived in the U.S. and spent his last years in Israel. He was a master of German style and an outstanding orator. The guiding light of Rosenheim's life was the union and organization of world Orthodoxy in order to make it face its tasks in the modern world. Although there were many in the Agudah who opposed any recognition of or cooperation with secular Zionism at the establishment of the State of Israel, Rosenheim's influence was exercised in favor of the Agudah joining the provisional government and becoming one of the parties in the Knesset.

His collected addresses and articles were published in 1930 (*Ausgewaehlte Aufsaeetze und Anspraechen*, 2 vols.). Some of his essays were translated into English: *Tent of Jacob* (1957) and *Samson Raphael Hirsch's Cultural Ideals...* (1951). Rosenheim's memoirs were published in Hebrew (*Zikhronot*, 1955), and a *Festschrift* was published on his 60th birthday in 1931. A collection of his memoirs, *Erinnerungen, 1870–1920*, arranged

and brought to press by H. Eisenmann and H.N. Kruskal, was published in 1970.

ROSENHEIM, MAX (Leonard), BARON (1908–1972), medical investigator and educator. Born in England, Rosenheim specialized in the research and treatment of kidney diseases and hypertension. He began his medical career in 1932, holding various hospital posts and traveling fellowships until joining the Royal Army Medical Corps in 1941. In 1950 he became professor of medicine at the University of London and director of the medical unit at University College Hospital Medical School. He was made a life peer in 1970.

Rosenheim became president of the Royal College of Physicians in 1966, and was a member of the World Health Organization's advisory committee on medical research, and of the Hebrew University's board of governors. He contributed articles to various medical journals.

[Julian Louis Meltzer]

ROSENHEIM, OTTO (1871–1955), British biochemist, born in Germany. In 1895 he went to teach at the University of Manchester and in 1901 moved to King's College, London, where he taught physiology. Later he was reader in biochemistry in the University of London until 1920. In 1925 he started 20 years' work at the National Institute for Medical Research in Hampstead.

His published studies deal with the constituents of the brain, spermine phosphate, uric acid, toxicity, putrefaction, the placenta, and particularly sterols (including ergosterol) and vitamins D and A. Tests for detecting vitamin A in cod liver oil and for the determination of total sulfates in urine are named after him.

[Samuel Aaron Miller]

ROSENMAN, SAMUEL IRVING (1896–1973), jurist and counsel to presidents Franklin D. *Roosevelt and Harry *Truman. Born in San Antonio, Texas, of Russian immigrant parents, he was admitted to the New York State bar in 1920, and established his legal and political career in New York City.

Serving in elective and appointive office with the New York State legislature, his liberal politics and exceptional legal competence led Governor Roosevelt to appoint him counsel and in 1932 to the State Supreme Court. Throughout Rosenman's 11-year judicial career, he continued to assist Roosevelt. Most noted as presidential speechwriter and originator of the political slogan "New Deal," he also organized Roosevelt's Brains Trust. During the U.S. mobilization for World War II, Rosenman was a major force in the creation of national defense agencies, helping mold a bureaucracy able to contend with war emergencies without extensive curtailment of New

Deal legislation. In 1943 he resigned judicial office to become counsel to the president. He edited the 13-volume *Public Papers and Addresses of Franklin D. Roosevelt* (1938–50) and described his years with the president in *Working with Roosevelt* (1952).

After Roosevelt's death, Rosenman was instrumental in assisting President Truman to formulate his domestic program and in preparations for the War Crime Trials at Nuremberg. In 1946 he resigned as counsel but continued to serve as presidential adviser.

In 1943 Rosenman worked with Chaim Weizmann in discussions with the State Department on the establishment of a Jewish state. One of Weizmann's voices in the Truman White House, Rosenman secretly brought Weizmann the news in April 1948 that Truman would recognize the Jewish state if partition was not abandoned by the UN General Assembly before establishment. His activities on behalf of Israel independence prompted Weizmann to write that it was "only proper" that the first letter he addressed as Israel's president be to Rosenman, who had "contributed so much of [his] effort and wisdom toward bringing about some of the happy results."

[Samuel Hand]

ROSENMANN-TAUB, DAVID (1927–), Chilean poet, musician, and artist. Rosenmann-Taub's parents emigrated from Poland to South America in the early 1900s. From earliest childhood, he evinced gifts for both literature and music that were fostered by his parents. His mother began teaching him piano when he was two, and by nine he was giving lessons himself. From the age of seven, he had been sure of his vocation as a poet and had started to write daily. In his teens, he wrote *El Adolescente* (which would become his first published work), and began *Cortejo y epinicio*, the book that first made his name and in which such poems as "Schabat" and "Elegía y Kadisch" drew on his Jewish background.

He read broadly and thoroughly, acquiring the erudition that has always informed his poetry – especially the knowledge of physics that he considers fundamental to his work. He continued his musical education, studying piano and composition. In 1948 he graduated from the University of Chile with the title of professor of Spanish.

The next year, when he was 22, *Cortejo y epinicio* came out to wide acclaim, with a reputation-making review from the preeminent literary critic of Chile, Hernán Díaz Arrieta.

In the three decades that followed, Rosenmann-Taub published more than 10 volumes of poetry in Chile and Argentina, including *Los Surcos inundados* ("The Flooded Furrows"), for which he received the Premio Municipal de Poesía, one of Chile's highest literary honors. His poetry was admired by various critics and authors, among them Witold Gombrowicz, Victoria Ocampo, and Francis de Miomandre.

While working full time as a private tutor, he wrote each night into the small hours. In the first half of the 1970s, he suffered major blows: his parents' deaths; the theft of more than 5,000 pages of his poetry in manuscript; and the rise of a murderous dictatorship in Chile. During the latter half of the decade, he traveled on a grant in South America and Europe and gave lectures in New York City.

In 1985, he settled in the United States, embarking on a period of prodigious artistic activity. While producing hundreds of new poems and revising past work, he also assembled the drawings done over a lifetime, and continued to make music. Such compositions as *Abecechenario* ("Alphabet") and *Orbe* ("Orb") contain up to six different, precisely interlocking piano parts, played by the composer himself.

Given the fact that Rosenmann-Taub devoted every moment to his work, and none to self-promotion, it was not surprising that for many years his reputation lagged behind his achievement. In 2000, however, LOM Ediciones, in Chile, undertook to progressively issue all of Rosenmann-Taub's poetry. Since 2002, four books have been published: a new edition of *Cortejo y epinicio*; *El Mensajero* ("The Messenger"); *El Cielo en la fuente/La Mañana eterna* ("The Sky in the fountain/the Eternal morning"); and *País más allá* ("Country beyond").

Rosenmann-Taub's poems have appeared in a number of Jewish anthologies, including *Voices within the Ark: The Modern Jewish Poets*, *Jüdische Literatur Lateinamerika*, and *El Gran libro de América Judía*.

[Fred Rosenbaum (2nd ed.)]

ROSENMUELLER, ERNST FRIEDRICH KARL (1768–1835), Protestant German Bible exegete and Orientalist. His academic career centered at the University of Leipzig where he taught from 1792 (full professor of Semitics, 1813). His Bible commentaries and Arab lexical studies were significant scholarly achievements.

He wrote: *Scholia in Vetus Testamentum* (16 pts., 1788–1817; excerpted in 5 pts., 1828–35); *Handbuch fuer die Literatur der biblischen Kritik und Exegese* (4 pts., Goettingen, 1797–1800); *Institutienes ad fundamenta linguae arabicae* (Leipzig, 1818), with an Arab-Latin glossary; *Das alte und neue Morgenland, oder Erlaeuterungen der heiligen Schrift aus der natuerlichen Beschaffenheit, den Sagen, Sitten und Gebraeuchen des Morgenlands* (6 vols., 1818–20); *Handbuch der biblischen Alterthumskunde* (4 vols., 1823–31), of which portions concerning the flora, fauna and mineralogy of the Holy Land were translated into English (*Biblical Geography of Asia Minor, Phoenicia, and Arabia*, 1836; *Biblical Geography of Central Asia*, 2 vols., 1836–37; and *Mineralogy and Botany of the Bible*, 1840); and *Analecta Arabica* (1824).

[Zev Garber]

ROSENSAFT, JOSEF (1911–1975), business executive. Rosensaft, who was born in Bedzin, Poland, was active in the Labor Zionist movement from his youth. In the years preceding World War II, he was a scrap metal dealer. In 1943 Rosensaft

escaped from an Auschwitz-bound train by diving from it into the Vistula River. Although wounded in his escape, he managed to walk back to the Bendin Ghetto. Soon recaptured by the Germans and tortured in Auschwitz, he was shuttled to several concentration camps before being liberated at Bergen-Belsen in April 1945. Shortly afterward, Rosensaft was chosen by Bergen-Belsen survivors to become chairman of the camp committee representing them. He was also chairman of the Central Committee for Displaced Persons in the British Zone of Germany until the camps were terminated in 1950. In these capacities, he intrepidly furthered Jewish DP (displaced persons) rights and interests against the anti-Zionist British administration. During this period, Rosensaft actively aided the “illegal” movement of Jewish survivors out of Eastern Europe, and the attempt to smuggle Jews into Palestine.

Rosensaft lived in the U.S. and Switzerland after 1950 and was active in various Jewish organizations. He was president of the World Federation of Bergen-Belsen Survivors, a group dedicated to perpetuating the memory of the Holocaust and its victims. Rosensaft assembled a notable art collection.

His son, MENACHEM, who was born in the DP camp of Bergen-Belsen, was a lawyer and the founding chairman of the International Network of Children of Jewish Holocaust Survivors as well as a member of the United States Holocaust Memorial Council.

BIBLIOGRAPHY: S.J. Goldsmith, *Twenty 20th-Century Jews* (1962), 86–92. **ADD. BIBLIOGRAPHY:** M. Rosensaft, *Life Reborn: Jewish Displaced Persons, 1945–1951* (2001).

ROSENTOHN, ETTA LASKER (1885–1966), U.S. civic and Zionist leader. A member of the *Lasker family, she was born in Galveston, Texas, and began her career as a research worker for the New York Guild of the Jewish Blind. During World War I, Etta Rosentoyn was district supervisor of the N.Y. Home Division of the Red Cross, and also began her 25-year career with the National Travelers Aid Society. She was a social and civic worker prominent in many organizations, including the National Council of Jewish Women, Conference of Jewish Relations, and Board of Governors of the Hebrew University. As a Hadassah leader, Etta Rosentoyn held important offices for more than three decades, and played an outstanding role shaping Hadassah’s health and social welfare program. After serving as Hadassah Medical Organization Chairman (1947–51), she became president of Hadassah (1952–53).

[Gladys Rosen]

ROSENSTOCK, JOSEPH (1895–1985), conductor. Born in Cracow, Rosenstock studied there, later in Vienna with *Schrecker. In 1922 he was appointed conductor, and in 1925 general music director, at the Darmstadt Opera; from 1927 to 1929 he held a similar position at Wiesbaden. He made his debut at the Metropolitan Opera, New York, during the 1929–30 season, and from 1930 to 1933 was music director at Mannheim until he was dismissed by the Nazis. He found work as the music director of the Juedische Kulturbund in

Berlin (1933–36). From 1936 to 1941 he was honorary music director of the Nippon Philharmonic, Tokyo, returning there in 1945. He went to the United States in 1946, working with various orchestras until 1948 and conducting at the New York City Opera in 1952–56. After conducting in Cologne in 1958–59, he returned to the Metropolitan in New York in 1961–68, directing 175 performances of 16 operas, chiefly works of Mozart, Strauss, and Wagner.

[Max Loppert / Israela Stein (2nd ed.)]

ROSENSTOCK-HUESSY, EUGEN (1888–1973), German philosopher and theologian. Rosenstock was the son of a banker in Berlin, and grandson of Moritz Rosenstock, the principal of the Jewish school in Wolfenbuettel. At the age of 16 he converted to Christianity. In 1909 he finished his doctoral thesis and was one of the youngest teachers at a German university. In 1912–14 he was lecturer in medieval constitution at the University of Leipzig. In 1914 he married Margrit (“Gritli”) Huessy (1893–1959) and added her name to his own. In World War I he served on the French front. After the war was over Rosenstock was asked to draft a constitution for the Republic but decided to devote his life to various projects on labor relations. In 1923 he accepted an appointment at the University of Breslau and in 1933 emigrated to the U.S. because of the Nazis. After a period at Harvard, he became professor at Dartmouth College.

He was a person of rare religious force and believed that the importance of language is in its relationship to authentic human experience and religious life. His importance to Jewish philosophy is his extraordinary influence on Franz *Rosenzweig, who came to him in Leipzig in 1913 when he was also considering conversion. After a memorable discussion in which Rosenzweig took the stand of a relativist and Rosenstock that of a religious thinker, Rosenzweig left Leipzig in July 1913 and promised to convert. However, instead of undergoing baptism he found his way back to Judaism.

In World War I both served in the German army, on different fronts, and an important correspondence developed between them. In these highly interesting letters of 1916 on Christianity and Judaism (*Judaism Despite Christianity*, 1969), Rosenstock attacked Judaism violently and Rosenzweig defended it. They also touched on many current problems. Studies of the correspondence were made by D. Emmet and A. Altman (included in *Judaism Despite Christianity*).

Rosenzweig’s major philosophical work, *Stern der Erloesung* (“The Star of Redemption,” 1921), was written while he was still under the influence of Rosenstock. The relation between the two thinkers was existential. Rosenzweig accepted from Rosenstock: (a) the uncompromising necessity to take a religious stand on current questions, while abandoning the attitude of productivity for its own sake; (b) the idea of revelation as “orientation” in life; (c) the importance of language and time in terms of religious philosophy; and (d) the concept of cyclical time in terms of yearly religious events.

As an outcome of their relationship, Rosenzweig attempted to construct a philosophy of history that recognizes two true religions, Judaism and Christianity, which have their unity in Adam and separate historical configuration. After World War I Rosenstock, in the journal *Die Kreatur*, attempted to bring Catholics, Protestants, and Jews together for an exchange of views. On the other hand, he accepted from Rosenzweig the positive evaluation of the French Revolution as the Johanne Age. In his early writings he had a negative attitude to the age of emancipation (*Judaism Despite Christianity*, pp. 143–158).

The philosophy of language that Rosenstock developed in 1916 in a pamphlet for Rosenzweig later called *Angewandte Seelenkunde* (Darmstadt, 1924) was written to explain his theological language theory. In it he took his point of departure in the saying, “God called me therefore I am.” Rosenstock’s dialogue theory precedes that of Martin Buber, and in contrast to the I-Thou of Buber, he emphasized the dynamism of the situation which changes from instant to instant. They agree on the fact that the Thou always precedes the I.

In his book *Out of Revolution* (1938) Rosenstock explained European history in accordance with a cyclical calendrical outlook, in which he considered the repetition of events as an important factor. This theory developed in the war letter of 1916 and was accepted by Rosenzweig not in terms of history but in terms of the yearly repetition of the holidays. Both thinkers gave up university careers after World War I in their attempt to reach the common people. Rosenstock became interested in labor camps and adult education, first in Germany and then in the U.S. President Roosevelt invited him to train leaders for the civilian Conservation Corps. Some of his disciples in Germany attempted a resistance movement against Hitler during the war, and died in concentration camps. The interest in his philosophy in Germany has grown considerably since 1945. Rosenstock’s other works include: *The Multififormity of Man* (1949); *The Driving Power of Western Civilization* (1950); and the *Christian Future or the Modern Mind* (1966). Rosenstock tried time and again to convince Rosenzweig of the truth of Christianity. In 1913 he almost succeeded in bringing his friend to it but Rosenzweig decided to remain a Jew and with time slowly but enthusiastically discovered the deeper layers of his Jewish existence. In the intensive correspondence of 1916 Rosenzweig explained the relevance of his Jewish existence. Yet, also after this exchange of letters, in which Rosenzweig clearly elucidated his new viewpoint, Rosenstock did not stop his attempts to convert Rosenzweig. Of great importance in this context are Rosenzweig’s numerous letters to Gritli Rosenstock-Huessy, whom he met in June of 1917. These “Gritli” letters are an example of the rare possibility of cross-cultural and transcultural understanding. Unfortunately, scholars do not have Gritli’s letters to Rosenzweig. However, judging from Rosenzweig’s letters to Gritli, with whom he developed a close relationship, Gritli was attentive to Franz’s expressions of his Judaism. She accepted his otherness, making it possible for him to express himself freely. In

contrast to Eugen, she did not wish to convert him, but was able to support him in his spiritual odyssey that led him to the discovery of important aspects of Jewish life and finally to the acceptance of the Law rooted in the experience of love.

[Richard Hirsch / Ephraim Meir (2nd ed.)]

ROSENTHAL, A.M. (1922–2006), U.S. journalist. Abraham Michael Rosenthal, who was born in Sault Ste. Marie, Ontario, Canada, went to New York as a child and was educated at the City College of New York. He became editor of a college newspaper, which led to a job as college correspondent for *The New York Times*. He became a reporter there in 1943 in his senior year, beginning a 56-year career at the paper, and quit college but got his degree six years later. In 1945 Rosenthal was assigned to cover the United Nations, where he developed an interest in foreign affairs. At the *Times*, he began to use the initials A.M. in what he described as an effort, common in those days, not to appear too Jewish, at least not to his superiors. In 1954 he was assigned to India, and also roamed about Pakistan, Nepal, Afghanistan and Ceylon. The next assignment was Poland, in 1958. There he produced a memorable article titled “There Is No News from Auschwitz,” recounting his visit to the bleak remains of the infamous crematoria. Poland’s Communist government at the time was in turmoil, and Rosenthal was expelled after a year and a half for “probing too deeply into the internal affairs” of the country and the Communist Party. In 1960 he won the Pulitzer Prize for his reporting from Poland. He also authored the famous phrase: “Forgive them not, Father, for they knew what they were doing,” describing German behavior in the Holocaust.

The death of Orville Dryfoos, publisher of *The Times*, in 1963 ushered in a quiet revolution at the *Times* that led to a shift in power in the newspaper’s newsroom. Rosenthal returned from a choice assignment in Tokyo to become metropolitan editor and quickly shifted the focus to more in-depth reporting, interpretation and analysis, and brighter writing. One of the first major stories under his watch involved the murder of a young woman in Kew Gardens, NY in Queens, who cried out for help against her assailant. A reporter found

that 37 witnesses had heard her cries and offered no help. The story shook the city and led to a book by Rosenthal about the case. In 1967 Rosenthal moved up to assistant managing editor, beginning a climb to executive editor in 1977. Under one title or another, Rosenthal was in charge of daily news operations at the *Times* for 16 years and daily and Sunday operations for about 10 years. The most important story he oversaw during that period was the publication in 1971 of the Pentagon Papers, a hitherto secret history of the United States involvement in the war in Vietnam. Rosenthal championed publication of the stories on First Amendment grounds and the publisher, Arthur Ochs Sulzberger, sided with Rosenthal against the advice of several lawyers. The Nixon administration tried to prevent publication of the papers, which led to a major victory for the press in the United States Supreme Court. In a 6-to-3 ruling, the court said that the government could not stop the press from printing stories and analyses about the Pentagon Papers unless it could prove that national security was at stake. Rosenthal also commissioned a study of the *New York Times* coverage of the Holocaust, which he found woefully inadequate.

During Rosenthal's tenure, the *Times* went through major changes to preserve the character of the paper but also to make it more attractive to its readers. The two-part newspaper became a four-part paper, with a full news report, a magazine with a changing focus every day (Dining, Home, Science, Weekend) and Business Day, a full-fledged financial section. As Rosenthal famously said, "We had a choice to put more water in the soup or to put more tomatoes in. We chose the tomatoes." The venerable newspaper of record found new economic life with the introduction of the new sections. Rosenthal, who was conservative in his approach to changes in American society, resisted calling homosexuals "gays" in the pages of the paper and also resisted using the honorific "Ms," much to the consternation of homosexuals, feminists and others. The *Times* eventually allowed both terms. Rosenthal was also involved in two internal suits at the *Times*, to give women more opportunities in the newsroom, and to hire more black reporters and editors. *The Times* reached settlements with those groups without admitting wrongdoing.

After Rosenthal's retirement, mandatory at age 65, in 1988, he became a columnist for the *Times* and wrote "On My Mind" until 1999. Then he moved to other newspapers, where he championed such causes as the American invasion of Iraq in 2003. He also publicized the war on drugs and championed the rights of young African women against genital mutilation.

[Stewart Kampel (2nd ed.)]

ROSENTHAL, BENJAMIN STANLEY (1923–1983), U.S. politician. Born and raised in New York City, Rosenthal graduated from Stuyvesant High School in 1940, and later from Long Island University and City College. Following service in the U.S. Army during World War II, he attended Brook-

lyn Law School (LL.B., 1949) and New York University (LL.M., 1952). He was admitted to the New York bar in 1949 and the Supreme Court bar in 1954. On February 20, 1962, he won a special congressional election to succeed U.S. Rep. Lester Holtzman, who resigned. Rosenthal was subsequently elected to 11 succeeding congresses to represent Queens, and died of cancer in Washington, D.C., shortly after being sworn in for his 12th term.

As the senior Jewish member of the House Committee on Foreign Affairs, he was the person most of his colleagues turned to for leadership on issues involving Israel. He was the first in the House to challenge the sale of sophisticated weapons to Israel's Arab enemies. He was responsible for drafting and shepherding through the House generous aid programs for Israel. As chairman of the Foreign Affairs Subcommittee on Europe, he held the first congressional hearings on the plight of Soviet Jewry.

His outspoken opposition to the war in Vietnam was unpopular among constituents for many years as well as the leadership of his own party, but he did not waver. He incurred the wrath of President Lyndon B. Johnson in a 1969 House speech accusing the United States of being "virtually a puppet" of the Saigon government. But he stood firm on his principles, winning the respect – and votes – of those who disagreed with him.

Rosenthal was well known for his facile mind, quick wit, and devastating style of questioning – some critics called him abrasive – particularly when it came to deflating the stuffed shirts who appeared before his committees. He was compassionate and had a strong sense of justice but little tolerance for those he considered to be acting against the public interest. The Benjamin S. Rosenthal Library at City University of New York's Queens College was named in his memory as was a street in Queens and a senior center in Flushing.

[Douglas M. Bloomfield (2nd ed.)]

ROSENTHAL, ERICH (1912–1996), U.S. sociologist. Born in Wetzlar, Germany, Rosenthal studied in Germany and the United States. He received his M.A. in 1942 and his Ph.D. in 1948 from the University of Chicago. A student of Louis Wirth, he became a research associate at the University of Chicago; research consultant of Group Work agencies in Chicago; director of research at the Chicago Bureau of War Records; and professor of sociology at Roosevelt and Northwestern universities at Chicago and Evanston, Ill., at the University of Iowa, and from 1951 to 1978 at Queens College in New York.

Rosenthal was an expert in income distribution and acculturation. In particular, his reputation rests with his work in the demography of the Jews in America. Through his work on Jewish assimilation and group identity, he brought to national attention the high intermarriage and low fertility rates among American Jews. His works in this field include: "Acculturation without Assimilation? The Jewish Community of Chicago, Illinois" (*American Journal of Sociology*, 66 (Nov. 1960), 275–88); "Jewish Fertility in the United States" (*AJYB*,

62 (1961), 3–27); “Studies of Inter-marriage in the United States” (AJYB, 64 (1963), 3–53); and “Jewish Inter-marriage in Indiana” (AJYB, 68 (1967), 243–64).

[Werner J. Cahnman / Ruth Beloff (2nd ed.)]

ROSENTHAL, ERWIN (Isaac Jacob; 1904–1991), Orientalist. Rosenthal, born in Heilbronn, Germany, emigrated in 1933 to England, where he became lecturer in Hebrew at University College, London. From 1936 to 1944, he lectured on Semitic languages and literature at Manchester University, and during World War II carried out various educational tasks for the British army and foreign office. Rosenthal taught (from 1948) Oriental studies at Cambridge University. From 1961 to 1991, he was a fellow, and then emeritus fellow, of Pembroke College, Cambridge.

Rosenthal wrote the following works on Arabic political philosophy: his dissertation, *Ibn Khaldun's Gedanken ueber den Staat* (1932), *Political Thought in Medieval Islam* (1958), and *Islam in the Modern National State* (1965), and he published a critical edition of Averroës' commentary on Plato's *Republic* (1956). He also wrote *Judaism and Islam* (1961) as well as works on Christian Hebraists. Rosenthal edited the third volume of *Judaism and Christianity (Law and Religion)*, 1938, repr. 1969). His other works include: a biography, *Don Isaac Abravanel* (1937); *Griechisches Erbe in der juedischen Religionsphilosophie des Mittelalters*, the F. Delitzsch lectures which he gave in 1957; and *Studia Semitica* (2 vols., 1971). He also edited *Saadya Studies* (1943).

ROSENTHAL, FERDINAND (1838–1921), rabbi and scholar. Rosenthal, who was born in Kenese, Hungary, studied with E. Hildesheimer at the Eisenstadt Yeshivah and at Berlin and Leipzig universities. He served as rabbi at Beuthen, Silesia (from 1862) and Breslau (from 1878). He was the first Orthodox rabbi to join the Allgemeiner Deutscher Rabbinerverband, the majority of whose members were Reform. Rosenthal's scholarly interest lay chiefly in early talmudic history.

His published works include: *Erlaesse Caesars und die Senatsconsulte in Josephus* (1879) and *Vier apokryphische Buecher* (1885). Rosenthal edited the responsa of Jacob *Tam (from his *Sefer ha-Yashar*, 1898) and was coeditor of the D. *Kaufmann memorial volume (1900), to which he contributed Kaufmann's biography.

ROSENTHAL, FRANZ (1914–2003), Orientalist. Rosenthal was born in Berlin, where he obtained his doctorate for a thesis on *Die Sprache der palmyrenischen Inschriften* (1936). He was the first winner of the Lidzbarki Medal and Prize of the International Congress of Orientalists, for his book *Die aramaeistische Forschung seit Theodor Noeldedes Veroeffentlichungen* (1938). However, he was not granted the prize money because he was Jewish. In 1940 he became assistant professor at Hebrew Union College in Cincinnati and in 1948 professor at the University of Pennsylvania. In 1956 he was appointed the Louis M. Rabinowitz Professor of Semitic Languages at Yale

and became a Sterling Professor in 1967. He resumed his Aramaic studies with his *Aramaic Handbook* (1967), in which such scholars as H. *Ritter and H.J. *Polotsky participated (1967). When he retired from teaching, he was named Sterling Professor Emeritus of Near Eastern Languages and Civilizations at Yale in 1985.

Rosenthal's main interest was the history of scholarship in *Islam. Apart from many papers and editions of smaller texts, he published: *The Technique and Approach of Muslim Scholarship* (1947); *A History of Muslim Historiography* (1952, 1968²); a fully-annotated translation of Ibn Khaldun's *Muqaddimah (Bollingen Series, 3 vols., 1958)*; *Gifts and Bribes: The Muslim View* (1964); and *Knowledge Triumphant* (1970). He also wrote a comprehensive paper of special Jewish interest on “Judeo-Arabic work under Sufic influence” (HUCA, 15, 1940). Together with R. *Walzer, he published and translated into Latin al-*Fārābī's *De Platonis philosophia*, the Arabic original of Shem Tov b. Joseph *Falaquera's account in *Reshit Hokhmah (Plato Arabus, 2, 1943)*.

His later works include: *The Herb: Hashish vs Medieval Muslim Society* (1971); *Gambling in Islam* (1975); *Muslim Intellectual and Social History* (1990); *The Classical Heritage in Islam* (1994); and *Sweeter Than Hope* (1997).

Among the many organizations he belonged to and the numerous honors he received, Rosenthal served as president of the American Oriental Society and in 1994 was the first recipient of the AOS Medal of Merit.

[Martin Meir Plessner / Ruth Beloff (2nd ed.)]

ROSENTHAL, HAROLD (David; 1917–1987), English writer, music editor, critic, and historian. Born in London, Rosenthal began to teach after finishing his army service. While still a university student, he had written articles as an opera enthusiast and took the opportunity offered him of collaborating with the Earl of Harewood on the magazine *Ballet and Opera* (1948–49). With Lord Harewood, he launched the magazine *Opera* in 1950; he was the editor from 1953 to 1986 and under his guidance the journal became the most influential publication in the operatic world. Rosenthal was also an archivist at the Royal Opera House, London (1950–56), historian (*Two Centuries of Opera at Covent Garden*, 1958), lecturer, broadcaster, and the author of books such as: *Sopranos of Today* (1956), *A Concise Oxford History of Opera* (with John Warrack, 1964), *Great Singers of Today* (1956), *Covent Garden: A Short History* (1967), and *The Mapleson Memoirs* (annotated ed., 1966). He edited *The Opera Bedside Book* (London, 1965).

BIBLIOGRAPHY: Grove Music Online.

[Max Loppert / Israela Stein (2nd ed.)]

ROSENTHAL, HERMAN (1843–1917), writer and pioneer of Jewish settlement in the United States. He was born in Friedrichstadt (Jaunjelgava), in Courland (Latvia), and started to work as a printer in Kremenchug, Ukraine. During the Russo-Turkish War (1877–78), he served with the Red Cross and

was decorated. As a result of the pogroms of 1881, Rosenthal reached the conclusion that the solution to the Jewish problem in Eastern Europe lay in emigration from Russia and in agricultural settlement. Organizing a group of 70 people in Yelizavetgrad, he set out for the United States to pave the way for their settlement there. In 1882 he established the first agricultural settlement for Russian Jews on Sicily Island, near New Orleans, Louisiana. After the destruction of the settlement by the Mississippi floods, he attempted to establish a new settlement, named Crémieux, in Dakota, but this was also short-lived. In later years, Rosenthal continued to foster the idea of Jewish settlement. He published the newspaper *Der Yidisher Farmer*, and in 1891 participated in the establishment of the ICA colony of Woodbine, New Jersey. In 1901, together with Abraham Ḥayyim *Rosenberg, he published the monthly *Ha-Mod'ia le-Hodashim*. From 1898, Rosenthal headed the Slavonic department of the New York public library. He was the editor of the department of Russian Jewry in the *Jewish Encyclopedia* and made an important contribution to its high standard. Rosenthal wrote poems in his mother tongue, German, among them poetic translations of Song of Songs and Ecclesiastes (1893).

[Yehuda Slutsky]

ROSENTHAL, IDA (1886–1973), businesswoman, dress-maker and inventor of the modern brassiere. Ida Kaganovich was born near Minsk, in Czarist Russia; her father was a Hebrew scholar and her mother ran a small general store. She emigrated to the United States in 1904 at the age of 18, following her boyfriend, William Rosenthal, whom she married in 1907. With a Singer sewing machine purchased on an installment plan, Ida made a living as a seamstress. In the early 1920s, the Rosenthals joined with Enid Bisset to open Enid Frocks, a small custom dress shop in Manhattan. Unhappy with the way their expensive dresses fit around the bosom, the partners designed a brassiere with cups that separated and supported the breasts; they called the bra a “Maiden form.” The Enid Manufacturing Company they founded to meet the demand for their new product became the Maiden Form Brassiere Company in 1923 and Maidenform, Inc. in 1960. In 1925 they stopped making dresses and made Maiden Form bras exclusively. Ida Rosenthal managed the sales and traveled nationally and internationally to open new markets. By the end of the 1930s, Maiden Form products, eventually including other kinds of women’s lingerie and swimsuits, were sold throughout the world. During World War II, the Rosenthals had no trouble getting rubber for elastic straps because studies showed that working women who wore the bra suffered less fatigue than women who did not wear this garment. The Rosenthals also helped the war effort by producing a “pigeon vest,” a cup-shaped cloth that held a courier pigeon. A 1949

advertising campaign built their brand name with racy ads, featuring bra-clad women in various settings, starting with, “I dreamed I went shopping in my Maiden Form bra.” The Rosenthals made many philanthropic contributions, including establishing the Ida and William Rosenthal Fellowship in Judaica and Hebraica at New York University. When William died in 1958, Ida Rosenthal became the chief executive officer of the company. In 1963 she was the only female member of an American apparel industry delegation that visited the Soviet Union. Rosenthal went to her office each day until her death from pneumonia at the age of 87; her daughter Beatrice Coleman succeeded her as chief executive.

[Sara Alpern (2nd ed.)]

ROSENTHAL, JUDAH (1904–1976), scholar. Born in Makov, Poland, Rosenthal went to the U.S. in 1939. He served as librarian (1944–65) and professor of biblical exegesis (1944–69) at the College of Jewish Studies, Chicago. In 1969 he settled in Jerusalem. A contributor to various periodicals, scholarly miscellanies and encyclopedias, Rosenthal was the author of numerous studies and essays in Jewish history, literature and religion.

His publications included *Hiwi Al-Balkhi* (1949); *The Talmud on Trial: The Disputation in Paris in the Year 1240* (1956); and *Mehkarim u-Mekorot* (“Studies and Texts,” 2 vols., 1967). On the subject of Jewish-Christian polemics, he published: “Anti-Christian Polemics from Its Beginnings to the End of the 18th Century” (*Aresheth*, 2, 1960) and editions from manuscripts of Jair b. Shabbetai’s *Herev Pifiyot* (1958), Jacob ben Reuben’s *Milhamot ha-Shem* (1963), and Joseph Official’s *Yosef ha-Mekanne* (1970).

[Tovia Preschel]

ROSENTHAL, LEON (Judah Leib; 1817–1887), Russian financier, *maskil* and philanthropist. Rosenthal was born into a wealthy family in Vilna. His father, Moses, one of the first *maskilim* in Vilna, educated him in the spirit of the *Haskalah. After his marriage, he went to live in Brest-Litovsk. When Moses *Montefiore visited Russia in 1846, Rosenthal submitted to him a memorandum claiming that education and modern schools would solve the problems of Russian Jewry. In the 1850s, Rosenthal settled in St. Petersburg, where he became associated with the *Guenzburg family and was one of the city’s leading financiers and bankers. He corresponded with *maskilim* all over Russia, assisting them in their dealings with the government, distributing their literature, and also supporting them financially. In 1863 Rosenthal was among the founders of the *Society for the Promotion of Culture among the Jews of Russia; he served as the society’s treasurer, contributed largely to its budget, and participated actively in its work. Advocating the spread of Hebrew language and literature and opposing assimilationist trends, he was influential in the society’s support of Hebrew journals and books. In his later years, he began to write the history of the society, *Toledot Hevrat Marbei Haskalah be-Yisrael be-Erez Rusyah* (2 vols., 1885–90), which

also contains records and documents from the society's archives and is of great value for the history of the Haskalah in Russia. He was also one of the founders of the society for promotion of crafts and agriculture among Jews in Russia, ORT, and was one of the main contributors to the society.

BIBLIOGRAPHY: J.L. Kantor, in: L. Rosenthal, *Toledot Hevrat Marbei Haskalah*, 2 (1890), introd.; E. Tcherikower, *Istoriya Obshchestva rasprostraneniya prosveshcheniya sredi yevreyev*, 1 (1913), passim.

[Yehuda Slutsky]

ROSENTHAL, LESER (Eliezer; 1794–1868), bibliophile and bibliographer. Rosenthal, born in Nasnelsk, Plock, Russia, served as teacher at Paderborn (Germany) and later as *Klaus-rabbiner* at Hanover. He began collecting Hebraica and Judaica by spending his entire dowry on books. At his death, Rosenthal's library contained 32 manuscripts and 6,000 printed volumes, including incunabula and rare books. He himself compiled a catalog of his collection titled *Yode'a Sefer* (Heb. and Ger.), which was edited by M. *Roest and published in 1875 (repr. 1966). Rosenthal's son, BARON GEORG ROSENTHAL, a banker, offered the collection to Bismarck for the Kaiserliche und Koenigliche Bibliothek (Preussische Staatsbibliothek) in Berlin, but the offer was refused. In 1880 descendants living in Holland presented the collection to the city of Amsterdam and it was incorporated in the university library there under the name of Bibliotheka Rosenthaliana (see *Libraries).

[Jacob H. Copenhagen]

ROSENTHAL, LUDWIG A. (1855–1928), German rabbi and scholar. Rosenthal, who was born in Putzig, Western Prussia, served as rabbi in Koethen, Rogasen, Preussisch Stargard, and Berlin, where he also lectured in the preparatory department of the Hochschule (Lehranstalt) fuer die Wissenschaft des Judentums.

Of importance are his Mishnah studies, in particular his *Ueber den Zusammenhang, Quellen und Entstehung der Mishna* (3 vols., 1918²). Rosenthal took an active part in the controversy over Friedrich F. *Delitzsch's views (*Babel und Bible*, 1902; *Hammurabi Gesetz*, 1903), and wrote a comparative study on Joel, Nahum, and Habakkuk (1905). He acted as editor of *Rahmer's Juedisches Literaturblatt*, and edited the 10th edition of Kayserling's *Lehrbuch der juedischen Geschichte und Literatur* (1922). He also wrote a biography of Lazarus Geiger (1884). His other articles were published in *Gesammelte Schriften* (1926).

ROSENTHAL, MANUEL (Emmanuel; 1904–2003), conductor and composer. Born in Paris, he studied solfège with Mme. Marcou and the violin with Jules Boucherit at the Paris Conservatoire (1918–23). He was also Ravel's student and was among his master's closest disciples, a privileged interpreter

and confidant. After conducting Parisian orchestras, he became leader of the National Radio Orchestra in 1934. During World War II, he was a prisoner in Germany and at the end of the war he conducted, at the French Radio in Paris, the concert given to mark the liberation (September 28, 1944), which included the first performance of Messiaen's *Chant des déportés* for choir soprano, tenor and orchestra (published in 1945). He became instructor of composition at the College of Puget Sound in Tacoma, Washington, in 1948 and was the conductor of the Seattle Symphony Orchestra from 1949 to 1951. In April 1973, he conducted the first performance to mark the reopening of the Paris Opera. Rosenthal also appeared on many occasions at the Metropolitan Opera in New York, and in 1987 he conducted the Russian première of *Pelléas et Mélisande*. He was professor of conducting at the Paris Conservatoire (1962–74) and made recordings of the music of Debussy and Ravel. As a composer, he rejected the compartmentalized aesthetics of French music in the interwar period and put his individual language into his work. He wrote in almost every musical genre, including opera (such as *Rayon des soieries*, opéra-bouffe, 1926–28), ballet (such as *Un baiser pour rien*, 1928–29) chamber, and orchestral music, as well as choral and sacred music *Cantate pour le temps de la Nativité* (1943–44); and *Missa Deo gratias*, (1953).

[Israëla Stein (2nd ed.)]

ROSENTHAL, MAX (1833–1918), painter, printmaker, and inventor. Born in Turck, Poland, Rosenthal was apprenticed to a Paris lithographer, Martin Thurwanger. When in 1849 his employer went to the U.S. to work for a lithographic firm in Philadelphia, Rosenthal accompanied him as his chief assistant, and studied at the Pennsylvania Academy of Fine Arts. The Rosenthal family, including Max's brothers Morris, Louis, and Simon, organized a lithography business in Philadelphia: Max was the principal artist. Rosenthal was a pioneer of chromolithography in the U.S. and made the plates for the first American book furnished with a set of chromo-illustrations, *Wild Scenes and Wild Hunters*. In 1854 he produced the largest chromolithograph yet made (22 × 25 inches) in the U.S., after his own drawing, *Interior of the Old Masonic Temple in Philadelphia*. During the Civil War, Rosenthal traveled with the Army of the Potomac as official illustrator for the United States Military Commission, and produced the color plates for a medical and surgical history of the war. He made detailed images of every camp until Gettysburg. Rosenthal's chromolithograph *Battle of Antietam* (1865) depicts the Union Army victorious against the forces of General Robert E. Lee. Until 1884, he made a living making lithographs of famous Americans; after that year, he concentrated on etchings of British and American military leaders, illustrations for the poems of Henry Wadsworth Longfellow, and original works such as *Jesus at Prayer*. This altar painting for a Protestant church

in Baltimore was found objectionable due to the phylacteries which Rosenthal included on Jesus' forehead and right arm. A Catholic church then offered a substantial sum for the work if the artist would paint in a halo, but Rosenthal refused to do so. A versatile man, Rosenthal also became known for his technical achievements, among them his invention of the sandblast process of engraving glass. Rosenthal portraits are numerous. His mezzotint *Colonel George Washington* displays the future president as a young man, pensive but determined. Another mezzotint *Portrait of General Smallwood* depicts this military leader in dramatic illumination which imparts the sagging face of his sitter with flattering chiaroscuro. His son, ALBERT ROSENTHAL (1863–1939), was his collaborator on many projects. He was a painter and lithographer but was best known for his knowledge of 18th and 19th-century American art, and he often served as an expert both for American museums and for private collections. Rosenthal's works are in the collections of the Albright-Knox Art Gallery, Buffalo, New York; the Fine Arts Museum of San Francisco; the National Portrait Gallery; the Peabody Essex Museum, Salem, Massachusetts; the Smithsonian Institution; and the State Museum of Philadelphia, among other museums.

[Nancy Buchwald (2nd ed.)]

ROSENTHAL, MORIZ (Maurycy, 1862–1946), pianist. Rosenthal was born in Lvov (Lemberg, Galicia), the son of a professor at the Lvov Academy of Music. He began playing the piano at the age of eight, and in 1872 entered the Academy, where he studied with its director, Karol Mikuli, from 1872 to 1874. In the following year, Rosenthal's family moved to Vienna, where he continued his studies with Joseffy and he gave his first recital in 1876. He then began to tour, finishing his studies with Liszt at Weimar, and in Rome. For six years, he abandoned the concert platform, dedicating himself to a study of philosophy. Returning to the concert platform in 1886, he appeared as an artist in whom maturity of feeling and thought was matched by a virtuoso technique of the highest order; his reputation spread rapidly all over Europe and America, and was equaled only by that of *Godowsky. In 1903, he published (with Schytte) the manual, *Schule des hoeheren Klavierspiels*. In 1938, he took up residence in New York City, where one of his last pupils was the American pianist Charles Rosen, to whom he bequeathed the legacy of Liszt's teaching.

[Max Loppert (2nd ed.)]

ROSENTHAL, NAPHTALI (1727–1798), Hungarian talmudist, founder of the Jewish community of Mor. While studying in Berlin at the yeshivah of David Fraenkel, he made the acquaintance of Moses *Mendelssohn; they became friends and maintained the friendship by correspondence after Rosenthal had left Berlin. After staying in Prague, he later settled in Mor, where his house became a center of learning, hospitality and

traditional Judaism. An atmosphere of religious study permeated his household: even his wife was acquainted with biblical and talmudic passages in the original. His son-in-law, F. Gomperz, assisted him in the management of the yeshivah of Mor. Rosenthal's public activities were not confined to his own community: he was also the spokesman of the whole of Hungarian Jewry at the court of Vienna under Joseph *II and the two subsequent monarchs.

His son ELIJAH (1758–1833) was a businessman and bibliophile. Between the ages of 13 and 18 he studied at the yeshivah of Pressburg (Bratislava) and became an accomplished talmudic scholar. From 1785 he lived in Komarom (Komarno), Hungary, where he kept an inn. His fellow-citizens wanted to give him the freedom of the town in recognition of his charitable acts and public service, but the authorities would not confirm this. Moving to Pest, he opened a shop for Hebrew books and stationery in 1804. He himself was a book collector and his library was praised by Leopold *Zunz. Following the French Revolution (1789), he became active in the struggle for Jewish civil rights, remembering his own humiliating experience in Komarom. He wrote various memoranda and petitions in pursuit of this aim.

[Jeno Zsoldos]

ROSENTHAL, PAVEL (Pinhas; pseudonyms: Anman, P. Rol; 1872–1924), physician and author, a leader of the *Bund. Rosenthal, who was born in Vilna, where his merchant father was both a *maskil* and a religious Jew, joined clandestine socialist circles when at secondary school and at the University of Kharkov, where he became a Marxist. At the university he organized socialist activity among the Jewish Lithuanian students, was arrested, and expelled. He did not complete his studies until 1898. Rosenthal joined the group of Jewish Social Democrats in Vilna. From 1895 he headed the "Jargon Committee" for the publication and propagation of popular scientific literature in Yiddish among the workers. From the autumn of 1899, he practiced medicine in Bialystok, acting also as leader of the local Bund, and as editor of its organ *Bialystoker Arbeter*. He attended the third convention of the Bund (1899) and from 1900 served on its central committee. In conjunction with J. *Portnoy at the Bund's fourth convention (Bialystok, 1901), Rosenthal drafted the resolution on the national question. He was the author of the "Manifesto to the Jewish Intelligentsia," which was published in the name of the Bund in three editions. Again imprisoned, Rosenthal was exiled to Siberia between 1902 and 1905. He played a prominent role in the revolt of the exiles in Yakutsk, the "Romanovka," which he described in his book of the same name (Rus., 1924). A member of the editorial board of *Veker*, the legally authorized organ of the Bund, Rosenthal shared all the vicissitudes of the Bund during the 1905 revolu-

tion. He was among the moderates regarding the Bund's return to the Russian Social Democratic Party. During the period of reaction following 1905, he turned his attention to the problems of promoting culture and education for adults. In World War I Rosenthal served at the front. After his discharge at the end of 1917, he was elected to the central committee of the Bund at its eighth convention. Resuming his professional and literary work in Moscow, Kiev, and Petrograd, Rosenthal was authorized to return to Vilna in 1921. Having previously identified with the internationalist wing of the Bund, in Poland he joined the short-lived Polish Social Democratic Bund.

A prolific author, Rosenthal had wide and varied interests. His work on revolutions in Western Europe, *Vi Zaynen Forgekumen Revolutsies in Mayrev Oyropa*, appeared in 1905. In his *Der Kampf far Velthershaft un Velt-Vegn* ("The Struggle for World Domination and World Routes," 1924, first published in Russian, 1923), he included a chapter on the general role of the Jews. His articles on the history of the Bund are included in *Royter Pinkes*, 1 (1921), 45–63; 2 (1924), 5–21.

Rosenthal's wife, ANNA, née Heller (1872–c. 1940), a dentist, was an early member of the Hovevei Zion group of Vilna and was later active in both the "Jargon Committee" and the Bund committee. With her husband, she took part in the revolt of the exiles in Yakutsk ("Romanovka"). She later resumed her Bundist activities. During World War I, Anna was active in the OSE and the Red Cross. Between the two world wars, she taught in Vilna in CYSHO institutions, and was active in YIVO. She was a Bundist delegate at the congress of the Socialist International (1931). Her memoirs were published in *YIVO Historishe Shriftn* (vol. 3, 1939). After the occupation of Vilna by the Soviets, she was arrested and died in prison.

[Moshe Mishkinsky]

ROSENTHAL, PHILIPP (1855–1937), German industrialist and founder of the Rosenthal porcelain works. Born in Werb, Westphalia, Rosenthal entered the porcelain trade as a young man, and left Germany in 1872 to work in the same field in the United States. Upon his return in 1879, he established a porcelain factory in Asch, Bohemia, and subsequently a second in Selb. Together with his brother Max, he developed the enterprise into the largest of its kind in the world. "Rosenthal" became a hallmark for fine china and many of its pieces are regarded as art items. Rosenthal converted to Christianity. In 1933 he came into conflict with the Nazis due to his Jewish origins. Due to his company's reputation, the Nazis did not risk attacking Rosenthal directly; eventually, however, they were able to have him declared legally incapacitated by exploiting quarrels in his family, thus depriving him of his rights.

[Monika Halbinger (2nd ed.)]

ROSENTHAL, WILLIAM (1920–1974), U.S. sociologist. Rosenthal was born in Newark, New Jersey. He taught at Wagner College and was on the faculties of the Adelphi University School of Social Work and the Cornell University School of Labor and Industrial Relations and was also a field instructor for Wayne State University, New York University and Columbia University. He was associated with the Wurzweiler School of Social Work of Yeshiva University from its foundation in 1957 and was appointed dean in 1973.

Among his many activities in a lifetime devoted to general and Jewish social work and education, Rosenthal served as secretary of the Health and Hospital Division, Essex County Social Agencies; as supervising consultant to the Economic Opportunities Committee, New York City; and as consultant to the Department of Social Services, New York City. He was executive director of the Jewish Community Center, Utica, N.Y., and from 1954 to 1965 executive director of the Jewish Community Center in Staten Island, where he made his home.

Rosenthal edited the Group Work section of the *Journal of Jewish Communal Services*, and *News and Notes* for the National Association of Jewish Center Workers.

ROSENWALD, U.S. family. **JULIUS ROSENWALD** (1862–1932), merchant and philanthropist, was born in Springfield, Illinois, the son of German Jewish immigrants. From 1879 to 1885, he was in New York City, working first at an uncle's clothing store, then opening his own, and finally starting to manufacture lightweight summer clothing. He moved the business to Chicago in 1885, where, as Rosenwald and Weil, it was fairly successful. In 1895 he bought a one-quarter interest in the recently established mail-order firm of Sears, Roebuck and Company for \$37,500 and became its vice president. He became company president in 1909. By 1925 his original investment was worth \$150,000,000. Rosenwald was responsible for opening factories that produced much of the firm's merchandise; introduced the famous "money-back-if-not-satisfied" guarantee; and expanded distribution of the firm's mail-order catalog to 40,000,000 copies annually. Rosenwald, who was somewhat paternalistic in employee relationships, stressed recreational facilities and introduced a profit-sharing plan. In 1925 Rosenwald became chairman of the board, and remained in that post until his death.

In the area of philanthropy, Rosenwald heavily subsidized the erection of YMCA buildings for African Americans in 25 cities and the establishment of thousands of rural schools in the southern U.S. from 1910 on. He served continuously from 1912 as a trustee of Tuskegee Institute, and donated \$2,700,000 for the construction of model housing for African Americans in Chicago. The Julius Rosenwald Fund, established in 1917 with a capital of \$30,000,000, was Rosenwald's chief philanthropic instrument. He directed that the fund's capital and interest be expended within 25 years of his death.

Rosenwald was president of the Associated Jewish Charities of Chicago (1907); contributed substantially to Jewish war

relief during World War I and the post-war period; pledged \$6,000,000 to promote Jewish agricultural colonization in the Soviet Union; and gave \$500,000 each to the Hebrew Union College and Jewish Theological Seminary. Rosenwald opposed Zionism but contributed modestly to educational and agricultural institutions in Palestine. He served for many years as vice president of the American Jewish Committee. Active in general civic affairs, Rosenwald was a trustee of the University of Chicago, to which he donated \$5,000,000; he pledged \$3,000,000 for the Chicago Museum of Science and Industry; and he served on the Advisory Commission of the Council of National Defense during World War I.

LESSING JULIUS ROSENWALD (1891–1979), the eldest son of Julius Rosenwald, was a merchant, book collector and philanthropist. Rosenwald, who was born in Chicago, Illinois, entered Sears, Roebuck and Company as a shipping clerk in 1911, and worked his way up through the company's ranks. After naval service in World War I, he took charge of the Sears plant in Philadelphia and, upon his father's death in 1932, succeeded him as chairman of the board until 1939. During World War II, Rosenwald served as director of the Bureau of Industrial Conservation. In 1943 he led the foundation of the *American Council for Judaism and was its first president. Rosenwald and the Council campaigned vigorously in the U.S. and before the UN against the establishment of a Jewish national state in Palestine. Rosenwald continued the philanthropic tradition of his family through service and contributions to Jewish and general civic causes. In addition, he was noted as a collector of rare books and prints and contributed generously to the National Gallery of Art and Library of Congress.

WILLIAM ROSENWALD (1903–1996), the second son of Julius Rosenwald, was a philanthropist and financier. Rosenwald, who was born in Chicago, Illinois, served briefly as a director of Sears, Roebuck and Company before concentrating on his own investments. These included the American Securities Corporation and Ametek, Inc. and Western Union. Rosenwald was one of the outstanding figures in American Jewish philanthropic activity from the 1930s. He served as chairman of the national United Jewish Appeal campaign, and vice chairman of the Joint Distribution Committee, American Jewish Committee and United HIAS Service. He also supported Tuskegee Institute, the Chicago Museum of Science and Industry and the New York Philharmonic Symphony Society.

[Morton Rosenstock]

ROSENWILLER (Rosenweiler), town in Alsace in the department of Bas-Rhin, E. France. There is evidence of Jews in Rosenwiller from the middle of the 16th century. Although an expulsion order was issued by the local lord in 1563, it does

not seem to have been effectively carried out, but the number of Jews there remained small. The Rosenwiller community was important because its Jewish cemetery, dating from at least 1621, served some 20 Jewish communities in the area. In the second half of the 18th century, almost 100 burials a year took place there.

[Bernhard Blumenkranz]

ROSENZWEIG, FRANZ (1886–1929), German Jewish philosopher and theologian. Rosenzweig was born in Kassel, Germany, the only son of well-to-do parents. His father Georg financially supported many charity institutions, including the Jewish community, but the family's adherence to Judaism was minimal. In his youth, Franz came under the influence of his great-uncle, Adam Rosenzweig, a bachelor, an artist and a learned Jew, who lived in the Rosenzweig home and spent many hours with Franz. Through him the young boy learned of the Jewish world in an otherwise assimilated milieu. Unlike the rest of his family, Rosenzweig fasted on *Yom Kippur* (the Day of Atonement) and also took private Hebrew lessons. In 1905, he enrolled at the university, where he initially studied medicine, as many a Jewish student did, but then turned to philosophy and history, concentrating on Hegel and German idealism. He wrote his Ph.D. dissertation on "Hegel and the State."

In 1909, Rosenzweig tended towards assimilation, and justified the conversion of his cousin Hans Ehrenberg to Christianity. He did not see the advantage that Judaism could have over Christianity, the dominant culture, which would also help him obtain a teaching position, almost impossible for a Jew to get. Another cousin and friend, Rudolf Ehrenberg was already born a Christian. Eugen *Rosenstock, a Jewish convert to Christianity, became Rosenzweig's closest friend. Rosenstock, who would become an important nonconformist Protestant theologian, repeatedly urged him to abandon what he considered Rosenzweig's merely nominal Judaism and to convert. After months of deep conversations, and especially the catastrophic conversation with Rosenstock during the night of July 7, 1913, Rosenzweig decided to convert. But he then made the condition, to convert not "as a pagan," but "as a Jew." All this led to a crisis and almost to suicide. He left his converted friends for a few years and refrained from having any contact with them. In the same year, on Yom Kippur of 1913, he attended in Berlin the synagogue of Rabbi Petuchowski and felt a profound identification with the praying Jewish community. After a few days he wrote his friends, "I shall remain a Jew." He then reshaped his life, rethought his identity, and devoted his further life to a sincere return to Judaism, moving from the periphery of Jewish life to its center.

He developed a very close relationship with the philosopher Hermann *Cohen, who had retired from the University of Marburg and now taught at the Hochschule fuer die Wissenschaft des Judentums, the institution for adult Jewish

education in Berlin. Cohen was of enormous importance for the young returning Jew, who saw in his teacher a great philosopher and someone who represented a source of Jewish tradition. Only in 1916 did Rosenzweig resume his lengthy theological correspondence with Rosenstock, after he had strengthened his renewed Jewish roots; in this correspondence with his friend he explained his new existential position. Although he disliked Rosenstock's continued attempts to convert him, the two remained in close contact. Rosenzweig inherited from his friend the idea of revelation as "orientation" in life, and devoted his first Jewish theological essay (*Atheistische Theologie*) to the idea of revelation, which went beyond what Rosenstock wrote and debated with Buber.

In World War I Rosenzweig served in the German army, and, while stationed in the Balkans, planned the revival of Jewish education. He sent his plan to Hermann Cohen as an open letter called *Zeit ists* (*It is Time*, 1917), a letter that had an enormous influence. Towards the end of the war, in the trenches, with the retreat of the Balkan-troops and in the army hospital he wrote the first draft of his *Stern der Erloesung* (*Star of Redemption*), his main work. At a feverish pace he wrote his major philosophical work, which contains hundreds of pages. New light has now been shed on it by Rosenzweig's correspondence with Gritli Rosenstock, which will be discussed below. The *Star of Redemption* was written from August 23, 1918, to February 16, 1919, and published in 1921.

In his return to Judaism, Rosenzweig was supported primarily by Hermann Cohen, but also by people such as Rabbi Nehemiah Nobel, Martin Buber, Joseph Prager, and Eduard Strauss. In 1920 he married Edith Hahn, and progressively observed the Jewish laws. Their son Raphael was born in September 1922. Realizing that, as a returnee to Judaism, he could play a pivotal role in bringing Jews back to their roots, Rosenzweig became interested in Jewish education, and in 1920 was appointed director of the Freies Juedisches Lehrhaus, an institute of adult Jewish education in Frankfurt on the Main, in which the participants were invited to express their view on Jewish problems and to try to understand their identity. The same year, he turned down an offer by Friedrich Meinecke to become a professional historian. Instead, he desired to free himself from what he called "dead science" and from "mere cognition," so that he could enter into the flow of life, where real questions demand answers. In the Lehrhaus, he used his talents not to write books, but to provide living answers to questions from the public, who were increasingly interested after the war in the return to Jewish faith.

According to Rosenzweig, the uniqueness of the Lehrhaus was in that people took part in conversations through questions and counter-questions. "*Lernen*," which in German means to study, but which, according to Rosenzweig in a 1919 letter to Margrit Rosenstock, in a Jewish context means both to study and to teach, is possible wherever people come together and try to overcome their estrangement from Judaism. The Lehrhaus in Frankfurt was not dependent on rabbis or religious teachers, but on people who knew little, in Rosen-

zweig's words: "*am ha-arets*" (without Jewish education), but who brought with them a great enthusiasm in their return to Judaism. The teachers were Jews on the periphery who were assimilated and wanted to rediscover their identity. People would be willing to read Jewish texts, such as the Bible, Midrash, Talmud, the *siddur* or *mahzor*, and discover and build a Jewish life. It was not the books in themselves but rather the actual living encounter with other Jews that would create the opportunity to build Judaism.

In Rosenzweig's day, the dialogical method of learning was something novel, and at the universities it was completely absent. Today this method is more accepted. Practically, teaching now means being in interaction with the audience, certainly in informal adult education. Yet, Rosenzweig rightly understood that when Jews study together, something else happens. *Lernen* is not merely interactive learning, it means creating a community of people who make ancient texts speak again to the present generation, in constant renewal.

Alfred Jospe criticized the Lehrhaus in Frankfurt as being over-intellectualized. In his view, the program addressed itself mainly to the intelligentsia and did not really reach the men and women who had questions but lacked a higher education. Secondly, he felt that the school's accent was more on the transmission of knowledge than on the experiencing and living of Jewish values and ideas. While this criticism may be correct from a certain point of view, Rosenzweig's concept of the Lehrhaus was important and functioned as a model for other houses of study in Europe and America. One of the great advantages of the Lehrhaus was that people, through participating in the programs and projects, could express the profound questions that dwelled within them and cultivate a sense of at-homeness with Judaism and the Jewish community. Rosenzweig had to realize his educational project within a public that was not used to interaction and, on his part, he had to abandon the attitudes that prevented him from being truly dialogical. However, the very concept of a new, permanent, dialogical learning style was revolutionary and remains so today.

In the 1920s, Rosenzweig published a translation of 92 poems by *Judah Halevi with a commentary. Together with Buber he began translating the Bible, reaching Isaiah 52. In their Bible translation, the two wanted to bring the reader into as much contact as possible with the oral origin of the Bible. The translation gained great popularity. They rendered the Tetragrammaton in the pronominal forms "I," "You," and "He," highlighting in this manner the divine presence today. Rosenzweig accepted higher Bible criticism, and believed that there can be no contradiction between Torah and science, but considered the abbreviation "R." not as referring to the final Redactor, but rather to "*(Moshe) Rabbenu*," Moses our teacher, and considered the unity of the biblical text as the source of the Jewish faith. Rosenzweig, in opposition to extreme rationalism, appreciated biblical anthropomorphisms as attesting to the living dialogue between God and man, and as a pre-eminent way of speaking of this relationship.

Rosenzweig's important essay *Die Bauleute* (*The Builders*, 1923) discusses the attitude of the Jew to the commandments. Unlike the orthodox Jew, Rosenzweig did not accept all of the commandments, but distinguished between the subjective "commandment" (*Gebot*), which addresses the individual in the present, and which he readily accepted, and objective Law (*Gesetz*), which he could "not yet" accept. His beautiful introduction to Hermann Cohen's Jewish writings and his other Jewish essays further testify to Rosenzweig's steadily growing interest in Jewish life.

Parallel to his religious evolution, Rosenzweig developed his existential philosophy and subsequently explicated it in a more popular way in *Das neue Denken* (*The New Thinking*, 1925). The essay shows his dissatisfaction with German idealism and describes his kind of "new thinking," which takes into account the importance of dialogue, pluriform reality, language, and time. Instead of a philosophy serving history and politics and knowing nothing about revelation, Rosenzweig posited revelation as leading to a life of community. Eternity (*Ewigkeit*) is to be realized in the everyday life in the community of believers.

In his magnum opus, Rosenzweig conceived of the All collapsing into three separate elements: God, man, and the world. In opposition to pantheism, materialism, and extreme anthropology, he rejected the philosophical attempt to reduce these elements to one, and pointed to their interaction with each other in the relationships of creation, revelation, and redemption. In revelation, God addresses man with the commandment "Thou shalt love," which is the basis of all laws. Judaism and Christianity as collective answers to revelation are two twin communities, which are different, complementary, and critical towards each other. They are partial truth in history, whereas God as the ultimate truth transcends them. Yet, as in Judah Halevi's *Kuzari*, Judaism is given clear priority in the *Star*.

In opposition to the idealistic attempts to find God in history and to make the world into a platform of the developing Absolute Spirit as did Hegel, Rosenzweig's *Star* did not put history in the center, but "revelation" and "eternity," which are a "rupture" of history. Jewish history has no epochs; it transcends time and is eternal. For Rosenzweig, there is a new form of interaction between philosophy and theology: theology talks about revelation as the objective breach of history, whereas philosophy approaches the same revelation from the subjective point of view.

With his revelation-centered philosophy, Rosenzweig criticized idealism, which was current in the German universities of that time and in which he was well versed. In 1917 he had published *Das aelteste Systemprogramm des deutschen Idealismus*, in which he identified as Schelling's a manuscript written in Hegel's hand on a unified system of idealism. (Pöggler now argues that the program fits Hegel and not the early Schelling; the subject is in debate.) In 1920 Rosenzweig published his *Hegel und der Staat* (1920).

However, it was the *Star* that interested Rosenzweig most. In it he developed his anti-idealistic thinking, and he

expressed his existential philosophy in ancient Jewish terms. The *Star*, a compendium of Jewish insights, was first of all the result of his deep Jewish development: first through the crisis of 1913 and then through the friendship with Hermann Cohen. After the *Star* he led a Jewish life as a paralyzed, sick man, who worked on translations of Jewish texts and on matters of Jewish adult education. He contracted amyotrophic lateral sclerosis (ALS), a disease that gradually prevented him from performing any motor function except from moving his eyebrows. Rosenzweig died after 7 years of long suffering in 1929, at the age of 43.

Rosenzweig and Buber

Over the years, the possibility of a friendship between Buber and Rosenzweig prior to the publication of Buber's *I and Thou* in 1922 had been considered; surprisingly, through numerous manuscripts and letters it was possible to prove that Buber's theory of dialogue developed out of their dialogue. This research was undertaken by Rivka Horwitz in *Buber's Way to I and Thou* (1978), which throws new light on the intimate personal and intellectual relationship between the two. It shows that an early version of *I and Thou*, "Religion als Gegenwart" (*Religion as Presence*) was presented by Buber in Rosenzweig's Lehrhaus. Additional evidence is found in the correspondence between Rosenzweig and Martin Buber in 1922, while Buber was writing his monumental *Ich und Du*.

Rosenzweig criticized Buber's dialogical philosophy, because it is based not only on the I-You relation, but also on I-It, a notion which Rosenzweig rejected as idealistic. He thought the counterpart to I-You should be He-It, namely "as He said and it became": building it around the human I – the human mind – is an idealistic mistake. Therefore, Rosenzweig preferred concentrating on the divine He, whose world man is searching for. The world is God's world; He is the Creator of the world. There is ample proof that Buber accepted Rosenzweig's criticism with regard to *Ich und Du*, although not immediately, as it would have demanded a drastic change in the book, but in his later writing – not only in the Bible translation where the Tetragrammaton is translated *Er* ("He"), but also in his own philosophy in the coming years. Buber then wrote about the Creator next to the Eternal Thou. The archival evidence thus makes it increasingly clear that Rosenzweig's philosophy played a more important role in the development of Buber's philosophy of dialogue than previously recognized.

Rosenzweig and Margrit Rosenstock

Rosenzweig's voluminous and recently published correspondence with Margrit Rosenstock-Huessy, Eugen's wife, called Gritli, from mid-1917 until late-1925, casts unexpected and lively light on Rosenzweig's *New Thinking*, as well as on his Judaism, his Jewish identity, his problems with his parents, with his friends and cousins, his attachment to uncle Adam, and his attitudes toward Christianity and Germany. They contain numerous philosophical and theological remarks and offer valuable insights into the birth and development of Rosenzweig's masterpiece, the *Star of Redemption*. In June of 1917,

Rosenzweig met Gritli in Kassel and he became her lover for some time. Whereas Eugen and his other friends wanted to convert Franz, Franz appreciated the attitude of Gritli, who was tolerant of the expression of his Jewishness. She did not try to convert him, and rather said to him in times of crisis: “Franz ich suche dein jüdisches Herz” (“Franz, I search for your Jewish heart”). The Gritli letters give new impetus for scholarly research into Rosenzweig’s philosophy and into the complexity of his life. Reading the Gritli letters, we see that the former tendency to write much about Hegel and Schelling as a source for Rosenzweig does not follow from these letters, whereas little has been written as yet on Eugen Rosenstock, Hans and Rudolf Ehrenberg, or Hermann Cohen’s profound influence on Rosenzweig. In the letters, Rosenzweig gave Rosenstock a great deal of credit and he greatly appreciated Cohen, from whom he borrowed the idea of revelation as a new creation.

The documents reveal many details about the *Star*, making it clear that the *Star* led Rosenzweig from thoughts about the exteriority of death and suicide to the positive experience of the life-transforming exteriority of revelation, which nourishes life in the community. In writing the *Star* Rosenzweig freed himself from a paralyzing and dead thinking, as well as from suicidal thoughts. He emphasized that the *Star* only elucidates one concept: that of factuality “*Tatsächlichkeit*”: the fact (*die Tatsache, das Faktum*) which stands free from the idea. In the letters Rosenzweig speaks about his anti-idealistic thoughts on language, time, and eternity. He discusses the importance of the name, explained why he appreciated anthropomorphisms and attributed a special place to paganism, namely as the truth in embryonic form, and elucidated his concept of the miracle (*Wunder*) of revelation as “sign” (*Zeichen*), i.e., as predicted in creation. He stressed the Jewish character of the *Star*, wanted a Jewish publisher for the book, and described the *Star* as counterpart of Rosenstock’s chief work *Im Kreuz der Wirklichkeit* (*Cross of Reality*).

From these letters, we also learn about many existential problems, about his mother’s suicidal tendencies and Eugen’s continual attempts to convert him. Most importantly, the letters contain many remarks on Rosenzweig’s progress on his way to Judaism. He wrote on the Lehrhaus, on his translations, and on his joy of being of Jew. Noteworthy are his thoughts on the “New Law” (*neues Gesetz*), which is based on the commandment of love, which pertains to the whole of life and is not restricted to religion. This “New Law,” being linked to the divine imperative of love, is not characterized by coercive force, but by its possible subjectivization: the objective Law, *Gesetz*, may become a personal commandment, *Gebot*. Just as “New Thinking” was required for philosophy leading “into life” (*ins Leben*), so the “New Law” in Jewish life could make a person alive (*lebendig*), turning him into a lively, responsive, and responsible being.

Rosenzweig’s thoughts on the complex relationship between religion and revelation remain crucial for any future Jewish-Christian dialogue. They are an eminent example of di-

alogue, showing its possibilities and its boundaries. However, the Gritli letters inform us that Rosenzweig changed his view on the relationship between Judaism and Christianity during the year 1919. Whereas in the *Star* he still viewed the twin religions as antipodal, he now became increasingly influenced by Gotthold Ephraim *Lessing’s parable of toleration, *Nathan the Wise*, and developed a view of Judaism and Christianity that is less antithetical and more egalitarian than in the *Star*. The emphasis now was on human beings, not Judaism or Christianity. The institutions are not God’s bride; they are homes for the children of God, for people. Although Rosenzweig, like Lessing, conceived the truth as still having to be realized, he also remained critical towards Lessing and thought that the view expressed in *Nathan the Wise* is too bloodless and abstract; all persons are essentially different.

Influence

The Gritli letters, which contain more than a thousand pages and were published to a large extent in recent years, aroused renewed interest in Rosenzweig’s writings. Interest is also growing from another direction, as a result of the great scholarly interest in the work of French Jewish philosopher Emmanuel *Levinas, who clearly recognized and expressed his debt to Rosenzweig. In May 2005, the Internationale Rosenzweig-Gesellschaft was founded, which organizes scholarly activities in Europe, the U.S., and Israel. Rosenzweig’s impact on Jewish-Christian dialogue has been profound. His combination of a dynamic interest in Jewish learning, of vast general culture, and of a non-parochial Judaism has attracted many Jewish intellectuals.

[Ephraim Meir and Rivka G. Horwitz (2nd ed.)]

ROSENZWEIG, GERSON (1861–1914), U.S. Hebrew writer. Born in Lithuania, he taught Hebrew in Bialystok, and in 1888 he immigrated to the United States. Rosenzweig edited several Hebrew periodicals – *Ha-Ivri* (1891–1902), *Kadimah* (1899–1902), *Ha-Devorah* (1911–12) – they were short-lived and earned him neither fame nor a livelihood. He also edited Hebrew columns in the Yiddish press.

Though he was a versifier rather than a poet, he had a genuine flair for satire and he was known to his contemporaries as the “sweet satirist of Israel” and as a parodist he earned an honorable place in Hebrew literature. His *Talmud Yanka'i* (“Yankee Talmud”, 1907, 1909) poured a stream of ill-humored sarcasm on the peddler, the teacher, the rabbi. The pages of that collection of satires resembled the pages of the Talmud: the text in large letters, wreathed by commentary in Rashi script, is divided into six tractates instead of the talmudic six orders. Rosenzweig also denounced the vulgarisms of the country, the worship of money, the religion of success. Epigrammatic neatness was his forte. Example: “What is the difference between a convert and an anarchist? A convert denies what he believes, an anarchist believes what he denies.” Using a biblical phrase, he quipped sardonically about his impending death by cancer of the tongue: “Life and death are at the mercy

of the tongue” (Prov. 18:21). He published two books of epigrams: *Shirim, Meshalim u-Mikhtamim* (1893) and *Ḥamishah ve-Elef Mikhtamim* (1903; reprinted in Russia).

In the English preface to his Hebrew translations of “America,” “The Star-Spangled Banner,” and “Columbia, the Gem of the Ocean” which appeared in the booklet *Mi-Zimrat ha-Arez* (1898), he ventured to suggest that “the youngest nation is the heir of the oldest, and all that was best in the Jewish nation is now in the possession of the American nation to be developed and cultivated for the benefit of all humanity.”

ROSETTA (Rashid), town in Egypt, situated on the western bank of the western tributary of the Nile. The **Genizah* documents point to the economic activity of the Jews in Rosetta, e.g., a letter dated February 16, 1000, from Fustat sent to Yeshua ben Ismail al-Maghrebi in Rosetta. Meshullam of Volterra mentioned the existence of a Jewish community in Rosetta in 1481. When, at the beginning of the 16th century, *Alexandria lost its commercial importance, Rosetta became the most important transit harbor for the maritime trade between *Egypt and *Turkey. Jews in Rosetta did business with Jews from Rhodes. There were Jews in the town during the late Middle Ages, but the Jewish population increased considerably during the 16th century with the arrival of Spanish refugees. Rosetta became a well-organized community headed by learned rabbis. These included: R. Moses ibn Abudraham, R. Judah Mesh'al, R. Abraham b. Sur, and R. Abraham Medina in the 16th century; the great *posek* R. Mordecai ha-Levi (born in Rosetta in 1620); in the first half of the 17th century the great *dayyan* R. David Gershon; R. Abraham b. Nathan (d. 1725); and R. Shabbetai Nauavi, his brother Isaac, and R. Judah Crispin in the 19th century. Abraham ben Ḥayyim Nathan (d. 1725) settled in Rosetta in 1695 and for 30 years dealt in international trade, employing agents in Turkey and *Italy in the 18th century. He contributed money to the *Viga Yeshivah* in *Jerusalem. Close to the year 1740, there was a debate about his inheritance, whose result was the foundation of the Ḥesed le-Avraham u-Binyan Shelomo Yeshivah in Jerusalem in 1747. In the 17th century Israel Crispin and David Re'uel served also as *dayyanim*. The *Karaites Samuel b. David, who visited Egypt in 1641, relates that there were then two synagogues in Rosetta. Israel Benjamin (*Benjamin 11) found 50 families there in the middle of the 19th century. After the opening of the Mahmudiya Canal which connected the Nile with Alexandria, Rosetta lost its importance and the majority of its Jews left, so the community disappeared. The Jews lived earlier in their own quarter. The Jewish translator for the French vice consul in Rosetta at the beginning of the 18th century was Abraham Metinoly. In 1709 there was a Jewish dragoman (translator) who served the French merchants

in Rosetta. The scholars of the community had good connections with the Jerusalem community. There were Ottoman Jews, like Joseph Mitinoly who were translators. There were also Jews in the city who were French subjects. Some were also customs officers in the Ottoman period.

ROSEWATER, EDWARD (1841–1906), U.S. journalist, publisher, editor and politician. Rosewater, who was born in Bukoven, Bohemia, went to the U.S. with his family in 1854. He soon became a telegrapher, and as a member of the United States Military Telegraph Corps during the Civil War, he accompanied Union forces and was responsible for transmission of Lincoln's Emancipation Proclamation. Rosewater went to Omaha as manager of Edward Creighton's Pacific Telegraph Company and also worked as a newspaper correspondent. He was elected to the Nebraska State Legislature in 1871 and founded the Omaha *Daily Bee* in connection with a campaign to establish an Omaha Board of Education. The rights of the common man and public improvements were constantly championed in the pages of the *Bee*, and though Rosewater gained numerous enemies, he became one of Omaha's best known and most influential citizens. Active in politics, Rosewater served on the Republican National Committee and its advisory board, represented the United States at two Universal Postal Congresses, and served on the Mint Commission. Advocating direct election of U.S. senators, civil service and labor reforms, a postal telegraph system, and postal savings banks, and opposed to trusts and unequal taxation, Rosewater twice unsuccessfully ran for the United States Senate. His son VICTOR ROSEWATER (1871–1940) succeeded him as editor of the *Bee*. He was active in Republican Party politics, chaired Omaha's first home rule charter convention and served on the University of Nebraska Board of Regents, the Omaha Public Library Board, and other public bodies. He was also a founding member of the American Jewish Committee. Rosewater retired from newspaper work in 1920. He was director of publicity for the Sesquicentennial Exposition, and later devoted himself to writing and lecturing. His books include: *Liberty Bell* (1926) and *History of Cooperative News Gathering in the United States* (1930).

ROSH HA-AYIN (Heb. רֹאשׁ הָאֵינָן), urban settlement in the coastal plain of Israel, 3 mi. (5 km.) east of Petaḥ Tikvah, near the Yarkon, whence the name Rosh ha-Ayin (“Head of the Spring”) is derived. Ancient place names of the vicinity, the Hebrew *Aphek and the Greek Pegai (πηγαί, “springs”), also point to the river sources. Since the Middle Bronze period, the site constituted a major road station on the Via Maris leading from Egypt to Mesopotamia. As the area also commands the commodious entrance to the northern Judean Hills, sites of the vicinity were repeatedly fortified in history (Aphek, *Antipatris). The springs (which today are important in Israel's national water planning), and adjacent pumping installations, which provided water to Jerusalem during the British Mandate, were occupied by Israeli forces in July 1948. A large British army camp erected during World War II was converted in 1950 into a *ma'barah* that provided shelter for immigrants from Yemen. In 1951, Rosh ha-Ayin was transformed into a permanent settlement, and in 1955 it received municipal council status. The town was Israel's only large Jewish agglomeration in which nearly all the inhabitants originated in a single country, i.e., Yemen. The population grew through natural increase from 5,880 persons in 1950 to 11,600 in 1970, although hardly any immigrants came after 1951 and a considerable number of inhabitants left for other places in Israel over the years. Most breadwinners were employed outside Rosh ha-Ayin in industrial and other enterprises in Petaḥ Tikvah and other towns in the outer ring of the Tel Aviv conurbation. In the mid-1990s, the population was approximately 17,800, doubling to 35,200 in 2002 as the city absorbed many residents from the Gush Dan area (the Tel Aviv conurbation). In 1994 Rosh ha-Ayin received city status in the presence of late Prime Minister Yitzḥak Rabin. Its municipal area was 11.5 sq. mi. (30 sq. km.), its population heterogeneous, and its new industrial area (Afek) based on high-tech industry, mainly communications.

[Shlomo Hasson / Shaked Gilboa (2nd ed.)]

ROSH HA-SHANAH (Heb. רֹאשׁ הַשָּׁנָה), the Jewish New Year, the autumn festival celebrated on the first and second days of Tishri.

In the Bible

The name Rosh Ha-Shanah as it is used in the Bible (Ezek. 40:1) simply means the beginning of the year, and does not designate the festival. The months of the year were counted from the spring month (Ex. 12:2), later called by the Babylonian name Nisan. The month known by the Babylonian name Tishri is, therefore, called the “seventh month” in the Pentateuch. When the festival on the first of this month is recorded, it is referred to as the festival of the seventh month and as a day of “memorial proclaimed with the blast of horns,” or “a day of blowing the horn” (Lev. 23:23–25; Num. 29:1–6). In the Bible, the festival lasts for one day only; the two-day festival arose out of the difficulty of determining when the *new moon actually appeared.

The Babylonian name Tishri seems to derive from the root *seru*, which means “to begin.” The ancient Semitic peoples thought of the year as beginning in the autumn, at the time of the late harvest; cf. the expressions *be-zet ha-shanah* (“at the end of the year”), and *tekufat ha-shanah* (“(at) the turn of the year”), by which the Feast of Ingathering, or *Sukkot, which is in a sense the popular equivalent of the more priestly Day of Remembrance, is dated in Exodus 23:16 and 34:22 respectively. The *Gezer Calendar in fact begins with two Months of Ingathering. This was the beginning of the economic year, when crops began to be sold. It is plausible, therefore, that the biblical feast originally marked the beginning of the agricultural year. If this is correct, the rabbinic name Rosh Ha-Shanah only makes explicit that which had been implicit in the observance of the day from earliest times. It was on the first day of the seventh month that Ezra the Scribe read the book of the Law before the people (Neh. 8:1–8). The people, conscious of their shortcomings, were distressed to hear the words of the Law; but Nehemiah, Ezra’s companion, said to them: “Go your way, eat rich viands, and drink the sweet beverages, and send portions to him who has none prepared; for this day is holy to our Lord; do not be sad; for joy in the Lord is your refuge” (Neh. 8:10). The psalmist is almost certainly referring to this festival when he proclaims: “Blow the horn at the new moon, at the full moon for our feast day. For it is a statute for Israel, an ordinance of the God of Jacob” (Ps. 81:4–5). In the critical view, the Pentateuchal legislation in which the festival appears belongs to the Priestly Code (P) and, therefore, to the post-Exilic period, when the Babylonian influences had become particularly pronounced. The older critical views consider the whole institution to be post-Exilic, pointing out, for instance, that there is no reference to it in the lists of the feasts in Deuteronomy (16:1–17). More recently, however, S. Mowinckel (*The Psalms in Israel’s Worship*, 1 (1962), 120ff.) has advanced the suggestion that there existed in pre-Exilic Israel an autumnal New Year festival on which God was “enthroned” as King (analogous to the Babylonian enthronement of *Marduk). He claims to have found marked traces in many of the psalms to substantiate his assertion. Although Mowinckel’s thesis has won wide acceptance, it is still the subject of debate.

In Rabbinic Literature

The Mishnah (RH 1:1) speaks of four periods of the year, each known as Rosh Ha-Shanah (see *New Year). One of these is the first of Tishri, and it is to this day that the name generally refers. It is a day when all mankind is judged (RH 1:2). R. Eliezer taught that the world was created in Tishri; R. Joshua that it was created in Nisan (RH 10b–11a). In the Rosh Ha-Shanah liturgy, the reference to the day as the day on which the world was created follows the opinion of R. Eliezer (RH 27a). The motif of Rosh Ha-Shanah as a day of judgment is independent of the theme of creation. R. Nahman b. Isaac interprets “From the beginning of the year even unto the end of the year” (Deut. 11:12) to mean that God determines at the beginning of the year what is to be at the end of the year (RH 8a). Another

opinion has it that on Rosh Ha-Shanah heaven assigns to a person how much he will earn during the coming year (Beẓah 16a). Confidence in God’s mercy is expressed when it is said: “It is the custom of men who appear before a court of justice to wear black clothes, to let their beards grow long because the outcome is uncertain. But Israel does not do so. On the day of judgment (Rosh Ha-Shanah), they wear white garments and have their beards shaven and they eat, drink, and rejoice in the conviction that God will perform miracles for them” (TJ, RH 1:3, 57b). The theme of God as King is particularly stressed on Rosh Ha-Shanah because of the day’s association with His judgment (Ber. 12b). During the prayers of the day, it is necessary to recite ten biblical texts which have the theme of God as King (**malkhuyyot*); ten which have the theme of God as He Who remembers (**zikhronot*); and ten which have reference to the **shofar* (*shofarot*; RH 4:5–6). These are explained as God saying, “Recite before Me on Rosh Ha-Shanah *malkhuyyot*, *zikhronot* and *shofarot*: *Malkhuyyot* so that you may proclaim Me King over you; *zikhronot* so that your remembrance may rise favorably before Me; and through what? Through the *shofar*” (RH 16a). The four names of the festival in Jewish tradition, based on the above, are: Rosh Ha-Shanah, Yom Teru’ah (“Day of Blowing the Horn”), Yom ha-Din (“Judgment Day”), and Yom ha-Zikkaron (“Day of Remembrance”).

R. Keruspedai said in the name of R. Johanan: “Three books are opened on Rosh Ha-Shanah, one for the completely righteous, one for the completely wicked and one for the average persons. The completely righteous are immediately inscribed in the book of life. The completely wicked are immediately inscribed in the book of death. The average persons are kept in suspension from Rosh Ha-Shanah to the Day of Atonement. If they deserve well, they are inscribed in the book of life, if they do not deserve well, they are inscribed in the book of death” (RH 16b). The theme of the books of life and death feature prominently in Rosh Ha-Shanah liturgy. The intellectual difficulties in the whole concept were much discussed in the Middle Ages (see e.g. Nahmanides, “*Torat ha-Adam*,” in: H.D. Chavel (ed.), *Kitvei Rabbenu Moshe ben Nahman*, 2 (1964), 264ff.).

The Shofar

The essential ritual of Rosh Ha-Shanah is the sounding of the *shofar*. The Mishnah (RH 3:2) rules that the horn of any animal (e.g. sheep, goat, antelope), except the cow, may be used as a *shofar* on Rosh Ha-Shanah. One of the reasons why the horn of a cow is not used is its reference to the golden calf and “a prosecuting counsel cannot act for the defense” (RH 26a). At a later period, the ram’s horn was preferred in order to recall the binding of Isaac for whom a ram was substituted (RH 16a; see Gen. 22:13). It is considered meritorious to use a curved *shofar*, symbolic of man bowing in submission to God’s will (RH 26b). The silence of the Scriptures as to why the horn is blown on this day left room for a wide variety of interpretations among later teachers. There are ten frequently-quoted reasons, which scholars have attributed to *Saadia Gaon

(see *Abudraham ha-Shalem*, ed. S. Krauser (1959), 269–70): (1) Trumpets are sounded at a coronation and God is hailed as King on this day. (2) The *shofar* heralds the beginning of the penitential season (from Rosh Ha-Shanah to the Day of Atonement). (3) The Torah was given on Sinai accompanied by blasts of the *shofar*. (4) The prophets compare their message to the sound of the *shofar*. (5) The conquering armies that destroyed the Temple sounded trumpet blasts. (6) The ram was substituted for Isaac. (7) The prophet asks: “Shall the horn be blown in a city, and the people not tremble?” (Amos 3:6). (8) The prophet Zephaniah speaks of the great “day of the Lord” (Judgment Day) as a “day of the horn and alarm” (Zeph. 1:14, 16). (9) The prophet Isaiah speaks of the great *shofar* which will herald the messianic age (Isa. 27:13). (10) The *shofar* will be sounded at the resurrection.

Maimonides (Yad, Teshuvah 3:4) writes: “Although it is a divine decree that we blow the *shofar* on Rosh Ha-Shanah, a hint of the following idea is contained in the command. It is as if to say: ‘Awake from your slumbers, ye who have fallen asleep in life, and reflect on your deeds. Remember your Creator. Be not of those who miss reality in the pursuit of shadows, and waste their years in seeking after vain things which neither profit nor save. Look well to your souls and improve your character. Forsake each of you his evil ways and thoughts.’”

The particular *shofar* sounds blown on Rosh Ha-Shanah have an extended development. “A day of blowing the horn” (Num. 29:1) is, in Hebrew, called *yom teruah*, and is rendered by the Targum as *yom yabbava*. The phrase concerning the mother of Sisera who is said to have “looked through the window” (*va-teyabbev*; Judg. 5:28) is interpreted by the Rabbis as “and she wept.” Hence the *shofar* blast is said to be a weeping sound. According to rabbinic tradition, however, the *teruah-yabbava* sound must always be followed and preceded by an extended, unbroken note, *teki'ah*. Since there are three references to the *teruah-yabbava* sound (Lev. 23:24; 25:9; Num. 29:1), it follows that three *teruah-yabbava* sounds are required, each preceded and followed by a *teki'ah* (RH 33b, 34a). There are doubts as to whether the weeping sound means three groaning notes (*shevarim*) or a series of nine very short wailing notes (*teruah*). Is the biblical *teruah-yabbava*, then, a *shevarim* note, or a *teruah* note, or both together? In order to eliminate all doubt, the practice arose, and is still followed, of sounding all three notes. The order became:

teki'ah shevarim teruah teki'ah (3 times)

teki'ah shevarim teki'ah (3 times)

teki'ah teruah teki'ah (3 times).

The final *teki'ah* is especially long and drawnout, and is known as *teki'ah gedolah*, “the great *teki'ah*.” This series of 30 notes, first sounded after the reading of the Torah, is again sounded during the repetition of the **Musaf Amidah* (in some rites in the silent *Amidah*), and in many congregations also at the end of the service with an additional ten notes, so as to make a total of 100. The sounding of the *shofar* in the synagogue is an occasion of great solemnity at which God is entreated to show mercy to His creatures. The Midrash remarks:

“R. Josiah said: It is written: ‘Happy is the people that know the sound of the trumpet’ (Ps. 89:16). Do not the nations of the world know how to sound the trumpet? They have numerous horns, sirens and trumpets, and yet it is said: ‘Happy is the people that know the sound of the trumpet.’ This means that Israel is the people which knows how to win over their Creator with the blasts of the *shofar* so that He rises from His throne of judgment to His throne of mercy and is filled with compassion for them and turns His quality of judgment into the quality of compassion” (Lev. R. 29:4).

The Laws and Customs of Rosh Ha-Shanah

On the first night of Rosh Ha-Shanah it is customary to greet one’s friends with: “May you be inscribed (in the book of life) for a good year.” The Sephardi version of the greeting is: “May you be inscribed for a good year; may you be worthy of abundant years.” At the festive meal, it is customary to dip the piece of bread, over which grace has been recited, into honey as a token of the sweet year it is hoped will come. For the same reason, a piece of apple is dipped in honey and before eating it, the prayer is recited: “May it be Thy will O Lord our God and God of our fathers, to renew unto us a good and sweet year.” Nuts should not be eaten on Rosh Ha-Shanah because they produce phlegm, and make it more difficult to recite the prayers of the day; also because the numerical value of the Hebrew for “nut” (*egoz*) is the same as that of “sin” (*Het*). In some communities, the loaves for the festival meal are baked in the form of ladders to symbolize the fortunes of men in the year ahead: some ascending, others descending life’s ladder. The custom of sending greeting cards before Rosh Ha-Shanah finds no support in the Jewish tradition, though it is now a widespread practice.

The prophet Micah speaks of God casting the sins of Israel into the depths of the sea. “And Thou wilt cast (*ve-tashlikh*) all their sins into the depths of the sea” (Micah 7:19). On the basis of this verse, the **Tashlikh* ceremony arose in which Jews go to a place where there is running water, the sea, a river, or a well (if neither of the former two are within walking distance) to recite this and other scriptural verses as well as penitential hymns and prayers on the first afternoon of Rosh Ha-Shanah (on the second if the first day falls on a Sabbath). There is no reference to the *Tashlikh* rite in the Talmud. A pagan origin for the custom has been suggested (J.Z. Lauterbach, *Rabbinic Essays* (1951), 299–433); a traditional interpretation has it that the fish in the river, whose eyes never close, are a reminder of the ever-watchful eyes of God, open always to look down on His creatures in mercy.

The scriptural readings in the synagogue on Rosh Ha-Shanah are: On the first day, Genesis 21 and the *haftarah*, 1 Samuel 1:1–2:10; on the second day, Genesis 22 and the *haftarah*, Jeremiah 31:2–20. The *maftir* on both days is Numbers 29:1–6.

Although Rosh Ha-Shanah as a festival is not more important than the other festivals, greater solemnity has come to be attached to it since it is also considered a day of judg-

ment. *Hallel is, therefore, not recited. The day is imbued with an aura of awe as expressed in the prayer: "Now, therefore, O Lord our God, impose Thine awe upon all Thy works, and Thy dread upon all that Thou hast created, that all works may revere Thee and all creatures prostrate themselves before Thee, that they may all form a single band to do Thy will with a perfect heart."

[Louis Jacobs]

ROSH HA-SHANAH (Heb. רֹאשׁ הַשָּׁנָה; "New Year"), eighth tractate in the order of *Mo'ed*; in some earlier Mishnah and Talmud editions it is seventh, and in current Talmud editions it is placed fifth. Although Rosh Ha-Shanah is the rabbinic designation for one of the major festivals of the Jewish calendar, that which falls in "the seventh month, on the first day of the month" (Lev. 23:24), the tractate does not deal exclusively with this New Year. It opens with the statement that there are four days of the calendar, each of which is a New Year for its own specific purpose. Thus the first of Nisan is the New Year for kings and for festivals, and the 15th of Shevat (or the first) the New Year for trees. However, the first day of Tishri, the "New Year for years," i.e., the beginning of the calendar year, became known as the New Year par excellence, and the bulk of the tractate's discussion is elaboration of the laws concerning it, its religious significance, and the details of the sounding of the *shofar*. In mishnaic times, though the authorities were familiar with astronomical calculations, the New Moon was fixed on the basis of observation, which meant that, as a rule, the *bet din* formally proclaimed the New Month only after it had heard evidence of witnesses who had actually seen the new moon.

The tractate is divided into four chapters. Chapter 1 speaks of the various New Years and indicates Rosh Ha-Shanah as the day of judgment for all mankind. It then deals with regulations concerning the fixing of the New Moon, and especially with the qualification of the witnesses to it. Chapter 2 continues with the subject of the determination of the New Moon, and concludes with the dramatic account of how Rabban *Gamaliel asserted his patriarchal authority to make R. *Joshua yield to his ruling. Chapter 3 deals mainly with particulars of the *shofar*. The chapter includes a profound homily explaining that it is not the actual sound of the horn but its devotional effect which is important. Chapter 4 first discusses whether the *shofar* is blown on the Sabbath when Rosh Ha-Shanah falls on that day. Ordinances enacted by Johanan b. Zakkai concerning various subjects are recorded. It then deals with the order of benedictions for Rosh Ha-Shanah, which are arranged in the *Musaf* service. The tractate has *Tosefta* and *Gemara* in both the Babylonian and Jerusalem Talmuds. In the Babylonian *Gemara*, there is a discussion as to whether

the world was created in Nisan or in Tishri (10b–12a); the latter view seems to have been accepted in later amoraic times, as reflected in the Rosh Ha-Shanah prayers of those days. Of particular interest is the elaboration on the idea of Rosh Ha-Shanah being the day of judgment for every individual as well as for mankind (16a–18a).

Tractate *Rosh Ha-Shanah* is characterized particularly by two topics. The first is the intercalation of the year and how and when and for what reasons intercalation is effected, and what are the considerations which normally influence the determination of the yearly *calendar. The second is a systematic, philosophical, speculative discussion on everything concerning providence, and reward and punishment in this world and in the next. These topics are much better arranged and edited than others and more systematically than in all other tractates. The talmudic tractate was translated into English by Maurice Simon in the Soncino edition (1938).

ROSH PINNAH (Heb. רֹאשׁ פִּנְנָה), moshavah in northern Israel, on the slope of Mt. Canaan south of the Huleh Valley. Rosh Pinnah was first founded in 1878 by pious Jews from *Safed who wanted to live by their own means instead of by *Halukkah. They named their settlement Gel Oni ("Valley of My Strength," an adaptation of the name of the nearby Arab village Jā'ūna). The settlers, lacking both funds and farm experience, and harassed by their Arab neighbors, gave up after just over two years. In 1882, however, the settlement was renewed by First *Aliyah pioneers from Romania. The symbolic name "Corner Stone" is taken from Psalms 118:22.

Although Baron Edmond de *Rothschild extended aid to the isolated moshavah, it did not make much headway. The farmers tried to grow tobacco, mulberry trees for silkworms, and other specialties in addition to grain crops. After short periods of apparent prosperity these branches had to be abandoned for lack of markets. The British Mandate authorities maintained a police station and customs office near Rosh Pinnah. In the 1936–39 Arab riots, the moshavah suffered from repeated attacks. During the late 1930s the *Betar movement established a collective group in Rosh Pinnah which maintained itself by working on the local farms. In 1938 three of its members who attacked an Arab bus in retaliation for Arab terrorist acts were caught and tried by a British court. One of them, Shelomo *Ben-Yosef, was hanged in Acre Prison and buried in Rosh Pinnah. A memorial stone was erected at the site near the highway where the episode occurred. After 1948, immigrants were absorbed in the village and in a nearby **ma'barah* (immigrant transit camp) so that Rosh Pinnah's population rose to 1,480 by 1953. Some of the newcomers, however, were later transferred to the nearby development town of *Hazor or elsewhere, with the result that the 1961 population dropped to 702 and in 1970 was just 805. In 1949 Rosh Pinnah received municipal council status.

Grain crops and deciduous fruit orchards were its characteristic farm branches. In the mid-1990s, the population was approximately 1,820, increasing to 2,210 in 2002 on an area of 7 sq. mi. (18 sq. km.). Many of Rosh Pinnah's residents earned their livelihoods in the tourist industry, mainly in the area's guest houses. Some still worked in agriculture.

[Efraim Orni / Shaked Gilboa (2nd ed.)]

ROSHEIM, small town in the Bas-Rhin department, E. France. The earliest explicit evidence of the presence of Jews dates from 1215, when the Jews of Rosheim are mentioned as being engaged in *moneylending (the pledges consisting of Church vessels). At the time of the *Armleder massacres of 1338 and of those which occurred in 1345 the town protected its Jewish residents. On the other hand, during the Black *Death persecutions (1349) the community suffered extensively although it did not cease to exist. After 1447 there was a temporary expulsion of the Jews. During the 16th century the community enjoyed exceptional renown through Joseph b. Gershon of *Rosheim, leader and official representative of the Jews far beyond the boundaries of lower Alsace. At the close of the 17th century there were 18 Jewish families, comprising 94 persons, in Rosheim. Under French rule the town endeavored to obtain at least a partial expulsion of the Jews, but its numerous requests were refused by the royal agent. In 1784 there were 52 Jewish families (268 persons) in Rosheim. The number reached 500 (about 14% of the total population) at the close of the 19th century, but it declined sharply in the 20th century. During World War II, 35 of Rosheim's Jews were deported by the Nazis. In 1970 only a handful of Jews were living in the town.

[Bernhard Blumenkranz]

ROSIN, DAVID (1823–1894), German educator and scholar. Rosin was born in Rosenberg, Silesia. After having attended the yeshivot of Kempen, Myslowitz, and Prague (he was ordained by S.J. *Rapoport), he wished to receive a regular school education. He went to Breslau, where he entered the *Gymnasium*, and graduated in 1846. Then he studied at the universities of Berlin and Halle (Dr. phil. 1851) and passed his teacher's examination. Returning to Berlin, he taught in various private schools and was, on Michael Sachs' recommendation, appointed head of the newly founded religious school of the Berlin Jewish community in 1854. He also taught at the teachers seminary. In 1867 he succeeded Manuel *Joel as professor of Midrash, Bible exegesis, and homiletics at the Breslau Jewish Theological Seminary.

Rosin's main scholarly work was on *Samuel b. Meir (*R. Samuel b. Meir als Schriffterklaerer*, 1880), whose Pentateuch commentary he published from a complete manuscript (*Perush ha-Torah Asher Katav Rashbam...*, 1881, repr. 1949), which is the only scholarly edition of this work. He also pub-

lished a volume of Abraham *Ibn Ezra's poetry, vocalized, with a German rhymed translation and with commentary (*Reime und Gedichte des Abraham Ibn Esra...*, 1885–94). Rosin's lectures on Ibn Ezra's philosophy were published by his pupil David *Kaufmann in the *Monatsschrift fuer Geschichte und Wissenschaft des Judentums*, 42–43 (1898–99), to which Rosin occasionally contributed. Among other subjects, Rosin dealt with the *Sefer ha-Hinnukh* ascribed to Aaron ha-Levi of Barcelona (*Ein Compendium der juedischen Gesetzeskunde aus dem vierzehnten Jahrhundert*, 1871), and the ethics of Maimonides (*Die Ethik des Maimonides*, 1876). He edited M. Sachs' sermons (*Predigten. Aus dessen schriftlichem Nachlass*, 2 vols., 1868–69). Rosin's son HEINRICH became professor of medicine at Berlin University; a nephew, also called HEINRICH, was a well-known professor of law at Freiburg-im-Breisgau.

[Archiv Bibliographia Judaica (2nd ed.)]

ROSKIES, DAVID G. (1948–), author, editor, and scholar of Jewish studies. Born in Montreal, Canada, he attended Yiddish secular schools. He was educated at Brandeis University, receiving his bachelor's degree in 1969, his master's degree in 1971, and his doctorate in 1975. He joined the faculty of the Jewish Theological Seminary in 1975, as associate professor; he became the Sol and Evelyn Henkind Chair in Yiddish Literature and Culture and professor of Jewish Literature. An expert in the field of Eastern European Jewry, Roskies wrote and lectured extensively on the subject.

In 1971 Roskies received critical attention for his *Night Words: A Midrash on the Holocaust*, one of the first liturgies on the Holocaust. The work has been translated into Hebrew and has been issued as an audio cassette. In 1975 he coauthored, with Diane Roskies, *The Shtetl Book: An Introduction to East European Jewish Life and Lore*, which became a standard text.

His 1984 work, *Against the Apocalypse: Responses to Catastrophe in Modern Jewish Culture*, won the Ralph Waldo Emerson Prize from Phi Beta Kappa. In this work Roskies traces the evolution of Jewish literature from a passive acceptance of suffering to a stance of advocacy and a refusal to surrender. Awarded a Guggenheim fellowship in 1985, he began a study of the modern Jewish return to folklore and fantasy; he edited *The Dybbuk and Other Writings by S. Ansky* in 1992, and authored *A Bridge of Longing: The Lost Art of Yiddish Storytelling* in 1995. Roskies's 1999 work, *The Jewish Search for a Usable Past*, considers the modern Jewish community's self-image in relationship to the roles and values found in Jewish literature. Examining the promotion of modern goals, such as nationalism and secularism, by Jewish writers, he contends that contemporary Jewish memory has been shaped by literary convention rather than fact.

In 1981 Roskies cofounded, with Alan Mintz, *Prooftexts: A Journal of Jewish Literary History*, published by the University of Indiana Press. From 1998 he served as editor-in-chief of the New Yiddish Library, published by Yale University Press. He also served as a member of the editorial board of the Posen Library of Jewish Culture and Civilization, and he was a member of the Association for Jewish Studies.

[Dorothy Bauhoff (2nd ed.)]

ROSMARYN, HENRYK (1882–1955), lawyer, journalist and political leader in Poland. Rosmaryn, who was born into an assimilated family in eastern Galicia, joined the Zionist organization and while still a law student was elected a member of its central committee. Before World War I, he edited the Zionist weekly in Polish *Wschód*. In 1918 he founded, with G. *Zipper, the Zionist daily in Polish *Chwila, which was published in Lvov, heading the editorial board until 1939.

For many years, he was a member of the Zionist Actions Committee representing the Zionists of eastern Galicia, and president of the Maccabi organization of Poland. From 1922 Rosmaryn was elected three times to the Polish Sejm (parliament) in Warsaw and was an active parliamentarian. Rosmaryn was a member of the presidency of the Jewish Club (*"Kolo Żydowskie"*) in the Sejm, and became known for his struggle against the antisemitic policy of the government during the 1930s. With the outbreak of World War II, he fled to Romania, from where he went to Palestine in 1940. Between 1941 and 1945, he represented the Polish government-in-exile of London in Tel Aviv in the capacity of consul-general.

[Moshe Landau]

ROSOWSKY, SOLOMON (1878–1962), composer and musicologist. Born in Riga, the son of the noted cantor Baruch Leib Rosowsky, he studied at St. Petersburg under Rimsky-Korsakov, Glazunov and Liadov. He was a cofounder of the *Society for Jewish Folk Music in St. Petersburg (1908), where he also served as musical director of the Yiddish Art Theater. In 1920 he founded the first Jewish Conservatory of Music at Riga. Rosowsky immigrated to Erez Israel in 1925, taught music there and did research on biblical cantillation. He attempted, in cooperation with Y.L. *Ne'eman, to present and analyze the "essence" of the East Ashkenazi (Poland-Lithuania) style. This resulted in the voluminous work, *The Cantillation of the Bible (The Five Books of Moses)*, published in New York in 1957. Rosowsky composed songs, chamber and orchestral music, and music for the Hebrew theater. In his quest for a modern Hebrew style based on traditional and Oriental elements, he was a pioneer. His latter years were spent in New York, where he taught at the Cantors' Institute of the Jewish Theological Seminary.

[Mordechai Breuer]

ROSS, BARNEY (Barnet, Dov Ber, David "Beryl" Rasofsky, "The Pride of the Ghetto"; 1909–1967), U.S. boxer, three-time champion as lightweight (1933–35), junior welterweight (1933–35), and welterweight (1934, 1935–38), only Jewish fighter to win two different world championships, member of Boxing Hall of Fame and International Boxing Hall of Fame. Ross was born on the Lower East Side of New York to Sarah and Isadore, religious immigrants from Brest-Litovsk, Russia. The family moved to the Maxwell Street neighborhood of Chicago when Ross was two, where his father, who was also a rabbi, ran Rasofsky's Dairy store. A week before his 14th birthday in December 1924, Ross' father was shot to death during a store robbery. His mother suffered a nervous breakdown and had to be taken care of by relatives; Ross and his older brother, Morrie, moved in with a cousin, and the three younger siblings were placed in an orphanage. In his anger, Ross rejected his Orthodox lifestyle and became obsessed with reuniting his scattered family. He became a petty thief and numbers runner, and worked for Al Capone, who reportedly gave him \$20 and advised him to go straight. He turned to the ring, changing his name to Barney Ross so that his mother would not know he was boxing, and fought as often as five times a week, pawning his winning medals for three dollars apiece. In 1929, Ross won the Western and Inter-City Golden Gloves featherweight titles. His first professional fight was on August 31, 1929, and his big break came on June 23, 1933, when he fought Tony Canzoneri in Chicago for the world lightweight and junior welterweight titles, winning by a split decision and becoming the first fighter in the modern era to win two titles simultaneously. "Winning the titles was almost an anti-climax," Ross said later. "My big thrill came a few weeks before the fight. That was when I was able to take the younger kids out of the orphanage asylum and reunite them with Mom." His most famous fights were three welterweight championship bouts against Jimmy McLarnin in 1934 and 1935 – Ross won the first and third, the latter despite breaking his left thumb in the sixth-round – which captured the nation's attention and drew huge gates. Ross became only the third boxer in history to win world titles in three divisions. His last fight was on May 31, 1938, against Henry Armstrong. Referee Arthur Donovan moved to stop the bout in the late rounds and award Armstrong the victory, but Ross pleaded to allow the fight to continue, saying, "I've got to go out like a champion. Let me finish." He lost the title in a 15-round decision and retired after the fight, having never been knocked out in over 300 professional and amateur fights. His record in 81 bouts was 74 wins including two newspaper wins (22 KOs), four losses, and three draws.

In World War II, Ross fought at Guadalcanal, and while on patrol on November 20, 1942, he and three comrades ran into an advance party of Japanese. With the others wounded,

Ross defended them through the night while reciting Hebrew prayers from memory. He was awarded a Silver Star and a Presidential Citation. At the military hospital where he was treated for shrapnel in his legs and sides, Ross became addicted to morphine. His habit cost him \$500 a week until Ross sought admission to a federal drug treatment facility, where he kicked the habit.

Ross, who was tremendously popular among American Jews, became active in the Emergency Committee to Save the Jewish People of Europe, also known as the Bergson Group. He also was active in another Bergson committee, the American League for a Free Palestine, which sought to rally American support for the creation of a Jewish state. His autobiography, *No Man Stands Alone: The True Story of Barney Ross* (1957) was made into a Hollywood movie, *Monkey on My Back* (1957). He is also the subject of a biography, *Barney Ross*, by Douglas Century (2006). Ross was elected to the Boxing Hall of Fame in 1956 and to the International Boxing Hall of Fame in 1990.

[Elli Wohlgeleerter (2nd ed.)]

ROSS, DENNIS (1948–), U.S. diplomat. Ross was born to a Jewish mother and a Catholic father and grew up in Marin County in Northern California. Trained as a political scientist at the University of California, Los Angeles, Ross worked on two presidential campaigns (Robert Kennedy and George McGovern) before settling into a career as a foreign policy professional. His first government assignments were working on U.S.-Soviet relations, arms control, and the Middle East during the presidencies of Jimmy Carter and Ronald Reagan. Ross eschewed dogma and confrontational positions in favor of engagement and problem-solving through intensive, interest-based negotiations. His close relationship with Vice President George H.W. Bush at the end of the Reagan presidency led to his promotion to the senior ranks of American diplomacy following Bush's victory in 1988.

As director of Policy Planning under Secretary of State James Baker, Ross had substantial influence in shaping American policy toward the Soviet Union as the Cold War ended. Ross advocated U.S.-Soviet cooperation in promoting Arab-Israeli peace and was instrumental in organizing the 1991 Madrid peace conference – which led to the first sustained, multilateral peace negotiations between Israel and its Arab neighbors.

Ross' behind-the-scenes approach, together with his widely regarded diplomatic skills, allowed him to make the transition to the Clinton Administration where he was named Special Middle East Coordinator. Following the signing of the 1993 Israeli-Palestinian "Declaration of Principles" (the Oslo agreement), which was reached without American mediation, Ross' stature grew as American involvement in Arab-Israeli peacemaking intensified during the ensuing seven years. Ross did not favor American arbitration, intrusive monitoring, or explicit conditionality between foreign aid and the negotiations, though he advocated a stronger American position at the end of the Oslo process.

When Israeli-Palestinian negotiations reached an impasse, or when violence threatened to derail the process, Ross' involvement often reached a fever pitch. He led marathon negotiations that led to the signing of the Interim Agreement (1995), the Hebron Accord (1997), and the Wye River Agreement (1998). Ross worked closely with President Clinton, who became much more personally involved in the negotiations at the end of his presidency.

Ross believed strongly in the strategic importance of an Israeli-Syrian peace agreement and devoted significant attention to these negotiations, though the talks ultimately collapsed in early 2000. In the last months of the Clinton administration, Ross led an intensive effort to reach an Israeli-Palestinian "final status" agreement. But this final push for peace, which included the abortive Camp David summit in mid-2000, ended in failure as large-scale, sustained Israeli-Palestinian violence displaced the negotiations.

In his best-selling memoir, *Missing Peace* (2004), Ross blamed Palestinian leader Yasser Arafat for the collapse of the Oslo process. After leaving government service, Ross took a senior position at the Washington Institute for Near East Policy. Ross also became chairman of the Jerusalem-based Jewish People Policy Planning Institute.

Although American Jews had previously served at the highest ranks of the foreign policy and national security establishment, they had generally not been granted overriding authority to manage U.S. diplomacy toward Israel and its neighbors. He was the first to attain such a dominant position and remained at the helm of America's peace process diplomacy under both Republican and Democratic administrations.

[Scott Lasensky (2nd ed.)]

ROSS, HERBERT (1925–2001), U.S. dancer, choreographer, and film director. Ross began his career as a dancer and choreographer but after 1969 he became known principally as a film director. He directed such films as *Play It Again, Sam* and *The Owl and Pussycat*, and the dance-oriented films *The Turning Point* (1977), collaborating in its making with his wife, the ballerina Nora Kaye; *Nijinsky* (1980); *Footloose* (1984); *Pennies from Heaven* (1982); and *Dancers* (1987). Ross also became an active dance director in theater and television. With his wife, he founded a short-lived company, the Ballet of Two Worlds, for which he created a full-length dramatic ballet, the *Dybbuk*. Ross created the choreography for various Broadway productions and in Hollywood he directed the musical version of *Good-bye Mr. Chips*.

[Amnon Shiloah (2nd ed.)]

ROSS, LILLIAN (1928?–), U.S. writer. Born in Syracuse, N.Y., Ross moved to New York City in her youth and worked briefly for the newspaper *PM* before joining the staff of *The New Yorker* in 1945. Notoriously reticent about her age, she is listed in one literary reference work as having been born in 1928, which would have made her 17 when she went to work for the magazine. There she became one of the better-known practitioners of a style of fly-on-the-wall reporting in which the writer never directly imputes motivation. Nevertheless, her portraits of people like Ernest Hemingway and Adlai Stevenson, among others, were considered to be succinct and revealing. In 1950, her first portrait of Hemingway was published in *The New Yorker*. It was an account of two days Hemingway spent in New York in 1949 on his way from Havana to Europe. Ross captures Hemingway shopping for an elephant gun at Abercrombie & Fitch, aiming an imaginary weapon at the sky while walking along Madison Avenue. To celebrate the centenary of Hemingway's birth, in 1999, Ross wrote a second portrait, detailing the friendship the two struck up after the completion of the first article. Together, the two works provide the definitive sketch of one of America's greatest writers. Ross stayed with the magazine until 1987 and returned in 1993. She was the author of 12 books, including her memoir *Here but Not Here: A Love Story*, about her 40-year relationship as the mistress of William Shawn, the longtime editor of *The New Yorker*.

[Stewart Kampel (2nd ed.)]

ROSS, STEPHEN (1942–), U.S. developer. A native of Detroit, Ross earned a bachelor's degree in accounting from the University of Michigan Business School and a law degree from Wayne State before obtaining a master's in tax law at New York University. He worked for two years as a tax lawyer at the Detroit office of Coopers & Lybrand, then a major accounting concern. He was influenced by the success of his uncle Max *Fisher, who built a business empire in oil and gas, and became one of the nation's leading philanthropists. Ross yearned to work in New York, and he picked up experience at two investment firms, as an assistant vice president in the real estate subsidiary of Laird, Inc. and in the corporate finance department of Bear, Stearns & Co. In 1971 he began to organize deals by which wealthy investors incurred risk-free tax losses in affordable housing to shelter other income. He combined the idea of tax losses for wealthy investors with the procurement of subsidies for affordable properties. In 1972 he founded Related Housing Companies with the goal of building or rehabilitating housing to blend into the community. Throughout the 1970s and 1980s, Ross and his team built on the success to expand into a wider range of developments, starting with Riverwalk, a large, planned mixed-use development along the East River in Manhattan, which was never built. Related built its first office complex, with 880,000 square feet, in Westchester. From these beginnings came diversification into retail, industrial, office and mixed use, and a name change to the Related Companies, which included

New York Development, Related Urban Development, Related Lodging Group, Related Retail, Related Apartment Preservation, Related Management Company and Related Urban Management Company. There were offices in Miami, Chicago, and California in addition to New York, and the Related Group of Florida became the largest and most successful developer in the state. In New York, the Related Companies was the developer of the \$1.7-billion, 2.8-million-square-foot Time Warner Center on Columbus Circle in Manhattan, which opened in 2004. The company's portfolio, valued in excess of \$8 billion, made it one of the leading real-estate developers in the country. In 2004, Ross gave \$100 million to the University of Michigan; it was the largest donation to any U.S. business school, and the university trustees promptly renamed the school the Stephen M. Ross School of Business. Ross was also involved in a number of philanthropies. He was active in planning for a major renovation of the Guggenheim Museum, designed by Frank Lloyd Wright, in New York. He was a trustee of the Juvenile Diabetes Research Foundation. Ross and his partners in the Time Warner Center contributed \$60 million to build the core and shell of the 100,000-square-foot new home for Jazz at Lincoln Center. Ross was a long-time supporter of the United Jewish Appeal-Federation of New York and was honored by the Jewish Association of Services for the Aged, among other groups.

[Stewart Kampel (2nd ed.)]

ROSSELLI, Italian family distinguished for its patriotic activities in the 19th and 20th centuries. Settling in London in partnership with the *Nathan family, parents of Ernesto *Nathan, later mayor of Rome, they kept open house for Italian conspirators and patriots, especially Giuseppe Mazzini, who thanked God for the friendship of the family. Giannetta Nathan married Pellegrino Rosselli, and with him continued to follow the family tradition; it was in their house in Pisa (now a national monument) that Mazzini died, a fugitive, in 1872. Their descendants included CARLO ROSSELLI (1899–1937), socialist writer and economist, author of *Socialismo liberale* (1930, 1945) and of *Scritti politici ed autobiografici* (1944). Rosselli was one of the foremost opponents of Fascism, and founded for this purpose the movement Giustizia e Libertà with its own publication. He led an eventful life, including a daring escape by speedboat from Fascist confinement at Lipari in 1934 and various commands during the Civil War in Spain, where he served with the International Brigade and was wounded in 1936. His brother NELLO (1900–1937) wrote *Mazzini e Bakunin* (1927), *Carlo Pisacane nel Risorgimento Italiano* (1932), and other works. He shared his brother's views and fought with him in the underground against Fascism. At a Jewish youth movement convention in Leghorn in 1924, he propounded the thesis that Judaism is above all the religion of liberty. The two brothers were murdered in Bagnoles de l'Orne, France, by hired assassins of the Fascist government (June 1937).

[Giorgio Romano]

ROSSEN, ROBERT (1908–1966), U.S. film writer, producer, director. Born in New York, Rossen was a prizefighter in his early years and worked on the stage before becoming a screenwriter in 1939. He wrote, produced, and directed: *All the King's Men* (Oscar winner for Best Picture and nominated for Best Director and Best Screenplay, 1949), *Alexander the Great* (1956), *The Hustler* (Oscar nominations for Best Picture, Best Director, and Best Screenplay, 1961), and *Lilith* (1964). He wrote and directed *Johnny O'Clock* (1947), *Mambo* (1954), and *They Came to Cordura* (1959). He produced and directed *The Brave Bulls* (1951) and directed *Body and Soul* (1947) and *Island in the Sun* (1957).

Other films for which he wrote and/or co-wrote the screenplay include: *Marked Woman* (1937), *They Won't Forget* (1937), *A Child Is Born* (1939), *The Roaring Twenties* (1939), *The Sea Wolf* (1941), *Out of the Fog* (1941), *Blues in the Night* (1941), *Edge of Darkness* (1943), *A Walk in the Sun* (1945), *The Strange Love of Martha Ivers* (1945), and *Desert Fury* (1947).

[Ruth Beloff (2nd ed.)]

ROSSENA, DANIEL BEN SAMUEL OF (15th–16th century), Hebrew poet in N. Italy. His principal work (1506) is a Hebrew adaptation in rhymed prose of the Italian romance "*Bernabo e Luciana*," still unpublished (Mss. Bodl. and Turin). Some of his shorter compositions have been published, including his contribution to an interchange of poems in praise and blame of women by contemporary Italian Jewish poets. His first marriage proving barren, he received special authorization to take a second wife.

[Cecil Roth]

ROSSI, AZARIAH (Bonaiuto) BEN MOSES DEI (c. 1511–c. 1578), the greatest scholar of Hebrew letters during the Italian Renaissance. He was born in Mantua to the Min ha-Adumim family, one of the most eminent families in the history of Italian Jewry. According to a legend quoted by Rossi himself, the family was one of the few that the emperor Titus brought to Rome from Jerusalem after the destruction of the Second Temple. From the 13th century, the family produced a line of scholars, polemicists, rabbis, and artists, many of whom became famous in Jewish and Italian culture, especially during the Renaissance. At that time, the family was centered in the court of the Gonzaga princes in the city of Mantua, where the composers Anselmo de' Rossi and his relative Salamone de' Rossi produced their work. Rossi received both his general and Jewish education in Mantua, but spent most of his life outside his native city. He studied medicine and apparently earned a meager living as a doctor throughout his life. He wandered to several cities in Italy, especially in the Papal

States, and lived for some time in Ferrara, Ancona, Bologna, and Sabbioneta. When the pope expelled the Jews from his domains in 1569, Rossi settled again in Ferrara, where he wrote his major work. Toward the end of his life, he returned to Mantua, where he died after supervising the printing of his *Me'or Einayim* ("Enlightenment to the Eyes," 1573–75). Rossi did not publish anything until he was 60 years old. It seems that he did not even intend to publish, though a reading of his major work reveals that there is no doubt that he spent most of his time studying classical and medieval Latin and Italian literature as well as Jewish history and literature. An unusual event caused him to write an important book. In 1571, when he was living in Ferrara, the city was struck by a disastrous earthquake which lasted intermittently for about ten days. Rossi, along with the majority of the survivors, fled to the fields outside the city. The event seemed to him to be a direct intervention of God in the life of the city and in his own life, and in the first chapter of *Me'or Einayim* entitled "*Kol Elohim*" ("The Voice of God"), he describes the phenomenon in great detail, giving a vivid description of each phase of the earthquake and its effect upon the citizens, Jews and non-Jews. He added a learned discourse on the reasons for, and the significance of, earthquakes according to classical and medieval non-Jewish scholars, comparing the natural causes given by the non-Jewish writers with the statements concerning the divine origin of this phenomenon found in the Bible, the Talmud, and the writings of medieval Jewish scholars. While outside the city during the earthquake, Rossi met a Christian scholar who was then studying the Greek pseudepigraphical work, Letter of *Aristeas (see Apocrypha and *Pseudepigrapha). The scholar asked Rossi for the true meaning of some part of the work, assuming that he was familiar with the Hebrew original of the text. When Rossi told him that there was no Hebrew original, and that the work was unknown to the Jews, the Christian scholar was very much surprised. Since the Letter of Aristeas is important to the study of the text and development of the Old Testament (the book describes the translation of the Old Testament from Hebrew into Greek), Rossi decided to translate the work. He entitled his translation *Hadrat Zekenim* ("The Glory of the Elders"), which became the second part of *Me'or Einayim*. The two chapters comprising *Hadrat Zekenim* are quite short, the largest and most important part of *Me'or Einayim* being the third part, *Imrei Binah* ("Words of Wisdom"), which is divided into 60 chapters. This latter part is a revolutionary study of the development of the Bible and of Jewish history, chronology, poetry and culture.

The sources which Rossi used reveal unusual knowledge and erudition, unequaled by any previous Hebrew literary scholar and by few subsequent scholars. Knowing very little Greek, he used Latin and Italian translations of the writings of the Greek philosophers and writers. He was fluent both in classical and medieval Latin, and was a master of medieval and Renaissance Italian literature. More than a hundred non-Jewish scholars are quoted in his work (see the list in D. Casel's edition of *Me'or Einayim*, 1866), not only the oft-quoted

Greek philosophers, Plato, Aristotle, and Pythagoras, but also Homer, Aesop and Euclid. Classical literature is represented by Virgil, Terence, Tibullus, Seneca, Cicero, Themistius, and others. Because of the nature of his study, he had special interest in classical historians, relying upon such writers as Herodotus, Xenophon, Livy, Suetonius, Plutarch, Caesar, Dionysius of Halicarnassus, Diodorus Siculus and Dio Cassius. In the fields of geography and natural history, he cites the works of Pliny and Strabo, and in medicine and law he also refers extensively to classical writers. Rossi paid special attention to the writings of Jewish scholars in the Hellenistic period, especially *Philo (whose name he translated as Jedidiah ha-Alexandroni). In fact, he was responsible for reviving the interest of Jewish writers in Philo after the philosopher had fallen into oblivion for 1,500 years. Intensively studying the works of the philosopher, he proved, among other things, that Philo did not use the Hebrew text of the Bible but the Greek Septuagint translation. He conducted a special search in Italian libraries for remnants of the works of Jewish writers contemporary with Philo who wrote in Greek. The most unexpected of Rossi's sources are the writings of prominent Church Fathers, among them Eusebius, Jerome, Augustine, Justin Martyr and Clement of Alexandria. Employing the works of such writers to solve problems in Jewish history and chronology was inconceivable to other contemporary Jewish scholars. Medieval Latin and Italian literature constitute a significant part of his sources. The works of Thomas Aquinas, Isidore of Seville and Hugo of St. Victor are frequently quoted, and Dante and Petrarch greatly impressed him. He was especially influenced by Pico della Mirandola, among Renaissance writers, not only by the content of his works but also by his methods of scholarly study. Thus Rossi was well equipped to fulfill the prodigious task that he set himself when he began to write *Imrei Binah*.

In *Imrei Binah*, he studied the ancient history of the Jews by comparing the Hebrew sources, especially the Talmud, with the classical sources, Jewish and non-Jewish. His methods, essentially those of the critical history which began to be written in the Renaissance, were not applied to all the Jewish texts. Rossi refrained from using the critical method in the study of the Bible, but he applied it to talmudic legends, which many previous scholars had not accepted as absolute religious truth. The novelty of his approach was that although he was a Jewish scholar, Rossi usually accepted the facts given in the non-Hebrew sources rather than those given in the Talmud. (Occasionally where he failed to use critical methods with Greek and Latin sources, he made errors.) In the study of ancient Jewish history, Rossi discovered a more accurate length of the Persian period, i.e., the period between Ezra and Nehemiah and the conquest by Alexander the Great. Talmudic chronology and its medieval followers considered this period to be very short; Rossi attempted to determine its actual span and its importance in Jewish history. He proved that the *Josippon, regarded by medieval Hebrew scholars and historians as an authoritative source on Jewish history, is a medieval compilation, which, although making use of writings of Jo-

sephus, falsified many historical facts and is therefore unreliable. This disclosure came as a shock to traditional scholars, who for many generations accepted the *Josippon* as the main authority on the history of the Jews during the Second Temple period. Another important aspect of *Imrei Binah* is its discussion of the revival of Jewish-Hellenistic literature written in Greek during the period of the Second Temple and after its destruction. Rossi was the first Jewish scholar to make use of these writings in the study of Jewish history, literature, religion and culture (though Christian scholars used them during the Middle Ages because they were included in Greek and Latin translations of the Bible).

Probably the most important part of *Imrei Binah* is that devoted to the study of Jewish chronology. In a very detailed study, Rossi proved that counting the years from the creation and basing a calendar on this count is a relatively recent Jewish usage; none of the ancient sages in the talmudic or geonic period, and certainly not in the Bible, used a calendar reckoned from the creation. Even in the early Middle Ages more ancient calendars were used, especially one based on the conquest of Palestine by Alexander. Thus he exposed the fact that the calendar accepted in his day was not of ancient origin. In addition, he tried to prove that the Bible and the other ancient sources are insufficient for reconstructing the chronology from the creation to the present time. He thereby indicated that the calendar was not only untraditional, but that it also made a false claim. These findings seemed heretical to his traditional contemporaries, and even his friends among the Italian Renaissance scholars could not accept such a radical point of view. In the same critical manner, Rossi dealt with countless other subjects – archaeology, Jewish coins, the development of the Hebrew language and the use of Aramaic by ancient Jews, Hebrew poetics and poetry, etc. Although modern scholarship does not accept many of his conclusions, some are scientifically sound, and, in any case, there is no doubt that Rossi's scholarship was more than 200 years ahead of its time.

The advanced critical spirit and method of *Me'or Einayim* made the work a subject of controversy for a long time. While it was being printed in Mantua, rabbis who heard about its contents raised objections, some of which Rossi answered in the work itself. When the work was published, the traditional rabbis in Italy were shocked, especially by Rossi's attitude toward talmudic and midrashic legends and his denial of the validity of the chronology claiming to date from the creation. Even his friend and associate, Moses b. Abraham *Provençal, fiercely criticized Rossi's attitude toward the calendar, as did Isaac Finzi of Pesaro. In 1574, even before the printing of *Me'or Einayim* was completed, the rabbis of Venice, headed by Samuel Judah *Katzenellenbogen, published a proclamation of *herem* against possessing, reading, or using the book, unless one received special permission from the rabbis of his city. Rossi was not personally attacked, the impeccable conduct of his private life easily meeting Orthodox standards of behavior. The *herem* was followed by similar declarations in such cities as Rome, Ferrara, Padua, Verona and Ancona, in

which rabbis warned their congregations against reading the work. The controversy spread to other Jewish communities; in Safed a proclamation of *herem* was prepared for the signature of Joseph b. Ephraim *Caro, the great halakhist, but Caro died before signing it, and the *herem* was published by the other rabbis of Safed. Judah Loew b. *Bezalel of Prague, who defended the absolute truth of the talmudic legends and traditions, dedicated a major part of his work on the oral tradition, *Be'er ha-Golah* (Prague, 1598), to direct attacks against Rossi and his teachings. Even in Mantua, where the author was well known and where the book was printed, persons under 25 were forbidden to read it. Before his death, probably in 1578, Rossi wrote a reply to his critics, *Mazref la-Kesef* (1845; "The Purification of Silver"), which deals especially with the problem of the calendar and chronology. Later, *Mazref la-Kesef* was printed together with *Me'or Einayim*. The ban on *Me'or Einayim* persisted for more than a hundred years, during which time few scholars dared to use or even mention the work. Renewed interest in the book was aroused only with the beginning of the Haskalah period late in the 18th century, when *maskilim* found in Rossi's work ideas similar to their own. The first modern printing of the work (after the Mantua edition) was published by the *maskilim* of Berlin in 1794.

[Joseph Dan]

ROSSI, MADAMA EUROPA DE', highly accomplished professional singer in the court of the Gonzaga family in late 16th and early 17th century Mantua. The sister of the composer and musician Salamone De' *Rossi, she was the daughter of Bonaiuto De' Rossi and the wife of the prominent Jewish community leader David ben Elisha, whose last name was also De' Rossi. Madama Europa had two sons, Bonaiuto (Azaria), who became a prominent Jewish leader and educator, and Angelo (Mordechai), who became a court lutanist in Turin and a banker. Madama Europa's grandsons also served as skilled court musicians and bankers in Turin.

Madama Europa's musical activities in Mantua are known through court salary records and letters from audience attendees. In one document of 1592–93 she is listed as "Europa di Rossi," along with a group of other musicians, including Claudio Monteverdi. The Christian community richly rewarded talented women singers who displayed high levels of skill. Female singing groups were also in fashion, and Europa apparently sang in some of those ensembles. In Renaissance Italy, singers were frequently instrumentalists, and Europa may have played a lute or *chitarrone*. Madama Europa may have derived her stage name from singing "The Rape of Europa," an intermedio written by Giovanni Gastoldi to the lyrics of Gabriello

Chiabrera. One such performance took place in 1608 as part of the festivities for the nuptials of Francesco Gonzaga, the crown prince, to the *infanta* Margherita of Savoy. Federico Follino, who may have arranged these events, wrote that Madama Europa "reached the middle of the stage, then in her capacity as a woman most understanding of music, she sang to the listeners' great delight and their greater wonder, in most delicate and sweet voice, the madrigal.... While she sang, with the sweetest harmony, these tearful notes, the listeners were awakened, through pity, to shed tears."

[Judith Pinnolis (2nd ed.)]

ROSSI, SALAMONE DE' (Heb. **Shelomo Min-ha-Adummim**; fl. first third of 17th century), composer from Mantua. Salamone de' Rossi became the leading Jewish composer of the late Italian Renaissance, and a court musician of the Gonzaga rulers of Mantua. Very little is known about his life. He was apparently the son of a certain Bonaiuto (Azariah) de' Rossi; but this Azariah cannot be identical with the well-known philosopher of the same name who expressed regret that he had no sons to survive him. Rossi's published works ranging between the years 1589–1628 are the only direct documentation on his life and work. It has been assumed that he was born about 1570. He entered the service of Duke Vincenzo I in 1587 as a singer and viola player, and soon became the leader of the duke's musical establishment and of an instrumental ensemble composed most probably of Jewish musicians. This group achieved a high reputation and was occasionally loaned to neighboring courts, as in 1612 when Alessandro, duke of Mirandola, invited "the Jew Salamon and his company" to his court. Rossi's name as a violist appears on the ducal payrolls until the year 1622. The death of the last Gonzaga duke and the sack of Mantua by the Austrian (Hapsburg) army (1628–30) put an end to the golden age of Mantuan court music. In that year, many Jews fled to the Venetian ghetto where the Mantuan music circle found a certain measure of continuation in the Jewish musical Accademia degli Impediti under the leadership of Rossi's sponsor, the famed Leone *Modena, although it cannot be ascertained whether Rossi himself was still alive and active in the Accademia. With Salamone de' Rossi, a peak was reached in Jewish contributions to western art music (see *Music). He was perhaps the last, but certainly the most important, of a long and distinguished list of Jewish court musicians (instrumentalists, singers, dancers, players) who were active in Mantua throughout the 16th century, and included Abramo dall' *Arpa (c. 1542–c. 1577), a harpist, and the son of a distinguished harpist; Abramino, his nephew; Isacchino Massarano, flutist, dancer, and dancing master (1583–99); Davit da Civita, madrigalist (published work, 1616); and Allegro Porto, composer (works published 1619, 1625).

At the Mantuan court, Rossi developed his abilities through a constant exchange of views and techniques in composition with the well-known musicians of the court, who included M.A. Ingenieri (his teacher and that of his colleague C. Monteverdi), G.G. Gastoldi, J. de Wert and L. Viadana.

Like the other Mantuan court musicians, Rossi started as a madrigalist but soon tried his creative talents at the new style of ornamental monody, i.e., songs or instrumental pieces with one leading solo voice supported by a fundamental bass. He is considered the pioneer of these new baroque forms which include the trio sonata and suite. As a Jewish musician, his lasting contribution is his *Ha-Shirim Asher li-Shelomo* (published by Pietro and Lorenzo Bragadini, Venice, 1622/23), 33 settings for three to eight voices of Hebrew texts, comprising psalms, hymns, and other religious poems for festive synagogue services. The settings are composed in the then prevailing a cappella style of Palestrina and G. Gabrieli, with intent to regenerate traditional musical liturgy with polyphonic choral settings.

Other musicians of the Rossi family included his sister, known as "Madama *Europa," and her sons Anselmo, Angelo and Bonaiuto. Angelo and his sons Giuseppe and Bonaiuto were musicians at the court of Savoy in Turin between 1608 and 1649.

Rossi's other published works are: *Canzonette a tre voci* (vol. 1, 1589; vol. 2, 1592 (lost); reprint, Venice, 1596?); *Madrigali a cinque voci*, vol. 1 (1596?; Antwerp, 1598?; Venice, 1600; reprints, Venice, 1603, 1607; Antwerp, 1610?; Venice, 1612?; Antwerp, 1618); vol. 2 (Venice, 1599?; Venice, 1602; reprints, Venice, 1605, 1610); vol. 3 (Venice, 1603; reprints, Venice, 1609, 1620); vol. 4 (Venice, 1610; reprint, Venice, 1613); vol. 5 (Venice, 1622); *Madrigali a quattro voci* (vol. 1, Venice, 1610), *Madrigalleti a due voci* (Venice, 1628); "Balletto," in: *Musiche... composte per la Maddalena...*, (Venice, 1617). Instrumental music: *Sinfonie, gagliarde*, etc. (vol. Venice, 1622; reprint: Venice, 1636?; 1642). Modern editions 1, Venice, 1607; vol. 2, Venice, 1608; vol. 3, Venice, 1613; vol. 4, of Rossi's works include: S. *Naumbourg and V. d'Indy (eds.), *Cantiques de Salomon Rossi* (1877; 33 of the 35 pieces in *Ha-Shirim Asher li-Shelomo*, and a selection of madrigals); F. Rikko (ed.), *Ha-Shirim Asher li-Shelomo* (1967; 2 vols. of transcriptions; the 3rd, with facsimiles and translations of the prefatory matter, not yet published, 1971); F. Rikko and Joel Newman (eds.), *Salomon Rossi – Sinfonie, Gagliarde, Canzone 1607–1608*; E. Werner (ed.), *Salomone de' Rossi, Three Hebrew Compositions* (1956); others, including arrangements with organ accompaniment, see Sendrey, Music, index.

[Edith Gerson-Kiwi]

ROSSIN, SAMUEL (1890–1941), Soviet Yiddish writer. Born in Shumyachi, Smolensk, Rossin began his career with *Bobe*

Mayses ("Fairy Tales," 1919), versified fairy tales for children, which were specifically Jewish in atmosphere and imagery. There followed poetry, stories, and a drama. His love poems, *Farlibterhayt* ("In Love," 1938), expressions of individual longing and fulfillment, eschewed social protest. Upbraided for composing melancholy, individualistic works in a collectivist, progressive society, he replied that a poet could not compel his heart to march in step like a soldier. In his last lyrics, *Lider Vegn Tatn* ("Poems about Father," 1939), his father, who died when the poet was thirteen, becomes the symbol of all Jewish fathers: restless, joyless, careworn, wandering with a pack on his back, barely eking out a living. Although past fifty when the Germans invaded Russia, he enlisted in the Soviet army and was among the early war casualties.

ROSTEN, LEO CALVIN (1908–1997), U.S. humorist. Born in Lodz, Poland, Rosten was taken to the U.S. as a child. He received a Ph.D. from the University of Chicago in 1937. He had a distinguished career in the U.S. government as a consultant to the secretary of war and as a social scientist but was best known as a writer. Under the pen name of Leonard Q. Ross, he was the creator of one of the most famous characters in modern American fiction, Hyman Kaplan, a pupil at a night school for immigrants. Kaplan's existence outside this setting is never described and he is nowhere identified specifically as a Jew, but the matter is never in doubt. In his struggles with the English language Kaplan expresses the Jewish immigrant's effort to integrate himself into American society and culture, his aspirations, and his sense of freedom and wonder in a new environment. Such matters are treated hilariously in both *The Education of H*Y*M*A*N K*A*P*L*A*N* (1937) and its sequel, *The Return of H*Y*M*A*N K*A*P*L*A*N* (1959), where Rosten deals with the interesting pupil-teacher relationship. Under his own name, Rosten wrote studies of journalism and Hollywood and a novel about an army psychiatrist, *Captain Newman, M.D.* (1962). In 1968 he published *The Joys of Yiddish*, an amusing and informative survey of the Yiddish language and its influence on everyday speech. In 1976, *O K*A*P*L*A*N! My K*A*P*L*A*N!* was published.

ROSTOV, capital city of the Rostov district, Russian Federation. The town was founded in the middle of the 18th century, and Jews started to settle there in the early 19th century; their population reached 5,000 in 1880, in a total population of 100,000. Rostov's development dates from the close of the 19th century, when Jews actively participated in the development of its commerce. In 1887 the town was transferred (together with the town of *Taganrog) to the region of the Don Cossacks

and was thus excluded from the *Pale of Settlement. After the plans to expel the Jews (with the exception of merchants and owners of real estate) were nullified, only Jews who had lived there before 1887 were authorized to reside in the city. In 1897 there were 11,838 Jews (about 10 percent of the total population) in Rostov. Jews, particularly the Poliakov brothers, were an important factor in developing Rostov as a transport center. Some Jews were grain wholesalers, others operated banks, and about 80 percent of the city's doctors were Jews. Between 1899 and 1910, Moses Eleazar *Eisenstadt held the position of government-appointed rabbi (**kazyonny ravvin*) in Rostov. He was very active in the strengthening of Judaism and the propagation of Zionism within the community, after Russian assimilation had influenced its members.

In October 1905, pogroms accompanied by looting and the murder of about 150 Jews broke out in the town, lasting three days. During World War I, many refugees from the battle areas arrived in Rostov. These included the *zaddik* of Lubavich, R. Shalom Dov Schneersohn (see *Schneersohn family), the leader of Chabad Hasidism, who died in Rostov in 1920. Under the Soviet regime the Jewish public life of the town was suppressed, the Chabad followers were brought to trial, and many members of the He-Halutz movement were arrested and tried. There existed a Yiddish elementary school and club, but they were closed in the mid-1930s. In 1926 there were 26,323 Jews (8.5 percent of the population) living there, and their numbers grew to 27,039 in 1939 (5.4 percent of the total population). The town was occupied twice by the Germans: November 21–29, 1941, and from July 24, 1942. On August 11, 1942 about 13,000 Jews were murdered by the Germans near the village of Zmiyevka three miles from town. All Jews discovered later were executed at the Jewish cemetery; altogether about 15,000–18,000 were killed in Rostov and its environs.

According to the 1959 census, about 21,500 Jews were again living in the Rostov oblast (district), 1,395 of them having declared Yiddish as their mother tongue; but the actual number of Jews was probably closer to 30,000. From 1959, *matzah* baking in the synagogue was stopped for reasons of "sanitation"; *matzah* is brought yearly from Tbilisi. In 1970 there was no synagogue, rabbi, or cantor in Rostov.

Though many Jews left during the 1990s, Jewish life already revived in the late 1980s and an active community center was inaugurated, as well as a Jewish day school, yeshivah, kindergarten, and Sunday school. Chief Rabbi Chaim Fridman conducts varied religious activities at the synagogue. In the early 21st century the Jewish population of the city was around 10,000.

[Yehuda Slutsky / Shmuel Spector (2nd ed.)]

ROSTOW, EUGENE VICTOR DEBS (1913–2002), U.S. lawyer, economist, and government official; brother of Walt Whitman *Rostow. Born in New York City, Rostow graduated from Yale University in 1933. He began teaching law in

1938 at Yale, where in 1944 he was appointed professor of law. During World War II, he worked for the Lend Lease administration. After the war he helped develop the Marshall Plan, which offered U.S. financial aid to foster economic recovery in Europe. In 1964 Rostow became professor of law and public affairs and was dean of the Yale Law School from 1955 to 1965. During his teaching career (1944–84), Rostow served as adviser to the State Department (1942–1944) and was assistant executive secretary of the Economic Commission for Europe (1949–1950). He was also a member of the U.S. attorney general's national committee for the study of anti-trust laws (1954–55); a member of the advisory council of the Peace Corps; and consultant to the undersecretary of state from 1961 to 1966 and undersecretary of state from 1966 to 1969. He was one of President *Johnson's close advisers on U.S. policy toward the Arab-Israeli crisis, and was known in Washington for his firm support of the Israeli position during and after the Six-Day War. He was a leading supporter of U.S. military intervention in Vietnam. With the change in administration in 1969, Rostow returned to teach law at Yale. He returned to public office when he was appointed head of the Arms Control and Disarmament Agency (1981–83) by President Ronald Reagan. Rostow was the highest-ranking Democrat to serve in the administration.

Rostow's writings include: *A National Policy for the Oil Industry* (1948), *The Sovereign Prerogative* (1962), *Perspectives on the Court* (with M. Friedman and W.M. Beaney, 1967), *Law, Power, and the Pursuit of Peace* (1968), *Peace in the Balance* (1972), *Middle East: Critical Choices for the U.S.A.* (1977), *Toward Managed Peace* (1993), and *The Ideal in Law* (1995).

ROSTOW, WALT WHITMAN (1916–2003), U.S. economist; brother of Eugene *Rostow. Born in New York City, Rostow received a Ph.D. in economics from Yale University in 1940. That year, he taught economics at Columbia University. During World War II (1942–45), he served as a major in the Office of Strategic Services (OSS). After serving as assistant chief of the State Department's German-Austrian economic section (1945–46), he went to Oxford, England, as professor of American history (1946–47). In the latter year, he became assistant to the executive secretary of the Economic Commission for Europe, a post he held until 1950 when he was appointed professor of American history at Cambridge University. Later that year, Rostow returned to the United States to teach economic history at the Massachusetts Institute of Technology in Boston. In 1961 he moved to Washington to serve as deputy special assistant to President John F. *Kennedy, and in the same year became counselor of the policy-planning council of the State Department. In 1966 President Lyndon *Johnson named him his Special Assistant for National Security Affairs, and he became known as an advocate of United States military intervention in Vietnam. In the Middle East, Rostow urged a policy

of U.S. diplomatic and military support for Israel, particularly after the 1967 Six-Day War. In 1969, with the change in the administration, he returned to teaching economics and history – at the University of Texas. When he retired from teaching, Rostow became the Rex G. Baker, Jr. Professor Emeritus of Political Economy. In 1992, he helped found the Austin Project and served as chairman of the board and task force director from 1992 to 1998.

Among his many honors, Rostow received the Order of the British Empire (honorary, military division, 1945); the Legion of Merit (1945); and the Presidential Medal of Freedom (with distinction, 1969).

Rostow's more than 30 publications include: *The Stages of Economic Growth* (1952), a widely influential work in which Rostow outlined five stages of economic growth through which societies pass; *Dynamics of Soviet Society* (1953); *The United States in the World Arena* (1960); *View from the Seventh Floor* (1964); *Politics and the Stages of Growth* (1971); *How It All Began* (1975); *Why the Poor Get Richer and the Rich Slow Down* (1980); *Theorists of Economic Growth from David Hume to the Present* (1990); *The Great Population Spike and After* (1998); and *Concept and Controversy* (2003).

[Joachim O. Ronall / Ruth Beloff (2nd ed.)]

ROTBBAUM, JACOB (1901–), Polish producer. Born in Warsaw, Rotbaum acted with experimental groups and traveled in Europe and in the U.S. Returning to Warsaw, he worked during the 1930s as a professional producer. His first important production was *Roar China* by the Soviet writer S.M. Tretyakov. This was followed by Itzik *Manger's *The Three Hotzmachs* (based on *Goldfaden) for the Yung Theater, and Shalom Aleichem's *Groser Gevins*. He also worked in the Polish theater and produced N.F. Pogodin's *Man with the Gun* (1938). After World War II he again produced on the Polish stage.

ADD. BIBLIOGRAPHY: "Mayn Tszamenarbet mit'n Yiddishen Melukhe -Teater.in Poylen," in: *25 yor yiddisher Meluche teater in Folks-Poylen (1949–1974)*, 23–32 (Yiddish); 34–35 (English); 35–36 (Polish).

ROTLAT, SIR JOSEPH (1911–2005), physicist and Nobel Peace Prize laureate. Rotlat was born in Warsaw, Poland, and became a U.K. citizen in 1945. He graduated with an M.A. in physics from the Free University of Poland (1932) and a doctorate in physics from the University of Warsaw (1938). He worked in the Warsaw Radiological Laboratory before joining James Chadwick as an Oliver Lodge Research Fellow at the University of Liverpool (1939). His work helped to establish, firstly, that a sustained fissile chain reaction could follow the bombardment of uranium with neutrons, and secondly, that this reaction produced the transuranic element later named

plutonium. Subsequently in 1944, he joined the Manhattan Project in Los Alamos but returned to the U.K. the same year because of moral scruples about producing nuclear weapons once it was clear that the Germans could not do so. He was the only project member who left on moral grounds. He was director of research in nuclear physics at Liverpool University (1945–49) before becoming professor of physics at St. Bartholomew's Hospital Medical College, University of London, and chief physicist at St. Bartholomew's Hospital (1950–76), after which he became emeritus professor. During this period he pursued research on the biological effects of irradiation and the clinical applications of radioisotopes resulting in notable papers on subjects such as the diagnosis of thyroid disease and the deleterious effects of the bone-seeking isotope strontium-90. His concerns over the potential catastrophic effects of nuclear weapons were enhanced by his analysis of the radioactive fallout from hydrogen bomb tests at Bikini Atoll. This led him to sign the Russell-Einstein manifesto of 1955 warning about the consequences of war involving nuclear weapons. In 1957 Rotlat and Bertrand Russell founded the Pugwash Conference on Science and World Affairs, an international organization of scientists and others seeking solutions to global security threats and ultimately to eliminate nuclear weapons. In 1995 he and the Pugwash Conference shared the Nobel Peace Prize. He continued to express his concerns over nuclear and biological warfare after the Cold War ended and continually stressed the social responsibilities of scientists. His honors include the C.B.E. (1985), the Albert Einstein Peace Prize (1992), belated election to the Royal Society (1995), and a knighthood (1998). His wife, the former Tola Gryn, was unable to join him in 1939 and perished in the Nazi occupation of Poland.

[Michael Denman (2nd ed.)]

ROTE (Roti, ar-Reuti, Arrueti, Arueti, Aroti, al-Rueti, er-Routi, Ruty, Ruti, Rute), Spanish-Moroccan family which originated either in Rota on the Bay of Cadiz, or in Rueda (At. Roṭ'a), Aragon. The first person known by this name was R. ISAAC AROTI, a Spanish rabbi whose father settled in *Egypt together with *Maimonides. During the 14th century several members of the Rote family ranked among the leaders of various Jewish communities in Spain. Among them were JACOB BEN SAMUEL AL-RUETI of Pamplona and JUCE (JOSEPH) ARRUETI (d. after 1367) of Saragossa, one of the favorites of King Pedro IV. During the 15th century, HABRAN (ABRAHAM) ARUETI of Pamplona was highly respected. ABRAHAM ROTE (d. after 1525), one of the Spanish-Portuguese refugees settled in Safi, traveled to Lisbon, where he sought a number of privileges from John III and met David *Reuveni.

His son JACOB (I) ROTE was appointed official interpreter of the Portuguese in *Safi in 1523. In 1536 he settled in *Fez, after supplying a considerable quantity of arms to the Wattasid ruler; he also became the latter's counselor. In this capacity he participated in the battle of Oued al-'Abid, where the army of the *Wattasids was defeated by the *Sadis. Rote was then called upon to get John III to support the Wattasids. Honors

were heaped upon him after this mission and he was named *sheikh al-Yahūd*, or **nagid*, of the Jews of the kingdom of Fez and given extensive powers. The *takkanot* of the *megorashim* (expellees) were drawn up under his aegis. The Christian captives were also under him and he made great efforts to secure their redemption. The pope issued a special safe-conduct pass to enable him to travel in complete security through all the Christian countries.

With his brother MOSES ROTE, he established a powerful firm for maritime trade, particularly the export of cereals, at first in Arzila and later in Tangier. As a result of his economic activities Rote became one of the leading merchants in Morocco. His relations with the *Marranos in Portugal were largely facilitated by his position and he encouraged them to establish themselves in Morocco and return to Judaism. When he was appointed ambassador of Portugal in 1539, he devoted his time to financing the transportation of the Marranos and their establishment in Morocco, where they openly returned to Judaism. The Inquisition was informed of these activities, and as it also sought to promote the affairs of the Christian merchants who were involved in the maritime cereal trade at the Rotes' expense, it ordered Moses Rote's arrest in Tangiers. This incident aroused strong protests on the part of both the king of Fez and the Portuguese ambassador in Morocco; John III personally intervened in the affair and Moses Rote was released in 1542. As a result of the progressive decline of the Wattasids, Jacob Rote was unable to make the alliance with Portugal effective. After the occupation of Fez in 1549 by the Sadis, Rote remained at the head of the community of Fez. The last meeting he presided over took place in 1556.

His son ABRAHAM ROTE (d. after 1603) succeeded him as *nagid*, and several new *takkanot* were formulated under his aegis. His son JACOB(2) ROTE (d. after 1622) was the person through whom the famous Aḥmad al-Manṣūr "ruled." He lived in *Marrakesh with this sultan, and in his capacity as "minister of foreign affairs" he favored the English. After the death of the sovereign in 1603, he returned to Fez where he presided over the community through a troubled period. R. ISAAC BEN JACOB ROTE (d. after 1706) headed his family's yeshivah in Fez. Some of his works are extant in manuscript. After the death of his sons ABRAHAM ROTE and JACOB ROTE (d. after 1730), the Rote family ceased to exist. In his epistle to Oliver Cromwell, which sought to obtain the admission of the Jews to England in 1655, Manasseh Ben Israel praised the merits of the "noble family" of the Rotes.

ROTEM, CVI (Zvi; Erich Rothmüller; 1903–1981), journalist and editor. Born in Slavonia (Croatia), Rotem lived in Zagreb. He received his Ph.D. in philosophy from Wuerzburg, and he studied Judaism in Berlin at the Hochschule fuer Jüdische Wissenschaften; he also completed the Law School of

Zagreb University. From his youth on, he occupied leading positions within the Zionist movement and was among the founders of the Radna Palestina (Labor Palestine) organization. He edited various publications, including the "Red Book" of Ha-Shomer ha-Za'ir in 1935. That same year he immigrated to Erez Israel. He first worked as the Haifa bureau chief of the Labor daily, *Davar*, later moving to Tel Aviv, becoming head of its economic section. He also edited *Omer*, a vocalized daily journal for new immigrants.

Rotem was among the leaders of Hitahdut Olei Yugoslavia (Association of Immigrants from Yugoslavia), editing its *Bilten* and other publications, including *Toledot Yehudei Yugoslaviah*. Simultaneously, he acted as correspondent of the Belgrade daily *Politika*.

Through his extensive writings, Rotem significantly contributed to Yugoslav-Israeli relations. He translated and edited the works of Hinko Gottlieb. He also contributed articles to the first edition of *Encyclopaedia Judaica*.

[Zvi Loker (2nd ed.)]

ROTENBERG, MATTIE LEVI (1897–1989), first woman and first Jew to receive a Ph.D. in physics from the University of Toronto (1926); founder of Toronto's first Jewish day school; Canadian journalist and award-winning national radio commentator. Born in Toronto, the eldest of 10 children, Rotenberg was a brilliant student who also received a B.A. (1921) and M.A. (1922) from the University of Toronto and was the recipient of several National Research Council Scholarships. Her research focused on photo-electric properties of fluorescent crystals. In 1924, she married Meyer Rotenberg, with whom she had five children between 1925 and 1934. Rotenberg's doctoral thesis, "On the Characteristic X-Rays from Light Elements," was published in the *Transactions of the Royal Society of Canada* (1924). In 1941–42, she was appointed an assistant demonstrator in physics at the University of Toronto at a salary of \$1.25 an hour. Rotenberg was a demonstrator from 1947 to 1962 and an instructor from 1962 to 1968. In 1929, committed to her children's being both observant and knowledgeable Jews, she founded Hillcrest Progressive School, despite community resistance from parents who protested against the "segregating" of Jewish children and the study of Hebrew. She was the school's director for several years and remained active until 1944, when her youngest child left the school. From 1930 to 1932, Rotenberg was editor of the women's section of *The Jewish Standard*, published in Toronto and edited by Meyer *Weissgal, the political representative of Chaim *Weizmann in North America. Rotenberg also wrote a weekly column, "As the Woman Sees It," for *The Standard*. From 1939 until 1966, she wrote and broadcast regularly her commentary on the Canadian Broadcasting Corporation (CBC), Canada's national radio, on a program devoted to women's issues called "Trans-

Canada Matinee.” On April 12, 1943, she gave a detailed report about the Final Solution, condemning the Western nations, including Canada, for their indifference. “Asking themselves the question, ‘Am I my brother’s keeper?’ the democratic nations of the world, our country among them, answered: ‘No.’” She concluded her talk: “Some action must be taken at once. If it is not, within a few months six million people will have been murdered, and the nations of the world will not be able to escape the charge of being accomplices to the bleakest crime in history.” In 1945, she won the Canadian Women’s Press Club Memorial Award for a radio broadcast titled “The Post-War Woman.” It was the first time in its 10-year history that the award was given in the field of radio writing. In February 1947, she covered the United Nations Status of Women Commission at the first formal session of the UN at Lake Success, New York. She attended the UN annually for several years, broadcasting for the CBC on the position of women around the world.

[Nessa Rapoport (2nd ed.)]

ROTENBURG, family in Cochin (*Kochi). Probably originating in Frankfurt, the Rotenburgs were one of the leading “White” Jewish families in Cochin throughout the 18th century. The first prominent member of the family was SIMON SAMSON ROTENBURG, whose business trip to Mocha on behalf of his relative Ezekiel *Rahabi became a cause célèbre (1733–40). From 1763 to 1772 JOSEPH ROTENBURG came to the attention of the Dutch East India Company and the rajah of Cochin because of his unauthorized departure from the state. His case led to an investigation of the legal status of the White Jews in relation to the company and the rajah. When Cochin was under British rule, NAPHTALI ROTENBURG was a leading figure in the community and his Hebrew signature is found on many communal documents. He saved the life of Colonel Macauley, British resident of Cochin and Travancore, during a rising of the population in 1808. As a token of gratitude, Colonel Macauley presented the Paradesi Synagogue with a gold and silver crown for the Torah scroll.

[Walter Joseph Fischel]

ROTENSTREICH, FISCHEL (1882–1938), Zionist leader. Born in Kolomyja, Galicia, Rotenstreich was active in the student Zionist movement in Galicia and later in Vienna. He taught at various government high schools in Galicia. With the collapse of the Austro-Hungarian monarchy at the end of World War I and the establishment of the “West Ukrainian State” (1918) in Galicia, Rotenstreich became the chairman of the Jewish National Council. When the district was returned to Polish rule, he was arrested by the Poles. From 1922 to 1927, he was a member of the Polish senate, and from 1927 to 1930 a member in the Polish Sejm. In both of these capacities, he took an interest mainly in economic affairs. At the 18th Zionist Congress (1935), he was elected to the Executive of the Jewish Agency by the *General Zionists (B). In the same year, he

settled in Palestine, where he directed the agency’s Department of Commerce and Industry until his death. He published many articles in Hebrew, Yiddish and Polish on economic and financial matters.

ROTENSTREICH, NATHAN (1914–1993), Israeli philosopher and author. Born in Sambor, Poland, the second son of Fischel *Rotenstreich, a distinguished leader of Polish Jewry, Nathan Rotenstreich joined the Zionist movement in his early youth. He immigrated to Erez Israel in 1932 and soon became known as an original thinker and prolific writer. In 1951 he joined the faculty of the Hebrew University of Jerusalem, where he taught philosophy for close to four decades. From 1958 to 1961 he was dean of the Humanities Faculty and in 1965–69 rector of the university. An academic philosopher, who was intensely engaged in the upbuilding of the Jewish community, the so-called Zionist *yishuv*, in Palestine, and then in the State of Israel, Rotenstreich was a public intellectual par excellence. A prolific scholar, who published some 30 books and 600 scholarly articles (in English, French, German, and Hebrew), he tirelessly wrote political and cultural feuilletons for the Israeli daily press, cultural journals, political forums, and educational bulletins, responding to issues of the day. His committed engagement in the public discourse of the State of Israel was borne by his conviction that philosophical culture has a direct bearing on the task of furthering human dignity in the realm of history and politics. Dedicated to systematic, “conceptual clarification” – a term that, indicatively, recurs frequently in his writings – philosophy should, he held, contribute decisively to heightening the rational understanding required if human beings are to act within history in a judicious and ethically responsible manner.

Accordingly, the historical dimension of human existence determined much of the thematic thrust of both his scholarship and popular writings. He contemplated history not as an account of the past, but as a way of explaining the present, more precisely, the object of his inquiry was historical knowledge as it bears on the present. This focus took his work in two distinctive but related directions: the epistemology of historical knowledge and the cultural function of historical consciousness, especially within the context of the modern Jewish experience. As a modern historical consciousness took hold of the Jews, Rotenstreich argued, the structure of Jewish life and sensibility was radically transformed. Modern Jewish thought is thus straddled with the twin challenge of historicism – which pits the relativistic conclusions of critical historiography against traditional Jewish memory and self-understanding – and the “return of the Jews to history” as conscious actors in the shaping of their own political destiny. This process, which is one of the hallmarks of secularization, Rotenstreich observed, was set into motion by European Jewry’s quest for civic emancipation, a protracted struggle whose

dialectic ineluctably led to Zionism and the restoration of Jewish political sovereignty in the Land of Israel.

In contrast with many of the early Zionist thinkers, Rotenstreich deemed the mere renewal of Hebrew as the secular vernacular of the Jewish people to be in and of itself an insufficient basis to ensure that the emerging culture sponsored by Zionism would have the requisite “energy” to engage the minds and souls of contemporary Jews. Although Hebrew is a necessary condition for the development of an intellectually and spiritually compelling Jewish national, that is, secular culture, he argued, it must be supplemented by a well-informed knowledge of the sources of Jewish tradition. A sound grounding in the classical texts of Judaism would also facilitate a desired dialogue between secular Jews and those Jews still bound to the religious beliefs and practices of the tradition. This dialogue, Rotenstreich affirmed, will allow Judaism to remain, even for the secular Jew, the grammar of Jewish imagination and creativity.

In his political activity, Rotenstreich identified himself with *Mapai, the dominant party in the Zionist Labor movement, but in 1961 he joined the break away faction led by Pinḥas *Lavon, Min ha-Yesod, which strongly opposed to David Ben-Gurion’s leadership. As a philosopher, he had a deep interest in German idealism and particularly in Kant and neo-Kantianism. Widely regarded as one of the leading contemporary Kantian scholars, Rotenstreich also emerged as a philosopher in his own right, initiating a series of systematic treatises on historical knowledge. He developed an original set of philosophical principles with which he sought to clarify the epistemological and phenomenological character of various human activities, such as, religious and secular faith. Rotenstreich was clearly influenced at this stage by *Husserl’s phenomenology. His writings contain vigorous criticism of many philosophical trends, such as existentialism, Marxism, neo-positivism, linguistic philosophy, and even some specific approaches within the phenomenological movement. In 1963 he was awarded the Israel Prize in the humanities. At the time of his death he was the vice president of the Israel Academy of Sciences and Humanities and a foreign associate of the U.S. National Academy of Education.

His writings include *Between Past and Present: An Essay on History* (New Haven 1958); *Jewish Philosophy in Modern Times: From Mendelssohn to Rosenzweig* (New York 1968; 2nd ed., Detroit 1994); *Tradition and Reality. The Impact of History on Modern Jewish Thought* (New York 1972); *Essays on Zionism and the Contemporary Jewish Condition* (New York 1980); *Jews and German Philosophy* (New York 1984); *Essays in Jewish Philosophy in the Modern Era*, with an introduction by P. Mendes-Flohr, edited by R. Munk (Amsterdam 1996); *Wege zur Erkennbarkeit der Welt* (Freiburg 1983); *On Faith*, ed. P. Mendes-Flohr (Chicago 1998).

For a comprehensive intellectual biography of Rotenstreich, see A.Z. Bar-On, “Nathan Rotenstreich,” in: *Interpreters of Judaism in the Late Twentieth Century*, ed. by Steven T. Katz (Washington, D.C., 1993), pp. 229–48.

[Paul Mendes-Flohr (2nd ed.)]

ROTH, AARON (1894–1944), founder of a ḥasidic dynasty. Born in Ungvar, in his youth Roth attended yeshivot in Galicia and Hungary. He was attracted to Ḥasidism at an early age, and studied under several *Zaddikim*, including Issachar Dov of Belz. His main teacher was Zevi Elimelech of Blazowa, who instructed him to establish a ḥasidic community, although Roth was not descended from *Zaddikim*. The ḥasidic community which gathered around him in *Satu Mare and Beregszász (*Beregovo) bore many of the characteristics of early Ḥasidism. The major points of his system were complete adherence to simple faith, and rejection of any compromise with modern views and ways of life. He demanded of his Ḥasidim that they support themselves by their own labor, and employ the ecstatic mode of praying.

At the end of his life Roth settled in Erez Israel and, although ill, he succeeded in establishing there an enthusiastic and active, though small, ḥasidic community. He regarded the recent sufferings of the Jews, and especially the Holocaust, as a punishment for abandoning simple faith and the traditions of the ancients, and constantly called for repentance. Roth was succeeded by his son-in-law ABRAHAM ISAAC KAHAN, and by his son ABRAHAM ḤAYYIM ROTH.

His writings include *Shulḥan ha-Tahor, on kashrut* (1933); his main book *Shomer Emunim* (1942, published in several editions) consists of homilies concerning faith, confidence, individual providence, reward and punishment, and redemption, including at the end *Kunteres Ahavat ha-Bore*, expressing his longings and yearning for God, and songs of devotion and joy.

BIBLIOGRAPHY: A. Roth, *Uvda de-Aharon*, written and ed. by E. Kohen Steinberger (1948).

[Adin Steinsaltz]

ROTH, CECIL (Bezalel; 1899–1970), Jewish historian; editor in chief of the first edition of the *Encyclopaedia Judaica*. Roth, who was born in London, the son of a manufacturer of building supplies, saw active service in the British infantry in 1918 before being educated at the City of London School and at Merton College, Oxford, obtaining his doctorate in 1925. He was trained as a general historian, with a special interest in Italy, his first major work being *The Last Florentine Republic* (1925). A traditional, observant Jew who learned Hebrew from his father and under Jacob *Mann, he was from the first interested in Judaica: as an undergraduate in 1920, he produced a paper identifying the convert Duarte Brandao with the military adventurer Sir Edward Brampton. In that same year, under the influence of Herbert *Loewe, Roth also translated a number of the *Kinot* (liturgical poems for the Ninth of Av), foreshadowing a continuing interest in Jewish liturgy, especially of the more recondite rites. He subsequently devoted himself to Jewish subjects, first as freelance writer and lecturer, and from 1939 to 1964 as reader in Jewish Studies at Oxford.

Roth combined naturally English ways and loyalties with Jewish nationalism. When he retired from his Oxford appointment in 1964, he settled in Jerusalem, taking up a visiting pro-

fessorship at Bar-Ilan University. Soon after his appointment he was accused of unorthodoxy by a pamphlet which quoted his citation (in the *Short History of the Jewish People*) of doubts expressed by others about the historicity of Moses but omitting Roth's refutations of these doubts. Although supported by the university authorities and other Orthodox spokesmen, Roth, who had suffered a heart attack, resigned from Bar-Ilan. For the rest of his life he divided his time between Jerusalem, where he edited the *Encyclopaedia Judaica*, and New York, where he lectured at Queens College, City University, and at Stern College.

Roth's remarkable facility as a writer is shown by an immense literary output. A bibliography compiled in 1966 by O.K. Rabinowitz lists 572 items, and his total output numbered at least 779 items, including translations into many languages. His lasting influence was as writer, lecturer, and collector, rather than as teacher, for conditions in Anglo-Jewry, where he spent most of his academic life, precluded cultivating disciples, though he was both an inspiring and painstaking teacher. Roth wrote the standard modern histories of: the Jews of England (1964³) and Italy (1946); a history of the *Marranos (1959²); a history of the Jews in the Renaissance (1964²); *The House of Nasi* (2 vols., 1947–48); and popular works such as the *Short History of the Jewish People* (1936) and *The Jewish Contribution to Civilization* (1938). He edited the successful *Standard Jewish Encyclopaedia* (1959, and several later editions), and was from 1966 until his death editor-in-chief of the *Encyclopaedia Judaica*. He had a vivid literary style and a taste for picaresque characters, but this was combined with precise erudition, as in his bibliographical works, such as the *Magna Bibliotheca Anglo-Judaica* (1937); in his studies of Jewish printing; and in detailed monographs such as his *Intellectual Activities of Medieval Anglo-Jewry* (1949). Three volumes of his collected essays appeared: *Gleanings, Essays in Jewish History and Art* (1967), *Essays and Portraits in Anglo-Jewish History* (1962), and *Personalities and Events in Jewish History* (1953).

The *Dead Sea Scrolls controversy led Roth to contribute a historian's approach to the examination of the evidence. His identification, on historical evidence, of the Qumran Sect with the *Zealots, while not accepted by the supporters of the Essene theory, was cogently expounded (*Dead Sea Scrolls*, 1965²) and, after initial doubts, won the support and collaboration of the Semitic philologist Godfrey *Driver.

Roth's artistic flair led him to Jewish art, including the scientific study of illuminated Passover *Haggadot*. He edited a record number of *Haggadot* and collaborated with the artist Arthur *Szyk on what was probably the most sumptuously illustrated *Haggadah* ever printed (1940). He assembled Jewish art objects, including a remarkable *menorah* collection and rare Hebrew books and manuscripts (of which he published a catalog, in *A. Marx Jubilee Volume*, 1950). His collection of *ketubbot* combined both his literary and artistic interests. These collections formed the setting of his Oxford home, which served as a center of hospitality both for local Jewish undergraduates and visiting scholars. Roth's extensive library

and manuscripts were bequeathed to the University of Leeds, England, and his art collection now forms a museum attached to the Beth Tzedec Synagogue, Toronto, Canada.

During his life in Britain, Roth worked devotedly for Jewish culture in the Anglo-Jewish community, although he viewed its future with realistic pessimism. In spite of the warmth and friendship of some of Anglo-Jewry's leading figures, he did not receive the recognition in Britain which he achieved in other countries, where his brilliance as a lecturer won him an enthusiastic reception on several wide-ranging tours. His services to the *Jewish Historical Society of England, which he kept alive during the difficulties of World War II, were recognized by his reelection as president a number of times and the presentation of a festschrift (*Remember the Days*) in 1967. Elected a member of Italian learned societies before 1939, Roth resigned his membership as a protest against Mussolini's anti-Jewish legislation. After 1965 he was reelected a corresponding member of the Accademia Colombaria of Florence, and in 1969 he was appointed a commendatore of the Order of Merit of the Italian Republic for services to Italian culture.

Roth's "meliorist" view of Anglo-Jewish history, implicitly contrasting the liberal evolution of Jewish life in Britain with the horrors of the Continent, won wide acceptance at the time. Recently it has been challenged by younger Anglo-Jewish historians who see more hostility to the Jews than Roth admitted; this view has itself been challenged more recently still. Roth's greatest achievement was unquestionably his editing of the *Encyclopaedia Judaica*, an effort which would have taxed the abilities of a superhuman. That the *Judaica* has been the standard reference work of the entire Jewish world for more than a generation is fitting testimony to his ability.

He was a brother of Leon *Roth, the philosopher. Roth's widow, Irene Roth, wrote a biography, *Cecil Roth: Historian Without Tears* (1982).

[Vivian David Lipman]

ROTH, DAVID LEE (1954–), flamboyant, cocky frontman and lyricist for hard rock giants Van Halen during their 1978–85 heyday, and successful solo artist in the late 1980s and 1990s. Born in Bloomington, Indiana, Roth spent several years in Massachusetts before moving to Pasadena, California, in 1963. Roth attended Hebrew school, and later said that singing during Sabbath services gave him a feeling of belonging and strengthening his self worth. After his bar mitzvah, his Jewish education took a back seat to a lifelong devotion to karate and to the verbal street poetry he was hearing from people like Wolfman Jack and Cassius Clay. He visited his Uncle Manny Roth in New York who owned the famed Cafe Wha?, which further exposed him to varieties of music. During his senior year of high school in 1972, he joined a covers band, and it was on the party circuit that he met the Van Halen brothers, Eddie and Alex. After briefly studying music theory at Pasadena

State College, Roth and the Van Halens joined forces in late 1974 along with bassist Michael Anthony, and at Roth's urging named the band Van Halen. They released their self-titled debut in 1978, and their metal-meets-melody style and the Jagger-Richards combination of Roth and Eddie Van Halen made their albums instant hard-rock classics. Wearing spandex and strutting around the stage like a rooster, Roth used his fast-talking huckster persona, self-deprecating smile, and athletic pyrotechnics to become one of the most riveting frontmen in rock. One critic wrote that Roth "simply updated vaudeville. He wrapped himself in Hollywood hype, plugged in, turned the volume to 11, and voila, created 'Diamond Dave,' a hedonistic rock & roll character." For Roth, it had more meaning: "Every step I took on that stage was smashing some Jew-hating, lousy punk even deeper in the deck ... if you were vaguely antisemitic, you were under my wheels." With tension between Roth and Van Halen mounting, Roth left the band in 1985, just after releasing a successful four-song EP *Crazy from the Heat*, featuring remakes of The Beach Boys' "California Girls" and the vaudeville medley of "Just a Gigolo/I Ain't Got Nobody." His solo career kept him in the limelight through the mid-1990s. In 2004, Roth disclosed that he had trained to become a paramedic and began working on an ambulance in the Bronx. He took over Howard Stern's national radio talk show in January 2006, but was removed in April due to poor ratings. He is the author of a well-received autobiography, *Crazy from the Heat* (1997).

[David Brinn (2nd ed.)]

ROTH, HENRY (1906–1995), U.S. novelist. Roth was born in Austria-Hungary. When he was 18 months old, his mother brought him to New York, where his father had been working to save money for their passage. In New York, young Roth was close to his mother and alienated from his father. At first the family lived on New York's Lower East Side, where Roth felt a sense of belonging in the Jewish community of the neighborhood that he did not receive at home. Later, the family moved to Harlem, a diverse community with a large Irish population. There Roth suffered considerably because of his Jewish heritage, and began to adapt to his gentile neighborhood. In the mid-1920s, he studied biology at the City College of New York and developed an interest in writing. During this period, Roth also met Ida Lou Walton, a New York University professor, and the two began living together. By 1930, Roth began writing his first novel. Three and a half years later the novel, *Call It Sleep*, was completed. Walton left Roth and eventually married David Mandel, a partner in the Robert O. Ballou publishing company. In early 1935, Ballou published *Call It Sleep*, on Walton's recommendation. This autobiographical work describes a young Jewish immigrant boy's search for belonging in New York City, from age six to nine, in the 1930s. The protagonist, David Schearl, is disturbed by his father's doubts of his paternity, his gentile neighborhood, and the Jewish religion he does not understand. David feels close only to his mother and this Oedipal aspect causes David to pull away from her

throughout the novel. Symbolism in the work points to the main theme – redemption. Roth's dialect and ethnic speech patterns reveal the extent of David's isolation. Finally, turning to myth and the Isaiah story for his transfiguration at the end of the novel, David touches a milk ladle to the third rail of the trolley tracks in an attempt at symbolic purification through electrocution. David's survival softens his father's feelings toward him, and there is hope that he will transcend his inner conflict.

The critical reception of Roth's *Call It Sleep* in 1935 was predominantly favorable. Fred T. Marsh believed the novel "... to be the most compelling and moving, the most accurate and profound study of an American slum childhood that has yet appeared in this day..." The reviewer reminds his readers "... that this novel would never have been published if *Ulysses* had not won the decision in our courts. And the law has enlightened public opinion." Roth's language in the novel is seen as "... nothing short of the highest talent. It moves from a kind of transmutation of picturesque, warm, emotional and gentle Yiddish, to the literal English argot of the Ghetto, an ugly, fascinating, and expressive speech." Undoubtedly, any first-novel author would be flattered by Marsh's final judgment: "To discerning readers, I believe, for its profound intensity, its rare virtuosity, its sensitive realism, its sheer weight, its power, circumference and depth, this first novel of this Mr. Roth will be remembered for some time to come. I should like to see *Call It Sleep* win the Pulitzer Prize – which it never will."

Joseph Gollomb, in contrast to Marsh, thought Roth magnified the foulness of life on the Lower East Side instead of accurately portraying it. Although initially praising Roth's "sensitive ear for speech," Gollomb passes final judgment on Roth's literary truthfulness: "... still let me repeat the book in part and as a whole does violence to the truth. Someone once wished that novels of the east side life did not have to be so 'excremental.' *Call It Sleep* is by far the foulest picture of the east side that has yet appeared, in conception and in language. Certainly there was and is foulness down there as in other places. But Mr. Roth treats it not with the discriminating eye of the artist but with a magnifying glass, and if not with a relish, certainly with an effort to see what Emerson saw, with 'even in the mud and scum of things, there always, always something sings.' Whoever omits that something in his picture of east side life omits the very things which kept that life so long a fertile field for the creative writer."

Call It Sleep was republished in the early 1960s. Thus, almost 30 years after its initial publication, Roth's novel was "rediscovered" by Harold Ribalow, who wrote: "It is no wonder, then, that the best novel ever written in the United States should have been 'rediscovered' in 1960. It is *Call It Sleep*, by Henry Roth." Leslie Fiedler and Alfred Kazin both called attention to Roth's novel in articles and lectures. Although the novel may have remained a fond memory in the minds of a few enthusiastic readers, Henry Roth disappeared from the literary scene. Ribalow's correspondence with Roth in 1959 was the beginning of the novel's comeback. Ribalow's view of

Roth's work after the correspondence is summed up in this quote: "If most of us, passing through only once, can leave behind us a work of art comparable to *Call It Sleep*, we would have every reason to be proud of ourselves."

It is crucial to mention here Roth's debt to the early modernists, T.S. Eliot and James Joyce. In one of his last novels, *From Bondage* (1996), Roth reveals this influence: "*Ulysses* ... showed ... how to address whole slagheaps of squalor, and make them available for ... art ... the sorcery of language ... to fluoresce, to electrify the mood ... the Chicago packing houses ... used every part of the pig except the squeal. Joyce elucidated ways to use even the squeal."

The republication of *Call It Sleep* resulted in a financial windfall for Roth (the paperback edition in 1964 sold more than one million copies), and rejuvenated his artistic talent in the late 1970s. He began work on a four-volume novel entitled *Mercy of a Rude Stream* in 1979, picking up on the story of David Schearl, renamed Ira Stigman. This last literary project consisted of *A Star Shines Over Mt. Morris Park* (1994), where Ira encounters antisemitism; *A Diving Rock on the Hudson* (1995), which reveals tantalizing glimpses of the wholesome, idealized American boyhood of Ira's non-Jewish friends; and the posthumous volumes *From Bondage* (1996) and *Requiem for Harlem* (1998), where Ira's growing intimacy with Edith (Walton) helps him escape from domestic and sexual tensions.

Sexuality in Roth's fiction is discussed in detail in *Redemption*, Henry Roth's biography by Steven G. Kellman, and a *New Yorker* article by Jonathan Rosen. Both delve into Roth's psyche, revealing the sexual frustrations of Roth's protagonist and of Roth himself. According to Rosen, "Roth's characterization of his Harlem exile as a kind of hell makes more sense when considered alongside the revelation that it was there that he began an incestuous relationship with his sister, Rose." According to Kellman, Roth had been "groping his sister since he was 12 and she was 10; by the time Roth was 16 he was having intercourse with her. When he was 18, he also seduced his 14-year-old first cousin Sylvia, leading her into the basement at a *bris*." Rosen interprets Kellman's *Redemption* in regard to David Schearl's incest as a "dramatic magnification of immigrant insecurity, the newcomer's inability to invest their emotions in anything beyond the reassuring confines of the clan." As a matter of fact, Rosen feels that "... the guilt that Roth felt hung over him like a kind of Biblical curse."

[Mark Padnos (2nd ed.)]

ROTH, JOEL (1940–), Conservative rabbi. After completing undergraduate studies at Wayne State University in Detroit,

Michigan, in 1961, Roth received a master's degree in Hebrew literature at the Jewish Theological Seminary, and in 1968, rabbinic ordination. After completing a Ph.D. in Talmud in 1973, he was appointed to the JTS faculty as associate professor of Talmud. Roth held both academic and administrative positions at JTS. In 1978 he was appointed to the Committee of Jewish Law and Standards, where he served as chairman from 1984 to 1992. Roth served as the dean of the Rabbinical School of JTS, from 1981 to 1984 and in 1992–93. In 1998 he was appointed the Louis Finkelstein Professor of Talmud and Jewish Law, and in 2000 he became the head of the Conservative yeshivah in Jerusalem, an institution founded by the Conservative movement in 1995 to enable men and women to learn traditional Jewish texts in an open, co-educational environment.

Throughout his rabbinic career, Roth has advocated for a Conservative movement ideology and practice rooted in the halakhic (legal) system, whose workings he elaborated upon in his 1986 book, *The Halakhic Process: A Systemic Analysis*. In writings on homosexuality and the ordination of women, among other topics, he has urged the movement to embrace the Conservative movement's doctrine of "tradition and change," but not by circumventing a strict process of legal precedent in service of social trends such as feminism. One of Roth's more prominent responsa has supported the rabbinic ordination of women, among the most important policy decisions of the Conservative movement, and has stated that a woman may exempt the community from its ritual obligations if she accepts upon herself ritual obligations commanded to men. He has also written an extensive series of responsa on the permissibility of organ donation, and on conversion and Sabbath observance, among other topics. Roth drew the ire of many members of the movement when, in 1992, he led the Committee on Law and Standards in its decision against ordaining homosexual rabbis or performing same-sex marriages, citing insurmountable halakhic objections to homosexuality. Roth has come to represent and to anchor the "right-wing" of the Conservative movement, a position that has at times placed him at odds both with the generally less traditionally observant laity of Conservative synagogues in the United States, on the one hand, and with many Orthodox leaders, on the other, who consider his rulings on egalitarianism and the ordination of women to be outside the bounds of *halakhah*.

[Liora R. Halperin (2nd ed.)]

ROTH, JOSEPH (1894–1939), Austrian novelist. Born near Brody in East Galicia, Roth volunteered for service in the Austrian army during World War I. He became an officer and was captured by the Russians. His subsequent career was in journalism and for a decade from 1923 he worked for the *Frankfurter Zeitung*. He fought for a new humanism and was a strenuous opponent of German militarism. Roth left his adopted country when Hitler came to power in 1933. Much of his restless life was spent abroad and he finally sought refuge in

Paris where in a fit of depression he tried to commit suicide and died in a hospital for the poor.

Apart from many newspaper articles and short stories, Roth wrote 14 novels, notable for their lucid style. At first a psychological realist in the tradition of Stendhal and Dostoevsky, Roth was later influenced by the Viennese impressionists such as H. von Hofmannsthal and A. Schnitzler. Always affected by the sufferings of others, Roth projected recollections of his own unhappy and impoverished youth into his best-known novel, *Hiob* (1930; *Job*, 1931), which describes the bitter life of an East European Jewish family. Other novels, such as *Die Flucht ohne Ende* (1927) and *Rechts und Links* (1929), depict the social consequences of war and the decomposition of the old order through revolution and inflation. His last novel, *Die Legende vom heiligen Trinker* (1939), is a kind of self-portrait and reflects some of the author's own disappointments. The essays of *Juden auf Wanderschaft* (1927) deal with the social position of East European Jewry. A different atmosphere prevails in Roth's historical novels. The best known of these, *Radetzky marsch* (1932), nostalgically portrays Austria and the imperial army under Franz Joseph. Three other novels were *Die hundert Tage* (1936), *Die Geschichte von der 1002. Nacht* (1939), and *Der Leviathan* (1940). Years after his death, *Der stumme Prophet*, a work full of forebodings about totalitarianism, appeared in 1966. Roth's collected works were published with an introduction by Hermann Kesten (3 vols., 1956). Roth gained belated recognition as one of Austria's outstanding novelists.

[Rudolf Kayser]

ROTH, KLAUS FRIEDRICH (1925–), English mathematician. Born in Breslau, Germany (now Wrocław, Poland), Roth came to England where he was educated at St. Paul's School, London, before graduating with a B.A. in mathematics from Cambridge University (1945). After teaching at Gordonstoun School in Scotland, he joined the mathematics department of University College, London (1946–66) where he gained his M.A. (1948), Ph.D. (1950) and became professor (1961). He moved to Imperial College of Science and Technology, London as professor of pure mathematics (1966–88) and visiting professor (1988–96) before returning to Scotland. Roth's main interest is the theory of numbers. He solved the major problem of approximating algebraic numbers by rationals (his solution is now known as "Roth's theorem") and published *Rational Approximations to Irrational Numbers* (1962). He made other important contributions to the theory of natural numbers. His achievements have been recognized by many honors including the Fields Medal (1958), election to the Royal Society of London (1960) and the award of the Royal Society's Sylvester Medal (1991).

[Michael Denman (2nd ed.)]

ROTH, LEON (Hayyim Judah; 1896–1963), philosopher; brother of Cecil Roth. Roth – a pupil of Samuel Alexander – devoted his early studies and publications to the rationalist tradition in European thought, especially in the 17th century. He held a lectureship in philosophy in Manchester University from 1923 to 1927, at which time he was named as the first incumbent of the newly-established chair of philosophy at the Hebrew University, Jerusalem. During his tenure of this professorship, Roth served as rector of the university, 1940–43, and as dean of the Faculty of Humanities, 1949–51. In the tensions and internal struggles within the university, Roth was closely allied with Judah L. Magnes; his views on the direction of Palestinian political life were also close to those of Magnes. In 1948 the establishment of an independent Jewish state and the death of Magnes introduced a new era with which Roth was completely out of sympathy. Accordingly he resigned his professorship in 1951 and returned to England. There Roth concerned himself chiefly with studies of Jewish ethics and biblical subjects. He died suddenly, at Wellington, New Zealand, while on a visit to that country.

As an educator, Roth's major contribution was to establish the school of philosophy in the Hebrew University, a task that was shared by such colleagues as Julius Guttmann and Samuel Hugo Bergman. Important to this work was the program of translation of philosophic classics into Hebrew, a program that Roth began. As well as translating, he assumed considerable supervisory and editorial responsibility for the entire series of translations and edited a volume of selections illustrative of post-biblical Jewish ethical and religious thought.

Roth's early preoccupation with 17th-century rationalism, especially as represented by Descartes and Spinoza, remained a central interest of his philosophic studies throughout his later years. In addition, he studied carefully Maimonides' *Guide of the Perplexed* as his guide to the original and systematic philosophy of Judaism toward which he worked during much of his life. Roth's desire was to explore and understand the inner cohesion of theology, ethics, and biblical hermeneutics in Judaism, and thus to be able to interpret Judaism as a unitary system. He approached this synthesizing statement in his last major work, *Judaism, a Portrait* (1960).

Roth was also a publicist of Judaism in the non-Jewish world. He contributed *Jewish Thought as a Factor in Civilization* to the UNESCO series, "The Race Question and Modern Thought" in 1954. He was elected a Fellow of the British Academy. Roth's major works include *Spinoza, Descartes, and Maimonides* (1924, repr. 1963); *The Science of Morals: An Essay in Method* (1928); and *Spinoza* (1929, repr. 1954).

BIBLIOGRAPHY: T.E. Jessop, in: *Proceedings of the British Academy*, 50 (1965), 317–29, incl. bibl.; R.J. Loewe (ed.), *Studies in Rationalism* (1966), 1–11, incl. bibl.; JC (April 5, 1963), 40.

[Joseph L. Blau]

ROTH, MARK (1951–), U.S. bowler, member of Pro Bowlers Association (PBA) Hall of Fame. Roth, a native of Brooklyn who lived most of his life in Wall Township, NJ, joined the PBA

tour in 1970 as a 19-year-old phenom with an unusual, variegated 5-to-11 step approach, and an aggressive hook which stood out in an era of mostly conservative curve-ball throwers. Despite the raw talent, it took Roth five years to tally his first tournament victory. Thereafter Roth enjoyed a remarkable run of 14 years in which he won 34 PBA titles (third best all-time), was named PBA Bowler of the Year four times (1977–79, 1984), and led the PBA in average six times (1976–79, 1981, 1988). Roth's average for the 1979 season of 221.6 was the first time in PBA history that a player had maintained an average above 220. This record stood until 1993, when averages across the league jumped because of improved ball technology. His eight tournament victories in 1978 are a record that most bowling analysts concur is unlikely to ever be broken. He also shares the record for most consecutive tournament victories (3). Roth is one of only three bowlers in PBA history to have managed to place high enough to win a cash prize in every tournament entered for an entire season. And despite having played when cash prizes were approximately a quarter of the value of current tournament prizes, Roth is still one of the top career money-earners of all time, at over \$1.6 million. Roth is considered to be the originator of the fast, sharp hook style which is prevalent throughout the PBA today. He retired from the PBA Tour in 1991, but decided 10 years later to join the Seniors Tour, and promptly won honors as the Senior Rookie of the Year in 2001, and then Senior Player of the Year in 2002, becoming the only bowler in PBA history to win Player of the Year Awards in both the regular and senior circuits. Roth then retired to concentrate on investing and running bowling alleys across the United States. He was Maccabi Union Jewish Athlete of the Year in 1985.

[Robert B. Klein (2nd ed.)]

ROTH, SIR MARTIN (1917–), British psychiatrist. Born in Budapest and educated at the University of London, Roth became professor of psychology at Newcastle University (1956–77) and was subsequently the first professor of psychology at Cambridge University, retiring in 1985. Roth served as the first president of the Royal College of Psychiatrists in 1971–75. His best-known work is probably *The Reality of Mental Illness* (1986), written with Jerome Kroll. Roth also wrote widely on Alzheimer's Disease. He was knighted in 1972.

[William D. Rubinstein (2nd ed.)]

ROTH, PHILIP MILTON (1933–), U.S. novelist. Born in Newark, New Jersey, Roth was educated at Rutgers, Bucknell, and Chicago universities, and taught English at the last from 1955 to 1958. He later took a teaching post in Iowa and was writer-in-residence at Princeton where he specialized in creative writing. He developed his own literary career, publishing stories in various magazines including *The New Yorker*, *Esquire* and *Commentary*. In the latter he published an essay "Writing about Jews" (36 (1963), 446–52). *Goodbye, Columbus* (1959), a collection of short stories, revealed the stylistic influence of F. Scott Fitzgerald and illustrated Roth's bent for a satirical and

incisive portrayal of middle-class American Jews. In his first novel, *Letting Go* (1962), he transferred his attention to Jewish intellectual circles in U.S. universities. Roth's second novel, *When She Was Good* (1967), was not favorably received. It was followed by *Portnoy's Complaint* (1969), a bestseller written in the fashionable vein of "black humor." Here the novelist was brutally satirical in his dissection of the all-devouring Jewish mother. In telling the story of his sexual and other frustrations to his psychoanalyst, the 33-year-old Alexander Portnoy explodes in a cruel, obscene and comic fantasy. As Roth himself predicted, his book aroused a storm of protest in the U.S. but increased his reputation, both at home and abroad.

Roth's fiction also began to develop the character of the novelist Nathan Zuckerman, beginning with *The Ghost Writer* (1979) and continuing with *Zuckerman Unbound* (1981), *Anatomy Lesson* (1983), *Zuckerman Bound* (1985), *The Counterlife* (1987), *American Pastoral* (1997), *I Married A Communist* (1998), and *The Human Stain* (2000).

In the early Zuckerman novels, Nathan is a man of hyperbolic contradictions. He longs for success – but he does not wish to be recognized and hounded by fans once his novels are successful. He behaves as an archetypal good boy to his family, then disobeys his father's orders and publishes fiction which puts his family in a bad light. He craves excitement and he craves quietude; he marries intellectual, stable women and then rejects them because they are intellectual and stable. He pursues sexual adventure, but he bitterly resents critical response to his adventures. He writes ribald novels almost exclusively about Jews and cannot understand why the Jewish establishment reacts to him with vocal outrage.

In *The Counterlife*, Roth finally pulls his protagonist out of "the oepidal swamp" of preoccupation with sex and writing. Within the four parts of the novel, Roth plays with the alternative routes which life-and-art can follow. Areas which Roth has left fallow since the stories in *Goodbye Columbus* are picked up in *The Counterlife*, as Roth explores the meaning of contemporary Jewish experience. He articulates an updated argument between various forms of Diaspora and Israeli Judaism, makes them live and breathe and seem like counter-lives indeed.

In the later novels, Zuckerman attains the repose that only pathos brings. He has witnessed the destruction of those he admires. He has been helpless to prevent the catastrophes that engulf them.

Roth's later writing, specifically *An American Pastoral*, *I Married a Communist*, and *The Human Stain* developed a narrative of Jewish acculturation to and recoil from American ideologies that either offered rationales to or promoted the violent self. Intriguingly, this trilogy is reminiscent of the achievement of 19th-century Russian realism, with its focus on the family endowing an individual with political choice and civic culture. In his extraordinary study of modern American life, Roth examined those who were caught up in, or witnesses to, the collision of American myths and a seeming autonomy. The novels move from anti-communist witch hunts to the

deadly and childish violence of the 1960s to the rhetoric and power of destructive self-righteousness. Roth's trilogy allows the representatives of such movements to have their voice and, tragically, often to have their way. These works present protagonists whose uneasy lives suggest the compromises they have made – and shall have to make – with contemporary notions of justice, politics, and politically correct rhetoric.

These novels also offer a modern reading of American political tragedy. Roth's protagonists choose what they believe to be a life in the American grain – whether through communism, or through the means of a responsible life, or through adopting an identity that offers security. Nonetheless, their confidence in the achieved present is undermined, if not destroyed, by the consequences of the past. Within these novels, characters discover how Jewishness, the lived social inheritance of Judaism, comports with the American present. With his last novel in this series, *The Human Stain*, a meditation upon chosen identities that are central to America's understanding of itself (witness *The Great Gatsby*), Roth suggests that the Jewish intellectual has become a "type," a configuration of personality traits that can be imitated and lived within. Nonetheless, the comic pathos of Jewish neuroses, found for instance in *Portnoy's Complaint*, is transformed into the tragic destiny of yet another "type": the Jew who cannot elude a chosen self.

A study of contemporary America's affirmation of right-wing ideology retrojected into the past, *The Plot Against America* (2004) presents a study in alternative history. Roth painfully describes an America with Charles Lindbergh as president, and antisemitism as an official matter of state. The novel has its immediate ancestry in Sinclair Lewis' *It Can't Happen Here*. Although *The Plot Against America* ends with relief, Roth's warnings of an American fascism in the making add a dark note to American-Jewish existence.

Clearly, Roth is defining himself as a novelist concerned with the notion of a social good and the good itself. His works swell with implications about the chances for dignity, for compassion, and for justice in contemporary America. The early satire, for example, of *Our Gang*, is now replaced by novels that set the terms for an understanding of American political literature.

Roth's reflections on his own life can be found in *The Facts: A Novelist's Autobiography* (1988) and in his study of his father in *Patrimony: A True Story* (1991).

[Milton Henry Hindus and Sylvia Barack Fishman / Lewis Fried (2nd ed.)]

ROTHBERG, SAMUEL (1910–), U.S. business executive and Jewish community leader. Rothberg, who was born in Belezkov (near Kiev), Russia, was director of both the American Distilling Co. and the Parvin Dormeyer Co. Rothberg retired in 1965 so that he could devote more time to Jewish affairs,

in which he had previously been active. He served from 1955 as national campaign chairman of the Israel Bonds Organization (of which he was a founder); a member of the national campaign cabinet of the United Jewish Appeal; chairman of both the board of governors of the Hebrew University and the board of directors of the American Friends of the Hebrew University; vice president of the American Committee for the Weizmann Institute; and an honorary founder of the Harry S. Truman Institute for the Advancement of Peace. Rothberg was president of the Israel Investors Corp. and founder of Capital for Israel Corp. He was also president of Congregation Agudat Achim in his home city of Peoria, Illinois. In 1970 he was elected a non-party member of the executive of the World Zionist Organization and of the Jewish Agency.

In 1975, in honor of his 65th birthday, the Hebrew University established the annual Samuel Rothberg Prize for Jewish Education. At Bradley University in Peoria, the Samuel Rothberg Professional Excellence Award is presented for distinguished contributions to research or creative productions.

In 1981, the Hebrew University's school for pupils from abroad was officially named the Rothberg School for Overseas Students in honor of Rothberg, who was one of the major forces in the establishment and development of the school. In 1998 the name was changed to the Rothberg International School. He was chairman of the school's International Board of Overseers.

ROTHENBERG, MORRIS (1885–1950), U.S. jurist, communal leader and Zionist. Rothenberg, who was born in Dorpat, Estonia, was taken to the U.S. in 1893. He was admitted to the New York bar in 1905. An expert in labor law, Rothenberg served as an arbiter in numerous labor-management disputes. During World War I, he was a member of a federal bread price-fixing commission. In 1937 New York Mayor La Guardia appointed Rothenberg to a ten-year term as city magistrate, and he was reappointed by Mayor O'Dwyer in 1947.

Extremely active in Jewish affairs from his youth, Rothenberg was a founder and executive committee member of the Jewish Welfare Board, a founder of the Joint Distribution Committee, and an executive committee member of the Council for German Jewry. He was also president of the Zionist Organization of America (1932–35). A founder of the Jewish Agency for Palestine (1929), Rothenberg was co-chairman of its international council (1933, 1935).

ROTHENBURG OB DER TAUBER, city in Bavaria, Germany. Individual Jews are mentioned there in 1180. A community is first recorded in 1241, when it paid the small sum of 10 silver marks in taxes. In the mid-13th century *Meir ben Baruch, the acknowledged scholarly authority of his era, settled in Rothenburg, attracting pupils by the score; the town thus became a center of Jewish religious life and the Rothenburg community grew. During the *Rindfleisch persecutions (1298), the community was almost totally annihilated. On June 25, 57 were murdered; on July 18, 32 were massacred and

their corpses burned in the cemetery. The survivors (around 380) fled into the castle and after a three-day siege were slaughtered and burned.

A new community was established after a short time. A source of 1346 mentions an old synagogue, therefore a new synagogue must have been built. In 1323 Emperor Louis III of Bavaria assessed the taxes of the community at 200 Haller pounds; in 1342 he levied one gulden from each Jew in Rothenburg (see **Opferpfennig*) and obliged the city elders to swear that they would freely admit and protect the Jews, his subjects. During the *Black Death persecutions (1349), the community was annihilated, and afterward the burghers celebrated August 27 annually in commemoration of the city's salvation from "poisoning by the Jews." In 1352, *Charles IV pardoned the burghers for the extermination of the community and allowed the city to admit Jews. The new community, established under the protection and jurisdiction of the city, suffered heavily from the annulment of debts in 1385 and 1390. A short and partial banishment was decreed in 1397, caused by inflammatory sermons on Good Friday, but the Jews were readmitted to the town seven years later. The 15th-century community was probably not allowed to keep a cemetery, for no tombstones of this period have survived. In 1414 an onerous imperial tax was exacted from the Jewish community; some members attempted to flee, and all were put under arrest until it was arranged that the tax would be paid by 21 members of the community. The burghers of Rothenburg successfully resisted, in 1422, the bishop of Wuerzburg's demand that they imprison the Jews and expropriate their property, turning over to the bishop the debts they owed to the Jews. The city opposed any attempt to deprive it of its jurisdiction over the Jewish community, and the economic benefits it derived from them, but the bishop seems to have been successful in imposing a distinctive *badge on the Jews. Jews wishing to remain in Rothenburg were obliged to present annual declarations to the city, stating their names, occupations, and willingness to pay taxes and obey the laws; the city reciprocated by granting legal protection to individual Jews.

In the early 16th century expulsions of Jews from cities in southern Germany became common. The Rothenburg community in 1517 requested the protection of Emperor *Maximilian I against Claus Wolgemut, a robber baron who applied pressure on the city to extort money from the Jewish inhabitants or expel them. The expulsion, which took place three years later, was meticulously planned by the city council, which was advised by Caspar Mart, legal counselor of the empire, to exploit the death of Maximilian in 1519 by taking immediate steps. The preacher Johannes Teuschlein (an early exponent of the Reformation) agitated, with the approval of the council, for the expulsion of the Jews as a reformatory, "cleansing" measure. The council employed a lawyer to help the Jews liquidate their businesses; the last six Jews left on Feb. 2, 1520. Requests by the nobility for a stay of expulsion on behalf of their Jewish associates were not heeded. The expelled were obliged to state, in writing, that they had not been forced

to leave and had no outstanding demands. Throughout these proceedings the word "expulsion" was avoided in official correspondence and replaced by *Beurlauben* ("leave of absence," "dismissal"); the illusion that the Jews had left voluntarily was maintained. Attempts by the refugees to return failed. In 1659 Jews were allowed to attend the city's fairs but not to display their wares in public.

A Jewish community was not reestablished until 1875, totaling 86 persons (1.32% of the total population) in 1880. Their number declined from 100 in 1910 to 44 in 1933, when the community possessed a cemetery and *mikveh*. No Jews returned to Rothenburg after World War II. The medieval Jewish wedding hall was rebuilt.

[Henry Wasserman]

ROTHENSTEIN, (William) MICHAEL (1908–1993), British printmaker. The son of Sir William *Rothenstein and brother of Sir John Rothenstein, he was educated at art schools in London and set up a private press outside London, becoming one of Britain's most distinguished printmakers, with a wide international reputation. Rothenstein is noted for the powerful imagery of his designs and for the constant search for new and often brilliant technical effects. He was a regular participant in all important international exhibitions of print-making. During World War II, he produced a famous series of watercolors of endangered sites, *Recording Britain*. He was awarded a Gold Medal for Engraving at the Buenos Aires Biennale. He wrote widely on his craft, particularly in two books, *Frontiers of Printmaking* (1966) and *Relief Printing* (1970). His work is to be found in all major public collections of graphic work, including the Tate Gallery, London, the Museum of Modern Art, New York, and the Library of Congress, Washington. Rothenstein was elected to the Royal Academy in 1984.

[Charles Samuel Spencer]

ROTHENSTEIN, SIR WILLIAM (1872–1945), British painter. Rothenstein was a distinguished English impressionist and an outstanding teacher. Born in Bradford, England, the son of a German-born businessman, Rothenstein was educated at Bradford Grammar School and the Slade School of Art, and then spent a year at a Paris art school, where he met Degas, Pissarro and Whistler. On his return, he spent some time in Oxford, where he produced the series of lithographs, *Oxford Characters* (1893–96). He became a leading personality of the fin de siècle, a friend of Max Beerbohm, Aubrey Beardsley, and Oscar Wilde, and a contributor to the *Yellow Book*.

During World War I, he served as an official war artist and, from 1917 to 1920, held the post of professor of civic art

at the University of Sheffield. He attained his greatest prominence, however, as principal of the Royal College of Art, London (1920–35). During World War II, he was attached to the Royal Air Force as an artist. Rothenstein chiefly painted portraits, still lifes and landscapes. Among his work is a group of Jewish subjects and synagogue interiors, such as *The Talmud School* (1904) and *Carrying the Law* (1909). He wrote a number of books, mostly portraits of eminent contemporaries. His two autobiographical works, *Men and Memories* (1931–32) and *Since Fifty* (1934), offer vivid descriptions of artists and events he knew. He was knighted in 1934. Rothenstein helped many impoverished Jewish artists and other artists in need. Volumes of his correspondence with Max Beerbohm and Rabindrinath Tagore were published in 1972 and 1975.

His son SIR JOHN ROTHENSTEIN (1901–1992), who was educated at Bedales and Oxford, was director of the Tate Gallery, London (1938–64). He had no connection with the Jewish community and converted to Christianity. He wrote three volumes of autobiography, published in 1965–70.

A younger brother of William Rothenstein, ALBERT DANIEL (1881–1953), who changed his name to Rutherford during World War I, was also an artist and illustrator who designed an imaginative *Haggadah* (1930). Another son, Michael *Rothenstein (1908–1993), was a prominent printmaker.

BIBLIOGRAPHY: R. Speaight, William Rothenstein, *The Portrait of an Artist in his Time* (1962). **ADD. BIBLIOGRAPHY:** ODNB online for all three; I. Rogerson, *Albert Rutherford* (1998); M. Rutherford, *Albert Rutherford, 1881–1953* (1988).

[Charles Samuel Spencer]

ROTHKO, MARK (1903–1970), U.S. painter. Born Marcus Rothkowitz in Dvinsk, Russia, Rothko immigrated to the United States in 1913 with his family, settling in Portland, Oregon. He attended Yale University on a scholarship (1921–23), but after two years he moved to New York and briefly studied at the Art Students League, notably with Max *Weber. In 1928 the former yeshivah student was commissioned to draw maps for Rabbi Lewis Browne's book *The Graphic Bible*. Rothko also supported himself by teaching art to children at the Brooklyn Jewish Center, a position he held from 1929 until 1952. He found success early with expressionistic, painterly, representational canvases, shown in his first group exhibition at the Opportunity Galleries (1928) and his first one-man show at the Contemporary Arts Gallery (1933), both in New York. As a member of The Ten, an artist-group that he co-founded in 1935 with Adolph *Gottlieb and *Ben-Zion, and affiliated with for five years, Rothko exhibited imagery stimulated by aspects of mythology, and at times Christian iconography, such as the crucifixion. He worked as a Works Progress Administration artist from 1936 to 1937.

In the early 1940s Rothko fell under the influence of Surrealism, often making images comprised of organic forms. At the end of the decade Rothko painted fully abstract imagery with an oil technique that approximated his watercolor experiments in the mid-1940s. Typical of Rothko's signature

style is *Green and Tangerine on Red* (1956, Phillips Collection, Washington, D.C.), a large canvas consisting of two flat, rectangular shapes of thin color. Filling the canvas, the nearly translucent hues seem to float on the surface of the composition. Rothko exploited this formula with differing color variations, size of colorfields, and application of the paint to convey an array of sensations, ranging from meditative to ominous. By 1961 Rothko was a celebrated artist who enjoyed a retrospective at the Museum of Modern Art in New York City.

Rothko received several public commissions, including the artwork for an octagonal chapel in Houston, Texas. Decorated with 14 canvases in nuanced shades of black and maroon, the Rothko Chapel was dedicated in February 1971, a year after the artist committed suicide.

[Samantha Baskind (2nd ed.)]

ROTHMUELLER, AARON MARKO (1908–1993), baritone and composer. Born in Trnjani, Yugoslavia, Rothmueller studied composition with Alban Berg in Vienna. He sang opera in Europe. He lived in England but after World War II moved to the United States and in 1952 was appointed professor of music at the University of Indiana. His compositions include *Four Sephardic Folksongs*, *Three Palestinian Folksongs*, *Three Palestinian Love Songs*, a setting of Psalm 15, and *In Memory of C.N. Bialik* for violin, viola and cello. He wrote *Die Musik der Juden* (1951; *The Music of the Jews*, 1953).

ROTHSCHILD, family of financiers and philanthropists, patrons of the arts and sciences who greatly contributed to Jewish causes, particularly to the settlement of Erez Israel and the State of Israel. (See charts: Rothschild Family). Over the years their name became a byword for opulence and munificence, serving both as a positive symbol of Jewish wealth, influence, and philanthropy, among the Jewish masses, particularly in Eastern Europe (see, e.g., in *Shalom Aleichem's stories) and as a negative, sinister symbol in antisemitic literature and propaganda, which used it as tangible "proof" for the existence of an international plutocracy.

The Founding Branch

The family name is derived from a red shield which once hung in front of the house of ISAAC ELHANAN (d. 1585), grandson of URI (d. c. 1500), first recorded member of the family, in Frankfurt; though the grandson of Isaac Elhanan left the house, his descendants continued to bear the surname. Until the birth of MAYER AMSCHEL (1744–1812), son of AMSCHEL MOSES ROTHSCCHILD, the Rothschilds were undistinguished merchants and communal servants. Mayer Amschel began trading in antiques and old coins and in money changing and thus in 1764 began doing business with the future Landgrave William IX of Hesse-Kassel, an avid coin collector and heir

to the largest fortune in Europe. By c. 1769 Mayer Amschel had received the title of court agent and was supplying William with rare coins and printing his own coin catalogs. When William became landgrave in 1785, Mayer Amschel was only one of a dozen Jewish court agents competing for the favor of doing business for a landgrave who lent large sums to other rulers. Mayer Amschel managed to increase his share of financial transactions very gradually: his close connections with William IX's confidential financial adviser, C.F. Buderus (who eventually became his silent partner), were of inestimable importance in securing the confidence of the landgrave.

The major breakthrough occurred after the Battle of Jena (1806): exiled from his country, William IX entrusted NATHAN MAYER (1777–1836), Mayer Amschel's son in London, with the purchase of huge amounts of British securities. By discreet and brilliant speculation Nathan succeeded in amassing a fortune without damaging the landgrave's interests. Nathan Mayer had originally settled in Manchester in 1798, a commission agent dealing in cotton goods, but he moved to London in 1808. In 1806 he married Hannah, the daughter of Levi Barent *Cohen and sister of Moses *Montefiore's wife. He rapidly became the outstanding figure on the London Stock Exchange. His prime activity was that of helping the government cover the costs of Wellington's army in Spain, including transporting immense sums even through the heart of France. In this endeavor he was helped by his brother James (see below) in Paris, while the father and the elder son, Amschel Mayer (see below), remained in Frankfurt. Another major cooperative undertaking was transmitting the British bullion subsidy to the continental allies in the last stages of the Napoleonic wars. After the Congress of Vienna the Rothschilds were instrumental in transmitting the French war indemnity (£120,000,000) to the allies and participated in the many governmental reconstruction loans and bond issues. By the time of his death Nathan Rothschild was one of the very richest men in Britain, worth an estimated £5 million, and had become a legendary figure in British finance. In this period two Rothschild brothers established themselves in Vienna and Naples.

Carl Mayer (1788–1855), founded the Italian branch in Naples in 1821, in the aftermath of the suppression of an anti-Bourbon uprising by Austrian troops. He loaned large sums to Sardinia, Sicily, and Naples, the Papal States, and other lesser duchies. His four sons all married members of the Rothschild family. ADOLF CARL (1823–1901) succeeded him as head of the Italian branch but returned to Frankfurt upon the unification of Italy. Another son of Mayer Amschel, SALOMON MAYER (1774–1855), moved to Vienna in 1816, where he was soon on very friendly terms with *Metternich (during the 1848 Revolution he was accused of helping Metternich to escape) and was thus able to ignore or overcome the various discriminations to which Jews were subjected in Vienna and Austria (since a Jew was not allowed to purchase a house, he rented a whole hotel); in addition he had to contend with the rivalry of the established banking houses, foremost of which were the *Arnstein and *Eskeles firms. In 1822 he was ennobled. He was

soon participating in the floating of government bonds. His main achievement was building Austria's first railroad and establishing the Oesterreichische Kreditanstalt, with which his descendants were closely connected and which later became Austria's state bank. Salomon was succeeded by ANSELM SALOMON (1803–1874), who was appointed to the Austrian House of Lords in 1861 and had married a daughter of Nathan Mayer Rothschild of London. He was succeeded by his son SALOMON ALBERT (1844–1911), noted for his philanthropic and artistic interests. His sons, ALPHONSE MAYER (1878–1942) and LOUIS (1882–1955), were forced to witness the decline of the firm in the political and economic upheavals of the post-World War I era. Two days after the *Anschluss*, Louis was arrested and held hostage for a year until he was finally released through a combination of ransom and informal financial pressure exerted by international banks. After his departure the Austrian Rothschild branch was liquidated. The Wittkowitz coal mines in Czechoslovakia, among the largest in Central Europe, were transferred to British and neutral holdings before the Munich agreement. The Nazis were thus unable to confiscate them, but were able to pressure the Rothschilds into selling the mines for one-third of their value. The sale did not go into effect because of the outbreak of World War II, and after the end of the war the Rothschilds were able to receive partial compensation from the Czech government.

Amschel Mayer (1773–1855), continued to head the paternal Frankfurt branch. He loaned large amounts to many German rulers and took steps to have the **Leibzoll* abolished in Bavaria and other German states. Very pious, he furnished the financial backing for the secessionist Orthodox community of S.R. *Hirsch in Frankfurt. The Frankfurt house was attacked during the *Hep! Hep! disturbances, and again during the 1848 Revolution, when anticapitalist, antisemitic, and democratic feelings coalesced against the Rothschilds. Amschel was succeeded by his nephew MAYER CARL (1820–1886) from Naples, who was elected to the North German Reichstag in 1867, and appointed to the Prussian Upper Chamber shortly thereafter, the first of the only two Jews ever to receive the honor. The conservative Mayer Carl had long been pro-Prussian and had recommended Gerson *Bleichroeder to *Bismarck as his private banker. The Bleichroeder bank continued to maintain close connections with the Rothschilds, often serving as their agents in Berlin. Amschel's other nephew, WILHELM KARL (1828–1901), was sole head after his brother's death. After his death the Frankfurt branch was discontinued.

[Henry Wasserman]

The French Branch

JAMES JACOB ROTHSCCHILD (1792–1868), the youngest of the brothers, settled in Paris in 1812 as an agent of Nathan Mayer and founded there the firm of Rothschild Frères. From then on, apart from its banking activities, the Rothschild family took a great interest in the activities of the Jewish community in Paris and later in the whole of France. The Rothschilds were particularly active from 1840 in connection with the *Damas-

cus affair and later in the work of the Jewish *Consistory of Paris, the Central Consistory of the Jews of France, and the Jewish Charity Committee of Paris which later became the Paris Jewish Committee for Social Work. James de Rothschild presented to the community of Paris the Rothschild Hospital, which is still in existence. James, who was financier to both the Bourbon and Orléans kings of France, weathered the 1848 Revolution to serve Napoleon III. A pioneer railroad entrepreneur, he feuded with the rival *Fould and *Pereire brothers for governmental railway concessions. A railway accident released a flood of antisemitic literature, popularizing the slogan "Rothschild Ier, Roi des Juifs." His wife Betty, a noted philanthropist, was friend and patron of Heinrich *Heine. James also maintained close business connections with Leopold I of Belgium. His son ALPHONSE (1827–1905) became head of the French house in 1854 and president of the board of directors of the family's *Chemin de Fer du Nord* in 1869. After the defeat of France in 1870/71 Alphonse led war indemnity negotiations with the Prussians and guaranteed their rapid payment. A syndicate of French bankers, partly motivated by antisemitic sentiments, unsuccessfully sought to challenge the French house in the 1870s. Alphonse's philanthropy, benefiting both Jews and gentiles, was on an immense scale. GUSTAVE (1829–1911), another of James's sons, was president of the Paris Consistory for over 40 years. A third son, Edmond de *Rothschild (1845–1934), gave crucial support to the early settlements in Erez Israel, an expression of his lifelong devotion to Zion and the Jewish people. The son and grandson of Alphonse, EDOUARD (1868–1949) and GUY (b. 1909), and the son and grandson of Gustave, ROBERT PHILIPPE (1880–1946) and ALAIN (1910–1982), were presidents of the Central and Paris Consistories. Alain also became president of the Fonds Social Juif Unifié (FSJU). Guy was president of the Comité de Solidarité avec Israël (1956). Edouard's daughter BETHSABÉE (Batsheva, 1914–1999), founded the *Batsheva Dance Company in Tel Aviv in 1964. In addition to the Batsheva Dance Company, Batsheva de Rothschild founded the Bat-Dor Dance Company, which combines classical ballet and modern dance, in 1967. Among her other endeavors were the project to translate ancient literature into Hebrew, a music library in Tel Aviv, and a fund for loans and grants to students, outstanding young Israeli scholars, and immigrant scholars. She received the Israel Prize in 1989 for special contribution in national and social fields. Edmond's eldest son James de *Rothschild (1878–1957) left France to settle in England, where he continued his father's activities, which were later taken over by Dorothy de Rothschild (1895–1988), the widow of James de Rothschild. EDMOND (1926–1997), grandson of the first Edmond, was also president of the Comité de Solidarité avec Israël (1967). The Germans made efforts to capture members of the family in 1940, but all escaped and passed the war in England or the U.S. Guy joined the Free French and was an adjutant to De Gaulle's military governor of Paris at the end of the war.

[Simon R. Schwarzfuchs]

The English Branch

Nathan Mayer's son, LIONEL NATHAN (1808–1879), led the struggle for Jewish emancipation; after having first been elected to parliament in 1847 (as a Liberal), he finally took his seat as the first Jewish member in 1858 after the passing of the Jews' Disabilities Bill. He remained a member of Parliament (with a short break in 1868–69) until 1874. As head of the banking house at New Court, he was responsible for many government loans, including those for the relief of the Irish famine, the Crimean War, and the purchase of the Khedive's Suez Canal shares. The character of Sidonia in Benjamin Disraeli's *Coningsby* is an idealized portrait of him. His wife CHARLOTTE (1819–1884; daughter of Baron CARL MAYER VON ROTHSCHILD of Naples) collaborated in his philanthropic ventures, being particularly concerned with the Jews' Free School (a special interest of the family). He acquired a great mansion at Tring, Hertfordshire, and was a considerable landowner. He left a personal fortune of £2.7 million at his death. His brother SIR ANTHONY (1810–1876), an English baronet as well as an Austrian baron, lived as a country gentleman (all the Rothschilds of the second generation acquired estates on the Buckinghamshire-Bedfordshire borders) but was also active in the Jewish community: he was the first president of the *United Synagogue. He was granted an English baronetcy (a hereditary knighthood) in 1846. His daughters ANNIE (1844–1926) and CONSTANCE (1843–1931) respectively married (after his death) the Hon. Eliot Yorke and the politician Cyril Flower, later Lord Battersea.

Lionel Nathan's eldest son, NATHANIEL (Natty) MAYER, FIRST BARON ROTHSCHILD (1840–1915), succeeded as head of the firm and effective lay head of Anglo-Jewry, holding the presidency of the United Synagogue and many other offices. Created the first Jewish peer in 1885, he was lord-lieutenant of Buckinghamshire. A governor of the Bank of England and director of many companies, he was the only Jewish member of the Royal Commission on Aliens and firmly resisted attempts to limit immigration. He and his brothers, ALFRED (1842–1918), who was interested in the arts, and LEOPOLD (1845–1917), a sportsman and communal worker, were personal friends of the Prince of Wales, later Edward VII. Their cousin FERDINAND JAMES (1839–1898), of the Viennese branch but born in Paris, married the first Lord Rothschild's sister EVELINA (1839–1866), who died in childbirth and was commemorated by her husband in the Evelina Hospital for Sick Children in London and the Evelina de Rothschild School in Jerusalem. Ferdinand, who became a British subject and a member of parliament, was an art collector and connoisseur and builder of the fabulous Waddesdon Manor. He was the first Rothschild to be visited at his home by Queen Victoria. He was active in communal work, including service as a synagogue warden. While the first Lord Rothschild was not sympathetic to Zionism, though impressed by Theodor Herzl's personality, the second baron, LIONEL WALTER (1868–1937), a distinguished naturalist who owned a private zoo, was a Zionist and the recipient in 1917 of the *Balfour Declaration.

Leopold's sons were LIONEL NATHAN (1882–1942), president of the United Synagogue, and ANTHONY GUSTAV (1887–1961), who was prominent in hospital administration. In the next generation, EDMUND LEOPOLD (1916–), nephew of the second baron, succeeded Anthony Gustav as head of the firm and held high communal office. His cousin Nathaniel Mayer Victor *Rothschild (1910–1990), the third baron, was a distinguished biologist. In 1868 HANNAH ROTHSCCHILD (1851–1890), the daughter of Baron Mayer de Rothschild, married Archibald Primrose, later fifth Earl of Rosebery (1847–1929), a leading Liberal politician who served as Britain's prime minister in 1894–95. The Jewish community was generally highly critical of the marriage of the leading Rothschild heiress to a prominent gentile. Their son, (ALBERT) HARRY MAYER ARCHIBALD PRIMROSE, sixth Earl of Rosebery (1882–1974) was a leading landowner and racehorse owner who served in the 1945 Conservative Cabinet as secretary of state for Scotland.

Between the world wars, the development of other major banking concerns and high taxation reduced the relative importance of the Rothschilds' financial power. So, too, did a series of political events – the loss of such traditional areas of endeavor as Russia (from 1917) and Germany (from 1933) – and changes in the nature of government finance, with individual merchant banks becoming less prominent than previously, as governments increasingly financed their own projects directly. Before and during World War II the Nazis set special value upon expropriating the Rothschilds. The ownership of their property had, however, often been legally transferred in time to holding companies in neutral or noncombatant countries, or secured by other means. After World War II, however, the Rothschilds adapted themselves to the new opportunities in merchant banking, building modern offices at New Court, running unit trusts, acquiring great interests in Canada, and investing in films and television. In America, where few Rothschild investments were made, their agent in the 1840s was August *Belmont, financier and politician. Belmont warned against any recognition of the Confederacy and the Frankfurt Rothschilds were active in the acquisition and sale of Northern bonds.

In charity and philanthropy, the Rothschilds continued to give unostentatiously to many causes, the third baron, for instance, financing educational television in Israel. James de *Rothschild, son of Baron Edmond de Rothschild, settled in England and became a Liberal MP. He inherited Waddesdon from Ferdinand and left the estate to the nation, as well as a fortune to various causes in Israel. However, members of the family have increasingly married non-Jews and their share in the management of the affairs of the British Jewish community has diminished.

ROTHSCHILD, BARON EDMOND JAMES DE (1845–1934), philanthropist, patron of Jewish settlement in Erez Israel, and art collector. Rothschild was born in Paris (see *Rothschild family). In contrast to his two older brothers, Edmond was not given to banking, and from his youth was devoted to humanist and cultural matters, especially art. His art collection, which occupied him throughout his life, brought him fame as an art expert, and he was elected to the Institut des Beaux Arts in Paris. He was close to both Jewish and non-Jewish intellectuals in France. In 1877 he married Adelaide the daughter of Wilhelm Carl Rothschild, who was known for his extreme religiosity and his unwillingness to become involved with matters concerning Erez Israel.

“I have always been concerned with the future of Judaism,” Rothschild wrote in an autobiographical letter dated 1928. He only began public activity in the Jewish sphere, however, after the pogroms in Russia in the 1880s. He was on the French Committee to Aid the Emigration of Refugees and became involved in affairs concerning Erez Israel only after the founding of the first settlements and the first overtures from settlers and members of Hovevei Zion in Europe. It is known that as early as 1873 he was influenced by *La Femme de Claude*, a play by Alexandre Dumas fils, which advocated the return of the Jewish people to the Land of Israel; Dumas reiterated this idea in a letter to Rothschild (published in part by Nahum *Sokolow, without revealing the name of the recipient, in *History of Zionism*, 2 (1919), 263–5). When the first settlements in Erez Israel faced a financial crisis serious enough to endanger their existence, the leaders of *Rishon le-Zion turned to Rothschild, together with Samuel *Mohilewer through the mediation of Chief Rabbi Zadoc *Kahn in Paris. The result of these appeals was Rothschild's support for the settlements Rishon le-Zion and Zikhron Ya'akov and afterward the founding of the settlement Ekron. During 1883–84, the first settlements began to be patronized by Rothschild. Due to his desire to remain anonymous in this venture, he was known by a cover name “Ha-Nadiv ha-Yadu'a” (“the Well-Known Benefactor”), and in Erez Israel and the Hovevei Zion groups this name became better known than his real one. His aid to the first settlements saved them from collapse, as testified to by Peretz *Smolenskin and Moses *Lilienblum at the time.

Rothschild himself later defined his activities as “not merely philanthropy, but something entirely different.” For decades, including the era of Theodor *Herzl’s activity, Rothschild advocated “quiet” settlement work as the basis for a promising future, and only after World War I did he join the political activity of the Zionist Organization (aiding Chaim *Weizmann and Sokolow in particular).

Rothschild’s patronage was of two types: the first was full (Rishon le-Zion, Zikhron Ya’akov, Rosh Pinnah, and Ekron) and the second was partial (Petaḥ Tikvah and others). He became the major address for all problems in the *yishuv*, large and small alike, to such a degree that he became known as the “Father of the *Yishuv*.” All the agricultural experiments carried out in the settlements by French experts were covered by his funds. His support was implemented by a bureaucracy, mostly staffed by Frenchmen whose mentality was alien to that of the settlers. This caused sharp antagonism that even reached the level of revolt in several settlements. This type of bureaucratic patronage was the greatest problem of the Jewish settlements during a 20-year period and aroused sharp criticism. However, in retrospect it is recognized that Rothschild’s bureaucracy also played a positive role. It introduced new plant species into Jewish agriculture and instructed the first settlers in the agriculture of the country.

Rothschild’s first visits to Erez Israel (1887, 1893, 1899) were devoted to tours of the settlements, investigating the rate of development, and demanding self-labor in the settlements, modest living standards, the speaking of Hebrew, and a concern for religious tradition. In addition, lands were purchased on his orders for new agricultural settlement (in the Golan and Hauran, among other places). In the 1890s Rothschild came into conflict with Herzl and with the Ḥovevei Zion in Russia. Herzl read his “Address to the Rothschild Family” to him, but no common denominator could be found between Rothschild’s settlement methods and the notion of a charter, which symbolized Herzl’s political Zionism. The second conflict was with the Russian Ḥovevei Zion, and particularly *Aḥad Ha-Am, over the patronage system. Aḥad Ha-Am denounced this system of settlement in his famous article “*Ha-Yishuv ve-Apotropsav*” (1902). Before the publication of this article, a delegation of Ḥovevei Zion from Russia, including Aḥad Ha-Am, and representatives of the settlements visited Rothschild (May 14, 1901) and demanded that the patronage system cease. The result of these conflicts was the transfer of Rothschild’s settlements to the supervision of the *Jewish Colonization Association (ICA) in 1900, together with a grant of 14,000,000 francs. The transaction covered about 250,000 dunams (62,500 acres) and a network of 12 settlements, most of which, due to Rothschild’s support, were ready to become self-supporting.

Under ICA the settlements expanded, to a large degree with Rothschild’s direct and indirect support. In 1914, during Rothschild’s fourth visit, he expressed satisfaction with his settlement activities, which had also influenced other settlements, especially those of the Zionist Organization. In addition

to his agricultural settlement activity, Rothschild played a major role in the development of the wine industry in Erez Israel (see *Israel, State of: Wine Industry), was a cosponsor of the Palestine Electric Corporation, the founder of smaller industries, and contributed funds to the establishment of the Hebrew University. Against the background of this practical work, Rothschild grew closer to the Zionist Organization after his return from this visit. He told Weizmann, “Without me, the Zionists could have done nothing; but without the Zionists, my work would have been dead” (Ch. Weizmann, *Trial and Error*, p. 165). In turn, Weizmann stated that Rothschild was “far-sighted in his political and national thought.” The road to cooperation between Rothschild and the Zionists was paved during World War I and especially toward its end, with the preparatory work for the *Balfour Declaration. Rothschild softened the objections of the assimilationists in France to the political activity of the Zionist Organization.

Toward the end of World War I, Rothschild’s son James arrived in Erez Israel with the British army and was among the recruiters for the Jewish battalions in the *yishuv*. Rothschild expressed his joy at “seeing his heir carrying on his great work, to which he was completely devoted.” Toward the end of 1923, his work was again reorganized. Rothschild founded the Palestine Jewish Colonization Association (*PICA) headed by his son James, which continued the settlement activity, particularly in Samaria. The first settlement founded in Samaria, Binyamina, bore Rothschild’s Hebrew name (Avraham Binyamin). According to Rothschild’s instructions, the main purpose of PICA was to found new settlements. He visited the country in 1924 and finally in 1925, when he gave a speech in Tel Aviv containing his credo about settlement activity over the decades. He combined economic foundations with cultural, spiritual, and political motivations. Rothschild won the admiration and appreciation of all sectors of the *yishuv* and the Zionist Organization, as expressed in Weizmann’s comment: “In my opinion he was the leading political Zionist of our generation.” David *Ben-Gurion said of him: “Until his appearance in the arena of settlement activity and until this very day [1954], there is no one whose personal role in cultivating and expanding settlement can match with his.”

With the enlargement of the *Jewish Agency (1929), Rothschild was chosen its honorary president, and until his last days he maintained an avid interest in all activities, large and small, in the *yishuv*. Rothschild died in Paris, a year before his wife. He left nearly 500,000 dunams (125,000 acres) and almost 30 settlements in his wake. In 1954 his remains and those of his wife were reinterred in Ramat ha-Nadiv, near Zikhron Ya’akov.

[Getzel Kressel]

ROTHSCHILD, FRIEDRICH SALOMON (Sally; 1899–1995), psychiatrist. Rothschild was born in Giessen near Frankfurt. In 1925 he joined Frieda *Fromm-Reichmann in her psychiatric sanatorium in Heidelberg, where he studied psychoanalysis and was analyzed by Erich *Fromm. From the beginning of his career, Rothschild was concerned with problems of mind-body relations, especially the relation between emotions, perceptions, and thought of man and his central nervous system.

His first paper, written at the age of 23 (published in 1924), was concerned with the dysfunction of the brain in psychotic and neurotic states (“Die primäre Insuffizienz der nervösen Organe”). He became increasingly dissatisfied with contemporary concepts in psychiatry and neurology, as far as their usefulness to problems of mind-body relations were concerned. Under the influence of Ludwig Klages, creator of modern graphology, Rothschild’s study extended to the fields of the science of expression: mime, pantomime, physiognomy and graphology. His book *Symbolik des Hirnbaus* (1935; “The Symbolism of Brain Structure”) is built upon these ideas, and a later work, *Das Zentralnervensystem als Symbol des Erlebens* (1958), related these theories to developments in science such as cybernetics, neurophysiology, and communications theory.

Rothschild went to Palestine in 1936. In 1948 he became associated with Lipman *Halpern in the department of neurology at the Hebrew University. In 1955 he was appointed clinical associate professor of psychiatry.

[Louis Miller]

ROTHSCHILD, JACOB M. (1911–1973), U.S. rabbi and civil rights organizer. Rothschild was born in Pittsburgh, Pennsylvania, and earned his B.A. from the University of Cincinnati in 1932. He was ordained in 1936 at *Hebrew Union College, which also awarded him an honorary D.D. in 1960. His first pulpits were with Temple Emanuel of Davenport, Iowa (1936–67) and Rodef Shalom Congregation in Pittsburgh, Pennsylvania (1937–42). In 1942, he entered the United States Army as a chaplain, spending more than a year in the Pacific theatre and seeing infantry combat with the American Division on Guadalcanal. In 1946, he became rabbi of Hebrew Benevolent Congregation (The Temple) in Atlanta, Georgia, where he served until his death.

Rothschild was a courageous voice, championing civil rights during a turbulent era in the South. He and his family received threats of violence, and a bomb exploded at the Temple in 1958. He remained steadfast and was instrumental in convincing the city of Atlanta to honor Martin Luther King, Jr., when he won the Nobel Peace Prize in 1964. Rothschild was also an interfaith activist who served on the executive board of the National Conference of Christians and Jews, established an Institute for the Christian Clergy, and was a founding member of the Atlanta Community Relations Commission, in addition to serving as vice president of the Greater Atlanta Council on Human Relations (1962–26). In the Jewish

community, Rothschild served terms as president of both the Atlanta Rabbinical Association and the Atlanta Federation for Jewish Social Services (1954–57). In the Reform movement, he served on the executive board of the *Central Conference of American Rabbis (1953–55) and as chairman of the CCAR’s Commission on Justice and Peace (1954–56). Subsequently, he was named to the Board of Governors of Hebrew Union College–Jewish Institute of Religion (1962–64) and to the Board of Trustees of the *Union of American Hebrew Congregations (1966–8). A member of the Advisory Committee of the Religious Action Center of Reform Judaism and of the Advisory Board of the Southeast Region of the Anti-Defamation League, he was honored twice by the ADL, receiving the Citation of Merit Award in 1964 and the Abe Goldstein Human Relations Award in 1968, the same year he was the recipient of Clergyman of the Year Award by the National Conference of Christians and Jews.

[Bezalel Gordon (2nd ed.)]

ROTHSCHILD, JAMES ARMAND DE (1878–1957), British politician, Zionist and philanthropist. Born in Paris, the son of Baron Edmond de *Rothschild, he was taken to England at an early age and became a British subject. Rothschild served with distinction in France during World War I and was then transferred with the rank of major to General *Allenby’s staff in the Middle East. He was sent to Palestine to recruit volunteers for the Palestinian battalion of the *Jewish Legion (the Royal Fusiliers). When the *Zionist Commission arrived in Palestine (1918), he was seconded to it as liaison officer, and from that time on his interest in Palestine never flagged. In 1924 he was appointed president for life of the newly-founded Palestine Jewish Colonization Association (*PICA), which was largely financed by his father. He also took an active interest in other enterprises in Palestine, including the Palestine Electric Corporation, the Hebrew University, and excavations at *Hazor, which he sponsored.

In 1929 Rothschild was elected to Parliament (as Liberal member for the Isle of Ely), and he held this seat until 1945. Although he generally did not take a very active part in parliamentary debates, he participated vigorously in the debates on both the Passfield and MacDonal White Papers (see *White Papers). On both occasions, he attacked British policy, accusing it of failing to fulfill the terms of the Mandate. In a speech on the MacDonal White Paper, Rothschild proposed that Palestine be made into a British colony, claiming that this was the only way to preserve the rights of both Jews and Arabs and prevent domination of one part of the population by the other. His effectiveness as a member of Parliament was probably hampered by the fact that he was a Liberal, the party having only a handful of members in Parliament. After his death, his widow informed the Israeli prime minister of the termination of the work of PICA (which was taken over by the Israel government). At the same time, the sum of 11,600,000 was donated for the construction of a new Knesset building in Jerusalem.

[Israel Philipp]

ROTHSCHILD, KURT (1920–), Canadian businessman and philanthropist. Rothschild was born into a prominent family in Cologne, Germany, where he attended Jewish schools. In 1938 he escaped Nazi Germany to England. In 1940 he became one of thousands of Germans and Austrians rounded up and detained in Britain after the fall of France as Britain feared a German invasion. Rothschild was transferred by ship to Canada, along with more than 2,200 mostly Jewish refugees, where, as an “enemy alien,” he spent more than a year in Canadian internment camps. After his Canadian release, Rothschild attended Queen’s University in Kingston, Ontario. He graduated in 1946 with a degree in electrical engineering.

Rothschild founded and was chairman of the State Group, a large multi-trade, construction and management company. Through its involvement in a number of commercial construction projects, the State Group helped reshape the Toronto, Winnipeg, Calgary and Vancouver skylines. The firm was also a major contractor to the automotive, steel and petrochemical industries.

Rothschild retired from business in 1987 to devote himself entirely to community service in Israel, Canada, the United States, South America, and Central and Eastern Europe. A fervent supporter of Jewish education, Rothschild was active on the Boards of Yeshiva University, Bar-Ilan University, Jerusalem College of Technology, Yeshivat Hakotel, and Toronto’s Eitz Chaim School. He was also an active member of the Canada-Israel Committee and UJA Federation of Toronto. Rothschild’s numerous communal leadership positions include chairman of World Mizrahi, president of Canadian Mizrahi, president of Canadian Zionist Federation, member of the Boards of Jerusalem’s Sha’arei Zedek Hospital and Mount Sinai Hospital of Toronto.

[Paula Draper (2nd ed.)]

ROTHSCHILD, NATHANIEL CHARLES JACOB, FOURTH BARON ROTHSCCHILD (1936–), banker and public figure. Born in London, Jacob Rothschild was educated at Eton and Oxford. He joined the family bank, N.M. Rothschild, in 1964 and by his dynamism revived its fortunes. He left, however, in 1980, after conflict with its head, his cousin Evelyn de Rothschild, over Jacob’s conduct of Rothschild Investment Trust. A series of mergers which he subsequently masterminded led to the creation of the influential financial institution Charterhouse J. Rothschild. From 1971 he was chairman of St. James’s Place Capital (formerly J. Rothschild Holdings plc) and from 1980, chairman of Five Arrows Ltd. His activity in public life focused on culture and the arts. From 1985 to 1991, he was chairman of the board of trustees of the National Gallery and in 1992–98 was chairman of the new

board of trustees of the National Heritage Memorial Fund. In the House of Lords he sat as an independent. In 1992, the year of the opening of the Israeli Supreme Court building, a gift of Yad Hanadiv, the Rothschild family foundation, he was awarded an honorary Ph.D. from the Hebrew University of Jerusalem (1992) and was made an Honorary Fellow of the City of Jerusalem. In the same year he became president of the Institute of Jewish Affairs.

He succeeded his father as fourth Baron Rothschild in 1990. He was closely involved in the redevelopment of Somerset House, London, as an art gallery, and received several honorary degrees.

[David Cesarani]

ROTHSCHILD, NATHANIEL MAYER VICTOR, LORD (1910–1990), British biologist. A fellow of Trinity College, Cambridge (1935–39), he served in military intelligence during World War II and was awarded the George Medal (1944) and the U.S. Legion of Merit (1946). On his return to civilian life, he pursued research in embryology, particularly on the biochemistry and physiology of the egg and sperm cells. Investigating the reactions leading to fertilization in a series of research projects with M.M. Swann (1949–52), Lord Rothschild showed that fertilization brings about changes in the egg surface which protect the egg against the penetration of additional spermatozoa. His book *Fertilization* (1956) described the fertilization process in invertebrates, vertebrates, and plants. His other publications include *A Classification of Living Animals* (1961, 1965²). From 1948 to 1958, Lord Rothschild was chairman of the British Agricultural Research Council and from 1950 he was assistant director of research in the department of zoology of Cambridge. In 1965 he became research coordinator of the Royal Dutch Shell Group. Rothschild served as director-general of the Central Policy Review Staff (“Think-Tank”) of the British Cabinet Office from 1971 to 1974 and as chairman of the Royal Commission on Gambling from 1976. He was elected a fellow of the Royal Society. Keenly interested in Israel, he was appointed a governor of the Weizmann Institute of Science and of the Hebrew University of Jerusalem. He was appointed GBC Knight (Grand Cross of the Order of the British Empire) in 1975. His autobiography *Meditations of a Broomstick* was published in 1977.

See *Rothschild family.

[Mordecai L. Gabriel and Henry Wasserman]

ROTHSCHILD, ROBERT PHINEAS (1914–2000), Canadian soldier. Rothschild was born in the small town of Cochrane, Ontario. He received his secondary education in Montreal before entering the Royal Military College of Canada in Kingston in 1932. Fellow students nicknamed him “the baron” though he was unrelated to the European Rothschilds; he graduated in 1936, then earned a degree at McGill University in mining engineering. In 1938, with war threatening in Europe, he joined the Royal Canadian Horse Artillery as a lieutenant. In June 1940, Rothschild landed in France as part

of the First Canadian division and helped cover the British retreat at Dunkirk. He was one of the last Canadian soldiers evacuated from France to Britain five days later. He underwent further training and was promoted to major with the 5th Canadian Armoured division. He landed with the Canadian forces on D-Day, June 6, 1944, and, engaging in heavy fighting, was wounded in action in late July 1944. He returned to the fighting three weeks later, promoted to lieutenant colonel, and participated in the Canadian offensives in northern Europe. Believed to be the highest-ranking Jew in the Canadian Army at the end of World War II, he was twice mentioned in dispatches and was made a Member of the Order of the British Empire; he also was made an Officer of the Order of Orange-Nassau with swords by the Dutch government in 1945.

After the war, Rothschild was appointed director of the Canadian Army Staff College in Kingston, then successfully moved through a series of major staff positions at Canadian military headquarters in Ottawa including quartermaster general of the Canadian Army. He also held several overseas postings. In 1954, he was promoted to the rank of brigadier and later to major general, the first Jewish general in the Canadian Army. He retired from the Army in 1970.

[Gerald Tulchinsky (2nd ed.)]

ROTHSCHILD, WALTER N. (1892–1960), U.S. department-store executive. Rothschild was born in New York City. He began working with his grandfather Abraham *Abraham, a founder of the Brooklyn department store Abraham and Straus. After serving in the Naval Reserve during World War I, he was made general manager of the department store (1925), and under his leadership the store expanded into one of the largest in sales in the city. In 1929 the store came under the holding company Federated Department Stores, Inc., along with *Lazarus of Columbus, Ohio, and Filene's of Boston. Remaining active in the management of Federated and of Abraham and Straus, Rothschild became president of that store in 1937, then chairman (1955), and at his death he was also chairman of Federated Department Stores.

During World War II, Rothschild served as chairman of the Army-Navy Commission of the National Jewish Welfare Board, overseeing activities in England for a time; he was also on the executive commission of the United Service Organization. He served as trustee of the Federation of Jewish Philanthropies, on the executive commission of the American Jewish Committee, and as trustee for several other organizations.

His son WALTER N. ROTHSCCHILD JR. (1920–2003) graduated from Harvard in 1942 with a B.A. before enlisting in the U.S. Army in World War II. He served as an army officer in Europe in 1942–46. He joined Abraham and Straus in 1950 and rose to be president (1963–69); in the year he stepped down from that position to pursue a civic career, the store was accounted the third largest in New York City, with annual sales estimated at \$250 million. During his presidency at A&S, Rothschild was active as liaison agent between the store and the Brooklyn community, in work for a cleaner urban envi-

ronment, and in improving the quality of merchandise provided by manufacturers.

He served as trustee of the Federation of Jewish Philanthropies and on several hospital boards, and was a member of the Second Regional Planning Commission. In 1970 he was appointed New York chairman of the Urban Coalition, the national agency devoted to improving urban life (1970–73). He then served as chairman of the National Urban Coalition (1973–77). Rothschild's longstanding interest in providing vocational opportunities for minorities in America was instrumental in the creation of the Ventures Scholars Program, a national nonprofit program designed to promote access to higher learning for young adults interested in pursuing math- and science-based careers.

ROTH-SHACHAMOROV, ESTHER (1952–), Israeli track and field star. Roth was born in Tel Aviv and became the first Israeli athlete to reach an Olympic final. By the ninth grade she had already broken the Israeli hurdles record. At the 1970 Asian Games she won gold medals in the 100m hurdles and pentathlon and silver in the long jump. In 1971 she was sports-woman of the year in Israel and Asia. In 1972 she took part in the Olympic Games in Munich. After she reached the 100m semifinals, her coach, Amitzur Shapira, predicted she would win a medal, but the dream was shattered when he and another 10 Israeli sportsmen were kidnapped and murdered by Palestinian terrorists. Recovering from the tragedy she returned to competition a year later, winning three gold medals at the Ninth Maccabiah Games in 1973 though three months pregnant. Though recovering from a Caesarian delivery she won three more gold medals at the 1974 Asian Games, this time in the 200m dash, the 100m hurdles, and the 100m sprint. In 1976, at the Montreal Olympics, she reached the finals in the 100m hurdles, finishing sixth. This was her last major competition, as Israel was expelled from the Asian Federation for political reasons and then joined the boycott of the 1980 Moscow Olympics. Retiring officially in 1980, she became a track and field coach. In 1999 she was awarded the Israel Prize for her contribution to sports.

[Shaked Gilboa (2nd ed.)]

ROTHSTEIN, ARNOLD ("A.R.," "The Brain," "The Fixer"; 1882–1928), U.S. gangster and criminal mastermind, credited with developing the "numbers" racket, centralizing illegal racetrack bookmaking, fixing the 1919 baseball World Series, and developing 20th-century U.S. organized crime during the Prohibition Era. Rothstein was the second of five children born in Manhattan to Esther and Abraham. Abraham, known as "Abe the Just," was a board member of a major Jewish hospital, and was often asked to mediate community and business disputes. Rothstein was jealous of older brother Harry – a pious young man who wanted to become a rabbi – and rejected Jewish tradition in opposition to him. Rothstein began gambling, shooting pool, and lending money illegally at usurious interest rates ("loan-sharking") in his teens. When Rothstein

married a Catholic showgirl in Saratoga, New York, his father sat *shiva* for him, and later forbade him to go to synagogue with his brothers to pray for their dying mother. Nonetheless, Rothstein was aware of his Jewishness, used it during his criminal career, and was buried in a Jewish cemetery. Rothstein was heavily involved as a financier or organizer of virtually every U.S. major criminal activity of the early 20th century: gambling, stock market swindles, “rum running” during Prohibition, and illegal drugs. He was a liaison between the crooked Tammany Hall organization that controlled New York City politics for more than a generation and the criminal community. He was a partner of the first generation of U.S. Jewish gangsters, including Irving Wexler (Waxey Gordon), and mentored a generation of future gangsters, including Meyer *Lansky, Charles Lucania (Lucky Luciano), and Louis (Lepke) *Buchalter. Rothstein was involved in but never convicted of fixing the results of the 1919 World Series, as was his alleged bag man, Abe *Attell. Rothstein died of a gunshot wound in 1928 in a shooting that may have been motivated by an unpaid gambling debt but has never been fully explained, and no one was ever convicted for the murder. Rothstein was the inspiration for Meyer Wolfsheim in *The Great Gatsby* and Nathan Detroit in *Guis and Dolls*.

[Alan D. Abbey (2nd ed.)]

ROTHSTEIN, IRMA (1906–1971), U.S. sculptor. Rothstein was born in Rostov, Russia, lived in Vienna, and immigrated to the United States in 1938. Her media included wood, cast stone, terracotta, and bronze. Her sculptures often featured expressive heads and torsos of women. Rothstein’s style varied, from references to ancient Greek and Roman sculpture, to a compact, muscular terracotta of a sleeping nude evocative of Gauguin, to a bronze with an exaggerated, elongated neck and slightly tilted head, her haughty stare rendered with an Expressionist economy of means. Her well-known busts include George Bernard Shaw, Ernest Hemingway, and the conductor Dimitri Mitropoulos. She exhibited in New York art galleries, including the Galerie St. Etienne, as well as the American Artists Professional League, the Metropolitan Museum of Art, the Museum of Modern Art, the New School for Social Research, and the Pennsylvania Academy of Art. She belonged to the American Artists Professional League and the National Association of Women Artists. Her work is in the collections of the Beinecke Library, Yale University, the George Walter Smith Museum, Springfield, Massachusetts, and the Newark Museum, New Jersey, among other institutions.

[Nancy Buchwald (2nd ed.)]

ROTTEMBOURG, HENRI (1769–1836), French army officer. Born in Phalsbourg, Moselle, Rottembourg enlisted in the French army in 1784 and fought against Austria from 1792 to 1797. Rottembourg became an officer in Napoleon’s Imperial Guard, and fought in Prussia and Poland. He was wounded at the battle of Wagram (1809) but later recovered to serve in Spain and was promoted to major general. He later became

inspector general of infantry. After the fall of Napoleon in 1815, Rottembourg was appointed president of the Committee for Infantry by the Bourbon regime. He received numerous honors from both the Napoleonic and Bourbon governments and his name is engraved on the north side of the Arc de Triomphe in Paris.

ROTTOVÁ (Mirovská), INNA (1935–), Czech writer, publicist, and translator. Born in Leningrad (St. Petersburg), U.S.S.R., into a Polish-Czech-Jewish family, she grew up in the Soviet Union (she experienced the siege of Leningrad), where she completed her studies in engineering, although her main interest was music. She married a Czech, studied the Czech language in Prague, and began to write in 1974. She published many stories in numerous literary magazines. After 1989 at least 25 books, collections of stories, short stories, and non-fiction sketches appeared, some of them as detective stories. There are many Jewish themes, characters, and topics in her works, especially in the documentary report *A jiný glóbus nemáte?* (“Don’t You Have Another Globe?” 1998) or in *Utajená svatba* (“A Secret Wedding,” 2000) and *Tajemný cizinec a jiné židovské pověsti* (1999; French, *Legendes juives*, 1999; German, *Juedische Legenden*, 1999). She was awarded the František Langer Prize and the Society of Agatha Christie Prize. Rottová lived in Prague.

[Milos Pojar (2nd ed.)]

ROUDNICE NAD LABEM (Ger. **Raudnitz an der Elbe**), town in N. Central Bohemia, Czech Republic. The pogrom of 1541 is the earliest record of Jewish settlement in Roudnice. Twenty-three families lived there in 1570; 14 families in 1592. In 1595 the Jews were granted a charter and owned 16 houses. Thus the town belonged to the four oldest Jewish communities in Bohemia, known as Carvin. In 1610 both the houses and the cemetery had to be abandoned to make way for a monastery that was built there. (Tombstones from the cemetery dated 1610 still existed in 1970.) In 1631, 25 families (90 people) lived in Roudnice. That year, the Jewish community saved the town from being destroyed by the Saxons by paying a large sum of money. Nevertheless, the Saxon army burned down the ghetto. In 1651, there were 218 Jews living in 23 houses. One-third of the Jewish population died during the 1713 plague; but the following year’s record stated that 100 Jewish families lived in the town. Yet four years later, another record noted 51 houses. In connection with the expulsion of the Prague community (1744), Roudnice was the scene of the murder of a number of Jews. The eastern part of the ghetto was abolished in 1727–28. Only 45 houses are recorded in 1785 and 63 in 1840. Until 1872 Roudnice was the seat of the district rabbinat. A new synagogue was built in 1853, and the third cemetery was established in 1896. It was closed down in 1885. In the mid-19th century, 176 families lived in the city. In 1893 the community numbered 79 families, according to one source;

according to another, in 1902 the community numbered 448 in 17 localities. In 1910 there were 320 Jews in Roudnice (3.5% of the total population); in 1921 there were 194 (2.2%); and in 1930, 166 (1.7%). When the community was liquidated by the Nazis in 1942, the contents of the synagogue were sent to the Central Jewish Museum in Prague (see *Museums). No congregation was reestablished after World War II. Richard *Feder served as rabbi of Roudnice. In 1953 the 17th-century synagogue was converted into a boarding house.

[Jan Herman / Yeshayahu Jelinek (2nd ed.)]

ROUEN, former capital of Normandy, capital of the department of Seine-Maritime, northern France. The presence of Jews in Rouen goes back to at least the early 11th century. Under Richard, duke of Normandy, Rouen Jewry suffered from the persecutions that affected the Jews of France in general beginning in 1007 or 1009. A notable of the town, Jacob b. Jekuthiel, interceded with Pope John XVIII, who called for a cessation of the persecutions throughout France. With the exception of Metz, Rouen was the only locality in what is today France where several Jews were put to death and others forced to accept baptism at the time of the First Crusade. At that time, Rouen, like the rest of Normandy, was under the dominion of the English crown. It was probably to these Jews that the English king William II (*Rufus*) granted the legal right to practice their faith. Archaeological discoveries in the 1970s and the study of manuscripts have revealed that, owing to the wrong identification of places mentioned in these manuscripts, many of them relating to Rouen (the capital of Normandy in the Middle Ages) were ascribed to other cities. The ancient Latin name Rothomagus was shortened in the Middle Ages to Rothoma or Rodom and the latter name was then variously transcribed as רודום and רודום; those names were thereafter often wrongly copied as דרום (“south”), רודם, and דרוס. As a result, many documents and scholars belonging to Rouen were associated with such places as Rhodéz in Languedoc and *Dreux, southwest of Paris. Thus, for example, Solomon b. Judah “the Saint” mentioned in the first edition of the *Judaica* as being at Dreux was actually of Rouen. As a result, Rouen is now known to have been the seat of a much more important Jewish community than was previously assumed. During the 12th century, the Jews of Rouen were placed under the authority of a local bailiff rather than under the commissioner of the Jews of Normandy, who may have been *Peter of Cluny mentioned in a number of documents as the “Jewish king of Rouen.” A number of Jews from London owned houses in the Jewish quarter of Rouen, while some Jews of Rouen had debtors in England. Nevertheless,

Rouen’s Jews were engaged in moneylending to a lesser extent than the Jews of England. The Jewish quarter, the “Rue as Gyeus,” became the modern Rue des Juifs. One house at the beginning of the street is said to have served as a synagogue and another as the school. The cemetery, situated outside the town, was referred to as Mont-aux-Juifs.

Rouen’s return to French sovereignty in the 12th century appears to have been followed by a decline in the Jewish community, as evidenced by its modest contribution to the poll tax levied on the Jews of Normandy. A new and even smaller community was reestablished in Rouen after 1359. (Its existence is confirmed at the latest in about 1380.) After the “final” expulsion of Jews from France in 1394, there were no Jews in the city until the arrival of some *Marranos at the close of the 16th century. The fate of the community remained uncertain throughout the 17th and 18th centuries. In 1605, 40 *Marrano Jews were living in Rouen, but by 1609 they had dispersed. A few years later a new wave of Marranos followed them. In the new community the family of Gonçalo Pinto Delgado (father of the poet João Pinto *Delgado) played a principal role. In addition to merchants, the community also included several physicians. Although outwardly practicing Christian observances, the Jewish community of Rouen owned its own cemetery. From 1632, however, the so-called “Portuguese merchants” were accused of “Judaizing.” In spite of several severe judgments against them, other Marranos continued to arrive in Rouen. In 1648 alone 20 new families settled in the city. Few Jews arriving in Rouen in the 17th century remained there, however. Those who came at the beginning of the 17th century eventually emigrated to Amsterdam, Antwerp, and Hamburg; while those arriving in the second half of the century left to join the new Jewish community in London. By the early 18th century the Marrano community had all but disappeared. In its place, a new Jewish community was established in mid-century, composed almost entirely of Alsatian Jews, who owned a cemetery from at least 1786. Another community was formed immediately after the French Revolution.

[Bernhard Blumenkranz and Norman Golb / David Weinberg (2nd ed.)]

The Rouen synagogue, destroyed during the bombardment in 1940, was rebuilt by the small community in 1950. The community grew to 500 members in 1960 and, after the influx of Jews from North Africa, numbered around 1,000 in 1971. In 1987, it was estimated that there were 1,200 Jews in the city. Rouen is the seat of a rabbinate.

ROUFFACH (Ger. **Rufach**), town in the Haut-Rhin department, E. France. The earliest indication of the presence of Jews in Rouffach dates from 1288. Accused by the townsmen of having expressed support for Emperor Adolf of Nassau, against whom they were at war, the Jews were massacred at the beginning of 1298. By 1308 Jews were again living in the town. Many lost their lives in the *Armleder persecutions of 1338. Having returned to the town at the latest in 1340, they were all massacred at the time of the *Black Death (1349). Since then, there has been neither a Jewish community nor even individual Jews in Rouffach. The *Judenhof* ("Jewish courtyard") mentioned in 1338 possibly refers to the area of the synagogue, which was built in about 1300 and was still in existence in 1970, after having been rediscovered in 1905. The former Judengasse (Jewish Street) is now known as the Hassengasse.

[Bernhard Blumenkranz]

ROULEAU, ERIC (**Elie Rafoul**; 1926–), journalist and diplomat. Rouleau was born in Cairo. From 1953 to 1960 he was an editor for the Middle East service of the Agence France Presse and from 1956 a reporter for *Le Monde*, writing a column on the Near and Middle East from 1960. In the 1970s he spent some time in the United States; in 1974 he was a research associate at the University of California and in 1978–79 a research associate for the Council of Foreign Affairs in New York and a lecturer at Princeton University. In 1983 he became an adviser to the Television Française 1.

Rouleau is a noted journalist whose recognized expertise is in the areas of the Arab world and Middle Eastern subjects. He has links to excellent sources in Arab countries, particularly in the radical ones. During the course of his career he has interviewed almost all leaders in the Middle East since the 1950s. In 1985 French president Mitterrand appointed him ambassador to Tunisia, but he was forced to resign after a little over a year's service because of opposition to him by the Tunisian government, which considered him to be associated with the opposition and the PLO. In 1988–92 he was ambassador to Turkey and from 1994 Middle East correspondent of *Le Monde*. He published: *Le Troisième combat* (1967), in collaboration with J. Lacouture and O.F. Held, *Biographie de Kurt Waldheim* (1977), *Entretien avec Abu Iyad* (1979), and *Etude sur les Palestiniens* (1984).

[Gideon Kouts]

°**ROUSSEAU, JEAN JACQUES** (1712–1778), French author and philosopher, born in Geneva. The international influence

that Rousseau exerted on his contemporaries and on posterity was unequaled in European history until the impact of Karl Marx a century later.

The political ideas of Jean Jacques Rousseau have contributed in large measure to the emancipation of the Jews, at first in France and later in other Western European countries. His educational theories had a direct effect on the *Haskalah movement which developed in Jewish circles during the following century. Rousseau not only demanded equal civic rights for the Jews; he also, uniquely among French writers of the Enlightenment, expressed the hope that they would be restored to a country of their own: "I do not think I have ever heard the arguments of the Jews as to why they should not have a free state, schools, and universities where they can speak and argue without danger. Then alone can we know what they have to say" (*Emile*, Book 4, tr. B. Foxely (1911; repr. 1966), 268). In a page unpublished in his lifetime, Rousseau expressed his admiration for the national qualities of the "eternal people":

"The Jews present us with an outstanding spectacle: the laws of Numa, Lycurgus, and Solon are dead; the far more ancient ones of Moses are still alive. Athens, Sparta, and Rome have perished and all their people have vanished from the earth; though destroyed, Zion has not lost her children. They mingle with all nations but are never lost among them; they no longer have leaders, yet they are still a nation; they no longer have a country and yet they are still citizens..."

[Leon Poliakov]

ROUSSILLON, region and former province in S. France, corresponding to the present department of Pyrénées-Orientales. In 1172 the county of Roussillon passed to the kings of Aragon and did not become a French possession again until 1642. Names of places such as the Iudegas quarter (territory of Clayra, township of Rivesaltes) or a Villa Iudaicas (near Sainte-Hippolyte), whose existence is confirmed from the 11th century, indicate that there were at that time some Jews in Roussillon. The first documentary evidence of the presence of Jews there, however, dates only from 1185 and concerns a Jew in *Perpignan. Jews lived in Elne, Collioure, Arles-sur-Tech, Banyuls-sur-Mer, Thuir, Céret, Salces, Ille-sur-Tet, Prades, Millas, and *Villefranche-de-Conflent. In 1243 a Jewish quarter, the Call, was set aside in Perpignan, and from 1251 Jews were compelled to live there. The communities of Thuir, Ille, and Céret (perhaps others too) had their own cemeteries, like **aljama* of Perpignan. In 1276 the county of Roussillon was awarded to the king of Majorca, who exercised his authority over the Jews of Roussillon through the intermediary of the count. Subsequently the royal procurator was responsible for civil and criminal jurisdiction over the Jews of Roussillon. Until 1314, when the wearing of the *badge was imposed, the Jews wore a cape as a distinctive garment. Pedro IV of Aragon, who annexed the kingdom of Majorca (1344), authorized the

Jews of Roussillon to travel to France for business purposes. In addition to engaging in such occupations as commerce (including peddling) and moneylending, Jews of Roussillon worked as bookbinders, tailors, goldsmiths, and especially as dyers. The anti-Jewish persecutions of 1391 in Spain reached the Jews of Roussillon in 1392. There was a similar delay of one year a century later at the time of the expulsion from Spain (1492), when a number of Jews from there sought refuge in Roussillon, only to be expelled in 1493, along with the Jews of Roussillon.

[Bernhard Blumenkranz]

Cultural History

The Jews of Roussillon produced scholars who distinguished themselves through their mastery of many different branches of learning, both secular and Jewish. Most notable were the Jewish physicians who served in the towns and villages of the province, such as Bernard de Jorena in Perpignan in 1226, Solomon Moses de Villemanya in Elne in 1327, and Jacob de Guanges in Elne in 1380. Jacob Bonjuhes functioned in a similar capacity in Ille in 1407 and Thuir in 1410. Many Jews of Roussillon studied science and medicine at the University of Montpellier in the 14th century, a period when Perpignan flourished as a center of learning. There was much literary interest as well; poets included Jehoseph *Ezobi and *Phinehas b. Joseph ha-Levi. The study of Bible flourished; an intense polemic developed at the beginning of the 14th century between the partisans and opponents of the study of philosophy. At the center of the controversy was Levi b. Abraham of Villefranche-de-Conflent, probably the grandfather of *Levi b. Gershom, who brought down upon himself the ire of the Orthodox of his time, including Solomon b. Abraham *Adret, for his support of philosophic studies; he also studied astronomy. By the end of the 14th century, Perpignan had become a center for the study of astronomy. Rabbinic studies also were not lacking. The most prominent scholars of Roussillon were Menahem b. Solomon *Meiri (1249–1306), Abraham b. Isaac *Bedersi, and Isaac b. Judah de Lattes. Prominent in an earlier generation was Abraham b. David de Roussillon, Meiri's grandfather. Among the Hebrew manuscripts at the University of Bologna is a *maḥzor* with glosses by a R. Judah Roussillon (REJ, 120, 124). Jews continued to pursue their intellectual and cultural interests until their expulsion in 1493.

ROUTTENBERG, MAX JONAH (1909–1987), U.S. Conservative rabbi and organizational executive. Routtenberg was born in Montreal, Quebec, and received a B.S. from New York University in 1930. In 1932, he was ordained at the *Jewish Theological Seminary, where he earned a D.H.L. in 1949. He became rabbi of Keshet Zion Synagogue in Reading, Pennsylvania (1932–48), where he created an educational center that helped establish Conservative Judaism in eastern Pennsylvania.

He took a leave of absence during World War II to serve as a senior chaplain in the U.S. Army in Europe.

In 1949, Routtenberg was appointed executive vice president of the *Rabbinical Assembly, where he worked to fill the growing demand for pulpit rabbis. From 1951 to 1954, he served as executive vice president of the Jewish Theological Seminary, as well as dean of the Cantors Institute and the Seminary College of Jewish Music. He also lectured on synagogue administration at the JTS Teachers Institute (1950–52). In 1954, Routtenberg returned to the congregational rabbinate to serve Temple B'nai Sholom of Rockville Center, Long Island, where he remained until his retirement in 1972. At the same time, he was appointed chairman of the National Academy of Adult Jewish Studies (1955–60). Under his leadership, B'nai Sholom became a model synagogue center, complete with its own Institute of Adult Jewish Studies, Women's Institute, Judaica library and Lecture Forum.

In 1964, Routtenberg was elected president of the Rabbinical Assembly and led the Conservative movement's rabbinical association into the *Conference of Presidents of Major Jewish Organizations. Following his term of office (1964–66), he chaired the RA's Committee on Chaplaincy during the turbulent years of the Vietnam War, when JTS students voted to reject the system of compulsory procurement of chaplains for the U.S. armed forces. In 1970, he was tapped to chair the Special Committee on Revitalization of the Law Committee, established in the wake of the resignation of most of the committee's members. Subsequently, he chaired the RA's Publications Committee (1972–82), the committee that revised the Rabbinical Assembly constitution in 1977 and the Liturgical Committee as it oversaw the issuance of a new *siddur* for Sabbath and Festivals, as well as Conservative Judaism's amended *ketubbah*. He was also program director for two television programs that depicted Judaism to the outside world: *The Eternal Light*, produced by the JTS for NBC, and ABC TV's *Directions*.

He also served on the Commission on the Jewish Chaplaincy of the *National Jewish Welfare Board, the Delegates Council of the *Synagogue Council of America, and the Internal Affairs Commission of the New York Board of Rabbis. Routtenberg wrote *Seedtime and Harvest* (1969), *Decades of Decision* (1973), and *One in a Minyan and Other Stories* (1977), a collection of short stories. His final work, undertaken with Max Gelb, was the English translation of Abraham Joshua Heschel's *Torah Min ha-Shamayim be-Aspeklyarya shel ha-Dorot* (*Heavenly Torah As Refracted Through the Generation*) and was completed by Gordon Tucker and published in 2004.

[Bezalel Gordon (2nd ed.)]

ROVIGO, capital of Rovigo province, N. Italy, Veneto, and of Polesine, agricultural district coextensive with the province. The presence of Jews in Rovigo from the latter part of the 13th century is attested in the municipal statutes (1227–1429) against “fornicatione inter Judaeum et Christianam.” Their numbers increased as the local agricultural economy developed commercial and industrial activity. In 1386 a group of

Jews are mentioned at Lendinara, who were placed in charge of collecting the municipal taxes. The Rovigo municipality invited Salomon, son of Musetto of Judaea, and the brothers Alvio and Emanuele, sons of Musetto of Bologna to open a loan bank in the town in 1391 with the authorization of the Este, the Dukes of Ferrara. A Jew named Consiglio, possibly an ancestor of the prominent Consiglio family of Rovigo, is mentioned at Badia Polesine in 1425.

The position of the Jews did not change after Rovigo was annexed by Venice in 1484. The loan bank at Rovigo became the property of the Consiglio family with which the Venetian republic renewed the contract every five years. Other members of the community, who had at first been largely connected with the loan bank, later engaged in other activities. The bank, however, retained its supremacy in both the economic and communal spheres of community life. Even when in 1508 the first *Monte di Pietà' was opened, the banking activities continued. A celebrated controversy arose in Rovigo in 1594 in connection with the local *mikveh*. The rabbi was then Avtaylor Consiglio. In 1594 Jekuthiel Consiglio built a *mikveh* in his house the ritual validity of which was questioned. The problem was submitted to various rabbis both in Italy and abroad, entire volumes being devoted to their discussions. Officially, the Jews were restricted to dealing in secondhand clothing. A report by the mayor to the Venetian senate in 1572 indicates the impoverished state of the local Jews which had also led to a split in the community; the rich members were anxious to monopolize the leadership while the poor members wanted a representative system irrespective of economic status.

Orders to set up a ghetto in Rovigo were issued in 1612, and implemented in 1615, only the loan bankers and their families being permitted to reside outside it. There were 17 Jewish families living in Rovigo in 1617. The destruction of a synagogue was ordered in 1629 because it was situated in the vicinity of a church.

In the 18th century the Jews played an important part in developing the wool industry in the Polesine region. At least three Jewish firms were engaged in this industry in Rovigo in the middle of the 18th century, owned by Moise' Luzzatto, Marco Consigli, and Moise' D'Ancona. Frequent attempts to oust them were made by Christian competitors, mainly from Padua. There were about 230 Jewish residents in 1785. The congregation celebrated a local Purim (Purim Katan), or Purim of the Fire, in memory of escape from fire in the 18th century and a fast to commemorate the desecration of the synagogue and pillaging of Jewish houses by hooligans in 1809.

With the French occupation in 1797, the Jews received equal civil rights. However, under French and Austrian rule the economic situation throughout the Polesine was poor. The Jewish population of Rovigo increased in 1823, when Jews immigrated to Rovigo from the Papal States, after Leo XIII's new restrictions. Reactionary tendencies persisted and in 1857 a *blood libel charge was brought against a Jew, Calimano Ravenna at Badia Polesine. Rovigo Jews took an important part in the Italian Risorgimento's wars. From 1848

to 1849 six Jews volunteered. In 1859 22 Jews volunteered to serve in the Piedmontese Army, the largest number from all the Italian communities, including the Kingdom of Sardinia! Giacomo Levi Civita fought with Garibaldi in 1866, and later he was appointed senator in the Italian Parliament. The Jewish population reached its peak in 1870, when 430 Jews lived in Rovigo. Around 450 Jews lived in Rovigo and Polesine together in 1886. The community had four charitable associations: Gemilut Ḥasadim, Shomer la-Boker, Malbish Arumim, and Le-Hasi Betulah.

By 1930, the numbers had dwindled to 100 and it was amalgamated with the *Padua community. The same year, in a rebuilding project for the town center, work was begun on demolition of the ghetto and the synagogue, which had been restored in 1858. The Ark, the floors, and marble were used for a new synagogue. With the German occupation in 1943, most of the members of the Jewish community managed to find safe haven; however two community members were deported.

[Alfredo Mordechai Rabello / Samuele Rocca (2nd ed.)]

ROVIGO, ABRAHAM BEN MICHAEL (c. 1650–1713), Italian kabbalist and Shabbatean. Born in Modena, Rovigo studied in Venice, where he became one of the leading pupils of Moses *Zacuto in Kabbalah and formed a lifelong close friendship with *Benjamin b. Eliezer ha-Kohen Vitale, who shared his inclinations and convictions. Since he belonged to a wealthy family, Rovigo was able to devote himself exclusively to his studies; he became widely known as a supporter of pious enterprises and later also of Shabbatean activities. As a young man, he was swept up in the wave of messianic enthusiasm and retained his belief in the messianic mission of *Shabbetai Zevi for many decades, probably until his death. Becoming one of the main supporters of the moderate wing of Shabbateanism, he gathered around him many secret followers of the movement who used to visit him when they were in Italy. Thus he invited to Modena Issacher Behr *Perlhefter and *Mordecai (Mokhi'ah) ben Ḥayyim (between 1677 and 1682) and Mordecai Ashkenazi (1695–1702). He corresponded with many of the movement's leaders, beginning as early as 1675 with an enthusiastic letter to *Nathan of Gaza (then in Kastoria), accepting him as a true prophet. As well as collecting information about Shabbetai Zevi and others active in the movement and assembling their writings, he encouraged or invited claimants to heavenly revelations. But he kept all these activities a closely guarded secret and cross-examined people carefully before he divulged his Shabbatean convictions. At times in association with his friend Benjamin b. Eliezer ha-Kohen,

he prepared to emigrate to Jerusalem, but he was always held up in the final stages. In 1700–01 he spent a whole year seeing through the press the Zoharic commentaries of Mordecai Ashkenazi, in Fuerth, a place that seemed more sympathetic to secret Shabbateans than Mantua or Venice. Finally, in 1702 he traveled to the Holy Land, accompanied by his family and a group of scholars, and founded a yeshivah in Jerusalem, most of whose members were supporters of Shabbateanism. A description of this journey by one of his company has been published by Jacob Mann (see bibl.). Considered a man of great influence and independent means, he was prevailed upon by the rabbis of Jerusalem to serve as an emissary to Europe, first in 1704–07, and a second (and perhaps third) time in 1710–13. He traveled through many countries – Poland, Germany, Holland, and Italy – and died on his last mission while passing through Mantua. Important sections of his extant papers remained unknown to collectors and libraries until the 1920s; these have proved very valuable sources for the history of Shabbateanism.

[Gershon Scholem]

ROVINA, HANNA (1889–1980), Israeli actress. She was born in Berezino, Minsk district, Russia, and trained as a kindergarten teacher. During World War I, she took charge of an institute for refugee children at Saratov. In 1917 she joined the Hebrew theatrical studio being organized by Nahum *Zemach in Moscow and became one of the founder-members of the *Habimah Theater Company. She achieved success and fame with her portrayal of Leah in the Hebrew translation of Anski's *Dybbuk*, the Habimah's first important production (1922), and as the mother of the Messiah in David Pinsky's *The Eternal Jew*. She played both these parts in Leningrad in 1925, in Riga in 1926, and on Habimah's subsequent tours in Western Europe and the U.S. Arriving with the company in Palestine in 1928, she was soon acknowledged as the country's leading actress and henceforth her career was identified with Habimah. Endowed with beauty and dignity, she was able to give authority and distinction to such varied heroines as Gordin's *Mirele Efros*, Euripides' *Medea*, and Shakespeare's *Cordelia*, later excelling in mother types, as in Capek's *The Mother* and Brecht's *Mother Courage*.

ROVINSKY, SAMUEL (1932–), Costa Rican playwright and author. The son of Polish Jewish immigrants, Rovinsky

is a central figure in his country's theater and also involved in experimental dramatic innovations; his works have been included in school curriculies. Together with his main interest in Central American reality, Rovinsky contributed Jewish themes to the national and regional scene. His dramas also contain social satire, parody, and humor. His plays include *Las fisgonas de Paso Ancho* ("The Busybodies of Paso Ancho," 1971); *Un modelo para Rosaura* ("A Model for Rosaura," 1974); *El martirio del pastor* ("The Martyrdom of the Pastor," 1983); *La víspera del sábado* ("Sabbath Eve," 1985); *El laberinto* ("The Labyrinth," 1985); *Gulliver dormido* ("Sleeping Gulliver," 1985); *Los pregoneros* ("The Town Criers," 1990). He published the short story volumes *Cuentos judíos de mi tierra* ("Jewish Tales from My Land," 1982) and *El embudo de Pandora* ("Pandora's Funnel," 1991); and the novel *Ceremonia de Casta* ("Caste Ceremony," 1979). Rovinsky also wrote essays on theater, play writing, and Costa Rican culture.

[Florinda F. Goldberg (2nd ed.)]

ROVNO (Pol. **Równe**), capital of Rovno district, Ukraine; under Poland until the First Partition (1793) and between the world wars. A Jew is first mentioned as hailing from Rovno in 1566, and Jewish creditors from the town are recorded in 1571. When the town passed to the princes of the house of Lubomirski in 1723, they tried to develop it by various means, including attempts to attract Jews there. On July 13, 1749, Prince Stanislaw Lubomirski granted a charter establishing a full-fledged community with all institutions. Prince Józef Lubomirski confirmed and renewed these rights on April 21, 1789. The *kahal* of Rovno is mentioned in 1739–40 in a decision at *Radom on the distribution of Jewish taxes in the Volhynia region of the *Council of the Lands. In 1765 there were 1,186 Jews in Rovno community (890 in the town itself and 296 in villages subject to the *kahal*); there were 2,147 Jews in the town in 1801; 3,788 in 1847; 13,780 (56 percent of the total population) in 1897; 21,702 (71 percent) in 1921; 22,737 in 1931; and about 28,000 in 1939. Under czarist Russia, Rovno became a border town not far from the frontier of Austria (at Brody), and developed into a commercial center dealing in military supplies. With the completion of the Kiev-Warsaw railroad and later with the Vilna-Rovno line (1885) it also became an important railroad center for all eastern Volhynia. Since it had become a supply center, various local light industries were also set up in the area under Polish rule.

The short-lived period of Ukrainian independence (1918–20) was a time of trepidation for Rovno Jewry. In the spring of 1919, the soldiers of *Petlyura carried out several *pogroms; later the town was conquered by the Red Army, and in the spring of 1920 it returned to Polish rule, which lasted until 1939.

A *Ḥibbat Zion group was formed in Rovno in 1884. Later various Zionist parties were established, with members participating in all the Zionist congresses. During Ukrainian rule Rovno's central Zionist office coordinated activities throughout Volhynia and Podolia. A *Bund group was formed in 1903. As in all Jewish communities in Poland, the *Haskalah was the forerunner of modern Jewish education in Rovno, and Zionism brought with it a revival of Hebrew. At first it was taught in the *heder metukkan* (see *Education) and in private Hebrew schools. In 1911 a branch of the Ḥovevei Sefat Ever ("Lovers of the Hebrew Language") was formed. A branch of the *Tarbut organization, established in 1919, soon became the central branch for all Volhynia. That same year the Tarbut secondary school was established, and shortly after, three Tarbut elementary schools, several Hebrew kindergartens, a Tarbut Polish-language high school and a business high school. There was also a *talmud torah*, and for a short period (until 1921) there were two Yiddish schools. The Tarbut secondary school attracted Jewish pupils from all the villages of Volhynia. From 1924 to 1939 the Yiddish weekly, *Vohliner Lebn* ("Volhynian Life"), was published in Rovno.

[Shmuel Spector]

Holocaust Period

Under Soviet rule (1939–41), Jewish organizations ceased to function, Bund and Zionist leaders were imprisoned, Jewish businessmen were discriminated against, and Hebrew schools were closed down. Many Jewish refugees from western Poland found shelter in Rovno, which soon became one of the important centers of underground Zionist activity, helping Jews to escape to *Vilna and southward to the Romanian and Hungarian borders. With the outbreak of the Soviet-German war (June 22, 1941), young Jews joined the Soviet army. Rovno fell to the Germans on June 29, and on the same day 300 Jews were slaughtered. Murder and torture were rampant. Between October and November 1941, the number of Jews killed exceeded 1,000. A Judenrat was set up by the former director of one of the Jewish secondary schools, Dr. Bergman. With the introduction of the German policy of extermination, a Judenrat member, Leon Sucharczuk, committed suicide. Murder on the largest scale was committed on Nov. 6, 1941, when some 18,000 Jews from Rovno were machine-gunned in a pine grove in Sosenki. After this *Aktion*, a ghetto was established for the remaining Jews. Starvation and disease claimed many victims despite mutual help and attempts to reduce epidemics. On July 12, 1942 the 5,000 surviving Jews were brought to the vicinity of Kostopol and murdered there in a forest. Rovno Jews joined the partisan groups operating in the district and helped to liberate Rovno from the Nazis in February 1944.

Contemporary Period

After the war about 1,200 Jews were living in an area around the Great Synagogue. Only 100 were survivors from the original Rovno community. A search was made to find Jewish children among the peasants in the nearby villages and to mark the sites of the mass graves of Jews murdered by the

Nazis. Gradually, like many others, the Rovno community dissolved through emigration. In 1957 the Jewish cemetery was divided into two sites, for a park and a grazing ground. The last remaining synagogue, consisting of only one room, was closed down by authorities in 1959, and Torah scrolls were confiscated. The former large synagogue was converted into a sports gymnasium. There was no monument on the mass graves of Jews murdered by the Nazis. In the late 1960s the Jewish population in Rovno was estimated at about 600. Only in the 1990s was a memorial erected in Sosenki for the Jews murdered by the Nazis.

ROWE, LEO STANTON (1871–1946), U.S. political scientist. Rowe grew up in Philadelphia and from 1895 taught political science at the University of Pennsylvania, becoming professor in 1904. Appointed to a commission to revise the laws of Puerto Rico in 1900, Rowe became interested in Latin American affairs, to which he devoted almost his whole life's work. In 1917 he became the assistant secretary of the U.S. Treasury, and in 1919–20 he headed the Latin American section of the State Department. Rowe was president of the American Academy of Political and Social Sciences (1902–30) and wrote many works including: *The United States and Puerto Rico* (1904); *Problems of City Government* (1908); and *The Federal Systems of the Argentine Republic* (1921).

ROWLEY, HAROLD HENRY (1890–1969), English Protestant theologian and Bible scholar. Rowley was associate professor of biblical literature at the Shantung Christian University (1924–29); assistant lecturer in Semitic languages at University College of South Wales and Monmouthshire, Cardiff (1930–34); professor of Semitic languages, University College of North Wales, Bangor (1935–45), and lecturer in the history of religions (1940–45); vice principal (1940–45) and dean of Bangor School of Theology (1936–45); and professor of Semitic languages and literatures at the University of Manchester (from 1945). He was, among other things, president of the Baptist Union of Great Britain and Ireland (1957–58).

Rowley wrote a number of works on the unity, importance, and relevance of the Bible. He argued that the pure monotheism of the prophets is rooted in the Mosaic period. He maintained that Deutero-*Isaiah's understanding of the Servant of the *Lord underwent a development from the symbolic suffering of the people of Israel to the vicarious death of an individual. He staunchly maintained that the Book of *Daniel, apart from secondary additions, was the work of a single author writing in the years of Antiochus *Epiphanes' persecution of Judaism, and held that the reform of Josiah rooted in Deuteronomy was at first welcomed by Jeremiah and then rejected by the prophet because of its dangerous implica-

tions. He commented upon every major problem of biblical history from Moses to Qumran, including the problems of the Exodus, the Samaritans, sacrifice, and the Qumran sectarians. His only full-length biblical commentary was on Job, and was published posthumously.

In addition to semi-popular dictionaries on biblical names and themes (1968), he wrote: *From Joseph to Joshua* (1950); *The Servant of the Lord* (1952); *Prophecy and Religion in Ancient China and Israel* (1956; Jordan Lectures, 1954); *The Faith of Israel* (1956); *The Zadokite Documents and the Dead Sea Scrolls* (1952); *The Aramaic of the Old Testament* (1929); *Darius the Mede and the Four World Empires in the Book of Daniel* (1935, 1959²); *Teach Yourself Bible Atlas* (1960); and *Men of God* (1963). He was also editor of: *Studies in Old Testament Prophecy* (T.H. Robinson Festschrift, 1950); *The Old Testament and Modern Study* (1951, 1961⁵); *Journal of Semitic Studies* (1956–1960); *Peake's Commentary on the Bible* (with Martin Black, 1962); M.A. Beek's *Atlas of Mesopotamia* (1962); *Hastings' Dictionary of the Bible* (1963² with F.C. Grant); *Companion to the Bible* (1963); *The Century Bible* (1967); and the series "Recent Foreign Theology," in: *Expository Times*, 58–81 (1946–70).

[Zev Garber]

ROZDOL (Pol. **Rozdół**; in Jewish sources רֹזְדוֹל), town in E. Drogobych district, Ukraine; formerly in E. Galicia within Austria and independent Poland. For many years the owner of the town, Rzewuski, waged a struggle against the province of Bratslav, which claimed the right to collect taxes from the Jews of Rozdol. In 1751 the tax tribunal in Radom decided in favor of Rzewuski and the Jews were ordered to pay their taxes to him. In the 17th century, a large number of the Jews in the town became followers of Shabbateanism (see *Shabbetai *Zevi), influenced by Rabbi Fishel, who claimed he was the *Messiah descended from Joseph, and that Jonathan *Eybeschuetz was the Messiah descended from David. After appeals to the civic authorities, R. Fishel was expelled on the ground that he was insane. According to an inadequately based theory, the founder of Ḥasidism, *Israel b. Eliezer Ba'al Shem Tov, was the rabbi of Rozdol who participated in the disputation against the *Frankists held in *Lvov in 1759.

On the eve of the partition of Poland and its incorporation into Austria in 1772, there were 639 Jews in Rozdol (1765). The Jewish population increased during the 19th century and by 1912 numbered 2,262 (about 50 percent of the total population). During World War I it declined, and in 1921 numbered 1,725 (about 45 percent). After World War I Jewish public activity expanded in the town which was known for its party conflicts, mostly between Ḥasidim and Zionists. The Germans occupied Rozdol on June 23, 1941. Most of the community was deported to Belzec death camp on September 4–5, 1942. The remaining Jews, who worked for German enterprises, were

sent on September 30 to Stryi, where they were probably killed with others on February 3, 1943.

[Shimshon Leib Kirshenboim]

ROZENMACHER, GERMÁN (1936–1971), Argentine playwright and short-story writer. He was born to a religious family in Buenos Aires, where his father was a *hazzan* and *mohel*. He graduated from the University of Buenos Aires and went on to work as a teacher of Hebrew, a journalist, a theater critic, and a playwright for television. Rozenmacher was considered to be one of the foremost Argentine writers to emerge in the 1960s, first earning recognition for his short stories and later for his plays. He was killed in an automobile accident in August 1971.

Rozenmacher achieved fame with his collection of stories *Cabecita negra* (1962), which examines the influence of Peronism on Argentine society in a variety of innovative and interesting settings. While the majority of the stories speak to the general Argentine population by depicting the solitude, despair, poverty, and frustration occasioned by social injustice, three of the stories deal specifically with the often difficult Jewish experience in Buenos Aires.

Rozenmacher gained permanent renown for his four dramatic works, which have become classics of Argentine theater. His first play, *Requiem para un viernes a la noche* was presented in 1964 at the *Yiddishes Folks Teater* IFT (Jewish Popular Theater) in Buenos Aires. It played for two years and continues to be produced. It has been studied mainly as a play about generational conflict, cultural identity, and assimilation. It is clear that the play reflects many aspects of his own life: he married a Catholic woman, and he dedicated the play to both his parents and his wife. Rozenmacher offers no solution to the problems presented in the play. Indeed, the work seems to signal the fact that there is no reconciliation possible between the opposing stances represented by father and son in the play and therein lays the tragedy. His play *El Lazarillo de Tormes* presented in 1971 was based on the 16th-century Spanish picaresque novel of the same title. Jewish themes are present only obliquely in the play, mainly when the topic of the Inquisition arises. *Simón Brumelstein, el caballero de Indias* was written in 1971, but not performed until 1982 and finally published in 1987. It is often considered to be his most ambitious and accomplished play. Simón, the main character, lives in a fantasy world and struggles with his deep desire to assimilate wholly into Argentine society and shed his Jewishness. However, he is constantly reminded that he will never be permitted to be completely Argentine. Ultimately, *Simón Brumelstein* is about the clash of cultures, assimilation, antisemitism, and crises of identity. His works have stood the test of time and found their place in the Argentine literary canon of the 20th century.

[Darrell B. Lockhart (2nd ed.)]

RÓŻEWICZ, TADEUSZ (1921–), Polish poet and dramatist. Born in Radomsko, Różewicz studied art history at the

Jagiellonian University in Cracow. The terrors of the Nazi occupation dominate Różewicz' earlier verse collections, such as *Niepokój* ("Anxiety," 1947). Influenced by Ionesco and Beckett as a dramatist, he also produced 15 highly acclaimed plays along with a dozen books of poetry in the modernist manner as well as stories and satires. Among his works translated into English are *The Card Index, & Other Plays* (1969), *Faces of Anxiety: Poems* (1969); *The Witnesses & Other Plays* (1970), *The Survivor and Other Poems* (1976), *Conversation with the Prince: and Other Poems* (1982); *Mariage Blanc and the Hungrier Artist Departs: Two Plays* (1983), *Forms in Relief and Other Works* (1994), *Reading the Apocalypse in Bed: Selected Plays and Short Pieces* (1998), and *Recycling* (2001).

ROZIN (Rosen), JOSEPH (1858–1936), Polish talmudic genius, called "the Rogachover" after his birthplace (Rogachov). His erudition and profundity were phenomenal. It is said that when he was eight years old, the local scholars felt incompetent to teach him, for he knew the whole of the talmudic order of *Nezikin* with its commentaries. When he was 13, his father took him to Slutsk where J.B. *Soloveichik taught him together with his own son Ḥayyim. From there he went to Shklov, where he frequented the court of the ḥasidic rabbi of Kapost, of the Chabad sect. He spent the next eight years studying in Warsaw. In 1889 he was appointed rabbi of the ḥasidic community of Dvinsk. During World War I, as the German army drew near, he fled to St. Petersburg [later Leningrad], where he remained as rabbi of the ḥasidic community for ten years, thereafter returning to Dvinsk.

A man of penetrating intelligence, Rozin possessed a phenomenal encyclopedic knowledge and great powers of industry. He knew the Babylonian and the Jerusalem Talmuds, all the known tannaitic and amoraic literature, and most early books without needing to consult them. He visited Rogachov each year on the anniversary of his father's death, on one occasion remarking that he had studied half of the Talmud during his journey there and would finish it on the return journey. He saw a subject as a whole and in its detail, analyzing it carefully and getting to the core of the *halakhah*. He would show by comparison with other passages which basic concepts were involved, give relevant rules and definitions, and make the subject clear. He frequently explained the Talmud in a way fundamentally different from that of the standard commentators. This is especially noticeable in his treatment of the Jerusalem Talmud which has no early commentary: Rozin's work contains thousands of new explanations. In speaking he was fluent and lucid; his writing, however, is obscure. He refers to his sources by a mere "*vide so and so*," making tens of references but neither quoting the passage nor explaining its relevance. Despite his difficult style, he was a prolific correspondent who enjoyed writing, and he encouraged correspondents to send him their problems. He answered without any effort all who wrote to him on any topic, and thousands of his letters are to be found throughout the world. His ability to find sources in the Talmud was extraordinary. He often

quoted a passage from a subject apparently completely unrelated to the matter under discussion, and inferred from it a persuasive proposition which answered the question. For Rozin, the Talmud was decisive. When he found a source for a custom in the Talmud he practiced it, but not otherwise. He traced to the Talmud the philosophical ideas of Maimonides and the latest discoveries of science. Because of this, great scientists enjoyed conversing with him. His remarkable knowledge of philosophy and science is revealed in his commentary on the Pentateuch. He possessed a keen critical sense and when what purported to be the lost text of the Jerusalem Talmud on *Kodashim* appeared, his insight recognized it for the forgery it proved to be.

Rozin's imposing and majestic appearance made a deep impression on all who saw him. Though one of the greatest scholars of any age, he was essentially a humble man. He was courteous, striving to see things from the other man's point of view. He bore the physical pain of his closing years stoically, though grudging the time it took him from learning, and continued to answer all who consulted him, whether in writing or in person.

During his lifetime, Rozin published a commentary on Maimonides' *Mishneh Torah* in five volumes (1903–08) and two volumes of responsa. Four further volumes of responsa were published in 1935–38. During World War II, one of his students, I.A. Sufran-Fuchs, photographed all the manuscripts he could collect and sent the films to a relative in the U.S. There they remained in a box until they were shown to R. Menaḥem *Kasher in the 1950s. He appreciated their true value, and they have subsequently been in the process of publication. All his works appear under the title *Zafanat Pa'ne'ah*. A number of volumes of the novellae and the commentary on the Pentateuch have appeared (5 vols., 1960–65). Rozin died in Vienna and his remains were buried in Dvinsk.

[Ernest Hamburger]

ROZOVSKI, PINḤAS (1843–1904), rabbi and Zionist. Born in the Minsk district, Rozovski studied at the Yeshivah of Volozhin. From 1867 he was rabbi of Lipkany, near Slonim, until he succeeded Isaac J. *Reines as the rabbi of Svencionel'iai (Yid. Shventsian), Lithuania, in 1887. He knew a number of languages, ancient and modern, including Arabic, and was learned in ancient and modern history and philosophy. Yet he lived meagerly, devoting his attention entirely to literature and the Torah. He wrote many books on biblical, philological, talmudic, and midrashic issues, as well as responsa and commentaries. Since Rozovski had no financial means, none of these books was published. Some of his articles, however, were published in various periodicals. He was attracted to Zionism and sought to give the national renaissance movement a religious ideology. He took part in the founding conference of

Ha-^{*}Mizrachi in Vilna (1902), as well as in the Second and Sixth Zionist Congresses, and the ^{*}Minsk Conference of Russian Zionists (1902). In the educational controversy between religious and secular Zionists, he supported the proposal to establish two separate educational communities within the Zionist Organization, so as to enable each to conduct its own policy in matters of culture and education.

[Yitzchak Raphael]

RÓZSAVÖLGYI, MÁRK (Mark Mordecai Rosenthal; 1789–1848), composer and violinist. Born in Balassagyarmat, Hungary, Rózsavölgyi studied the violin in Prague and became a violinist in various theatrical ensembles. After 1813 he lived for some time in Baja, but undertook numerous concert tours, and from 1833 to his death lived in Pest. He began to publish his works in 1817 – from 1824 onward mostly under the name of Rózsavölgyi, although the official change of name was granted to him only in 1846.

Rózsavölgyi composed over 100 pieces in the popular style of the Hungarian *Verbunkós* (“Recruiter’s dance”) and *czardas*, some suite-like collections of Hungarian dances, and two stage works. His works, especially the *czardas* pieces and the dance suites, are of major importance for the development of the form. Three of Franz Liszt’s Hungarian rhapsodies are indebted to compositions by Rózsavölgyi: the allegretto of the 8th, the introduction of the 12th, and the vivace of the 13th. The authorship of the “Rakoczi March” was erroneously attributed to Rózsavölgyi by the musicologist Fetis, and in spite of later research this has been persistently repeated in a number of books. Rózsavölgyi’s autobiography, written in 1834, has been preserved in manuscript in the Ráday Library in Budapest.

His son GYULA (1822–1861), together with Norbert Grinzwil, founded the important music publisher’s firm of Rózsavölgyi és Társa in 1850. The firm existed, with various changes of proprietorship, until 1949, when it was nationalized.

[Bathja Bayer]

ROZWADOW, town in Rzeszow province, S.E. Poland. In 1727 there were a synagogue and 30 houses owned by Jews in Rozwadow. According to the 1765 census, there were 333 Jewish poll-tax payers and a further 35 in the surrounding villages. The Jewish population increased rapidly during the second half of the 19th century following the construction of the railway which linked the town with Cracow and Lemberg. In 1880, 1,628 Jews (76% of the total population) lived in the town. The wealthiest among them (known as the Danzig merchants) exported timber by raft to Germany and mobilized peasants of the district for agricultural work in Prussia. The majority of the Jews of Rozwadow earned their livelihood in small trade and crafts such as carpentry, tailoring, shoemaking, the manufacture of soap, and the making of shirts for the peasants. From the middle of the 19th century the rabbis of

Rozwadow were descendants of the *Zaddik* Naphtali Hurowic of Ropczyce. In 1910 there were 2,372 Jews (70%) in the town. The president of the Jewish community, Dov Ber Reich, also held the office of mayor (1907–40). From 1900 to 1914, a school founded by the ^{*}Baron de Hirsch functioned in the town. On the eve of Shavuot 1915, the Russian army expelled the Jews who had remained in the town and many of them were exiled to Siberia. In the fall of 1918, a Jewish national council headed by Jacob Schreiber was formed in Rozwadow. During the transition period and the first weeks of Polish rule, a Jewish youth group was organized to protect the Jews from rioters. In 1921 the Jewish community numbered 1,790 (66% of the total population). Between the two worlds wars the Zionist movement in Rozwadow gained in strength, and a Hebrew school, a Hebrew library, and the sport clubs “Maccabi,” “Judah,” and “Trumpeldor” were established.

[Arthur Cygielman]

Holocaust Period

In 1939 the Jewish population of Rozwadow numbered more than 2,000. On Sept. 24, 1939, the town was captured by the Germans and on October 2 they ordered it to be evacuated within 24 hours. The Jews were deported across the San River into the Soviet-held area of Poland. The deportees dispersed in the Soviet-occupied zone. In the summer of 1940, many were exiled to the Soviet interior. Later Jews were permitted to return to Rozwadow. In September 1940, 400 Jews lived there legally. The first head of the Judenrat was Eliezer Perlman, the second was B. Gorfinkiel. In the summer of 1941, the community had to provide workers for the labor camp at Pustkow.

The final expulsion took place on July 21, 1942. All the Jews in Rozwadow were assembled in the market square; many were killed on the spot, others were placed into railroad cars and taken to Debica, where Jews from the entire vicinity were concentrated. Some were killed in a nearby forest; others were deported to camps at Tarnobrzeg, Pustkow, Rzeszow, Mielec, Stalowa Wola, and other localities. A labor camp was established in Rozwadow. On Sept. 1, 1942, 80 Jews were brought there from Sieniawa, Lezajsk, and the vicinity. As the rate of expulsion of Jews from the vicinity grew, 600 male Jews, mostly from Wieliczka, were brought to the camp. On Sept. 15, 1942, 450 Jews from Wolbrom arrived. Late in 1942, there were more than 1,200 prisoners, including Jews from Przemysl and Rzeszow. The prisoners worked in the steel factories of Stalowa Wola. Working conditions were hard and anyone who could not withstand the physical strain was shot. More than 1,000 Jews died in the camp.

ROZWÓJ, antisemitic Polish nationalist organization. Rozwój was founded in 1913 as the propaganda wing of the Polish Na-

tional-Democratic Party (*Endecja), bearing the official name “Organization for the Support of Polish Trade and Industry.” Its rise was due to Polish-Jewish tensions in Warsaw after the elections to the Fourth *Duma in 1912, which reached a climax in the announcement of an anti-Jewish boycott (see Róman *Dmowski). The goal of *Rozwój* was to assure the nationalists’ influence on the Polish petite bourgeoisie by means of demagogical propaganda slogans, emphasizing the liberation of the Polish homeland from Jewish and other foreign influences. Apart from the economic areas, the organization was active in publishing tendentious literature and propaganda, such as *Rozwój* (1918–19) and *Gazeta Niedzielną* (1924–25). Party membership increased markedly after 1917, and in 1923 reached 80,000. Since it was believed that the assassination of G. Narutowicz, Poland’s first president, was partly due to anti-Jewish agitation and popular demonstrations, the government of W. Sikorski ordered a temporary ban on *Rozwój*’s activities at the beginning of 1923. As a result, the party’s influence declined somewhat but eventually *Rozwój* was successful in constantly assuming new forms and remaining a pressure group, largely through urging an anti-Jewish boycott.

RSHA (abbr. of Ger. **Reichssicherheitshauptamt**, i.e., Reich Security Main Office). The precursors of the RSHA were the SD and the *SS surveillance and intelligence units, which were established by Himmler before the Nazis came to power and became state functions. The second element of the RSHA was the *Gestapo, originally the political police of Prussia. By 1936 all the political police of the German states were unified and the Gestapo became the core of Nazi control employing surveillance, denunciation, and torture, and having the power to imprison. The third element was the Criminal Police (Kripo). In 1936 Kripo and the Gestapo were reorganized as Sipo under Heydrich’s control. On September 22, 1939, the RSHA became one of the 12 main offices of the SS as the umbrella authority over the different Nazi secret police and intelligence organizations, with the exception of military intelligence (*Abwehr*). It was set up under *Himmler’s orders to unify the *Sipo* (*Sicherheitspolizei* – “security police”) and SD (*Sicherheitsdienst* – “security service”). Reinhard *Heydrich, who had been head of both services, continued as chief of the RSHA. The RSHA was originally divided into six offices (*Aemter*), later into seven, which were subdivided into departments (*Abteilungen* – later *Gruppen*), the latter further broken down into sections (*Referate*). Among the heads of the various divisions were Dr. Otto Ohlendorf, who dealt with economic matters, culture, and ethnic Germans. He commanded *Einsatzgruppe D*. Heinrich *Mueller was the head of the Gestapo. Werner Best and Dr. Neckmann were in charge of organization and law. In April 1944 the *Abwehr*, which was suspect, was taken over and became the *Amt Mil* (“military office”) of the RSHA, headed by Walter *Schellenberg.

With the German conquests, the RSHA sent representatives to all the occupied countries to run foreign branches on the model of the headquarters in Berlin. But neither in Germany nor abroad were services fused on a local level. Abroad the RSHA acted through *Einsatzgruppen* (“mobile killing units”), which functioned in the rear of the army. With the end of combat operations the *Einsatzgruppen* became local branches of the RSHA. Heydrich remained chief of the RSHA even after he was appointed protector of Bohemia and Moravia. Following Heydrich’s death, Himmler provisionally headed the RSHA, but the actual direction was left to Heinrich Mueller and Schellenberg. Ernst *Kaltenbrunner was appointed chief in January 1943, and served until the end of the war.

The RSHA assumed the powers of its parent organization over the Jews, became the supervising authority over the *Reichsvereinigung, and took over the *Zentralstelle* (“emigration center”). At its outset, the RSHA handled “Jewish affairs,” its Section IIB4 dealt with research, and Section IVB3 dealt with “Jewish enemies.” Section IVB4 was set up at the end of 1939 under Adolf *Eichmann, who was already head of the *Zentralstelle* and had achieved notable success in the forced emigration of Jews from Vienna. With the onset of the War, Eichmann’s section organized evacuations following the decision to drive the Jews and Poles out of the western provinces of Poland. At the same time, the *Einsatzgruppen* killed tens of thousands of Jews and Poles. The RSHA helped in the ghettoization of Jews in the East and was instrumental in the promulgation of anti-Jewish legislation. RSHA delegations in the occupied countries had Jewish sections and dispatched special commandos, e.g., to *Salonika (1943) and to *Hungary (1944). The *Einsatzgruppen* murdered more than 1,000,000 Jews in Russia. Under Heydrich the RSHA became the instrument of the “Final Solution,” i.e., the murder of European Jewry. The headquarters of the “Final Solution” was Section IVB4, which later became IVA4b. The local branches of the RSHA rounded up the Jews, confiscated their property, and deported them to death camps. The RSHA sought more efficient killing methods. It invented the gas vans and serviced them in its own vehicle section. Through its *Zentralstelle* in Prague, the RSHA ran the *Theresienstadt ghetto. It decided the fate of every transport, which was dispatched to the East. After the war the International Military Tribunal declared the *Gestapo and the SD components of the RSHA criminal organizations.

RU’AH HA-KODESH (Heb. רוּחַ הַקֹּדֶשׁ; lit. “the Holy Spirit”). Although the phrase *Ru’ah ha-Kodesh* occurs in the Bible (cf. Ps. 51:13; Isa 63:10), its specific connotation as divine inspiration is wholly post-biblical. In rabbinic thought it is the

spirit of prophecy which comes from God, a divine inspiration giving man an insight into the future and into the will of God. Traditionally the Pentateuch was given directly by God to Moses, but the other canonical writings were all produced under the inspiration of *Ru'ah ha-Kodesh*. Thus the determination of what should be included as canonical scripture turns on whether or not a given work was composed with the aid of the Holy Spirit (see Tosef., Yad. 2:14; Song R. 1:1, no. 5). This power of the spirit was given to the prophets in unequal measure (Lev. R. 15:2), and could be passed on to a disciple, Joshua inheriting it from Moses, and Elisha from Elijah (Deut. 34:9; II Kings 2:9–10). There are a number of references to the cessation of the *Ru'ah ha-Kodesh* from Israel, some dating it from the end of the First, some from the end of the Second Temple (cf. Yoma 21b). The most significant passage for the central use of the term as prophetic inspiration is “When the last of the prophets, Haggai, Zechariah, and Malachi, died, the Holy Spirit ceased from Israel” (Yoma 9b).

Apart from its function as prophetic inspiration the Holy Spirit also rests on charismatic or exceptionally holy individuals, who are not prophets in the accepted sense (cf. SER, 10:48). They are thus possessed of an ability to divine the future (Er. 64b). When the rabbis were gathered in Jericho a divine voice announced to them that there were two among them who were worthy of *Ru'ah ha-Kodesh* (TJ, Hor. 3:7; 48c). The Holy Spirit is also promised to other categories, e.g., those who teach Torah in public (Song R. 1:1 no. 8), those who study from pure motives (*li-shemah*; SEZ, 1), and those who perform even one *mitzvah* in complete faith (Mekh. Be-Shallah, 2:6). The Midrash says: “All that the righteous do, they do with the power of *Ru'ah ha-Kodesh*” (Tanḥ. Va-Yeḥi 13). *Ru'ah ha-Kodesh* may be attained by the saintly man, and the spiritual stages toward its attainment are found in the Mishnah: “Phinehas b. Jair says: ‘Heedfulness leads to cleanliness, and cleanliness leads to purity, and purity leads to abstinence, and abstinence leads to holiness, and holiness leads to humility, and humility leads to the fear of sin, and the fear of sin leads to saintliness, and saintliness leads to [the gift of] *Ru'ah ha-Kodesh*’” (Sot. 9:15 end; see also Av. Zar. 20b and TJ, Shab. 1:3, 3c for different versions).

A connection between the possession of *Ru'ah ha-Kodesh* and ecstasy, or religious joy, is found in the ceremony of water drawing, Simḥat Bet ha-Sho'evah, on the festival of Sukkot. The Mishnah said that he who had never seen this ceremony, which was accompanied by dancing, singing, and music (Suk. 5:4), had never seen true joy (Suk. 5:1). Yet this was also considered a ceremony in which the participants, as it were, drew inspiration from the Holy Spirit itself, which can only be possessed by those whose hearts are full of religious joy (TJ, Suk. 5:1, 55a). The people of Israel as a whole were in some way guided by the power of *Ru'ah ha-Kodesh*. Thus when the problem arose among the rabbis as to whether the paschal offering should be brought on the Sabbath, it was to how the ordinary people would act concerning the Sabbath restrictions that the rabbis turned for a decision. Hillel declared: “Leave it to them,

for the Holy Spirit is on them. If they are not in themselves prophets, they are the sons of prophets” (Tosef., Pes. 4:2).

A more problematical use of the term *Ru'ah ha-Kodesh* is when it is in some way hypostatized, or used as a synonym for God. This tendency toward hypostatization is already apparent in such expressions as “*Ru'ah ha-Kodesh* resting” on a person or a place, or someone “receiving *Ru'ah ha-Kodesh*.” But it is pronounced in descriptions of the *Ru'ah ha-Kodesh* speaking (Pes. 117a), or acting as defense counsel on Israel's behalf (Lev. R. 6:1), or leaving Israel and returning to God (Eccles. R. 12:7). This hypostatization is essentially the product of free play of imagery, and does not have the connotations of *Ru'ah ha-Kodesh* as an entity separate from God. Neither are there any overtones of the *Ru'ah ha-Kodesh* somehow forming part of the Godhead, as is found in the Christian concept of the Holy Ghost, which was a translation of *Ru'ah ha-Kodesh*. The problems centering on this use of the term *Ru'ah ha-Kodesh* are the product of its different uses shading into one another. Sometimes it is used merely as a synonym for God, and at others it refers to the power of prophecy through divine inspiration. In order to maintain a perspective on the matter, the monotheistic background and the image character of rabbinic thinking must always be kept in mind.

There are a number of texts in which the two terms *Ru'ah ha-Kodesh* and **Shekhinah* are found interchanged in different versions (cf. Pes. 117b; Shab. 30b; and TJ, Suk. 5:1, 55a; see also Tosef., Sot. 13:3f; Sot. 48b; Sanh. 11a). This interchange may be due to the fact that though *Ru'ah ha-Kodesh* and *Shekhinah* are conceptually distinct, they are identical over a certain range and are both sometimes used as straight synonyms for God. G.F. Moore, however, considers the exchange of terms to be mainly the result of copyists' errors (*Judaism*, 1 (1927), 437). *Ru'ah ha-Kodesh* must also be distinguished from the **bat kol*, or heavenly voice. Both are, in some sense, a revelation of the divine, but their mode of action and relative importance differ. The *bat kol* is an artificial element, pictured literally as a heavenly voice, and not always accepted as halakhically determinative (see BM 59a, where the pronouncements of a *bat kol* are rejected). *Ru'ah ha-Kodesh*, on the other hand, works through man as divine inspiration, and is theologically incontrovertible.

[Alan Unterman]

In Jewish Philosophy

PHILO. To *Philo also the Divine Spirit is that which inspires the prophet to prophecy. In *De Specialibus Legibus* (4:49) he writes that: “no pronouncement of a prophet is ever his own; he is an interpreter prompted by Another in all his utterances, when knowing not what he does he is filled with inspiration, as the reason withdraws and surrenders the citadel of the soul to a new visitor and tenant, the Divine Spirit (τὸν θείου πνεύματος) which plays upon the vocal organism and dictates words which clearly impress its prophetic message.” Influenced by Plato's notion of divine inspiration or frenzy, Philo interprets Abraham's “deep sleep” (Gen. 15:12) as a form of ecstasy which the prophet experiences: “This is what regu-

larly befalls the prophets. The mind is evicted at the arrival of the Divine Spirit, but when that departs the mind returns to its tenancy" (Her. 265). According to Philo, the Divine Spirit "comes upon" man, "fills" him, visits him, or speaks to him only occasionally. But in an exceptional case, such as that of Moses, the Divine Spirit remains continuously in man's soul.

Philo maintains that the Divine Spirit is a separate spiritual entity – a "unique corporeal soul" whose function is to act as an "intermediary of divine communications to man" (H.A. Wolfson, *Philo*, 2 (1948), 32). While unique, it is of the same nature as the incorporeal soul of man or as the angels, which are unembodied souls. Although Philo does not apply the term *Logos to the Divine Spirit, he does refer to it as Wisdom, which he identifies with the Logos.

Philo however uses the term Divine Spirit in several other senses as well: in the sense of the rational soul, as in *De Specialibus Legibus* (4:123), where he identifies the Divine Spirit with the "breath of life breathed upon the first man" – which is the rational soul (see H.A. Wolfson, *Philo*, 1 (1948), 395); in the sense of air, the third element, as in Genesis 1:2: "the spirit of God was moving above the water" (Gig. 22); and in the sense of the "pure knowledge in which every wise man naturally shares." Philo bases this last sense of the term on Exodus 31:2 in which Bezalel is said to have been filled by God "...with the Divine Spirit, with wisdom, understanding, and knowledge to devise in every work" (Gig. 23).

The concept of the Divine Spirit in the Dead Sea Scrolls is similar to that of Philo, insofar as it is regarded as a spirit that "comes upon" man or "speaks" to him. In the scrolls, man, as a result of purification from carnal pollution (connected with baptism) is reborn and receives a new spirit. While there are many Platonic and Gnostic elements in the conception of Divine Spirit found in the Dead Sea Scrolls, D. Flusser maintains that the origin of the concept is Jewish (*Scripta Hierosolymitana*, (1958), 252ff.). The influence that the Dead Sea Scrolls exercised upon the Christian concept of the Holy Ghost is well known.

[Rivka G. Horwitz]

Medieval Jewish Philosophy

The concept of Holy Spirit (*Ruah Ha-Kodesh*) is intrinsically connected to medieval Jewish philosophical approaches to prophecy. Essentially one can find two different yet related usages of this concept, as can already be seen by Philo. It may refer to a separate entity which is the source of prophecy, as well as other forms of divine providence; it also may refer to that which is received by choice individuals. In the latter case, some thinkers distinguished this reception from prophecy proper.

SAADIAH GAON. *Saadia Gaon deals with the Holy Spirit in his *Commentary on the Book of Creation*. In this treatise he insists that it is not a hypostasis or divine intermediary, as it is conceived by the Christians. At the same time he ascribes to it many of the characteristics that are reminiscent of the *Logos, particularly as this notion was conceived in the Ara-

bic-speaking world. The author of the *Book of Creation* terms the first of the *Sefirot* "the Spirit of the Living God" [*Ruah Elohim Hayyim*] which he also identifies as the Holy Spirit (4:1). Saadia interprets the Holy Spirit as a reference to the divine will, but goes on to maintain that God's will is not a distinct entity. Rather it signifies that God creates everything without engaging in physical activity. He offers an analogy of God's relation to the world, comparing it to the relation of the animate force to living creatures. God is, figuratively speaking, the animate force of the world, or better yet, the intellect of the world: "The volition of the Creator – that is, His power – spreads in the air, which is simple and subtle. It exists in it [the world] and moves it, as the animate force moves the body. The Creator is found in all of this and governs it, just as the intellect is found in the animate force and governs it" (J. Kafih (ed.), *Sefer Yezirah im Perush ha-Gaon Rabbenu Sa'adya b. R. Yosef Fayyumi* [1972], 106). The continuation of Saadia's remarks, however, suggests a different picture. He describes the Spirit as the most subtle entity created by God and it fills the entire world. This entity is known also as the "Glory" (*kavod*) and the "Indwelling" (*shekhinah*); in it is produced the speech heard by the prophets. Moreover, not only the visible and audible manifestations of prophecy originate in this entity, but also exceptional wisdom and the power of valor that God bestows upon choice individuals (108–9). The rabbinic *bat kol* is treated by Saadia as yet another manifestation of the Holy Spirit.

In his subsequent treatise, *Book of Beliefs and Opinions*, Saadia attacks the Christians for treating both the Spirit of God and the Word of God as divine beings (2:5–6). While he does not deal explicitly with the notion of Holy Spirit, he describes the Glory or *Shekhinah* as possessing the purest substance of God's created entities. The only task, however, that he ascribes to it is to provide visible proof to the prophet of the truth of the divine communication (2:10; 3:5). The Speech heard by the prophets is treated simply as sounds created by God and conveyed through the air (2:12). In Saadia's *Haggadah* for Passover there is an explicit and unique reference the notion that God did not redeem Israel from Egypt by means of the Speech (*Dibber*), a clear rejection of the *Logos* idea. One can detect in his approach a desire to counter the danger posed to strict monotheism by ascribing to the Holy Spirit too active a role in the divine governance of the affairs of the world.

JUDAH HALEVI. The early 12th-century philosopher *Judah Halevi refers to the Holy Spirit in several passages of the *Kuzari*. He presents in the name of the Aristotelian philosophers the view that the Holy Spirit is identical to the Active Intellect, the source of the emanation of prophecy. Halevi rejects this approach, maintaining that prophecy comes directly from God and not any intermediary (1:87). In explaining the visible manifestations of prophecy Halevi utilizes Saadia's discussion in the *Commentary to the Book of Creation*, though he draws a distinction between the Holy Spirit and the Glory. Halevi writes: "The air and all the bodies act by His will ... From the

subtle spiritual body called the Holy Spirit were shaped the spiritual forms called the Holy Glory, figuratively called God” (2:4). The Holy Spirit and Glory assume here the role of passive intermediaries. As in the case of Saadiah, Halevi at times speaks also of non-visible manifestations of the Holy Spirit. In a passage in which Halevi presents his own commentary on the *Book of Creation* he adds that the angels are created from the Holy Spirit and souls conjoin with it (4:25). The Spirit is also described by him as “enwrapping the prophet” (4:15) resulting in the individual’s reception of prophecy, or in his being aided and strengthened in a given matter. The same phenomenon occurs during the anointing of a nazirite, the anointing of the king, and when the High Priest consults the *Urim and Thummim in order to divine the future. One passage in the *Kuzari* alludes to a strong connection between the Holy Spirit and the *Amr Ilahi* (Divine Matter or Command), a notion whose definition has been a source of controversy among scholars. Halevi illustrates divine speech by “the speech of the prophets when they are enwrapped by the Holy Spirit. The Divine Matter directs all their words. The prophet exercises absolutely no volition in his speech (5:20).” Visible and non-visible manifestations also are true of the *Shekhinah* (2:62; 3:19; 5:23), which Halevi at times treats interchangeably with the Holy Spirit.

One may also interpret the notion of being “enwrapped by the Holy Spirit” in a less literal manner and see in it a figurative image for the reception of a special type of knowledge or ability. In the presentation of the philosophers’ worldview in the last part of the *Kuzari*, based on a short treatise by Avicenna, Halevi writes: “In some individuals, the rational faculty succeeds in conjoining with the Universal Intellect. It is thereby elevated above the use of syllogism and deliberation, or the toil of learning, by means of inspiration (*ilham*) and revelation (*wahy*). Its special trait is termed “sanctity” and the “holy spirit” (512).” In 4:15 Halevi indicates that the prophet is enwrapped by the Holy Spirit after his soul “conjoins with the angels.”

MAIMONIDES. *Maimonides does not use the Holy Spirit to refer to a spiritual entity but confines his usage to the emanation received by the prophets or other special individuals, such as the High Priest when he consults the Urim and Thummim. In *Eight Chapters* 7 and in *Laws of the Principles of the Torah* 7:1, 6 he appears to use the term as synonymous with prophecy (though in 7:1 the term may refer to the acquired intellect). In his discussion of the levels of prophecy in the *Guide of the Perplexed* (2:45), on the other hand, he counts the reception of the Holy Spirit as the two lowest degrees of prophecy and distinguishes them from prophecy proper. The first of these degrees consists of divine help that moves an individual to perform a great and righteous action. The next degree consists of a situation in which “an individual finds that a certain thing has descended upon him and that another force has come upon him and has made him speak; so that he talks in wise sayings, in words of praise, in useful admonitory dicta, or concerning

governmental or divine matter – and all this while he is awake and his senses function as usual.” Saadiah in his *Commentary on the Book of Creation* also speaks of these two manifestations of the Holy Spirit as discrete from prophecy proper, though he is less interested than Maimonides in drawing a sharp distinction between the two phenomena. By means of this distinction Maimonides ascribes an inferior standing to the books of the Bible that belong to the Hagiographa, treating their authors as non-prophets. The distinction also enables Maimonides to ascribe a non-prophetic status to Balaam, who received the Holy Spirit but did not possess the requisite perfection to attain prophecy in his view. The same is true of the High Priest when consulting the Urim and Thummim

Maimonides’ distinction between prophecy and the Holy Spirit, as well as his confining the use of Holy Spirit to refer to a certain type of reception and not to a spiritual entity, influenced subsequent Jewish philosophers. Even Hasdai *Crescas and Joseph *Albo who broke with Maimonides on many points of his philosophy continued to accept his approach on this issue.

[Howard Kreisel (2nd ed.)]

The Modern Period

The concept of the Holy Spirit is of central importance in Hermann *Cohen’s last book *Die Religion der Vernunft aus den Quellen des Judentums* (1929, pp. 116–30). Objecting to Philo’s conception of the Logos as an independent being intermediate between God and man, he maintains that the Holy Spirit characterizes the correlation between God and man. He relates the Holy Spirit to ethical purification on the basis of Leviticus 22:32, and claims that it finds expression in active ethical behavior rather than the passive receptivity of grace. Through ethical purification man attains a new spirit. The Holy Spirit can neither be alone with God nor alone with man, but is present only in correlation.

For the liberal thinker K. Kohler the Holy Spirit is the gift of reason given by God to man (*Jewish Theology* (1918), 200ff.). While the rabbis believed that the first man was endowed with the most perfected reason and was familiar with “every branch of knowledge,” in the modern period it is believed that man’s knowledge has increased through the ages. Thus Kohler believed that the Holy Spirit should be seen as dynamic. It is the spirit that manifests itself most clearly in the development and evolution of all areas of life – social, intellectual, moral, and spiritual – “toward the highest of goals” (*ibid.*, 230).

RUBENOVITZ, HERMAN H. (1883–1966), U.S. rabbi and Zionist. Rubenovitz, born in Kovno, Lithuania, was taken to

the United States in about 1890 and lived in Pittsburgh. In 1908, he graduated from the Jewish Theological Seminary and took his first pulpit in Louisville, Kentucky. There Rubenovitz initiated the idea of an association of Conservative synagogues, which eventually took the form of the *United Synagogue of America. In 1910 he became rabbi of Congregation Mishkan Tefila, Boston, which, over the years, he succeeded in making Conservative in outlook and in style of worship. Rubenovitz was among the rabbis who, with Mordecai *Kaplan, developed the Society of the Jewish Renaissance in 1920, which later became the *Reconstructionist movement.

He also was among the founders of the Boston Rabbinical Association, serving as its president for 15 years. He was active in Jewish education in the Boston area and initiated the plan for a training school for Jewish teachers. Rubenovitz presided over the Zionist Council in Boston and was chairman of the New England Board of the Jewish National Fund for four years. His wife, MIGNON RUBENOVITZ, was an active leader in Hadassah Women's Organization, in the National Council of Jewish Women, and in the National Women's League of the United Synagogue of America. They published memoirs and letters in *The Waking Heart* (1967), and Mignon Rubenovitz published other works under her own name.

RUBENS, ALFRED (1903–1998), English collector and historian. A London surveyor and estate agent by profession, he began early in life to collect engravings of Jewish interest and his *Anglo-Jewish Portraits* (1935) was based on his collections. This was followed by a similar work of wider scope, *A Jewish Iconography* (1954; rev. ed. 1981) extending to engravings of scenes of Jewish life and to continental engraved portraits. A logical outcome was his *History of Jewish Costume* (1967). Rubens was chairman of the London Jewish Museum for many years and was president of the Jewish Historical Society of England (1956–58).

ADD. BIBLIOGRAPHY: "In Memoriam Alfred Rubens (1903–1998)," in: *JHSET*, 35 (1996/98).

[Cecil Roth]

RUBENS, BERNICE (1927–2004), British novelist, film writer and director. Born in Cardiff, Rubens was educated at University College, South Wales. She taught English and from 1950 worked as a documentary film writer and director. Her first novel, *Set on Edge*, was published in 1960. She also published two plays, *Third Party* (1972) and *I Sent a Letter to My Love* (1979), which is based on her novel of the same title.

Rubens' first novels, *Set on Edge* (1960), *Madame Sousatzka* (1962), *Mate in Three* (1965), and *The Elected Member* (1969), are all extreme fictional versions of the author's Cardiff Jewish childhood. She has been described as a "chronicler of the frayed edge of middle-class Jewish life." In particular, the question of destructive familial expectations is a central motif in Rubens' early fiction. *Spring Sonata* (1979) addresses this theme from the startling viewpoint of an unborn child

and *I Sent a Letter to My Love* (1975) is a Welsh version of this theme.

Rubens' fiction is concerned with marginal characters whose personality is often on the point of breakdown. Representative examples of this preoccupation are *The Elected Member*, her Booker Prize-winning novel; *A Five Year Sentence* (1978); *Sunday Best* (1980), the journal of a transvestite; and *Mr. Wakefield's Crusade* (1985). For the most part, Rubens avoids a gloomy pessimism – inherent in her subject matter – by dotting her fiction with welcome black humor. In later years, she reverted to an exclusively Jewish environment with the publication of *Brothers* (1983), an ambitious Jewish family saga. Above all, Rubens' fiction evoked with considerable power the dark underside of what passes for normal human behavior. In this way, she has challenged the cozy reality of mainstream Anglo-Jewish fiction.

[Bryan Cheyette]

RUBENS, PAUL ALFRED (1875–1917), playwright and composer. Born in London, the son of a stockbroker, Rubens was educated at Winchester and Oxford. He wrote lyrics and librettos, for which he often composed musical settings. His stage successes, mainly written in collaboration, include *Lady Madcap* (1904), *Miss Hook of Holland* (1907), *The Balkan Princess* (1910), and *The Girl from Utah* (1913). From 1912 until his death, he was the principal composer for London's Gaiety Theatre. He died of tuberculosis at the age of only 41.

ADD. BIBLIOGRAPHY: ODNB online.

RUBENSON, ROBERT (1829–1902), Swedish meteorologist. Born in Stockholm, he attended the University of Uppsala, where he taught mathematics until 1859. For three years, Rubenson carried out meteorological research work in Germany, France and Italy. In Rome he completed an extensive investigation on the polarization of the atmosphere, which he published in book form (Uppsala, 1864). In 1873 he organized at Uppsala a network of meteorological observations. He was appointed director of the Swedish Central Meteorological Institute, a professor at the University of Stockholm, and a member of the Swedish Academy of Sciences. He is considered the founder of modern Swedish meteorology.

[Arthur Beer]

RUBENSTEIN, LOUIS (1861–1931), Canadian ice-skating champion, community activist and municipal politician. Rubenstein was born in Montreal in 1861. Widely regarded the father of figure skating in North America, at various times between 1882 and 1891 he was figure skating champion of Canada, the United States, North America and the world. Rubenstein won his first title, the Montreal Championship, in 1878. In 1885 he captured the North American title and defended it successfully for the next four years. In 1890 Rubenstein also

won at the world figure skating championships in St. Petersburg, Russia, the first North American figure skater to compete abroad. The championships in St. Petersburg proved to be very problematic for Rubenstein. Due to widespread Russian antisemitism of the day, the Canadian Jewish skater expected he would be unwelcome to compete and came forearmed with a letter of introduction from Canada's governor-general Lord Stanley. In spite of police harassment, Rubenstein was allowed to remain in Russia for the competition, and his performance was so outstanding that not even obviously biased judging could deny him the gold medal.

In 1891, at the top of his career, Rubenstein retired from skating. He remained, however, active in the sports world. He founded the Canadian Figure Skating Association with the objective of standardizing judging in skating competitions. He also served as president of several different Canadian sports organizations including bowling, lifesaving, skating, tobogganing, bicycling and curling.

Rubenstein was also active in the larger community. While active in his family's silver plating business, he was elected a Montreal alderman, a position he held for 17 years until his death. For many years he was also president of the Montreal YMHA. In 1981 Rubenstein joined Fanny Rosenfeld as the first Canadians inducted into the International Jewish Sports Hall of Fame in Israel and in 2004 Rubenstein became the subject of a film produced by the National Film Board of Canada.

[Avi Hyman and Brenda Cappe (2nd ed.)]

RUBENSTEIN, RICHARD LOWELL (1924–), U.S. rabbi and theologian. Rubenstein was born in New York City; his parents were non-observant Jews and he did not have a barmitzvah. He was tempted to enter the ministry but was told that he would have to change his name. Instead, he embraced his own tradition. He entered Hebrew Union College to study for the rabbinate, simultaneously attending the University of Cincinnati (BA 1946). He was at HUC during the Holocaust years when the reality of Jewish life clashed with the optimistic liberalism of Reform Judaism. Becoming more observant, he switched to JTS when Abraham Joshua Heschel left HUC to join the Seminary faculty. He also studied at Yeshiva Torah Vodaath. He was ordained at the Seminary and received his MHL in 1952. While serving as rabbi in Brockton (1952–54) and in Natick (1954–56), Massachusetts, and as interim director of the Hillel Foundation at Harvard (1956–58), he studied at Harvard Divinity School where he received his STM (1955) and at the graduate school where he received his Ph.D. in 1960.

In 1958 he became director of Hillel and chaplain to Jewish students at the University of Pittsburgh (1958). In 1969 he was appointed adjunct professor of humanities at the University of Pittsburgh. Given the controversy of his writings and what he defined as "bureaucratic excommunication," Rubenstein's career in the rabbinate was stymied but academic positions in religion were becoming open to Jewish scholars. From 1971 to 1995, he was a professor of religion at Florida

State University. In February 2001 the university created a professorship in his name. In 1987 the JTS conferred the degree of Doctor of Hebrew Letters, *honoris causa*, upon him. Many years later, Rubenstein became president of the University of Bridgeport.

There is general agreement among theologians that Rubenstein's first book, *After Auschwitz* (1966), initiated the contemporary debate on the meaning of the Holocaust in religious thought, both Jewish and Christian. In it he argued that after Auschwitz the belief in a redeeming God who is active in history and who will redeem mankind from its vicissitudes is no longer possible. Belief in such a God and an allegiance to the rabbinic theodicy that attempted to justify Him would imply that Hitler was part of a divine plan and that Israel was being punished for her sins. His rejection of God, however, does not entail an end to religion or an end to Judaism, for in a meaningless world human community becomes all the more important. Consequently, Rubenstein emphasizes the importance of rituals, rites of passage, and religious community over doctrine and ethics.

Rubenstein's next work was *The Religious Imagination*, a psychological study of Midrash, which was followed by an autobiography, *Power Struggle*. In 1972 he published a slim but influential work entitled *The Cunning of History*, which argued that the Holocaust is an expression in the extreme of what was common to the mainstream of Western civilization. Rubenstein viewed the Holocaust as manifestation of major political, demographic, economic, and bureaucratic trends in contemporary civilization and therefore of importance far beyond the Jewish community. Rubenstein's later book, *La Perfidie de l'Histoire* (2005), deals with the challenge of Islamic extremism to Western civilization.

Among his other books are *The Age of Triage* (1983), and *Approaches to Auschwitz* (2003), co-authored with John K. Roth. Always a strong supporter of Israel, a life-long student of genocide and of antisemitism, Rubenstein spent the opening years of the 2000s seeking to understand the phenomenon of Islamic antisemitism as manifested particularly in Europe.

[Michael Berenbaum (2nd ed.)]

RUBIN, EDGAR (1886–1951), Danish psychologist. He was professor of psychology at the university of his native Copenhagen. When the Germans overran Denmark during World War II Rubin sought refuge in Sweden. He returned to Denmark after the war, but died after protracted illness, brought on, in part, by the hardships suffered in his flight to Sweden. Rubin's work ranged widely and included studies of perceived movement, tactual and auditory senses, temperature, and gustation. He discovered paradoxical cold – the fact that cool stimuli 0.1–1.5° C below skin temperature arouse faint sensations of warmth. His best known discovery involved the finding that visual perception is normally divided into two parts, figure and ground.

Rubin's laws governing the selection of the figure were phenomenological in the tradition of *Husserl. They did not explain why a figure was selected but merely stated the conditions under which one structure among possible alternatives was selected. Although not a Gestalt psychologist himself, Rubin's ideas were quickly incorporated into Gestalt theory. Rubin did not approve of theories and schools of psychology. His position, as stated in his address to the Ninth International Congress of Psychology at New Haven, Connecticut, in 1929, was to let the facts speak for themselves.

[Helmut E. Adler]

RUBIN, GAIL (1939–1978), U.S. photographer. The only child of a prominent New York family, Rubin graduated from Finch College and worked as a photographer in advertising and as an editor at several publishing houses before moving to Israel in 1971. She began her photographic career in Israel as a press photographer and served as a war photographer. She was one of the first civilians to cross into Egypt with Israeli troops during the 1973 war.

Rubin turned her attention to nature photography and a collection of her wildlife photographs was exhibited at the Jewish Museum in New York in 1977. In March of 1978, Rubin was shooting the nesting habits of storks and pelicans in a bird sanctuary when she was shot to death by Palestinian terrorists who had infiltrated a remote beach north of Tel Aviv.

Her legacy is a book called *Psalmist with a Camera*, published in 1979. Rubin's descriptions and photographs are rooted in biblical phrases; she had resolved to show the birds, beasts, and other aspects of nature mentioned in the Bible. In the Huleh Nature Reserve, for example, she photographed water buffalo, pelicans, and doves. The book also contains impressionistic images of the bark of eucalyptus trees at different seasons.

[Stewart Kampel (2nd ed.)]

RUBIN, HADASSAH (1912–2003), Yiddish poet. Born in Yampol, Ukraine, Rubin moved with her family to Zbarazh, Galicia (now Ukraine) at the age of nine, and later to Kremenets (Krzemieniec). She graduated from a Polish secondary school. From 1935 she was a member of the illegal Polish Communist Party and was arrested several times. After spending World War II in Kyrgyzstan, she returned to Poland and became chairman of the *Yidisher Kultur-Gezeshaftelekhler Farband* in Stettin (Szczecin) from 1948 to 1952, and a staff member of the magazine *Yidische Shriftn* in Warsaw from 1956 to 1959. In 1960 she immigrated to Israel. Her poems were first published in 1931 in the *Kremenitser Shtime* and the *Vilner Tog*, then in various other Yiddish publications. Her poetry, which is characterized by original imagery, deals with social problems, the Holocaust, the joys of love and motherhood, the lost illusions and life in Israel. It was collected in the vol-

umes: *Mayn Gas iz in Fener* ("My Street Is Full with Banners," 1953); *Veytik un Freyd* ("Pain and Joy," 1955); *Trit in der Nakht* ("Steps in the Night," 1957); *Fun Mentsh tsu Mentsh* ("From Person to Person," 1964); *In Tsugvint* ("In a Whirlwind," 1981); *Eyder Tog* ("Before Dawn," 1988); and *Rays Nisht op di Blum* ("Don't Pluck the Flower," 1995).

[Arieh Pilowsky]

RUBIN, MORTON JOSEPH (1917–1972), U.S. meteorologist. Born in Philadelphia, Rubin was supervising meteorologist of Pan American Airlines (1942–49) before joining the Federal Weather Bureau. In 1952 he was one of the heads of a project for weather forecast charts of the southern hemisphere and did research on circulation in that area. During the Third International Geophysical Year (1955), Rubin was appointed to the Antarctic Weather Research Center and was entrusted with the development of analysis methods for its project. During 1957–59, he was special assistant to Harry Wexler, and liaison meteorologist with the Soviet Mirnyy station in the Antarctic on problems concerning research into and analysis of the upper strata of the atmosphere. Rubin later directed the polar meteorology research project of the Federal Weather Bureau (1959–62) and combined research projects on meteorological, oceanographical and glaciological problems of the Antarctic. From 1965 he was a senior scientist in the Environmental Science Services Administration (ESSA) and shared responsibility for research planning.

[Dov Ashbel]

RUBIN, REUVEN (1893–1974), Israeli painter. Born in Galats, Romania, the son of Feiga and Joel Zelicovici, Rubin drew from the time he was a young *heder* pupil. At 14 he had already published his drawings in local illustrated journals and books. In 1912 Rubin traveled to Jerusalem intending to study in the Bezalel School of Art and Design. A year later he moved to Paris to study at the Ecole des Beaux Arts and at the Academie Colarossi. Rubin returned to Tel Aviv only in 1923 but continued to travel and to exhibit all over the world. Pictures by Rubin were acquired by the world's main museums, such as the Musée National d'Art Modern in Paris (*Goldfish Vendor*, 1955) and the Museum of Modern Art in New York (*The Flute Player*, 1940). In Israel his art works appeared in national institutes, such as the painting *The Glory of Galilee* (1965–66) located in the Knesset in Jerusalem and the stained glass windows in the Residence of the President of Israel in Jerusalem (1969). Rubin participated in the Venice Biennale more than once. He was the first Israeli minister plenipotentiary to Romania (1949–50).

Rubin was awarded the Israel Prize in 1973. In 1974 Rubin signed a contract with Tel Aviv's mayor in which he turned his house over to the city. This building, which stands on Bialik

Street near the Bialik House as well as close to the old municipality building, became the Rubin House Museum.

Most of Rubin's pictures expressed the local environment of Erez Israel. The views reflect the landscapes, the flora, the fauna, and the variety of types of people he saw in the country, all painted in a unique way combining naïve and simplified styles.

The naïve image was created mainly by the distortion of proportions. The lack of shadows, the existence of contour lines, and the strange perspective were part of the naïve style of the 1930s and expressed Rubin's impression regarding the significance of the location. In a self-portrait he showed himself as a dark-skinned person with a half-open shirt, seated on a simple stool. The view that appeared through the window was mostly a view of Jaffa with Arabic figures and houses (*Self Portrait*, 1925, Paris).

During the 1940s he described the olive fields of the Galilee. The figures he dealt with were the biblical figures that he had felt especially close to since he had been a child and even more so when he was situated in Israel. His picture series *Jerusalem the Golden* combined the real landscape of the Judean Mountains and the imaginary temple set in its supposed original place. Later in the windows of the President's Residence he combined fragments from his art works with the biblical scenes of *Jacob Wrestling with the Angel*, *King David Enters Jerusalem* and *Elijah Ascending to Heaven*. Although it was a huge project using a new technique, Rubin, then approaching his 76th year, accepted the assignment with delight. He declared the windows his gift to the nation.

[Ronit Steinberg (2nd ed.)]

RUBIN, ROBERT E. (1938–), U.S. financier, 70th secretary of the U.S. Treasury. Born in New York City, Rubin graduated summa cum laude from Harvard in 1960. He attended the London School of Economics and received an LL.B. from Yale Law School in 1964. He entered private practice with the law firm of Cleary, Gottlieb, Steen, and Hamilton in New York. In 1966 he joined Goldman Sachs as an associate in the risk arbitrage division, and his brilliance there earned him a general partnership in 1971. In 1980 Rubin became a member of the management committee, then vice chairman and co-chief operating officer in 1987. He served as co-senior partner and co-chairman at Goldman Sachs from 1990 to 1992.

When Bill Clinton took office as U.S. president in January 1993, Rubin joined the White House as assistant to the president for economic policy, directing Clinton's newly created National Economic Council. The passage of the North American Free Trade Agreement (NAFTA) in 1993, an early success for Clinton, was also considered a victory for Rubin and an endorsement of the new "Rubinomics." In 1995 Rubin succeeded Lloyd Bentsen as Treasury secretary, serving until 1999. This period saw one of the highest levels of economic growth in U.S. history, for which Rubin is generally credited.

It was also the first time when virtually every leading position in the Clinton economic team was held by a Jew.

As Treasury secretary, Rubin's economic policies included measures for a steep deficit reduction, which ultimately resulted in a federal budget surplus; at the same time, the U.S. economy experienced both vigorous growth and very low levels of national unemployment. Internationally, Rubin urged the support of developing economies, including Mexico and Argentina, orchestrating a substantial loan guarantee for Mexico. With his deputy secretary Lawrence Summers (Rubin's eventual successor) and Alan Greenspan, Rubin coordinated the U.S. response to the Asian financial crisis of the late 1990s.

In 1999 Rubin resigned as secretary and joined Citigroup, where he served as chairman of the executive committee. He has served on the board of trustees of the Carnegie Corporation of New York, Mt. Sinai Hospital and Medical School, the Securities and Exchange Commission Market Oversight and Financial Services Advisory Committee, the Mayor of New York's Council of Economic Advisors, and the Governor's Council on Fiscal and Economic Priorities for the State of New York. He has written, with journalist Jacob Weisberg, *In an Uncertain World: Tough Choices from Wall Street to Washington* (2003), a memoir documenting his years in the Clinton administration.

[Dorothy Bauhoff (2nd ed.)]

RUBIN, RUTH (1906–2000), singer, folk-music collector, and author. Born in Khotin, Bessarabia, she was taken to Canada at the age of four, and was educated in English, French, and Yiddish. At an early age she showed a deep love for music and studied Yiddish folksong. She recorded Yiddish songs in Montreal and Toronto, Canada, and New York City between 1947 and 1964, as well as in London, Tel Aviv, and elsewhere. She published the songs she collected and learned, performed, and recorded them. Her research was published in *A Treasury of Jewish Folksong* (1950), *Voices of a People* (1963), and *Jewish Folk Songs* (1965); in these collections, the songs are discussed in their historical settings. She also recorded herself singing these songs and her records were published. A selection of her recordings was donated to the Haifa Music Museum and Library (approx. 20 hrs); the majority of her recordings were donated to the Archive of Folk Cultures of the Library of Congress in Washington (approx. 66 hrs.). Some of her papers and recordings were donated to YIVO archives for Yiddish research and culture in New York.

[Gila Flam (2nd ed.)]

RUBIN, SAMUEL (1901–1978), U.S. philanthropist. Rubin was born in Bialystok, Poland, but was brought to the U.S. by his parents at the age of four. He studied at the City College of New York, but entered business and in 1937 founded the firm of Faberge, importers of French perfumes, which he sold in 1963 for \$25 million.

Rubin was an outstanding philanthropist for both United States and Israeli causes. He was one of the founders of the

New York Bellevue Medical Center, and the Fordham University Medical Library, and endowed the chair of anthropology at Brandeis University, in addition to supporting numerous other medical and cultural institutions. In 1955 he donated \$250,000 for the establishment of a chain of community cultural centers in Israeli development areas; he founded a cancer detection clinic at the Rambam Hospital, Haifa. In 1957 the Rubin Foundation, which he founded, provided the funds to acquire a building to house the Jerusalem Conservatoire of Music, to which he donated \$325,000 through the American-Israel Cultural Foundation, and it was given the name of the Rubin Academy of Music.

On the 20th anniversary of the Rubin Academy of Music in 1977, he donated a laboratory for electronic music.

RUBIN, SOLOMON (1823–1910), Hebrew writer. Born in Dolina, Galicia, Rubin was one of the most prolific writers of the Haskalah period; his main subjects were general and Jewish folklore, customs, superstitions, and the like. Rubin's work was for the most part devoted to the study of thought and of popular beliefs accepted as sacred. His sympathy for the victims of intellectual censorship induced him to translate K. Gutzkow's *Uriel Acosta* (1857; see Uriel da *Costa) from German to Hebrew, and this led him to an interest in Spinoza, whose writings preoccupied him for an extended period.

He published *Moreh Nevukhim he-Ḥadash* (2 vols., 1857), a synopsis of Spinoza's two books on the basis of the French adaptation of Emile Laisset, and, when this resulted in attacks upon him and Spinoza by Samuel David *Luzzatto, he countered with *Teshuvah Nizzahat* (1859). A book on Spinoza and Maimonides (in German, 1869) earned him his doctorate at the University of Goettingen. He also wrote on Spinoza in *Ha-Shaḥar*, and published two additional works on the philosopher: *Hegyonei Spinoza* (1897), on divinity, the universe, and the soul of man, and *Barukh Spinoza* (1910). He also translated Spinoza's "Ethics" into Hebrew (*Ḥeker Eloha im Torat ha-Adam*; 1885) and his grammar (*Dikduk Sefat Ever*; 1905), in the introduction to which Rubin discusses the Sephardi pronunciation, which formed the basis of Spinoza's Hebrew grammar. Rubin also wrote *Tehillat ha-Kesilim* (1888), a parody in the style of Erasmus' *In Praise of Folly*, the only book of its kind in Hebrew.

[Getzel Kressel]

RUBINER, LUDWIG (1881–1920), German poet and essayist. Rubiner, a native of Berlin, was a social revolutionary who campaigned passionately for peace and social justice. A member of no political party, he expounded his ideology in a series of essays collected in the volume *Der Mensch in der Mitte* (1917). In his poetry, as in his prose, he was an expressionist.

His own verse included *Die indischen Opale* (1911) and *Das himmlische Licht* (1916). He also edited an anthology, *Kameraden der Menschheit, Dichtungen zur Weltrevolution* (1919). This was a collection of manifestos "for the fight against the old world and for the advancement toward a true humanity," and

in it he called on the poets to side with the rebellious masses. For a short time, Rubiner edited the expressionist journal *Zeit-Echo* (1918). He edited a selection of Tolstoy's diaries, *Tagebuch 1895–1899* (1918), and also translated some of the works of Voltaire, *Die Romane und Erzählungen*, 2 vols. (1919).

[Rudolf Kayser]

RUBINGER, DAVID (1924–), Israeli photojournalist. Born in 1924 in Vienna, Rubinger emigrated to Palestine in 1939, where he later joined the British Army. He worked as a photographer for *Ha-Olam ha-Zeh* (1951–53), and *Yedioth Aharonoth* (1953–54). In 1954 he covered the *Kasztner trial for *Time*, and in 1956 the Suez Campaign for *Life*. In addition to working for *The Jerusalem Post*, including as its picture editor, most of his work since was for *Time* magazine, where he became a contracted photographer. He covered the early story of *aliyah* and Israel's wars. His approach was the human angle such as the *ma'barot* (shanty camps) for immigrants. Rubinger is most remembered for the photograph, shot lying on his back, of three paratroopers at the Western Wall immediately after its capture in the Six-Day War of 1967. Another famous photograph was of the IDF chief military chaplain, Rabbi Shlomo *Goren, blowing the *shofar* at the liberated wall. Informal shots of political leaders like David *Ben-Gurion, Golda *Meir, Menahem *Begin, and Yitzchak *Rabin showed the subject's human and informal side. In 1997 he was awarded the Israel Prize in photography.

[Yoel Cohen (2nd ed.)]

RUBINOW, ISAAC MAX (1875–1936), U.S. economist and social worker. Rubinow was born in Grodno, Russia and arrived in New York City in 1893. He qualified at New York Medical College in 1898 but abandoned medical practice in favor of statistics and social work. During service with several U.S. government agencies, Rubinow concentrated on social insurance. Rubinow's efforts on behalf of social insurance brought about his appointment as executive secretary of the Social Insurance Commission of the American Medical Association (AMA) in 1916. However, his efforts to commit the AMA to state health insurance failed.

Rubinow believed that social insurance, national in scope, covering health, unemployment, accidents, and old age, and providing adequate benefits, should replace charity and other forms of voluntary relief. He held that it should provide assistance as a right and thus take care of human needs "without injury to the man's ego and self-respect and that of his fam-

ily.” In addition, Rubinow insisted on a compulsory state system because “the class which needs social insurance cannot afford it, and the class that can afford it does not need it.” He prepared the report of the Ohio Social Security Commission in 1933, and President Franklin D. Roosevelt appointed him as a consultant to the committee that drafted the social security legislation of 1935.

Rubinow was also active in Jewish welfare work. From 1923 to 1928, he was director of the Jewish Welfare Society of Philadelphia, and from 1927 to 1932 he served as vice president of the National Conference of Jewish Social Service. He made it clear that poverty among Jews must not be isolated from conditions in America generally, calling for Jewish participation in national progressive social movements.

Rubinow was an active Zionist, and his medical training and administrative skills aided him from 1918 to 1922, when he directed the Hadassah Medical Unit in Palestine. Modern health services were established for the first time, malaria was reduced, and the care of children was stressed. Rubinow later served as executive director of the Zionist Organization of America (1928). From 1929 to 1936, he was secretary of B'nai B'rith and, after Hitler came to power, he was a leader in the movement to aid German Jews.

Rubinow's works include: *Social Insurance* (1913); *The Quest for Security* (1934); and “The Jewish Question in New York City,” a paper published in *AJHSP*, 49 (1959), 90–136.

BIBLIOGRAPHY: R. Lubove, *The Struggle for Social Security, 1900–1935* (1968), index.

[Irwin Yellowitz]

RUBINSTEIN, AKIVA (1882–1961), Polish chess master. Rubinstein studied at various yeshivot and he took up chess at the age of 17. He became a player of genius, and was as prolific a producer of chess masterpieces as his younger contemporary, Capablanca. Rubinstein had a phenomenal memory and an original comprehensive grasp of all aspects of the game. He also achieved an objective, selfless attitude in play which earned him the description of “the Spinoza of chess.”

Most of Rubinstein's victories were gained before World War I. In 1912 he shared first honors with Emanuel *Lasker at Vilna, and won many tournaments.

Until 1914 his career qualified him as the likely challenger for the world championship. Conditions arising from World War I and its aftermath, however, made it impossible for him to participate in any contenders' matches from 1914 to 1920, and the challenge was left to Capablanca. Between 1918 and 1930, he won many of the leading European tournaments, but deteriorating health forced him to retire to a nursing home in Belgium. It is believed that a Nazi devotee of chess was instrumental in saving his life during the German occupation and he was eventually able to leave the home a few years before he died.

BIBLIOGRAPHY: H. Kinoch (ed.), *Rubinstein's Chess Masterpieces* (1941).

[Gerald Abrahams]

RUBINSTEIN, AMNON (1931–), constitutional law professor and politician, member of the Ninth to Fifteenth Knessets. Rubinstein was born in Tel Aviv. He served as an officer in the artillery corps. He received a bachelor's degree in economics and international relations (1955) and in 1963 a master's degree in law at the Hebrew University of Jerusalem. He received his doctorate in law from the University of London in 1966. Rubinstein was a member of the *Haaretz* editorial board, and in 1969–75 taught law at Tel Aviv University, serving as dean of the law faculty (1969–74).

After the Yom Kippur War, in 1974 he established a protest movement called Shinui (“Change”), and two years later joined the Democratic Movement for Change with other members of his movement. He was elected to the Ninth Knesset on the DMC list but in 1978 broke away from it due to his opposition to the role that the DMC was playing in the Begin government, and formed a parliamentary group by the name of Shinui, which had five members at the end of the term of the Ninth Knesset. In 1976 he was appointed one of the deputy chairmen of the Liberal International, continuing to serve in this position until 1999.

In the elections to the Tenth to Twelfth Knessets, Rubinstein ran at the head of the Shinui party, which in March 1992 joined with the Civil Rights Movement and *Mapam to form the *Meretz parliamentary group. Rubinstein ran in the elections to the Thirteenth to Fifteenth Knessets within the framework of Meretz, which became a single party in February 1997. In the National Unity government formed in 1984, he served as minister of communications but resigned in May 1987 after the inner Cabinet did not approve the London Agreement signed by Minister for Foreign Affairs Shimon *Peres with King Hussein of Jordan, and due to an agreement signed by Prime Minister Yitzhak *Shamir to bring *Shas back into the government. In 1989 he was responsible for an amendment in the laws that enabled the opening of private academic institutions for the teaching of law, which opened the door to the establishment of numerous colleges that are not financed from public funds. In the course of the Twelfth Knesset, he was one of the four Knesset Members who initiated the passing of the law for the direct election of the prime minister. In the government formed by Yitzhak *Rabin in July 1992, he was first appointed minister of energy and infrastructures, but after Shulamit *Aloni was forced to resign from the Ministry of Education, Culture and Sports in May 1994, he replaced her. In the Fourteenth Knesset, Rubinstein served as chairman of the Knesset Economics Committee, and in the Fifteenth, first as chairman of the Constitution, Law and Justice Committee, and then as chairman of the State Control Committee. Rubinstein resigned from the Fifteenth Knesset on October 31, 2002. He returned to academic life, being appointed dean of the law school at the Interdisciplinary Center in Herzliyyah. In 2004 he was appointed to head a public committee to examine parliamentary supervision over the defense establishment, and ways of improving it – a committee that submitted its report in January 2005.

Among his writings are *Ha-Mishpat ha-Konstituziyyoni shel Medinat Yisrael* (1996⁵); *Da'at Yahid: Devarim Bikhtav u-Be'al Peh – 1960–2001* (2001).

In 2006 Rubinstein was awarded the Israel Prize as “the father of constitutional law in Israel,” citing his seminal work *Constitutional Law of the State of Israel*.

[Susan Hattis Rolef (2nd ed.)]

RUBINSTEIN, ANTON GRIGORYEVICH (1829–1894), Russian virtuoso pianist and composer. Born in Vykhvatintz, Podolia, Rubinstein, whose parents abandoned Judaism soon after his birth, had his first piano lessons from his mother and appeared as a prodigy in Moscow in 1839, then in Paris and London. He won the approval of Liszt, was influenced by *Mendelssohn whom he met in London, and by the time he was 24 had had two operas performed. In 1858 the grand duchess Helena Pavlovna of Russia appointed him court pianist. With her help, he founded the St. Petersburg Conservatory in 1862, becoming its director. Resuming his tours, he was repeatedly acclaimed as a concert pianist in Europe and the U.S., and also gained renown for his own compositions. In 1890 he established the Rubinstein Prize, an international competition for young pianists and composers. Some of his compositions reflected the influence of his Jewish background, such as the operas *The Demon* (1871), *The Maccabees* (1875), *Nero* (1879), and *Sulamith* (1883); the oratorios *Paradise Lost* (1855), *The Tower of Babel* (1870), concertos for piano, violin, and cello, string quartets, trios, and *Moses* (1887). His works also included ten symphonies, sonatas, piano works, and over 100 vocal pieces. Little of his music, however, has remained in the concert repertoire. An English version of Anton Rubinstein's autobiography appeared in 1903. Anton's younger brother, NIKOLAY GRIGORYEVICH (1835–1881), was also an outstanding pianist, conductor and teacher. He founded the Moscow Conservatory (1866), which he headed until his death, and actively promoted the music of Tchaikovsky, who dedicated a piano trio to his memory.

[Michael Goldstein]

RUBINSTEIN, ARTUR (1886–1982), virtuoso pianist. He started to play the piano at the age of three, in Lodz, Poland, where he was born, and made his first appearance as soloist in Berlin in 1897, with Joseph *Joachim conducting. Two years later he played in Warsaw under the baton of Emil Mlinarsky (who later became his father-in-law) and fame followed quickly. He appeared with the Philadelphia Orchestra in 1906. At the outbreak of World War I, he offered his services to the Polish Embassy in London and gave concerts for the Allied Forces. On seeing the results of German brutality among civilians, he decided never to appear again in Germany. He

toured Spain and Latin America and after the war he moved to New York. Until then, he had been considered a great performer of Chopin but his interpretative range widened to include Beethoven, Schumann and others. During the ensuing years, Rubinstein developed into a master pianist of deep insight, whose periodic recitals drew both the general public and the connoisseurs. At one period, he was giving 150 concerts a year, many of them for charity. He changed his domicile several times. When playing in Europe, he lived in Paris. In 1937 he moved to Los Angeles but after World War II lived again in Paris while appearing for seasons on the Continent, in London, New York and Israel. He also played chamber music with *Heifetz, with Feuermann, and with *Piatigorsky, making memorable recordings. His later seasons in his 70s and 80s almost had the character of Rubinstein festivals. He raised his voice against injustice – for Israel before the Six-Day War, against Poland's anti-Jewish campaign, and against the Russian invasion of Czechoslovakia. In 1963 the Artur Rubinstein Chair of Musicology was established at the Hebrew University by the Israel Philharmonic Orchestra on the proceeds of his concerts in Israel, for which he always refused payment. In April 1976 Rubinstein was awarded an honorary doctorate by the Weizmann Institute at a special ceremony held in Tel Aviv, and in April 1977 he was honored as a Yakir Yerushalayim (“distinguished citizen of Jerusalem”) at a ceremony closing the Master Piano Competition. In December 1978 he was one of the five recipients of the newly-instituted annual Kennedy Center Honors. Rubinstein was also the subject of a film, *L'Amour de la vie* (1969). The first volume of Rubinstein's autobiography, *My Young Years*, was published in 1973. The Rubinstein International Piano Master Competition, established in his name, was first held in Israel in 1974 and has become a regular triennial event. The second volume of his autobiography, *My Many Years*, appeared in 1980.

[Uri (Erich) Toeplitz / Max Loppert (2nd ed.)]

RUBINSTEIN, HAROLD FREDERICK (1891–1975), English solicitor and playwright. Rubinstein was the founder of the well-known London law firm of Rubinstein, Nash & Co. (now known as Rubinstein, Callingham, Polden & Gale) which has specialized in literary cases. His defense of Radclyffe Hall's novel, *The Well of Loneliness*, in 1928 led to his appointment as legal adviser to various publishing houses. He wrote the plays: *The Dickens of Gray's Inn* (1931), *Israel Set Free* (1936), *Unearthly Gentleman* (1965), and *Shylock's End* (1970). He also edited *Four Jewish Plays* (1948). His son MICHAEL RUBINSTEIN (1920–2001) continued in his father's footsteps as probably the best-known solicitor defending authors and publishers in England, acting for Penguin Books in the famous prosecution of D.H. Lawrence's *Lady Chatterley's Lover* for obscenity in 1960, and in many libel cases. Another son, HILARY HAROLD RUBINSTEIN (1926–), is also a well-

known London solicitor and author, whose works include *The Complete Insomniac* (1974).

RUBINSTEIN, HELENA (1871–1965), cosmetician. Born in Cracow, Poland, Rubinstein studied medicine for a short while and then immigrated to Australia. Observing that many Australian women suffered from dry, flaky skin because of the harsh, hot climate, she began selling a cold cream made according to a formula of her mother's. Within three years, she had made \$100,000. In 1894 she moved to Britain, opening a fashionable salon in London in 1908 and one in Paris in 1912. During the next 20 years, she established herself as Europe's leading cosmetician. Arriving in New York in 1914, she remarked that American women had purple noses, gray lips, and chalk-white faces from "terrible powder" and said, "I recognized that the U.S. could be my life's work." She opened a salon in New York in 1914, and over the next several years salons appeared in Chicago, Boston, Los Angeles, and other American cities. She was so successful that when she died half a century later, her estate was estimated at \$100 million, and her company's annual sales exceeded \$60 million.

Rubinstein was the first cosmetician to send saleswomen on the road to demonstrate the right makeup for the average woman, and she was responsible for such beauty items as waterproof mascara and medicated face creams. She had a famous collection of art and jewelry. Her son, Roy Titus, succeeded her as head of the Rubinstein complex.

Rubinstein built a factory in Israel and, as an art collector, took a great interest in the country's museums. She donated the pavilion bearing her name to the Tel Aviv Art Museum. This pavilion of contemporary art also contains her unique collection of 15 miniature period rooms. In 1953 she established the Helena Rubinstein Foundation to coordinate her philanthropic endeavors, which included gifts to museums, colleges, and institutions for the needy, particularly women and children. The Foundation also established annual scholarships for young Israeli artists.

She wrote several books on beauty and health, including *The Art of Feminine Beauty* (1930), *This Way to Beauty* (1936), and *Food for Beauty* (1938). Her autobiography, *My Life for Beauty*, appeared in 1966.

Rubinstein has been quoted as saying, "There are no ugly women – only lazy ones."

[Isadore Barmash / Ruth Beloff (2nd ed.)]

RUBINSTEIN, IDA (1885–1960), Russian actress-dancer who won fame with Diaghilev's Russian Ballet. Born into a wealthy St. Petersburg family, she studied dance with the choreographer Michel Fokine. In the initial seasons of the Diaghilev Ballet in Paris, she created the leading roles in Fokine's *Cléopâtre* (1909) and *Schéhérazade* (1910), characteriza-

tions distinguished by her beauty and talent in mime. In 1915 she formed her own company for which she commissioned work from choreographers, writers and musicians. She also turned to serious drama and starred in new productions of the French classics. She commissioned and appeared in *Boléro* and *La Valse*, for which the music was written by the French composer Maurice Ravel. Becoming personally involved with the Italian poet-patriot Gabriele D'Annunzio, she presented his play *Le Martyre de St. Sébastien*, with incidental music by Debussy, in Paris and took it to other cities, including London (1931). Her last major appearance was in the premiere of the Arthur Honegger-Paul Claudel oratorio *Jeanne d'Arc au B-cher*, in Basle (1938).

RUBINSTEIN, ISAAC (1880–1945), rabbi, leader of Mizrachi and of Polish Jewry. Born in Dotnuva, Lithuania, Rubinstein was ordained a rabbi and also graduated from the faculty of law at Moscow University. He officiated as a rabbi in Genichesk, Ukraine (from 1906) and from 1910 was the government-appointed rabbi of Vilna. In 1919 he was elected to the Vilna rabbinat by the Orthodox, and in 1929 was elected as a Zionist and Mizrachi representative. From the date of his arrival in Vilna, Rubinstein engaged in activities in all spheres of Jewish life, especially during World War I, when he remained in Vilna and became one of the leading representatives of Vilna Jewry vis-à-vis the various occupying powers. During the Lithuanian regime in Vilna (1920), he was minister of Jewish affairs, and when Vilna returned to Polish rule he continued to be officially recognized as one of the heads of the community. From 1922 to 1939, he was a member of the Polish senate. He defended Jewish rights vigorously and his speeches made a great impression on Polish government circles. At the same time he was a leading member of Mizrachi and active in various capacities in the World Zionist Organization. After the 21st Zionist Congress (1939), he returned to Poland and remained with the community during the initial period of German and Soviet occupation. He made his way to the United States in 1941 and continued his work on behalf of Polish Jewry. He taught at the Yeshiva University in New York until his death.

[Getzel Kressel]

RUBINSTEIN, JOSEPH (1905–1978), Yiddish poet. Born in Skidel, Poland, Rubinstein published his first book of verse, *Modeln* ("Models") in Warsaw in 1939. His experiences as a war refugee in Alma-Ata, Kazakhstan, from 1941 until his return to Poland in 1946 were recorded in his epic *Megilas Rusland* ("The Scroll of Russia," 1960), the first volume of a poetic trilogy, *Der Driter Khurbn* ("The Third Catastrophe"), which chron-

icles the tragedy of Soviet Jewry and their undying devotion to their historic and religious heritage. In *Khurban Poyln* ("The Destruction of Poland," 1964), the second volume of the trilogy, he dealt with his unsuccessful effort to rehabilitate himself in postwar Poland. In *Yetsias Eyrope* ("Exodus From Europe," 1969), he described his travails before reaching the U.S. *Nakht oyf Nalevkes* ("Night on Nalevkes," 1949), the first of his books to be published in the U.S., consisted of lyrics written during a decade of wandering, as well as a reprint of *Modeln*, the original edition of which had been destroyed in Warsaw.

[Sol Liptzin]

RUBINSTEIN, SERGEY LEONIDOVICH (1889–1960), Russian psychologist, educator and author. Rubinstein was director of the Institute of Psychology in Moscow from 1943 to 1945. His major work, *Osnovy obshchey psikhologii* ("Foundations of General Psychology," 1946²), earned him the Stalin Prize in 1941. Rubinstein played a leading role in the efforts of the Soviet regime to construct an adequate body of psychological knowledge and theory based on Marxist materialism. While remaining faithful to Marx and following the physiological findings of Pavlov, he nevertheless came quite close to the theoretical interpretations of human behavior developed by European and American psychologists but met increasing criticism for relying too much on Western theories of psychology. In 1950 he was forced to resign in the wake of the "Pavlovianization" of Soviet psychology. Nevertheless his influence continued and he was greatly concerned with the place of psychology among the other sciences.

In his article "Voprosy psikhologicheskoi teorii" ("Questions of Psychological Theory," in: B. Simon (ed.), *Psychology in the Soviet Union* (1957), 264–78), he advocated a public debate in the press to decide whether psychology was a natural or social science or whether it had a special position as one of the humanities. He also gave impetus to the development of educational psychology, being sharply critical of the "two factor" or age and environment theory prevailing in the West. Soviet psychologists, influenced by Rubinstein, refused to accept the passive role assigned to the child in this interpretation of its development. According to Rubinstein, education and environment do not influence mental development automatically: their action is dependent on such other factors as the child's level of development, his relation to his environment, and the aims of his activity. Rubinstein's books include *Bytiye i soznaniye* ("Being and Consciousness," 1957), and *Printsipy i puti razvitiya psikhologii* ("Principles and Directions of Development in Psychology," 1959).

[Ernest Schwarcz]

RUBINSTEIN, WILLIAM D. (1946–), Australian-British historian. Born and educated in the United States, Rubinstein taught for many years at Deakin University in Victoria, Australia, and subsequently at the University of Wales-Aberystwyth, where he is professor of history. He wrote widely on the history of the Jews in Britain and Australia, and on the Holocaust, in such works as *A History of the Jews in the English-Speaking World: Great Britain* (1996) and *The Myth of Rescue* (1997). His works have emphasized the distinctiveness of the English-speaking world from continental Europe in its treatment of the Jews. He also wrote widely on British history and other topics. In 2002–4 he was president of the Jewish Historical Society of England. His wife, HILARY L. RUBINSTEIN (1946–), also wrote widely on Australian Jewish history, in such works as *Chosen* (1987) and *The Jews in Victoria, 1835–1985* (1986), and on philo-semitism and other subjects. The Rubinsteins also produced a two-volume history of Australian Jewry, *The Jews in Australia: A Thematic History* (1991).

RUBIO, MORDECAI (18th century), *hakham* in Hebron. Rubio spent his childhood in Jerusalem, where his aptitude for scholarly work was already evident. He acquired his Torah education in the *bet ha-midrash* of R. Isaac ha-Kohen, a prominent Jerusalem *hakham* of that period. After Rubio had moved to Hebron, R. Isaac ha-Kohen received a difficult query from Turkey on the subject of *hetter agunah* (permission to remarry for a wife whose husband has disappeared). He had it transferred to Rubio in order to hear the latter's opinion on the matter. R. Isaac wrote an enthusiastic approval to Rubio's responsum and referred to his disciple as "the friend of my soul, the perfect *hakham*" (Responso, *Shemen ha-Mor* (1793), "Even ha-Ezer," 31).

Rubio also distinguished himself as a communal worker, and in 1742 he traveled to the Oriental countries as the emissary of Hebron in order to raise financial support. In the late 1760s he set out on a second mission. His communal work and Torah erudition secured him a leading position among the *hakhamim* of Hebron. He was one of the leading *hakhamim* of the Keneset Yisrael yeshivah and was appointed head of the Hased le-Avraham Emet le-Ya'akov yeshivah. In 1774 Rubio was appointed rabbi of Hebron. During the following years, his signature appears on important documents of the community, including H.J.D. Azulai's credentials as an emissary (1775), those of R. Hayyim Abraham Israel Ze'evi (1774), and various *haskamot* ("letters of approval"). His work of responso, *Shemen ha-Mor* ("Oil of the Myrrh"), was published in 1793 after his death by his son, Abraham, who was Hebron's emissary in Leghorn.

BIBLIOGRAPHY: M. Rubio, *Shemen ha-Mor* (1793), introd.; Yaari, Sheluhei, index; M. Benayahu, *Rabbi Hayyim Yosef David Azulai...*, 2 vols. (Heb., 1959), index.

[Moshe Shapira]

RUBY, JACK (Jacob Rubenstein; 1911–1967), slayer of Lee Harvey Oswald, the alleged murderer of U.S. President John F. Kennedy. Ruby was born in Chicago. The shooting of Os-

wald on November 24, 1963, took place in the basement of the Dallas, Texas, police headquarters in full view of television cameras and millions of viewers. Ruby, a nightclub operator, was subsequently tried, convicted of murder and sentenced to death. The case was carried through various courts, and finally on October 5, 1966, the Texas Court of Criminal Appeals reversed the murder conviction on the grounds that the trial should have been removed from Dallas because of the prejudice there, and because certain police statements were improperly admitted into evidence. While preparations for a retrial were going on, Ruby died.

Prior to his involvement in the Oswald killing, Ruby ran nightclubs and dance halls during the 16 years he spent in Dallas. In regard to Oswald, the controversy continues as to whether Ruby acted alone and spontaneously as a loyal U.S. citizen outraged that his president had been assassinated or whether he was part of a larger conspiracy, assigned to silence Oswald – and then perhaps silenced himself.

[Ruth Beloff (2nd ed.)]

RUDAVSKY, DAVID (1903–1993), U.S. educator and professor of Hebraic studies. Rudavsky was born in Bialystok, Poland, and was taken to New York in 1910. From 1932 to 1942, Rudavsky was principal of the Florence Marshall Hebrew High School in New York. He then worked with the Jewish Education Committee (1942–48), and the Jewish Education Association of Essex County, New Jersey, as executive director (1948–56). A frequent contributor to the journal *Jewish Education*, he was its managing editor in 1944–46 and associate editor in 1946–48. From 1954 to 1957, he was active with the National Council for Jewish Education as vice president and then as president.

Rudavsky began teaching at New York University in 1945. He became program director of the university's School of Education in 1964, and in 1966 he became acting director of the Institute of Hebraic Studies in the university's graduate division of arts and sciences.

He also served as president of the National Association of Professors of Hebrew (1960–63) and co-edited that organization's publication, *Doron: Hebraic Studies* (1965), a collection of essays on Hebraic studies in universities. His articles in Jewish and general periodicals reflect Rudavsky's concern for Jewish education in the United States. In 1967 he published *Emancipation and Adjustment*, in which he discusses

the origins and development of contemporary Jewish movements and thought.

Other works by Rudavsky include *Israel through the Eyes of Its Leaders* (with I. Naamani and A. Katsh, 1971). He also edited *Hebraic Studies: Essays in Honor of Professor Abraham I. Katsh* (with I. Naamani and C. Ehle, 1965) and *Israel: Its Politics and Philosophy* (with I. Naamani and A. Katsh, 1974).

RUDEL, JULIUS (1921–), U.S. conductor and music administrator of Austrian birth. Rudel studied at the Vienna Academy of Music from 1936 to 1938, when he immigrated with his family to the United States. A further period of study followed at the Mannes School of Music in New York City. In 1943 he joined the New York City Opera Company and made his conducting debut there in *The Gypsy Baron* (1944). From 1957 to 1979, he was the company's musical director and developed it into one of the best companies in the United States. Rudel championed the cause of American opera, presenting the first performances of new stage works by American composers; he also presented the first American performances of many other contemporary operas, including Albert Ginastera's *Don Rodrigo Bomarzo* and *Beatrice Cenci*, and Hans Werner Henze's *The Young Lord*. From 1971 he was musical director of the Kennedy Center for the Performing Arts, Washington, D.C., and of the Caramoor Festival at Katonah, N.Y. He also appeared as guest conductor with leading American symphony orchestras (including the Buffalo PO, 1981–83) and other American opera companies; at the Vienna Volksoper (where he conducted a very successful German version of *Kiss Me, Kate* in 1956); in Israel; and at the Spoleto Festival in Italy. He made his debut at the Paris Opera in 1973. Rudel received numerous awards from American cultural organizations, and in 1961 the Austrian government bestowed on him honorary insignia for the arts and sciences. An award for young conductors was established in his honor in 1969. His recordings include Handel's *Giulio Cesare* with the New York City Opera, versions of Boito's *Mefistofele* and Massenet's *Thaïs* and *Cendrillon*.

[Max Loppert / Israella Stein (2nd ed.)]

RUDERMAN, DAVID B. (1944–), U.S. Reform rabbi, academician. Ruderman was born in New York City and received his B.A. from City College (1966) and his M.A. from Columbia University in 1968. He was ordained at *Hebrew Union College-Jewish Institute of Religion in 1971 and earned a Ph.D. in Jewish history from the Hebrew University of Jerusalem in 1975. HUC-JIR awarded him an honorary D.D. in 1996. While studying for the rabbinate, he taught Jewish history and thought at HUC-JIR's School of Education in New York; and while pursuing graduate work in Israel, he taught the same subjects to American students studying in Jerusalem. Although ordained as a rabbi, Ruderman chose a career in academia – beginning at the University of Maryland in College Park, Maryland, where he held the Louis L. Kaplan Chair of

Jewish Historical Studies (1974–83). As chairman of the Judaic Studies Committee, he was instrumental in establishing the Judaic Studies program at the University of Maryland, where he also won the Distinguished Scholar-Teacher Award in 1982.

In 1983, he was appointed professor of Religious Studies at Yale University in New Haven, Connecticut, and subsequently to the university's Frederick P. Rose Chair of Jewish History (1983–94). As chairman of the Advisory Committee on Judaic Studies (1990, 1993), he played a major role in organizing Yale's Program in Judaic Studies. During his tenure at Yale, he was also a visiting professor at the Jewish Theological Seminary (1986) and a Fellow at the Institute for Advanced Studies at Hebrew University (1987). In addition, he began an association as visiting professor (1991–98) at the annual Summer School in Jewish Studies at Hebrew University's Institute for Advanced Studies, where he became director of the annual Victor Rothschild Symposium in Jewish Studies, also held every summer (1998–2002). In 1994, Ruderman was appointed Joseph Meyerhoff Professor of Modern Jewish History and director of the Center for Advanced Judaic Studies (formerly, Annenberg Research Institute) at the University of Pennsylvania in Philadelphia, becoming Ella Darivoff Director of the Center for Advanced Judaic Studies in 2004.

Ruderman was the author of numerous articles on the history of Jewish intellectual thought and wrote several books in the field, including: *The World of a Renaissance Jew: The Life and Thought of Abraham B. Mordecai Farissol* (1981); *Heritage: Civilization and the Jews, Study Guide and Source Reader* (with William W. Hallo and Michael Stanislawski, 1984); *Kabbalah, Magic, and Science: The Cultural Universe of a Sixteenth-Century Jewish Physician* (1988); *Jewish Thought and Scientific Discovery in Early Modern Europe* (1995, rev. 2001; trans. Italian, 1999; trans. Hebrew, 2002); and *Jewish Enlightenment in an English Key: Anglo-Jewry's Construction of Modern Jewish Thought* (2000). Three out of his five books were singled out for awards: *The World of a Renaissance Jew* won the Jewish Welfare Board National Jewish Book Award for Jewish History in 1982; *Kabbalah, Magic, and Science* was a finalist for the National Jewish Book Award for Jewish Scholarship in 1988; and *Jewish Enlightenment in an English Key* won the Koret Book Award in Jewish History in 2001, as well as being a finalist for the National Jewish Book Award that same year. In addition, Ruderman is the co-author of several more books: *A Valley of Vision: The Heavenly Journey of Abraham ben Hananiah Yagel* (1990), which he translated from the Hebrew and for which he wrote the introduction and commentary; *Essential Papers on Jewish Culture in Renaissance and Baroque Italy* (1992), editor and author of introduction and two chapters; and *Preachers of the Italian Ghetto* (1992), editor and author of introduction and one chapter; *The Jewish Past Revisited: Reflections on Modern Jewish Historians* (1998), co-editor and contributor; and *Cultural Intermediaries: Jewish Intellectuals in Early Modern Italy* (2004), co-editor and author of the introduction.

In addition to his teaching and writing, Ruderman also served as a member of the board of directors of the *Central

Conference of American Rabbis (1987–89), as well as chairman of the CCAR's task force for Continuing Rabbinic Education (1989–92); president of the Association for Jewish Studies (1980–83); president of the American Academy for Jewish Research (2000–4); a member of the Academy Advisory Committee of Hebrew University's Mandel Center of Judaic Studies (2002–6); and a member of the editorial boards of many scholarly journals. In 2001, the National Foundation for Jewish Culture honored him with its lifetime achievement award for his work in Jewish history; in 2002, he was named one of the Top 100 teaching professors in the United States by the Teaching Company, which offers his audiotaped and videotaped courses for sale to the general public.

[Bezalel Gordon (2nd ed.)]

RUDERMAN, JACOB ISAAC (1901–1987), U.S. *rosh yeshivah*. Ruderman was born in Dologinovo (Delhinov), Russia, and in his youth was known as the “Delhinov *illui*.” He studied under the rabbis Moses Epstein and Nathan Zevi Finkel in Slobodka, and was ordained in 1926. In 1930 he arrived in the United States, and joined the faculty of the yeshivah previously established by his father-in-law, R. Sheftel Kramer, in New Haven, which soon moved to Cleveland. In 1933, Ruderman became rabbi of Congregation Tifereth Israel in Baltimore, where he organized the Ner Israel Rabbinical College. Unexpectedly, at least for outsiders, he succeeded in establishing a European-style yeshivah in the United States, one in which secular studies were not pursued but religious texts alone were studied. Under his guidance it became one of the leading yeshivot of America. In 1961 he established a branch of the yeshivah in Toronto, which was later headed by his son-in-law, R. Jacob Weinberg. Ruderman participated in the formation of *Torah Umesorah in 1944, and subsequently served as chairman of its rabbinical advisory board. He also was a member of the Moëzet Gedolei ha-Torah of Agudat Israel. Ruderman's novellae to Maimonides on the talmudic orders of *Kodashim* and *Tohorot* were published under the title *Avodat Levi* in 1930. His son-in-law became his successor.

[Aaron Rothkoff]

RUDICH, MAYER (1913–), Romanian poet and journalist. Rudich's first poems appeared in 1930 in the literary review *Cumpăna*, published in his native town, Buzău, by Eliahu *Meitus. After settling in Bucharest, he worked on the Zionist papers *Știri din lumea evreească* and *Renașterea Noastră*.

In 1945 Rudich published *La braț cu moartea* (“Hand in Hand with Death”), a documentary account of the expulsion of Romanian Jews to Transnistria during the Nazi period. In 1951 under the dominant Stalinist regime, Rudich was imprisoned together with other Romanian Zionist leaders. Though released in 1955, he was only allowed to leave for Israel in 1959. Thereafter he worked as an editor of the Tel Aviv Romanian-language daily, *Viața Noastră*.

In 1965 he published *Muntele Amintirilor* ("The Mountain of Memories"; Hebrew, *Har ha-Zikhronot*, 1969), a collection which includes both new poems written in Israel and some of his previous work. This reveals a significant change from the sad tone of his Diaspora verse to the brighter note of his writing in Israel. The book contains verse describing the landscape of Israel and his joy at its beauty. One section consists of poems expressing Rudich's revulsion at the crimes of the Nazis.

[Dora Litani-Littman]

RUDIN, family of U.S. real estate developers. **LOUIS RUDIN-SKY**, an immigrant from Poland, went to the Lower East Side of Manhattan in 1883 with nothing more than the change in his pocket. He became a grocer and in the 1920s his lawyer suggested he invest in real estate on 54th Street in midtown Manhattan. He bought the property sight-unseen because he had heard that John D. Rockefeller owned property on that block. His son, **SAMUEL**, built his first apartment house, a six-story tenement in the Bronx. By the time he died in 1975, Sam Rudin and his sons had developed some of the premier properties in Manhattan, including 345 Park Avenue, where the Rudin Management Company had its headquarters.

LEWIS (1927–2001) concentrated in building management and leasing while his brother **JACK** (1924–) handled construction and development. They were subsequently joined by Lewis's son **WILLIAM** (1955–), who became president of Rudin Management in 1994. The Rudins presided over 40 buildings valued at \$2 billion, including more than 3,500 apartments in 22 Manhattan buildings. Their holdings also embraced 16 office towers. The family almost never let go of a property once it was in their portfolio, and rarely ventured outside New York for real-estate projects. It became intimately involved in trying to improve New York City as a place to live. Sam Rudin is remembered each year with the New York Marathon Samuel Rudin Trophy. The family has been a major supporter of the event since the mid-1970s; Sam was a marathon runner himself. To popularize the marathon, which became one of the most famous in the world, having grown from 127 runners in 1970 to more than 30,000 by 2005, Lewis Rudin enlisted corporate executives and labor leaders. He also rallied them to help New York City during its darkest moments, helped move the United States Open tennis championship to Flushing, Queens, and helped gain landing rights in New York for the Concorde jet. When New York faced possible bankruptcy in 1975, Lewis Rudin persuaded other developers and corporate leaders to prepay \$600 million in property taxes, enabling the city to avoid a fiscal disaster. Lewis's friends spanned a broad stretch of New York figures, and his annual break-the-fast party at the Regency Hotel at the end of Yom Kippur drew hundreds of relatives and friends. He had become a major force in the civic arena in 1971 when he formed the Association for a Better New York with Howard

J. Rubenstein, Preston Robert *Tisch, and others. The Rudins were major philanthropists, giving to medical, educational, and religious-based charities. They set up scholarships and internships, professorships and lecture series. They aided Memorial Sloan-Kettering Cancer Center, the George C. Marshall Foundation, the Boy Scouts of America, the New York City Commission on the Homeless, and the Hereditary Disease Foundation. The Rudin buildings were individually owned, and the next generation, including Eric Rudin, Beth Rudin DeWoody, Max Rudin Johnson and Madeleine Rudin, were on the executive committee.

[Stewart Kampel (2nd ed.)]

RUDIN, A. JAMES (1934–), U.S. rabbi and interreligious leader. Rabbi Rudin, a native of Pittsburgh, Pennsylvania, grew up in Alexandria, Virginia. He attended Wesleyan University and received his B.A. degree with academic distinction from George Washington University (1955). Rudin received his master's degree and rabbinical ordination from Hebrew Union College-Jewish Institute of Religion (1960) and did graduate studies in American history at the University of Illinois. He received two honorary doctorates, one from HUC-JIR (1985) and the other from Saint Leo University in Florida where he was Distinguished Visiting Professor (2000).

Upon ordination, Rabbi Rudin served congregations in the U.S. Air Force as a chaplain in Japan and Korea. He then was USAF Chaplain Japan & Korea, 1960–62.

He was assistant rabbi of Congregation B'nai Jehudah, Kansas City, MO (1962–64) and rabbi of Sinai Temple, Champaign, Illinois (1964–68). In 1964 he participated in an interreligious, interracial voting rights drive in Hattiesburg, Mississippi.

He was a member of the AJ Committee's staff for 32 years retiring in 2000. He was first assistant interreligious affairs director of the American Jewish Committee (1968–1983) working with Marc Tannenbaum, a pioneer in the field of interreligious relationship, and then as his successor as National Interreligious Affairs (1983–2000). Under his leadership, the AJC became the internationally acknowledged leader in Christian-Jewish and Muslim-Jewish relations. He was responsible for developing the American Jewish Committee's work with Evangelicals and with Roman Catholics as well as mainline Protestant churches and later with Islam. He was also an expert on cults. Rudin was a founder of both the National Interreligious Task Force on Soviet Jewry and the National Interreligious Task Force on Black-Jewish Relations.

He continued his involvement with AJC as its senior interreligious advisor and as a member of the organization's board of governors.

He was chairman of the International Jewish Committee for Interreligious Consultations and participated in ten meetings with Pope John Paul II. Rudin also participated in historic meetings with the World Council of Churches in Geneva and with Eastern Orthodox Christian leaders in Greece. In 1997 the Polish Council of Christians and Jews

presented Rudin with its “Person of Reconciliation Award” at a ceremony in Warsaw. In 2003, he received the Golden Medallion Award from the International Council of Christians and Jews.

He worked in close consultation with leaders of the well-known Oberammergau Passion Play that is presented every ten years in Germany. It was his leadership efforts that resulted in many positive changes in the portrayal of Jews and Judaism at Oberammergau in 1990 and again in 2000.

Rudin is the author or editor of eight books: *Twenty Years of Catholic-Jewish Relations* (1986); *Evangelicals and Jews in Conversation*, (1978); *A Time to Speak: The Evangelical-Jewish Encounter* (1987); *Evangelicals and Jews in an Age of Pluralism* (1989); *Prison or Paradise: The New Religious Cults* (1980); *Why Me? Why Anyone?* (1986); and *Israel for Christians: Understanding Modern Israel* (1983); and *The Baptizing of America: The Religious Right's Plan for the Rest of us* (2005).

In 2006 he served as a member of the New York State Task Force on Life and the Law, an interdisciplinary group that focuses on bioethical legislation and issues. Rudin was also a member of the Camp David/Presidential Retreat Interfaith Chapel Committee and the Martin Luther King, Jr. Federal Holiday Commission.

From 1991 he penned weekly commentaries for the Religion News Service (RNS)/Newhouse Syndicate.

Rudin's wife, the former Marcia Kaplan, wrote with her husband. One of their two daughters, Rabbi Eve Rudin, is a senior staff member of the Union for Reform Judaism in New York City.

[Michael Berenbaum (2nd ed.)]

RUDIN, JACOB PHILIP (1902–1982), U.S. Reform rabbi. Rudin was born in Malden, Massachusetts, and received his B.A. from Harvard College in 1924. In 1928, he was ordained at the *Jewish Institute of Religion, which awarded him an honorary D.D. in 1981. After ordination, he served as assistant rabbi under Stephen S. *Wise at the Free Synagogue in New York as well as an assistant to the president of the Jewish Institute of Religion (1928–30). In 1930, he became rabbi of Temple Beth-El in Great Neck, New York, where he was to remain for the rest of his life (emeritus from 1971). He enlisted in the United States Navy Chaplains' Corps and saw duty in the Pacific and in the Aleutians during World War II. A brilliant orator, his preaching attracted large audiences; under his guidance, Temple Beth-El grew to more than a thousand members.

As one of the leading rabbis on Long Island, Rudin played a prominent role in the affairs of the Jewish community of the region, creating an interfaith group of local clergy and serving as president of the New York Metropolitan Association of Reform Rabbis and a member of the executive board of the New York Board of Rabbis. He quickly emerged as a leader on the national scene as well: in the Reform movement, he was a member of the board of governors of HUC-JIR, as well as president of its alumni association and a member of the executive

board of the *Union of American Hebrew Congregations. He also served on the executive board of the *Central Conference of American Rabbis before being elected president of the CCAR in 1957. As president – much as he had done previously, when warning against Nazism as early as 1933 and attacking McCarthyism in the 1950s – he took a strong stand against segregation and in favor of the process of school integration that was beginning in the South. He was also instrumental in keeping the New York City campus of HUC-JIR open and functioning, in spite of pressures to move it to Cincinnati.

In 1967, he became president of the Synagogue Council of America, in which capacity Rudin – an outspoken critic of the Vietnam War – was appointed by President Lyndon Johnson to an observer team for the Vietnamese elections. He also represented American Jewry at the funeral of Martin Luther King, Jr., in 1968.

An editor of the *Jewish Institute Quarterly*, Rudin wrote *So You Like Puzzles* (1934), *A Children's Haggadah* (1936), and a collection of his sermons, *Very Truly Yours* (1971, edited by Jack *Stern).

[Bezalel Gordon (2nd ed.)]

RUDIN, SCOTT (1958–), U.S. producer. Born in New York City, Rudin began working at 15 for theater producer Kermit *Bloomgarden and later for Robert Whitehead and Emanuel *Azenberg. Rather than attending college, Rudin served as a casting director for such shows as: *Pippin* (1972); *Annie* (1977); *Stages* (1978); and *Working* (1978); and for the New York-based films *King of the Gypsies* (1978); *The Wanderers* (1979); *Simon* (1980); and *Resurrection* (1980). Rudin moved to Los Angeles in 1980 to work for Edgar J. Scherick, producing the films *I'm Dancing as Fast as I Can* (1982), *Mrs. Soffel* (1984), and *Reckless* (1984). In 1983, he founded Scott Rudin Productions. Rudin entered 20th Century Fox as a producer in 1984, and by 1986 he was president of the company. He left the studio at 29, becoming the producer of a string of hits, including: *Regarding Henry* (1991); *Little Man Tate* (1991); *The Addams Family* (1991); *Sister Act* (1992); *The Firm* (1993); and *Addams Family Values* (1993). In the early 1990s, Rudin returned to Broadway. His first production, *Face Value* (1993), never officially opened, but his second theatrical effort, the musical *Passion* (1994), earned him a Tony Award and a Drama Desk Award. While Rudin's feature comedy *Clueless* (1995) achieved critical and box-office success for Paramount, his remake of *Sabrina* failed. Other successful Rudin productions at Paramount included: *Mother* (1996); *In & Out* (1997); *The Truman Show* (1998); and *The Hours* (2002) – a joint effort of Paramount and Miramax. Rudin continued to produce shows for Broadway, including the revival of: *A Funny Thing Happened on the Way to the Forum* (1996–98); *The Chairs* (1998); *Closer* (1999) – a 2000 film adaptation by Rudin received a Golden Globe nod – and *Copenhagen* (2000), which earned Rudin a second Tony Award. Rudin also worked with Disney, producing such films as: *Ransom* (1996), *A Civil Action* (1998), and the Wes Anderson film *The Royal Tenenbaums* (2001), which

Paramount passed on. In 2005, after Harvey and Bob *Weinstein left Disney-owned Miramax Films, Rudin announced he was leaving Paramount for Disney.

[Adam Wills (2nd ed.)]

RUDINOW, MOSHE (1891–1953), *hazzan*. Born in Lyubich, Ukraine, Rudinow became a *meshorer* in Chernigov and in 1905 alto soloist at the Brodski Synagogue in Kiev, under the leadership of conductor A.I. Dzimitrowski. He also appeared in Kiev as soloist in the first concert of Joel Engel's music. Rudinow became a member of the Odessa Opera and conductor of the Ha-Zamir Society in Odessa and Kherson. In 1917 he married the singer Ruth Leviash with whom he gave joint recitals in Russia and Poland (1920–25) and Palestine (1925–27). In 1927 he moved to the United States and joined the musical staff of Temple Emanuel in New York under the leadership of Lazare Saminsky. After six months as choir soloist, he was appointed cantor. Rudinow also appeared in recitals and operatic concerts with Leopold Stokowski.

RUDMAN, WARREN (1930–), U.S. senator. Rudman was a native of Nashua, New Hampshire, where he was educated in its public schools and where he became an Eagle Scout in 1945 before going to Valley Forge Military School for high school (1948). He attended Syracuse University for his B.A. (1952) and Boston College Law School (1960). He was then admitted to the New Hampshire Bar. He served as attorney general of New Hampshire from 1970 to 1976 and as president of the National Association of Attorney Generals for 1975–76. Elected to the Senate in 1980 after emerging as the moderate in a crowded New Hampshire race of 11 Republican primary candidates, he was a member of the Senate Appropriations Committee where he became a budget hawk, seeking a balanced budget and caps on spending. He is best remembered for the Gramm-Rudman-Hollings Act, which he authored together with the Republican senator from Texas and the Democrat from South Carolina, that called for a pay as you go budget and set the climate for a balanced budget that was achieved during the latter part of the Clinton administration. He was deeply involved in the Iran-Contra hearings, an investigation as to whether the Reagan administration had traded arms for hostages and illegally funneled funds to the Contras contrary to an explicit act of Congress. Despite considerable popularity, Rudman left the Senate in 1992, declining to run for a third term. In private practice he was a member of the Concord Coalition, a bi-partisan citizen group interested in pushing budget reform. He was also appointed by President Bill Clinton a member of the Foreign Intelligence Advisory Board, its acting chairman in 1995–96 and chairman in 1997–2001. He was on the board of the influential Council on Foreign Relations and spoke out often on issues of foreign and economic policy, especially in the areas of intelligence.

[Michael Berenbaum (2nd ed.)]

RUDNER, RITA (1956–), U.S. comedian, stage and screen actress, and author. Rudner was born in Miami, Florida, the daughter of Abe (an attorney) and Frances (a homemaker). Rudner dreamed of show business as a child, and after she lost her mother to cancer at 13, she graduated high school at 15, giving her father this ultimatum: “Let me go to New York or I’ll run away.” Within three months, Rudner got a job dancing in the road company of *Zorba the Greek*. She worked in other Broadway shows and did commercials for 10 years. In 1980, she was cast in the Broadway production of *Annie*, and also did her first stand-up act at the comedy club Catch a Rising Star, “because there weren’t too many female comedians.” Rudner dressed in evening gowns and cultivated a quiet, minimalist presentation of funny stories. She was called demure. In 1986, British theatrical producer Martin Bergman brought her to the U.K. They married in 1988. That same year, Rudner made her film debut (*The Wrong Guys*) and co-hosted a TV program *Funny People* (with Leeza Gibbons, produced by *Rowan and Martin’s Laugh-In* creator George Schlatter). Rudner wrote *Naked Beneath My Clothes* (1992), short, amusing meditations on love, family, food, and fashion (and won that year’s Emmy for the audio version). In 1994, *Rita Rudner’s Guide to Men* was published. She turned to fiction with *Tickled Pink* (2001), a semi-autobiographical novel about two women trying to make it in the show business in the 1980s. She also cowrote the film *Peter’s Friends* with her husband in 1992 and wrote the teleplay to the U.S.A. Network cable movie *A Weekend in the Country* (1996). Rudner’s many TV appearances include the Carson, Leno, and Letterman shows, as well as several HBO specials and a syndicated show, *Ask Rita*; she has also written for the Academy Awards show. In 2002 she began a long-term engagement performing at the New York-New York Casino in Las Vegas, where a new theater was built for her and where she sold her 500,000th ticket in 2005.

[Amy Handelsman (2nd ed.)]

RUDNICKI, ADOLF (1912–1980), Polish novelist and author. Originally a Warsaw bank clerk, Rudnicki began his literary career at the age of 20, when he published the psychological novel *Szczury* (“Rats,” 1932). His second work, *Żołnierze* (“Soldiers,” 1933), a penetrating description of Polish society and its conflicting ethnic groups between the world wars, roused a storm of protest from the Fascist and reactionary circles which the author had singled out for attack. Three subsequent works were *Niekochana* (“The Unloved,” 1936), *Lato* (“Summer,” 1938), and *Doświadczenia* (“Experiences,” 1939). After the collapse of the Polish army in 1939, Rudnicki managed to escape to Lvov in Soviet-occupied Poland, where he remained during 1940–41, contributing to the periodical *Nowe Horyzonty*. He later fought in the 1944 Warsaw uprising and after the war wrote for the weeklies *Kuźnica* and *Swiat*, moving from Lodz to Warsaw in 1950. Rudnicki’s postwar works analyzed the problems and tragic aspects of the Nazi occupation. A second edition of *Doświadczenia*, titled *Profile i drobiazgi żołnierskie* (“Profiles and Soldiers’ Trifles”), appeared in 1946. The Nazi

nightmare, antisemitism, and the fate of Polish Jewry dominate many of his later works, which include the cycle *Epoka pieców* ("Time of the Gas Chambers," 1949) and collections of short stories such as *Żywe i martwe morze* (1952, 1955²; "The Dead and the Living Sea," 1957), *Szekspir* ("Shakespeare," 1948), and *Młode cierpienia* ("Young Suffering," 1954).

Among Rudnicki's other works was the drama *Manfred* (1954), and he edited a volume on Auschwitz entitled *Wieczna pamięć* 1955; "Lest We Forget," 1955). In his column "Niebieskie kartki" ("Blue Cards") which he published regularly in *Świat* until 1968, the writer dealt with a wide range of subjects. Three collections of these columns were *Ślepe lustro tych lat* ("The Blind Mirror of These Years," 1956), *Prześwity* ("Afterglows," 1957), and *Wspólne zdjęcie* ("The Group Photograph, 1967). The suppression of Rudnicki's "Blue Cards" followed the mounting anti-intellectual and antisemite campaign in Poland after the Six-Day War of 1967.

[Stanislaw Wygodzki]

°RUDOLF I (of Hapsburg), king of Germany and Holy Roman emperor, 1273–91. In 1275 Rudolf confirmed a papal bull against *blood libels, adding that Christian and Jewish witnesses were necessary for sentencing a Jew. In 1286 Rudolph supported the archbishop of *Mainz against the tumultuous burghers who opposed any investigation of a blood libel. Nevertheless, such accusations as well as Rudolf's oppressive taxation influenced the Jews of the Rhineland to leave in large numbers for the Holy Land, under the leadership of *Meir b. Baruch of Rothenburg. Rudolf decreed, in accordance with the concept of **servi camerae regis*, the immediate confiscation of the property of Jews who had left. When the burghers of Mainz refused to give up such property, Rudolf compensated the archbishop of Mainz by granting him jurisdiction over the Jews of *Thuringia, Ostmark, and *Meissen. R. Meir was arrested and imprisoned in Ensisheim by Rudolf and an exorbitant ransom was posted for his release. Rudolf was offered 20,000 marks for Meir's release and for the punishment of the instigators of blood-libel pogroms in Oberwesel and *Boppard. Rudolf accepted the money, guaranteeing the life and property of Jews in the two communities, but he did not release R. Meir, who died in confinement.

°RUDOLF II (of Hapsburg; 1552–1612), Holy Roman emperor and king of Bohemia from 1576. His reign was a period of growth for the Jewry of his dominions, particularly the community of *Prague (where he resided most of the time). He was in constant touch with Mordecai *Meisel, who served him both as banker and as supplier of objects for his art collections. Rudolf was noted for his patronage of the arts and crafts and in 1577 he granted the Jewish goldsmith Joseph de Cerui the privilege of working at his craft in various districts of

Prague. In 1586 he granted a similar privilege to Jacob Goldscheider, covering not only Prague but also the royal cities open to Jewish residence. In 1592 he received *Judah Loew b. Bezael (Maharal) in audience and in 1598 renewed the permit for a Jewish printing house (*Kohen) in Prague. In the same year, he allowed Elias *Halfanus to practice medicine in Vienna. In 1593 he mediated a conflict between the Jewish and the gentile furriers of Prague. Rudolf created the category of the *Hofbefreiter Jude* (1582), Jews attached to the court and enjoying such privileges as exemption from taxes and from wearing the Jewish *badge. Such Jews were under the jurisdiction of the court's chief marshal (*Oberhofmarschall*) and had the right to live wherever the imperial court sojourned. From them the institution of the *Court Jew developed, which led to the de facto reestablishment of communities in Vienna and in Regensburg. In 1583 Rudolf II granted his support to the apostate *Elhanan (Paulus Pragensis) to publish a Hebrew translation of the New Testament. The mentally unstable emperor fell under the influence of his valet, Philipp Lang von Langenfels (d. 1610), a Jew from Tyrol who had been baptized in his youth, and thereafter dukes and ambassadors had to secure von Langenfels' support in order to influence Rudolf. When he was imprisoned in 1608, von Langenfels was in possession of 300,000 florins. The Jewish Prague of Rudolf's time is mirrored in Leo *Perutz' novel, *Nacht unter der steinernen Bruecke*, 1953.

[Meir Lamed]

RUDOLF, MAX (1902–1995), U.S. conductor of German birth. Born in Frankfurt on the Main, Rudolf attended the university there and later graduated from the Hoch-Conservatorium fuer Musik. After serving as a coach at the Freiburg Opera (1922–23), he became conductor at Darmstadt at the early age of 25 (from 1923 to 1929). From 1929 to 1935, he made Prague his base as an opera and symphonic conductor at the German Theatre. In 1935 he went to Sweden, until 1940, when he immigrated to the United States, and joined the staff of the Metropolitan Opera Company, of which he became artistic administrator in 1950. He remained at the Metropolitan for 13 seasons. In 1958, Rudolf became chief conductor of the Cincinnati Symphony Orchestra, a post he retained until 1970, when he joined the Curtis Institute of Music, Philadelphia (1970–73). He published *The Grammar of Conducting* in 1950. His recordings include *Hänsel und Gretel* (in English) and *Don Giovanni*.

[Max Loppert / Israela Stein (2nd ed.)]

RUDOLPH (12th century), monk of French origin, preacher of the Second *Crusade in Germany, mainly in the Rhineland. His activity is recorded in the chronicle of *Ephraim b. Jacob of Bonn and the letters of *Bernard of Clairvaux. When recruiting the crusaders in 1146, Rudolph incited them to persecute the Jews by telling them: "Let us first avenge the crime of the crucifixion on the enemies amongst us and then wage war on the Jerusalemites [Muslims]." Intervening with letters to protect the Jews, Bernard of Clairvaux even traveled in person to Germany, declaring: "Whoever makes an attempt on the life of a Jew sins as if he had attacked Jesus himself." He also emphasized Rudolph's canonically irregular status since he had fled from his monastery and was not authorized to preach. Finally, he recalled the example of Peter the Hermit in the First Crusade: he too had instigated persecutions of the Jews but all who had marched with him to the Orient had perished miserably. It was to be feared, said Bernard, that the Christians who followed Rudolph on this occasion were marching toward a similar catastrophe.

[Bernhard Blumenkranz]

RUDOLPH, MARVIN ("Mendy"; 1928–1979), NBA referee from 1953 to 1975. Born to Harry, a noted referee who later became commissioner of the semi-professional Eastern Basketball League, Rudolph began his career officiating at the JCC in his hometown of Wilkes-Barre, Pa. In 1946 he became a licensed referee, and began officiating in the EBL. By 1952, the senior Rudolph sensed that his son needed to be more independent, and encouraged him to switch leagues. Rudolph joined the NBA in 1953 and was to set a new standard of durability, officiating at over 90 games per season. However, it was the quality of Rudolph's officiating that won him the respect of league officials, coaches, and players alike. In 1969, Rudolph was appointed the league's chief of referees. In a game at Washington in April 1975, Rudolph collapsed and had to be carried off the court. Doctors discovered a blood clot and advised him of the dangers of continuing to referee games. On November 9, 1975, Rudolph announced his retirement, but continued working as a sportscaster, serving as expert commentator for CBS's *Game of the Week*. Rudolph officiated at a then-record 2,113 games over 23 seasons, a record only surpassed by Hall of Fame referee Earl Strom, who worked for 30 seasons in the NBA. Strom, another Jewish Pennsylvanian, described Rudolph as "simply the greatest referee of all time." Before his death in 1994, Strom petitioned the Basketball Hall of Fame to induct Rudolph, but to no avail. Nevertheless, Rudolph is remembered in the basketball world as one of the most astute and fair referees to work the game. Rudolph, who died of a pulmonary aneurism at age 53, was a recipient of the Maurice Stokes Memorial Award in 1975.

[Robert B. Klein (2nd ed.)]

RUEBNER, TUVIA (1924–), Hebrew poet and translator. Born in Bratislava, Slovakia, Ruebner settled in Erez Israel in 1941, where he became a member of Kibbutz Merhavayah, working as shepherd, teacher, and librarian. While his early writings were in German, he published Hebrew poems from 1953, first in *Al ha-Mishmar* and then in literary supplements and journals.

Eight volumes of his poetry have appeared: *Ha-Esh ba-Even* ("The Fire in the Stone," 1957); *Shirim Limzo Et* ("Poems to Find Time," 1961); *Kol Od* ("As Long As," 1967); *Ein Lehashiv* ("Unreturnable," 1971); *Shemesh Hazot* ("Midnight Sun," 1977); *Pesel u-Masekhah* ("A Graven and Molten Image," 1982); and *Ve-el Mekomo Sho'ef* ("And Hastens to His Place," 1990). A selection of his poems appeared in 1970, and 2000 saw the publication of *Shirim Meuharim* ("Late Poems"). Ruebner's poetic language blends together contemporary Hebrew and classical Hebrew, while interweaving vivid images, word play, and ironic twists. Though nature and landscape are often the poetic scenery, Ruebner has always remained an outsider in his new home. Echoes of European, particularly German literature, and longings for past or lost regions mark his writing. Dan Pagis maintained that Ruebner's work "exhibits what amounts to an obsession with time and with the need for retaining values in a world of crumbling security." In 1974 Ruebner was appointed professor of Comparative Literature at Haifa University. Since 1990 a number of poetry collections in German appeared, including: *Wuestenginster* (1990), *Granatapfel* (1995), and *Zypressenlicht* (2000). Ruebner wrote a book on Lea Goldberg, translated Agnon's novel *Shirah* into German, and edited A.L. Strauss's *Be-Darkhei ha-Sifrut* (1959). A collection of poems he wrote over 50 years (1957–2005) appeared in 2005 under the title *Ikkevot Yamim*. He received the Swiss D. Steinberg Prize (1981) and the German Christian-Wagner-Prize. Upon the initiative of his German publisher, Ruebner wrote down his life story in German, *Ein kurzes langes Leben: Von Pressburg nach Merchavia* (2004).

A list of his works in English translation appears in Goell, Bibliography and further information is available at the ITHL website at www.ithl.org.il.

[Getzel Kressel / Anat Feinberg (2nd ed.)]

RUEDENBERG, REINHOLD (1883–1961), German electrical engineer. Born in Hanover, Ruedenberg was the chief electrical engineer of a leading German company. From 1917 to 1927, he was a professor at the Technische Hochschule of Berlin-Charlottenburg. After the Nazis came to power, he went first to London, and then in 1939 to Harvard Univer-

sity in the U.S. His many books include: *Energie der Wirbelstroeme* (1906), *Theorie der Kommuntation* (1907), and *Elektrische Schaltvorgaenge* (1923).

°**RUEDIGER (Hutzmann)**, bishop of *Speyer, Germany, from 1073 to 1090. Ruediger enlarged and fortified the city, encouraging Jewish refugees to settle and augment its prosperity and prestige by granting them a charter of privileges (Sept. 13, 1084), one of the earliest and most magnanimous of medieval charters. A contemporary Jewish source emphasizes Ruediger's fatherly and benevolent attitude. In 1090 he took steps to have the rights of the Jews confirmed by his ally, *Henry IV. His successor saved most of the Speyer Jewish community from massacre during the First Crusade (1096).

RUEF, ABRAHAM (1864–1936), U.S. politician. Ruef, who was born in San Francisco, was a precocious student at the University of California, graduating at 18 with high honors and gaining admission to the bar three years later. A brilliant attorney, he first entered city politics as an idealistic young Republican reformer, but he soon lost faith in the possibilities of reform. In 1901, when the Union Labor Party of San Francisco was created, Ruef opportunistically took control of it and secured the election of his friend Eugene E. Schmitz as its candidate for mayor. Four years later, he also secured the election of the entire Union Labor ticket for the board of supervisors, which had authority over both city and county, and thus gained almost complete control of the government. The San Francisco Graft Prosecution revealed that Ruef had received huge attorney's fees from public utility corporations and had bribed most of the supervisors with part of the money. He was convicted of bribery in 1908 and served a sentence in San Quentin penitentiary from 1911 to 1915. Released partly through the efforts of Fremont Older, the newspaper editor who had helped initiate the investigation, Ruef amassed a fortune in real estate; it was swept away in the depression of the 1930s.

RUEFF, JACQUES (1896–1978), French economist. Born in Paris, during World War I he served with the French liaison team for the American Expeditionary Force. In 1923 he qualified as an inspector of finance and in 1926 joined the personal staff of Raymond Poincaré, who was both prime minister and finance minister. In 1927 he went to the League of Nations where he worked on monetary reform for Greece, Bulgaria, and Portugal, and then moved to London as financial attaché of the French embassy. In 1934 Rueff returned to the Finance Ministry again, concerned with the stabilization of the French currency. At the outbreak of World War II, Rueff was vice governor of the Bank of France, but resigned a year later to rejoin the government finance inspection ser-

vice. After World War II, he was concerned with reparations, first for France, and then as head of the Inter-Allied Reparations Agency in Brussels. From 1958 to 1962, he sat on the Court of European Communities in Luxemburg, for the second half of the period as its chief justice. Informally he was the financial counselor to De Gaulle and was instrumental in designing France's successful 1958 reform. In 1964 Rueff was elected to the Académie Française, one of the few economists so honored. Over the years, his major concern was the advocacy of monetary discipline, and advising France and other countries to return to the gold standard to prevent depreciation and inflation.

Rueff was a prolific author. His major publications include: *Des Sciences physiques aux sciences morales* (1922); *From the Physical to the Social Sciences* (1929); *Sur une théorie de l'inflation* (2 vols., 1925); *L'Ordre social* (1945); *Epître aux dirigeants* (1949); *La régulation monétaire et le problème institutionnel de la monnaie* (1953); *Discours sur le crédit* (1962, 1967³); *L'Age de l'inflation* (1963; *The Age of Inflation*, 1964); and *Les Dieux et les rois* (1967).

°**RUEHS, CHRISTIAN FRIEDRICH** (1781–1820), nationalist professor of history and Scandinavian studies in Berlin. After the Congress of *Vienna, he opposed Jewish emancipation in a pamphlet entitled *Ueber die Ansprueche der Juden an das deutsche Buergerrecht*, which was answered by Michael *Hess, Saul *Ascher, and others. In this work, Ruehs maintains that Jewry already constitutes a nation complete with laws and aristocracy (rabbis) and therefore cannot be granted citizenship in a Christian state. An unbridgeable gap exists between Germans and Jews, stemming from their inherently opposing natures. Jews may be tolerated only as a subject nation and the medieval restrictions must be reapplied. The basic characteristics of Judaism being arrogance, authoritarianism, and abhorrence of work, only full conversion makes a Jew fit for equality. While Ruehs believed himself to be objective and free of prejudice, he took pride in never having had any social contact whatsoever with Jews. J.F. *Fries published a favorable review of his work.

Wuthenow (eds.), *Antisemitismus, Zionismus, Antizionismus 1850–1940*, (1997), 10–34; E. Sterling, *Judenhaß. Die Anfänge des politischen Antisemitismus in Deutschland 1815–1850* (1969); J. Katz, *From Prejudice to Destruction. Anti-Semitism 1700–1933* (1980).

RUELF, ISAAC (1831–1902), rabbi, early advocate of *Ḥibbat Zion and political Zionism. Born in Rausch-Holzhausen, a village in Hesse, Ruelf worked as a teacher until his rabbinical ordination in 1857. In 1865 he received his academic degree from the University of Rostock. In the same year, he became the rabbi of Memel and continued in this capacity until his

retirement. He spent his last years with his family in Bonn. As the rabbi of Memel, he began a new page in the history of the rabbinate of Western Europe. He took an interest in the East European Jews who lived on the other side of the German-Russian border and organized relief projects for them, especially during the years of famine at the end of the 1860s. He made two trips to Russian Lithuania, the first in order to acquaint himself with the lives of East European Jews and the second after the outbreak of pogroms against Russian Jewry at the beginning of the 1880s. He published his impressions of these two trips in *Meine Reise nach Kowno* (1869), and *Drei Tage im juedischen Russland* (1882). In these works he writes with great sympathy and affection of rooted Jewish life in the East, which he compares favorably with the rootlessness of Jewish life in the West. His name became so intimately associated with various relief projects undertaken on behalf of Russian and Lithuanian Jews that he became known as “Doktor Huelf” (meaning “help”).

Ruelf was profoundly influenced by *Pinsker’s *Autoemanzipation* (1882) and in 1883 published a book in German with the Hebrew title of *Aruchas Bas Ami* (*Aruḥat Bat Ami*), in which he discusses the Jewish problem in Europe and the ways of solving it. Ruelf’s book is distinguished by its clear designation of Erez Israel as the location for the solution, and by its insistence on the value of speaking Hebrew in the future Jewish state, which is explicitly mentioned. Pinsker acknowledged that Ruelf’s book complemented his own. After this Ruelf became active in the Ḥibbat Zion movement, and with the appearance of *Herzl, he became one of his greatest admirers. With the emergence of the rabbinical protest in Germany against the holding of the First Zionist Congress in Munich (see *Protestrabbiner), Ruelf was one of the few Western rabbis to come out strongly against the anti-Zionist rabbis. He was also one of the first to clarify the question of “dual loyalty,” i.e., of the relation between German citizenship and Zionism. He was active in the affairs of the World Zionist Organization and the German Zionist Federation until the end of his life.

Ruelf published a number of philosophical works, including: *Wissenschaft des Weltgedankens und der Gedankenwelt* (2 vols., 1888); *Wissenschaft der Krafterinheit* (1895); *Wissenschaft der Geisteseinheit* (1898); and *Wissenschaft der Gotteseinheit* (1888–1903). He also acted as the editor of the daily newspaper *Memeler Dampfboote*. *Aruchas Bas Ami* was published in a Hebrew translation with the addition of correspondence, a monograph, and a bibliography by A. Levinson (1946).

RUFEISEN, JOSEPH (1887–1949), Czechoslovakian Zionist leader. Born in Ostrava, at the age of 14 Rufeisen founded a Zionist society among the secondary school pupils of his town. He studied law in Vienna, where he became one of the leaders of the movement of Zionist students and a founder of the

Ha-Koah sports society. On completing his studies in 1910, he settled in his native town as an advocate. When the Czechoslovak Republic was established in 1918 Rufeisen was among the founders of the Jewish National Council and was elected president of the Zionist District Committee of Moravia and Silesia. In 1921 he was elected president of the Zionist Organization of Czechoslovakia, whereupon the headquarters of the movement were transferred from Prague to Ostrava. He held this position until the spring of 1938 when he left for Palestine. He attended all the Zionist Congresses from 1921 on and was a member of the Zionist Actions Committee and the central judicial and economic institutions of the World Zionist Organization. In Palestine he settled in Tel Aviv and was alternately president and vice president of the Association of General Zionists, as well as president of the Association of Czechoslovak Immigrants.

Rufeisen was convinced that the future of the Jewish people was linked to the future of Erez Israel, and he therefore considered the rapid development of the land to be its principal task. He was involved in most of the national economic enterprises while at the same time he turned his attention to the human element required for the realization of Zionism – and especially to the pioneering movement. Rufeisen was among the leaders of General Zionists and maintained an alliance with the Zionist-Socialist camp. In political matters, he was among the active supporters of *Weizmann. Although he was in favor of “work in the present” (see *Helsingfors Program) in the Diaspora, because he believed that a strong Diaspora would serve as a safeguard and support for the rapid and secure development of Erez Israel, he himself concentrated on working for Erez Israel. He gathered around himself a group of Zionist activists which became the leadership and executive arm of the Zionist movement in Czechoslovakia.

[Chaim Yahil]

RUFUS OF SAMARIA (c. 100 C.E.), earliest Jewish physician and writer on medicine whose name has been preserved. Recent studies indicate that Rufus was the first Jew to write commentaries in Greek on the works of Hippocrates. According to the German scholar Pfaff, Rufus of Samaria was a learned and wealthy Jewish physician who emigrated to Rome from Samaria. It is possible that he changed his original Hebrew name to the Latin name Rufus because of its similarity in sound to *rofe*, the Hebrew word for physician. He learned Greek, wrote medical books in that language, and collected an extensive library of commentaries on Hippocrates, to which he added several of his own. Although *Josephus mentions several contemporaries named Rufus, it is not possible to identify the physician Rufus with any of them. The second-century Greek physician *Galen was careful to distinguish between Rufus of Samaria and his contemporary, the better known Rufus of Ephesus. That Rufus of Samaria was an eminent medical authority is clear from the fact that Galen

mentions him in such detail, although the latter was no great friend of the Jews. Galen maintained that whereas Jews (including Rufus) “believed,” he (Galen) was “convinced.” And, although Galen used Rufus’ writings as source material, he felt that Rufus as a Jew, was incapable of appreciating the spirit of the Greek Hippocrates and was therefore unable to produce appropriate commentaries.

RUḤAMAH (Heb. רֹחַמָּה), kibbutz in the southern coastal Plain of Israel, 7 mi. (12 km.) E. of Sederot, affiliated with Kibbutz Arzi ha-Shomer ha-Za’ir. The land for Ruḥamah was acquired in 1913 by the Palestine Land Development Company (PLDC) for a Zionist settlers group in Moscow, She’erit Yisrael, whose members, however, failed to reach Palestine. A workers’ group was afterward entrusted with occupying the remote site, then the southernmost Jewish outpost. The workers persevered there until 1917, when the Turks demanded that they evacuate the area toward which the Allied forces under General Allenby were advancing. In 1920 another group of Jewish workers came to work at the site, planting olives, almond trees, and vines. The place was abandoned in the 1929 Arab riots and resettled in 1932, but again given up when the 1936–39 Arab riots broke out. In 1944, when efforts were made to enlarge the Jewish settlement network in the south and the Negev, the present kibbutz, whose founders originated from Romania, settled there. Their primary task was reclamation of the loess soil, where deep desert ravines had created badlands. In the Israeli *War of Independence (1948), Ruḥamah repeatedly came under attack, first by Arab irregulars, and then by the invading Egyptian Army. The kibbutz held out and, in the later stages of the war, contributed to the final expulsion of the Egyptians in Operation Ten Plagues. In 1970 the kibbutz had 510 inhabitants, dropping to 384 in 2002. Farming was based on field crops, poultry, citrus groves, and dairy cattle (in partnership with Kibbutz *Dorot). It also had a large brush factory and an electronics plant. The name “Ruḥamah” derives from Hosea 2:3.

[Efraim Orni]

RUKEYSER, MERRYLE STANLEY (1897–1988), U.S. financial journalist and author. Born in Chicago, Rukeyser was educated at Columbia University. He was financial editor of the *New York Tribune* (1920–23) and the *New York Evening Journal* (1923–26). He taught at Columbia University’s graduate school of journalism from 1918 to 1935. He wrote a financial column for the Hearst newspapers (1927–58) and thereafter a nationally syndicated column, “Everybody’s Money.” He also lectured extensively in the United States and Europe.

Rukeyser’s books include *Common Sense of Money and Investments* (1924), *Financial Security in a Changing World* (1940), *The Attack on Our Free Choice* (1963), *The Kennedy Recession* (1963), and *Collective Bargaining* (1969).

Regarded as one of the most respected market observers in America, he was a frequent guest in the 1980s on the television program hosted by his son LOUIS, *Wall Street Week with Louis Rukeyser*. Another son, WILLIAM, was the first managing editor of *Money* magazine and later became managing editor of *Fortune*.

[Ruth Beloff (2nd ed.)]

RUKEYSER, MURIEL (1913–1980), U.S. poet and author. A prominent left-wing writer, Rukeyser published verse collections notable for their concern with social problems and the individual. These include *Theory of Flight* (1935), *A Turning Wind* (1939), *The Beast in View* (1944), *Orpheus* (1949), and *Waterlily Fire* (1962). She also wrote books for children; *The Soul and Body of John Brown* (1940), a poem; *Willard Gibbs: American Genius* (1942), a biography; *One Life* (1957), on Wendell Wilkie; and *The Orgy* (1965), an Irish fantasy.

RUMA or **ARUMAH** (Heb. רֹמָה, רֹמָה).

(1). Town in the neighborhood of Shechem, where Abimelech established his residence (Judg. 9:41; corrupted to Tormah in Judg. 9:31). It is identified with Khirbat al-‘Urma, 8¾ mi. (14 km.) S.E. of Shechem, a large mound with traces of walls, where remains of the Canaanite and Israelite periods were found.

(2). Town in Lower Galilee, identified by some scholars with Rumah, the birthplace of Zebudah, the daughter of Pedaiah, mother of Jehoiakim, king of Judah (11 Kings 23:36). It appears in the annals of Tiglath-Pileser III among the Galilean cities whose inhabitants were exiled in 733/2 B.C.E. It is perhaps identical with the Rumah mentioned in the Talmud and by Josephus (Tosef., Er. 4:17; Er. 51b; TJ, *ibid.*, 4:1, 22a; Jos., Wars, 3:233). It is the present-day Khirbat al-Rūma in the plain of Bet Netophah.

RUMKOWSKI, CHAIM MORDECHAI (1877–1944), “Elder of the Jews” in Lodz ghetto. Born in Ilino, Russia, Rumkowski settled in Lodz at the turn of the century. In the period between the two world wars, he was engaged in social and welfare activities, running several Jewish orphanages. He was a member of the *General Zionist Party and represented it on the council, and later on the committee, of the Jewish community in Lodz. Before World War II, when the Zionists left the committee, Rumkowski, contrary to his party’s decision, remained in his position. After the Germans captured Lodz they nominated him (in October 1939) to the position of “Elder of the Jews” (*Judenaeltester*), a position he held for nearly five years, until the liquidation of the Lodz ghetto in August 1944. At the same time, he was ordered to create a Council of

Elders (*Beirat*) and organize the machinery of the Jewish “self-administration.” In August 1944 the ghetto was liquidated, and Rumkowski and his family voluntarily joined the last transport of Jews to Auschwitz and were murdered there.

[Danuta Dombrowska]

RUMPLER, EDUARD (1872–1940), German pioneer aircraft manufacturer. Rumpler, who was born in Vienna, began in 1908 to make his *Rumplertaube*, an observation plane capable of flying at what was then the great height of 25,000 feet. He built several types of plane. His planes made the first long-distance land flights in Germany, and were used by the Germans in World War I. After the war, he conceived plans for 150-seater transatlantic airplanes. However, a German aircraft industry was prohibited under the terms of the Versailles Treaty. Rumpler had also worked in the Daimler and Adler works on automobiles, and so he concentrated his postwar work in this field. In 1919 he introduced the Rumplertropfenauto, and in 1926 he brought out the first car with front axle drive. He was forced to retire by the Nazis in 1933.

[Samuel Aaron Miller]

RUNITSCH, OSSIP (1889–1947), Russian actor. Born in St. Petersburg of an assimilated family from Vitebsk, Runitsch acted for five years on the Russian stage, appeared in the first Russian film version of Tolstoy’s *War and Peace*, and became a popular screen star known throughout Russia. After the Revolution, he went to Germany, acted for the Ufa company, toured Central Europe, then turned to the Yiddish stage in Riga. He emigrated to South Africa in 1939, acted in Yiddish plays, and for several years directed productions for Johannesburg City Opera seasons.

RUNKEL, SOLOMON ZALMAN (d. before 1426), rabbi and kabbalist. Runkel served as rabbi in Mainz and later in Worms. He was the teacher of Jacob *Moellin and the author of *Hatan Damim* (Prague, 1605), a kabbalistic commentary on the Pentateuch based on *gematria and *notarikon.

The work was left unfinished and was completed by Isaac ha-Kohen, the son-in-law of *Judah Loew b. Bezalel (the Maharal) of Prague. Some, however, attribute this work to his great-grandson Solomon Zalman Runkel (d. 1562), who was rabbi in Cracow and the son-in-law of Meir *Katzenellenbogen. It is also doubtful which S.Z. Runkel wrote a responsum mentioned in the responsa of R. Meir Katzenellenbogen. David *Oppenheim had in his library a manuscript of Runkel’s *Melizot be-Riv be’ad Aniyyei Ammenu*.

[Abraham David]

RUPPIN, ARTHUR (1876–1943), Zionist, economist, and sociologist; originator of the study of the sociology of the Jews and “father of Zionist settlement” in Erez Israel. Ruppín was responsible for paving the way from political Zionism, which was to many people more declarative than substantial, to pragmatic Zionism, in which settlement work and political efforts were only different facets and names for the same project: the building of the land and the people. Born in Rawitsch (Rawicz), Posen district (then in Prussia), Ruppín was the son of an affluent family that had become impoverished and moved from a traditional Jewish community on the border between Poland and Silesia to Magdeburg, Prussian Saxony, in 1887. His experiences as a youth undoubtedly had an influence upon his life and his way of thought and are probably the source of his understanding of both East and West European Jewry, his support of basic social changes, and perhaps even his tendency toward planning and computing as exactly as possible in his personal, academic, and public life. Ruppín was forced to leave high school at the age of 15 because of his family’s financial situation, and worked from 1891 to 1899 in the grain trade. He passed the examinations for a high school diploma as an external student and from 1899 studied law and economics at the University of Berlin and the University of Halle; he also spent time on the natural sciences, especially biology. From 1902 to 1907, he served in a court and, in the same period (1903–07), he directed the Bureau for Jewish Statistics and Demography, which was founded in Berlin by A. *Nossig. In 1903 he received the Haeckel Prize for his research work *Darwinismus und Sozialwissenschaft*, and in 1904 he published *Die Juden der Gegenwart*, in which he laid the foundations for the descriptive sociology of the Jews.

This work, which was published in a number of editions and languages, based its discussion of the position of the Jews upon a demographic and statistical analysis, instead of the propaganda and rhetoric ideology that governed such discussions at the time. Ruppín corrected and brought the book up to date in each new edition and expanded it into *Soziologie der Juden*, published in two volumes in Berlin (1930–31) and in four parts in Hebrew (1932–34). The book appeared in English under the titles *The Jews in the Modern World* (1934) and *Jewish Fate and Future* (1940).

When the first edition of *Die Juden der Gegenwart* (1904) was published, Ruppín was not yet a Zionist (although he supported the Zionist idea), but the book brought him closer to the Zionist movement and to its goal of solving the Jewish problem by founding a Jewish society and a state in Erez Israel based upon systematic urban and rural settlement. In 1907 the young sociologist traveled to Erez Israel on behalf of the Zionist Organization to study the situation there and probe

the possibilities for the Zionist Organization's work in the country. This trip brought about Ruppin's connection with the Zionist Organization. The Zionist Executive, headed by David *Wolffsohn, appointed him head of its Palestine Office, which he established in Jaffa in 1908. From then until his death – with periodic intermissions devoted to scientific work or travels – Ruppin was responsible for the work of Zionist settlement in Erez Israel. In 1916 he was forced by Jamal Pasha to leave the country and move to Constantinople, where he directed the activities to aid the *yishuv* both by distributing information on what was happening in Erez Israel and by organizing the transfer of capital to the country. In 1920 he returned to Jerusalem, and in 1920–21 was a member of the Zionist Commission, from 1921 to 1927 and again from 1929 to 1931 he was a member of the Zionist Executive, and from 1933 to 1935 a member of the *Jewish Agency Executive. From 1933 he was head of the Jewish Agency Department for the Settlement of German Immigrants and from 1935 he directed the Institute for Economic Research in Erez Israel, which he founded. He also served, from 1926, as lecturer and later professor of the sociology of the Jews in the Hebrew University.

His greatest achievements outside the field of the sociology of the Jews were in that of settlement. Ruppin's work can be divided into four periods: in the first (1908–14) he laid the foundations for Zionist settlement; in the second (1914–18) he participated in the struggle to save the *yishuv* from destruction; in the third (1920–33) he took part in the systematic expansion of settlement in the cities and rural areas and of the country's economy, throughout political and economic crises; and in the last period (1933–42), when he was a recognized expert on the economy of the country and the sociology of the Jews, he filled a central role in the absorption of the Fifth Aliyah, which brought tens of thousands of immigrants from Germany and refugees from Nazi-occupied Europe, and in solving the problems that resulted from their migration. The greatest importance (in Ruppin's estimation as well) is placed upon the first period, in which he paved the way for the Zionist Organization's systematic settlement work, in cooperation with the pioneers of the Second Aliyah, who had begun to stream into the country in 1905. His activity saved from failure both the Zionist Organization and the members of the Second Aliyah, who were seeking the proper road and were without appropriate financial means, and laid the foundations for all that followed. His success brought about the recognition of the fact that the most important factor in settlement work was the settler and that the settler and the settlement agency must work together as equal partners in every enterprise. In this way Ruppin created the proper conditions for the pioneers' activities and transformed their enthusiasm into a driving force for the settlement of Erez Israel.

This basic outlook also aided in the creation of new forms of settlements – the *kevuṣah* and the *kibbutz*, the *moshav ovedim*, and the *moshav shitufi*, middle-class villages, etc. (see *Israel, State of: Settlement) – and defended them against all their opponents. From the outset of his work, Ruppin as-

pired to purchase contiguous tracts of land for agricultural settlement and to create a self-governing population. He encouraged and enabled the acquisition of large tracts of land in the Jezreel Valley (on behalf of the Palestine Land Development Corporation, which he established in 1908, and the *Jewish National Fund) and in other regions. He was also instrumental in the establishment of Tel Aviv and the purchase of land in Haifa on Mount Carmel and its slopes (Hadar ha-Karmel) and from the Greek Patriarch in Jerusalem (on which Rehavyah and other quarters were established). He was very concerned with the problem of Arab-Jewish cooperation, and in order to study this problem and its consequences, together with a small group of men, he established *Berit Shalom in 1925 and headed it until 1929, working for the establishment of a binational state in Palestine. In view of the Arab riots and uprisings in 1929, 1936, and thereafter, however, he came to the conclusion that the time was not yet ripe for fruitful Arab-Jewish negotiations, in which each nation would receive its due. He therefore believed it necessary to strengthen the Jewish position in the country economically and politically in order to create a situation in which both sides would be willing to cooperate to their mutual benefit.

His collection of essays, *Three Decades of Palestine*, was published in English in 1936. His autobiography in Hebrew, *Pirkei Ḥayyay*, edited by A. Bein, appeared posthumously (3 vols., 1968, 1970). *Memoirs, Diaries, Letters* appeared in English in 1971. Kefar Ruppin in the Beth-Shean Valley, an agricultural school in Emek Ḥefer, and a botanical garden in Deganyah Alef are named after him.

[Alexander Bein]

RUSE (Russe, Rustchuk), port city on the Danube in N.E. Bulgaria. The Turkish traveler Evlyia Chelebi (17th century) relates that Jewish merchants visited the town briefly. When the Austrians besieged Belgrade in 1788, several of its Jews escaped to Ruse. They were the founders of the Jewish community and were later joined by Jews from other towns. In 1797 the first synagogue was built. During the Russo-Turkish War (1828), the Jews fled to Walachia and although they did not all return after the war, the community nevertheless continued to grow. The merchants imported goods from Austria and Saxony and exported those of the country. The first rabbi of the community was Abraham Graciani (1806–14), the author of *She'erit Ya'akov*. In 1826 a new synagogue was built and in 1852 the Giron synagogue was founded and was followed by the Shalom synagogue in 1858. There was also an Ashkenazi community and Zionist newspapers and periodicals were published there. In 1905 there were 4,028 Jews in Ruse and in 1938, 3,000. In 1943 many Jews from Sofia were deported to Ruse. With the establishment of the State of Israel, most of the Jews emigrated. In 2004 there were around 200 Jews in

Ruse, affiliated with the local branch of the nationwide Shalom organization. (For further information on the Holocaust Period, see *Bulgaria.)

RUSSELL (originally **Levy**), **HENRY** (1813–1900), English composer and singer. Born at Sheerness, Russell was a prodigy who performed as a child before King George IV. He studied music at Bologna and in his thirties spent many years touring the U.S. and Canada. After his return to England, he was chorus master at Her Majesty's Theatre, London. Russell wrote nearly 800 songs; among the most successful are "There's a Good Time Coming Boys" and "Cheer! Boys, Cheer!" His "A Life on the Ocean Wave" became the regimental march of the Royal Marines.

By his first wife, who was not Jewish, Henry Russell had two sons: William Clark Russell (1844–1911), novelist and biographer, and Henry Russell (1871–1937), manager of the Royal Opera House, Covent Garden, and founder and first manager of the Boston Opera House in the U.S.

His son by his second wife, a Jewess, was **SIR LONDON RONALD** (1873–1938), British orchestral conductor. Born in London, Ronald conducted opera at Covent Garden in 1894, accompanied the singer Melba on her American tour, and appeared before Queen Victoria in 1897 and 1898. After a period of conducting in musical comedy, he became known in the cities of Britain and the Continent principally as a symphony conductor. Ronald specialized in the interpretation of Elgar, composed songs and incidental music for the theater, and was principal of the Guildhall School of Music, London, 1910–37. He was knighted in 1922.

RUSSIA, former empire in Eastern Europe; from 1918 the Russian Soviet Federative Socialist Republic (R.S.F.S.R.), from 1923 the Union of Soviet Socialist Republics (U.S.S.R.); from 1990 the Russian Federation.

Until 1772

ORIGINS. The penetration of Jews into the territories now incorporated within the Union began in the border regions beyond the Caucasus Mountains and the shores of the Black Sea. Traditions and legends connect the arrival of the Jews in *Armenia and *Georgia with the *Ten Lost Tribes (c. 721 B.C.E.) or with the Babylonian *Exile (586 B.C.E.). Clearer information on the settlement of the Jews in these regions has come down from the Hellenistic period. Ruins, recordings, and inscriptions on tombstones testify to the existence of important Jewish communities in the Greek colonies on the Black Sea shores, Chersonesus near *Sevastopol, *Kerch, and other places. Religious persecutions in the *Byzantine Empire caused many

Jews to emigrate to these communities. At the time of the wars between the Muslims and Persians during the seventh century many Jews emigrated to the Caucasus and beyond, where they established communities which during subsequent generations maintained relations with the centers of Jewish learning in Babylonia and Persia. From the early Middle Ages, Jewish merchants, referred to in Hebrew as *holkhei Rusyah*, regularly traveled through the Slavonic and Khazar lands on their way to India and China. They traded in slaves, textiles, hides, spices and arms. It was during this period that the accepted term in Hebrew literature for those lands – *Erez Kena'an* ("Land of Canaan") – appeared (originating in the etymological interpretation of the name "Slavs"), and the merchants were said to be familiar with the "language of Canaan" (Slavonic). It is clear that the conversion to Judaism of the kingdom of the *Khazars during the first half of the eighth century was to a certain degree due to the existence of the many Jewish communities in this region. Jews from the Christian and Muslim countries which bordered upon the Khazar realm were later attracted to the Jewish kingdom. Possibly refugees who escaped from this kingdom formed one of the elements of Russian Jewry in later generations, though their proportion in the composition of this Jewry is still under discussion.

The kingdom of the Jewish Khazars is referred to in ancient Russian literature as the "Land of the Jews," and warriors of the Russian epic poetry wage war against the Jewish warrior, the "*zhidovin*." According to one tradition, Prince Vladimir of Kiev conversed with Jews on religion before accepting Orthodox Christianity. At the same time, there were Jews living in Kiev. Ancient Russian sources mention the "Gate of the Jews" in Kiev. The Jews lived in the town under the protection of the prince, and when the inhabitants of the town rebelled against Prince Vladimir II Monomachus (1117) they also attacked the houses of the Jews. Extracts of religious *disputations held in Kiev between monks and clergy and Jews have been preserved in the early Russian religious literature. There were also Jewish settlements in *Chernigov and Vladimir-Volynski. The Jews of Kiev also communicated with their coreligionists in Babylonia and Western Europe on religious questions. During the 12th century, there is mention of R. *Moses of Kiev who corresponded with Rabbenu Jacob b. Meir *Tam and with the Gaon *Samuel b. Ali of Baghdad.

The invasion of the Mongols (1237) and their rule brought much suffering to the Jews of Russia. An important community – *Rabbanites as well as *Karaites – subsequently developed in Theodosia (*Feodosiya, Crimea) and its surroundings, first under Genoese rule (1260–1475) and later under the Tatar khans of Crimea.

FROM THE 14TH CENTURY. From the beginning of the 14th century, the Lithuanians gained control over western Russia. Under Lithuania the first extensive privileges were granted to Jewish communities in the region at the end of the 14th century. Under Poland-Lithuania the wave of Jewish emigration and large-scale settlement from Poland to the *Ukraine,

*Volhynia, and *Podolia from the middle of the 16th century laid the foundations at the close of this century for most of the Jewish communities of the Ukraine and Belorussia, and their Polish-Jewish culture and autonomy (see *Great Poland; *Councils of the Lands). In 1648–49 the *Chmielnicki massacres devastated the Jews of the Ukraine, and some years later the Muscovite armies annihilated the Jews in the cities of Belorussia and Lithuania that they had captured. During the 18th century, the Jews suffered severely during the revolts of the *Haidamacks. With the partitions of Poland at the end of the 18th century, most of the Jews of Lithuania and the Ukraine, and at the beginning of the 19th century also those of Poland, found themselves under Russian rule. During the 19th and 20th centuries Russian Jewry was, however, essentially an organic continuity of the Jewry of Poland and Lithuania in the ethnic as well as cultural respects.

PRINCIPALITY OF MOSCOW. In the principality of Moscow, the nucleus of the future Russian Empire, Jews were not tolerated. This negative attitude toward Jews was connected with the negative attitude to foreigners in general, who were considered heretics and agents of the enemies of the state. During the 15th century, Jews arrived within the borders of the principality of Moscow in the wake of their trade from both the Tatar kingdom of Crimea and Poland-Lithuania. During the 1470s, the religious sect known in Russian history as the “*Judaizers” (*Zhidovstvuyushchiye*) was discovered in the large commercial city of *Novgorod and at the court in Moscow. The Jews were accused of having influenced and initiated the establishment of the sect. When Czar Ivan IV Vasilievich (“the Terrible”; 1530–84) temporarily annexed the town of Pskov to his territory, he ordered that all Jews who refused to convert to Christianity should be drowned in the river. During the following two centuries, Jews entered Russia either illegally or with authorization from Poland and Lithuania on trade, and they occasionally settled in border towns. Repeated decrees issued by the Russian rulers prohibiting the entry of Jewish merchants within their territories, and explicit articles included in the treaties between Poland and Russia emphasizing these prohibitions, testify that this penetration was a regular occurrence. Small Jewish communities existed during the early 19th century in the region of *Smolensk. In 1738 the Jew, Baruch b. Leib, was arrested and accused of having converted the officer Alexander *Voznitsyn to Judaism. Both were burned at the stake in St. Petersburg. In 1742 Czarina Elizabeth Petrovna ordered the expulsion of the few Jews living in her kingdom. When the senate attempted to obtain cancellation of the expulsion order by pointing out the economic loss which would be suffered by the Russian merchants and the state, the czarina retorted: “I do not want any benefit from the enemies of Christ.”

At the beginning of the reign of Catherine II, the question of authorizing the entry of Jews for trading purposes again arose. The czarina, who was inclined toward authorizing their admission, was compelled to reverse her decision in the

face of hostile public opinion. Some Jews nevertheless penetrated into Russia during this period, while the authorities did not disturb those living in the territories conquered from Turkey in 1768 (Crimea and the Black Sea shore) and even unofficially encouraged the settlement of additional Jews in these territories. The question of the presence of Jews within the borders of the empire was however decided by historical circumstances, when at the close of the 18th century hundreds of thousands of Jews were placed under the dominion of the czars as a result of the three partitions of Poland (1772, 1793 and 1795).

Within the Russian Empire: First Phase (1772–1881)

The Jews who lived in the regions annexed by Russia (the “Western Region” and the “Vistula Region” in the terms of the Russian administration) formed a distinct social class. In continuation of their economic functions in Poland-Lithuania, they essentially formed the middle class between the aristocracy and the landowners on the one hand, and the masses of enslaved peasants on the other. Many of them earned their livelihood from the lease of villages, flour mills, forests, inns and taverns. Others were merchants, shopkeepers or hawkers. The remainder were craftsmen who worked for both landowner and peasant. Some of them lived in townlets which had mostly been founded on the initiative of the landowners and served as centers for the merchants and the craftsmen, while others lived in villages or at junctions of routes. It is estimated that the occupational structure of the Jews at the beginning of the 19th century was as shown in Table: 19th-Century Jewish Occupations, Russia.

19th-Century Jewish Occupations, Russia

Occupation	%
Innkeeping and leases	30
Trade and brokerage	30
Crafts	15
Agriculture	1
No fixed occupation	21
Religious officials	3

The economic position of the Jews steadily deteriorated with their confinement to the *Pale of Settlement (see below), their rapid growth in numbers, and consequent gradual proletarianization and increasing pauperization. The autonomy of the Jewish community was at first recognized. The Jews maintained their traditional educational network.

When they came under Russian rule, many of the communities had become heavily indebted. Economic difficulties, the burden of taxes – in particular the meat tax (see **korobka*) – and social tensions drove many Jews to abandon the townlets and settle in villages or on the estates of noblemen. During the period of their transfer to Russian domination, the Jews of the “Western Region” were involved in a grave conflict between the **Hasidim* and the **Mitnaggedim*. Once the Russian government gained control of this region, it be-

came involved in this conflict. Complaints and slander even resulted in the arrest of *Shneur Zalman of Lyady in 1798 and his transfer to St. Petersburg for interrogation. The various hasidic "courts" (the most important of which were those of *Lubavichi-Lyady, *Stolin, Talnoye, *Gora-Kalwaria, *Aleksandrow), as well as the yeshivot of the mitnagedic type in Lithuania (the most important in the townlets of *Volozhin, founded in 1803, *Mir, *Telz (Telsiai), Eishishki (Eisiskes), and *Slobodka; see also *Maggid; *Musar movement) combined to form a flourishing and variegated Jewish culture.

CRYSTALLIZATION OF RUSSIAN POLICY TOWARD THE JEWS. From the beginning of its annexation of the Polish territories, the Russian government adopted the attitude of viewing the Jews there as the "Jewish Problem," to be solved ultimately by their *assimilation or expulsion. During the first 50 years after incorporation within the borders of the empire, the general tendency of the government was to maintain the status of the Jews as it had been under Polish rule, while adapting it to the Russian requirements. A decree of 1791 confirmed the right of residence of the Jews in the territories annexed from Poland and permitted their settlement in the uninhabited steppes of the Black Sea shore, conquered from Turkey at the close of the 18th century, and in the provinces to the east of the R. Dnieper (*Chernigov and *Poltava) only. Thus crystallized the Pale of Settlement, which took its final form with the annexation of Bessarabia in 1812, and the "Kingdom of Poland" in 1815, extending from the Baltic Sea to the Black Sea and including 25 provinces with an area of nearly 1,000,000 sq. km. (286,000 sq. mi.). The Jews formed one ninth of the total population of the area. Jewish residence was also authorized in *Courland and, at a later date, in the Caucasus and Russian Central Asia to Jews who had lived in these regions before the Russian conquest.

In the regions annexed from Poland, the Jews were caught up in the dilemma facing czarist rule there. The regime, whose power rested on the nobility, refrained from throwing the responsibility for the miserable plight of the mainly Orthodox peasants onto the Christian landowners, mainly of the Polish Catholic nobility, preferring to blame the Jews in the villages; it accepted the claim of the local nobility and officials allied to it that the Jews were causing the exploitation of the peasants (see G.R. *Derzhavin). The Jewish autonomy and independent culture added to this antagonism, as being alien to the Russian centralist regime and Christian-feudal culture.

These concerns animated the first "Jewish Statute" promulgated in 1804. Its first article authorized the admission of the Jews to all the elementary, secondary and higher schools in Russia. Jews were also authorized to establish their own schools, provided that the language of instruction was Russian, Polish or German. The most important of the economic articles of the statute was the prohibition of the residence of Jews in the villages, of all leasing activity in the villages, and of the sale of alcoholic beverages (see *Wine and Liquor Trade)

to the peasants. This struck at the source of livelihood of thousands of Jewish families. The legislation therefore declared that Jews would be allowed to settle as peasants on their lands or on the lands which would be allocated to them by the government. Government support was also promised to factories which would employ Jewish workers and to craftsmen.

In 1817 Alexander I outlawed the *blood libel which had caused terror and suffering to the Jewish communities in the 18th century.

A short while after the publication of the "Jewish Statute," the expulsion of the Jews from the villages began, as did their settlement in southern Russia. It was, however, soon evident that agricultural settlement (see *agriculture) could not rapidly absorb the thousands of Jewish families who had been removed from their livelihoods. The expulsion order was therefore delayed, this being also due to the political and military situation in Russia during the war against Napoleon. Only in 1822 was the systematic expulsion of the Jews from the villages, especially in the provinces of Belorussia, resumed. An unsuccessful attempt was also made to induce the Jews to convert to Christianity by promises of *emancipation and government support for their settlement on the land.

UNDER NICHOLAS I. The reign of *Nicholas I (1825–55) forms a somber chapter in the history of Russian Jewry. This czar, notorious in Russian history for his cruelty, sought to solve the "Jewish Problem" by suppression and coercion. In 1827 he ordered the conscription of Jewish youths into the army under the iniquitous *Cantonists system which conscripted youths aged from 12 to 25 years into military service; those aged under 18 were sent to special military schools also attended by the children of soldiers. This law caused profound demoralization within the communities of Lithuania and the Ukraine (it did not apply to the Jews of the "Polish" provinces). Nobody wished to serve in the army in the prevailing inhuman conditions and the "trustees" responsible on behalf of the communities for filling the quotas of conscripts were compelled to employ "snatchers" (*khapers*) to seize the youngsters. The military obligations of the Jews in Russia brought no alleviation of their condition in other spheres, and the expulsions of Jews from the villages continued with regularity. The Jews were also expelled from Kiev, and any new settlement of Jews in the towns and townlets within a distance of 50 versts of the country's borders was prohibited in 1843. On the other hand, the government encouraged agricultural settlement among Jews. The settlers were exempted from military service. Many Jewish settlements were established on government and privately owned lands in southern Russia and other regions of the Pale of Settlement.

During the 1840s, the government began to concern itself with the education of the Jews. Since the Jews had not made use of the opportunity which had been given to them in 1804 to study in the general schools, the government decided to establish a network of special schools for them. The maintenance of these schools would be provided for by a special

tax (the “*candle tax”) which would be imposed on them. In order to pave the way for this activity, the government sent Max *Lilienthal, a German Jew employed as teacher in the school established in Riga by the local *maskilim*, on a reconnaissance trip through the Pale of Settlement. During 1841–42 Lilienthal visited the large communities of the Pale of Settlement – Vilna, Minsk, Berdichev, Odessa, and Kiev. He was received with suspicion by the Jewish masses, who regarded the project to establish government schools for Jews as a medium for the estrangement of their children from their religion. In 1844 a decree was issued ordering the establishment of these schools, whose teachers would be both Christians and Jews. In secret instructions which accompanied the decree, it was declared that “the purpose of the education of the Jews is to bring them nearer to the Christians and to uproot their harmful beliefs which are influenced by the Talmud.” Lilienthal became aware of the government’s intentions and fled from Russia. The government established this network of schools which depended for instruction upon a handful of *maskilim* and at the head of which were the seminaries for rabbis and teachers of Vilna and *Zhitomir. These institutions, to which the Jewish masses shrank from sending their children, served as the cradle for a class of Russian-speaking *maskilim* which was to play an important role in the lives of the Jews during the following generations.

In 1844 the government abolished the Polish-style communities but was nevertheless compelled to recognize a limited communal organization whose function it was to watch over the conscription into the army and the collection of the special taxes – the *korobka* and “candle tax.” The community was also responsible for the election of the **kazyonny ravvin* (“government-appointed rabbi”), whose function it was to register births, marriages, and deaths and to deliver sermons on official holidays extolling the government. A law was also issued prohibiting Jews from growing *pe’ot* (“sidelocks”) and wearing their traditional clothes.

The next stage of the program of Nicholas I was the division of the Jews of his country into two groups: “useful” and “non-useful.” Among the “useful” ranked the wealthy merchants, craftsmen, and agriculturalists. All the other Jews, the small tradesmen and the poorer classes, constituted the “non-useful” and were threatened with general conscription into the army, where they would be trained in crafts or agriculture. This project encountered the opposition of Russian statesmen and aroused the intervention of the Jews of Western Europe on behalf of their coreligionists. In 1846 Sir Moses *Montefiore traveled from England to Russia for this purpose. The order to classify the Jews according to these categories was nevertheless issued in 1851. The Crimean War delayed its application but amplified the tragedy of military conscription. The quota was increased threefold and the “snatchers” were given a free hand to seize children and travelers who did not possess documents, and hand them over to the army. The reign of Nicholas I came to an end with the memory of those days of intensified kidnapping.

UNDER ALEXANDER II. The reign of *Alexander II (1855–81) is connected with great reforms in the Russian regime, the most important of which was the emancipation of the peasants in 1861 from their servitude to the landowners. Toward the Jews, Alexander II adopted a milder policy with the same objective as that of his predecessor of achieving the assimilation of the Jews to Russian society. He repealed the severest of his father’s decrees (including the Cantonists system) and gave a different interpretation to the classification system by granting various rights – in the first place the right of residence throughout Russia – to selected groups of “useful” Jews, which included wealthy merchants (1859), university graduates (1861), certified craftsmen (1865), as well as medical staff of every category (medical orderlies and midwives). The Jewish communities outside the Pale of Settlement rapidly expanded, especially those of St. Petersburg and Moscow whose influence on the way of life of Russian Jewry became important.

In 1874 a general draft into the army was introduced in Russia. Thousands of young Jews were now called upon to serve in the army of the czar for four years. Important alleviations were granted to those having a Russian secondary-school education. This encouraged the stream of Jews toward the Russian schools. At the same time, Jews were not admitted to officers’ ranks.

The general atmosphere the new laws engendered was of no less importance than the laws themselves. The administration relaxed its pressure on the Jews and there was a feeling among them that the government was slowly but surely proceeding toward the emancipation of the Jews. Jews began to take part in the intellectual and cultural life of Russia in journalism, literature, law, the theater and the arts; the number of professionals was then very small in Russia, and Jews soon became prominent among their ranks in quantity and quality. Some Jews distinguished themselves, such as the composer Anton *Rubinstein (baptized in childhood), the sculptor Mark *Antokolski and the painter Isaac *Levitan.

This appearance of Jews in economic, political and cultural life immediately aroused a sharp reaction in Russian society. The leading opponents of the Jews included several of the country’s most prominent intellectuals, such as the authors Ivan Aksakov and Fyodor Dostoyevski. The attitude of the liberal and revolutionary elements in Russia toward the Jews was also lukewarm. The Jews were accused of maintaining “a state within a state” (the enemies of the Jews found support for this opinion in the work of the apostate J. *Brafman, *The Book of the Kahal*, published in 1869), and of “exploiting” the Russian masses; even the blood libel was renewed by agitators (as that of Kutais in 1878). However, the principal argument of the hate-mongers was that the Jews were an alien element invading the areas of Russian life, gaining control of economic and cultural positions, and a most destructive influence. Many newspapers, led by the influential *Novoye Vremya*, engaged in anti-Jewish agitation. The anti-Jewish movement gained in strength especially after the Balkan War (1877–78), when a wave of Slavophile nationalism swept through Russian society.

POPULATION GROWTH. One of the factors which influenced the position of the Jews was their high natural increase, due to the high birthrate and the relatively low mortality among children – the result of the devoted care of Jewish mothers as well as of medical progress. The number of Jews in Russia, which in 1850 had been estimated at 2,350,000, rose to over 5,000,000 at the close of the 19th century, notwithstanding a considerable emigration abroad. Governmental commissions appointed to deal with the “Jewish Problem” received instructions to seek methods for the reduction of the number of Jews in the country.

ECONOMIC POSITION. The natural growth resulted in increased competition in the traditionally Jewish occupations. The numbers of small shopkeepers, peddlers and brokers rose steadily. Many joined the craftsmen’s class, a step which in those days was considered a fall in social status. A Jewish proletariat began to develop; it included workshop and factory workers, daily workers, male and female domestics, and porters. At the same time there also emerged a small but influential class of wealthy Jews who succeeded in adapting to the requirements of the Russian Empire and established contacts with government circles. The first members of this class were contractors engaged by the government in the building of roads and fortresses, or purveyors to army offices and units. During the reign of Nicholas I, many Jews engaged in leasing the sale of alcoholic beverages which had become a government monopoly. From the 1860s, Jews played an important role in the construction of railroads and the development of mines, industry (especially the foodstuff and textile industries), and export trade (timber; grain). They were among the leading founders of the banking network of Russia. This class of Jews was prominent in St. Petersburg, Moscow, Odessa, Kiev and Warsaw. This upper bourgeoisie, headed by the *Guenzburg and *Polyakov families, considered themselves the leaders of Russian Jewry. They were closely connected with Jews who had acquired a higher education and had penetrated the Russian intelligentsia and the liberal professions (lawyers, physicians, architects, newspaper editors, scientists and writers). The wealth and the status of this small class was however unable to alleviate the suffering of the destitute masses. After the emancipation of the serfs in 1861, the serious lack of land for the Russian peasants themselves became evident and the government ceased to encourage Jewish settlement on the land. Emigration became the only outlet. Until the 1870s, the migration was mainly an internal one, from Lithuania and Belorussia in the direction of southern Russia. While in 1847, only 2.5 percent of Russian Jews lived in the southern provinces, the proportion had increased to 13.8 percent in 1897. Important new communities appeared in this region: Odessa (about 140,000 Jews), Yekaterinoslav (*Dnepropetrovsk), Yelizavetgrad (*Kirovograd), *Kremenchug, etc. The famine in Lithuania at the end of the 1870s encouraged emigration toward Western Europe and the United States.

HASKALAH IN RUSSIA. From the middle of the 19th century, *Haskalah became influential among Russian Jewry. Its first manifestations, combined with signs of assimilation, appeared in the large commercial cities (Warsaw, Odessa, Riga). Among the Russian adherents of Haskalah, there was a trend to preserve Judaism and its values; hence they tended to seek changes based mainly on a thread of continuity. Although there were also circles which stood for complete assimilation and absorption in Eastern Europe (the “Poles of the Mosaic Faith” of Poland, nihilist and socialist circles in Russia), the majority of the *maskilim* sought a path which would preserve the national or national-religious identity of the Jews, while some of them even developed an indubitable nationalist ideology (Perez *Smolenskin). The herald of the Haskalah in Russia was the author Isaac Dov (Baer) *Levinsohn. In his *Te’udah be-Yisrael* (Vilna, 1828), he formulated an educational and productivization program. The most distinguished pioneers of Haskalah in Russia were the author Abraham *Mapu, the father of the Hebrew novel, and the poet Judah Leib *Gordon. Even though the *maskilim* were at first opposed to Yiddish, which they sought to replace by the language of the country, some of them later created a secular Yiddish literature (I.M. *Dick; Shalom Yankev *Abramovitch (Mendele Mokher Se-forim); and others). At the initiative of the *maskilim*, there also emerged a Jewish press in Hebrew (**Ha-Maggid*, founded in 1856; **Ha-Meliz*); in Yiddish (**Kol Mevasser*); and in Russian (**Razsvet*, founded in 1860; *Den*). The *Ḥevrat Mefizei Haskalah* (“Society for the Promotion of Culture among the Jews of Russia”), founded in 1863 by a group of wealthy Jews and intellectuals of St. Petersburg, was an important factor in spreading Haskalah and the Russian language among Jews.

These books and newspapers infiltrated into the *batteimidrash* and the *yeshivot*, influencing students to leave them. Severe ideological disputes broke out in many communities, often between father and son, rabbi and disciples. The government assisted the spread of Haskalah as long as its adherents supported loyalty to the czarist regime (as expressed by J.L. Gordon – “to your king a serf”) and cooperated in promoting educational and productivization programs, as well as in its opposition to the traditional leadership. By the 1870s, the activity of the *maskilim* began to bear fruit. The mass of Jewish youth streamed to the Russian-Jewish and general Russian schools. The general conscription law of 1874 encouraged this process, and thus began the estrangement of the intellectual youth from its people and Jewish affairs – to the despair of the nationalist wing of the Haskalah which resigned itself to this situation. However, the rise of the antisemitic movement within Russian society during the late 1870s (see above) resulted in a nationalist awakening among this youth. This was expressed in the development of a Jewish-Russian press and literature dealing with the problems of the Jews and Judaism (*Razsvet*; *Ruski Yevrey*; **Voskhod*).

Within the Russian Empire: Second Phase (1881–1917)

The year 1881 was a turning point in the history of the Jews of Russia. In March 1881 revolutionaries assassinated Alexan-

der II. Confusion reigned throughout the country. The revolutionaries called on the people to rebel. The regime was compelled to protect itself, and the Russian government found a scapegoat: the notion was encouraged that the Jews were responsible for the misfortunes of the nation. Anti-Jewish riots (*pogroms) broke out in a number of towns and townlets of southern Russia including Yelizavetgrad (Kirovograd) and Kiev. These disorders consisted of looting, while there were few acts of murder or rape. Similar pogroms were repeated in 1882 (*Balta, etc.); in 1883 (Yekaterinoslav, now Dnepropetrovsk, *Krivoi Rog, Novo-Moskovsk, etc.); and in 1884 (Nizhni-Novgorod, now *Gorki). The indifference to – and at times even sympathy for – the rioters on the part of the Russian intellectuals shocked many Jews, especially the *maskilim* among them. Revolutionary circles which hoped to transform these disorders into a revolt against the landowners and government also supported the rioters. The new czar, *Alexander III (1881–94), and his cabinet underlined these trends in their policy toward the Jews. Provincial commissions were appointed in the wake of the pogroms to investigate their causes. In the main, these commissions stated that “Jewish exploitation” had caused the pogroms. Based on this finding, the “Temporary Laws” were published in May 1882 (see *May Laws). These prohibited the Jews from living in villages and restricted the limits of their residence to the towns and townlets. In an attempt to halt the flood of Jews now seeking entry to secondary schools and universities, and their competition with the non-Jewish element, the number of Jewish students in the secondary and higher schools was limited by law in 1886 to 10 percent in the Pale of Settlement and to 3–5 percent outside it. This *numerus clausus did much to accomplish the radicalization of Jewish youth in Russia. Many went to study abroad; others were able to enter Russian schools only if showing outstanding ability. All became embittered and disillusioned with the existing Russian society. In 1891 the systematic expulsion of most of the Jews from Moscow began. The pogroms were indeed halted in 1884 but instead administrative harassment of Jews became worse. The police strictly applied the discriminatory laws, and the expulsion of Jews from towns and villages where they had lived peacefully during the reign of Alexander II was effected, either under the law or with the help of bribery, to become a daily occurrence. The press (which was subjected to severe censorship) conducted a campaign of unbridled antisemitic propaganda. K. *Pobedonostsev, the head of the “Holy Synod” (the governing body of the Russian Orthodox Church), formulated the objectives of the government when he expressed the hope that “one third of the Jews will convert, one third will die, and one third will flee the country.”

This policy was also continued under *Nicholas II (1894–1918). In reaction to the growth of the revolutionary movement, in which the radicalized Jewish youth took an increasing part, the government gave free rein to the antisemitic press and agitation. During Passover in 1903, a pogrom broke out in *Kishinev in which many Jews lost their lives. From then on

pogroms became a part of government policy. They gained in violence in 1904 (in Zhitomir) and reached their climax in October 1905, immediately after the czar had been compelled to proclaim the granting of a constitution to his people. In these pogroms, the police and the army openly supported the rioters and protected them against the Jewish self-defense organizations (see below). Pogroms accompanied by bloodshed in which the army actively participated occurred in *Bialystok (June 1906) and *Siedlce (September 1906). The establishment of the Imperial Duma brought no change to the situation of the Jews. There was indeed a limited Jewish representation in the Duma (12 delegates in the first Duma of 1906 and two to four delegates in the second, third and fourth Dumas), but this representation was faced by a powerful Rightist party – the *Union of the Russian People – and related parties, whose principal weapon in the political struggle against the liberal and radical elements was a savage antisemitism which overtly called for the elimination of the Jews from Russia.

It was these circles which produced the “Protocols of the *Elders of Zion” which served, and still serve, as fuel for antisemitism throughout the world. In this atmosphere, a proposal for a debate in the Duma on the abolition of the Pale of Settlement was shelved, while a suggestion to exclude the Jews from military service was not accepted for the sole reason that the government could not dispense with the service of about 40,000 Jewish soldiers. Characteristic of this period was the law issued in 1912 which prohibited the appointment as officers not only of apostates from Judaism, but also of their children and grandchildren. In 1913 the government held a blood libel trial in Kiev involving Mendel *Beilis: the antisemitic propaganda was intensified and the government mobilized its police and judicial cadres to obtain his conviction. A strong defense was mustered, including the Jews O. *Grusenberg and Rabbi J. *Mazeh, which succeeded in disproving the libel: the jury, consisting of 12 Russian peasants, acquitted the accused.

The pogroms, restrictive decrees and administrative pressure caused a mass emigration of Jews from Russia, especially to the United States. During 1881 to 1914 about 2,000,000 Jews left Russia. This emigration did not result in a decrease in the Jewish population of the country as the high birthrate recompensed the losses through emigration. The economic situation improved, however, because the pressure on the sources of livelihood did not grow at its former pace and also because the emigrants rapidly began to send financial assistance to their relatives in Russia. Several attempts were made to organize and regulate this continual emigration, the most important by the Jewish philanthropist Baron Maurice de *Hirsch who reached an agreement in 1891 with the Russian government on the transfer of 3,000,000 Jews within 25 years to Argentina. For this purpose, the *Jewish Colonization Association (ICA) was established. Even though the project was not realized, ICA was very active in promoting Jewish agricultural settlement both in the lands of emigration and in Russia itself.

JEWISH POPULATION AT THE CLOSE OF THE 19TH CENTURY. The comprehensive population census of 1897 provides a general picture of the demographic and economic condition of Russian Jewry at the close of the 19th century. In the census 5,189,400 Jews were counted; they constituted 4.13 percent of the total Russian population and about one-half of world Jewry. Their distribution over the Russian Empire appears in Table: Russian Jewish Population, 1897.

Russian Jewish Population, 1897 Census

Region	Number of Jews	% of total population
Ukraine, Bessarabia	2,148,059	9.3
Lithuania, Belorussia	1,410,001	14.1
Russian Poland	1,316,576	14.1
Total in Pale of Settlement	4,874,636	11.5¹
Interior of Russia, Finland	208,353	0.34
Caucasus	58,471	0.63
Siberia, Russian Central Asia	47,941	0.35 ²
Total Russian Jewish Population	5,189,401	4.13

1 93.9% of the Jews of Russia.

2 Excluding the Jews of Bukhara.

In certain provinces of the Pale of Settlement, the percentage of Jews rose above their general proportion (18.12 percent in the province of Warsaw; 17.28 percent in the province of Grodno). The overwhelming majority of the Jews in the Pale lived in towns (48.84 percent) and townlets (33.05 percent). Only 18.11 percent lived in villages. The Jews of the villages nevertheless numbered about 890,000. A decisive factor in the social pattern of Russian Jewry was its concentration in the towns and townlets. The townlet (see *shtetl) – a legacy of the social structure of ancient Poland – was a center of commerce and crafts for the neighboring villagers and its population was mostly Jewish. There Jewish tradition, cohesion, and folkways were well preserved, serving as the basis and starting point for both the conservative and innovative forces in Jewish culture. In the larger cities, the majority of the Jews also resided in the same locality and led their own social life.

The largest Jewish communities in Russia in 1897 appear in Table: Jewish Communities in Russia, 1897.

Largest Jewish Communities in Russia, 1897

City	Number of Jews	% of total population
Warsaw	219,128	32.5
Odessa	138,935	34.4
Lodz	98,676	31.8
Vilna	63,831	41.5
Kishinev	50,237	46.5
Minsk	47,617	52.3
Bialystok	41,903	63.4
Berdichev	41,617	78.0
Yekaterinoslav (Dnepropetrovsk)	40,937	36.3
Vitebsk	34,420	52.4

There were also many medium-sized towns in which the majority of the population was Jewish.

ECONOMIC STRUCTURE. This concentration of the Jews, and their intensive and variegated cultural life, made them a clearly distinct nation living in the Pale of Settlement. Their occupations and professional structure also gave a specific character to their society. In 1897 the Jews of Russia could be divided according to their sources of livelihood as shown in Table: Jews' Sources of Livelihood, Russia, 1897.

Jews' Sources of Livelihood, Russia, 1897

Occupation	%
Commerce	38.65
Crafts and industry	35.43
Domestics and daily workers	6.61
Liberal professions and administration	5.22
Transport	3.98
Agriculture	3.55
Army	1.07
Without regular source of livelihood	5.49
Total	100.00

In the Pale of Settlement Jews formed 72.8 percent of those engaged in commerce, 31.4 percent of those engaged in crafts and industry, and 20.9 percent of those engaged in transportation. At the close of the 19th century, the Jewish proletariat increased and numbered some 600,000. Approximately half of them were apprentices and workers employed by craftsmen, about 100,000 were salesmen, about 70,000 were factory workers, and the remainder daily workers, porters, and domestics. The desire of this proletariat to improve its material and social status, and its contacts with the revolutionary Jewish intelligentsia during the generation which preceded the 1917 Revolution, became an important factor in the lives of the Jews of Russia.

IDEOLOGICAL TRENDS. The last 20 years of the czarist regime were a time of tension and renaissance for the Jews, especially within the younger circles. This awakening essentially stemmed from conscious resistance to, and rejection of, the oppressive regime, the degraded status of the Jew in the country, and the search for methods for change. One response to the oppressive policy of the czarist government was to join one of the trends of the Russian revolutionary movement. The radical Jewish youth joined clandestine organizations in the towns of Russia and abroad. Many Jews ranked among the leaders of the revolutionaries. The leaders of the Social Democrats included J. *Martov and L. *Trotsky, while Ch. *Zhitlowski and G.A. *Gershuni figured among the founders of the Socialist Revolutionary Party of Russia. With the growth of national consciousness in revolutionary circles at the close of the 19th century, a Jewish workers' revolutionary movement was formed. Workers' unions which had been founded through the initiative of Jewish intellectuals united and established the *Bund in 1897. The Bund played an important role in the Rus-

sian revolutionary movement in the Pale of Settlement. It regarded itself as part of the all-Russian Social Democratic Party but gradually came to insist upon certain national demands such as: the right to cultural autonomy for the Jewish masses, recognition of Yiddish as the national language of the Jews, the establishment of schools in this language, and the development of the press and literature. The Bund was particularly successful in Lithuania and Poland, where after a short time it raised the social status of the worker and the apprentice, and implanted in them the courage to stand up to their employers and the authorities.

Another response of the Jews to their oppression in Russia found expression in the Zionist movement. Zionism originated in the *Hibbat Zion movement which came into being after the pogroms of 1881–83 (see also Leon *Pinsker). A few of the hundreds of thousands of Jews who left for overseas turned toward Erez Israel and established the first settlements there. Hovevei Zion societies in Russia propagated the idea of this settlement and raised funds for its maintenance. The movement gained great impetus with the appearance of Theodor *Herzl, the convention of the First Zionist Congress in Basle, and the founding of the World Zionist Organization (1897). Because of the political regime of Russia, the central institutions of the Zionist Organization were established in Western Europe, even though the mass of its members and influence came from Russian Jewry. Zionism won adherence among all Jewish groups: the Orthodox and *maskilim*, the middle class and proletariat, the youth and intelligentsia. It encouraged national thought and culture among the masses. The Zionist press (**Haolam*; *Razsvet*, etc.) and Zionist literature in three languages – Hebrew, Yiddish and Russian – gained wide popularity. The movement was illegal and the attitude of the government ranged from one of reserve, seeing that the movement could divert the Jewish youth from active participation in the revolutionary movement, to one of hostility. Zionist congresses and meetings were held openly (Minsk, 1902) and clandestinely. The failure of Herzl to obtain a charter from the Turkish sultan and the debate over the Uganda *project resulted in a grave crisis within the Zionist movement in Russia. Herzl largely based his case for accepting the Uganda project on the urgent need for a “*Nachtasyl*” for the suffering Russian Jews, but it was the majority of the Russian Zionists, led by M. *Ussishkin and J. *Tschlenow, who on principle opposed the Uganda proposal. Some of the proposal’s supporters later resigned from the Zionist movement and founded territorialist organizations (see *Territorialism), the most important of which was the *Zionist Socialist Workers’ Party (ss). Immigrants and pioneers from Russia formed the greater part of the Second Aliyah and it was from their ranks that the founders of the labor movement in Erez Israel emerged.

Within a relatively short period, the revolutionary movement and the Zionist movement brought a tremendous change among Jewish youth. The *battei-midrash* and yeshivot were abandoned, and dynamism of Jewish society now became concentrated within the new political trends.

When the new wave of pogroms broke out in Russia in 1903, Jewish youth reacted by a widespread organization of self-defense. Defense societies of the Bund, the Zionists, and the Zionist-Socialists were formed in every town and townlet. The attackers encountered armed resistance. The authorities, who secretly supported the pogroms, were compelled to appear openly as the protectors of the rioters. The principal motives for the self-defense movement were not only the will to protect life and property but also the desire to assert the honor of the Jewish nation.

CULTURAL DEVELOPMENTS. The nationalist awakening was also expressed by an astonishing development of Jewish literature in Hebrew, Yiddish and Russian. A continuation of the Haskalah literature, it reached its peak during the generation which preceded the 1917 Revolution. The most outstanding authors of that period were: *Aḥad Ha-Am, M.J. *Berdyczewski, M.Z. *Feuerberg, the Hebrew poets Ḥ.N. *Bialik, Saul *Tchernichowsky, Z. *Shneour, and others, as well as the Jewish Russian poet S.S. *Frug, and the Yiddish writers *Shalom Aleichem, I.L. *Peretz, and Sholem *Asch. There also arose a generation of researchers and historians, the most important of whom was S. *Dubnow, who wrote his *History of the Jews* and based his historical and world view on *Autonomism. Systematic research into Jewish folklore was started upon (S. *An-Ski). A Jewish encyclopedia in Russian was published (*Yevreyskaya Entsiklopediya*; 1906–13). The existing and new societies – Ḥevrat Mefizei Haskalah, *ORT, *OZE, ICA – became frameworks for the activity of members of the Jewish intelligentsia who sought to extend the scope of these societies as far as possible. Jewish newspapers circulated in hundreds of thousands of copies. The mass of Jews read the daily press in Yiddish (*Der Fraynd*; **Haynt*; *Der *Moment*; etc.); Hebrew readers turned to the Hebrew press (**Ha-Zefirah*; **Ha-Zofeh*; *Ha-Zeman*); others read the Russian-Jewish press. In St. Petersburg the foundations were laid for a Higher School of Jewish Studies by Baron D. *Guenzburg, and in Grodno a teachers’ seminary, which trained teachers for the Jewish national schools, was opened under the patronage of the Ḥevrat Mefizei Haskalah.

An important point at issue that developed between the Zionists and their opponents was the character of Jewish culture. The Bund and Autonomist circles considered that the future of the Jews lay as a nation among the other nations of Russia; they sought to liberate it from religious tradition and to develop a secular culture and national schools in the language of the masses – Yiddish. The Zionists and their supporters stressed the continuity and the unity of the Jewish nation throughout the world and regarded Hebrew as the national language of the Jewish people. They considered the deepening of Jewish national consciousness and attachment to the historical past and homeland – Erez Israel – to be the primary aim and mainstay of Jewish culture. This controversy grew acute after the Yiddishists had proclaimed Yiddish to be a national language of the Jewish people at the *Czernowitz

Map 1. Main Jewish communities in Russia outside the Pale of Settlement. Population figures according to official census of 1897.

Yiddish Language Conference in 1908. The “language dispute” was fought with bitter animosity and caused a split within the Jewish intelligentsia of Eastern Europe.

WORLD WAR I. Russian Jewry, while regarding World War I with some fear, felt that their participation in the defense of Russia would bring about the abolition of their second-class status. The course of events did not, however, justify this anticipation. The mobilization affected about 400,000 Jews of whom approximately 80,000 served at the front. The battle lines passed through the Pale of Settlement in which millions of Russian Jews lived. In the region of the Russian front and its nearby hinterland, there was a military regime under the control of a group of antisemitic generals (Prince Nikolai Nikolayevich; Januszkiewicz). With the first defeats of the Russian army, the supreme command found it expedient to impute responsibility for their reversals to the Jews, who were accused of treason and spying for the Germans. Espionage trials were held and hostages were taken and sent to the interior of Russia. This was followed by mass expulsions of Jews from towns and townlets near the front line. These reached their height with the general expulsion of the Jews from northern Lithuania and Courland in June 1915.

In July 1915 the use of Hebrew characters in printing and writing was prohibited. The Hebrew and Yiddish press and literature were thus silenced. The attacks on the Jews aroused public opinion in Europe and America against the Russian government whose serious military and financial situation compelled it to take Western opinion into account, as this was hindering Russia from obtaining loans in the Western countries. In the summer of 1915, most of the restrictions on Jewish residence were abolished *de facto*, though not *de jure*, and thousands of Jewish refugees from Poland and Lithuania streamed toward the interior of Russia. From the outset of the war, Jewish communal workers established a relief organization for Jewish war victims known as **YEKOPO*. In conjunction with the existing Jewish societies, it assisted the refugees by providing shelter, food, and employment for them and by the establishment of schools for their children. Communal workers of every class participated in this activity, which awakened the feeling of national unity within the masses. The suffering and persecutions led Jews to attempt to evade military service and desert from the hostile army, and in the difficult conditions caused by the mass of refugees and defeat, speculation in food and other commodities became rife among Jews. The non-Jewish population and the army reacted by intensified hatred toward them.

The extensive conquests of Germany and Austria in 1915 brought approximately 2,260,000 Jews (40% of Russian Jewry) under the military rule of the advancing armies, thus freeing them from czarist oppression while separating them from the Jews who remained under the *czar*. In 1917 there were 3,440,000 Jews in the region which remained under Russian control; of these, about 700,000 lived outside the former Pale of Settlement. These upheavals brought about cul-

tural and social changes. The conscription of great numbers of Jewish youths into the Russian army and the suppression of the Jewish press and the literature accelerated the process of Russification among the Jews there. In contrast, the Jewish masses of Poland, Lithuania, the eastern Ukraine, and Belorussia, which formed the most deep-rooted element, as well as the great Jewish cultural centers of Warsaw and Vilna, were torn from Russian Jewry. This also affected the greater part of the *Hasidim*.

THE FEBRUARY REVOLUTION (1917). The nine months following the February Revolution of 1917 constituted a brief springtime in the history of Russian Jewry. The Provisional Government abolished all the restrictions affecting the Jews on March 16, 1917, as one of its first measures. Jews were immediately given the chance to hold office in the government administration, to practice at the bar, and rise in the army ranks. All at once opportunity opened up to them for free development in every sphere of life, both as citizens of the state and as a national group. The hatred of the Jews, which had served as a political weapon in the hands of the ancient regime, became incompatible with the Revolution and was forced underground.

Naturally the Jews supported the Revolution and participated in the active political life which began to flourish in the country. There were Jews in all the democratic and socialist parties at all levels, from the leadership to the rank and file. The leaders of the Constitutional Democratic Party (Kadets) included the jurist M. *Vinawer; among the Socialist Revolutionaries there was O. *Minor, who was elected mayor of Moscow, and I.N. *Steinberg, who later became commissar for justice in the first Soviet government headed by *Lenin. Other leaders included, among the Mensheviks, J. *Martov, and F.I. *Dan; and among the Bolsheviks, L. Trotsky, Y.M. Sverdlov, L.B. *Kamenev, and G. *Zinoviev. Many Jews led the revolutionaries in the provinces, which were poor in intellectual forces. Despite their numbers in the general revolutionary movement, these revolutionaries were only a minute section of the vast numbers of Russian Jews who remained attached to their national and religious culture and society. This adhesion was expressed by the tremendous progress made by the Zionist movement in 1917. In May 1917 the seventh conference of the Zionists of Russia, representing 140,000 members, was held in Petrograd. Youth groups under the name of **He-Ḥalutz*, who prepared themselves to settle in Erez Israel, were formed in many towns and townlets. The Zionists also promoted an intensive cultural activity. The *Ḥovevei Sefat Ever* (“Lovers of the Hebrew Language”) society founded under the czarist regime, became the **Tarbut* society. In Moscow a Hebrew daily, *Ha-Am*, was published and Hebrew publishing houses financed by the wealthy arts patrons Stybel (Stybel Publishing) and Zlatopolsky-Persitz (Omanut Publishing) were established. Training colleges for teachers and kindergarten teachers were founded, as well as elementary and secondary schools. The first steps were taken for the establishment of

a Hebrew theater, *Habimah. In all the elections which were held during that year by the general and Jewish institutions, the Zionists and related groups headed the Jewish lists, leaving the Bund and other Jewish parties far behind.

In November 1917 information on the *Balfour Declaration reached Russia and it was acclaimed with immense enthusiasm by the Jews throughout the country. Large-scale Zionist demonstrations and meetings were held in Odessa, Kiev, Moscow, and other communities. All the Jewish parties united in joint activity to prepare the All-Russian Jewish Convention, which was to establish a political-cultural autonomous organization and central representation of all the Jews in Russia. A powerful national awakening was manifested among the hundreds of thousands of Jewish soldiers who served in the Russian army. Thousands of them enrolled in the military colleges and obtained officers' rank. At meetings and conventions of soldiers, debates were held on the establishment of a Union of Jewish Soldiers, one of whose principal objectives would be the organization of self-defense on a military basis, to prevent and suppress pogroms. This union was headed by Joseph *Trumpeldor. Indeed, as the Provisional Government weakened and anarchy became widespread, antisemitism lifted up its head, and here and there pogroms characterized by looting and assaults on Jews were perpetrated by undisciplined soldiers and mobs. The necessity for an organization which could stand in the breach was felt.

The Jews of the Ukraine, where in 1917 about 60 percent of all the Jews living under Russian rule were to be found, faced in the summer of this year the tendency toward separatism that began to manifest itself there. A Central Ukrainian Council (Rada) was formed which at first demanded autonomy for the Ukraine and later (in January 1918) complete independence. The Jewish masses in the Ukraine did not regard Ukrainian separatism with favor. They felt no affinity with Ukrainian culture and retained in mind the tradition of hatred toward the Jews and the massacres of the 17th century (Chmielnicki) and the 18th (the Uman massacre) by Ukrainians. The Jews there regarded themselves as an integral part of Russian Jewry. The Jewish parties, Zionist and socialist, were, however, inclined to collaborate with the Ukrainians, both because of the doctrinal principle of supporting non-Russian nationalism and out of political considerations. The Ukrainians on their side were most anxious to acquire the support of the large Jewish minority which lived with them. Extensive internal national autonomy was promised to the Jews. A National Jewish Council was established, and at the end of 1917 an undersecretary for Jewish affairs (M. *Silberfarb) was appointed in the Provisional Government of the Ukraine. He became minister after the proclamation of Ukrainian independence.

THE CIVIL WAR. After the Bolshevik Revolution of October 1917, the whole of Russia was plunged into a civil war which lasted until the beginning of 1921. The Jews of the Ukraine were especially affected by this war. Various armies were clash-

ing in the area: the Ukrainian army under the command of S. *Petlyura and the bands of peasants connected with him; the Red Army, which came from the north but which organized and incorporated within its ranks many Ukrainian units; the counterrevolutionary "volunteers' army" (the "White Army") under the command of A. *Denikin; and independent units headed by local leaders (Grigoryev; Makhno; and others). These armies were composed mostly of soldiers who had fought on the battlefields of World War I and in general formed a wild mob mainly seeking after loot and bloodshed. As they passed through the towns and settlements, they abused and assaulted defenseless Jews. At times they contented themselves with the imposition of a "contribution" of money, clothes, and food, or with looting and murder on a limited scale. On other occasions, however, especially when in retreat, these armies and bands perpetrated general pillage and massacre among the Jews.

The first acts of bloodshed against the Jews were carried out by units of the Red Army during their retreat before the Germans in the northern Ukraine during the spring of 1918. However, the Red Army command had already adopted a clear policy of suppression of antisemitism within the army ranks. Systematic propaganda against antisemitism was conducted and the rare army units or individual soldiers who attacked the Jews were severely punished. Even though units of the Soviet army also later erupted into violence against the Jews (especially at the time of the retreat of the Red Army before the Poles in 1920), the Jews nevertheless came to regard the Soviet regime and the Red Army as their protectors. On the other hand, manifest antisemitism reigned within the units of the Ukrainian army and the peasant bands affiliated to it. At the beginning of 1919, during the retreat of the Ukrainian army before the Red Army, the regular army units systematically massacred the Jews with bestial savagery in Berdichev, Zhitomir, *Proskurov (leaving about 1,700 dead within a few hours), and other places. The Jewish autonomous organs in the Ukraine and the Jewish minister in the Ukrainian government could not obtain the punishment of the army commanders responsible for these pogroms. This convincingly proved to all the regular and irregular units of the Ukrainian army that lawlessness was licensed in regard to Jews. The policy of grain confiscation from the peasants adopted by the Soviets in those years encouraged anti-Soviet movements among the peasants. The Jews, inhabitants of the towns and townlets, were identified with Soviet rule, and the bands of peasants occasionally perpetrated systematic massacres of Jews when they gained control, often for a very short while, of the localities where Jews were living (Trostyanets, Tetiyev, etc.). During the summer of 1919, the White Army began to advance from the Don region toward Moscow. This army, which was composed of battalions of officers and Cossacks, was saturated with antisemitism and one of its slogans was the old slogan of czarist antisemites: "Strike at the Jews and save Russia!" Its way northward became a succession of pillage, rape, brutality, and slaughter which reached its climax in the massacre of

the Jews at Fastov (with 1,500 dead). Their attacks on the Jews were even more severe at the time of their disorderly retreat southward at the end of 1919. It is difficult to assess the losses suffered by Ukrainian Jewry in these pogroms. S. Dubnow estimated that 530 communities had been attacked. More than 1,000 pogroms were perpetrated in these communities. There were more than 60,000 dead and several times this number of wounded. In the western Ukraine and Belorussia, the suffering of the Jews was caused mainly by the Polish army. Although pogroms did not take place, the Jews were terrorized and hundreds were executed without trial as “suspects” of Communist affiliation (Pinsk 1919, etc.). The Ukrainian and Russian “volunteer” units (under General Balachowicz-Bulak) which fought with the Poles also attacked the Jews.

During those years, Jewish self-defense units were formed in many places in the Ukraine. These efforts were, however, local. They were successful in several large towns and in a few townlets only. At the beginning of the civil war, a “Jewish Fighting Battalion” led by a nucleus of demobilized soldiers and officers was formed in Odessa. This battalion obtained many arms and saved the Jews of Odessa from pogroms. The defense units of the small towns managed to protect the Jews from small local bands, but were powerless when confronted by army units or large bands of peasants. Occasionally the attackers took cruel vengeance against the inhabitants for the resistance offered by their youth when they entered the locality (the *Pogrebishche massacre). During the last two years of the civil war, as Soviet rule strengthened, these self-defense organizations at first received political and military support. However, since nationalist and Zionist elements prevailed in them, they were disbanded later during the suppression of non-Bolshevik elements in 1921–22.

Under the Soviet Regime

By 1920 the borders of Soviet Russia took shape. A considerable number of Jews who had formerly been included within the borders of the Russian Empire remained in the states which had broken away from it (Poland, Lithuania, Latvia, Estonia, and Bessarabia, incorporated into Romania). Only about 2,500,000 Jews remained within the limits of Soviet Russia. The fate of the Jews within the borders of Soviet Russia was to a large extent determined by the theory and practice of the Communist Party. Its outlook was defined and crystallized during the 20 years which preceded the Revolution. Like all the other socialist and liberal parties, the Bolshevik Party repudiated antisemitism, while the civic emancipation of the Jews, as that of the other Russian peoples, formed part of its program. It took some time until the party recognized Jews as a nationality. Under the influence of assimilated Jews, who carried weight in the circles of the socialist leadership of Europe and Russia, the Bolsheviks were inclined to regard integration and assimilation as the only “progressive” solution of the Jewish problem. This outlook was sharpened during the bitter discussion at the beginning of the century between the Bolsheviks and the Bund. Leaning upon Marx, K. Kautsky,

and O. *Bauer, Lenin declared that “there is no basis for a separate Jewish nation,” and in regard to a “national Jewish culture – the slogan of the rabbis and the bourgeoisie – this is the slogan of our enemies.”

Stalin declared in his pamphlet, *Marksizm i natsionalny vopros* (*Marxism and the National Question*, 1913), that a nation is a “stable community of men, which came into being by historic process and has developed on a basis of common language, territory, and economic life”; since the Jews lack this common basis they are only a “nation on paper,” and the evolution of human society must necessarily lead toward their assimilation within the surrounding nations. These theories of the fathers of Communism increasingly influenced Soviet policy toward the Jews, though in the beginning the Soviets were compelled by the actual conditions to deviate from their theories and to allow the existence of Jewish political and cultural institutions (the *Yevseksiya (see below); Yiddish schools and publications, etc.). These deviations, however, proved in the long run to be of a temporary character, after which the line – of imposed assimilation of the Jews – was implemented with even more energy and firmness.

By its war on antisemitism and pogroms, the new regime gained the sympathy of the Jewish masses whose lives depended on its victory. Jewish youth enthusiastically joined the Red Army and took part in its organization. Many Jews reached the higher military ranks and played an important role in the formation of the Red Army. Leon Trotsky, who organized the military coup of the October Revolution of 1917, was the creator of the Red Army, which included among its prominent commanders a number of Jews (of whom the most celebrated were General Jonah *Yakir and Jan Gamarnik). In the Soviet air force there was General Y. *Shmushkevich. In 1926, 4.4 percent of the officers of the Red Army were Jews (two and a half times higher than their ratio to the general population). Jews took an important part in the restoration of the country’s administration, which had collapsed after a large section of the Russian intelligentsia and former officialdom emigrated from Soviet Russia or refused to serve in it.

However, the new regime brought complete economic ruin to the Jewish masses, most of whom belonged to the “petty bourgeoisie” of the towns and townlets. The abrogation of private commerce, confiscation of property and goods, and liquidation of the status of the townlet as the intermediary between the peasants and the large towns – all these deprived hundreds of thousands of Jewish families of their livelihoods. About 300,000 Jews succeeded in leaving the Soviet-controlled territories for Lithuania, Latvia, Poland and Romania. The declaration of Lenin on the failure of the economic policy of the period of “war Communism,” the introduction of the New Economic Policy (NEP), together with the conclusion of the civil war and the restoration of order in the country, brought some relief to the Jews, but their economic situation was broken and hopeless.

With economic ruin, the new regime also brought spiritual ruin to the Jews. When the Bolsheviks seized power,

they were compelled to recognize the fact, even if as a temporary phenomenon, of the existence of millions of Jews who were attached to their language and their national tradition. A Jewish commissariat headed by the veteran Bolshevik S. *Dimanstein was established between 1918 and 1923 to deal with Jewish affairs. "Jewish Sections" (Yevseksiya) were also set up in the branches of the Communist Party. Jewish members of the party who were prepared to work among their fellow Jews were organized in these sections. The function of the Yevseksiya was to "impose the proletarian dictatorship among the Jewish masses." The older Jewish members of the Communist Party were mostly assimilationists who did not want any contact with their people. However, as the success of the Bolsheviks and the efficiency of their terror measures became increasingly evident, they were joined by sections of Jewish socialist parties (the Bund, the *United Jewish Socialist Workers' Party, the *Po'alei Zion) as well as by individual Jews. These brought with them ideas on the fostering of a secular Jewish culture in Yiddish and envenomed hatred toward the Jewish religion, the Hebrew language, the Bible, and the Zionist movement. The Communist Party put them in control of the Jewish population centers, at the same time stressing that their activity was only a temporary measure for as long as it would be required.

The first activity of the Yevseksiya was the liquidation of the religious and national organizations of the Jews of Russia. In August 1919 the Jewish communities were dissolved and their properties confiscated. The general antireligious policy took the form, in relation to the Jews, of persecution of traditional Jewish culture and education, of prohibiting the religious instruction of children, the closure of *ḥadarim* and *yeshivot*, and the seizure of synagogues which were converted into clubs, workshops, or warehouses. A violent campaign against the Jewish religion and its leaders was conducted and heavy taxes were imposed on the rabbis and other religious officials in order to compel them to resign from their positions. In these activities the Yevseksiya encountered the opposition of the religious masses, who based themselves on the promise of freedom of religious worship, which was officially proclaimed and later included in the Soviet constitution, and struggled for their right to pursue their way of life by legal or illegal methods (through "underground" *ḥadarim*, *yeshivot*, etc.). The imprisonment and expulsion from the Soviet Union of Rabbi J. *Schneersohn, the leader of Chabad Ḥasidism, in 1927 marked one phase in the suppression of Jewish religion. Even after this, "underground" religious activity continued, and its influence was manifested when hundreds of ḥasidic families left the Soviet Union and went to Erez Israel after World War II.

War was also proclaimed against Hebrew; its study was prohibited, and the publication of books in Hebrew was suspended (though until 1928 it was still possible to print religious books and Jewish calendars). In June 1921 a group of Hebrew authors led by H.N. Bialik and S. Tchernichowsky left Russia. Several years later, the Hebrew theater Habimah left the Soviet

Union. It had attained a high artistic standard and for several years had been protected from the Yevseksiya by several of the greatest Russian cultural personalities, led by M. Gorki. The remaining Hebrew authors (Abraham Friman, Ḥayyim *Lenski, Elisha *Rodin, and others) were cruelly persecuted and many of them sent to forced labor camps.

The Zionist movement revealed great vitality. The Soviets viewed Zionism as a threefold danger. It strengthened the vitality of Jewish nationalism. It diverted the Jewish intelligentsia, whose talents the regime required, toward activities beyond the borders of the Soviet Union. It maintained relations with the World Zionist Organization, then an ally of Britain, which ranked among the countries hostile to the Soviet Union. The Zionist movement went underground. Most of its members were youths and boys who were active in the Zionist parties (Z'eirei Zion; zs), youth movements (*Ha-Shomer ha-Za'ir; Kadimah; and others) and within the framework of He-Ḥalutz which trained its members for *aliyah*. Many Zionists were imprisoned, sent to labor camps, or exiled to outlying places in Soviet Asia. For several years, the Soviets authorized the existence of He-Ḥalutz in certain regions of the country, but this authorization was abrogated in 1928. Thus organized Zionism was silenced by the end of the 1920s.

The independent societies and publishing houses (Ḥevrat Mefizei Haskalah, the Historical and Ethnographic Society, and others) continued to exist until the late 1920s. Some of their activists succeeded in leaving the Soviet Union (S. *Dubnow; S. *Ginsburg). Individuals remained in the Soviet Union (I. *Zinberg). In 1930 the Yevseksiya was also disbanded. The first stage in the liquidation of the national life of the Jews in the Soviet Union had been completed.

"JEWISH PROLETARIAN CULTURE." To replace the Jewish culture which had been destroyed, the Jewish Communists attempted to develop a "Jewish proletarian culture," which was to be, according to Stalin's slogan, "national in form and socialist in content." This culture was based on the promotion of the Yiddish language and its literature, while the writing of Hebrew words in Yiddish was changed to phonetic transcription, so as to cut the link with Hebrew (examples: *נאוויירי* instead of *חברים*; *עמעס* instead of *אמת*). A Yiddish press was established, with three leading newspapers; *Der Emes* (1920–38) in Moscow, *Shtern* (1925–41) in the Ukraine, and *Oktiabar* (1925–41) in Belorussia. Numerous literary and philological periodicals, youth newspapers, and a trades unions press were published every year. A Yiddish theater network was established. It was headed by the Jewish State Theater under the direction of A. *Granovski (until 1929) and afterward the actor S. *Mikhoels. These presented adaptations of Jewish classics, by authors such as Mendele Mokher Seforim, Shalom Aleichem, and I.L. Peretz, as well as Yiddish translations of Soviet propaganda pieces and plays. In Minsk and Kiev, "Faculties of Jewish Culture" were established in the universities. They essentially promoted research into the Yiddish language and its literature, Jewish folklore, and Marxist historiography of the his-

tory of the Jews in Russia and of the Jewish labor movements. The works of these institutes, as well as the whole of Jewish literature, were subject to the supervision of the Yevseksiya, headed by M. *Litvakov, who kept watch to prevent “nationalist and rightist deviations.” During the short period from the middle 1920s to the middle 1930s when this Soviet Yiddish culture flourished, it appeared to many adherents of Yiddish in the world that with the assistance of a great power a new Yiddish literature would emerge in the Soviet Union. Jewish authors and scholars who had left the country during the first years after the Revolution, as well as Jews from other countries, began to arrive in Moscow, Kiev, and Minsk (among them the authors: D. *Bergelson, P. *Markish, M. *Kulbak, and the scholars: N. *Shtif, M. *Erik, and Meir *Wiener).

Yiddish was also given an official status by the establishment of governmental tribunals in which proceedings were held in Yiddish. The greatest efforts were, however, invested in the development of a network of Yiddish schools. Many such schools were opened in the towns and townlets of the Ukraine and Belorussia. During the first years, an attempt was even made to compel Jewish parents to send their children to these schools. Secondary schools and training colleges for teachers were also established. At the height of this period, in 1932, 160,000 Jewish children (over one third of the Jewish children of elementary school age) attended these institutions. From this year, however, a decline set in. Jewish parents refused to send their children to schools whose Jewish character, apart from the language of instruction (which was the de-Hebraized Soviet Yiddish), was limited to the study of a few chapters of Yiddish literature, with even these interpreted in a manner that offended the religious and national values of the Jewish people. A further cause for the decline of this network of schools was the small number of Yiddish secondary schools and the lack of Yiddish higher educational institutions. By the late 1930s, these schools began to disappear until they were liquidated, largely of their own accord, in almost every corner of the Soviet Union.

Cultural assimilation gradually gained in momentum among the Jews as they became integrated within the life of the new Soviet society. The majority of the Jewish children attended Russian schools. Jewish youth was attracted to the larger cities where the Yiddish language was nonexistent. Even the Jewish-Russian press, which served as an obstacle to assimilation, and the Jewish societies and organizations were absent there. Mixed marriages became a frequent occurrence. In 1935 over 60,000 Jews studied at the higher schools (over 10 percent of the country’s students). An expression of the assimilation of the Jews and their activity in Soviet literature could be seen from their large participation in the first conference of Soviet writers in 1934, at which there were 124 delegates of Jewish nationality (about 20 percent of the delegates). Only 24 of them wrote in Yiddish; the others mainly in Russian. These included some of the most prominent authors of Soviet Russian literature, such as: I. *Ehrenburg, B.L. *Pasternak, I. *Babel, and S. *Marshak. The Jews also played a central role in

the development of other spheres of Soviet culture, especially the cinema (S. *Eisenstein; M. Romm).

ECONOMIC RESHUFFLE. The most decisive factor in the history of the Jews of the Soviet Union was the economic reshuffle which took place in their midst during the 1920s and 1930s. The brief NEP period (1921–27) aroused vain hopes among the Jews, who occupied a place of considerable importance in the urban economic class of shopkeepers and independent craftsmen (“nepmen”). However, when the success of the NEP period was at its height, severe supervision was imposed on this class, and the burden of taxation brought its impoverishment and destruction. The situation was especially difficult in Jewish townlets whose former economic basis had been destroyed. A widespread class of the destitute and unemployed was created; its members were also deprived of civic rights (*lishentsy* in Soviet terminology), such as the right to employment, public medical care, and the right of their children to study in secondary and higher schools. With the liquidation of the NEP and the introduction of the first Five-Year Plan (1927–32), the situation of these masses deteriorated even further. Thousands of families subsisted on the meager assistance which they received from Western Jewry, through public organizations (the American Jewish *Joint Distribution Committee (JDC), ORT, ICA), through organizations of emigrants from towns or townlets (*Landsmannschaften), or individual relatives. Notorious in this period was the “Extortion of Dollars” campaign of the Soviet secret police, with the use of coercion and torture against Jews suspected of “hoarding dollars.” During the late 1920s, according to official statistics, about one third of the Jews belonged to the economic classes which were destined to disappear and were deprived of the above-mentioned rights. The authorities sought to solve this problem in three ways: by agricultural settlement; by migration to the interior regions of Russia, which had been closed to the Jews under the czarist regime; and by concentration in the large towns and industrial regions of the Ukraine and Belorussia, where new classes of government officialdom and industrial enterprises had developed.

AGRICULTURAL PROJECTS. During the 1920s, many of the leaders of the Soviet government came to regard agricultural settlement as the high road to the solution of the Jewish problem. A steady movement toward agricultural settlement of Jews had already started near the Jewish townlets during the period of war Communism in the years of the civil war, when occupation in agriculture at least promised a piece of dry bread. In 1924 the government created the Commission for Jewish Settlement (Komzet) and a year later a Society for the Promotion of Jewish Settlement (Ozet) was founded. Several Soviet leaders, led by M. Kalinin and Y. *Larin, viewed this settlement not only as an economic solution for the Jews but also as a means of assuring their national existence. Some members of the Yevseksiya accepted these projects with enthusiasm and devoted themselves to their realization. These circles aimed to establish Jewish settlement in successive blocs which would

form autonomous national areas and would eventually find their place among the national units of which the Soviet Union was composed. As a basis for such a concentration, the regions of prerevolutionary Jewish settlement in southern Russia were chosen, where 40,000 Jewish farmers already lived, as well as the Crimean peninsula, in the northern parts of which there were still areas available for settlement. Over a number of years five autonomous Jewish agricultural regions were established: *Kalinindorf (Kalininskoye) in 1927, Nay Zlatopol in 1929, Stalindorf (Stalinskoye) in 1930, in the Ukraine; Fraydorf in 1931, and Larindorf in 1935, in the Crimea. Jewish settlement organizations of the West, especially ICA and the JDC, were associated in these activities. Ozet became the legal focus for Jewish activities, and in its newspaper *Tribuna* (Russian, 1927–37) the problems of the “productivization” of the Jews and their agricultural settlement were discussed. Communists of Russia and abroad considered this activity to be, among others, the Soviet alternative to Zionism.

It soon became evident that there was not sufficient space in the Ukraine and Crimea for Jewish settlement on a large scale. In 1928 the government decided to direct this settlement to a distant and sparsely populated region in the Far East – the region of *Birobidzhan, on the banks of the Amur River on the Chinese border. In order to encourage settlement in Birobidzhan, a political as well as an international Jewish character was given to this enterprise. Jews throughout the world were called upon to lend a hand in the establishment of a Jewish territorial unit within the framework of the Soviet Union. On May 7, 1934, the district of Birobidzhan was proclaimed a Jewish Autonomous Region which was to cover an area of 36,000 sq. km., whose official language would be Yiddish. Settlement in Birobidzhan took place in difficult pioneering conditions. In August 1936, the government announced that “the Jewish Autonomous Region was from now on to become the cultural center of Soviet Jewry for all the working Jewish population.” This proclamation aroused opposition within the circles of Jewish activists in the European part of the Soviet Union. It appears that misgivings were also felt in government circles toward the outspoken national character which the settlement of Birobidzhan received. In August 1936, a drastic change occurred in the attitude of the government toward Birobidzhan. The leadership of the region, which was in the hands of former members of the Jewish socialist parties, was liquidated. From then, the Jewish aspect of the region began to wane. Officially Birobidzhan retained its name and status of a Jewish autonomous region, and the only newspaper still published in Yiddish in the Soviet Union is the *Birobidzhaner Shtern*. At present, however, Birobidzhan has only symbolic importance in the lives of the Jews of Russia. Its number of Jewish inhabitants, which in 1936 rose to 18,000 (about 24 percent of the total population of the region), declined to 14,169 in the census of 1959, forming 8.8 percent of the region’s population and about 0.66 percent of the Jewish population of the Soviet Union. Less than 40 percent of them declared Yiddish to be their mother tongue.

By the late 1930s, the hopes which many Jews in Russia and abroad had pinned on agricultural settlement evaporated. The collectivization of farming during the early 1930s, which was frequently bound up with a policy of “internationalization” (i.e., the inclusion of non-Jewish peasants in Jewish kolkhozes), resulted in the departure of many Jewish settlers. The industrialization and development of the towns attracted many members of the settlements to the large towns. With the German invasion, all the Jewish settlements of the Ukraine and Crimea were destroyed and they did not recover after the war.

The Jewish Population of Birobidzhan, 1928–1959

	Numbers	Immigration into the region
1928	400	900
1929	1,200	1,000
1930	2,600	1,500
1931	3,500	3,250
1932	7,000	9,000
1933	6,000	3,000
1934	8,000	5,250
1935	14,000	8,350
1936	18,000	8,000
1937	19,000	3,000
1945	20,000	1,750
1948	30,000	10,000
1959	14,269	–

ABSORPTION INTO THE SOVIET STRUCTURE. In practice, the problem of Jewish integration within the economic structure of the Soviet Union was solved by many Jews moving to the interior of Russia and their absorption in Soviet officialdom and industry. Migration toward the interior of Russia, which had already begun as a result of the expulsions from the war zones in 1915 and with the outbreak of the Revolution of 1917, continued uninterrupted, as indicated by the general censuses which were held in the Soviet Union in 1926 and 1939 (see Table: Migration toward the Interior of Russia, 1926 and 1939).

Migration toward the Interior of Russia, 1926 and 1939

Region	1926		1939	
	Number of Jews (thousands)	% of total population	Number of Jews (thousands)	% of total population
Russian S.F.S.R.	599.0	22.4	948	31.4
Ukraine	1,574.5	59.0	1,533	50.8
Belorussia	407.0	15.2	375	12.4
Caucasus	51.5	1.9	84	2.8
Soviet Central Asia	40.0	1.5	80	2.6
Total	2,672	100.0	3,020	100.0

The movement of Jews to Moscow and Leningrad was most evident (see Table: Movement of Jews to Moscow and Leningrad).

Movement of Jews to Moscow and Leningrad

Town	Number of Jews		
	1897	1926	1940 (approx.)
Moscow	8,473	131,000	400,000
Leningrad	17,251	84,412	175,000

Hundreds of thousands of Jews took up employment as factory workers or were absorbed in administrative occupations (especially as clerks in consumers' cooperatives and in accountancy). The division of the Jews' social status in 1939, according to official sources, appears in Table: Jews According to Social Status, Russia, 1939.

Jews According to Social Status, Russia, 1939

Occupation	%
Clerks	40.6
Workers	30.6
Cooperative craftsmen	16.1
Individual craftsmen	4.0
Peasants in kolkhozes	5.8
Others	2.9
Total	100.0

Jews were heavily represented in the Soviet intellectual class. At the close of the 1930s, 364,000 Jews (of whom 125,000 were accountants) belonged to this class. Thus, in Soviet society, the Jews also remained an exceptional element in their social composition. Commerce, which had held the central place in the lives of the Jews before the Revolution, was replaced by administrative occupations and professions in technology and sciences. In Stalin's purges of the late 1930s, which were directed against the members of the old Communist guard, many members of the *Yevseksiya* were liquidated and the main Jewish newspaper and the *Ozet* society were closed down. Apart from this, however, these purges did not bear an anti-Jewish character and were a part of the general policy of the party. At the end of the 1930s, Jews still played an important role in administration, science, and Soviet art. However, no Jewish national or communal organization existed whatsoever. Assimilation took giant strides. Mixed marriages became commonplace. Yiddish-Communist culture was gradually disappearing, but there was still a class of Jewish activists, authors and teachers who held their ground in this atmosphere of extinction, and proclaimed, in accordance with the optimistic official line in the Soviet Union, the great "success" achieved by Marxist-Leninist policy in the solution of the Jewish problem and the "renovated Jewish people" (*dos banayte folk*) which had emerged in the Soviet Union.

During World War II (1939–1945)

On June 22, 1941, the German army invaded Soviet territory. The 22 months preceding the invasion witnessed a steady decline of the remnants of national Jewish life: Jewish institutions

and newspapers which had survived the purge of the late 1930s functioned in an atmosphere of fear and oppression, and Jewish educational institutions closed down, often at their own initiative. Among the younger generation the process of assimilation was accelerated. (In June 1942 the Jewish commander of the Soviet air force, Lieutenant General Yaacov Shmushkevich, twice a Hero of the Soviet Union, was arrested and eventually executed, but this must be regarded as part of Stalin's general purges rather than an attack upon the Jews.)

SOVIET ANNEXATION OF TERRITORIES: 1939–40. The most significant event of this period, in Jewish terms, was the addition of over two million Jews, residents of the territories that had been annexed by or incorporated into the Soviet Union (see Table: Distribution of Jewish Population in the Soviet-Annexed Territories).

Distribution of Jewish Population in the Soviet-Annexed Territories

Area	Date of Annexation	Number of Jews	Location of Large Communities
Eastern Galicia and western Belorussia	Sept. 1939	1,220,000	Bialystok, Pinsk, Grodno, Rovno, Lvov
Refugees from western Poland	Sept. 1939	300,000	
Lithuania and the Vilna area	June 1940	250,000	Vilna, Kovno
Latvia and Estonia	June 1940	100,000	Riga
Bessarabia, northern Bukovina	July 1940	300,000	Kishinev, Chernovtsy
Total		2,170,000	

As a result of the annexations, the Jewish population of the Soviet Union totaled approximately 5,250,000. There were areas in the new territories which had a dense Jewish population – especially the cities – and Jews accounted for 5–10 percent of the total population. Most of these Jews spoke Yiddish and they were imbued with a high degree of national Jewish consciousness. The Zionist movement was strong and well entrenched, and a large part of the youth actively prepared itself to settle in Palestine; the socialist Bund also wielded considerable influence. The Jews had their own educational systems – traditional and secular schools, and also the great *yeshivot* – which taught Hebrew and Yiddish to many thousands of students. A multilingual Jewish press and literature existed whose ranks of Jewish writers and men of letters were augmented by refugees from Warsaw and the towns in western Poland.

Deeply shocked by the swift capitulation of Poland and the fall of its Jews into Nazi hands, most Jews of the newly-annexed territories welcomed the new Soviet regime, regarding it above all as providing assurance of their physical survival. They accepted the new economic and social order in spite of the great hardship that it caused them – confiscation of factories and businesses and the imposition of heavy taxes on shopkeepers and artisans. Jews were now able to enter gov-

ernment service, and found it possible to function in the Soviet economic system in cooperative and state-run workshops and commercial enterprises. The Jewish communities themselves were disbanded and the status of religion and religious institutions – synagogues, yeshivot and religious schools – underwent a sharp decline. The Hebrew-language schools had to adopt Yiddish as the medium of instruction and introduce the Soviet curriculum, with teachers from the old part of the U.S.S.R. put on their staff. Jewish youth organizations were either disbanded or went underground and many of the young people joined the Communist youth movement (Komsomol). The young Zionists and yeshivah students, for the most part, moved to Vilna, which was a Polish city and then became the capital of Lithuania, but was not occupied by the Soviets until June 1940, and from there many succeeded in reaching either Palestine or the United States. There was also a minor revival of Yiddish cultural life. The old Soviet Yiddish writers, who had almost given up all hope of saving Yiddish culture from obliteration, now saw a new sphere of activities opening up. They established contact with writers in such Jewish centers as Vilna, Kaunas, Riga, Lvov, Bialystok, and Chernovtsy, founded newspapers and theaters, and began to publish their books. A chair for Yiddish language and literature, headed by Noah *Prylucki, was created at Vilna University. This development soon met with the disapproval of the Soviet authorities, and by the end of 1940 there was no doubt that Jewish institutions in the new territories were also being systematically liquidated. This was especially true of Jewish schools, where teachers and parents were “persuaded” to replace Yiddish by Russian. A few attempts at protesting this policy were firmly suppressed, as, for example, the arrest and later execution of the Soviet Yiddish writer Selik *Axelrod in Minsk. Many of the refugees from western Poland were arrested in the early months of the Soviet occupation and deported to camps in the Soviet interior. In the spring of 1941, mass arrests took place among Jews and non-Jews alike, primarily former businessmen, industrialists, and religious functionaries, as well as socialists, Zionists and Bundists. They were sent into exile or labor camps in northern Russia, where many of them died; for others, deportation turned out to be the means of survival, while the families they had left behind soon became the victims of the Nazi slaughter. It was clear that Soviet policy was designed to equate the social and cultural standard of the new areas, as quickly as possible, with that of the rest of the country. Any remaining contact between Soviet Jewry and the Jewish world beyond the borders was broken off. The Soviet press reported very little of the atrocities committed by its Nazi treaty partner, and made no mention at all of the persecution of the Jews. As a result, the Jews of the Soviet Union knew practically nothing of the fate of their brethren in the countries occupied by the Germans, and when the Soviet Union was invaded, they were mostly unprepared for what was to happen.

GERMAN INVASION: 1941. In the first few weeks following June 22, 1941, the German invaders occupied most of the areas

annexed by the Soviet Union in 1939 and 1940, including all of Belorussia and the greater part of the western Ukraine (as eastern Galicia had become). Vilna was taken on June 25, Minsk on June 28, Riga on July 1, Vitebsk and Zhitomir on July 9, and Kishinev on July 16. From most of the towns, the Jews attempted to flee to the Soviet interior, but were prevented from doing so either by the advancing German troops or by Soviet security forces who did not permit the crossing of the pre-1939 borders of the U.S.S.R. The Jews in the areas that were occupied by the Germans at a later date, such as Kiev (September 19) and Odessa (October 16), did in large measure succeed in escaping in time, either individually or within the organized evacuation of government employees, of functionaries of institutions, and of workers in factories. In the more remote areas occupied by the Germans, the majority of the Jewish inhabitants also managed to get away in time. The total Jewish population in the areas occupied by the Germans had been four million (spring 1941). Of these, about three million were murdered. The rest were saved in a variety of ways including prior deportation and evacuation together with non-Jews; drafting into the Red Army; and flight to the forests and joining the partisan units. Almost none of the Jews who remained in the cities and towns of the German-occupied territory survived the war. By the time of the German invasion of the U.S.S.R., the Nazi plan for the “*Final Solution” had been worked out. Here the Nazis felt none of the restraint which they had imposed upon themselves in Western Europe, since they were unconcerned by local reaction. The annihilation of the Jews proceeded at a rapid pace. The ghettos that were established proved to be only temporary collection points for the utilization of Jewish labor prior to destruction.

ANNIHILATION OF THE JEWS. The task of the systematic murder of the Jews was put in the hands of four specially created units called *Einsatzgruppen*, made up of 3,000 killers recruited from the *ss, the SD and the Gestapo. These units were assigned the job of following the German troops as they advanced into the Soviet Union, and ridding the occupied areas of all undesirable elements – political commissars, active Communists, and, above all, the Jews. Their task was explained to them in special training courses: to destroy the *Ostjuden* (Jews of Eastern Europe) who represented the “biological base” of the Jewish people all over the world and constituted the breeding ground of world Communism. Each unit was allotted a certain area of activity, and on completion of its task in one area, it was transferred to another. The units were commanded by high-ranking officers of the Gestapo, many of them well-educated men who had chosen the assignment because of its absence of personal danger and its high reward – a better salary, plus the valuables taken from the victims. Among these officers, there were some of the “finest” products of Nazi Germany. Nevertheless, they could not have carried out their task without assistance from various sources, foremost among them the German army, which supplied the *Einsatzgruppen* with personnel, transport and weapons. An

order issued by Field Marshal Reichenau on Oct. 10, 1941, on the “Conduct of the Armed Forces in the Eastern Theater of Operations,” explicitly called upon German troops to assist in the murder of Jews. Hitler described it as an “excellent” (*ausgezeichnet*) order and instructed all army commanders on the Soviet front to follow Reichenau’s example.

Local antisemitic elements, too, participated in the slaughter of Jews, first by means of pogroms initiated of their own accord, especially in the Baltic states and later as members of special police units made up of Ukrainians, Belorussians, Latvians, Lithuanians, and Tatars, who collaborated in the extermination campaign. The Germans had a special interest in gaining the cooperation of the local populations, so that they became accomplices in the crimes being committed. One means by which they achieved this end was the distribution of Jewish houses and portions of Jewish property among gentile neighbors. The attitude of the local population to the Jews differed from one place to another. In the Baltic states and the Crimea, home of the Tatars, there were local elements who participated in the annihilation of Jews as effectively as the Nazis. In the Ukraine the number of Nazi collaborators, led by Ukrainian nationalists, was particularly large. On the other hand, the Belorussian and Russian population in the Nazi-occupied areas hated the Germans and were on the whole opposed to the mass murder of Jews. In a very few instances attempts were made to save Jews. One such effort was the work of the Metropolitan Sheptitski, head of the Uniate Church in the western Ukraine, who, with the help of monks belonging to his church, organized a network for saving Jews by hiding them in monasteries. A similar network of Polish and Lithuanian intellectuals and clerics operated in Vilna. However, prevailing conditions severely limited the scope of these efforts. The method by which the annihilation of the Jews was carried out by the Nazis differed from one place to another. In many instances the murders took place in the very beginning of the occupation. This was true of many cities and towns in the Baltic states, where local nationalists accused the Jews of having welcomed and supported the Soviet annexation. Often the Nazis used the murder of Jews to set an example for the local population and to intimidate them, or in revenge for operations carried out by the partisans. In Kiev 33,779 Jewish men, women, and children were murdered within two days (Sept. 29–30, 1941) in the *Babi Yar Valley, near the local Jewish cemetery, in response to the blowing up of German headquarters in the city. In Odessa, German and Romanian forces reacted similarly to the destruction of Romanian headquarters in the city, and 26,000 Jews were put to death during Oct. 23–26, 1941, many by hanging or burning. The killing in Odessa continued until the middle of the winter. In the Ukraine and Belorussia, the Nazis celebrated the anniversary of the Russian Revolution on Nov. 7, 1941, by mass killings of Jews. In the Soviet Union, the Nazis tried out new ways of murdering Jews. One such method was the use of closed vans, in which Jews were ostensibly being transported from one place to another, while in fact poison gas was forced into

the vans, causing the immediate death of all the passengers. The most common method was to drive the Jews to the outskirts of the city and fire on them by rifles or machine guns in front of previously prepared ditches, pushing the victims into the ditches and covering the ditches with earth. Sometimes some of the victims were not dead, and were thus buried alive. In many instances, they had to remove their clothes before going to their deaths. Nazi leaders, among them A. *Eichmann, were frequent witnesses of these spectacles. Where the slaughter was not completed in the early days of the occupation, the Nazis established ghettos for the survivors, situated, as a rule, in the slum quarters of the town, where the Jews were concentrated in the worst conditions possible. A *Judenrat and a ghetto police force were appointed by the Nazis to run the ghetto. Some of those appointed showed courage and fortitude in carrying out the task that a bitter fate had decreed for them. In the majority of cases, however, working under the Nazis resulted in moral degeneration.

The Jews were forced to wear the yellow *badge and were not permitted to leave the confines of the ghetto, unless they were working for the Nazis outside. From time to time, the Nazis staged *Aktionen* designed to weed out the “useless” elements – invalids, old people and children. Those whose turn for death had not yet come were forced to work in German army workshops, road building and fortifications. Surviving Jews in places that were declared **judenrein* were transferred to central ghettos, which also contained large numbers of Jews from Western Europe. The largest of these ghettos existed in Vilna, Bialystok, Kaunas, Riga, and Minsk (only the last belonging to the pre-1939 Soviet territory), and they remained in existence for almost the entire period of German occupation.

Most of the Jews from Bessarabia and northern Bukovina were deported to *Transnistria, the area beyond the Dniester that had been occupied by the Romanian army, where they suffered from starvation and disease and were put into forced labor. The enormity of the Nazi crimes was revealed while the war was still going on, as soon as the Soviet army began its westward advance, liberating occupied territories. Several of the Nazi murderers who fell into Soviet hands, and their collaborators among the local population, were put on trial. While at the start no attempt was made to conceal the Jewish identity of the victims, after a while the Soviet authorities and information media refrained from mentioning the anti-Jewish character of the crimes and described the victims as “Soviet citizens.”

JEWISH RESISTANCE. Jewish resistance to the Nazi regime was manifested in two ways: the revolt in the ghettos, and participation in the partisan movement (see *Partisans).

There was a decided difference between the behavior of the Jews in the pre-1939 territory of the Soviet Union and the Jews in the recently incorporated areas. The former had been deprived by the Soviet regime of any form of Jewish organization and lacked any semblance of coherence as a national

group. In their case the process of annihilation was swift and thorough and, with few exceptions (Minsk, Kopyls), these ghettos existed only for a few months or even weeks. In the newly annexed areas, such as the Baltic states, former eastern Poland, northern Bukovina, etc., the tradition of Jewish organization and self-contained Jewish life was still strong, and it took the Nazis much longer to wipe out the ghettos. The Jews maintained clandestine institutions for mutual help, and rendered assistance not only to the local Jewish population but also to the deportees who had been brought in from other places. In these ghettos, there were underground libraries, choirs, orchestras, and theater companies, as well as schools and synagogues. An underground press informed the ghetto population of developments on the front and events concerning Jews, and served to keep up morale. These activities were organized largely by the youth and by the few surviving intellectuals. A leading role was played by Zionist youth groups, who hoped for a future life in Erez Israel, and by the Communists, who hoped for the victory of the Soviet army. In many of the ghettos, fighting organizations were created which collected arms in preparation for a ghetto revolt or for escape to join the partisans. The underground fighting groups in the large ghettos managed to maintain communications with each other and send messengers to the ghetto resistance movement headquarters in Warsaw. A major dilemma confronting the fighting ghetto youth was the choice between remaining in the ghetto to carry on the hopeless struggle there, or escaping to the woods to join the partisans. Generally, the policy of the ghetto leadership was to stay in the ghetto and carry on their miserable existence there, in the hope of "surviving them" (*iberlebn zay*); an open revolt would lead to drastic punishment and the immediate murder of large numbers of ghetto inmates. However, the resistance movements arrived at the conclusion that the Nazis aimed at the total extermination of all Jews. In their leaflets (in Vilna, Bialystok, and elsewhere) the resistance called on the Jews not to go "like sheep to the slaughter" but to defend themselves and take up weapons. The only recourse for the underground resistance movement was to stage a revolt of the ghetto as a whole just as it was about to be liquidated. An earlier flight to the woods meant abandoning the ghetto, and the families of the escapees, to their bitter fate.

Usually, however, the problem was resolved by the conditions created by the Nazis. In the summer of 1942, the Germans began the systematic liquidation of the ghettos in the provincial towns. In some of them revolts broke out, the ghetto inmates resisting their deportation, setting the ghetto houses on fire and making mass attempts to escape to the forests. *Nesvizh, *Mir, *Lachva, *Kletsk and *Kremenets were some of the places where ghetto revolts occurred. In August 1943, when the Nazis embarked upon the final liquidation of the *Bialystok ghetto, a revolt broke out there. There were no revolts in *Vilna and *Kaunas, but the Jewish underground encouraged the young people to flee to the forests and join the partisans. In Minsk the ghetto underground maintained close contact with the partisan units in the vicinity.

PARTICIPATION IN THE PARTISAN MOVEMENT. Jewish participation in the partisan movement, which encompassed large areas under German occupation, especially in Belorussia, Lithuania and Ukraine, was relatively small. The partisan movement was based in the forests and the villages in the forest area, consisting primarily of local people, such as peasants and shepherds. There was widespread antisemitism among the partisans, with many instances of partisans attacking Jews, robbing them of their goods, and even murdering them. The time factor was also against wide Jewish participation. The Soviet partisan movement gained its strength after June 1942 (date of the establishment of the central partisan headquarters), a period when most of Soviet Jews in the German-occupied territories had already been murdered. The non-Jewish partisan, as a rule, was an able-bodied person who had chosen to fight the Germans. Most of the Jews, however, who had fled to the forests, had no other choice, and brought with them a large number of old people, women, and children who were incapable of joining the fighting and whose security and sustenance were a heavy burden which the non-Jewish partisans were unwilling to bear. In general, Jews were received coolly by the partisans and frequently had to prove their ability and readiness to fight, as well as obtain their own weapons, before they were permitted to join the partisan ranks. Many Jews, especially in the Soviet interior, assumed non-Jewish names and posed as gentiles in order to join the partisans. The presence of antisemitic elements both in the partisan command and in the rank and file manifested itself in frequent executions of Jewish partisans for minor misdemeanors, for which their non-Jewish comrades were given a light punishment only. A change for the better occurred in the fall of 1942, when a partisan supreme headquarters was created in Moscow and political instructors sent to the partisan units to form them into a regular organized movement.

Groups of Jews, members of resistance movements or others who fled to the woods, tried to establish Jewish partisan units. Often they did not find any other partisans in the area when they arrived. Some of them formed "family camps" which housed complete families, as well as fighting units whose task it was to defend the camps against both the Germans and the non-Jewish partisan units. Examples of such family camps were the one headed by Tuvyah Belski, in the vicinity of *Novogrudok, where over 1,000 persons found refuge, most of whom were able to survive the war; a camp in the forests near Minsk, created by Shimon Zorin, which sheltered families and also served as a base for several fighting units; and various camps in the forests of western Belorussia, Lithuania, and Volhynia, among them the fighting unit headed by Jechezkiel *Atlas in the Slonim area, the "Jewish Unit" headed by M. Gildenman in the Volhynian forests, and the 51st Company of the Shchors Battalion in Polesie. When the Soviet command took over the partisan movement, it pressed for the disbandment of the Jewish units and the distribution of its members among the various other national partisan units. This policy was based on the territorial principle which called for the par-

tisan units to symbolize the organic connection between the population of the district in which the partisan units were active and the Soviet Union. Jewish commanders were replaced and non-Jewish partisans were incorporated into the Jewish units, so that the units soon lost their Jewish character. Thus, there were units termed Ukrainian, Belorussian, and Lithuanian, even in cases when a substantial part of the unit strength was made up of Russians or, sometimes, of Jews (e.g., in Lithuania). Estimates of the number of Jews who were active in the partisan movement range from 10,000 to 20,000. About one third fell in the fighting with the Germans. When the areas in which they were active were liberated by the Soviet army, most of the Jewish partisans were drafted and joined the Soviet forces in their drive to Berlin. A substantial number of these erstwhile partisans made their way to Palestine when the war was over.

JEWS IN THE SOVIET ARMY. Jewish soldiers played a leading role in the fighting units in those areas of the Soviet Union which were not occupied by the Germans. There was no question of where their loyalty lay: they were fighting for their lives, and for them, unlike Russians such as Vlasov and Ukrainians such as Bandera, treason was out of the question. It was known that Jewish soldiers in the Soviet army who were taken prisoner were executed at once by the Germans. About 500,000 Jews served in the Soviet army during the war, and approximately 200,000 fell in battle. In the Brest-Litovsk fortress, one of the organizers of the heroic resistance was a Jewish officer, Chaim Fomin. A similar role was played by another Jew, Arseni Arkin, who was the commissar of the Hango garrison, the advance position in the Gulf of Finland. The first Soviet squadron to bomb Berlin (August 1941) was commanded by Michael Plotkin, a Jew. In the battle for Moscow at the end of 1941, a Jewish brigadier (later general), Jacob *Kreiser, took a leading role. Many Jews were awarded the title of Hero of the Soviet Union during that battle. Many Jews took part in the battle for Stalingrad, among them Kreiser; Lieutenant General Israel Baskin, an artillery commander; and the commander of the 62nd Armored Corps, M. Weinrub. At the fall of Stalingrad, Field Marshal von Paulus surrendered his pistol to a Jewish brigadier, Leonid Vinokur. A large proportion of Jews were also among the troops that spearheaded the Soviet drive into Germany. Among the 900 soldiers who were decorated Heroes of the Soviet Union for their part in the crossing of the Dnieper, 27 were Jews. Similarly, in the battle for Berlin many Jews took part in the fighting, among them Major General Hirsh Plaskov, artillery commander, and Lieutenant General Shimon Krivoshein, commander of the armored corps. Jews were heavily represented in the artillery units, armored corps, army engineers, and the air force. Their numbers were also particularly great in the medical corps, among them the surgeon general of the Soviet army, Major General M. Vofsi, later to be among the accused in the antisemitic “*Doctor’s Plot” eight years after the war (see also below). Among many Jews serving in the navy were Rear Admiral Paul Trainin, who com-

manded the Kerch naval base, and submarine captains Israel Fisanovich and Shimon Bograd. A Jewish major general of the cavalry, Dovator, was among those who fell in the defense of Moscow. A total of 160,000 Jewish soldiers in the Soviet forces were decorated during the war, with the Jews thus taking fifth place among Soviet nationalities. The highest award, Hero of the Soviet Union, was granted to 145 Jews, among them David Dragunski, who was awarded it twice. Jewish women distinguished themselves as nurses, medical orderlies, radio operators, and even as snipers and pilots. Among the latter were Polina Gelman and Raisa Aronova, who became Heroes of the Soviet Union. A considerable number of Jewish writers took part in the fighting, and among those who fell in battle were S.N. *Godiner, A. *Gurshtein and Meir Wiener. Jews who were taken prisoner could save their lives only if they succeeded in hiding their Jewish identity. A Soviet prisoner-of-war underground movement in Germany, organized in 1943, was discovered by the Nazis and its members were executed. At the head of the movement was an officer named George Pasenko, whose real name, it later transpired, had been Joseph Feldman. The tendency among Jewish soldiers to hide their true identity also existed in the Soviet army itself, because of antisemitic elements. This situation facilitated the work of the antisemitic propagandists, especially in the rear, who argued that the Jews were not taking part in the war effort, and in the postwar years antisemitic groups continued to belittle the Jewish role in the defeat of Germany.

In the story of Jewish participation in the Soviet war effort, the Lithuanian division and Latvian units represent a special chapter. The Soviet government had a special interest in creating national Lithuanian and Latvian units in order to demonstrate that these countries had become an integral part of the U.S.S.R. The Lithuanian division was created in the northern Volga region in December 1941, but because the number of Lithuanians available was too small to fill its ranks, Russian-born Lithuanians and Lithuanian-born Russians were also drafted into the unit. But in its initial stage Jews comprised a majority in the division. Jews also accounted for a large part of the Latvian national units. When the Lithuanian division finally reached Lithuanian soil, the proportion of Jews had been reduced to one fifth. Four of the Jewish soldiers serving in this division were awarded the title of Hero of the Soviet Union. After the war, a considerable number of former members of the Lithuanian division managed to reach Palestine.

POSITION OF JEWS BEHIND THE FRONT. Jews living behind the front underwent great suffering during the war. In addition to sharing the general fate of the population, many of them suffered special hardship, for the number of refugees among them was disproportionately large, and they lived under severe conditions in the towns and kolkhozes beyond the Volga and in Soviet Central Asia. A few refugees were allowed to join the Polish army under General Anders and were thus able to leave the Soviet Union. The Soviet authorities were suspicious of the Jewish refugees, especially the former Polish citizens

among them. Even those who had formally become Soviet citizens, were, at the beginning, drafted into labor battalions only. A tragic example of this attitude was the execution by the Soviets of two former Polish Bund leaders, H. *Erlich and V. *Alter, in December 1941.

Latent antisemitism among the Soviet masses manifested itself overtly throughout the war. Its principal victims were the Jewish refugees, whom the local population regarded as competitors for the scarce food and shelter available. When in 1943–44 the Soviet army liberated the occupied areas, not only was the Holocaust of the Jewish communities revealed, but also the hatred of the Jews that the Nazis had successfully aroused and encouraged among the local population. This hatred was further intensified by the attempts of the few returning Jews to regain their houses and positions. In numerous instances, Jews who had survived the war and tried to reestablish themselves in their old homes were murdered by their erstwhile neighbors. Liberated Kiev was the scene of a pogrom in which a number of Jews lost their lives.

FURTHER INFORMATION ON THE HOLOCAUST IN RUSSIA. New archival material from the *Zentralestelle der Landesjustizverwaltungen at Ludwigsburg, which was previously not available, now makes it possible to give an account of the extermination of the Jews in the Nazi-occupied territory of the U.S.S.R.

The Jewish population of the U.S.S.R., within the frontiers of Sept. 17, 1939, was, according to the census of January 1939, 3,028,358, with the following breakdown: Ukraine 1,532,776, Belorussia 375,092; Russian Soviet Federative Socialist Republic 956,599; all other territories 200,000. Eighty percent of these Jews lived in the large industrial cities or in small towns which served as industrial and commercial centers for the surrounding villages.

The Nazi onslaught on June 22, 1941, and the rapid progress of the German army, took the Jews completely by surprise, as was the case with the Red Army command. As a result of the confusion and lost sense of direction, and because of transportation failures, heavy shelling, and the swift advance of German units (on June 26 they approached *Minsk and, by the middle of July, almost the whole of Belorussia and the greater part of the western Ukraine, with *Zhitomir, were occupied), it was practically impossible for Jews inhabiting Belorussia and the western Ukraine (on the right bank of the Dnieper) to escape. The number of Jews evacuated in an organized manner from the eastern Ukraine and the Russian Republic was, according to S. Schwartz, about 50 percent; according to reports by Einsatzgruppen, between 70 and 90 percent of the Jews escaped from some towns. They were evacuated with their plants and offices. There was practically no evacuation of Jews as such. Many of the Jews who had sought refuge in the *Crimea and the *Caucasus were subsequently murdered by the advancing Germans.

Many Jewish families did not even attempt to leave, as no one anticipated the Jewish extermination policy of the Nazis,

since the Soviet press had adopted a friendly policy toward Nazi Germany, especially after the signing of the nonaggression pact, and it refrained from mentioning the persecution of Jews in occupied Europe.

At the outbreak of the war between Germany and the Soviet Union, the Nazi Government already had a carefully elaborated plan for the liquidation of Russian Jewry, and had prepared the material basis for implementing it. In March 1941, the organization of special units, the so-called Einsatzgruppen, began, with the aim of exterminating all Jews and Communists within the occupied territory of the U.S.S.R. Einsatzgruppen A, B, and C were directly subordinated to the *RSHA commander. Each of them operated in the territory of one of the three fronts (Heeresgruppe), while Einsatzgruppe D operated in the territory of Manstein's 11th Army to the south. The Einsatzgruppen immediately followed the front-line units, made inquiries, and, in cooperation with auxiliary police troops (mainly Lithuanian and Ukrainian), carried out the first mass slaughter of the Jews.

To quote only one example, Einsatzgruppe C entered Zhitomir together with the first German tanks and, on September 19, 1941, the 4a Einsatzkommando of the same Einsatzgruppe C arrived in *Kiev; here, ten days later, along with troops led by a senior SS officer and the Sued ("South") police units, it organized the massacre of more than 33,000 Jews at *Babi Yar.

The *SS and senior police officers (Hoehere SS und Polizeifuehrer – HSSPF) with their subordinated units were another organized force who, almost from the first day of the occupation, engaged in the liquidation of Jews under the guise of fighting the partisans. There were three such officers in the U.S.S.R.: Obergruppenfuehrer Hans Pruetzmann and Obergruppenfuehrer Franz Jeckeln, who alternately supervised the territories of the Baltic states and the northern part of the Russian Republic as HSSPF-Nord and the Ukraine as HSSPF-Sued, and HSSPF-Mitte Obergruppenfuehrer Erich von dem Bach-Zelewski, who operated mainly in Belorussia.

The total number of Jews killed by the Einsatzgruppen and the troops of the HSSPFs during the first period of the occupation (mainly in July and August 1941) is still unknown. Incomplete evidence shows that in August 1941 alone the HSSPF-Sued units executed 44,125 people, most of them Jews, while the SS Kavallerie-Regiment 2, subordinated to the HSSPF-Mitte, killed 6,526 Jews in the period between July 27 and August 11, 1941. A comment by the commander of the aforementioned unit, SS Sturmbannfuehrer Magill, bears witness to the German soldiers' bestiality. He reported that the operation had in general been carried out satisfactorily, despite the fact that the marshes were not deep enough to drown the women and children.

There was close cooperation between the German army and those who organized the extermination of the Jews. The Einsatzgruppen received supplies from military sources and were assisted by regular army units in liquidating the Jews.

The army often asked the SD to exterminate Jewish communities in the territory within their control (Priluki, *Gadyach), or took a direct part in such operations. In the report of Einsatzgruppe A for the period between Oct. 16, 1941 and Jan. 31, 1942, for example, it is stated that “up to January 1942, about 19,000 partisans and criminals, primarily Jews, were killed by the Wehrmacht.”

Following this first wave of massacres, which took place immediately after the entry of the German army, there was a period of organized liquidation. The preparatory stage was similar to that elsewhere in Nazi-occupied Europe and included legal discrimination, the tattooing of numbers, registration, humiliating forced labor, and concentration in camps and ghettos. One notable difference, however, was that in Russia this stage took only a short time – from a few weeks to a few months. Usually, the Jews were forbidden freedom of movement from the outset, or not allowed to associate with non-Jews or benefit from public services. The quantity and quality of goods sold to Jews were usually minimal, as were the hours of sale; in many cases, all shopping was made impossible for the Jews. They were ordered to wear distinguishing badges: in Belorussia it was usually a yellow circle or a yellow *magen David* (“shield of David”) on the chest and back, and in the Ukraine, a yellow armband. The so-called “Jewish Committees” were established during that period, whose task it was to supply the Germans with manpower, collect contributions, and – mainly in the Ukraine – register the Jews as a first step toward their extermination.

The next step was the systematic slaughter of most young men of Jewish origin. In the large cities, those capable of military service were interned during the first days of the occupation; Jews were usually separated from the rest, and, as a rule, executed soon afterward (Minsk, Kiev). In the smaller towns, Jewish men were rounded up – ostensibly for forced labor, but in reality to be put to death. Jewish prisoners of war were as a rule shot immediately. There is eyewitness evidence of the mass slaughter of Jewish intellectuals at that time (Minsk, *Vitebsk, Vinnitsa).

In the majority of cases during the second month of the occupation closed ghettos were established in large Jewish communities and in district centers for the concentration of Jews in the whole area. It also happened that, where there were few Jews (as in Novo-Moskovsk or Baran), no ghettos were established, and the Jews were allowed to remain in their places of residence until they were exterminated.

Ghettos were usually located in those suburbs which had been most badly damaged, and in buildings unfit for human habitation – factories, barracks or warehouses (*Khar'kov, Vitebsk). Those deported to the ghetto were permitted to take only hand luggage.

Since these ghettos were simply concentrations of Jews to be liquidated, they were often merely open areas surrounded by barbed wire (Smolevichi, *Gorodok, *Polotsk, Smolyany, Kletnya). Such ghetto-camps usually existed from several weeks to a few months. The Jews in the ghettos received no

food as a rule, and the mortality rate there was very high, particularly during the severe winter of 1941.

The liquidation of the newly-established ghettos began as early as the autumn of 1941. Of the 18 known ghettos in Belorussia, nine were liquidated by the end of 1941, six of them in October. In the Ukraine, too, most of the Jews had been put to death by the end of 1941. Out of the 70 known Jewish communities in the Ukraine (including the Crimea), 43 were liquidated by the end of 1941, and the remainder were also rendered *judenrein* by mid-1942. For the Germans themselves, the “Jewish question” in the Ostland (including the Baltic states and Belorussia) had virtually found a solution. In the Ukraine, the “Jewish question” ceased to exist by August 1942.

In 1943, Jews were still to be found only in a few ghettos (those of Minsk, *Slutsk, and *Khmelnik) and a very few labor camps, but they were liquidated by the end of the year. In the Crimea and the Caucasus, and probably also in the southeastern Ukraine, practically no ghettos were set up. Jews were liquidated there almost immediately after the occupation of the region, and the German orders followed one after another; first, the establishment of the Jewish Committee, then registration, badges, and finally “evacuation,” which meant death. Such was the fate of the Jews of *Simferopol, *Yevpatoriya, *Feodosiya, *Kerch, *Rostov, *Krasnodar, Kislovodsk, and other towns. As a rule, the Ashkenazi Jews were liquidated first, and then the Crimean Jews (Krimchaks).

The executions were usually organized by the Einsatzgruppen. The ghetto was surrounded by the German police, assisted by auxiliary forces of the local police and frequently by the Wehrmacht. The Jews, who believed they were being evacuated, were rounded up in public squares and taken in trucks or driven on foot to the place of execution. In front of the graves, prepared beforehand, by the local population or, more often, by Soviet prisoners of war, the victims were ordered to strip naked or remain in their underwear, stood in groups at the edge of the graves, or pushed inside them and told to lie down, after which they were machine-gunned. The executions were carried out by both Germans and their local assistants. Fresh victims were laid on the corpses and the process continued until the grave was full. To make their work easier, the executioners sometimes rendered their victims unconscious by hitting them on the head. During an operation in Vitebsk in October 1941, Jews were reportedly shot on the bridge over the Dvina, and their bodies thrown into the river. At *Artemovsk, some of the Jews were shot dead, and others immured alive in the marbleworks. In some cases, Jews were made to run over a minefield or killed with grenades (Khar'kov, *Mogilev). In the Crimea, the method most widely adopted was to shoot Jews over wells into which their bodies were subsequently thrown. In certain communities (Minsk, Khar'kov, Krasnodar), Jews were killed in special gas trucks. The Germans and their associates treated children with particular barbarity: their backs were broken, or they were poisoned or stabbed to death, or their heads were smashed against stones. Many children were thrown into graves or wells while still alive.

Executions of Jews usually took place in forests, ravines or isolated places near their places of residence. It can be said that almost every town in the territory in question had its own "Babi Yar." To mention but a few, at Mogilev it was Polikov-ichi; at Vitebsk, Ilovskiy Yar; at Pskov, Solotopki; at *Smolensk, Mogalenshchina.

In June 1942, *Himmler had already given orders that all traces of the activity of Einsatzgruppen in the East be removed. Paul Blobel, head of the Sonderkommando 4a, was charged with the task. He organized Kommando 1005 to unearth the corpses from the mass graves and burn them. It seems, however, that this obliteration of the traces did not become a mass operation before the autumn of 1942.

It is difficult to estimate how many Jews were massacred by the Nazis in the U.S.S.R. Only fragmentary data are extant, mostly according to the documentation of the Zentrale Stelle der Landesjustizverwaltungen at Ludwigsburg, which give the number of Jews killed as 573,000. This figure, however, applies only to those put to death in the later period of German occupation (approximately after September 1941), and does not take account of the very large number of massacres in July and August of that year. Moreover, that figure applies only to a small number of townships and settlements, of which there were about 130 in occupied Soviet territory within Russia's 1939 frontiers. Nothing is known of the fate of Jews inhabiting the provinces as a whole; some data are available concerning individual communities, such as the districts of *Cherkassy, Sumy and Voroshilovgrad. There is also information to the effect that 6,150 Jews were killed in the *Nikolayev and *Kherson regions. Even where the number of victims from certain communities is known, the evidence tends to be incomplete or inaccurate, since it is either confined to limited periods or else gives the total number of Jewish and non-Jewish victims together.

It can be assumed, however, that the actual number of Jewish victims in the occupied territory of the U.S.S.R. was at least twice the figure cited above, i.e., more than 1,000,000.

[Vila Orbach]

DESTRUCTION OF YIDDISH CULTURE. Soviet Yiddish culture, itself a pale reflection of genuine Jewish culture which had suffered serious setbacks in the prewar purges, was totally jeopardized when the war broke out. The Yiddish press and Yiddish literature, based primarily in the Ukraine, Belorussia, and Lithuania, ceased to exist. The annihilation of the Jewish population was accompanied by the destruction of the remaining Jewish schools, libraries, and other cultural institutions. While in 1940 some 360 Yiddish books were published in the Soviet Union, by 1942 the number had dwindled to one. There was some improvement in 1943, after the Emes publishing house had moved to Kuibyshev, issuing 43 Yiddish books that year. The creation of the Jewish *Anti-Fascist Committee also had a favorable effect upon the modest revival of Yiddish publications. In June 1942 the committee embarked upon the publication of its own organ, **Eynikayt*, which attracted a

group of Soviet Yiddish writers, led by David *Bergelson and Itzik *Fefer. Although the main purpose of the committee was to solicit political and financial support among world Jewry for the Soviet war against the Germans, it also became, unofficially, a representative body of Soviet Jewry until its dissolution in 1948. It soon became clear, however, that the Soviet Union had no intention of permitting a postwar revival of Yiddish schools and the Yiddish press. The millions of Jews for whom Yiddish had been their mother tongue – in the Ukraine, Belorussia, Lithuania, and Bessarabia – were no longer alive. The majority of the surviving Jews spoke Russian. There were over two million of them, and the Soviet authorities sought to bring about their complete assimilation.

Contemporary Period

With the close of the war, Jews of Polish citizenship, including many previous inhabitants of territories annexed by the Soviet Union between 1939 and 1940, began to leave the Soviet Union. Groups of Soviet Jews, including Chabad Hasidim, who had preserved their religious distinctiveness throughout the years of the Soviet regime, succeeded in leaving and large numbers of these emigrants found their way to Palestine. During the early postwar period, those active in Soviet-Jewish culture attempted to effect a revival. The Jewish Anti-Fascist Committee (see above) continued to serve as a center for Soviet Jewry and as a liaison with Jews in other countries. Large-scale publication of Yiddish books was initiated, the Jewish State Theater expanded its activity, and three other theaters functioned in Minsk, Odessa, and Chernovtsy. Rumors of the impending settlement of survivors of the Holocaust in the Crimea, and the conversion of the peninsula into a "Jewish Republic," spread among the Jews. The Jewish endeavor in Birobidzhan was also renewed, and many Jews tried to settle there. News of the establishment of the state of Israel, with Soviet endorsement and support, infused new life into wide sectors of Soviet Jewry. *Eynikayt* referred to a world Jewish conference in which Soviet Jews would also be represented.

STALIN'S PERSECUTIONS. Suddenly, however, the climate reversed completely and nightmarish days filled with fear overtook Soviet Jewry. In January 1948 S. Mikhoels was reported killed in an "accident" in Minsk, but was actually assassinated by the secret police; in November 1948 the Jewish Anti-Fascist Committee was dissolved and those associated with it were arrested; Soviet newspapers conducted a vicious campaign against *"cosmopolitans" that was directed primarily at the Jewish intelligentsia. Twenty-five leaders of the Jewish Anti-Fascist Committee, including some of the outstanding Jewish writers, were accused of maintaining ties with Zionism and with American "imperialism." The "Crimea project" was leveled against them as an "imperialist plot" to detach the Crimea from the U.S.S.R. and they were executed secretly on Aug. 12, 1952. On Jan. 13, 1953, the government announced the arrest of a group of prominent doctors, the majority of them Jews, who were accused of, and who purportedly admitted to, having deliberately killed government leaders and conspired

to kill still others by incorrect medical treatment. A wave of antisemitism spread through the country. Jews were ousted from their positions, and rumors of an impending mass deportation of Jews to distant regions in the eastern Soviet Union began to circulate. This nightmare persisted for about five years until March 1953, when Stalin's death brought some relief.

AFTER STALIN'S DEATH. The "thaw" that followed Stalin's death, however, did not noticeably affect the fundamental conditions of Soviet Jewish life. Although the Jewish doctors were released from prison and the campaign against "cosmopolitans" ceased, Jewish institutional life, destroyed between 1948 and 1953, was not restored. Two new factors now began to affect the fate of Soviet Jews. First, in the wake of the post-Stalin thaw, postal communication with relatives in the West and in Israel was revived, and there was a stream of Jewish visitors from abroad to the Soviet Union. Direct contact with world Jewry was renewed to a degree, and Jewish public opinion in the West began to demand the restoration of rights to the Jews as a national and religious minority. Even Jewish Communists in Western Europe and the United States protested the obliteration of Jewish culture in the U.S.S.R., and the Soviet government was compelled to make several concessions to this public pressure. The second factor was the establishment of the State of Israel, which reawakened Jewish national sentiment that found expression in spontaneous mass demonstrations on occasions such as the arrival of Golda Meir, Israel's first diplomatic representative to the Soviet Union, in Moscow, and the visit of an Israeli youth delegation to the Democratic Youth Festival in Moscow in the summer of 1957. National sentiment was also manifested by increasing mass gatherings of young, mostly nonreligious, Jews in and around the synagogues in Moscow and other large cities on Simḥat Torah and on the High Holidays.

In 1970 Soviet Jews were still denied the right to organize in any way or to express freely their thoughts and feelings as Jews. For many years, sources attesting the situation of Soviet Jewry consisted of incidental items of information interspersed in the Soviet press and world news agencies and of stories brought back by diplomats, visitors and tourists. More information became available in the mid-1960s and the years 1968-71, when a number of Soviet Jews arrived in Israel in the framework of the reunification of families.

THE CENSUSES OF 1959 AND 1970. In the Soviet population census of 1959, 2,267,814 persons were registered as of "Jewish nationality" (the census takers did not demand to see any personal document and were instructed to register the oral declarations given by citizens). According to the census, the Jewish population constituted 1.09 percent of the total population of the country and was eleventh among over 100 Soviet nationalities. The 5,727 Karaites in the Soviet Union were counted separately. (See Table: Jewish Population of the Soviet Union by Republics, 1959.)

Soviet Jewry was revealed as distinctly urban: in 1959, 2,159,702 Jews registered in cities and constituted 2.16 per-

Jewish Population of the Soviet Union by Republics, 1959

Republic	Jews	Percent distribution of Jews	Percent of Jews among general population
Total	2,267,800	100.0	1.09
Russia	875,300	38.7	0.74
Ukraine	840,300	37.0	2.01
Belorussia	150,100	6.6	1.86
Lithuania	24,700	1.1	0.91
Latvia	36,600	1.6	1.75
Estonia	5,400	0.2	0.46
Moldavia	95,100	4.2	3.30
Georgia	51,600	2.3	1.28

Kirghizia	8,600	0.4	0.42

cent of the total population. Only 108,112 Jews (4.7 percent of the total Jewish population) lived in villages. Detailed Jewish population figures were published only in respect to the capitals of the republics (for more correct estimates, see articles on individual cities).

Large Jewish communities of 10,000 persons and over existed in such cities as Odessa (well over 100,000), Kharkov (about 80,000), Dnepropetrovsk (about 35,000), Lvov, Chernovtsy, Zhitomir, Gomel, Vinnitsa, Rostov, Gorki, Kuibyshev, Sverdlovsk, Chelyabinsk, Vitebsk, Bobruisk, and Mogilev. According to other estimates, approximately 60 cities in the Soviet Union had a Jewish population exceeding 10,000. (See Table: Jewish Population in Capitals of the Republics in 1959.) Like the general demographic situation in the Soviet Union, as a result of the high proportion of wartime male fatalities, Jewish women outnumbered men with about 120 women per 100 men (a total of 206,556 more women than men).

Jewish Population in Capitals of the Republics in 1959¹

	Number of Jews	% of total population
Moscow	239,246	4.7
Leningrad	162,344	5.6
Kiev	153,466	13.9
Tashkent	50,455	5.5
Kishinev	42,934	20.0
Minsk	38,842	7.6
Riga	30,263	5.0
Baku	26,263	4.1
Tbilisi (Tiflis)	17,311	2.5
Vilna	16,354	6.9

¹ In all other republics, the number of Jews was included under "other nationalities" in the census figures published in April 1971.

According to the 1959 census, a total of 1,733,183 Jews (76.4 percent) declared Russian as their mother tongue; 46,845 declared other foreign languages (half of this number declared Ukrainian); 403,900 (about 18 percent) declared Yiddish; 35,673 Georgian (Georgian Jews); 25,225 Jewish Tat (*Mountain Jews); and 20,763 Tajiki (Bukharan Jews). It may well be assumed that a considerable number of Jews whose real mother tongue was Yiddish declared Russian as their national language; at the same time there were Jews who declared Yiddish as their mother tongue without really knowing it, in order to demonstrate their identification with the Jewish people. The highest percentage of Yiddish-speaking Jews was found in Lithuania (69 percent), Moldavia (50.3 percent), and Latvia (48 percent).

The census data indicate several facts: hundreds of thousands of Soviet Jews declared themselves to be of non-Jewish nationalities; the majority of Russian-speaking Jews declared their attachment to the Jewish people ("nationality"), among them certainly the vast majority of its younger generation; Yiddish-speaking Jews, of whom there were approximately 500,000, were mostly members of the older generation and inhabitants of the western regions of the Soviet Union (Lithuania, Latvia, Moldavia, the districts of Chernovtsy, Lvov, Volhynia, western Belorussia); there were Oriental (i.e., non-Ashkenazi) Jews, who, according to the census, numbered about 100,000, belonging to the Georgian, Tat, and Bukharan communities. The latter preserved their Jewish way of life, maintained traditional family life and ties with the Jewish community and synagogues, and observed the dietary laws and the Sabbath to a far greater extent than did Ashkenazi Jews.

On April 17, 1971, the Soviet press published the first summaries of the population census taken on Jan. 15, 1970.

According to the figures quoted, the Jewish population had fallen from eleventh (1959) to twelfth in size and the overall number of Jews had declined from about 2,268,000 (January 1959) to 2,151,000. Whereas in the previous census, 21.5 percent of the Jews declared a Jewish language (almost exclusively Yiddish) to be their native tongue, in 1970 only 17.7 percent declared this to be so, and in respect to declaring their national language as their native tongue, the Jews were last in the rank of nationalities. In this census, for the first time, the subjects were asked whether they were fluent in another one of the languages spoken in the Soviet Union; 16.3 percent of the Jews indicated Russian as their second fluent language, and 28.8 percent indicated another Soviet language as their second fluent language. (According to the summary of the census, about 13,000,000 non-Russians declared Russian as their native tongue and 41,900,000 as the second language in which they were fluent.)

The Jews were the only major nationality in the U.S.S.R. whose overall size had diminished since 1959. In the U.S.S.R. the status of the Jew as such (as of each member of any nationality group) is indicated on his identity card (referred to in Russian as a "passport"). However, since the census figures were gathered through the subject's personal declaration, without checking of official documents, a differentiation is made by experts between "passport Jews" and "census Jews," whereby it is generally assumed that the number of passport Jews is much greater than the number of Jews reflected in the census because many Jews may have declared themselves to be members of another nationality to the census taker. Whether the decline in the number of census Jews in 1970 also indicates an equal or concomitant number of passport Jews in the U.S.S.R. was unknown.

¹ Estimate for year end

² Includes Armenian Republic

The 1959 census showed that Jews played a negligible role in Soviet agriculture. Most of the 100,000 Jews living in rural areas were officials or experts and belonged to the officialdom of the *sovkhozes* and the *kolkhozes*. Few Jews were counted in the villages of the areas previously settled by Jewish farmers: 2,765 in the Crimean district; 881 in Kherson; and 2,292 in Birobidzhan. On the other hand, Jews occupied prominent positions among the Soviet intelligentsia. In the 1960–61 academic year, 77,177 Jewish high school students were accounted for (3.22 percent of the general student body and three times their proportion to the general population, although not exceeding their proportion to the urban population). Among “those with a secondary and higher education” (a term which encompasses doctors, officials, bookkeepers, engineers, and so on), there were 427,000 Jews at the end of 1960, i.e., 4.9 percent of this entire class. This was the predominant class among Soviet Jews. They held a notable place also among “scientific workers” (36,173 in 1961, 9 percent of the total number). This group enjoys numerous privileges and shares in the awards and marks of distinction customarily granted to such categories under Soviet rule. In 1962 the Jewish physicist Lev *Landau was awarded the Nobel Prize. Similarly, Jews constitute about 10 percent of Soviet writers and represent a higher proportion in the other arts.

The Jewish role in the state commercial establishment was considerable. In the early 1960s, during the regime of Nikita Khrushchev, when the government initiated a fierce campaign against widespread illegal economic practices, including illegal production and marketing of scarce consumer goods as well as bribery and embezzlement, Jews were deliberately singled out for punishment. The campaign was entrusted to the secret police according to new, very harsh decrees, including the death penalty. Jews constituted such a high proportion of those sentenced to death or long periods of imprisonment that disinterested investigations (such as that of the International Commission of Jurists in Geneva) affirmed that Jews served as scapegoats to deter the rest of the population, probably because the latter might have rebelled and reacted strongly to direct attack by the authorities.

It is safe to assume that many Jews were engaged in work in cooperatives and government projects. Similarly, a limited class of Jewish industrial workers existed. On the whole, however, Jewish youth turned to the ranks of the intelligentsia and the educated officialdom, a phenomenon serving to intensify antisemitic tendencies among the masses and in sectors of the intelligentsia as well. Increasingly prevalent complaints about Jewish “evasion of manual labor,” or their obligation to make room for members of other national groups in the professions, were being heard every so often even from members of the government.

REPRESSION OF JEWISH CULTURE. Soviet policy was intent on accelerating the process of Jewish assimilation, and manifestations of religious culture on the part of Jews were suppressed or, under optimum conditions, barely tolerated. The

pressure exerted upon other religions was in no way comparable to the persecution directed against Judaism. Synagogues were increasingly shut down (according to Soviet sources, between 1956 and 1963 the number of synagogues decreased from 450 to 96). There was no countrywide Jewish religious organization parallel to those of other religions. Jewish religious books were not printed (the 3,000-copy photostat edition of a prayer book, *Siddur ha-Shalom*, in 1957, was a much-publicized exception; although a new edition of it was published at the end of the 1960s, there were no indications that it was circulated). The baking of *matzah* was gradually proscribed in the 1960s, but was later permitted on a limited scale through the synagogues; attempts by Jews outside the U.S.S.R. to send *matzah* to their coreligionists were for the most part thwarted by the authorities. A crude campaign of slander was waged in books, pamphlets, and periodicals against the Jewish religion, and its adherents were not permitted to answer those who abused it.

Ostensibly, the distinctive suppression of the Jewish religion was due to its unique national character and its ties with Israel. The effect of the establishment of the State of Israel and its progress and achievements, together with Jewish national awakening, disturbed the Soviet government. Official propaganda frequently presented horrifying descriptions of conditions in Israel. A delegation of Jewish propaganda agents posing as Jewish “tourists” was sent to Israel in 1959; upon its return to the U.S.S.R. it maligned Israel before the Soviet public and the Jewish community. Propaganda of this type, however, did not attain its objectives. News of Israel and Jewish life abroad steadily reached Soviet Jewry in various ways, including broadcasts from Israel and other countries, and the antisemitism which infiltrated many parts of Soviet society awakened in the younger Jewish generation an increased Jewish national consciousness and a strong desire to settle in Israel and to strengthen their ties with the Jewish people and the Jewish state.

During the period of “thaw” and destalinization, Soviet Jewish culture was not allowed to revive. Yiddish schools did not exist. In the wake of public pressure outside the U.S.S.R., a token gesture was made by publishing some works in Yiddish, mostly by classical Yiddish writers. In the summer of 1961, a literary bimonthly (later a monthly), **Sovetish Heymland*, began to appear; it became a sort of “official address” of Soviet Jewry. In addition, works by Jewish writers were published in Russian and other translations and a commemorative stamp was issued on the centennial of Shalom Aleichem’s birth. Concerts of Yiddish folklore, music, and song, and even theater performances by amateur groups, attracted masses of Jews and kindled enthusiasm within the culture-thirsty Jewish community.

MANIFESTATIONS OF ANTISEMITISM. Antisemitism remained officially proscribed in the Soviet Union, but hatred of Jews existed and expressed itself *de facto* in most levels of society and administration. From time to time, it found ex-

Map 2. Jewish population of U.S.S.R. in 1959, showing major centers of settlement and distribution among Republics.

pression in violent outbursts (such as the riots in Malakhovka in October 1959 and the blood libels in Tashkent, Vilna, etc.), literary controversies (such as the reaction to Yevgeni *Yev-tushenko's poem "Babi Yar"), antisemitic articles in the press (the pinnacle was reached with a blood libel article in August 1960 in the newspaper *Kommunist* of the city of Buinaksk in Dagestan), and journals and books (such as *Judaism without Embellishment* by T.K. Kichko, published by the Ukrainian Academy of Sciences, 1963). A deep distrust of the Jews pervaded the atmosphere in the Soviet Union. Jews were considered an alien element bound by family, historical, and spiritual bonds to the state of Israel and to Jews in the United States and other countries. They were strictly barred from the higher echelons of the ruling Communist Party, from the foreign service and senior military command; similarly, their proportion among elected representatives to the central and local Soviets has diminished, and clandestine police supervision has been imposed on the synagogues and on individuals meeting with visiting Jews from abroad.

In 1965 a slight shift was noted in Soviet policy on Jewish emigration within the framework of "reunification of families" and several hundred Jewish families were allowed to emigrate to Israel. The *Six-Day War (June 1967), however, and the subsequent severing of diplomatic relations between the Soviet Union and Israel, brought this emigration to a standstill, though it was to a certain extent renewed at the end of 1968. After that, a frenzied wave of anti-Israel and anti-Zionist incitement, unparalleled in the depth and extent of its hatred, was unleashed in the press, in other mass media, and in all diplomatic and propaganda channels, evolving almost into a blatant campaign of hatred against the Jewish people and the State of Israel. It found expression in the publication of thousands of articles and scores of books. Israel was labeled a "Nazi" state and Zionism defined as the "worst enemy of mankind," a kind of powerful, secret international Mafia which had unlimited funds at its disposal and carried on subversive activities throughout the world, primarily in Communist-bloc countries.

This unbridled incitement served to intensify, both directly and indirectly, the anti-Jewish sentiments of the masses. On the other hand, it greatly stimulated and strengthened national Jewish consciousness among many Soviet Jewish youth, as well as whole communities. Jews of Georgia, for example, felt the need to give practical expression to their national feelings by waging an active struggle to emigrate to Israel.

PRESSURE FOR IMMIGRATION TO ISRAEL. Tens of thousands of Jews applied for exit permits to go to Israel, but only a few of them achieved their aim. In consequence, hundreds of Jews, many of them of the younger generation and in the large cities, began to voice their protests against being denied the right to emigrate to Israel by sending letters and petitions addressed to the Soviet leaders, the UN secretary-general and its Human Rights Commission, the government of Israel, and even to the Communist parties in the West. Young

Jews organized themselves to study Hebrew, calling these courses *ulpanim*, and many of them openly celebrated Israel's Day of Independence. There were some reports that young Jews were increasingly refraining from marrying gentiles, because "mixed marriages" were often an obstacle to leaving the U.S.S.R. for Israel. Various measures of the Soviet authorities to curb the mass revival of these "neo-Zionist" feelings, as, for example, imposing exorbitant fees on exit permits, depriving those leaving for Israel of Soviet citizenship, and even arresting groups of so-called "Zionist activists" (1970), did not deter the mounting Israel-oriented movement among Soviet Jews.

A particularly dramatic episode was the December 1970 trial of a group of Jews (mostly from Riga) in a Leningrad court, accused of having plotted to hijack a Soviet airplane in order to leave the U.S.S.R. and reach Israel. The very harsh sentences imposed on them, including two death sentences, aroused a worldwide outcry of protest in most non-Communist countries, from Jews and non-Jews alike, including heads of state, governments, members of parliament, men of letters, scientists, and left-wing intellectuals. The death sentences were quickly commuted and the other sentences reduced. Shortly thereafter groups of Soviet Jews staged protest demonstrations, demanding permission to go to Israel, in the offices of the Supreme Soviet, the Communist Party headquarters, and the Ministry of the Interior in Moscow.

Also worthy of mention was the prominent role played by members of the Jewish intelligentsia in the struggle of the so-called "democratic movement," headed by a small number of Soviet scientists and writers, to preserve adherence to the letter and spirit of the law and the safeguarding of human rights.

[Yehuda Slutsky]

Relations with Israel

SOVIET SUPPORT (1947). The first public announcement of Soviet support for the establishment of a Jewish state in Palestine was made by Andrei Gromyko, deputy foreign minister and head of the Soviet delegation to the United Nations, on May 14, 1947, at the First Special Session of the General Assembly. He dwelt on the urgency of the Palestine problem, on the sufferings of the Jewish people during the war, and the hundreds of thousands of survivors who were wandering about in various countries of Europe. Dismissing any unilateral solution as unjust, Gromyko expressed his government's preference for the establishment of "an independent, dual, democratic, Arab-Jewish State." If this plan proved impracticable, because of the deterioration in relations between the Jews and the Arabs, it would be necessary to consider "the partition of Palestine into two independent states, one Jewish and one Arab."

There was an earlier intimation of a possible change in the traditional negative Soviet attitude toward Zionism, when, on May 3, 1947, the Soviet delegation supported the Jewish Agency's demand to be heard at the Assembly as the represen-

tative of the Jewish population of Palestine. Nevertheless, the above-mentioned speech came as a complete surprise, and was regarded as a decisive turning point in Soviet policy.

This had been preceded by contacts established between Zionist leaders and Soviet representatives in various capitals after the U.S.S.R.'s entry into the war against Germany in 1941. During the war there were also visits of Soviet diplomats to Palestine, during which they expressed appreciation for the achievements of the *yishuv*. In March 1945, Zionist leaders were informed by the White House that Stalin, *Roosevelt, and *Churchill had agreed to hand over Palestine to the Jews. These developments, however, had not been widely known, and were followed, and seemingly contradicted, by over two years of evasiveness on the Palestine issue accompanied by a number of pronouncements opposing the Zionist position on Palestine's political future. The U.S.S.R. was vitally interested in the British withdrawal from Palestine and, indeed, the entire Middle East, and apparently believed this could be achieved by the establishment of a Jewish state. It was therefore in the Soviet interest to support the idea of partitioning the country. At the regular session of the General Assembly in the fall of 1947, the Soviet Union joined forces with the United States, and the two great powers voted for partition on Nov. 29, 1947.

[Yaacov Ro'i]

SOVIET POLICY IN THE MIDDLE EAST. However, apart from the favorable attitude displayed by the U.S.S.R. at the 1947–48 debates and votes at the UN, and its initial friendliness to the emerging state, relations between the two countries steadily deteriorated. Support for the Jewish state, as expressed by Gromyko in 1947, underwent a gradual, yet drastic, transformation which in June 1967 (at the end of the Six-Day War) resulted in the complete rupture of diplomatic ties and an all-out Soviet diplomatic and propaganda campaign against Israel. The reasons for this deterioration are to be found in Soviet foreign and domestic aims and the tactics employed to achieve them.

Soviet policy in the Middle East was based on a combination of three factors. The first was the traditional Russian objective (initiated by the czars) of achieving a position of power in the Middle East by gaining a foothold in the area, dislodging its great-power adversaries and then establishing broad, if not exclusive, influence there. The second, an "ideological" factor, was the role played by the U.S.S.R. as the leader of the Communist world and as protagonist in the "anti-imperialist," anti-Western, struggle. Finally, there was the "Jewish problem" within the U.S.S.R. and Soviet opposition to the idea that Israel might provide a possible solution. In spite of the glaring contradiction between the Soviet attitude in 1947 and the policy pursued in 1967, the basic aims did not alter. In 1947 the Soviet Union sought to further its ends by support of Israel; in 1967 it resorted to outright hostility toward Israel in order to achieve its purpose.

The development of Soviet-Israel relations falls into six distinct periods.

1947–BEGINNING OF 1949. In the "honeymoon" period of Soviet-Israel relations between 1947 and the beginning of 1949, the U.S.S.R. campaigned at the UN for the establishment of a Jewish state in a part of Palestine and cooperated with the Jewish Agency and the *yishuv* in order to achieve this goal. Official Soviet spokesmen and the Soviet press supported the armed struggle of the *yishuv* and branded Arab armed resistance to the establishment of the state as a function of British imperialism. When the establishment of the state was declared, the Soviet Union was the first to accord it de jure recognition and to appoint a minister to Israel. It provided Israel with arms (by way of Czechoslovakia) and economic assistance (by way of Poland), and permitted large-scale emigration of Jews to Israel from all countries of Eastern Europe, except from the Soviet Union itself. The fact that the military and economic assistance was supplied indirectly, rather than directly from the Soviet Union, was not, at the time, regarded as having any negative connotation. It should be borne in mind that even at this stage when Arab nationalism derived its main support from Britain, the Soviet Union's principal adversary in the area, the U.S.S.R. emphasized its intention to become a source of support and protection to the Arabs. Thus, in a speech made on Nov. 26, 1947 – only three days before the partition resolution was to be passed – Gromyko assured the Arabs that the Soviet Union would continue to support their efforts "to rid themselves of the last fetters of colonial dependence," and expressed his conviction that in spite of their momentary misgivings, the Arabs and the Arab states "will still, on more than one occasion, be looking toward Moscow."

The purpose of Soviet pro-Israel policy at this time was clearly outlined in *The Palestine Problem*, a booklet by J.A. Genin, published in Moscow in October 1948. Stressing the importance of Palestine for British economic interests, the author states that "the loss of Palestine will be a terrible blow to the British oil magnates. British departure from Palestine will be a severe defeat for British colonial interests, and its effects will not be confined to the Middle East. Britain will lose an important link in the chain of Middle Eastern countries dependent upon her, and her route from the Mediterranean to the Persian Gulf will be cut off." The Soviet Union also found it necessary to dispel at once any illusion that many Soviet Jews may have had about their future relations with Israel. Some Jews had asked for permission to go to Israel and join the ranks of the Israeli army, and a mass demonstration outside the Great Synagogue in Moscow had welcomed Golda Meir, the first Israeli minister to the Soviet Union. This was not to be tolerated. An article by Ilya *Ehrenburg, published in *Pravda* on Sept. 21, 1948, made it clear that Soviet Jews should have nothing to do with Israel, a foreign and remote capitalist state: "Soviet Jews do not look to the Near East; they look to the future."

1949–1953. Between 1949 and 1953, when the Cold War was at its height and Stalin sought to make the Soviet Union impregnable to any influence from without, relations with Israel

took a turn for the worse. There was open antisemitism in the Soviet bloc culminating, in the last days of Stalin, in the “Doctors’ Plot,” and the *Slansky trial in Prague, where the Israel minister was declared *persona non grata*. At the UN, the Soviet Union no longer gave Israel its support. When Israel complained to the Security Council about the Egyptian blockade of the Suez Canal, the Soviet Union abstained on the resolution put before the council. The Soviet Union refused an Israeli request for technical aid, and emigration to Israel from all countries of Eastern Europe came to an end. Only economic ties were not seriously affected. Finally, in February 1953, about a month before Stalin’s death, a bomb that exploded in the courtyard of the Soviet embassy in Tel Aviv served the U.S.S.R. as a pretext for breaking off diplomatic relations with Israel.

1953–1956. In July 1953 diplomatic ties between the two countries were resumed and there was a slight improvement in the tone of diplomatic exchanges and of Soviet press commentary on Israel. In essence, however, there was no real halt to the deterioration of the Soviet attitude on Israel. On Jan. 22, 1954, the U.S.S.R. cast its first anti-Israel veto at the UN Security Council. On Jan. 9, 1956, the Soviet delegation even took the initiative of proposing an anti-Israel resolution at the Security Council.

1956–1963. Subsequently the U.S.S.R. adopted a policy of open and one-sided support of Arab bellicosity against Israel. In the fall of 1955 the Soviet Union concluded an arms agreement with Egypt (officially it was Czechoslovakia that supplied the arms). Relations with Israel reached a new low in 1956 when, in the wake of the *Sinai Campaign, the Soviet Union unilaterally abrogated the commercial agreement between the two countries. Until 1955 there had been a promising development in the exchange of goods. In 1954 the trade amounted to over \$3,000,000; but in the following year it was little over half that sum, and a further reduction took place in 1956.

During the Sinai Campaign (1956), Soviet policy was decidedly pro-Egyptian and anti-Israel. Threatening notes were sent from Moscow to the Israeli government demanding unconditional withdrawal from the occupied Sinai Peninsula. In the United Nations, the Soviet and U.S. governments exerted concerted pressure on Israel.

1963–1967. From 1963 to 1967, there was a slight improvement in Israel’s relations with some of the Eastern bloc countries, and for a while there was some indication that relations with the Soviet Union would also improve. Some informal cultural exchange took place. In addition, an agreement was reached in 1964 on the purchase, by the government of Israel, of real property in Israel owned by the Russian Orthodox Church. But hopes that this agreement would result in the resumption of bilateral trade were not realized. A further deterioration took place in the spring of 1966, after a group of officers belonging to the left wing of the Baath Party seized power in Syria and stepped up aggression against Israel (including

terror acts by the newly created Al-Fatih). Israel, on its part, made continuous efforts to arrive at a fruitful dialogue with the Soviet Union, persisting in these efforts up to the eve of the Six-Day War.

AFTER 1967. On the last day of the Six-Day War, June 10, 1967, the Soviet Union severed diplomatic relations with Israel, and the rest of the East European countries, with the exception of Romania, followed its lead. In the period of tension that preceded the war, the Soviet Union displayed an extreme anti-Israel attitude, which, in fact, played a decisive role in fomenting the crisis and precipitating the war. It was the Soviet Union which spread the canard that Israel had concentrated troops on its northern border for an imminent attack on Syria; and it was the Soviet Union that urged Egypt to take countermeasures against this alleged threat to Syria. The U.S.S.R. encouraged Egypt in its aggressive steps, i.e., the demand for the removal of UNEF, the concentration of huge forces in the Sinai Peninsula, the closing of the Tiran Straits, and the military pact with Jordan. Perhaps the Soviet Union had not wanted Egypt to engage in actual war and had hoped that the Arabs and the U.S.S.R. would achieve an easy prestige victory. At any rate, Israel’s lightning victory over the Arabs frustrated such expectations. To make up for this tremendous setback, the Soviet Union speedily rearmed and rehabilitated the Egyptian and Syrian forces, and gave unrestrained support, by diplomacy and propaganda, to Arab pressure for Israel’s withdrawal from the occupied areas without peace negotiations. The U.S.S.R. utilized Arab hostility toward Israel to strengthen Arab anti-American and anti-Western attitudes and to increase Arab dependence on the Soviet Union. The slogans “Soviet-Arab alliance” and “Israel, the present-day Nazis,” as well as the anti-Israel campaign in the Soviet press with its antisemitic overtones, characterized Soviet propaganda and policy on the Middle East after 1967.

[Eliezer Palmor]

The Struggle for Soviet Jewry

The problems of Russian Jewry had exercised Jewish and world opinion for many years before the overthrow of czarism and were the subject of relief and resettlement projects, international protests, and interventions. In the first years after the October Revolution of 1917, when Zionist delegations from Russia were still able to attend world Zionist conferences and congresses (as in 1920 in London and 1921 in Carlsbad), attention was given to the turmoil that the civil war and revolutionary changes were causing to the large and vital Jewish community in Soviet Russia, and Zionist congresses adopted resolutions against the suppression of Zionism and Hebrew by the Soviet regime.

The problem of Soviet Jewry found a place on the agenda of the founding assembly of the *World Jewish Congress (WJC) in 1936, but the contemporary widespread sympathy for the anti-Nazi stance of the Soviet Union and the belief that the U.S.S.R. had tried to eradicate antisemitism and accord national minority rights to its Jewish population muted

discussion of the question. It was only in 1948, with the first indications of official antisemitism in the U.S.S.R. (see *Antisemitism: In the Soviet Bloc), that interest in the problem began to revive. In spite of Soviet support for the establishment of a Jewish state in Palestine, the gloom of impending developments in the situation of Soviet Jews could already be felt; and although East European delegations attended the WJC assembly in 1948, misgivings about Soviet Jews were tactfully mentioned in the assembly's report. In general, however, until the events of the "Black Years" (1948–53), little news of which reached the outside world, it was assumed that no acute Soviet Jewish problem existed and that the difficulties confronting Jews in the U.S.S.R. were intrinsically the same as those afflicting the general Soviet population. When the campaign against "rootless cosmopolitans" began to sweep the U.S.S.R. and Eastern Europe, however, culminating in the "Doctors' Plot," a special world Jewish conference on the situation of Soviet Jews was contemplated. The WJC assembly meeting in Montreux early in 1953 prepared a document on the developments; the Zionist movement held discussions; and other Jewish organizations anxiously considered what steps might be taken if, as was feared, the *Doctors' Plot trial was used as an instrument for wholesale repression of Soviet Jews. The death of Stalin in March 1953 and the revocation of the charges against the doctors ended this tense phase.

1956–1969. In 1956, after the 20th Congress of the Communist Party of the Soviet Union, international opinion again began to stir on behalf of Soviet Jews. Protests in the Warsaw Yiddish Communist newspaper *Folkshtime* in April 1956 that the persecution of Soviet Jews had been passed over in silence in Khrushchev's speech at the 20th Congress, and the details *Folkshtime* released about the extent and virulence of Stalin's anti-Jewish terror campaign, made the world realize that the Jewish problem was still acute after almost 40 years of Soviet rule. This came as a shock particularly to Jewish and also non-Jewish Communists. Delegations from Western Communist parties went to the U.S.S.R. to investigate the truth. J.B. Salsberg, a leading Canadian Communist, returned from such a visit appalled; he published a series of articles on the subject in the American and Canadian Communist press, including details of a meeting with the Soviet leadership in which Khrushchev's antisemitic bias was revealed, and left the party with a group of old-time Communists. Hyman *Levy, a founder of the British Communist Party, prepared a confidential report about his visit in Moscow; the party executive regarded it as so shocking that only a strictly censored version was released for publication. Levy then published a pamphlet in 1958, *Jews and the National Question*, criticizing Soviet policy toward Jews in careful terms, and he was expelled from the party. In New York the Communist *Daily Worker* was closed down by the party and was transformed into a weekly called the *Worker*, because its editors continued to criticize the U.S.S.R.'s treatment of Jews. Two pamphlets published in Yiddish in Tel Aviv

in 1958 reproduced articles and statements of Jewish Communists in the West and in Poland.

Individual Jews and organizations in Western countries began to pay more serious attention to Soviet Jews. A principal problem was the paucity of reliable information. To meet this need the newsletter *Jews in Eastern Europe* was founded in 1958 in London, edited by E. *Litvinoff; it subsequently appeared three or four times a year and became a major source of factual information about Soviet Jews. At about the same time, the Contemporary Jewish Library was founded in London to collect and disseminate in photostats source materials in Russian and other Soviet languages relating to Jews in the U.S.S.R. under the title *Yevrei i Yevreyskiy Narod* ("Jews and the Jewish People"). A branch of the Contemporary Jewish Library opened in Paris published *Les Juifs en Europe de l'Est* and a monthly bulletin, *Les Juifs en Union Soviétique*. The Biblioteca Judía Contemporanea in Buenos Aires published *Allà en la U.R.S.R.*, and similar pamphlets were published in Italy. In New York, Jewish Minorities Research, directed by Moshe Decter, published monographs, pamphlets, reprints, and other relevant materials on Soviet Jews, including Decter's *Status of the Jews in the Soviet Union*, originally published as an article in the journal *Foreign Affairs* in 1963. Over the years, many scholarly studies of the situation of Soviet Jews have appeared in various countries, including: *The Jews in the Soviet Union* by Solomon M. Schwarz (1951); *The Jewish Problem in the Soviet Union* by B.Z. Goldberg (1961); *Jews in the Soviet Union Census, 1959*, edited by Mordecai Altshuler (Jerusalem, 1963); a study by the International Commission of Jurists in Geneva (see below); "*Soixante ans du problème juif dans la théorie et la pratique du bolchevisme*," by Marc Jarblum with a preface by Daniel *Mayer (in *Revue Socialiste*, October 1964); *Soviet Jewry and Human Rights* by Isi Leibler (Human Rights Research Publication, Victoria, Australia, March 1965); two reports of the Socialist International (see below). Particular popularity was achieved by the two eyewitness accounts, Ben-Ami's (Arieh L. Eliav) *Between Hammer and Sickle* (Heb. 1965; Eng. 1967) and Elie Wiesel's *The Jews of Silence* (1966), which appeared in several languages and editions. Interesting light was shed on Communist attitudes to the Jewish problem in the U.S.S.R. by a series of polemical exchanges in *Political Affairs*, the ideological organ of the U.S. Communist Party, in January 1965, October 1966, and December 1966.

During the 1960s the problem of Soviet Jewry – the discrimination against Jews in matters of language, education, and religion; the dissemination of anti-Jewish literature; the persecution of individual Jews, e.g., for "economic crimes" or for Jewish communal activity; and the denial to Jews of the right of emigration, particularly to Israel, and the reunification of shattered families – became a major issue in world Jewish and international discussion. Almost every Jewish organization, Zionist and non-Zionist alike, raised the problem as one of utmost importance to the Jewish people, "second only to the existence and security of Israel." Intellectuals on the left,

Jews and non-Jews, held special conferences to investigate the facts and issue appeals to the Soviet government.

The first such conference took place in Paris in 1960 and was attended by about 50 scholars, writers, academicians, and parliamentarians from 16 Western and African countries. Its opening session was addressed by Nahum *Goldmann and Martin *Buber, and it received messages of support from Albert Schweitzer, François Mauriac, Bertrand Russell, former French president Vincent Auriol, Richard Crossman, former Dutch premier Drees, Reinhold Niebuhr, Supreme Court Justice William O. Douglas, Thurgood Marshall, Daniel Mayer, and many others. Subsequent conferences of this kind were held over the years in Latin American countries, France, Scandinavia, Britain, and Italy. They were attended and supported by intellectual and moral authorities, including leading writers, poets, and prominent fighters for human rights.

Of particular significance was the Conference on the Status of Soviet Jews in 1963, founded in New York by a meeting of leading liberals, under the sponsorship of Justice Douglas, Martin Luther King, former Senator Herbert H. *Lehman, Bishop James Pike, Walter Reuther, Norman Thomas, and Robert Penn Warren, which issued an "appeal to conscience" and published many documents containing factual material. At the same time the Jewish community in the United States established the American Jewish Conference on Soviet Jewry, which encompassed all the major Jewish organizations in the country (including the *American Jewish Committee, which generally did not participate in comprehensive Jewish frameworks). This body sponsored mass rallies, press conferences, and meetings with the White House and State Department and also published factual information on the current situation of the Jews in the U.S.S.R. Similar activities were undertaken by central Jewish bodies in their respective countries, such as the Conseil Représentatif des Juifs de France, the Executive Committee of Australian Jewry, etc. In 1967 an Academic Committee on Soviet Jewry was formed in the United States; its sponsors included: Hans *Morgenthau, Daniel *Bell, Saul *Bellow, Lewis S. *Feuer, Nathan *Glazer, Irving *Howe, Alfred *Kazin, Max *Lerner, and Lionel *Trilling. The committee became an important source of information and has issued, among other publications, a booklet entitled *Soviet Jewry: 1969*, consisting of papers read at a symposium by leading Soviet experts.

The moral struggle on behalf of Soviet Jews was given considerable impetus by the interest shown in the problem by the philosopher Bertrand Russell. His involvement began early in 1962, when he sent a cable to Khrushchev, signed jointly with François Mauriac and Martin *Buber, appealing for the full restitution of equal rights to Soviet Jews. He also sponsored the publication of a statement on Soviet Jewry signed by leading Nobel Prize laureates from different countries. A private exchange of letters between Russell and Khrushchev on this question followed until, to general surprise, the Soviet authorities sought Russell's permission to release part of the correspondence to the Soviet press and agreed to his condition

that he should similarly release it to the Western press. It was published in Britain on Feb. 25, 1963, and in the U.S.S.R. on February 28, when it appeared simultaneously in *Pravda* and *Izvestiya* and was broadcast by Radio Moscow. Khrushchev had defined Russell's appeals as part of a campaign of "vicious slander" against the Soviet Union. On April 6, 1963, Russell replied at length repudiating this insinuation and describing as "gravely disturbing" the fact that some 60 percent of those executed for "economic offenses" in the U.S.S.R. were Jews. Although the Soviet premier did not reply to this letter, Russell continued his interventions on behalf of individual Soviet Jews and the community as a whole until age caused him to discontinue his public activities in 1968.

The problem began to be reflected at the United Nations, in parliaments, and in international bodies throughout the world. The first discussion at the UN took place in 1961 at the Subcommittee on the Prevention of Discrimination and Protection of Minorities, and continued to be a feature of UN debates. The matter was raised in 1962 at the General Assembly's Social Committee by the Australian delegate, the first time it was directly taken up by a member government other than Israel. This development followed a report by a delegation to the U.S.S.R. of the World Council of Churches, which testified that Judaism experienced severe persecution in that country. In 1964, before a visit by Khrushchev to Sweden, Denmark, and Norway was due to take place, the problem of Soviet Jews was featured by the leading newspapers in all three countries, and the Soviet premier's visit was "postponed." The Council of Europe at Strasbourg, consisting of parliamentary representatives from all democratic countries in Europe and of official observers from Israel's Knesset, several times debated the issue and established an investigating committee to report on it. Its report served as the basis for the council's appeal to all European parliaments to raise their voice on behalf of Soviet Jewry. In the parliaments of Britain, Ireland, the Netherlands, Sweden, and many other countries, motions were signed by many members (in Britain over 400 out of 630), and governments were urged to appeal to the Soviet Union on this matter. Both houses of the U.S. Congress also debated the issue and several times adopted almost unanimous resolutions on it. Leading statesmen, such as President Eisenhower, President Kennedy, and the British and Belgian premiers, as well as leaders of socialist and other opposition parties in the West, took up the issue in their encounters with Soviet statesmen and public figures. In 1964 the International Commission of Jurists in Geneva published a special study entitled *Economic Crimes in the Soviet Union*, which proved the anti-Jewish character of Soviet policy in this matter.

Gradually the current situation of the Jews in the Soviet Union began to be prominently featured in the world press. Such topics as the anti-Jewish riot at Malakhovka, near Moscow, the mass gatherings of Jewish youth on Simḥat Torah at the synagogues of Moscow and Leningrad, the ban on *matzah* in the U.S.S.R., the virtual dissolution of the Moscow yeshivah, the blood libel in the newspaper *Kommunist* at Buinaksk,

Dagestan, Yevtushenko's poem "Babi Yar," and antisemitic publications such as Kichko's *Judaism Without Embellishment* were extensively reported and commented upon in the principal newspapers the world over and were the subject of sharp debates with Soviet representatives in various bodies of the UN and other international forums. National and international writers' congresses, as well as PEN Club meetings, adopted resolutions against the suppression of Jewish culture in the U.S.S.R. Some Communist and pro-Soviet circles and press organs, particularly in Italy, Canada, Britain, the United States, Austria, Switzerland, Sweden, and Australia, openly criticized Soviet discrimination against Jews. In the late 1960s Jewish student groups for the struggle for Soviet Jewry sprang up in the United States, mainly on the east and west coasts, and in Great Britain, where demonstrations were staged, particularly at Soviet diplomatic missions. The World Union of Jewish Students (WUJS) organized a mobile exhibition illustrating the plight of Soviet Jewry, and mass petitions were signed by many thousands of Jewish and non-Jewish students.

PARTICIPATION OF ISRAEL. Israel representatives were in the forefront of initiating discussions on the problem in various UN bodies, the Socialist International (which published two reports, in 1964 and in 1969, called *The Situation of Jews in the U.S.S.R.* and *Anti-Semitism in Eastern Europe*), the Council of Europe, etc. In 1965 the first motion on Soviet Jewry was discussed in the Knesset. Later the Knesset devoted several special sessions to the situation of Soviet Jewry and made an appeal to other parliaments to take up the issue. The problem was repeatedly dealt with by the Israeli press and broadcasting service and in official and unofficial encounters by Israel's leaders and diplomatic representatives with Soviet diplomats and other personalities.

In Israel the Hebrew writings of Soviet Jews, most of them brought out clandestinely from the U.S.S.R., were published as early as the 1950s and served as a powerful means of reviving feelings of solidarity with Soviet Jewry. A collection of the Hebrew poetry of Ḥayyim *Lenski and Elisha *Rodin appeared in 1954 under the title *He-Anaf ha-Gaddu'a* ("The Cut-off Branch"). In 1957 the first anonymous Hebrew manuscript from the Soviet Union, called *El Ahi bi-Medinat Yisrael* ("To My Brother in the State of Israel"), which was written in an old-fashioned *maskil* style, and contained a diary on the "Black Years," was published, first in the newspaper *Davar* and then in book form. (Only after the author's death in Kiev in 1968, was his name, Barukh Mordekhai Weissman, revealed.) Under the pen name Sh. Sh. Ron, a Soviet Hebrew writer described his own and his fellow Jews' experience in a concentration camp in a smuggled-out booklet, *Me-Ever mi-Sham* ("From Over There," 1959). Unknown and unpublished poems by Ḥ. Lenski, some of which were written in a concentration camp in Siberia, somehow reached Israel and were published posthumously in 1960 under the title *Me-Ever li-Nehar ha-Lethe* ("From the Other Shore of the Lethe River"), together

with an introduction and postscripts by the poet's friends in Israel. A collection of Zionist poetry in its Russian original with Hebrew translations, *Ha-Lo Tishali* (its Russian title "My Spring Will Come") by an anonymous Soviet Jew, with an introduction by Y. Nadav (describing how the poems were written by a member of a clandestine Zionist group in a labor camp), appeared in 1962. A strong impact was made by Esther Feldman's autobiographical *Kele Beli Sugar* ("Prison Without Bars," 1964), the story of a Jewish woman in the Soviet Union whose husband (Joseph Berger-Barzilai) was imprisoned for over 20 years as an "enemy of the people" and then "rehabilitated." Soviet Hebrew fiction published in Israel included a novel about World War II, *Esh ha-Tamid* ("The Eternal Fire," 1966), written by a writer who hid his identity under the pen name A. Tsefoni, smuggled out of the U.S.S.R., and Abraham Friman's monumental novel, *1919*, about the revolutionary years (1968); its first two parts had been published in the 1930s and received the Bialik prize.

Educational work to convey deeper knowledge of the history and the current situation of Soviet Jewry was conducted over the years in Israel's schools and army units in various forms, including lectures, classes, a mobile exhibition, etc. The Hebrew magazine *He-Avar* and various publications of the Israel section of the World Jewish Congress have devoted themselves to research on Soviet Jewish affairs.

1969–1971. A turning point in the struggle for Soviet Jewry was Prime Minister Golda Meir's dramatic broadcast in Israel (in November 1969) of a letter sent to her by 18 Jewish families in the Soviet Georgian Republic who asked the Israeli government to convey to the UN their protest against the Soviet authorities for denying them the right to settle in their historic homeland, Israel. This letter inaugurated a new phase in the struggle for Soviet Jewry. For the first time Soviet Jews themselves, in growing numbers and from all parts of the Soviet Union, began to voice their demands, centered almost exclusively on their ardent desire to settle in Israel. They appealed openly to the highest Soviet authorities, as well as to the UN, the Israeli government, and international public opinion. These appeals, which were widely publicized in the world press, finally disproved the monotonously repeated contention of Soviet spokesmen that Soviet Jews were completely and finally integrated and no longer identified themselves with the Jewish people abroad and Israel. When the Soviet authorities staged a press conference of prominent Soviet Jews in Moscow in 1970, and also initiated a spate of letters from Jews to the Soviet newspapers accusing Israel of aggression and repudiating the demand for exit permits to Israel, many scores of Jews in various Soviet cities signed collective statements that sharply denounced this anti-Israel drive as unrepresentative of Soviet Jewish opinion and the result of police pressure. Hundreds of signatures of Soviet Jews, on pro-Israel statements, complete with personal data and addresses, were published in the West. Their number was proportionately much higher than the number of names signed in the U.S.S.R. on general liberal

and democratic protests, which became a feature of Soviet life in the late 1960s. This courageously open Israel-oriented movement of Soviet Jews, mainly of the younger generation, became increasingly the focus of the struggle of world Jewry, the Israeli government, and international public opinion for Jewish survival in the U.S.S.R.

At the end of 1970, with the Leningrad trial and its worldwide repercussions (see above), a favorable atmosphere was created for an impressive Jewish world conference devoted exclusively to the problem of Soviet Jewry. It took place in Brussels in February 1971 with about 750 delegates from 36 countries. The conference, convened by a coordinating committee of the principal Jewish bodies in the Diaspora and in Israel, became, even before it assembled, the subject of feverish Soviet diplomatic and propaganda moves directed at preventing the conference from taking place, or at least undermining its moral authority in advance. A delegation of several Soviet Jews who arrived in Brussels on the eve of the conference held a press conference, in which they denied all charges about discrimination against Jews in the U.S.S.R. and the urge of the Jewish masses to leave the Soviet Union and settle in Israel. The conference itself adopted a "Brussels Program" for Soviet Jewry, pledging the Jewish people to an unremitting struggle for the right of Soviet Jews to go to Israel and transmit the Jewish cultural and religious heritage to their children, and against the antisemitic campaign of the U.S.S.R., disguised as "anti-Israel" or as an "unmasking" of "international Zionism."

Among the participants at the conference were: David *Ben-Gurion, Menahem *Begin, Arieh Eliav, Herschel *Schachter, William Wechsler, Chief Rabbi Jacob *Kaplan, Lord *Janner, and other Jewish parliamentarians, intellectuals, and men of letters (including: Gershon *Scholem, Abraham *Shlonsky, A. *Kovner, S. *Yizhar, Hans Joachim *Morgenthau, Paddy *Chayefsky, and Otto *Preminger).

[Emanuel Litvinoff / Binyamin Eliav]

Developments in the 1970s

JEWISH CULTURE. In the Soviet Union there were two clearly distinguishable realms of Jewish culture. One was Jewish cultural activity, usually conducted in Yiddish, promoted by the Soviet government; the other was outside the framework of official institutions, whose principal proponents are the "refuseniks." Contact between these two realms was, for all intents and purposes, nonexistent.

The attitude of "*aliyah* activists," especially "refuseniks," toward the issue of the development of Jewish culture in the Soviet Union underwent a change over the 1970s. Until the end of 1973 most Jewish activists in the Soviet Union argued that all efforts must be directed toward the immediate emigration of Jews from the Soviet Union, and that any cultural activity with long-term goals would inevitably deleteriously affect the struggle for emigration. The year 1974, however, marked the beginning of a decline in Jewish emigration from the Soviet Union. The number of "dropouts" was growing steadily (see later) and some "refuseniks" became increasingly aware of the

rapid pace of assimilation within the Jewish community. In view of these developments many of the activists realized that in addition to the campaign for emigration, there was a need to expand Jewish cultural activity outside the boundaries of the official Soviet framework. This cultural activity took on several forms: (A) *ulpanim* for the study of Hebrew; (B) seminars on Jewish themes; (C) publications; (D) Jewish art and folklore; and (E) commemoration of events related to Jewish history and tradition.

(A) *Ulpanim for the Study of Hebrew*. According to Soviet law, private instruction of a language recognized by the Soviet Union was permitted. On the basis of this law four individuals (V. Prestin, S. Gurvitz, V. Polski, and P. Abramovich) obtained permission to teach Hebrew. In 1972, however, pressure to cease the instruction of Hebrew grew. The cases of Pavel Abramovich of Moscow and Lev Furman of Leningrad serve as examples. Abramovich had been teaching Hebrew since May 1971 on a legal basis and accordingly paid income tax. However in February 1972, he received a notice from Moscow's Pervomaysky Region Finance Department instructing him to stop teaching Hebrew since this language was not recognized by the Soviet Union, nor was it taught in any of its institutions. Abramovich thereupon applied to the Ministry of Higher Education and asked whether Hebrew was taught anywhere in the Soviet Union. The ministry replied that Hebrew was taught at the Institute of Asian and African Peoples within the University of Moscow, at the Moscow Institute of International Relations, at the University of Leningrad, as well as at the Military Institute of Foreign Languages. Though the Hebrew classes were attended by a minimal number of students at all these institutions, and Jews were not permitted to register, the very fact of their existence served as a pretext for the *ulpan* organizers to renew their request for the recognition of the private instruction of Hebrew. The authorities insisted that Abramovich lacked the necessary certificate qualifying him as a Hebrew instructor, and although he presented a teacher's certificate issued by the World Association for Hebrew, the tax authorities adamantly refused to register him as a private instructor of Hebrew. In 1976 an attempt was made to publicize the existence of Hebrew classes and a notice to this effect was presented to the Moscow Bureau of Advertising for publication. When the bureau refused to advertise the notice, Pavel Abramovich brought charges against them in court, as a result of which the bureau was compelled to publish a notice announcing Abramovich's Hebrew lessons. This incident clearly demonstrated that Hebrew instruction in Russia is legal and the authorities had therefore resorted to harassing the teachers in their attempt to prevent Hebrew classes from taking place. In keeping with this line of approach, Abramovich's apartment was searched and all Hebrew material confiscated. Moreover he was threatened by the KGB and told in no uncertain terms that he was to desist from holding Hebrew classes. A similar case was that of Lev Furman. In September 1976 the Finance Department in Leningrad granted Furman a license to teach Hebrew privately. On the basis of this license, Furman

organized a Hebrew teacher-training seminar in April 1977 in which five students registered. In July of that year, KGB agents burst into his apartment during a session, arrested Furman and held him for five days on the charge of “disobedience.” In October 1977, the Soviet authorities ordered Furman to cease giving Hebrew lessons immediately, on grounds that he lacked the necessary certificate qualifying him to teach Hebrew.

The authorities were trying *prima facie* to respect the existing laws of the state to some degree, and were therefore compelled to turn a blind eye to the Hebrew classes, while at the same time they threatened and harassed Hebrew teachers, accusing them of “parasitism” and “anti-Soviet propaganda” and the like. This contradiction in Soviet policy made possible the existence of a number of Hebrew *ulpanim* in several cities in the Soviet Union. The number of students who participated in those *ulpanim* at the end of the 1970s was estimated to be about 2,000, including those who did not plan to emigrate in the near future. Both the teachers and most of the students wished to leave the Soviet Union and therefore these groups were by nature fluid, with participants leaving and new ones joining all the time. The program of studies and the intensity in which the language was studied were not constant in all *ulpanim*, rather they were dependent on the ability of the teachers as well as the frequency of the sessions. Thus the language competency of those who “graduated” from the *ulpanim* ranged from basic knowledge of the Hebrew alphabet to acquisition of a limited vocabulary and perhaps even proficiency in simple conversational Hebrew. The value and significance, however, of these *ulpanim* extended well beyond the realm of acquisition of language skills; they constituted a focal point for Jewish cultural activity.

(b) *Seminars on Jewish Themes.* The *raison d'être* of the scientific seminar organized in Moscow in April 1972 was, in its early stages, to provide “refusenik scientists” who had been dismissed from their places of employment with an opportunity to meet and discuss matters pertaining to their scientific pursuits. However the seminar participants were not content to deal with professional matters only and after a while began to include in their discussions themes related to Jewish culture, history, and problems of Jewish existence in the Soviet Union. During the years of the existence of the seminar many of the original participants left the Soviet Union and were replaced by others. Following a short recess during the summer of 1977, the seminar reconvened with Victor Brailovsky as chairman, and some 20 individuals participating on a more or less regular basis. Seminars of this nature, where discussions covered both scientific and cultural themes, were organized in several other cities. In September 1977, a similar seminar organized in Riga opened its first session with a lecture on *Rosh Ha-Shanah* and the teachings of the Hebrew prophets. Between 20 and 40 people participated in this seminar and even individuals connected to the Soviet establishment were invited. Most of the discussions in a seminar organized in Kishinev at the end of 1976 were devoted to such cultural themes as Hebrew poetry in medieval Spain, the period of the Judges and its place in Jew-

ish history, and related themes. A group which began meeting in the home of Naum Salansky in Vilna at the beginning of 1977 devoted all its sessions to the study of Jewish history. In Leningrad 15 Jews participated on a more or less regular basis in a seminar which dealt with topics related to Jewish culture. In September 1977 a special seminar was organized for young Jews in Riga, in which between 30 and 60 Jews participated, some of whom had not yet decided to emigrate. The seminar included lectures dealing with selected chapters of Jewish history, the history of Hebrew poetry, and themes related to Jewish holidays. Some of the young people began to meet for special “Erev Shabbat” evenings where they sang Hebrew songs and read Hebrew poetry in translation. In the second half of the 1970s, a second seminar was organized in Moscow whose declared aim was the dissemination of Jewish culture and history. The leader of this seminar was Arkadii May and about 80–100 people participated in it. At the same time, a similar seminar was organized in Minsk; most of the participants did not intend to emigrate from the Soviet Union. An attempt was made in Kiev to organize a seminar concerning Jewish culture, but in this instance the KGB acted with particular viciousness and the attempt failed.

The seminar groups in the various cities maintained contact with each other and lecturers of one seminar often appeared as guest lecturers in others. Their existence was most certainly known to the authorities, who attempted relentlessly to disturb the meetings by arresting the organizers, carrying out searches at meeting places, and confiscating material. Despite these harassments, the seminars continued to constitute a center of Jewish cultural activity in the Soviet Union.

(c) *Publications.* “Jewish *samizdat*,” as publications not under Soviet censorship were generally called, consisted basically of two kinds: publications of material written and edited by Soviet Jews, and translations and distribution of material either written before the revolution or originally published outside the Soviet Union. A literary publicistic journal called *Jews in the U.S.S.R.* was founded in Moscow in October 1974, and continued to appear for several years. According to its editors, the motive for its publication was the search for identity, for an answer to the question “Who am I?” and any material included in this journal had to conform to the following criteria: “The writer of any article must be sufficiently knowledgeable with respect to his theme, the material should not be of a political nature, nor should it contain any untruths or personal slander whatsoever.”

And indeed, the journal contained the writings of Jews and non-Jews on a variety of themes including emigration, assimilation, Jewish culture and history, as well as essays on philosophy and religion, and short stories and poetry. A journal in the Russian language, *Tarbut*, appeared in 1975. Seven issues of *Tarbut* appeared in 1976, the size of each an average of 60 typewritten pages. The purpose of the journal was to impart knowledge of the Jewish cultural heritage. *Tarbut* contained material depicting the role of the Jews in the war against the Nazis, as well as selections of the writings of Frug,

Bialik, Judah *Halevi, Aḥad Ha'am, *Jabotinsky, *Scholem, and others, translations of which in some instances were in existence before the revolution, while others were prepared especially for publication in the journal. *Tarbut* was issued in tens and sometimes hundreds of copies and there is reason to believe that it passed through the hands of thousands of readers, not all of whom were involved in the Jewish national movement but nevertheless sought to expand their knowledge of Jewish cultural and historical heritage. In Riga in 1979, a few issues of a journal called *Jewish Thought* were published; they dealt with the development of Jewish thought from the days of the Bible to present times. The same year a journal called *Law and Reality* began to be published in Moscow. It published Soviet laws and orders concerning emigration, the teaching of languages, cultural activities, and documented examples of the authorities avoiding compliance with these laws. The main purpose of this journal was to draw the attention of world opinion to breaching of Russian laws by state authorities and to make Russian Jews aware of the fact that their activities are legal in accordance with the laws of the state.

In addition to these journals, "Jewish *samizdat*" included the publication and distribution of entire books, or excerpts thereof, as well as newspaper articles originating in the West. These publications appeared in the form of photocopied, stenciled, and typewritten copies, and were widely distributed among young Jews who sought to become acquainted with their people. The circulation of these books in Russia continued, though on an irregular basis and in the face of many obstacles. A Russian translation of Cecil *Roth's *Short History of the Jewish People*, after circulating in stenciled form, was printed, probably outside the U.S.S.R., and achieved wide circulation. Thus the interest in Jewish culture among Soviet Jews grew more widespread and even found expression in the great interest shown by Soviet Jews at the Israeli book stall at the International Book Fair held in Moscow.

JEWISH ART AND FOLKLORE. Through the 1970s, there was a marked tendency among some Jewish artists in the Soviet Union to have recourse to Jewish themes in their avant garde style in painting and sculpture. While private exhibitions of nonconformist art became a rather widespread phenomenon, the group of Jewish artists which organized them in 1975 expressly stated that in its desire to develop a modernist style, it sought to cultivate Jewish themes in art. This group, with a membership of 12 artists, and calling itself "Aleph," organized two exhibitions in Moscow and Leningrad. The Moscow exhibition, housed in a private apartment, was visited by some 4,000 people. The more interesting Leningrad exhibition was dominated by the works of A. Abezgauz whose paintings depict the life of the Jews in the Russian Pale of Settlement and the life of the refuseniks. Among the works exhibited by S. Ostrowsky was a painting entitled *The Patriarchs of Israel*. Paintings by 26-year-old T. Kornfeld, the youngest participant, carried titles such as *The Lover* and *The Jew*. Plastic arts

were represented by Iu. Kalendarev whose wood sculptures entitled *Hanukkah Lamp* and *Mezuzah* attracted many spectators. The artists who participated in both these exhibitions each had his own particular artistic style, while that which set them apart as a group was their Jewishness, which found expression in their preoccupation with Jewish themes or in their particular world view.

Jewish folklore was likewise increasingly incorporated into Jewish cultural activity in the Soviet Union. Jewish songs, ḥasidic as well as Israeli, were often sung at meetings of Jewish activists. A. Vinkovetski even edited an anthology of Jewish folklore which he was unable to publish due to the refusal of Soviet publishers to print the book.

COMMEMORATION OF EVENTS RELATED TO JEWISH HISTORY AND TRADITION. Among the concrete expressions of Jewish cultural activity in the Soviet Union were the celebration of Jewish holidays and festivals and commemoration of Jewish historical events. Two landmarks in contemporary Jewish history – the Holocaust and the establishment of the state of Israel – served for many Soviet Jews as the focal points in their public manifestation of Jewish national identity. Immortalization of the memory of the victims of World War II was a common feature in Soviet society. Statues and monuments were erected in thousands of settlements in the memory of the victims of the Nazi occupation, and were frequented by Soviet schoolchildren and members of the Communist youth movement. Yet in all these places, the methodical and clearly intentional disregard of the Jewish victims is conspicuous. Jewish activists, therefore, saw it as their duty to dwell on the Holocaust and its uniqueness. As a result, in 1976 and 1977, as in previous years, a group of 50 Jewish activists decided to hold a memorial service in the Moscow synagogue on Remembrance Day of the Holocaust. However, the *gabbai* of the synagogue, apparently on the instructions from the authorities, prevented them from holding the service as planned, and they consequently adjourned to a private home. In the 1970s, Jews of several cities tried to hold a memorial service at Babi Yar, in Kiev. The organizers sought to lay a wreath at the foot of the monument in memory of those Jews who were the principal victims at Babi Yar and about whose fate the inscription on the monument is silent, as well as to hold a religious service. The Soviet security forces prevented them from carrying out their plan, and even arrested some activists who tried to make their way from Moscow to Kiev to participate in the service.

On Israel Independence Day, hundreds of activists held parties in their homes, while some chose to celebrate the event in parks on the outskirts of the city. At these gatherings, Hebrew songs were sung and at some speeches were delivered about the State of Israel.

The annual gatherings outside synagogues on *Simḥat Torah* became a well-entrenched tradition among Soviet Jews, with some 5,000–8,000 Jews assembling each *Simḥat Torah* outside the Moscow synagogue.

SYMPOSIUM ON JEWISH CULTURE. The goal of the symposium on the subject "Jewish Culture in the Soviet Union – Present and Future" was threefold: an assessment of what existed and what was lacking in Jewish culture in the Soviet Union, the establishment of guidelines for future development, and drawing the attention of world public opinion to the restrictions on Jewish cultural activity in the Soviet Union.

In March 1976 an organizing committee of 13 individuals, with Professor B. Fain as chairman, was set up in Moscow, for the purpose of convening an international symposium to discuss Jewish culture in the Soviet Union. The organizing committee prepared a memorandum defining these goals. The memorandum, which in effect served as an invitation, was sent to hundreds of Jewish scholars and intellectuals throughout the world as well as to a number of Soviet institutions. The organizing committee eventually grew to include 30 persons (13 from Moscow, 4 from Riga, 2 from Vilna, 2 from Kiev, 2 from Vinnitsa, 2 from Leningrad, 2 from Tiflis, and 1 each from Tallinn, Minsk and Kishinev). On Oct. 23, 1976, the organizing committee convened and approved 27 papers to be presented at the symposium, half of which were contributed by foreign lecturers. On Nov. 17, 1976, the organizers called a press conference inviting foreign as well as Soviet correspondents. In the context of preparations for the symposium, the organizers met with official and semiofficial Soviet representatives. On Sept. 27, 1976 E. Liberman, one of the organizers, met with General Shekhovtsev, director of the Institute of Military History. When Liberman pointed out to the general that most of Soviet society is led to believe that the Jews did not take an active part in the war against Hitler, Shekhovtsev admitted the truth of the allegation, but was quick to argue that the history of World War II was not studied in its national ramifications but from a more encompassing point of view as the war of the Soviet people as a whole. This argument was clearly unfounded in view of the hundreds of books in the form of memoirs, historical studies, and literature published in the Soviet Union which depicted the contributions of various nationalities to the war effort against Nazi Germany. On Dec. 8, five members of the organizing committee met with the Soviet Deputy Minister of Culture, V. Popov. He admitted having received an invitation, though he argued that since their perception of Jewish culture was contrary to the Soviet perception, their very activity constituted provocation. On Dec. 14, the organizers of the symposium met with the members of the editorial board of the Yiddish journal *Sovetish Heymland*. A. Vergelis, the editor, rejected the possibility of the existence of Jewish culture in any language other than Yiddish and argued that any literary creation in the Russian language *ipso facto* belonged to Russian culture, regardless of whether its theme or author were Jewish. He did, however, admit that there was no institution in existence in the Soviet Union where Yiddish might be studied, and noted that it would be commendable to do something about the dissemination of a knowledge of Jewish history according to a Marxist approach. Nonetheless Vergelis unequivocally opposed the symposium which,

in his view, sought to halt the process of assimilation which, according to him, was a positive phenomenon. Furthermore, he stressed that the very organization of a symposium would endanger Soviet cultural activity in Yiddish.

An article which appeared in *Izvestia* on Nov. 22, under the evocative heading "The Formula for Treason," implicitly affirmed the KGB's decision to prevent the symposium from taking place. And so, between Nov. 23 and 25, searches were carried out in the apartments of many of the organizers and much of the material prepared for the symposium was confiscated. On Nov. 24 the news agency TASS "revealed" that the material confiscated proved that contact had been established with Zionist organizations and that their activity was aimed at stirring hatred among the peoples of the Soviet Union. On Nov. 29, the organizers made a fervent appeal to public figures and heads of state in the West, calling on them to demonstrate their support for this Jewish cultural undertaking. The Soviet press at the same time launched an extensive and widespread campaign against the organizers which continued into December. On the one hand, the campaign was aimed at branding the organizers of the symposium as agents of anti-Soviet political forces, and on the other, at proving that Jewish culture on a wide scale in fact exists in the Soviet Union. Concomitantly, the KGB systematically called in the organizers of the symposium for questioning on charges of "dissemination of lies with the intent to harm the government and Soviet society." Initially these investigations were limited to symposium organizers in Moscow, but it was not long before they spread into other cities where most of the members of the organizing committee, lecturers, and indeed any person who appeared to the authorities as having a hand in the convening of the symposium were arrested and taken in for questioning. As the opening date of the symposium drew near (Dec. 21), arrests and harassment of the organizers and participants accelerated. By Dec. 21, not one of the participants had succeeded in reaching Moscow. According to plan, the participants in the symposium were to assemble outside the Moscow synagogue at 10 A.M. and were to proceed to a private apartment for the opening session. However, on the way to the designated meeting place, the majority of the organizers, lecturers, and participants were arrested. Nonetheless, nearly 100 people, among them Western correspondents as well as the renowned freedom-fighter Andrei Sakharov, assembled at the synagogue at the designated hour. They adjourned to a private apartment where a symbolic opening of the symposium was held, all under the careful scrutiny of KGB agents. The participants, who heard a number of papers which the KGB had not succeeded in confiscating, sent a letter to the Central Committee of the Communist Party protesting the arrest of their colleagues. These events marked the end of another stage in the struggle for Jewish cultural activity in the Soviet Union. Although the symposium did not take place as intended, its very organization and the events surrounding it drew the attention of world public opinion to the plight of Soviet Jewry and its desire to maintain its particular cultural life. Moreover, there is reason

to believe that the incident roused many Jews into Jewish cultural activity, among these many who did not intend emigrating from the Soviet Union.

JEWISH CULTURAL ACTIVITY OF THE ESTABLISHMENT. Institutionalized and legitimate Jewish cultural activity whose main vehicle was Yiddish found expression in publications and in the area of the performing arts. In 1977 four books were published in Yiddish while several were translated from Yiddish. Most of the Yiddish writers living in the Soviet Union published their work in the monthly literary-social journal *Sovetish Heymland*. This journal was largely designed for foreign consumption and was forever in difficulties for lack of contributors as well as readers. Yiddish literature in the Soviet Union had not been able to recover from the severe blow it suffered during the last years of Stalinist rule, when its foremost writers were removed. Many of the writers who managed to return from the detention camps and prisons remained emotionally and spiritually broken, many passed away over the previous 20 years, and some Yiddish writers left the Soviet Union during the 1970s for Israel. As a result, the number of writers who participated in *Sovetish Heymland* grew increasingly and effectively smaller. In 1977, 40 writers and literary critics published their work in the journal. Most of the contributors were well advanced in age, only five being between the ages of 51 and 60, 21 between 61 and 70, 11 between 71 and 80, and three writers from 81 to 90. No Yiddish schools had existed in the Soviet Union since the end of World War II, and there was thus no possibility of replenishing the cadres of Yiddish writers. To overcome the lack of material, contributions were accepted in the section of the journal containing reportage and stories by amateurs, so that most of the literary creations which appeared in *Sovetish Heymland* were of poor literary quality and of shallow Jewish content. Even more distressing than the difficulty of procuring material was the lack of readers, and to deal with it the journal included from 1969 a section on individual study of Yiddish. At a special meeting of the editorial board in June 1977, called to discuss the publication of a textbook for the study of Yiddish, Hirsh Remenik stressed that since there were no Yiddish schools or qualified teachers, the textbook would have to be designed for individual study. It was decided to proceed with the preparation of a text for the study of Yiddish geared towards Russian speakers. In order to draw the interest of readers both in the Soviet Union and abroad who knew no Yiddish, the journal began to include, as of September 1977, abstracts in Russian and English. In 1979 Yiddish was introduced as an optional subject in several Birobidzhan schools, but only some 10,000 Jews lived in this region.

In 1977 there were two Yiddish "folk theaters" in the Soviet Union – one in Birobidzhan and the other in Vilna. The "folk theater" was comprised of a group of amateurs who received financial government support. Both groups presented skits as well as evenings of songs and folklore.

As a result of the aforementioned symposium on Jewish culture the government announced, at the end of 1977, the es-

tablishment of a professional Yiddish theater in Moscow. In Dec. 1978 the Jewish musical chamber theater began its activities by showing "Black Bridle for a White Horse" by Yu. Sherling, and in 1979 it performed a musical review, "Let's All Do It Together." In the same year, Georgian television produced a program of medieval Jewish poetry recited by local actors.

RELIGION. Religious activity in Russia centered on the synagogue. In mid-1977, as far as could be ascertained, there were 69 synagogues in the Soviet Union; 17 in R.S.F.S.R., 14 in Georgia, 12 in the Ukraine, nine in Uzbekistan, three each in Azerbaijan and Belorussia, two each in Moldavia, Lithuania, Estonia and Kazakhstan, and one each in the republics of Latvia, Tadzhikistan, and Kirghizia. In addition special *minyanim* were organized for prayer on the High Holidays in many centers. The synagogues had no countrywide organization, though Rabbi Y.L. Fishman of the Great Synagogue in Moscow was given prominence over others. There was an acute shortage of rabbis. The Moscow yeshivah, which trained religious functionaries, had only ten students, three of whom were sent to Hungary to complete their studies. The synagogues also suffered from an acute shortage of prayer books and other religious articles.

Many of the synagogues had facilities for kosher slaughtering, and several are equipped with facilities for baking *matzah* for Passover.

The Department of Religion and the security forces maintained stringent supervision over the synagogues, and religious functionaries were often exploited for propaganda purposes in the attacks by the authorities against Zionism and its proponents in the Soviet Union. As a natural result *aliyah* activists avoided the synagogues, which were mainly frequented by elderly people.

EDUCATION, EMPLOYMENT AND DEMOGRAPHY. During the academic year 1976–77, 66,900 Jews, comprising 1.4 percent of the total registration, were enrolled in institutions of higher learning. Of these, 2,850 were studying for a candidate degree. (The title of candidate is comparable to the Ph.D. degree in the West.) The 33,300 Jewish students enrolled in post-high-school vocational institutions comprised 0.7 percent of the student body. Since the 1974–75 academic year, the number of Jewish students in institutions of higher learning had dropped by 12 percent and in the vocational schools by 6 percent. In November 1975, 181,000 Jews who had completed vocational training were employed in the Soviet economy, comprising 1.4 percent of the total, while 385,000 Jews who had graduated from institutions of higher learning were employed in the Soviet economy, constituting 4.1 percent of the total. The number of graduates of institutions of higher learning who were integrated into the Soviet work force grew by 8 percent during the years 1970 to 1975, while the number of Jews in the same category continued to drop steadily. At the end of 1975, there were 69,000 Jews working in scientific fields (5.7 percent of the total), 8 percent more than in 1970. At the

end of 1973 there were 28,000 employed Jewish scientists bearing the titles of candidate or higher, comprising 8.8 percent of the total. Thus the percentage of Jews grew as the educational level of the category rose, though in view of the shrinking numbers of Jewish enrollment, it was doubtful if they could maintain such a level. However, despite the restrictions and difficulties, the Jewish community as a whole turned towards academic pursuits and most young Jews in 1977 were enrolled in institutions of higher learning, though perhaps not always in the institutions or fields of their choice.

In January 1979 a population census, the third since World War II, was conducted in the U.S.S.R. The final tabulation listed 1,810,876 people as Jews distributed among the republics, as seen in the Table: Jewish Population, U.S.S.R.

In the nine years from the census of January 1970 and the one in 1979, the Jewish population decreased by about 340,000 (in 1970 there were 2,151,000 Jews), of whom 177,000 emigrated from the Soviet Union during that interval. This means that in the period under discussion the Jewish population decreased as a result of demographic factors and assimilation by about 163,000. The average yearly decrease in the Jewish population, for reasons other than emigration, was during the 1970s 0.87 percent. Of those declaring themselves as Jews in the latest census, 19.6 percent stated that the Yiddish language is their mother tongue or their second language, as compared to 25.5 percent in the 1970 census.

SOVIET POLICY. Soviet policy toward the Jews and Judaism found expression in propaganda and suppression of *aliyah* activists and proponents of nonestablishment Jewish culture, the two methods being closely interrelated. On Jan. 22, 1977, a film shown on several television stations in the Soviet Union portrayed *aliyah* activists as a group of corrupt individuals who received funds from Zionist sources abroad, and who directed its actions against the state. The local and national Soviet press published hundreds of articles depicting Judaism as cultivating hatred among peoples, and Zionism and the state of Israel as being in the forefront of imperialism and following in the footsteps of the Nazis. In reportage and stories, the Jew was portrayed as an individual bearing negative qualities and untrustworthy. The campaign against Judaism, Zionism, and *aliyah* activities gained momentum during the second quarter of 1977. On Feb. 5, 1977, the president of the United States wrote a letter to the renowned advocate of human rights in the Soviet Union, Andrei Sakharov. As an indirect response to the letter, the official Soviet government newspaper *Izvestia* printed an unsigned article in which nine Jewish activists (two of whom had already left the Soviet Union) were accused of having supplied information to the American intelligence service. The seven who were still living in the Soviet Union were Valdimir Slepak, a radio engineer, age 51, who had applied for an exit permit to Israel in 1974; Ida *Nudel, an economist, age 46, who had first applied for an exit permit in 1971; Dina Beilin, engineer, age 38, who had first applied for an exit permit in 1971; Mikhail Kremen, radio engineer, age 40; Boris Tchernobilsky,

radio engineer, age 31; Professor Alexander Lerner; and Anatoly *Shcharansky. They considered filing suit against *Izvestia* but abandoned their plan when Anatoly Shcharansky was arrested on Mar. 15. Shcharansky had applied for an exit permit to Israel in 1975 and when it was refused, he became one of the chief spokesmen of the *aliyah* activists, meeting with U.S. senators, Western correspondents, and tourists. Following his arrest, the Soviet authorities announced that Shcharansky would be charged with treason, espionage on behalf of the United States, and anti-Soviet propaganda. On June 30, the president of the United States made an exceptional gesture and announced at a press conference that Anatoly Shcharansky had never had any contact with American intelligence agencies and consequently never passed on any information. The Soviet security forces nonetheless proceeded with their task. In various cities of the Soviet Union, dozens of *aliyah* activists who had at some time met with Shcharansky were called in for questioning. It soon became apparent to the *aliyah* activists that the Soviet authorities were in the process of preparing a show trial which was aimed not only at harming Shcharansky, but ultimately at branding activists involved in the struggle for emigration and Jewish culture in the Soviet Union as enemies of the state and agents of foreign intelligence services. On July 14, 1978 Anatoly Shcharansky was sentenced to 13 years hard labor. The campaign for the release of Anatoly Shcharansky thus became the focal point of activity in the free world on behalf of Jews in the Soviet Union.

In June 1978 Ida *Nudel was sentenced to four years in exile and recently one of the editors of the journal *Jews in the Soviet Union*, Viktor Brailovski, was arrested.

The Struggle Continues

The struggle on behalf of Soviet Jewry was adopted by most Jewish communities all over the world. In most countries, the campaign was coordinated by a central body such as the National Conference of Soviet Jewry in the United States, the Canadian Committee for Soviet Jewry in Canada, the International Coordination Office for Regional Organizations in Defense of Soviet Jewry in Europe, and in Israel, the Israel Public Council for Soviet Jewry. These organizations and others all had representatives on the executive committee of the Brussels Conference on Behalf of Soviet Jewry. The activities of these groups were aimed at bringing the persecution of Soviet Jewry to the attention of the wide public via the mass media on national and international levels. Local committees on behalf of Soviet Jews, as well as professional and ideological groups, existed in almost every country, such as groups of students, professors, clergymen, and the like. They also appealed to their respective governments and members of parliament. The activities in which Jews and non-Jews alike participated were focused on three main issues: (1) the release of prisoners of Zion; (2) a campaign against antisemitism; and (3) protest against the sabotage of the Symposium on Jewish Culture.

(1) *The Release of Prisoners of Zion.* Hundreds of demonstrations of organizations and individuals took place all over

the world demanding the release of prisoners of Zion and in defense of Anatoly Shcharansky and Ida Nudel. Many prominent figures appealed to the Soviet authorities, calling for the release of prisoners of Zion on humanitarian grounds, as well as the release of Shcharansky. The demonstrations were generally held outside Soviet institutions in the West and wherever Soviet diplomats and artists appeared.

(2) *Campaign against Antisemitism.* The main efforts were directed towards drawing the attention of world public opinion to the antisemitic literature recently published in the Soviet Union. It was stressed that this contradicted the international commitments of the Soviet Union.

(3) *Protest against the Sabotage of the Symposium on Jewish Culture.* The attention of world public opinion was drawn to the plight of Jewish culture and religion in the Soviet Union. In many countries conferences were organized to demonstrate solidarity with the Symposium. During the days that the Symposium was to have been held in Moscow, symposia of scholars and scientists were organized in many cities in Europe, the United States and Israel in which the state of Jewish culture and religion in the Soviet Union was discussed. The Soviet Union was warned that it could not expect Western cooperation as long as it ignored its commitments according to Basket III of the Final Act of the Conference on Security and Cooperation in Europe, known as the Helsinki Agreement. In the wake of this agreement, private bodies and parliamentary groups were set up to monitor the fulfillment of Soviet obligations in the protection of human rights. Similarly, the executive committee of the Brussels Conference on Behalf of Soviet Jewry set up a group to monitor the fulfillment of Soviet obligations according to the Helsinki Agreement with respect to its treatment of Soviet Jews. This group prepared a document to be presented at the Belgrade Conference of representatives of countries that signed the Final Act. This document, known as the "Blue Book," described in detail thousands of instances where the Soviet government violated the agreement. This extensive material was presented to delegations of 30 countries participating in the Belgrade Conference so that they might raise the issue before the Soviet delegation. The problem of Soviet Jewry thus became a matter of public and political concern in countries of the free world, thereby compelling the Soviet Union to take heed, to some extent, of world public opinion in every measure it took against Soviet Jewry.

EMIGRATION. Emigration was one of the most important events of Jewish life in the Soviet Union during the 1970s. Of the 246,000 Jews who left the Soviet Union between 1970 and 1981, some 19,000 left during the years 1977–78. The ethnic composition of those Jews who emigrated in the years 1977–83, according to Soviet republics, is shown in Table: Soviet Jews who Emigrated to Israel (*Olim*) According to Ethnic Composition, 1970–1979.

Soviet emigration procedures were complicated and often rather lengthy. The first step involved obtaining an affidavit from Israel. At times such affidavits did not reach their

Soviet Jews Who Emigrated to Israel (*Olim*) according to Ethnic Composition, 1970–1979

Ethnic group	Number	Percentage	Relative percentage within Sov. Jewish pop.
Ashkenazi Jews	98,500	64.3	93.5
Georgian Jews	29,600	19.4	2.3
Mountain Jews	9,800	6.4	2.3
Bukharan Jews	15,100	9.9	1.9
Total	153,000	100.0	100.0

destination, while in some cases the applicants themselves, due to personal and other considerations, decided not to approach the Soviet authorities with requests for exit permits even after receiving their affidavits. Consequently, the number of affidavits sent from Israel did not reflect the exact number of requests for exit permits processed by Soviet authorities. Nonetheless, the request for an affidavit from Israel did indicate that the applicant at some stage considered leaving the Soviet Union. Thus, although as stated 246,000 Jews emigrated from the Soviet Union between 1968 and Jan. 1, 1981, 350,000 new affidavits were sent to Jews in Soviet Union, meaning that 16 percent of Soviet Jews had at least considered emigration. There was generally a correlation between the number of emigrants and the number of new affidavits sent from Israel, the number of new affidavits sent from Israel being between 1.7 and 3.5 times the average rate of emigration for any one year between 1972 and 1981, as shown in Table: Monthly Rate of Emigration from the Former Soviet Union; New Affidavits from Israel, 1968–1980.

Monthly Rate of Emigration from the Former Soviet Union; New Affidavits from Israel, 1968–1980

Years	Average monthly rate of emigration	Monthly average of new affidavits
1968–71	466	1,992
1972	2,623	5,658
1973	2,910	4,851
1974	1,682	3,570
1975	1,095	2,845
1976	1,178	3,008
1977	1,430	3,589
1978	2,550	8,934
1979	4,278	10,616
1980 (Jan–June)	2,515	3,765

It may therefore be said that every Jewish family emigrating from the Soviet Union acted as a catalyst urging one or two other families to consider the possibility of emigration. Consequently the increase in Jewish emigration in 1979 as compared to 1978 brought in its wake an increase of approximately 19 percent in the number of new affidavits sent from Israel as compared to the previous year. It was therefore not surprising to find the greatest number of applicants for affidavits in those Soviet republics where emigration figures are highest.

Whereas of the 246,000 Jews who left the Soviet Union between 1970 and 1980, 157,000 emigrated to Israel while the remaining 89,000 (36 percent) proceeded to other countries, especially the United States, the figures for 1979–80 show that out of 73,000 emigrants only 24,700 or 34 percent settled in Israel.

Furthermore, there existed a disproportion between the ethnic composition of those emigrating to Israel and the corresponding ethnic composition within Soviet Jewish society as a whole, as demonstrated in the Table: Emigration: *Olim* and “Dropouts” from Russia, 1980–1986.

Emigration: *Olim* and “Dropouts” from Russia, 1980–1986

Year	Exited Russia	Immigrated to Israel	“Dropped Out” ¹ in Vienna	Percentage “Drop-outs”
1981	9,481	1,806	7,675	81.2
1982	2,708	756	1,952	72.8
1983	1,320	390	930	70.5
1984	896	350	546	60.9
1985	1,137	344	793	69.7
1986 (1–7)	381	92	289	75.8
Total	15,923	3,738	12,185	76.5

1 Chose another country instead of Israel.

These figures therefore indicate that the percentage of non-Ashkenazi Jews among those who proceeded on to Israel was greater than the percentage they comprise within Soviet Jewish society as a whole.

This disparity may be attributed to two factors: (a) the percentage of non-Ashkenazi Jews who left the Soviet Union in this period was greater than the percentage of Ashkenazi Jews who emigrated; and (b) the percentage of “dropouts” among non-Ashkenazi Jews was significantly smaller than the percentage of dropouts among Ashkenazi Jews.

As in previous years, in 1977–78 the dropout phenomenon was predominant among Jews originating from certain cities.

The rate of dropouts is thus seen to be linked to the geographic origin of the emigrants: Jews of the first six cities being of Ashkenazi origin, those from Tashkent and Tiflis being Ashkenazi, Georgian, and Bukharan Jews, while Mukachevo, Kishinev, and Chernovtsy were annexed to the Soviet Union on the eve of World War II. The average level of education among dropouts was higher than that of those who emigrated to Israel. The number of members of the family of working age is likewise higher among dropouts. Furthermore, the frequency of mixed marriages is higher among dropouts.

Approximately 46 percent of the work force among Soviet Jewish emigrants comprised skilled workers and/or those who had attained a high level of education.

THE REFUSENIKS. The leading protagonists in the struggle for the right to emigrate from the Soviet Union were those known as “refuseniks,” individuals who applied for exit permits but whose applications were turned down. Refuseniks were alien-

ated from the surrounding society and constituted a separate social group “stronger than a community” according to Vladimir Lazaris. “Their bodies are still fettered, but their souls are free.” Many refuseniks were dismissed from their places of work as soon as they applied for exit permits, and for some the sole source of income was small monetary contributions they received from abroad. They lived under the constant threat of being charged with “parasitism.” One such instance is that of Josif Begun who was employed as an economist in a Soviet research institute. In 1972, he applied for an exit permit and was subsequently dismissed. His attempt to persuade the Soviet authorities to recognize his work as a Hebrew instructor as a legitimate source of income failed in May 1977, and he was tried under the charge of parasitism and sentenced to two years of exile. Though his sentence, based on the charge of parasitism, was exceptionally severe in 1977, it served as a warning to other refuseniks, and the harsh attitude of the Soviet regime toward them rendered them the most active element within Soviet Jewry, and their voices were often heard abroad.

In January 1977 there were 2,001 refuseniks in the Soviet Union, some of whom had been waiting for exit permits for three or more years. Between January and September 430 refuseniks received exit permits and subsequently left the Soviet Union. However, during that same period the Soviet authorities turned down an additional 694 requests. Consequently in October 1977, there were 2,265 refuseniks, an increase of 13 percent as compared to the beginning of that year. The activities of the refuseniks centered on (a) the struggle for the right to emigrate and (b) cultural activity outside the framework of Soviet institutions (see above).

As part of the struggle for the right to emigrate, some 30 Jews demonstrated in October 1976 in front of the offices of the Supreme Soviet, and a delegation of the demonstrators was received by the minister of internal affairs who promised to reexamine their cases. On Feb. 21, 1977, 62 refuseniks staged a sit-in at the Supreme Soviet and in June six young Jews declared a hunger strike. During that period, seven Jews of Kiev publicly renounced their Soviet citizenship as a sign of protest against the emigration policy of the Soviet Union. In 1977, as in previous years, refuseniks appealed to countless international conferences, foreign governments, and world public opinion, calling for unremitting action for the cause of the right of Jews to leave the Soviet Union.

[Mordechai Altschuler]

The 1980s

DEMOGRAPHY. In the 1980s the annual decrease in the population among Soviet Jewry reached 2.2 percent. The Soviet census of January 1989 recorded 1,450,511 people who identified themselves as Jews; this was a decline of 19.9 percent from the figure of 1,810,876 in 1979. The Jewish population declined sharply in all of the union republics (see Table: Jewish Population Changes in the U.S.S.R., by Republic, 1959–1991, above, p. 555); in Moscow from 223,100 to 175,700. Overall, the percentage of Jews in the Soviet population declined from 0.69

percent in 1979 to 0.5 percent in 1989, when 41.5 percent of Soviet Jewry were residents of Moscow, Leningrad, or the capitals of the union republics.

Soviet Jewry represents an extreme example of an aging, demographically dying, assimilating community. In 1988–89 the birthrate of Jewish mothers was 7.3 per 1,000 Jews (6.3 in the R.S.F.S.R.). The birthrate in homogenous Jewish families (i.e., where both parents were Jewish) was 4.3 per 1,000 Jews (2.6 in the R.S.F.S.R.). Fertility of Jewish women in the U.S.S.R. did not exceed 1.6 children per woman. At the same time mortality was high, with 21.3 deaths per 1,000 Jews (the corresponding figure for the R.S.F.S.R. was 24.4).

The median age of Jews in the U.S.S.R. in 1989 was 49.7 and in Russia it was 52.3. (For comparison, in 1990 the median age of Jews in Israel was 28.4, of Jews in the United States 37.3, and of the total Soviet population in 1989 30.7.) The percentage of aged people (60+) among the Jews of Moscow in 1989 was 39.6 percent, while that of aged people among the general population in the city was 18.2 percent. Children up to age 5 made up only 3 percent of the Jewish population of Moscow while the same age group made up 8 percent of the general population.

The percentage of mixed marriages among all marriages involving Soviet Jews in 1988 was 58.3 percent for Jewish men and 47.6 percent for Jewish women. The same indicators for the RSFSR were 73.2 and 62.8 percent, respectively. The vast majority of children of mixed marriage who were under 18 were not registered as Jews in the 1979 census. In the U.S.S.R. this involved 90.9 percent of those children with a Jewish father and a non-Jewish mother; 95.3 percent of the children with a Jewish mother and a non-Jewish father (for Russia the percentages were 93.9 and 95.5, respectively). The mass emigration of the 1970s (see “Emigration and *Aliyah*”) only accelerated the already advanced process of the erosion of Soviet Jewry. (See Tables above.)

The smaller subethnic Jewish groups largely maintained their knowledge of their native languages. The percentage of Ashkenazi Jews with a knowledge of Yiddish may well be even lower than the official 11.1 percent since the declaration by a Soviet Jew of a Jewish language as his native tongue is often a demonstration of national feelings rather than an indication of a real command of the language.

With the breakup of the U.S.S.R. toward the end of 1991, Soviet Jewry as such disappeared. At the end of that year the number of Jews living in territory of the former Soviet Union was estimated as 990,000, of whom the majority (430,000) lived in Russia. Russian Jewry now no longer constitutes the third largest Jewish community in the world. As of 1992 over half a million Russian-speaking Jews lived in Israel.

THE LAST YEARS OF STAGNATION, 1983–1986. *Official Policy*. A sharp change in Soviet emigration policy in the period 1979–1981 led to the formation of a large group of refuseniks (see above), i.e., people who were refused permission to emigrate. Reasons given for refusal were often far-fetched

pretexts of local OVIR (visa) offices caught between a flood of requests for exit visas and a sharply reduced quota of permits allowed by Moscow. No judicial procedure existed for appealing OVIR decisions. In the early 1980s, the number of refuseniks in the whole country numbered tens of thousands. Besides many had their emigration documents rejected even for consideration by OVIR while others who had an invitation from Israel did not submit their applications due to their conviction that such an attempt would be useless. A whole generation of Soviet Jews grew up “in refusal,” including thousands of highly qualified professionals whose careers were irretrievably harmed when they were banned from working in their fields after applying to emigrate. By 1987 refuseniks had become a dominant factor in Soviet Jewish life, a major force for unity among international Jewish organizations, and an important element in Soviet-Western relations.

The Soviet authorities proclaimed that “neither anti-semitism nor Zionism” would be allowed, suggesting that Soviet Jews forget about emigration and return to “normal” Soviet life. Sometimes refuseniks were even promised that they would be given back their former posts in return for a written statement that they would abandon any idea of emigrating. In fact, antisemitism did not decrease; discrimination was manifested against the Jews, as a potentially disloyal part of the population, in regard to acceptance into institutions of higher education, job promotion, and the awarding of prestigious positions, in awarding scientific degrees, etc. In 1980–1981, 3 percent of Soviet Jews had been studying in institutions of higher education; in 1984–1985 the percentage dropped to 2.6. Between 1982 and 1987, the number of Jews among scientific workers declined from 63,000 to 58,600 and among those with Candidate of Science degrees from 25,800 to 25,200. In the 1980s, in general, there was a relative decline of the status of Jews in Soviet society.

At the same time, a campaign gathered momentum against everything connected with Israel, Zionism, Jewish history, Judaism, and Jewish culture. On April 21, 1983, the Soviet Public Anti-Zionist Committee, an ostensibly voluntary organization headed by General David Dragunskii, was established. A group of privileged writers who made a specialty of “anti-Zionism” emerged at this time; they included: Iurii Ivanov, Lev Korneev, Caesar Solodar, Lionel Dadiani, Evgenii Evseev, and Vladimir Begun. Their works were circulated throughout the country in hundred of thousands of copies. An overtly racist approach characterized the “anti-Zionist” ideology. Soon there was a revival of the notorious myths and libels propagated in the past against the Jews by the Czarist Black Hundreds and by Nazi propaganda: the myth of the “Judeo-Masonic conspiracy,” *The Protocols of the Elders of Zion*, and even the blood libel.

Public criticism of this “anti-Zionism” was not permitted. Thus, the attempt of the Leningrad philologist Ivan Martynov to sue Korneev for libel was turned into judicial persecution of Martynov himself. In the summer of 1986 the book *On the Class Essence of Zionism*, which purported to be a historio-

graphic survey of “anti-Zionist” literature in the previous two decades, was published. Its author, Alexander Romanenko, denied the very existence of the Jewish nation, of any Jewish language (either Hebrew or Yiddish), and of Jewish culture. He justified the prerevolutionary pogroms as a manifestation of the class struggle against the Jewish bourgeoisie. The Zionists were also blamed for the Holocaust! According to Romanenko, the Zionists were more dangerous than the Nazis since they had succeeded in defeating the latter and then proceeded, by blackmail and threats, in totally bankrupting the Federal Republic of Germany by forcing it to pay reparations to Israel. This fantastic ideology was regularly foisted off on the Soviet population at Party and trade union meetings, on television, and in the press.

The Jews were also being assigned a demonic role in Russian history, for example, in the vulgar historical novels of Valentin Pikul. A special place in this demonology was reserved for Leon Trotsky, who was depicted (for example, in the novel *Petrograd-Brest* [-Litovsk] by I. Shamiakin) as a symbol of Russia's enemies and described in terms of an anti-Jewish caricature.

One of the aims of the anti-Zionist campaign was to discredit the idea of emigration and to intimidate activists in the growing Jewish national movement in the country. However, despite the jamming of foreign radio stations, a relatively realistic picture of life beyond the “iron curtain” reached Soviet Jews via letters from the thousands of relatives and friends who had already emigrated. This encouraged them to continue the struggle to emigrate.

In an effort to put an end to the *refusenik* phenomenon, the authorities initially allowed some of the leaders to emigrate. This tactic backfired by increasing the number of activists. Then repression became the order of the day. Special KGB groups were assigned to monitor Jewish activity. They bugged telephone conversations, opened letters, infiltrated informers among the *refuseniks*, intimidated activists and their families, arranged for some people to be fired from their jobs and for others to be beaten up, and so on. All forms of independent Jewish cultural and public activity were persecuted, including the teaching of Hebrew, the publishing of *samizdat* journals, the organization of kindergartens, the performance of *purimshpils* (often satirical Purim plays) in private apartments, or public meetings to commemorate the Holocaust. There were frequent searches of apartments and jailings of activists on fabricated charges of anti-Soviet activity and propaganda, slander of the Soviet state, and on trumped-up criminal charges, such as possession of narcotics. Sometimes the people arrested were beaten. Occasionally, activists were placed in special psychiatric hospitals. Yet there was a limit to the persecution: mass arrests were not resorted to. The number of Jewish activists imprisoned at any one time between 1983 and 1986 amounted to about 15, probably representing the quota decided upon by the central authorities. It appeared that the government wanted to maintain a certain low level of Jewish activity with an eye toward negotiations with the West while the KGB was

interested in the continuity of such activity in order to justify the existence of their “anti-Zionist” cadres.

In response to the continued accusations from abroad that they were persecuting Jewish culture in the U.S.S.R., the Soviet authorities did sponsor some Jewish cultural enterprises of their choice. A number of these took place far from the large Jewish population centers, in the so-called Jewish autonomous Oblast (province) of Birobidzhan, the 50th anniversary of which was celebrated in 1984. In 1982 a Yiddish textbook was published there in a minuscule print run and permission was granted for an optional course in Yiddish at one of the schools in the province. At the same time, several propaganda booklets were published describing the alleged flourishing of Jewish culture in Birobidzhan. In Lithuania several prose works of Grigorii Kanovich were published on Jewish themes. In 1984 a Russian-Jewish [Yiddish] dictionary was published in Moscow and an evening celebrating the 125th anniversary of the birth of Shalom Aleichem was held at the Union of Soviet Writers.

In March 1985, General Secretary of the Central Committee of the Communist Party of the Soviet Union Mikhail Gorbachev proclaimed *perestroika*, which originally did not envision any change in official Jewish policy. As late as October 1986 Soviet jails still held 13 Jewish activists, five of whom (Roald Zelichenok, Leonid [Arye] Volvovskii, Evgenii Koifman, Vladimir Lifshits, and Aleksei Magarik) were arrested under Gorbachev. However, to succeed in their intended reforms, the Soviet leadership came to realize that they desperately needed foreign policy successes and economic aid from the West, which increasingly were seen to depend on a liberalization of their policy toward Soviet Jewry.

The Refusenik Community. From the early 1980s, Soviet Jews found themselves in a hopeless situation. Their social status continued to decline; antisemitism prevented them from fully assimilating; almost all expressions of Jewish life were banned; and at the same time permission to emigrate was denied. The response to this situation was the growth of illegal, independent Jewish cultural activity, which was almost completely centered around the *refuseniks*. The first stirrings of public and cultural activity were felt among the *aliyah* activists in the 1970s. However, only the long period of hiatus in emigration allowed the Jewish movement the opportunity to attain an unprecedented breadth, stability, and continuity of leadership. Often, the veteran *refuseniks* best known in the West, particularly those who had been imprisoned, ceased playing a leading role but became symbols of the struggle and spokesmen of the movement to the foreign media. New less-known enthusiasts assumed an active role in the organizational, political, and cultural spheres. Veteran leaders, who returned to an active role after being released from prison, could be rearrested. Thus, in November 1982, Iosif Begun was imprisoned for the third time.

During their years of “refusal,” activists gained experience and knowledge, proved their mettle in confrontations

with the authorities, and established contacts with comrades in other communities. They also amassed an unprecedented amount of Jewish cultural material such as books, textbooks, and religious objects. Interested Jews were able to attend underground classes in Hebrew, Jewish culture, history, and religion, and to enjoy Jewish dramatic productions in private homes. There were activities for children as well. Channels were established for exchanges of information with Israel and the organizations for the rights of Soviet Jewry operating in the West. Thus, any persecution of refuseniks soon became known throughout the world. Those who were arrested (and their families) gained effective legal, medical, and material aid, as well as moral support. Jailed *aliyah* activists, referred to as “prisoners of Zion,” knew that they were not abandoned; this often gave them the strength to avoid mental breakdowns and public recantations. Their sense of community helped refuseniks to compensate for the infringement of their rights and their pariah status.

Hebrew teaching occupied a key role in the Jewish movement. Moscow was the center of Hebrew instruction where long-range programs were elaborated, accelerated teacher training organized for teachers from other locations, and teaching materials reproduced and disseminated. Iulii Kosharovskii was one of the main organizers of the teaching network. Teachers of Hebrew, who received special support for their efforts from Israel, became a main target for persecution; they constituted about half the prisoners of Zion. In Moscow alone, the Hebrew teachers Alexander Kholmianskii, Iulii Edelshtein, Leonid Volvovskii, and Aleksei Magarik were arrested between 1984 and 1986.

In Leningrad, starting in late 1979, the center for the Jewish movement was the historical and cultural seminars headed by Grigorii Kanovich (not to be confused with the Lithuanian writer) and Lev Utevskaia. In an attempt to halt the seminars, the authorities gave permission for both leaders to emigrate. At the same time a series of roundups of participants in the seminars took place. Activist Evgenii Lein was arrested in May 1981. After a year-long struggle to maintain the seminars, which had been open to all interested parties, the seminars succumbed. However, a group made up of amateur Jewish historians survived for five more years. Works by members of this group were published in *Leningradskii evreiskii almanakh* (see “The Jewish Press”). An attempt in 1985 to renew popular lectures on Jewish culture in Leningrad ended with the arrest of the organizers, Roald Zelichenok and Vladimir Lifshits.

In contrast to Leningrad, where Jewish history was practically exclusively the domain of refuseniks, Moscow was the site of some permitted Jewish scholarship headed by the professional ethnographers Mikhail Chlenov and Igor Krupnik. In January 1982 there was an announcement of the formation, in conjunction with the journal *Sovetish Heymland*, of a Jewish Historical and Ethnographic Commission. The members of the commission hoped to be able to publish their research without interference. However, the ban on almost everything Jewish often compelled the scholars to restrict themselves to

peripheral topics of little social relevance, such as the derivation of Jewish family names and descriptions of small subethnic Jewish groups in the Soviet Union.

The celebration of traditional Jewish holidays and Israel's Independence Day became a widespread expression of national solidarity. In a number of cities, Purim was the occasion for the private performance of *purimshpils*, where sharp criticism of the authorities was often presented in disguised form. It is not surprising that the latter activity was particularly subject to government repression.

Another indicator of the growth of national consciousness among Soviet Jews was the public meetings commemorating the mass murder of Jews during World War II. Such meetings were held in Riga at Rumbula forest, in Vilnius at Ponari, in Kiev at Babi Yar, and in Leningrad at the Jewish Preobrazhenskii Cemetery.

The 1980s saw an increased interest in Orthodox Judaism, which had been among the most slandered and persecuted of all the religions in the U.S.S.R. In the course of previous decades, Jewish religious education had suffered particularly. There was only a handful of rabbis, *mohalim* (circumcisors), and *shohetim* (ritual slaughterers who provided *kasher* meat) in the whole U.S.S.R. There was no way, either legally or practically, that such knowledgeable Jews could be replaced. Simple Jews who know how to pray were a dying breed. Often Jewish intellectuals who were God-seekers turned to the Russian Orthodox religion due to their lack of familiarity with their own roots.

In the 1980s in Moscow, Leningrad, and subsequently in other places, informal groups of young people who wanted to study Torah and Jewish tradition were established. Some of the participants became *hozrim bi-teshuvah* or “returners to religion.” The original impetus for this religious revival was Zionist activity among the refuseniks, which first brought Jews together and provided them with basic knowledge, particularly of Hebrew, without which a mastery of the tradition is hardly possible. The Jewish religious awakening was made possible materially due to the fact that some of the aid from abroad to refuseniks included religious literature, religious objects, and *kasher* food. In the mid-1980s, there were up to 2,000 newly-observant Orthodox Jews, half of whom resided in Moscow and one fifth in Leningrad. Despite its relatively small core, the religious community had some impact on a broader range of Jews and even led to the conversion to Judaism of some non-Jews, a unique phenomenon in Soviet history. The religious stream within the total Jewish movement among Soviet Jewry was diminished in 1986–1987 with the emigration of a large segment of the newly religious Jews, including their young leadership.

The religious groups were basically divided into Chabad, Agudat Israel, and religious Zionists. In Moscow religious activity originally centered around Vladimir Shakhnovskii, Mikhail Nudler, and Eliahu Essas (Agudat Israel), Mikhail Shnaider and Grigorii Rozenshtein (Chabad), and Vladislav Dasheskii, Pinkhas Polonskii, Mikhail Karaevano, and Khol-

mianskii (the religious Zionists). Leningrad with the religious leaders Itzhak Kogan (Chabad) and Grigorii Vasserman (Agudat Israel) lacked the religious Zionist orientation.

Although the Jewish movement in the 1980s included in its ranks only several thousand people, in the atmosphere of fear that dominated the Soviet Union at that time, it was virtually the only mass opposition movement in the country. It was not exclusively Zionist. Participation in illegal Jewish activity during their years of refusal, however, increased activists' national consciousness and instilled in many the desire to go straight to Israel as soon as they were free to leave. Many activists after their emigration joined Jewish organizations in Israel and the West (especially in the U.S.), and continued to study and teach Jewish history, Hebrew, and the Jewish religion. A number of books written in refusal have now been published (mostly in Israel). Among them are *Ivrit* ("Hebrew") by Leonid Zeilinger; *Sinagoga-razgromlennaia no nepokorennnaia* ("The Synagogue – shattered but unconquered") by Semen Iantovskii (book appeared under the pseudonym of Israel Taiar); *Evrei v Peterburge* (*The Jews of St. Petersburg* [published in Russian and in English]) by Mikhail Beizer; *Delo Dreifusa* ("The Dreyfus Case") by Leonid Praisman; and *Ani Maamin (Ia veriu)* ("I Believe") by Mikhail Shnaider and Grigorii Rozenshtein.

Soviet Jewry and the West. The Soviet Jewry movement would never have become an international issue had it not been for support from abroad. The following factors were involved in the struggle in the West: Israel's interest in mass immigration, which reflected both Zionist ideology and Israel's demographic problem; the desire of Western, especially American, Jewish leaders to rally Diaspora Jewry around a goal of importance for the whole Jewish people; the tendency of the American administration to utilize "human rights" and, particularly, the struggle of Soviet Jews for the right to emigrate, as a basic weapon in its ideological confrontation with Communism.

Special organizations were established in the West for the struggle for Soviet Jewry. These included the National Conference on Soviet Jewry, the Student Struggle for Soviet Jewry, the Union of Councils for Soviet Jewry, in the United States, and in Britain the Committee of 35. The organizing center in Israel was the Liaison Bureau for Soviet Jewry of the Foreign Ministry. The Bureau collected information about Soviet Jews, sent them literature and material aid, organized support from the Jewish and international press, and, on occasion, coordinated international protest campaigns in defense of prisoners of Zion and the right of emigration for Soviet Jews. Most aid from the Bureau was given to those refuseniks, especially teachers of Hebrew, who aspired to *aliyah*. Israel regularly provided up-to-date information about emigration statistics, the level of state antisemitism, persecution of Hebrew, and the suffering of prisoners of Zion to both Jewish and non-Jewish organizations active in the struggle, as well as to political and social figures. Hundreds of foreign tourists who visited Moscow, Leningrad, and other open cities in the U.S.S.R. were in fact voluntary em-

issaries of international Jewish organizations or, sometimes, Israeli citizens with dual nationality sent by the Liaison Bureau, to bring in books, *kasher* food, clothing, and other goods, to provide moral support, to give lectures on Jewish history, to share Sabbaths and holidays with their fellow Jews, and to bring back to the West fresh information, texts of protests and appeals, along with various requests for the refuseniks.

The tourists who made contact with Soviet Jewry were often halted by the authorities, searched, subjected to harassment and intimidation, and expelled from the country before the end of their visit; sometimes they were beaten by KGB agents. The Soviet authorities prevented former Israel president Ephraim Katzir, who was visiting the U.S.S.R. as part of a scientific delegation, from meeting with refuseniks. However, even during the most difficult times, the flow of visitors did not cease.

The Public Council for Soviet Jewry (headed by Avraham Harman) supported by the Israeli government was founded in 1970. In the 1980s, a kind of rival to the council, the Soviet Jewry Education and Information Center (headed by the former refusenik and prisoner of Zion Yosef Mendelevich), was established in affiliation with the American Union of Councils. It favored a strategy of public protest while the more moderate National Conference and the Israeli Liaison Bureau pursued a policy of quiet diplomacy.

Due to the efforts of Jewish organizations, the question of the rights of Soviet Jewry gained exposure in parliamentary discussions and in election campaigns in Western democracies. The issue was increasingly raised during intergovernmental contacts with the Soviet government and in the mid-1980s became a focus of demands made on the Soviet Union. In the American congress speeches were often to be heard about refuseniks and prisoners of Zion such as Anatoly Shcharansky, Iosif Begun, and Ida Nudel. When visiting the U.S.S.R., many senators and congressmen met with Jewish activists. U.S. president Reagan and British prime minister Thatcher spoke out in support of the struggle for Soviet Jewry and the issue was also raised in the European Parliament. The International Association of Lawyers encouraged legal experts to provide aid to persecuted and arrested Jews. The situation of individual Soviet Jews was taken up by professional associations in the West, particularly the international scientists' committee which took up the cause of refusenik scientists, including Victor Brailovskii, Alexander Paritskii, and Yurii Tarnopolskii. In New York mass marches and public meetings, which attracted up to 100,000 people, began in 1982.

The well-known British historian Martin Gilbert visited Moscow and Leningrad in 1983 and interviewed a number of leading refuseniks. Although some of the material he collected was confiscated by customs authorities when he was leaving, one year later he published *The Jews of Hope*, which due to his fresh eyewitness point of view and the author's reputation, had considerable influence in mobilizing public support for Soviet Jewry in English-speaking countries and Israel (where the book appeared in Hebrew).

A key event in the struggle was the Third World Conference for Soviet Jewry held in March 1983. The preceding conferences were held in Brussels in 1971 and 1976. The choice of Jerusalem as the location for the third one signified the central role of Israel in the struggle.

Originally the Israeli government had preferred to remain in the background so that the issue of Soviet Jewry would be seen not as a parochial problem but as a universal issue of the violation of human rights. Not wishing to complicate the already difficult position of Jewish activists in the U.S.S.R., Israel avoided criticizing the Soviet Union on issues unconnected with Jewish concerns. Tourists sent to the U.S.S.R. by the Liaison Bureau were forbidden to say that they were from Israel and told to travel on second passports. Although following these instructions made the visits less dangerous for the emissaries, this practice gave some Soviet Jewish activists the false impression that they were of more concern to their Western brothers than to the Israelis.

The inclusion of the issue of Soviet Jewry in the agenda of the American-Soviet summit conference in Reykjavik in October 1986 was a considerable achievement. The Soviet delegation there was presented with a list, compiled in Israel, of the names, addresses, and dates of refusal of the many members of the Jewish refusenik community in the U.S.S.R.

The continuing struggle harmed the international reputation of the U.S.S.R., especially after it signed the Helsinki Accords on human rights. On the other hand, the Soviet Union did gain from the international furor. It allowed the Soviets to raise the price on its "merchandise" of Jewish hostages, for example allowing them to exchange individual Jews for Soviet spies caught by the West (as it happened with Anatoly Shcharansky in February 1986) and to use the issue of Soviet Jewry – in terms of a possible concession on the Soviet side in return for American concessions – in its negotiations with the U.S. on limiting strategic and nuclear weapons.

PERESTROIKA AND GLASNOST. *Changes in Official Policy and in the Social Status of Soviet Jewry.* The primary goal of the policy of *perestroika* was originally to help the Soviet Union emerge from its economic crisis by allowing a degree of democratization, permitting the holding of small private and cooperative property, the weakening of centralization and Party control in the periphery, and the broad encouragement of initiative on the part of the Soviet population. The latter were to be mobilized by granting them a number of civil rights entailing freedom of speech, public organization, and freedom of cultural life (*glasnost*). Owing to the difficulties of overcoming social inertia and to the opposition of the entrenched bureaucracy, *perestroika* only began to be felt by the public in early 1987. By late 1989 the changes assumed a character unforeseen by the architects of the policy.

Despite the authorities' intentions, *glasnost* was utilized by the peoples of the U.S.S.R. to promote their national aspirations. With the unprecedented burgeoning of national

movements that threatened the Soviet Union itself, the issue of the right of Soviet Jews to free emigration and national cultural expression – which had been a major concern of Western public opinion in the 1980s – was no longer so major. At this time of domestic turmoil the Soviet government decided to make concessions on Soviet Jews within the framework of the broadening of civil rights and in exchange for political and economic support from the West.

In January 1987 a new government decree came into effect that regulated entrance into and exit from the U.S.S.R. The decree granted the right to emigrate only for family reunification with close relatives abroad. Still it was an advance, since Soviet emigration procedures were now embodied in law rather than secret government directives. The number of exit visas granted increased each month and in May 1987 began accepting applications to emigrate from people who did not have close relatives abroad. The same year saw applications also accepted for reunification with relatives in countries other than Israel. This change in policy raised the problem of "dropouts" or those Jewish emigrants who, from the Israeli perspective, denied their tie to the Jewish homeland and chose other destinations.

An indication of a new policy toward emigration was the uncharacteristically mild reaction to the March 1987 demonstration of seven refuseniks in Leningrad. As a result of the demonstration one participant received permission to emigrate while a photograph of the whole group appeared in a local Leningrad newspaper.

Early in the same year several Jewish activists were released from prison before serving their full terms.

The curtailment of the Party's anti-Zionist campaign, a major turnabout, was first signaled by criticism in the journal *Voprosy istorii KPSS* (No. 1, 1987) of Romanenko's *On the Class Essence of Zionism* (see above).

The end came to the ban on importation of Jewish religious literature, Hebrew textbooks, and books on Judaism. The long-standing Soviet domestic policy of proscribing national cultural activity outside the borders of officially designated national regions was rejected in July 1988 when the 19th CPSU Congress passed a resolution granting ethnic groups the right to satisfy their cultural and religious needs throughout the Soviet Union. This change of policy was particularly important for the Jews, almost all of whom live outside their supposed national region, the so-called Jewish Autonomous Oblast in Birobidzhan. One consequence of this new policy was the appearance of many independent Jewish culture associations in all parts of the country. With the simultaneous removal of the ban on discussion in the media of all issues relating to Jews, the number of publications and broadcasts on Jewish topics increased astronomically. The majority of them dealt with domestic concerns rather than the previously common condemnations of Israel. Furthermore, events in the Middle East began to be treated by Soviet journalists in a more objective manner, with Soviet coverage occasionally appearing to be more pro-Israeli than that in the West.

In 1988–1989 almost all remaining veteran *refuseniks* were given permission to emigrate and the emigration process itself was considerably simplified. The authorities practically ceased persecuting, or even condemning, those who wished to emigrate. Former Soviet citizens living in Israel and the United States, including former Jewish activists, were allowed the possibility of visiting their former homeland without hindrance. Previously minuscule, permitted tourism of Soviet Jews abroad, including to Israel, began to develop. The 1991 law on entrance to and exit from the U.S.S.R. not only guaranteed the right of all Soviet citizens to travel abroad but also allowed people to emigrate permanently without losing their Soviet passports (as was previously the case with emigrants who “repatriated” to Israel). It also specified timetables and procedures for handling emigration documents so that Soviet emigration legislation finally corresponded with international norms.

Cultural ties between the Soviet Union and Israel began to flourish and, soon thereafter, economic cooperation as well. A series of bilateral diplomatic contacts led in December 1990 to the exchange of consular delegations and one year later to the establishment of full diplomatic relations. The Soviet ambassador to Israel, Alexander Bovin, was the last emissary named by Gorbachev before the formal liquidation of the U.S.S.R. and he remained as the Russian ambassador.

Changes occurred also in the social status and employment profile of Soviet Jewry. Secret restrictions on the acceptance of Jews into institutions of higher education, graduate study, prestigious work, and so on were withdrawn. Jews increasingly appeared among Soviet scientists and cultural figures visiting the West and Israel. Although their numbers hardly increased in the top echelons of Soviet power – the Central Committee of the Communist Party, the government, the army high command, and the diplomatic corps – the number of Jews in secondary positions rose, for example, among government advisers.

There was a perceptible increase in the activity of Jews in social and political life, where a majority of such activists belonged to the liberal democratic forces. Fifteen Jews were elected to the national congress of People’s Deputies of the U.S.S.R. in 1989. The following year 15 Jews passed the first round of elections in the RSFSR, and 9 of them actually became deputies to the Russian Congress of People’s Deputies. Some Jews, especially in the Russian hinterland, were elected to local city and all-Russian government councils. Jews actively participated in the fights for the general democratization of the Soviet Union, the rights of national minorities, liberalization of the economy, and protection of the environment. There were many Jews among the radically oriented journalists. However, in rare cases, Jews such as the secretary of the board of the Writers’ Union of Russia, Anatolii Salutskii, supported Russian nationalist trends.

Jewish Life. During the period of *glasnost*, Jewish social and cultural life came to involve many people throughout Russia

and the other Soviet republics. This activity was influenced both by the increase of national consciousness among other peoples in the U.S.S.R. and by the growing contacts between Soviet Jews and Israel.

On May 21–22, 1989, a meeting of 120 people representing approximately 50 Jewish social and cultural organizations from 34 Soviet cities took place in Riga. The final document adopted by participants expressed their determination to defend the rights of Soviet Jews to free emigration to Israel and to cultural autonomy within the Soviet Union. The delegates called for the establishment of diplomatic relations between the U.S.S.R. and Israel and the repeal of UN Resolution 3379 which equated Zionism with racism. In the same year 490 delegates took part in a congress of Lithuanian Jews, which elected a Council of Jewish Communities of the republic.

A congress of Jewish community organizations from all over the country took place in Moscow in December 1989. Delegates from approximately 200 bodies and many guests from abroad, including the chairman of the Jewish Agency, Simcha Dinitz, were present. A national umbrella organization – the Council of Jewish Culture Associations of the U.S.S.R. (Vaad) – was established with three co-chairmen, Mikhail Chlenov (Moscow), Yosef Zisels (Chernovtsy), and Samuil Zilberg (Riga). After the dissolution of the U.S.S.R., a Russian Vaad was established at a congress in Nizhni Novgorod in April 1992.

Official, i.e., state-promoted, Jewish figures who, before *perestroika*, had exercised a legal monopoly in representing Soviet Jewry found themselves forced to compete with independent Jewish organizations. One example of the ill-fated effort by these court Jews to sustain their influence took place in early 1989 when a group of people close to the editor of *Sovetish Heymland* founded the short-lived Association of Activists and Friends of Jewish Culture.

Both the leaders of Vaad and the “official” Jewish spokesmen became involved in efforts to resolve the Middle East conflict. With this aim in April 1990 Mikhail Chlenov met with PLO executive committee member, Abu Mazen, while in July former members of the Soviet Public Anti-Zionist Committee announced the establishment of a Peace Today committee (ostensibly on the model of the Israeli Peace Now organization), with its stated goal of facilitating Jewish-Arab dialogue. The second congress of Vaad in January 1991 condemned contacts between the Soviet government and the PLO.

During the August 1991 crisis, Vaad chairman Chlenov did not openly criticize the coup leaders but restricted himself to an expression of concern about the future of Jewish organizations, the possible curtailment of emigration, and the danger of antisemitism.

In contrast to Vaad, the opposing wing of Jewish public life is composed of those who consider any Jewish activity in the country either unnecessary or actually harmful unless it is directed toward preparing Soviet Jewry for immigration to Israel. In August 1989 the Hebrew teacher Lev Gorodetskii announced the founding in Moscow of the Zionist Organization

in the Soviet Union, which soon opened branches in Leningrad, Riga, Vilnius, Kiev, and Kharkov. Many Zionist youths groups, such as Ha-Shomer ha-Za'ir, Dror, Betar, Maccabi, and Rabim, also began functioning.

A significant feature in Jewish life was the commemoration of the Jewish victims of the Holocaust on the territory of the Soviet Union. This involved groups of Jewish veterans of World War II and concentration camp survivors. In Riga, Vilnius, Leningrad, Minsk, and many other sites, on the anniversaries of mass executions of Jews there, and even in cities which the Nazis did not occupy, increasing numbers of Soviet Jews had been gathering for memorial meetings on Holocaust and Heroism Day (the anniversary of the Warsaw Ghetto uprising). In September 1989 official permission was granted for the first time for such a meeting at *Babi Yar, organized by the Kiev Jewish community. Among the participants were local Party and government officials, leaders of the Ukrainian national movement, and the Church. Finally, after many years, an inscription was placed on the monument indicating, in Russian and in Yiddish, that Jews were the main victims at Babi Yar.

By late 1989, there were almost 200 Jewish associations, clubs, and culture centers in, among other places: Tallinn, Riga, Vilnius, Leningrad, Cheliabinsk, Tashkent, Donetsk, Baku, Kharkov, Lvov, Chernovtsy, Kiev, Kishinev, Odessa, Minsk, Bobruisk, and Krasnoyarsk. Kiev in late 1989 had 12 different Jewish organizations, including cultural, religious, and even musical groups. In Kishinev the Menora cooperative was established in April 1989; there hundreds of people have studied Hebrew and the fundamentals of Judaism. Tbilisi even granted official recognition to the Aviv association whose goal was to prepare Jews for *aliyah*. Riga Jews have (since July 1988) a culture association, a Yiddish school, and a society for Latvian-Israeli friendship while Vilnius has its own culture association and branches of Betar, B'nai B'rith, and Maccabi.

The greatest number of Jewish culture organizations were concentrated in Moscow. These included: *Iggud morim* (the Association of Teachers of Hebrew, founded 1988), the Association for Friendship and Cultural Ties with Israel (abbreviated ODISKI, summer 1988), the Moscow Jewish Culture and Education Association (МЕКРО, September 1987), the Jewish Culture Association, the Geshet youth association, and the Youth Center for Studying and Developing Jewish Culture (abbreviated MTS-IRK, 1988). Early 1988 saw the opening of the Solomon Mikhoels Jewish Culture Center and the Shalom Jewish Culture Center.

Efforts were undertaken to encourage the teaching and study of Jewish studies in the Soviet Union and, after 1991, in its successor, the Commonwealth of Independent States (CIS). Seminars and conferences on Jewish history with the participation of foreign scholars were inaugurated in Moscow and elsewhere.

Jewish religious life ceased to be persecuted. In February 1989, at the initiative of the Israeli rabbi and scholar Adin Steinsaltz, a yeshivah, under the official name of the Center

for the Study of Judaism, was established with the Academy of Sciences of the U.S.S.R. Other yeshivot and Torah-study groups sprang up in a number of cities. Among the teachers were a number of Lubavitch Hasidim from Israel, who had formerly been Soviet citizens.

Owing to the lack of trained rabbis, except in Moscow and Leningrad/St. Petersburg, some American rabbis began serving as the spiritual leaders of the main republic synagogues. The national-religious stream in Judaism was represented by Maḥanaim (Hebrew for "two camps"), which had centers in Moscow and Jerusalem. The Bnei Akiva Orthodox Jewish youth movement became active in several localities, and in April 1990, for the first time, a progressive (Reform) group, Ineni (Hebrew *Hineni* or "here I am") was registered in Moscow. Camp Ramah, of the Conservative movement, also began to operate. In 1990–1991 Jewish religious holidays were celebrated in public places, including the Palace of Congresses in the Kremlin! Starting in 1992, Russian television began broadcasting programs on basic tenets of Judaism. A number of synagogues confiscated under Stalin were returned to their communities. Nonetheless, it would still be premature to speak of a real religious revival. The majority of newly-observant Jews have been emigrating and the Jewish communities do not have the means to either refurbish or maintain their recently regained synagogues.

In connection with the emigration of many nationally oriented Jews, by early 1990 there had been a decline of interest in Jewish culture in the U.S.S.R. A number of Jewish periodicals had ceased appearing and fewer people attended lectures on Jewish history. Interest not only waned in the recently established libraries of the culture centers and synagogues, but those books in demand were increasingly limited to Hebrew study guides and material on *aliyah* and absorption in Israel. The growth in the number of Jewish organizations was accompanied by a decrease in the membership of each of them. At the same time the Jewish elite intelligentsia remained uninvolved in Jewish life.

Israeli and Western Jewish organizations initiated and supported local Jewish institutions and associations. Consequently, the period of amateurs passed – to be replaced by the growth of a significant group of professional Jewish activists directly or indirectly subsidized from abroad. In this environment of support from abroad organizations proliferated, sometimes duplicating existing ones and occasionally being even basically fictitious. In Moscow alone, in 1992 there were several hundred groups. Soviet Jewry, which lacked the experience of autonomous and self-supporting community life, was not able to support its own institutions on the basis of voluntary contributions. This factor lent a somewhat unstable character to the considerable activity that was indeed taking place.

At the same time, some Jewish organizations in Russia and the republics, first of all Vaad, were attempting to chart an independent course while simultaneously trying to gain influence in the international Jewish bodies which provide

some of their financing. In May 1991 Vaad became a member of the World Jewish Congress and also had representatives at the Memorial Foundation for Jewish Culture based in New York. In June 1992 at the 32nd World Zionist Congress in Jerusalem, a Vaad delegation and the Zionist Federation of Russia demanded to be represented in all key bodies of the World Zionist Organization, which did not agree. There was also a conflict between Vaad and the Jewish Agency since the latter's goal for Soviet Jewry is maximum *aliyah*; Vaad was mainly interested in Jewish revival in Russia and would also have liked Jews who emigrate to be viewed as part of a Russian-Jewish cultural community rather than have them seen only as part of their new host communities, e.g., Israel and American Jewry.

EMIGRATION AND ALIYAH. The number of emigrants fell from 51,300 in 1979 to 1,320 in 1983. Then until 1986 the annual number of exit visas granted hovered around 1,000. Already in the banner year 1979 it was obvious that approximately two thirds of the emigrants preferred the United States to Israel as their destination. America automatically granted them the status of refugees persecuted on ethnic or religious grounds. The greater part of those who went directly to the U.S. without trying Israel came from the more assimilated regions of the RSFSR and the Ukraine; a small proportion came from the territories annexed by the Soviet Union during World War II and from non-Ashkenazi Jewish communities. Between 1983 and 1986 the proportion of those who went to the U.S. rather than Israel fluctuated between 59 and 78 percent. This situation was viewed with alarm by those Jewish activists within the Soviet Union who had fought for emigration under the banner of "repatriation" to Israel. The refusenik circles in Moscow and Leningrad then succeeded in somewhat lowering these two cities' proportion of "dropouts," as they were called by Israelis and Israel-oriented activists, in contrast to other centers of assimilation where pressure to consider *aliyah* was less effective.

In 1987 the number of Soviet Jews emigrating was nine times that of the previous year. In 1988 almost 17,000 Soviet Jews took advantage of the increased opportunity to emigrate directly to the U.S., Canada, Australia, and elsewhere rather than Israel.

Processes that increased under *perestroika*, such as the lack of basic commodities, environmental dangers, and the increase of overt antisemitism, encouraged almost everyone to consider emigration. The fact that the gates of emigration were open, combined with the fear that they might close again at any time, moved thousands of Jews from all over the country to leave. The number who emigrated between 1988 and 1990 rose dramatically. The vast majority chose to make their new homes elsewhere than in Israel. In this situation Israel demanded that those Jews who were leaving the Soviet Union on Israeli invitations go only to Israel and that the American government cease granting the status of refugees to Jews who were leaving the U.S.S.R. under the status of repatriates to

Israel. After long negotiations on this issue, in October 1989 the American government introduced a quota on immigrants from the U.S.S.R. and ceased automatically granting refugee status to Israeli invitation holders. One result was the closing of the Italian transit camp at Ladispoli, the way station to the U.S. of a large number of Jews from the U.S.S.R. Another was the fundamental redirection of Soviet Jewish emigration. A more objective picture of Israel in the Soviet media and enthusiastic reports about Israel from Soviet tourists who visited that country also led to a sharp increase in the number of Jews emigrating to Israel. In 1990 over 185,000 Soviet Jewish emigrants went to Israel, establishing a record annual rate for immigration to Israel from a single country.

In late 1989 the rate of emigration had been limited by the capacity of Soviet OVIR offices, customs, and transportation facilities and by the rate of dispatch of visas from Israel. Bucharest and Budapest served as transit points. By the summer of 1990, the pressure somewhat declined as the process of sending Israeli visas was speeded up and additional routes to Israel were established via Poland, Czechoslovakia, Finland, and other European countries. These emergency measures considerably increased the flow despite attempts by the Palestine Liberation Organization to sabotage the Hungarian and Polish airlines and the refusal of the Soviet Union to allow direct flights to Israel. However, this last obstacle was removed with the normalization of diplomatic relations between Israel and the U.S.S.R. Direct flights were then inaugurated from Moscow, Leningrad, and some republic capitals to Israel.

In 1991–1992 word of the difficulties of absorption into Israeli life and the growing percentage of non-Jews included in the Jewish emigration as parts of mixed families once again turned a not insignificant proportion of the emigration toward the U.S., Germany, and other countries.

Among the immigrants to Israel, the median age increased annually while the number of children per family decreased. The percentage of non-Jews also increased. These features reflect demographic processes in the country of emigration. Serious problems in the absorption of these immigrants in Israel stem from two basic problems: the gap between their professional profiles and the needs of the Israel economy; the lack of Jewish traditions and knowledge among most of the immigrants.

[Michael Beizer]

In the Russian Federation

Russian Jewry faced a new reality after the breakup of the U.S.S.R. at the end of 1991 and the creation of the Russian Federation, where most of the Jews who remained in the former Soviet Union after the years of mass emigration would continue to live. From the outset, the policy of the Russian government became even more liberal. Direct flights were begun from Moscow and St. Petersburg (the former Leningrad) to Israel. The Russian government even agreed to allow the Jewish Agency to operate in the Soviet Union. In 1992 the vice president of Russia, Alexander Rutskoi, the chairman of the Russian parliament, Ruslan Khasbulatov, and former

president of the Soviet Union, Mikhail Gorbachev, all visited Israel.

The 1993–94 period in Russia was characterized by a protracted economic crisis, rampant inflation, decreasing living standards, rising crime rate and political instability. The growing confrontation between the presidency and the conservative legislature led in October 1993 to President Yeltsin's order to dissolve parliament. The armed rebellion by supporters of the parliament was suppressed by forces loyal to the president; about 150 people were killed in the clashes. In the wake of the Parliament insurrection, 15 conservative and radical-right press organs were temporarily suspended by Yeltsin's order.

The parliamentary elections which were held in December 1993 unexpectedly brought an impressive victory to V. Zhirinovsky's Liberal Democratic Party of Russia. In 1991, Zhirinovsky, an aggressive nationalist and chauvinist, who had not been conspicuous before, obtained several million votes and finished third in the presidential election in which Yeltsin triumphed. In 1993 his LDPR captured the second-largest number of seats in the Duma, the lower house. The other big faction in the Duma comprised the Communists and the pro-Communist Agrarian Party. The victory of the hardliners marked a turn to a more conservative approach in government policy, both domestic and foreign.

In December 1994 Russian troops launched an offensive against rebel forces in the breakaway autonomous republic of Chechnya, in the northern Caucasus.

RELATIONS BETWEEN RUSSIA AND ISRAEL. After the dissolution of the U.S.S.R., Russia succeeded the Soviet Union in many matters concerning the Middle East. The former embassy of the U.S.S.R. in Israel, with Alexandr Bovin as ambassador, became the embassy of the Russian Federation.

Normal relations continued between the two countries during the 1992–93 period. Russian authorities did not hinder activities of Israeli organizations, nor of the Jewish Agency in Russia. Economic and scientific cooperation developed between Russia and Israel. Israeli Aircraft Industries and the Aerospace Design Office of Russia launched the joint project of the Galaxy plane. In December 1994, the first meeting of the Joint Russian-Israeli Commission on Scientific and Technical Cooperation took place in Moscow; a number of other joint projects were discussed, e.g., in such areas as telecommunication systems, medical technology, and environment protection.

In April 1994, Israel Prime Minister Yizhak Rabin visited Moscow officially, and in the following years relations between the two countries remained friendly, with Prime Minister Ehud Barak visiting Moscow in 2000 and President Vladimir Putin visiting Israel in 2005. With Russia embroiled in largely Muslim Chechnya, its standing in the Arab world declined and it found itself aligned with Israel in the war against Arab terrorism. At the same time, Russian missile sales to Syria and aid to Iran's nuclear program were sources of friction between the two countries. Not insignificant in the

close relations between the two countries was the existence of a kind of Russian diaspora of a million Russian Jews in Israel. Israeli exports to the Russian Federation were \$319 million in 2004 while imports stood at \$688 million (two thirds of this was in diamonds).

DEMOGRAPHY. The mass emigration begun in 1989 continued throughout the 1990s, only tailing off in 2002. Estimates based on the last three census returns for the area of the Russian Federation (see Tolts, 2004) show a decline in the "core" (self-declared) Jewish population from 570,000 in 1989 to 409,000 in 1994, and 254,000 in 2002. The figure further dropped to around 243,000 in 2004 (out of a total 395,000 for the former Soviet Union as a whole). In 2002, about half lived in the provinces, a third in Moscow, and a sixth in St. Petersburg. The overwhelming majority of Jews emigrating from the Russian Federation, as well as from the former Soviet Union as a whole, arrived in Israel, though the proportion of actual Jews among Russian emigrants to Israel dropped from 82 percent in 1992 to 43 percent in 2002, largely reflecting mixed marriages. By 2004 about half the "core" Jewish population of the former Soviet Union was living in Israel, a quarter in the FSU, and a quarter in other countries, mostly the United States and Germany.

THE REVIVAL OF JEWISH LIFE. For the Jews who remained behind, in the Russian Federation as well as in the former Soviet Union as a whole, the post-Communist period was one of organizational growth and diversification of Jewish life. The conception of Jewish life broadened; in a legal form, it started in 1989–91 as a cluster of "Jewish Culture Associations" and "Societies for Jewish Culture" in various cities throughout the U.S.S.R.; their aim was limited to the study and preservation of Jewish culture and history. By 1993–94 the network of the primary Jewish organizations in Russia included such bodies as: religious communities, social relief organizations, educational institutes, unions of Jewish war veterans and of the survivors of the Holocaust, research groups, Zionist organizations, branches of the Maccabi organizations, etc. There were, for example, 60 Jewish organizations in St. Petersburg alone in 1994, including: three religious communities – mainstream Orthodox, Chabad and Reform; the Jewish Association of St. Petersburg (JASP, playing the role of an umbrella organization); the Holocaust Research Group, affiliated to the JASP; the Hessed Avraham Welfare Center for the elderly; the Eva charity fund; the Children's Fund; local branches of Bnei Akiva, Maccabi and the International Association of Jewish businessmen; the Union of Jewish War Veterans; five day schools, four Sunday schools, four kindergartens and a Jewish university. The question of coordinating their activities was urgent.

There continued to be a cleavage between the organizations aiming to revive diversified Jewish community life in Russia, and the *aliyah*-oriented organizations, which regarded reviving the non-Zionist community as useless and even harmful. The first type of organization was supported by the Joint Distribution Committee (JDC) and, organizationally,

by the World Jewish Congress (WJC); the latter by the World Zionist Organization (WZO). The majority of the Jewish organizations set up in Russia in the 1990s have been nonreligious. The head of the Moscow Jewish Religious Community, Vladimir Fedorovsky, complained in an interview to *Mezhdunarodnaia evreiskaia gazeta* in 1993 that the synagogue had ceased to be the center of Jewish life; Jews of Moscow preferred organizations oriented toward Israel and *aliyah*.

The leading body of Russian Jewry was the Council of Jewish Cultural Organizations (Vaad), which was established in April 1992, after the dissolution of the Soviet Union, to succeed the Vaad of the U.S.S.R. Mikhail Chlenov, the former head of the all-Union Vaad, became its chairman, with Roman Spektor as deputy. The Vaad was recognized by the World Jewish Congress; in 1993 its delegation participated in the meeting of the Congress in Washington, together with the representatives of the Ukraine, Belarus, Moldova, Georgia and Uzbekistan; it was the first case in which Russian Jewry and the Jewries of other former Soviet republics were represented at such an assembly. The Eurasian section of the WJC, embracing the Jewish organizations of the CIS, was formed, and Chlenov became its chairman.

Another umbrella organization was set up in February 1993 at the first Congress of Jewish Communities and Organizations in Russia whose purpose was to unite communities of different directions, both Orthodox and liberal. The newly formed body was named the Congress of Jewish Religious Communities and Organizations in Russia (KEROOR; in 1994 its name was shortened to the Congress of Jewish Communities in Russia) and Vladimir Fedorovsky became its president.

An internal split in the Vaad emerged in 1993 and became open in 1994. The conflict flared up over the issue of the structure of the Vaad – whether it should be a federation of Jewish organizations throughout Russia, or of regional federations of Jewish organizations which should be set up, whose supreme coordinating organ would be the Vaad. The roots of the conflict were in fact much deeper; it marked a discontent between the old leadership which depended financially and organizationally on the support of Israel and Western Jewish organizations, and new leaders, businessmen, who partially subsidized Jewish activities in Russia and wanted to influence the Vaad. Besides, unlike the old leaders, who had been political dissidents in the Soviet period and based the Vaad on the pre-1990s underground Jewish network, some of these new leaders had had some administrative experience, and some had even been nominees of the Soviet authorities of 1989–91, and hence had better relations with the authorities in 1993–94.

At the beginning of 1993, there were 32 Jewish communities in Russia. Restitution of synagogues confiscated by the authorities in the Soviet period continued. The network of Jewish education in Russia also grew; seminars and courses for teachers were conducted in Moscow, St. Petersburg, and elsewhere. By the early 21st century, Russia had 17 Jewish day schools, 11 preschools, and 81 supplementary schools with

about 7,000 students, as well as four Jewish universities (see below). Chabad had stepped up its presence and made a significant contribution to rebuilding Jewish religious life. In 1998 Russia became part of the newly established Federation of Jewish Communities uniting 15 countries of the former Soviet Union and aiming to revitalize Jewish life, culture, and religion. Berel Lazar of Chabad was chief rabbi of Russia and chairman of the Rabbinical Alliance, founded in 1992 to spearhead religious life in the former Soviet Union. Chabad also founded the Association of Jewish Public Organizations in 2002 as a rival to the Conference of Leaders of Jewish Organizations, affiliated with the Russian Jewish Congress.

THE JEWISH PRESS. At the beginning of the 1980s, the total legal Jewish press in the U.S.S.R. amounted to two publications in Yiddish: the Moscow Jewish monthly journal *Sovetsish Heymland* and the Birobidzhan newspaper *Birobidzhaner Shtern*, plus an annual in the Judeo-Tat language, *Vata Sovetimu*. Issued in languages not understood by the majority of Soviet Jews and consisting largely of propaganda, the existence of these publications was intended to demonstrate that “Jewish culture” was permitted in the Soviet Union.

Attempts in refusenik circles to establish illegal publications were strictly repressed and led to the gradual curtailment of all Jewish *samizdat* publishing. *Evrei v sssr* (“Jews in the U.S.S.R.,” Moscow) ceased publication in 1979, *Nash ivrit* (“Our Hebrew,” Moscow) in 1980, *Din umetsiut* (“Justice and Reality,” Riga) in 1980, *Evrei sovremennon mire* (“Jews in the Contemporary World,” Moscow) in 1981. The Riga journal *Chaim*, which appeared irregularly starting in 1979, could not fill the vacuum due to its minuscule print run and its distance from the main Jewish centers. An exception was *Leningradskii evreiskii almanakh* (“Leningrad Jewish Almanac,” abbreviated LEA) which first came out in late 1982, at the height of the repressions, and succeeded in appearing regularly from 1984 to 1989. This publication focused on cultural and historical articles written by Leningrad refuseniks. Due to the size of its print run (up to 200, which was large for a *samizdat* publication) and its effective system of distribution, LEA succeeded in reaching distant corners of the country and in demonstrating the need for an independent Jewish press.

Change came with the beginning of the general liberalization in the country. In 1987–1988 several Moscow *samizdat* journals appeared. There were *Evreiskii istoricheskii almanakh* (“Jewish Historical Almanac”) and *Shalom* with their cultural orientation, and several publications dealing with such topics as *aliyah* and absorption in Israel: *Informatsionnyi biulleten po problemam repatriatsii i evreiskoi kultury* (“Information Bulletin of Problems of Repatriation and Jewish Culture”), *Pan-eninu le-Israel* (“Looking towards Israel”), and *Problemy ot-kaza v vyezde iz strany* (“Problems of Refusal Regarding Exit from the Country”).

There was also a revolution in terms of the technology of publication. While the first illegal publications were typed in multiple copies (occasionally copies were made via pho-

tography), the *samizdat* publications of the transitional period were produced on personal computers from abroad and photocopied so that print runs were dramatically increased. Several publications were printed in Israel and sent back to the Soviet Union for distribution. In December 1988 the first legally permitted independent Jewish newspaper, *Khash-akhar*, was issued in Tallinn by the local Jewish culture association. This publication was typeset and appeared not only in Estonian, but also in Russian, which made it accessible to almost all of Soviet Jewry. Its print run was over 1,000 and it soon gained a reputation throughout the country.

In Moscow in April 1989 the authorities launched the semiofficial *Vestnik evreiskoi sovetskoi kultury* (“Herald of Soviet Jewish Culture,” abbreviated *vesk*) in an attempt to compete with the independent Jewish press. After a year which saw a change of editor and of name – to *Evreiskaia gazeta* (“Jewish Newspaper”) – this publication gained more of an independent status.

In Riga in March 1990, there appeared *Vestnik evreiskoi kultury* (“Herald of Jewish Culture,” *vek*). In 1990 Jewish newspapers in Russian with real Jewish content began to appear in Kiev (*Vozrozhdenie*, “Revival”), Leningrad (*Narod moi*, “My People”), Kishinev (*Nash golos*, “Our Voice”), Tashkent (*Mizrakh*, “Orient”), Moscow (*Menora*), Vilnius (*Litovskii Ierusalim*, “Jerusalem of Lithuania”), and elsewhere. These newspapers all gained legal status while those which were issued without permission ceased being persecuted. Thus the distinction between *samizdat* and permitted publications was erased.

Sovetish Heymland softened its hard-line policy and began to publish more cultural and historical material. In 1990–1991 the former editor of *Birobidzhaner Shtern*, Leonid Shkolnik, began the independent newspaper *Vzgliad* (“View”), which included many items of Jewish interest.

The geographical distribution and sharply increased print runs, the increased scope of topics treated, and the widely understood Russian language of the majority of publications have made the new Jewish press a significant factor in the formation of Jewish national consciousness and a source of elementary Jewish knowledge for many thousands of people. The press has also become a source of information about emigration and *aliyah*, and both a mirror and monitor of Jewish life in the country. The very fact of the legalization of the Jewish press has made a deep impression on the average Jews who saw that it was no longer necessary to fear public expression of Jewish life.

However, there is also a negative side to the picture. A number of Jewish periodicals ceased publication after their first issues. Few managed to appear more frequently than once a month and the promised periodicity was often not maintained. The professional level of the Jewish press was frequently low. Articles on Jewish culture and history were often reprints or translations from abroad. Factual errors reflecting a lack of basic knowledge of Jewish traditions, Jewish history, and Hebrew among both authors and editors ap-

peared in many articles. These problems stemmed from the lack of publishing experience of those involved, the lack of qualified authors with some Jewish expertise, the difficulties of publication in the Soviet Union, and the considerable turnover of staff as active members of Jewish culture associations often emigrated.

In 1989 the Jewish press consisted of at least 30 publications; more than half of these appeared in Russia, the majority of them in Moscow. Over the following three years, due to the growing role of the Jewish press in the Ukraine, the undisputed dominance of Russia declined while Moscow continued to dominate the scene in Russia. Late 1991 saw the demise of *Sovetish Heymland*. In the same year, at least 50 Jewish newspapers and journals appeared, with at least one in practically every republic and some in cities in the hinterland. The Jewish press of the CIS represents a whole range of religious and political orientations, with Israeli and Western organizations sometimes supporting publications which favor their policies. This latter factor suggests some doubts not only about the spontaneity of the Jewish publication boom as well as its actual scope but also about its future.

By 1990–91 there were 47 periodicals published in Russia (among them, 26 in Moscow). In 1992–93 their number shrank to 28 (17 in Moscow). This decline may be attributed to the large-scale emigration of Russian Jews, and to growing economic hardships accompanied by a sharp rise in publishing costs. Only those publications had a chance to survive which received financial support from abroad – either from Israel, or from Diaspora, mainly North American, Jewish organizations.

The most influential and widely circulating Jewish newspaper in Russia was *Mezhdunarodnaia evreiskaia gazeta* (“The International Jewish Newspaper”), the successor of *vesk* (see above), which made efforts to mirror not only Russian-Jewish life, but also Jewish life in the entire area of the former Soviet Union. The paper was published in Moscow, twice a month, by Tankred Golenpolskii and Eliezer Feldman. The most popular Jewish newspaper in St. Petersburg continued to be *Narod moi – Ami*, published by the Jewish Association of St. Petersburg, also twice a month. In the northern Caucasus region, the most conspicuous newspaper was *Vatan-Rodina* (“The Homeland”), published twice a week by Mikhail Gavriolov in Derbent, Dagestan, in Judeo-Tat (the language of the Mountain Jews) and Russian. Among other relatively widely circulating newspapers were: *Tarbut* (“Culture,” in Samara, formerly Kuibyshev), *Stern-Zvezda* (“The Star,” in Ekaterinburg, formerly Sverdlovsk), and from July 1993 on, *Gazeta evreev Severnovo Kavkaza* (“The Newspaper of the Jews in the North Caucasus,” Nalchik, Karbardino-Balkaria). The *Birobidzhaner Shtern* (“The Birobidzhan Star”) continued to be published in Yiddish and Russian in the Jewish Autonomous Region. The magazine *Sovetish Heymland* in 1993 changed its title to *Di Yiddishe Gass* (“The Jewish Street”) and continued to appear in Russian and Yiddish. Papers were published by Jewish organizations abroad e.g., *Rodnik* (“The

Spring,” or “Source,” by the World Union of Progressive Judaism), *Lekhaim* (“To Life,” by the international Jewish organization Chabad-Lubavitch), and several papers, by the Jewish Agency. Jewish newspapers were also issued in Briansk, Novosibirsk, and Perm. Two academic Jewish journals were published: *Vestnik Evreiskovo Universiteta v Moskve* (“Herald of the Moscow Jewish University”), from 1992 on, and *Vreiskaia Shkola* (“Jewish School”), issued by the St. Petersburg University, both supported by the JDC.

ACADEMIC LIFE. One of the most remarkable developments in Russia (as well as in some other countries of the CIS) in the field of Jewish life was the emerging and broadening of Jewish higher education and Jewish studies. The Moscow Jewish University has been functioning since 1991; in 1993 it gained official status, i.e., the right to give officially recognized university degrees to its graduates. In 1990, the St. Petersburg Jewish University was established; in 1994 it gained the right to give degrees in philology. Departments of Jewish Studies were opened in some old established universities: courses in Judaic studies were established at Moscow State University in 1993; the School for the Comparative Study of Religions, including Judaism, was set up in the Russian State Humanitarian University in Moscow.

ANTISEMITISM AND THE JEWISH QUESTION. During the years of *perestroika*, covert but effective state and bureaucratic antisemitism gradually declined while there was a rise in grass-roots anti-Jewish trends. The protracted economic crisis and weakening of the central authority produced populist spokesmen who found it easier to cast blame for all the failures of the country, past and present, on various ethnic groups, especially the Jews, than to offer practical solutions for the dire straits of the country. One factor feeding antisemitism was envy stemming from the reality that Jews could emigrate while for Russians this way out was basically barred. Further oil on the flame was the fact that Jews could now visit relatives abroad and receive material aid from them.

With *glasnost* Soviet Jewry began encountering overt antisemitism in the press and on television, in the pamphlets of political parties, in conversations at work places, on the street and on public transport. Antisemitic parties and organizations sprang up like mushrooms. These included: Pamiat (Memory), Rossy (the [Original] Russians), Patriot, Rodina (Homeland), Otechestvo (Fatherland), Nationalnodemokraticeskaia partiia (National Democratic Party), Russkii nacionalno-patrioticheskii tsentr (the Russian National Patriotic Center), Soius russikh ofitserov (the Union of Russian Officers), and Republikanskaia narodnaia partiia Rossii (the Republic People’s Party of Russia). The year 1989 saw the establishment of the neo-Communist movement Obediennyi front trudiashchikhsia R.S.F.S.R. (the United Front of the Workers of the R.S.F.S.R.) and in 1991 its spinoff, Rossiiskaia kommunisticheskaia rabochaia partiia (the Russian Communist Workers’ Party), which espoused antisemitism as an organic part of their ideology. About this time Vladimir Zhirinovskii

became leader of the rightist populist group which called itself Liberalno-demokraticeskaia partiia Rossii (the Liberal Democratic Party of Russia).

The Pamiat Association, originally a conservative movement concerned about the preservation of Russia’s past and its environment, became more nationalistic in 1984 when its leadership was taken over by photographer Dmitrii Vasilev. The movement gained notoriety when it blamed Jews for the destruction of Russian churches, and for the serious problem of alcoholism in the country. Originally the authorities did not object to Pamiat’s activities and even supported them. In May 1987 Boris Yeltsin, then first secretary of the Moscow city committee of the CPSU, received representatives of Pamiat after a demonstration it staged on Manezh Square. On May 31, 1988, Vasilev announced the transformation of the association into Nacionalno-patrioticheskii front “Pamiat” (Pamiat: the National Patriotic Front), i.e., a political organization in opposition to the Communist Party. Between 1989 and the early 1990s, Pamiat split into several groups, the most extreme of which, Pravoslavnyi nacionalnopatrioticheskii front “Pamiat” (Pamiat Orthodox National Patriotic Front), headed by A. Kulakov, espoused restoration of the monarchy while simultaneously expounding the necessity of continuing Stalin’s antisemitic policy.

Antisemitism has not been confined to words. Acts of vandalism have been directed against Jewish targets. In April 1987 the Leningrad Jewish cemetery was desecrated and in the following two years approximately 30 such incidents were recorded in the U.S.S.R. In Moscow attacks were carried out against a Jewish cafe and the editorial offices of *Sovetish Heymland* and arson was committed at the synagogue by the cemetery in Malakhovka. In 1992 a swastika was painted on the Moscow Lubavitch Hasidic synagogue and a firebomb was thrown into the building.

Leningrad, the home of a number of antisemitic organizations, became the center of antisemitism in 1988–1990. It was a teacher at the Leningrad Technological Institute, Nina Andreeva who, evidently on orders from the central Committee of the CPSU, on March 13, 1988, published a letter, “I Can Not Yield My Principles,” calling for the rehabilitation of Stalin and the restoration of the kind of law and order that existed before *perestroika*. In her letter Andreeva attacked the Jews as “cosmopolitans” and a “counterrevolutionary people,” who were pushing the Russian people toward a rejection of socialism. In the summer of 1988 Leningrad’s Ruminatsev Park was the daily site of Pamiat rallies. The city also regularly heard calls to expel Jews from Russian scientific, cultural, and educational institutions.

In nationalist journals such as *Molodaia gvardiia* (“Young Guard”) and *Nash sovremennik* (“Our Contemporary”), a group of Moscow writers and journalists, the neo-Slavophiles Valentin Rasputin, Vasillii Belov, Victor Astafev, and Vadim Kozhinov, utilized the traditionally high status of the writer in Russian society to protest ostensibly harmful Jewish influence on Russian culture. For example, they condemned the 1989

publication in the journal *Oktober* of the novella *Vse techet* (“All Is Flowing”) by the late writer of Jewish origin Vasili *Grossman, in which the Russian people is allegedly described as having a slave mentality. The January 1990 issue of *Molodaia gvardiia* contained praise of a painting, *The Warning* by Igor Borodin, which the journal claims shows an image of the biblical queen Esther who “after gaining power of the king in his bedroom, and also by clever machinations...urged [King] Artaxerxes to commit the bloody slaughter of 75,000 totally innocent people when there was no threat at all to the Jewish people.” The painting (reproduced in the journal) shows Esther on her knees before the czar while under the throne are visible bloodied heads of famous figures of Russian and world culture and history. In 1992 *Evreiskaia gazaeta* reported the existence of 47 antisemitic newspapers and 9 such journals in Russia alone.

Some scientists also denigrated the Jews. Writing appeared denying Jewish contributions to science. A particular target was Albert Einstein, whose discoveries were consistently attributed to others, as in the 1988 monograph of Prof. A. Logunov about Henri Poincaré. The mathematician Igor Shafarevich published a book *Rusofobia* (“Russophobia”), in which a “small people” (for which read “the Jews”) was blamed for all the troubles of a “great people,” the Russians. In 1992 antisemitism among scientists was revealed in elections to the Russian Academy of Sciences. None of the Jews nominated to become members of the academy was elected, in contrast to the election of a number of Jews during the pre-Gorbachev “period of stagnation.”

A significant indication of antisemitic attitudes between 1988 and 1990 was the repeated circulation of rumors about impending pogroms. The first such large-scale pogrom was predicted for June 1988 to coincide with the thousandth anniversary of the baptism of Russia. There were similar rumors in Dnepropetrovsk and other cities in the Ukraine before Easter 1989 and in Leningrad on the eve of elections to local and republic soviets on February 25, 1990. There were rumors of another pogrom set for May 5, 1990, the day of St. George, the patron saint for many nationalists. In that same month a Muslim mob burned and looted dozens of Armenian and Jewish homes in the Uzbek city of Andizhan. Although no exclusively Jewish pogrom took place, the number of reported attacks on individual Jews grew. Soviet Jews lacked confidence in the ability of the authorities to defend them in the face of failures to prevent or halt interethnic conflict in the republics or to halt the rise in crime in Russia itself.

At the same time that the Jewish population of the country was decreasing due to emigration, the Jewish question increasingly became an issue in the internal Soviet power struggle. In pre-election campaigns, the democratic press often indicated its sympathy for the Jews and stressed the antisemitism of their political opponents while Russian nationalists often branded as “Jews” anyone who advocated radical reform, the introduction of a market economy, or civil rights. These “Jews” in fact included such non-Jews as Politburo

member Alexander Yakovlev; radical opposition leader in the Supreme Soviet of the U.S.S.R., Yurii Afanasev; editor of the *perestroika-oriented* journal *Ogonek*, Vitalii Korotych; and even Boris Yeltsin.

Lithuanian, Ukrainian, and other nationalists saw the Jews in their republics as possible allies in their fight for self-determination against the central authorities and their local Jewish culture movements as forces opposing Russification. On May 28, 1989, a conference of the national movements of Lithuania, Latvia, and Estonia adopted a resolution condemning Soviet antisemitism in the past and present and calling for opposition to it. A similar resolution was adopted at its founding meeting in September 1989 by Rukh, the democratic national movement in the Ukraine.

The growing antisemitism disturbed the liberal part of the Russian intelligentsia, which saw in it a threat to the overall process of democratization in the country. The “pogromlike” atmosphere was first protested in an open letter by a group of Moscow intellectuals led by the philologist Sergei Lyosov and the physicist Sergei Tishchenko. Almost simultaneously (on June 7) the Leningrad historian Natalia Iukhneva spoke out in public about increasing antisemitism in Russian society. She associated this growth with the unequal position of Jews and Jewish culture in the U.S.S.R. and rejected as false and unjust the attempt to condemn Zionism along with antisemitism. Gradually articles against antisemitism began to be featured in many *perestroika-oriented* journals and newspapers. Some publications even took a positive rather than defensive approach to Jewish topics. For example, the Moscow journal *Znamia* in 1990–1991 published a whole series of articles on Jewish topics, including a translation of the story “Unto Death” by the Israeli writer Amos Oz. Public opinion also had the opportunity to be influenced by the first objective film on Israel shot *in situ* by Evgenii Kiselev and shown on Soviet television between August and October 1989. Due to the cessation of government funding for “anti-Zionist” works, a number of their authors, such as Dadiani, Vladimir Nosenko, Victor Magidson, and Adolf Eidelman, switched camps and became opponents of antisemitism, perhaps with the hope of support from Israeli and Western Jewish institutions.

The victory of democratic forces in the elections of local soviets in March 1990 led to the mobilization of law enforcement agencies against antisemitic agitation. For the first time in decades, the state prosecutor’s office prosecuted antisemitic actions under article 174 of the Criminal Court of the RFSFR, which deals with the incitement of ethnic strife. The sentencing to a jail term of Pamiat leader Smirnov-Ostashvili (who committed suicide in prison) was viewed as a victory for democracy in the country. Public opinion was favorably influenced toward the Jews in August 1991 when one of the three victims killed defending democracy against the attempted coup turned out to be the young Jew Ilya Krichevskii. The fall 1991 repeal (supported by the Soviet Union) of the UN resolution equating Zionism with racism also was a factor in deflating antisemitic propaganda.

In November 1992, almost a year after the dissolution of the Soviet Union, the committee on human rights of the Supreme Soviet of the Russian Federation inaugurated hearings on the problem of antisemitism in Russia. The committee concluded that there was a decline in antisemitic attitudes in Russian society in 1991–1992 and that antisemitic activity was basically restricted to extremist groups and parties. At the same time, legislative measures were discussed which, without infringing upon freedom of speech and the press, would stipulate punishment for arousing ethnic hatred. Antisemitism was increasingly being treated in Russia as not only a Jewish problem.

Though official, state antisemitism had virtually disappeared in post-Soviet Russia, it was adopted by numerous radical right parties and organizations, the greatest and most influential of which had now become the LDPR. Its leader, Vladimir Zhirinovskiy, who allegedly had a Jewish father and in 1989, for a short time, was a legal advisor of the Jewish Cultural Association Shalom (allegations he denied in the 1990s), claimed he was not an antisemite. Nevertheless, after the December election of 1993 he made a number of harshly antisemitic statements, some of them in a characteristically anti-Zionist guise. On March 4, 1994, he told *Die Zeit*: “Why are the Zionists so bad? ... Because they weaken Russia. The American Jews make America strong but the Russian Jews make Russia weak. They do this so that they can leave for Israel ... Our greatest problems are the Americans and the Zionists.” In November, during a visit to the United States, Zhirinovskiy told the UN Correspondents’ Association that “the majority of journalists who welcomed the [collapse of the Soviet Union] joyously are of Jewish nationality” and that new businesses in Russia were “headed by Jews and a lot of the population understand that most of the money in these banks and structures is dirty money.” On October 21 he said in a speech to the parliament: “I tell the whole world: It is you from Tel Aviv and Washington who are doing everything bad that is happening to us.”

Besides this big party, there are many small antisemitic parties and movements filling a spectrum between Russian-Orthodox conservative to neopagan, and from National Communist groups to Nazis. According to various estimates, there were c. 80–100 such organizations at the end of 1993. Some of them, e.g., the neo-Nazi Russian National Unity led by Aleksandr Barkashov (its members wear black uniforms with the swastika emblem), sought contacts and cooperation with similar neo-Nazi groups in Germany and other western countries. The specter of a “red-brown” alliance, i.e., between hardline communists and neo-Nazis, with viciously antisemitic slogans and aims, began to appear.

The most conspicuous antisemitic parties and organizations, apart from the LDPR and Barkashov’s RNU, continued to be Pamiat, led by Dmitrii Vasiliev (see above), the imperialist National Salvation Front, the Russian National Council, led by the former KGB general Alexandr Sterligov, the St. Petersburg-based National Republican Party of Russia, led by

Nikolai Lysenko, the neo-Communist Working Russia, led by Viktor Anpilov, and the quasi-Communist National Bolshevik Union, led by the writer Eduard Limonov.

The radical right and conservative press thrived. Some of the former Soviet official newspapers, such as *Pravda*, *Sovetskaiia Rossiia* and *Literaturnaia Rossiia*, turned into conservative nationalist papers; the latter two devote considerable place to antisemitic articles, including the so-called “Zionist conspiracy against Russia.” However, in May 1993, *Pravda* also published an article entitled “The satanic tribe – who is hiding behind the murder of novices?” which claimed that a Russian Orthodox priest and two novices who were killed during the Easter holiday had been the victims of a ritual murder. The article was denounced by the pro-Yeltsin newspaper *Izvestiia* and condemned by both the Russian and the U.S. governments; *Pravda* published an apology blaming the author of the article for inaccuracies.

In addition to these old established, relatively mass-circulation newspapers, numerous fringe newspapers, small with small circulations, but some with considerable ones, appeared. They are more openly antisemitic. Among the most prominent, *Den/Zavtra* may be mentioned. The paper was founded in 1992 under the title *Den* and edited by the novelist Aleksandr Prokhanov, one of the leaders of the National Salvation Front; in 1993, after it was banned by Yeltsin, in the wake of the Parliament insurrection, it changed its name to *Zavtra*. The second conspicuous antisemitic paper was *Al-Quds*, established in 1992 by a Palestinian businessman and self-proclaimed head of the “Palestinian Government in Exile,” Shaaban Khafez Shaaban. *Al-Quds* specialized in publishing materials alleging a Zionist conspiracy against Russia and the Palestinian people. In late 1994 the paper was closed down by the authorities.

Following the Parliament insurrection in 1993, there were a number of anti-Yeltsin demonstrations and rallies, many of them with overtly antisemitic slogans. On November 7, 1994, in Moscow, on the 77th anniversary of the Russian October Revolution, a 15,000-strong rally of Communists was held in Lubyanka Square; some of the anti-government banners contained slogans attacking Jews, Zionists and the “Kike-Masonic conspiracy.” On October 3, on the anniversary of the events of 1993, there was also a demonstration in St. Petersburg, at which anti-Jewish banners were displayed.

Russian antisemites did not limit themselves to rallies and demonstrations. There were numerous antisemitic incidents; e.g., in May 1993 Jewish cemeteries in St. Petersburg and Nizhni Novgorod were desecrated; in June, windows were broken and swastikas and anti-Jewish slogans daubed on the Moscow Choral Synagogue; in July the attack on the synagogue was repeated. In December the synagogue in Marina Roshcha district in Moscow was badly damaged in a fire. In 1994, Jewish cemeteries were desecrated in St. Petersburg (where 160 gravestones were desecrated), in Novosibirsk, Krasnoyarsk, Smolensk, Kazan, Klinty, Briansk region, and Nizhni Novgorod. Several cases of racially motivated attacks

on Jews were registered. On February 16, 1994, a firebomb was thrown into the office of the Committee for Repatriation to Israel in Novosibirsk; the office and adjoining library were badly damaged in the ensuing fire. In February, following the massacre of Muslims by a Jewish settler in a Hebron mosque, threats were made against the Jewish community and against the Derbent synagogue, in Daghestan. Also, there was street violence in Makhachkala, and on the local television the sheikh of Daghestan called for a jihad against the Jews. Numerous books of antisemitic content were published and an opinion survey of 1993 carried out by Robert Brym with the assistance of the All-Russian Center for Public Opinion Research (VTSIOM), and covering also Ukraine and Belarus, revealed antisemitic perceptions, strong by North American standards. In Moscow, negative attitudes toward Jews were more widespread among older people, low-income earners and non-Russians. Eighteen percent of Muscovites believed that there existed a global “Zionist conspiracy” against Russia, and another 20 percent were undecided.

An added ingredient in the continued antisemitism that remained part of Russian life was the emergence of the so-called oligarchs, who divided up Russia's wealth and gained control of its media after the breakup of the Soviet Union. The Jews among them, most prominently Mikhail *Khodorkovsky, Roman *Abramovitch, Vladimir *Gusinsky, Boris *Berezovsky, and Leonid *Nevzlin, are perceived as having been targeted by the Russian authorities for prosecution for various economic crimes against the background of their Jewish origins.

RUSSIAN LITERATURE.

Biblical and Hebraic Influences

The Jewish impact on Russian literature may be traced back 900 years to the period when that body of writing was still the common patrimony of a people that was to emerge later as three distinct East Slavic ethnic groups: the Russians, the Ukrainians, and the Belorussians, each with its separate language and, ultimately, its own literature. The 11th-century “Primary Chronicle,” of which 13th-century transcriptions are extant, begins with an account of the biblical story of the Tower of Babel. Equally ancient is the 11th-century translation of *Josephus’ *Jewish War* into East Slavic, although the original translation was later supplemented by newer versions. Not only was Josephus’ work extremely popular in Russia throughout the Middle Ages, but for several centuries his style and imagery continued to exert a powerful influence on original Russian literary works, particularly martial tales. In 1106–08 the abbot Daniel made a pilgrimage to the Holy Land, and his account of the journey, extant in 15th-century transcriptions, contains a number of interesting descriptions of Jerusalem and its surroundings.

Polemical attacks on Judaism as a creed antedate the appearance in Russia of any sizable Jewish population. Thus the metropolitan Ilarion, in his *Slovo o zakone i blagodati* (“Sermon on Law and Grace,” written 1037–50), attacks Judaism for its alleged lack of Divine grace, a stock claim of Christian theologians over the centuries. It is likely that the metropolitan’s attack was prompted by fear of the *Khazars, then Kiev’s neighbors and rivals, among whose ruling class Judaism was widely professed. In a popular 12th-century tale, “The Virgin’s Road Through Torments,” Mary intercedes on behalf of various sinners whom she encounters on her journey through Hell. Only for the Jews can she find no compassion, since they are the alleged murderers of her son. In this doctrine, too, Russian Orthodoxy did not differ from Western European Christianity.

Judaism’s theological threat to Russian Christianity became somewhat more real in the 15th century, with the appearance in the cities of Novgorod and Moscow of a heresy whose adherents were dubbed “*Judaizers” (*Zhidovstvuyushchiye*). Because most of their works were destroyed by the Church, little is known about these heretics other than their skepticism with regard to several articles of Christian faith, including the Trinity and Virgin Birth, and their high regard for the Old Testament, the importance of which Russian Orthodoxy has traditionally minimized. Russia’s “Judaizers” translated anew from Hebrew sources (and not, as had been customary, from existing Greek translations) a number of biblical texts, particularly the Psalms and the books of Daniel and Esther.

They were also the first to translate a treatise on logic by *Maimonides. Some Russian church historians maintain rather unconvincingly that these translations were made by Jews such as Feodor the Jew for coreligionists who no longer knew Hebrew. Among the best-known works of apocryphal literature was the “Tale of the Centaur,” extant in a 15th-century text, which was based on an ancient Jewish story about Solomon building the Temple without recourse to iron.

During the 16th century certain Western European anti-Jewish philippics were translated from Latin into Russian, notably works by *Nicholas de Lyre and by an apostate known as Samuel the Jew. In the following century Old Testament authority and biblical imagery were frequently invoked by opponents of the official Church. An outstanding example was the archpriest Avvakuma (1621–1682), founder of the Old Believers’ sect, whose autobiography, *Zhitiye protopopa Avvakuma* (written 1672–75) is a milestone in the development of the modern Russian literary language.

BIBLICAL DRAMA AND POETRY. The first Russian theatrical performance, which took place in Moscow in 1672, was a German stage adaptation of the Book of Esther. Early plays on biblical themes for the Moscow repertoires were written by Semyon Polotski and a German Lutheran pastor, Johann Gottfried Grigori, the author of a morality play on Adam and Eve, and there were also adaptations of the stories of Judith, Daniel, and David and Goliath. Conventional imagery and allusions drawn from the Bible are as characteristic of later Russian literature as they are of other literatures, and biblical motifs regularly occurred in the works of Russian authors of the 19th century. Such was the case with the magnificent statement of the poet’s mission in “Prorok” (“The Prophet,” 1826) by Alexander Pushkin (1799–1837). Among later, prerevolutionary writers, Leonid Nikolayevich Andreyev (1871–1919) wrote a drama about Samson (*Samson v okovakh*, 1925; *Samson in Chains*, 1923), and Alexander Ivanovich Kuprin (1870–1938) published *Sulamif* (1908; Eng. tr. *Sulamith*, 1923), a stylized romance about Solomon. Their Jewish contemporary, Akim Lvovich *Volynski, wrote a critical study of the Bible in Russian poetry.

The last prerevolutionary decade was marked by an upsurge of interest in both biblical and modern Hebrew literature. Interest in the latter was heightened by the fact that many of the founding fathers of the new Hebrew writing, preeminently *Bialik, were Russian Jews then still living in Russia. V. *Jabotinsky translated Bialik into Russian, and Bialik thus gained wide appreciation both among writers (e.g., Gorki) and among the public. Among the translators and popularizers of modern Hebrew verse at the turn of the century were such eminent Russian symbolist poets as Valeri Bryusov (1873–1924) and Feodor Sologub (1863–1927); of a slightly later vintage was the émigré poet, the half-Jew Vladislav *Khodasevich. A journey to Palestine inspired some poetry by another émigré, Ivan Bunin (1870–1953).

After the Bolshevik Revolution biblical works naturally fell into disfavor, but it is significant that two Jewish writers

of the post-Stalin era turned to the Bible for themes expressive of their spirit of protest. Semyon Isaakovich *Kirsanov, who had published a poem entitled “*Edem*” (“Paradise”) in the late 1940s, wrote “*Sem dney nedeli*” (“Seven Days of the Week,” 1957), an anti-materialist narrative poem based on the Creation story; while Yosif *Brodski, a prime target of Soviet antisemitism, also wrote a long narrative poem entitled “*Isaak i Avraam*” (“Isaac and Abraham”), which, like his other original works, had to be published in the West (in *Stikhotvoreniya i poemy*, 1965).

The Image of the Jew

Although one of the stock characters of the *Vertep* puppet show – Russia’s oldest form of theater – was a grotesque caricature of a greedy and cowardly Jew, there were very few Jewish motifs in Russian literature during the 18th century. One reason for this may be the fact that the Jews lived in areas to the west with which Russian writers, mostly from central Russia, were unfamiliar. Another is that Russian writing of the period rarely featured anyone who was not an aristocrat. To a lesser extent this was also true of Russian literature of the first half of the 19th century, despite the sudden increase in Russia’s Jewish population after the annexation of former Polish territories following that country’s partitions at the end of the 18th century.

THE ANTISEMITIC STEREOTYPE. Biblical portraits gradually gave way to a stylized, romantic portrayal of the Jew reminiscent of the Jews in Sir Walter Scott’s *Ivanhoe*, but familiar since *Shakespeare’s *Merchant of Venice*. An antisemitic stereotype tempered by courtly gallantry, the Russian figure was normally an incongruous combination of an ugly and repugnant Jewish father (more often than not a greedy usurer and hater of Christians) and his beautiful daughter. A noteworthy example may be found in *Ispantsy* (“The Spaniards,” 1830), an early drama by Russia’s foremost Byronic poet, Mikhail Lermontov (1814–1841), which portrays hapless lovers against the background of the Inquisition. Ivan Turgenev (1818–1883) was no romantic, but his realistic short story *Zhid* (1847; *The Jew...*, 1899) exudes the familiar blend of human compassion and aristocratic disgust with a Jew about to be executed on suspicion of espionage. Turgenev’s portrayal of the Jew, which sharply contrasts with his humane understanding of the plight of the Russian peasant, is not unlike that found in *Taras Bulba* (1842), a novella by Nikolai Gogol (1809–1852), who both as a man and a writer was otherwise very different from the Westernized and liberal Turgenev. In Gogol’s short novel, set during the 17th-century Polish-Cossack wars, a Jewish innkeeper, also suspected of espionage, is described as shiftily, mercenary, and treacherous, in many respects far more despicable than the Polish enemy. Curiously enough, this motif of a Jew suspected of spying for the Poles (who are themselves shown to be antisemitic) reappeared nearly a century later in a short story by the Soviet-Jewish writer Isaac *Babel (“Berestechko,” in *Red Cavalry*, 1926), in which a Communist soldier calmly slits the throat of an old Jew.

Hostile portrayals of Jews are scattered throughout the writings of Fyodor Dostoyevski (1821–1881). A noteworthy instance is the criminal who remains faithful to the practices of Judaism in *Zapiski iz mertvogo doma* (“Memoirs from the House of the Dead,” 1861–62). The works of Leo Tolstoy (1828–1910) display an ambivalence characteristic of his attitude toward other ethnic minorities, such as the Poles. On the one hand Tolstoy, particularly in his later years, condemned antisemitism as inconsistent with the commandment to love one’s neighbor; on the other, he showed in his own few literary references to Jews the disdainful attitude of a haughty seigneur toward pitiful but despicable creatures.

In the mid-19th century the unfriendly depiction of the Jew underwent yet another shift. Aristocratic contempt for the Jew had largely disappeared, but it was replaced by the hostile references of plebeian writers. Some of these, driven by chauvinism and religious intolerance, accused the Jews of plotting against Russia’s traditional values and institutions, identifying them with revolutionary terrorists. Representative of this tendency were Vsevolod Krestovski’s (1840–1895) *Tma Yegipetskaya* (“Egyptian Darkness,” 1889) and the “anti-Nihilist” writings of Alexey Pisemski (1821–1881). Simultaneously, however, anti-Jewish notes could be discerned in the works of such Populists and radical sympathizers as the poet Nikolai Nekrasov (1821–1878), the novelist Feodor Reshetnikov (1841–1871), and Russia’s foremost satirist, Mikhail Saltykov-Shchedrin (1826–1889). The latter’s attitude toward the Jews was, however, like Tolstoy’s, inconsistent and contradictory. In the works of these writers (as in the pronouncements of some revolutionary parties of the period, notably Narodnaya Volya) the Jew was often abused as the merciless exploiter of Russia’s downtrodden and impoverished masses.

OBJECTIVE PORTRAYALS. During the second half of the 19th century other writers began to defend the Jews from their numerous enemies and to attack all forms of antisemitic persecution and discrimination. Some of these champions of the Jews were politically and religiously moderate conservatives. Outstanding among these was Nikolay *Leskov, some of whose tales contain traditional antisemitic stereotypes, but whose overall output constitutes a clever attack on Russian antisemitism. Leskov, a prolific writer on the Jewish question, also published anonymously a pamphlet entitled *Yevrei v Rossii* (“The Jews in Russia,” 1884), undoubtedly the most impassioned defense of Russian Jews ever written by a Russian author. Most of their defenders were, however, moderates, liberals, and leftists. There are sympathetic portrayals in works by Anton Chekhov (1860–1904), such as in the short story *Skripka Rotshilda* (“Rothschild’s Violin,” 1894), and *Ivanov* (1887), one of his early serious plays. In this, a Jewish woman forsakes her faith and her family in order to marry the man she loves, but he ultimately insults her by calling her a despicable Jewess. Chekhov also distinguished himself as an ardent defender of Alfred *Dreyfus, losing many of his friends as a result. Alexander Kuprin portrayed a Jewish fid-

dler in his short story *Gambrinus* (1907, Eng. tr., 1925) while in his whimsical tale *Obida* (1906; "An Insult," in *The Bracelet of Garnets...*, 1917), a delegation of thieves indignantly protests the "slandrous" insinuations of a newspaper that anti-Jewish pogroms are the work of underworld elements. Yevgeni Chirikov's (1864–1936) play *Yevrei* (1904; *Die Juden*, 1904) was also an attack on antisemitism, as were the numerous short stories and newspaper articles by Vladimir *Korolenko and Maxim *Gorki, who warmly championed Russia's Jews, particularly the poor ones.

During the latter part of the 19th century Jews themselves began to write on Jewish themes. Before 1917, however, they were never fully accepted as Russian writers and none of them achieved literary stature. Russian Jewry was, in any case, only superficially secularized and its artistic energies were canalized into the literary realms of Hebrew and Yiddish. Three pioneer authors were Osip *Rabinovich, Grigori Bogrov, and Lev *Levanda, whose descriptions of Jewish life were intended to demonstrate the brutal oppression of an inoffensive minority, and to gain the sympathy of all decent and fair-minded Russian Christians. A more militant note was sounded in the poetry of Shimon Shmuel (Semyon) *Frug, who at first linked his hopes for the salvation of Russia's Jews with the triumph of the revolutionary cause, but who later became more attracted to Zionism. Two writers whose reputation has proved more lasting were Andrey *Sobol and Semyon *Yushkevich. In his novel *Pyl* ("Dust," 1915), Sobol expressed the Jewish revolutionary's disenchantment with socialism as a solution of the Jewish problem, a feeling reflected in another semi-autobiographical work, *Oblomki* ("The Wreckage," 1923), a collection of stories published after the Bolshevik triumph.

The Soviet Position

The distinction between portrayals of Jews in Russian literature by writers who were themselves Jews and those who were not loses much of its validity during the Soviet period. In the first place, Jewish writers in the U.S.S.R. were, for the most part, culturally assimilated; many of them wrote under Slavic-sounding names which concealed their origin. Secondly, the everpresent threat of an accusation of "Jewish nationalism" caused many of them – either out of genuine Communist conviction or from ordinary fear – to shy away from excessive preoccupation with Jewish subjects. And last but not least, the many levels of ideological control over Soviet literature, operative from the early days of the regime, have to a greater or lesser extent – depending on the period – prevented the appearance of works too much at variance with the official party position on the subject; and these controls have been roughly applicable to all Soviet writers, regardless of their ethnic background. The periodical shifts in the portrayal of Jews in Soviet literature have thus been more closely tied to fluctuations in official policy and to the stringency of literary censorship than to the preferences of the authors themselves or, more important still, to the social conditions which their works purported to reflect in a realistic manner.

The official Soviet position may be reduced to the following essentials. The Jews, like all other ethnic groups, are really divided, as Lenin stated, into two warring nations in one – the exploiters and the exploited. The exploited and the poor of all nations are natural allies, as are the rich exploiters of the various ethnic groups. The former are to be portrayed with compassion and sympathy, and the latter are to be shown as their villainous foes. There can be no recognition of an ethnic group that might transcend class antagonisms. This article of faith was to be observed with particular stringency in Soviet literature's treatment of Jewish themes, and it has resulted in some grotesque descriptions of manifestations of antisemitism and other phenomena which, in one way or another, affect all Jews, regardless of their religious ties, economic status, or political allegiance.

In the distorting mirror of Soviet literature, where ideology takes precedence over historical or artistic truth, there are few exceptions to the rule that only the Jewish poor are shown to be victims of antisemitism, whereas the bourgeoisie are somehow unaffected by it. In fact, Jewish capitalists – who, as a rule, are also portrayed as the only Jews infected with the dual poison of religious faith and Zionism – are shown making common cause with antisemites, provided that the latter are their class allies – fellow capitalists and enemies of the working class. This tendency can be discerned in Soviet literature from the earliest years of the Soviet regime and is not, as is commonly thought, a phenomenon of Stalin's last years. However, since antisemitism as such was condemned during the early years of Soviet rule, and because antisemitic policies were in the 1920s associated with the *ancien régime*, Soviet books describing poor Jews in czarist Russia portrayed them in a sympathetic light as victims of persecution.

A documentary of unusual interest and importance that was unearthed some 45 years after its publication is the poem "Yevrey" ("The Jew") by the otherwise conformist Soviet writer Vladimir Mayakovski, a leader of the Futurist movement. Here Mayakovski, a friend of Bialik (to whom he dedicated another of his poems), vigorously attacked Russian antisemitism and championed the victims of its constant slanders. The poem, first read to a meeting in favor of Jewish economic rehabilitation which he had himself helped to organize in November 1926, subsequently appeared in *Izvestiya*; but it has been carefully omitted from Mayakovski's collected works. Another poem, "Zhid" ("Jew"), written in May 1928 as a protest against the resurgence of antisemitism, appeared in *Komsomolskaya Pravda* (June 15, 1928).

Subsequently, in the 1930s, as glorification of Russia's past became more fashionable, czarist antisemitism tended to be avoided, although the familiar attitude continued to be maintained in works describing Jews still living in capitalist countries. This, too, became muted in the early 1940s and was almost entirely suppressed after World War II, perhaps in order to avoid undesirable parallels with the Soviet Union's own brand of antisemitism, which began in the late 1940s with Stalin's virulently antisemitic purges of "cosmopolitans." These

culminated in the closure of all Soviet Yiddish cultural institutions in 1948 and the execution of Soviet Yiddish writers in 1952. By then, nearly all discussion of antisemitism, past and present, Russian or foreign, or of any other Jewish themes, had become practically taboo. The worldwide sensation created by the appearance in 1961 of a brief poem, “Babi Yar,” by Yevgeni *Yevtushenko, condemning Nazi and prerevolutionary antisemitism, and the mutilation by Soviet censorship of *Babi Yar* (1966; Eng. 1967, revised 1970), a documentary novel by Anatoli Kuznetsov (1929–1979) about the Nazi massacre of Soviet Jews in a ravine near Kiev, demonstrate that, in contrast to other areas of Soviet life, there was no real thaw in Soviet literature’s treatment of Jewish themes.

THE JEW THROUGH SOVIET EYES. Early Soviet literature portrayed two types of “sympathetic” Jews: the victims of prerevolutionary persecution, and the fighters for the Communist cause and, occasionally, the passive victims who were transformed into active fighters. It is interesting that the victims were usually endowed with various ethnic traits, such as observance of Jewish tradition, attachment to Jewish culture, and even loyalty to the Yiddish language; but these they would discard in the process of transformation into good Communists. At the same time, Jewish villains, usually “class enemies” from the past such as rich merchants and rabbis, were depicted as “socially alien elements” who had somehow succeeded in worming their way into the Communist Party. The fact that Jewish heroes outnumbered Jewish villains in early Soviet fiction reflects Soviet literature’s general predilection for “positive” characters as well as the undeniable fact that the impoverished Jewish masses were sympathetic to the Bolshevik cause, many Jews having fought in the civil war on the Communist side.

The most celebrated portraits of “positive” fighting Jews are to be found in works such as Alexander Fadeyev’s (1901–1956) novel *Razgrom* (1927; *The Nineteen*, 1929) and Eduard *Bagritski’s *Duma pro Opanasa* (“The Lay of Opanas,” 1926). A middle-class Jew who hates the Soviet regime is depicted in Yuri *Libedinski’s *Nedelya* (1923; *A Week*, 1923), while an obnoxious, pushy young Jew nicknamed “little Trotsky” appears in Sergey Malashkin’s (1890–?) collection of stories *Luna s pravoy storony* (“The Moon on the Right,” 1927). Small-town Jews, reminiscent of those found in Yiddish literature, were portrayed in scores of works, including Ilya *Ehrenburg’s *Burnaya zhizn Lazika Roytshvantza* (1928; *The Stormy Life of Lasik Roitschwantz*, 1960). Joseph *Utkin described the sudden metamorphosis of a humble tailor steeped in Jewish tradition into an emancipated and internationalist Bolshevik in his *Povest o ryzhem Motele...* (“The Tale of Motele the Redhead...,” 1926). The fullest and most sophisticated portrait of Russian Jewry during the last decade of czarist Russia, at the time of the Revolution and the civil war, and in its first years under Soviet rule is found in the works of Isaac *Babel.

During the 1930s the manner in which Jews were portrayed in Soviet fiction, poetry, and drama underwent a sig-

nificant change. Not only heroes, but also villains and even marginal characters were no longer, as a rule, described as Jews – persons with specifically Jewish problems, hopes, and aspirations – but rather as Soviet men and women whose Jewish origin could only be guessed from their names, or from fleeting references to their family backgrounds. This can only partly reflect the changes that actually took place in Soviet Jewry. Much of the explanation must be sought in the already stringent political controls imposed on Soviet literature. Two examples of such literary characterization are the enthusiastic engineer Margulis in Valentin Katayev’s (1897–1986) “production novel” *Vremya, vperyod!* (“Time, Forward!,” 1932), and Davydov, the organizer of a collective farm, in *Podnyataya tselina* (“Virgin Soil Uplifted,” 1932–59) by the Nobel Prize-winning novelist Mikhail Sholokhov (1905–1984). The latter case is particularly noteworthy in view of the fact that, in the novel, Davydov’s Jewish background is almost imperceptible, despite the fact that he was partly modeled on a real-life Jewish Communist.

The artificiality and insincerity in Soviet literature’s portrayal of Jews during the 1940s is particularly striking in works dealing with World War II. At a time when the Nazi extermination of Jewish civilians and prisoners of war must already have been common knowledge, these continued to portray Soviet people of Jewish birth as almost completely unaware of their Jewishness. This fact, and the enforced tendency to avoid Jewish subjects altogether, is corroborated by the memoirs of Ehrenburg, which were published during the relatively liberal years following Stalin’s death. The contrived nature of the portrayal of Jews in Soviet literature during the late 1940s and early 1950s is further evident from the fact that the few “positive” Jewish heroes found in Soviet writings of the period – such as the engineers Liberman and Zalkind in Vasili Azhayev’s (1915–1968) novel *Daleko ot Moskvy* (“Far from Moscow,” 1948) – display no awareness of the existence of antisemitism in the U.S.S.R. itself. Confirmation of this assumption may again be found in the memoirs of Soviet writers, notably Ehrenburg and Samuel *Marshak.

The most important distortion, however, took the innocuous form of silence. At a time when Jewish and non-Jewish writers throughout the world were shaken and inspired by the two most important events in the past 2,000 years of Jewish history – the Nazi massacre of 6,000,000 Jews and the reestablishment of an independent Jewish state – Soviet literature affected a pose of indifference and apathy. Nor, understandably, was there any reaction in Soviet literature to the wave of officially inspired antisemitism then sweeping the U.S.S.R. Very muted echoes of this can be found in Soviet writing of the post-Stalin era, such as Ehrenburg’s novella *Ottepel* (1954; *The Thaw*, 1955) and Yevtushenko’s poetry. By 1970, problems such as Soviet antisemitism and Jewish identity were dealt with only in underground literature circulating illegally in the U.S.S.R., much of it actually published in the West. The most notable writer in this category was the non-Jew Andrey Sin-yavski (1915–1997), whose works appeared under the Jewish-

sounding pseudonym Abram Tertz. Particularly interesting are his *Fantasticheskiye povesti* (1961; *Fantastic Stories*, 1967), and the novels *Sud idyot* (“The Trial Begins,” 1959) and *Lyubimov* (1964; Eng. tr., *The Makepeace Experiment*, 1965). Other “underground” writers included Yuli *Daniel, whose works appeared under the pseudonym Nikolay Arzhak, and Yosif *Brodski. Sinyavski, Daniel, and Brodski were all sentenced to varying terms of forced labor.

The Jewish Contribution

Since the late 19th century, hundreds of Jews have played an active, and often major role in Russian literary affairs. As in Germany, there was at first a tendency for Russian Jewish writers to accelerate their assimilation through baptism: the poet and essayist Nikolai *Minski and his brother-in-law, the literary scholar Semyon *Wengeroff, were two such converts. The feuilletonist Miron (Meyer) Davidovich Ryvkin (1869–1915), who wrote for Jewish and liberal journals, successfully conveyed the atmosphere of the *shtetl. His historical novel *Navet* (1912; Yid. tr., *Der Velizher Blut-Bilbl*, 1913) dealt with a blood libel. After the Bolshevik Revolution a number of Jewish writers left Russia. They included the critic Yuli *Aikhenvald (who was expelled in 1922); the novelist Mark *Aldanov; the poets Sasha *Cherni and V.F. Khodasevich; and the playwright Lev Natanovich *Lunts. Another émigré, Mikhail Osipovich Zetlin (1882–1945), was the author of *Dekabristy – Sudba odnogo pokoleniya* (1933; *The Decembrists*, 1958) on the 1825 insurrection. Among those who remained in the U.S.S.R. were David *Aizman; Mikhail *Gershenzon, who promoted Hebrew culture but fought Zionism; and Ilya Ehrenburg.

Despite the pressures of Soviet life, Russian Jewish writers were as active in the “liberal” camp as among the conformists. Rejection of or indifference to the Jewish heritage characterized the first post-revolutionary generation of Jewish authors, which included the Komsomol poet Alexander Bezymenski (1898–1973); the humorist Ilya *Ilf; the eminent poet Osip *Mandelshtam, who had an obsessive dislike of everything Jewish; the Nobel Prize-winning poet and novelist Boris *Pasternak, author of *Doctor Zhivago* (1957; Eng. tr., 1959); the half-Jewish author and critic Victor Shklovski (1893–1984); and the novelist and literary scholar Yuri *Tynyanov. The critic Abram Zakharovich Lezhnev (1893–1938) wrote *Sovremenniki* (“Contemporaries,” 1927), which contains three chapters on Babel, Pasternak, Selvinski, and Utkin, and *Proza Pushkina* (1937). The philosophy of Jewish assimilation under the Soviet regime suffered a setback with the great purges of the 1930s, when Leopold *Averbach and Vladimir *Kirshon disappeared, and many other Jewish writers, notably the poet Joseph Utkin, were exposed to severe criticism. The problem of reconciling their Jewish identity with their Soviet allegiances preoccupied Isaac Babel (who was liquidated by the regime), Ilya Ehrenburg, Ilya Selvinski, and Mikhail *Svetlov. Like Ehrenburg, Emmanuil *Kazakevich, a former Yiddish writer from Birobidzhan, escaped the antisemitic excesses of the Stalin era and was a prominent “liberal” during the post-

Stalin thaw; while Samuel Marshak, the poet and translator, also survived, despite his evident “cosmopolitanism.” A decade or more after Stalin’s death many Jewish writers in the U.S.S.R. still felt the weight of Soviet oppression. Vladimir *Admoni was a defense witness at the 1964 Brodski trial; Vasili *Grossman courageously attempted to document Nazi crimes against the Jews in the face of official displeasure; Lev Kopelev (1912–1997), an ally of Alexander Solzhenitsyn (1918–), was a dissident literary scholar.

There are relatively few translations from Hebrew literature into Russian, although translations from Yiddish literature are quite numerous, some of them – above all those of *Shalom Aleichem – among the most effective in any language. This is due partly to the traditional excellence of the art of literary translation in Russia, and partly to the fact that the Yiddish language lends itself well to translation into Russian, since both have two distinct lexical components: the lofty with religious overtones (Hebraisms in Yiddish and Church Slavonicisms in Russian), and the informal vernacular (Germanic in Yiddish, and common speech in Russian). There are numerous successful translations of Russian literature into Hebrew. The most noteworthy are *Shlonsky’s poetic version of Pushkin’s *Eugene Onegin* (1937, 1953⁴) and Lea *Goldberg’s translations from several Russian authors.

[Maurice Friedberg]

RUTENBERG, PINHAS (Piotr; 1879–1942), prominent figure in the revolutionary movement in Russia, *yishuv* leader, and pioneer of modern industry in Erez Israel. Born in Romny, Ukraine, Rutenberg graduated from St. Petersburg Technological Institute and was first employed at the large Putilov metallurgical works. As a student he became active in the revolutionary movement (first as a Social Democrat and then a Social Revolutionary) and was imprisoned several times. He marched with Father Gapon on “Bloody Sunday,” which ushered in the 1905 Revolution, and helped Gapon flee from Russia. A year later, when the Social Revolutionaries came to the conclusion that the priest was serving as a police agent, Rutenberg was instructed by the party to organize Gapon’s execution. He spent the years 1907–15 in Italy, working as an engineer and specializing in irrigation. During the latter part of this period, he became interested in Jewish affairs, and after the outbreak of World War I he went to London to urge Zionist leaders to raise Jewish military units for the liberation of Palestine. When he learned of Vladimir *Jabotinsky’s interest in the matter, Rutenberg contacted him to assure joint ac-

tion and went to the U.S. in 1915 to propagate the idea. There Rutenberg became involved in the campaign for the creation of the first American Jewish Congress, which was to formulate Jewish proposals to be brought before the Peace Conference at the conclusion of war. While in America, he drew up a comprehensive irrigation plan for Palestine. He also published a Yiddish translation of a pamphlet he had written in Italy under the title *The National Revival of the Jewish People* and signed "Pinḥas Ben-Ammi."

With the overthrow of czarist rule in Russia at the beginning of 1917, Rutenberg left the U.S. for Petrograd, where Kerensky appointed him deputy governor of the capital in charge of civilian affairs. During the Bolshevik coup, on Nov. 7, Rutenberg, was among the last defenders of the site of the provisional government in the Petrograd Winter Palace. Some six months of imprisonment followed, after which he went to Moscow to work for the Center of the Russian Cooperative Organizations, and soon escaped to Kiev, capital of the temporarily independent Ukraine. At the end of 1918, he left for Odessa, where he joined a French-sponsored "White" Russian government that did not last long. By the middle of 1919, Rutenberg left Russia forever. When he came to the conclusion that there was antisemitism even in revolutionary movements, he went to Palestine (November 1919).

With some aid from the Zionist Organization, Rutenberg organized a survey of the country's water resources, mainly of the Jordan River, as a prerequisite to obtaining a government concession to develop the potential of these resources and supply the country with power. For practical reasons, stress was laid on the hydroelectric aspects of his planning, and the proposal was then brought before the first postwar Zionist Conference in London (1920). Together with Jabotinsky, Rutenberg organized the self-defense in Jerusalem at the time of the Arab riots in 1920; in 1921 he became head of Haganah in Tel Aviv and also served as adviser to the Anglo-French commission for the delimitation of Palestine's northern boundaries.

After he overcame great financial and political difficulties, Rutenberg established the Palestine Electric Company (1923), which was subsequently granted a concession to use the waters of the Jordan and Yarmuk rivers for the supply of energy (see Israel, State of: *Economic Affairs (Energy Sources)). Initial successes enabled him to secure the services of outstanding personalities as heads of the company's board: Lord Melchett, Lord Hirst, Lord *Samuel, and Lord *Reading. Preoccupied with company affairs, Rutenberg could no more than follow, and indirectly influence, internal affairs of the *yishuv*, but in the crisis year 1929 he was called upon to head the Va'ad Le'ummi and use his considerable influence with the Mandatory administration. He left the Va'ad Le'ummi after the crisis had passed, but joined it again in 1939. In the 1930s he cooperated with a number of other Jewish personalities (including Judah L. *Magnes, M. *Novomeysky, Moshe *Smilansky, G. *Frumkin) in search of a program for Arab-Jewish understanding. Though he had the ear of King *Abdul-

lah of Transjordan, nothing came of his efforts. Domestically, Rutenberg sought to remove the acute friction between the *Histadrut and the *Revisionists. Through his good offices, David *Ben-Gurion and Jabotinsky negotiated an agreement in 1934 which failed, however, to be ratified by the Histadrut. At the beginning of World War II, he again became president of the Va'ad Le'ummi but his health soon failed, and he died in Jerusalem. Before his death, Rutenberg addressed a special call for national unity to Jewish youth and willed his possessions to the Rutenberg Foundation for youth activities; his house on Mount Carmel subsequently became a large and active youth center.

[Moshe Medzini]

RUTH, BOOK OF (Heb. מִגְּלַת רוּת), one of the five scrolls incorporated in the *Ketuvim* (Hagiographa) section of the traditional Hebrew Bible. In the Septuagint, followed by Christian Bibles, Ruth is found immediately after Judges.

Contents

In the days of the Judges, Elimelech, of Beth-Lehem in Judah, immigrated with his wife Naomi and his two sons Mahlon and Chilion to Moab on account of famine. He died there and so did his two sons, who had married Moabite women, Orpah and Ruth. Left without either husband or sons, and having no grandchildren, Naomi decided to return to Beth-Lehem. The two daughters-in-law wanted to move to Judah with her, but she bade them stay in their homeland. Orpah obeyed but Ruth vowed that she would share the fortunes of her mother-in-law. Arriving in Beth-Lehem at the beginning of the grain harvest, Ruth took advantage of the privilege of gleaning which custom accorded the poor. The field she came to glean in belonged to a prosperous farmer by the name of Boaz. When Naomi learned that Boaz had shown Ruth special kindness out of appreciation for her devotion to her mother-in-law, she was doubly delighted because Boaz was a kinsman of Elimelech, and hence of Ruth's dead husband Mahlon, and the old woman could see a prospect of a levirate marriage for Ruth. The levirate marriage with Ruth involved the redemption of the land of the dead husband, which Naomi had sold. Boaz consented to marry Ruth and to redeem the land. Thus he fulfilled the ancient patriarchal duty of "establishing the name of the dead upon his inheritance" (Ruth 4:5; cf. Deut. 25:6). Through this marriage Boaz became the ancestor of King David.

Aim of the Book

The book concludes with the genealogy of David (4:17–22), which was highly significant to the author. One aim of his was to present in an idyllic way the origin of the great king David. A similar, though less idyllic, account is found in the story about Judah and Tamar (Gen. 38), the parents of Perez, an even earlier ancestor within the Davidic genealogy. The

circumstances of the birth of Perez in that story are similar to those of the birth of Obed, the grandfather of David, in the story of Ruth. Perez was born by a levirate marriage and so was Obed; in both cases it was not the proper levir – Latin for “brother-in-law,” or the nearest relative (Ruth 3:12) – who performed his duty of levirate marriage (cf. Deut. 25:1–10), but another kinsman. Both stories concern a woman of foreign stock (Tamar – Canaanite; Ruth – Moabite) and in both of them the woman waiting for levirate espousal resorts to a stratagem in order to obtain it. Tamar sits on the crossroads disguised as a prostitute in order to allure Judah (Gen. 38:14), while Ruth, at night, lies down at the feet of Boaz who is sleeping on the threshing floor (3:1ff.). The author of the story of Ruth bears this analogy in mind and finds an opportunity to recall the older story by having the people and the elders of the town bless Boaz: “Let your house be like the house of Perez whom Tamar bore to Judah” (4:12). The provenance of the house of Perez and of the House of David is thus recounted in a similar way.

Furthermore, from the literary point of view the stories of Judah and Boaz contain the motif that also underlies the stories of the Patriarchs: the obstacles put in the way of the emergence of an important family in the history of the nation. The stories of the Patriarchs especially reflect the difficulties that lay in the way of the continuation of the line of the chosen people. The stories about the births of Isaac and Jacob exemplify how much was at stake when the national heroes were about to be born. One cannot avoid mentioning in this context the similarity in circumstance between the birth of Jacob and Esau on one hand and Perez and Zerah on the other. In both instances the favored son, Jacob in one case and Perez in the other, was actually not the first born, but attained his primogeniture through force or cunning. The rejected sons, Esau and Zerah, are both affiliated with Edom (for Zerah cf. Gen. 36:17; 1 Chron. 1:37), the harsh enemy of David (1 Kings 11:15–16). Both stories have certain identical stylistic formulations (cf. Gen. 25:24 with 38:27).

The connection between the Davidic and the patriarchal genealogies becomes more salient when the two following facts are taken into account: (1) The superscription of the genealogical line *toledot* (תולדות), outside of the Pentateuch (the Priestly strand), is found only in Ruth 4:18. (2) Malamat (JAOS, 88 (1968), 163ff.) has shown that royal genealogies in the Ancient Near East were constructed according to the following lines: (a) the genealogical stock, whose formulation is mostly artificial, referring to some common ancestors of various ethnic groups, which is parallel to the genealogical list in Genesis 11:10–26; (b) the determinative line which delineates the specific descent of the dynasty or the people, as Abraham, Isaac, and Jacob in Israel; (c) the actual pedigree of the king involved (as Ruth 4:18–22). The first and third listings usually comprise ten generations, whereas the second is a short list usually of two or three generations. The linkage of the third to the second list in this case has been shown above, and in the light of the fact that the Pentateuchal sources were certainly

not crystallized before David, it stands to reason that, as in Mesopotamia, so also in Israel the genealogy of the first type is also to be considered an organic part of the royal genealogy ending with David. Thus there is no justification for the view that the genealogy does not form an integral part of the book and that it is an addition to the book.

The Davidic genealogy is especially significant because it bolsters the book's subtle but forceful protest against the Ezra-Nehemiah attitude toward foreign women (Ezra 9–10; Neh. 13:23–29); had Boaz not married the Moabite woman Ruth, the line of Perez would have ended and David would never have been born.

Theology

As is true in some of the stories of Genesis and the succession narratives of David, so also in the Book of Ruth the events occur in the human realm. Miracles and angelic figures are absent, and God works behind the scenes. The occurrences, which look like a chain of natural happenings evolving one from the other, reveal themselves in the end as the outcome of God's plan. So, for example, in the story of Joseph the events are moved and motivated by purely human impulses. However, the narrator reveals in two brief sentences (Gen. 45:7; 50:20) that all these complex events are none other than the realization of God's plan. There is no chance happening in this world; whatever happens is caused by God (cf. 11 Sam. 16:10–11). The events in David's court also seem to be caused by purely human motivation: Conflicts in connection with the struggle for the crown. However, for the author these stories come to demonstrate the way of the realization of God's plan to establish David's throne through the enthronement of Solomon.

The Book of Ruth, which also recounts a natural story in which everything moves by human agents and, as it were, without divine interference, actually serves as a testimony to the wondrous ways in which God leads human destiny. Ruth “happens” to choose, as if at random, the field of Boaz (2:3) but that choice turns out to be the decisive act for the birth of David, the illustrious king of Israel. Naomi indeed attributes her success in this coincidence to God, “who did not withhold His kindness from the living and the dead” (2:20). This is reminiscent of Abraham's servant who asks God “to make it happen today” (Gen. 24:12), i.e., to enable a proper choice, and indeed after it becomes clear to him that his wish has been realized, he proclaims: “Blessed be the Lord who has not withheld His steadfast kindness from my master. For I have been guided on my way by the Lord” (24:27). The phrase “[God] who did not withhold His kindness” is found in the Bible only in these two instances, which is not without significance.

Date of Composition

The Book of Ruth was written not before the period of the Monarchy, which is clear from the genealogy at the end of the book, terminating with David. The opening verse of the book, “In the days when the judges ruled,” also attests to the fact that the book was written at a time when the period of the

Judges belonged to the historical past. From one statement in the book one may even get the impression that at least a few generations have passed since the occurrence of the events: “This was formerly done in Israel in cases of redemption and exchange: to validate any transaction one man would take off his sandal and hand it to the other” (4:7). Temporal distance made it necessary for the author to explain this forgotten practice to the audience.

The atmosphere of the Book of Ruth, set in the period of the judges, is idyllic. The good characters, Orpah and the anonymous kinsman, are contrasted with the superlative characters, Ruth, Boaz, and Naomi. Judges, although set in the same period, is full of violence, murder, pillage, and rape. Nevertheless, Judges and Ruth have in common their depiction of women who manage to get what they want within the limitations of an ancient society dominated by men. Given the dominance of female characters in Ruth and the presence (at least attempted) of a female point of view, and the fact that there were literate women in the ancient world, a female author for Ruth is not an impossibility.

STYLISTIC-LITERARY EVIDENCE. The late author of Ruth was familiar with many of the earlier writings that make up the Hebrew Bible, and used them in the construction of his own book. Sometimes the references are direct, at other times allusive. The love of Naomi and Ruth is reminiscent of the love of David and Jonathan. As Jonathan pledges love and loyalty to David (I Sam. 18:1–3; 20:12–13, 17) so does Ruth to Naomi (1:16–17), and in both cases a common formula of imprecation is used: “Thus and more may the Lord do to me” (1:17; cf. I Sam. 20:13), which is found only in the Books of Samuel and in the North-Israelite narratives of the Books of Kings. The contents of the imprecation, “if (even) death part me from you” (Ruth and Naomi will be buried in the same place), are reminiscent of the words of David in his elegy over Saul and Jonathan that they were not parted in life or death (II Sam. 1:23).

The book provides an archaic flavor by using expressions of gracious manners characteristic of the patriarchal narratives and the Books of Samuel. The meeting of Boaz and Ruth concludes with the prostration of Ruth (2:10) and words of praise and appreciation by Boaz (2:11–12), which is similar to the encounter of David with Abigail in I Samuel 25:23 ff. Abigail “prostrates with her face to the ground,” like Ruth, and David, like Boaz, praises Abigail for her courage and good qualities. At the second meeting with Ruth, Boaz exclaims: “Be blessed to the Lord” (3:10), a formula also found at the meeting of David and Abigail (I Sam. 25:32–33) and in the narratives of the Book of Genesis (24:31; 14:19), and elsewhere in the Books of Samuel (I Sam. 15:23; II Sam. 2:5). The manner in which thankfulness is expressed in the Book of Ruth is also very instructive. Reacting to the praise of Boaz, Ruth says: “I am grateful to you [אֲמַצָּה הָן בְּעֵינַיִךְ] my lord, for comforting me and speaking kindly to your maidservant” (2:13). The usage of אֲמַצָּה הָן בְּעֵינַיִךְ for expressing gratitude is common in the books

of Genesis and Samuel (Gen. 33:9; 47:25; I Sam. 1:18; II Sam. 16:4). Bidding farewell in Ruth is expressed by “kissing” (and also “weeping,” 1:9, 14) which is similar to farewell expressions found in Genesis (31:28; 32:1; 50:1), Samuel (II Sam. 19:40), and the North-Israelite narratives of Kings (I Kings 19:20).

Other clichés in the Book of Ruth that draw on earlier Israelite literature worthy of mention are 1:1: “he and his wife” (cf. Gen. 13:1); 1:2: “The man’s name... his wife’s name” (cf. I Sam. 25:3); 1:4: “The name of the one... and the name of the other” (cf. Gen. 4:19; I Sam. 1:2); 1:9, 14: “to lift up the voice and weep” (i.e., to weep aloud; cf. Gen. 21:16; 27:38; 29:11; cf. 45:2; I Sam. 24:17; 30:4; II Sam. 3:32; 13:36; Job 2:12 – on the patriarchal atmosphere of Job cf. Sarna, in JBL, 76 (1957), 13–25); 1:16–17 (cf. Judges 17:8–9); 1:19: “The whole city buzzed with excitement” (cf. I Kings 1:41); 2:5: “Whose” (לְמִי; cf. Gen. 32:18; I Sam. 30:13); 2:8: “here” (כֹּה; cf. Gen. 22:5; 31:37; Ex. 2:12; Num. 11:31; 23:15; II Sam. 18:30); 2:12: “reward” (מִשְׁכָּרְתָּךְ; cf. Gen. 29:15; 31:7, 41); 2:14: “come here” (גָּשִׁי הֵלֶם; cf. I Sam. 14:38); 2:20: “who did not withhold his kindness” (cf. Gen. 24:7); 2:21: “until they finish” (עַד אִם כֻּלּוֹ; cf. Gen. 24:19); 3:7: “eat and drink and be in cheerful mood” (cf. Judg. 19:6 [9]; I Kings 21:7); 3:7: “come in stealthily” (cf. Judg. 4:21); 3:8: “[it was] in the middle of the night” (cf. Ex. 12:29); 3:16: “How is it with you?” (מִי אַתָּה; cf. Judg. 18:8; and see S. Loewenstamm, in: *Leshonenu*, 23 (1959), 74); 4:1: “so and so” (פְּלוּנִי אֶלְמוּנִי; cf. I Sam. 21:3; II Kings 6:8 as against Dan. 8:13); 4:4: “tell” (גִּלְהָ אֶזְרָא; cf. I Sam. 9:15; 20:2, 12, 13; 22:8, 17; II Sam 2:27); 4:7: “formerly done in Israel” (לְפָנִים בְּיִשְׂרָאֵל; cf. I Sam. 9:9); 4:9: “You are witnesses today” (cf. Josh. 24:22); 4:15: “better to you than seven sons” (cf. I Sam. 1:8). All these phrases and expressions are found in settings no later than the ninth or early eighth century B.C.E. But setting must be distinguished from time of composition. There are numerous Aramaisms and late linguistic traits in Ruth, such as: לְקִים דָּבָר (4:7) instead of לְהַקִּים דָּבָר (“to confirm a promise/pact/deal”; cf. Num. 23:19; Deut. 9:5; I Sam. 3:12; ḡn, (Ruth 1:13) not known elsewhere in the Bible, but well-known in rabbinic *agunah*, “bound woman”; *qnh l’sh*, “take as wife,” is very close to Mishnaic Hebrew usage. Most important though for purposes of dating is the fact that the author knows most of the Bible, including late sources such as Leviticus and Job, and makes use of it for his own purposes. (For examples of borrowings see Zakovitch, 24–32.) During the Persian period of Jewish history (539–331) when Ruth was written, the question of personal status had become acute. Late books of the Bible that stem from this period reflect differing attitudes about the possibility of a non-Jew becoming a Jew. In contrast to Ezra-Nehemiah, according to which there are no means for those not born to the “holy seed” (Ezra 9:3, legal midrash on Isa. 6:13) to become Jews, the author of Ruth makes it possible for a foreigner to find protection under the wings of ὕλη (Ruth 2:12). Ruth’s author effectively repeals the exclusion of Moabites (Deut 23:4) enforced in Nehemiah 13:23–27, which appeals to the precedent of how Solomon strayed by taking foreign wives. Instead, the Book of Ruth points to the precedent of the ancient worthies who built up the house of Israel

by ignoring the letter of the law when the growth of the house of Israel was at stake. Thus, Jacob's marriage to the two sisters Rachel and Leah (Ruth 4:11) violated Leviticus 18:18, and Tamar's union with Judah (Ruth 4:12) violated Leviticus 18:15. As such, one need not worry about the restriction of Deuteronomy 23:4. The qualities of a foreigner are more important than her origins. Ruth, whose foreign origin is repeatedly emphasized (1:22; 2:2, 6, 8, 21; 4:5, 10), is an *eshet hayil* (Ruth 3:11) "virtuous woman," worthy of Boaz the *gibbor hayil* "virtuous hero" (Ruth 2:1). Incidentally, the author of Ruth may have been influenced by the fact that the author of *eshet hayil* of Proverbs 31 has a husband "known in the gates when he sits among the elders" (Prov. 31:23; cf. Ruth 4:1–13).

The Place of the Book in the Canon

Talmudic tradition ascribes the book to the Hagiographa (BB 14b), but this is based on the opinion that the Canon contains 24 books. A variant tradition (Jos., Apion, 1:39) speaks only of 22 books in the Bible. According to this system, Ruth is attached to the Book of Judges and Lamentations to Jeremiah, an arrangement adopted by the Septuagint. According to the order of the Five *Scrolls in modern Hebrew Bibles, Ruth is the second scroll after Song of Songs, because the latter is to be recited on Passover whereas Ruth is to be read on Shavuot. The order in the talmudic source quoted above is different: Ruth opens the Hagiographa preceding the Psalms. Here the sequence is a historical one. Ruth relates to the period of the Judges while Psalms is attributed to David, who is later.

The Book of Ruth was one of the first biblical books to be examined through the lenses of "the Bible as literature" approach (Rauber).

[Moshe Weinfeld / S. David Sperling (2nd ed.)]

In the Aggadah

Ruth was a daughter of the king of Moab (Ruth R. 2:9). After the death of Mahlon, Naomi attempted to dissuade her from returning to Erez Israel lest she be treated contemptuously as a foreigner (*Midrash Zuta* to Ruth 1:8). Ruth is regarded as the prototype of the righteous convert. Naomi could not discourage her from taking this step although she told her of the stringencies of Jewish law and that its transgression would entail corporal and capital punishments from which she was hitherto exempt (Ruth R. 2:24). When Naomi told her that Jewish daughters do not frequent theaters and circuses, she replied, "Whither thou goest, I will go"; when informed that Jewish daughters only dwell in houses sanctified by *mezuzot*, she responded: "where thou lodgest, I will lodge"; "thy people will be my people" implied "I will destroy all idolatry within me"; and "thy God shall be my God" to repay me the reward of my deeds (Ruth 1:16; Ruth R. 2:22, 23). They arrived on the day that the wife of *Boaz was buried (BB 91a). Ruth's piety impressed Boaz when he noticed that she did not glean the fields if the reapers let more than two ears fall since the gleanings assigned to the poor by the law refer only to two ears inadvertently dropped at one time. He also admired her grace, decorum, and modest demeanor (Ruth R. 4:6; *Midrash Zuta*

to Ruth 2:3). After Naomi made her a party to her plan to force Boaz into a decisive step, Ruth strictly adhered to her directions except that she did not wash, anoint, and finely clothe herself until after she reached her destination, since she feared to attract the attention of the lustful (Shab. 113b). The next day she was taken in marriage by Boaz, who was 80 years of age. Ruth herself was barren and 40 years old at the time, and it was against all expectations that this union should be blessed with issue (Ruth R. 7:14). Possibly because she retained her original name even after her conversion, it is interpreted as meaning that she was the ancestress of *David, "who saturated ("רוה") the Holy One, blessed be He, with songs and hymns" (Ber. 7b). Another explanation is that she considered well (*ra'atah*) the words of her mother-in-law (Ruth R. 2:9).

See also *David and *Ammonites and *Moabites in *halakhah*.

[Aaron Rothkoff]

In the Arts

Despite the grandeur of Ruth's story and the romantic appeal of her religious identification and the dynastic link with King David, she has inspired surprisingly few important works in the arts. The subject was muted in literature of the Middle Ages, first appearing significantly in the 17th century with three works in Spanish: João Pinto *Delgado's poem *Ruth* (1627), Tirso de Molina's drama, *La mejor espigadera* (1634), and an *auto sacramentale* by Pedro Calderón de la Barca. The new literary movements of the 19th century directed fresh attention to the potentialities of the subject. Karl Streckfuss wrote the German epic *Ruth* (1805) and there were a number of dramas, including two in French, both entitled *La Moabite*, by Henri Bornier (1880) and the patriotic writer Paul Déroulede (1881). One of the most memorable evocations of the theme occurs in the English poet John Keat's "Ode to a Nightingale" (1819) with the lines: "Perhaps the self-same song that found a path/Through the sad heart of Ruth, when, sick for home,/She stood in tears amid the alien corn..." Perhaps the outstanding 19th-century treatment was, however, "Booz endormi," one of the "petites épopées" included in Victor Hugo's *La Légende des siècles* (1859), which is generally regarded as among Hugo's finest poems. The theme was not neglected by Jewish writers of the period: In Germany Isaac Jojade Cohn published a three-act Hebrew play, *Bo'az ve-Rut* (1834); Emanuel Baumgarten wrote the poem, *Rut, MeliZah...* (1885); and Solomon Rosenzweig was the author of another Hebrew play, *Rut Torat Hesed* (1893).

Twentieth-century works about Ruth have covered a wider range of languages, beginning with Siegmund Werner's *Ruth, und andere Gedichte* (1903). Many appeared between the world wars, such as Pilar Millán Astray's three-act Spanish play *Ruth la Israelita* (1923); and Emanuil Pop Dimitrov's Bulgarian *Rut*; and *Boass un Rute* (1926), a Lettish play by Aspazija (Elza Rozenberga). The subject also attracted the attention of Yiddish writers: Victor Spritzer's *Rut; Dramatische Poeme* appeared at Buenos Aires in 1933, and Saul Saphire wrote *Rut; Biblischer Roman fun der Tsayt fun di Shoftim* (1936). Modern

interest in and reinterpretation of the Ruth theme acquired new significance both during and after the Nazi era. Poems were written by Else *Lasker-Schueler (“Boas”) and Yvan *Goll (“Noémi”); and the works which appeared after World War II included a novel, *Ruth*, by the U.S. author Irving *Fineman (1949) and Frank G. Slaughter’s *The Song of Ruth. A Love Story from the Old Testament* (1954).

In art, Ruth appears in medieval manuscripts from the 12th century onward, including the 12th-century *Admont Bible* (State Library, Vienna), a late 13th-century Franco-German **maḥzor* (British Museum, additional 22413), in which a harvesting scene depicting Ruth and the gleaners illustrates the prayers for Shavuot; and the 14th-century *Queen Mary Psalter* (British Museum) and *Bible of Jean de Papeleu* (Arsenal Library, Paris). The subjects treated are Ruth gleaning and, more rarely, Boaz taking Ruth to wife. In the 17th century, the magnificent painting of Summer by Nicolas Poussin in the Louvre, one of four illustrating the seasons, also shows Ruth among the gleaners. This study of the abundance of nature is full of memories of the classical world. The English poet and painter William *Blake executed a stark watercolor painting (Victoria and Albert Museum, London) of Naomi, Ruth, and Orpah in the land of Moab. The modern Israel artist Jakob *Steinhardt illustrated the Book of Ruth with woodcuts (1957).

RUTH RABBAH (Heb. רות רבבה), aggadic Midrash on the Book of *Ruth, the product of Palestinian *amoraim*.

The Name

The *editio princeps* was called *Midrash Ruth*, the title *Ruth Rabbah* being derived from later editions (from that published in Venice, 1545, and onward) in which the work was printed together with Midrashim on the other Scrolls (Song of Songs, Lamentations, Ecclesiastes, Esther) and with five on the Pentateuch, the whole commencing with Genesis *Rabbah. Hence, the general designation of *Rabbah* applied to all these Midrashim (see *Midrash).

The Structure

Ruth Rabbah is an exegetical Midrash which expounds the Book of Ruth chapter by chapter, verse by verse, and, sometimes, word by word. It is a compilation, made by the redactor, of various expositions. In the printed versions, the Midrash is divided into eight sections with introductory poems. Actually there are only four sections, each introduced by a poem or poems, the division being as follows:

- (a) from the beginning of the proems to the end of section 3;
- (b) sections 4–5;
- (c) sections 5–7;
- (d) section 8.

The work has apparently a total of ten proems, these being of the classical type found in amoraic Midrashim, in that they commence with an extraneous verse, taken usually from the Hagiographa, which is expounded and then connected with the one treated at the beginning of the section. While some of the proems are anonymous, others are stated in the name of a sage. The first original section concludes with an assurance and consolation (in the printed versions, at the end of section 3).

The Language

Ruth Rabbah is written mainly in mishnaic Hebrew, and, to a certain extent (particularly the narrative parts), in Galilean *Aramaic, like the Jerusalem Talmud. It also contains many Greek words.

The Redaction

The redaction drew upon tannaitic literature, the Jerusalem Talmud, *Genesis Rabbah*, *Leviticus *Rabbah*, *Lamentations *Rabbah*, and *Pesikta de-Rav *Kahana*. Zunz’s assertion that the Babylonian Talmud was used as well has been disproved by *Albeck. The sages mentioned in the Midrash flourished not later than the end of the fourth century C.E. It seems, therefore, that the work was redacted in Erez Israel and belongs to the early amoraic aggadic Midrashim. Since, however, it drew on *Pesikta de-Rav Kahana*, it is difficult to assign the compilation of *Ruth Rabbah* to a date prior to the sixth century C.E.

Editions

Ruth Rabbah, first published at Pesaro in 1519 together with the four Midrashim on the other Scrolls (to which it bears no relation), has often been reprinted on the basis of this *editio princeps*. The printed versions are quite defective.

[Moshe David Herr]

°**RUTILIUS NAMATIANUS**, holder of a civic post in Rome in 416 C.E. In a poem commemorating his return to his native Gaul, he describes how, at Faleria (Falesia) on the Tyrrhenian coast (near present-day Piombino), his party met the Jewish keeper of a fishpond. The inhospitality of the Jew prompted Rutilius to condemn the Jews as a disgusting and overly influential race whose presence in Rome was to be regretted. He speaks contemptuously of their dietary laws, circumcision and Sabbath, and voices the familiar Roman anti-Jewish sentiments.

[Jacob Petroff]

°**RUTLAND, SUZANNE** (1946–), Australian historian. Probably the first academic historian to write on Australian Jewish history, Sydney-born Suzanne Rutland was the author of one of the first modern accounts of the Jews in Australia, *Edge of the Diaspora* (1988), and a history of the Jewish press in Australia, *Pages of History* (1970; 1995²), as well as other works in this field. She taught at the University of New South Wales and was the editor of the Sydney edition of *The Australian Jewish Historical Society Journal*.

[William D. Rubinstein (2nd ed.)]

RUWANDIZ (Rawanduz, Rowanduz), district town in the province of Irbil in Iraqi *Kurdistan. In Ruwandiz there was an ancient Jewish community which suffered a great deal at the hands of cruel governors. During the 17th century the two *paytanim*, R. Isaac b. Moses Ḥariri and his son R. Phinehas (Pinḥas), who wrote several *piyyutim* and kabbalistic works, lived there. The situation of the Jews improved to some extent at the beginning of the 19th century with the Turkish occupation. In 1848 *Benjamin 11 found a number of wealthy Jews led by the *nasi* Mu'allim Nissim, who owned fields and vineyards. The Jews were engaged in agriculture and they spoke Jebel ("mountain") Aramaic. In 1881 there were about 50 to 60 Jewish families; from 1884 to 1906, 120 Jews; in 1910, 40 families; and in 1914, 100 Jews. The penetration of the Russians into Kurdistan in 1915 liquidated this community. The synagogue was destroyed together with its *Sifrei Torah*. The community was renewed after World War 1. According to the official census of 1930, there were 17,787 inhabitants in the whole district of Ruwandiz, of whom 250 were Jews. In 1932 there were 20 Jewish families with a synagogue. All emigrated to the State of Israel.

[Abraham Ben-Yaacob]

RUZHANY (Pol. **Różana**; Yid. **Rozhanoy** or **Rozhinoy**), town in Brest district, Belarus; within Poland-Lithuania until the partitions of Poland and between the two world wars. The community of Ruzhany, which was placed under the jurisdiction of the community of Brest-Litovsk by the Lithuanian Council in 1623 (see *Councils of the Lands), existed before that date. From 1662 it is mentioned as an independent community. Following a *blood libel in Ruzhany in 1657, attacks on the Jews by the Christian populace were prevented by the owner of the town. However, agitators demanded that two of the community's notables be handed over to them, and as a result R. Israel b. Shalom and R. Tobias b. Joseph were executed on the second day of Rosh Ha-Shanah. A special *seliḥah* in their memory was written by the son of R. Israel, and it was read every year during the *ne'ilah* prayer of the Day of Atonement.

The Jews of Ruzhany suffered during the Polish civil war and the Russian-Swedish War (1700–10). In 1721 the Ruzhany community paid 1,100 zlotys in poll tax, the same amount as the Vilna community and only slightly less than Minsk. However, by 1766 their number had declined to 326 in the town and

district (c. 154 in the town itself). By 1847 the Jewish population of the town had risen to 1,467; it numbered 3,599 (71.7% of the total population) in 1897; and 3,718 (66.2%) in 1921. Jews earned their livelihood from trade and crafts, mainly connected with the local fairs, industry and agriculture. Industries were established in Ruzhany from the beginning of the 19th century: there were six textile mills and a number of spinning mills employing about 2,000 Jewish workers, tanneries, and flour mills. Many families engaged in vegetable growing and cultivating orchards which they leased. In 1850 two Jewish agricultural villages were established near Ruzhany; some of their inhabitants were later among the founders of the moshavah *Ekron in Erez Israel. Jews from Ruzhany were among the first to join the Ḥovevei Zion, sending a delegate to the *Kattowitz conference in 1884. In 1904 a Jewish *self-defense group was organized which prevented pogroms. In 1905 revolutionary activities were organized by members of various parties.

During World War 1 Jewish-owned factories in Ruzhany were burned down and the Jews were robbed by the retreating Cossacks. In 1918, after the withdrawal of the German occupation forces, Polish "legionaries," with the help of the local population, attacked the Jews; several died and many houses were looted. After the war Jewish trade and crafts were severely affected by the Polish government's antisemitic restrictions. The local Gemilut Ḥasidim society was expanded into a cooperative people's bank. In this period many Jews left.

In 1923 a Yiddish secular school was established (later directed by the Central Yiddish School Organization, CYSHO). There were also a Hebrew *Tarbut school, a private elementary school, a Hebrew and Yiddish public library named after Peretz, and a theatrical company. Zionist groups were active.

Ruzhany was a center of Jewish learning. There existed a *heder*, a *talmud torah*, and a yeshivah. Notable rabbis of Ruzhany included R. Jonathan b. Joseph, author of *Yeshu'ah be-Yisrael* (Frankfurt, 1720), a work on astronomy; Avigdor b. Samuel ("Ḥarif") in the 18th century; R. Isaac Ḥaver, a leading Lithuanian rabbi (officiated 1819–1833); and Moredecai-Gimpel *Jaffe. Other Ruzhany personalities included the Zionist pioneer and author Jehiel Michael *Pines; I.T. Eisenstadt (d. 1893), author of *Da'at Kedoshim* (1897–98); A. *Luboshitzki (1874–1942), Hebrew author and poet; J. Krinski, pedagogue and author of educational textbooks; and Zelig Sher (Shereshevski), journalist active in the Jewish labor party in the United States.

[Dov Rabin]

Holocaust Period

There were about 3,500 Jews living in Ruzhany in 1939. During the period of Soviet rule (1939–41), Jewish community activities ceased. In April 1940 Jewish youth were drafted into the Red Army, and when the German-Soviet war broke out (June 1941) fought against Nazi Germany. Ruzhany was captured by the Germans on June 24, 1941. Twelve of the Jewish intelligentsia in Ruzhany were executed on July 12, and on July 14 another 18 Jews suspected of being Communists were killed.

An open ghetto was established in August of 1941. On Nov. 2, 1942, the entire Jewish population of Ruzhany was deported to Volkovysk; about 500 stragglers were shot by guards on the way. There they were concentrated in a camp of underground bunkers for the Jewish population of the entire area. On November 28, 1942 they were deported to the *Treblinka death camp. Jewish life in Ruzhany was not reconstituted after the war.

RUZHIN, ISRAEL (Friedmann; 1797–1850), ḥasidic leader. Israel was a great-grandson of Dov Baer, the Maggid of *Mezhirech. Ḥasidim claimed to recognize his outstanding qualities almost from birth. His uncle Mordecai of Chernobyl declared that the baby had the soul of the Ba'al Shem Tov. At the age of six Israel lost his father. At the age of 13 he married and moved to Botosani.

When Israel was 16 years old his brother Abraham died, and he was appointed to succeed him as the leader of the Ḥasidim. Possessed of great organizing ability, he rapidly established a large Ḥasidic center attracting thousands of followers. He then moved to Ruzhin where he set up a splendid "court" and like his father, Shalom Shakhna, lived in great luxury and unusual splendor. His dwelling place was that of a noble with all its opulence. He rode in a splendid carriage with silver handles, harnessed to four galloping horses, and surrounded by many servants. The ideological explanation given by Israel himself for his mode of behavior was that Satan is already involved in all the behavior of the Ḥasidic *Zaddikim*, although he is unaware that within the external extravagance and wealth a precious stone is concealed.

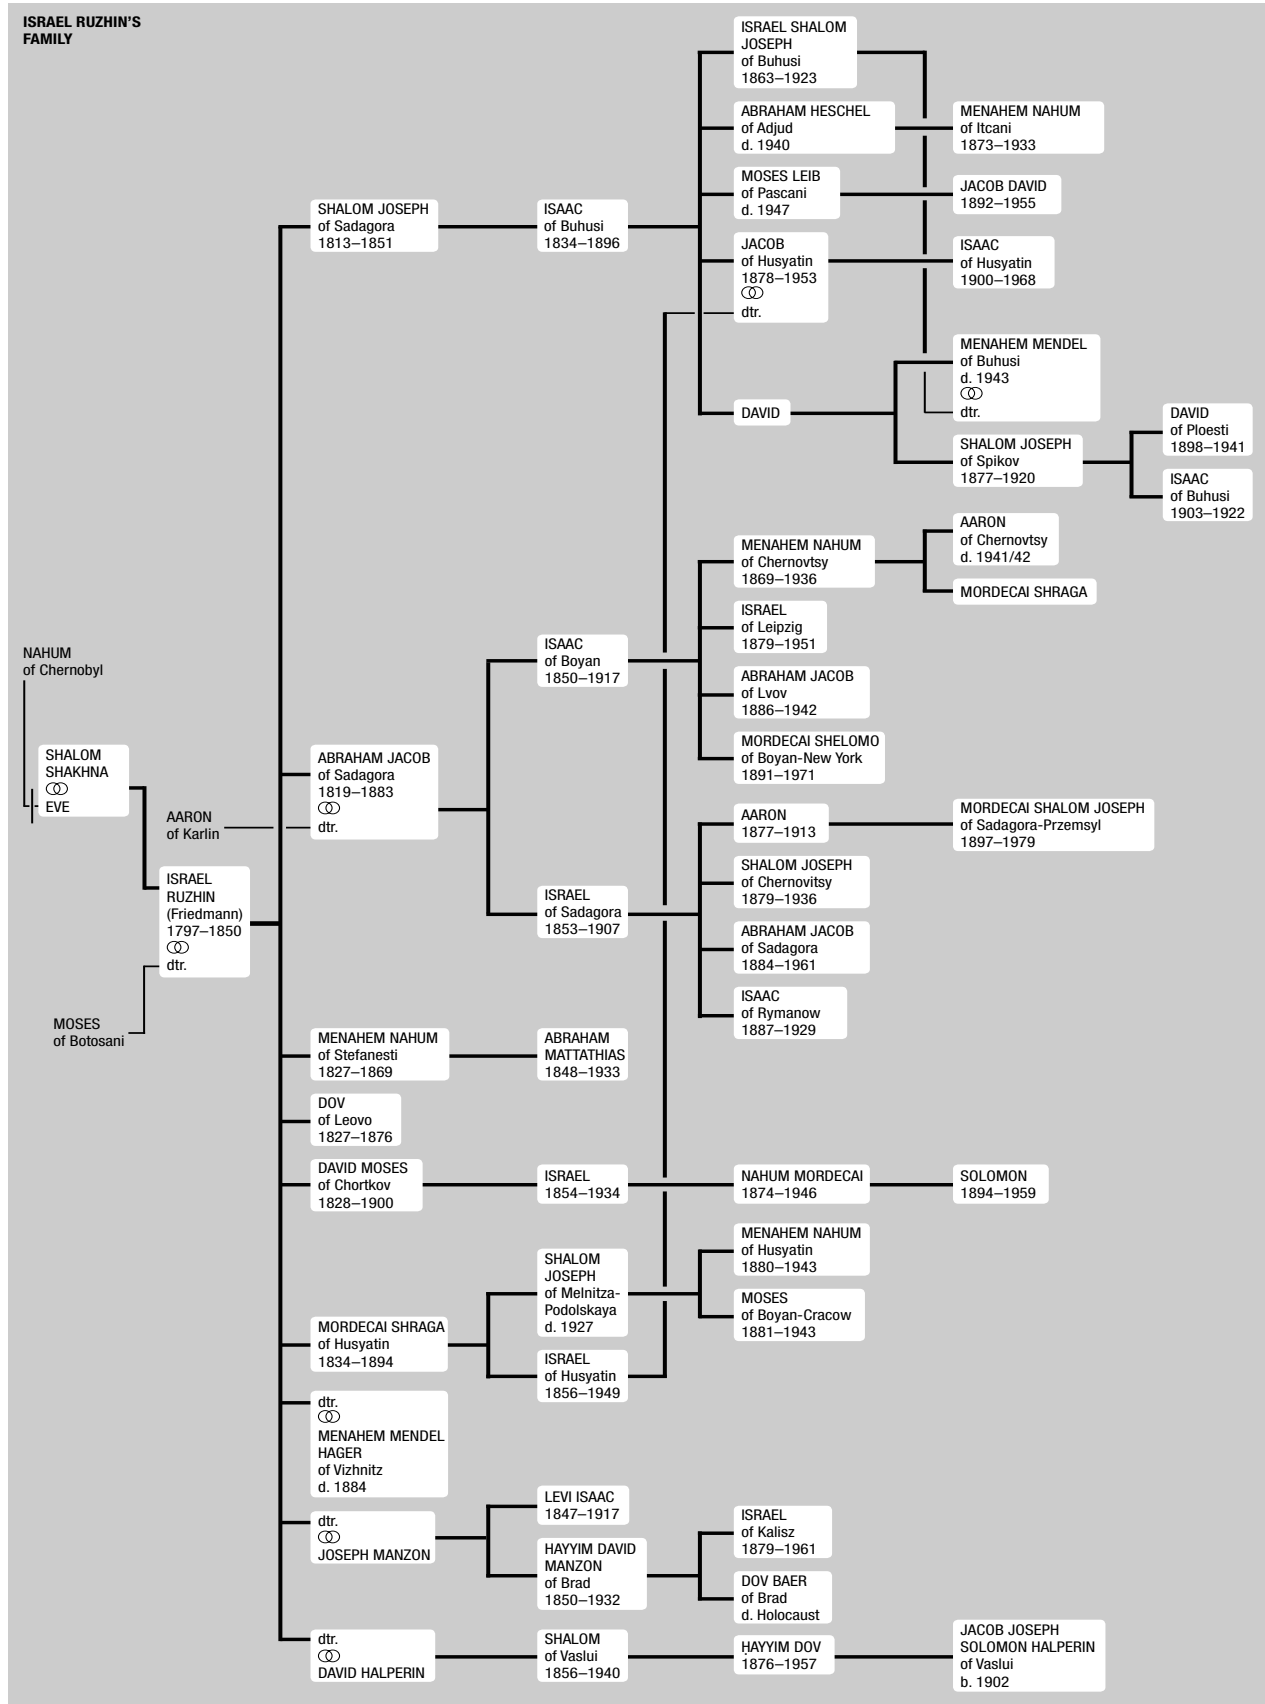

In 1838 Israel was accused of having given the order to put to death two Jewish informers – Isaac Ochsmann and Samuel Schwartzman – who had been engaging in illegal exploitation and informing. When their activities began to endanger the Jews and their communities, the lay communal leaders decided to put them to death. One was put into the boiler of the ritual bath and the other was drowned. For a long time the Ḥasidim and members of the community succeeded in hiding the affair, and even after the body was found in the river the cause of death remained a secret until revealed by a third informer. An extensive investigation was then initiated, and the case was transferred to a higher authority. Hundreds of persons were imprisoned and subjected to severe tortures. Eighty of them were brought before a military court in a trial that lasted a year and a half. Six lay leaders were sentenced to hard labor for life and flogging, from which most of them died. Israel was imprisoned for 22 months, during the whole period of the investigation. He was placed in solitary confinement in prison in Kiev, but was permitted to receive food in his own utensils.

On the conclusion of the investigation in 1840, in which the defendants did everything in their power to exonerate Israel from the accusation leveled against him, he was released, but was placed under continual surveillance as he was also suspected of an ambition to become ruler of the Jews. Policemen went in and out of his room while he was praying. He moved to Kishinev where the provincial governor was better disposed toward the Jews. However, when his followers learned that their leader was to be exiled to a distant place, they speedily obtained a travel permit to Moldavia for him, promising that he would return if required to do so. He then settled in Jassy in Romania. The Russian governor who provided the permit, in fear of his superiors, hastened to send emissaries in secret to Jassy to have Israel extradited. However, the Ḥasidim anticipated this and removed him to Shatsk in Bukovina, which belonged to Austria. He moved from town to town including Kompling, and Skola, until after many efforts, described in numerous Ḥasidic legends, he was authorized by the Austrian emperor Ferdinand I (Dec. 20, 1845) to live in Sadgora in Bukovina. Israel's Ḥasidim purchased an estate for their leader called Zolotoi-Potok near Sadgora.

At Sadgora thousands of Ḥasidim streamed to him, and he built himself a splendid palace there, continuing the same life of opulence that he had led in Ruzhin. Israel had a great influence upon the numerous Ḥasidim and *Zaddikim*, especially the Romanian Ḥasidim.

On the death of the rabbi of *Apta, Israel was also appointed head of the Volhynia Kolel in Erez Israel, and did much on behalf of the Jews in Erez Israel. The splendid synagogue Tiferet Yisrael in Jerusalem (destroyed by the Jordanians after 1948), also called the Nisan Bak synagogue, was named after Israel of Ruzhin because he provided the funds for buying the ground and building the synagogue.

The impressions of contemporaries who knew him are interesting. Dr. S. Rubin describes him as follows "He spoke little, confining his remarks to the absolute essential. All his movements were deliberate... He sat upon his throne dressed in immaculate and expensive garments, like one of the Russian nobles, and on his head a hat embroidered in gold. From the tips of his toes to his head, there was an elegance about his expensive clothes." Dr. Mayer, who visited him in 1826, was filled with enthusiasm for Israel's personality: "When I visited him in his home, I found there Field-Marshal Witgenstein who honored him in every possible manner and wanted to present him with one of the most beautiful of his palaces, in a neighboring town, so that he should take up residence there... in truth he deserves all this honor. Although not particularly educated, he has a preeminently naturally keen mind. With his sharp eye and keen intellect he immediately penetrates to the heart of any difficulty brought to him, however obscure and complicated, and arrives at a decision. His imposing presence and his stature make a pleasing impression upon the onlooker. He is noble and refined: He has no beard, only a moustache. His eyes exercise a hypnotic charm so that even his greatest opponent is compelled to submit to him."

Israel of Ruzhin wrote no books. His teachings are collected in *Irin Kedishin*, *Beit Yisrael*, *Tiferet Yisrael*, *Keneset Yisrael*, *Pe'er Yisrael*, etc.

Six sons of Israel of Ruzhin established Ḥasidic dynasties which attracted large numbers of followers.

The eldest SHALOM JOSEPH (1813–1851) made Sadagora his center, and died in Leipzig ten months after the death of his father. His son ISAAC (1834–1896) was the founder of the Buhusi dynasty and was the main propagator of Ḥasidism in Romania. Isaac's sons dispersed throughout the country, ISRAEL SHALOM JOSEPH (1863–1923) in Buhusi, and ABRAHAM HESCHEL (d. 1940) in Adjud, MOSES LEIB (d. 1947) in Pascani, while the fourth son, JACOB (1878–1953), was appointed to succeed his father-in-law Israel of Husyatyn, the author of *Oholei Yaakov*. Other descendants were his grandson SHALOM JOSEPH OF MELNITSA-PODOLSKAYA (d. 1927), who also made Lemberg (Lvov) his center. MENAHEM NAHUM OF ITCANI (1873–1933), the son of Abraham Heschel of Adjud, was a scholar and kabbalist who wrote works on philosophy. ISAAC B. JACOB OF HUSYATYN, the last head of this dynasty (1900–1968), was chosen as leader in Erez Israel. David, the son of Isaac of Buhusi, had two sons, MENAHEM MENDEL OF BUHUSI (d. 1943) who was the son-in-law of Israel Shalom Joseph, and SHALOM JOSEPH OF SPIKOV (1877–1920). JACOB DAVID (1892–1955), the son of Moses Leib of Pascani, died in Jaffa.

The last survivor of this dynasty, ISAAC OF BUHUSI (1903–1992), the son of Shalom Joseph of Spikov, settled in Tel Aviv. A devoted Zionist, he was active on behalf of the Jews in Romania during the Holocaust. His brother, DAVID OF PLOESTI (1898–1941), perished in the Holocaust.

The second son of Israel of Ruzhin, ABRAHAM JACOB (1819–1883), was the principal successor of his father and retained his residence in Sadagora. He married the daughter of Aaron of *Karlin. As a result of calumny, he was arrested in 1856 and remained in prison for 15 months. He was succeeded as head of the dynasty of Sadagora by his son ISRAEL (1853–1907), whose elder brother ISAAC (1850–1917) founded the important dynasty of Boyan in Bukovina.

Of the sons of Israel of Sadagora, AARON (1877–1913), the author of *Kedushat Aharon*, had considerable musical accomplishment; SHALOM JOSEPH (1879–1936) was head of the dynasty of Chernovtsy (Czernowitz); ABRAHAM JACOB (1884–1961) of Sadagora, a leader of the Agudat *Israel, settled in Erez Israel in 1938; and ISAAC OF RYMANOW (1887–1929). The last head of the Sadagora dynasty was MORDECAI SHALOM JOSEPH (1897–1979) who, after serving as *admor* in Sadagora and Przemysl, settled in Tel Aviv in 1939. He was the author of *Keneset Mordekhai*.

The Boyan dynasty spread to an even greater extent. Of the sons of Isaac, the founder of this dynasty, MENAHEM NAHUM (1869–1936), the author of *Devarim Nihumim* and *Zeh Yenaḥmenu*, had his seat in Chernovtsy. ISRAEL (1879–1951) lived in Leipzig, but settled in Erez Israel in 1939. ABRAHAM JACOB (1886–1942) lived in Lemberg (Lvov) and perished in

the Holocaust. MORDECAI SHELOMO (1891–1971) was the last head of the dynasty. After residing in Vienna for 20 years he emigrated to New York. His remains were interred in Erez Israel. The dynasty was continued by the sons of Menahem Nahum; AARON OF CHERNOVTSY, who perished in the Holocaust in 1941–42, and MORDECAI SHRAGA.

The third son of Israel of Ruzhin, MENAHEM NAHUM OF STEFAN-ESTI in Romania (1827–1869), left an only son ABRAHAM MAT-TATHIAS (1848–1933). With his death the Stefanesti dynasty came to the end.

The fourth son of Israel of Ruzhin, DOV OF LEOVO (1827–1876), was a tragic figure. An *admor* in Husi in Romania, he was successively in Seuleni, in Ukraine, and lastly in Leovo in Romania. In 1869 he published a manifesto attacking Ḥasidism, left his home, and moved to Chernovtsy, where he took up residence with one of the local *maskilim*. The incident caused a storm in the Jewish world, and gave rise to a particularly fierce controversy between the Ḥasidic dynasty of Zanz (see *Halberstamm) and that of Sadagora, which led to a burning hatred between them, bringing in its wake excommunications and recriminations. This controversy, known as the Zanz-Sadagora conflict, produced a vast polemical literature. Dov later repented and returned to Sadagora, but he no longer received any of his followers. This did not, however, put an end to the controversy, which continued until the death of Ḥayyim Halberstamm, the *admor* of Zanz. Dov left no children.

The fifth son of Israel of Ruzhin, DAVID MOSES (1828–1900), author of *Divrei David*, was one of the greatest *Zaddikim* of his time. His center was first in Potek, but in 1859 he moved to Chortkov. His followers were the aristocracy of the Ḥasidim of Poland. He was succeeded by his son ISRAEL (1854–1934), the author of *Tiferet Yisrael*, an outstanding leader of the Agudat Israel. After World War I he moved to Vienna. Israel was succeeded in his turn by his son NAHUM MORDECAI (1874–1946) who settled in Erez Israel in 1939 where he became a member of the Mo'ezet Gedolei ha-Torah of the Agudat Israel. The last leader of the dynasty was his son SOLOMON (1894–1959).

The sixth and last son of Israel of Ruzhin was MORDECAI SHRAGA OF HUSYATYN (1834–1894). His followers were the outstanding Ḥasidim of Galicia. He was succeeded by his son ISRAEL (1856–1949). A noble character, he was one of the first members of the Hovevei Zion movement. After World War I he moved to Vienna, and in 1937 emigrated to Erez Israel. Both MOSES OF CRACOW (1881–1943), author of *Darkhei Moshe*, the spiritual head of the Yeshivat Ḥakhmei Lublin, and his brother MENAHEM NAHUM OF HUSYATYN (1880–1943), who had his center in Lemberg (Lvov), were the grandsons of Mordecai Shraga, the sons of his son Shalom Joseph, and both perished in the Holocaust. There was no successor to this dynasty.

Israel of Ruzhin had three sons-in-law: MENAHEM MENDEL HAGER OF *VIZHNITZ, a noted Ḥasidic leader, and Joseph Manzon and David Halperin, who belonged to wealthy families. Joseph Manzon's son ḤAYYIM DAVID (1850–1932), the *admor* of Brod, was severely persecuted by the local

maskilim, while another son, LEVI ISAAC (1847–1917), author of *Bekha Yevorakh Yisrael*, had his center in Vienna. Two sons of Ḥayyim David acted as *admorim*, DOV BAER in Brad, who perished in the Holocaust, and ISRAEL (1879–1961) in Kalisz, who emigrated to the United States in 1939. SHALOM (1856–1940) the son of David Halperin was *admor* in Vaslui in Romania; he had a phenomenal memory, and had an extensive knowledge of secular subjects. He was succeeded by his son ḤAYYIM DOV (1876–1957), who after residing in Vaslui and Bucharest emigrated to Erez Israel in 1956. The last leader of the Vaslui dynasty was JACOB JOSEPH SOLOMON (b. 1902), who settled in Tel Aviv.

RYBACK, ISSACHAR (1897–1935), Russian-French artist. Ryback was born in the Ukrainian town of Elisavetgrad (now Kirovo) and studied at the Academy in Kiev. After the Revolution of 1917, the central committee of the Jewish Cultural League in Kiev appointed him as drawing teacher. Ryback visited the Jewish farm colonies that had sprung up in the Ukraine under the new regime. The fruit of this journey was a portfolio, *On the Jewish Fields of the Ukraine* (1926), with reproductions of drawings and paintings. He showed strong sunburned men and women as opposed to the pale and wan Jews he had known in Kirovo. In 1926 he went to Paris, where he became a success, and in 1935, Wildenstein, the art dealer, planned a large retrospective exhibition of his work. On the eve of the opening Ryback died suddenly.

Ryback learned a great deal from the French cubists as well as from the German expressionists. Most of his work, however, is devoted to themes remembered from his youth. The murder of his father by Cossack bands in a pogrom became a kind of obsession. Ryback drew and painted much the same subjects favored by Chagall, with whom his talent bears comparison. His manner, however, was more somber and more tragic. In addition to drawings, paintings, and prints, he left a series of delightful small ceramic figures, representing folk types of the *shtetl*. Ryback House, displaying the finest examples of the artist's work, was opened in 1962 at Ramat Yosef in Israel. The collection was donated by his widow, Sonia, who became the director of this small, but important, museum.

RYDER, WINONA (Winona Horowitz, 1971–), U.S. film actress. Born in Winona, Minnesota, Ryder grew up on a commune in California. When she was 10, her parents enrolled her in acting classes at the American Conservatory Theater in San Francisco. She appeared in such popular films as: *Bee-blejuice* (1988), *Heathers* (1989), *Edward Scissorhands* (1990),

Mermaids (1990), and *Night on Earth* (1991). At age 22, Ryder achieved the status of one of Hollywood's most sought-after actresses, with starring roles in Francis Ford Coppola's *Dracula* (1992) and Martin Scorsese's *Age of Innocence* (1993), for which she received an Oscar nomination for Best Supporting Actress. Ryder went on to act in such films as: *The House of Spirits* (1993), *Reality Bites* (1994), *Little Women* (Oscar nomination for Best Actress, 1994), *How to Make an American Quilt* (1995), *The Crucible* (1996), *Alien: Resurrection* (1997), *Celebrity* (1998), *Girl, Interrupted* (1999), *Autumn in New York* (2000), *Mr. Deeds* (2002), *Simone* (2002), and *The Darwin Awards* (2005). She also produced and narrated the 2003 documentary *The Day My God Died* about the child sex slave trade in India.

In 1996 she was nominated for a Grammy for her reading of the audio book of *The Diary of Anne Frank*. In 1997 Ryder was named one of the 50 Most Beautiful People in the World by *People* magazine.

[Jonathan Licht / Ruth Beloff (2nd ed.)]

RYMANOW, town in Rzeszow province, S.E. Poland. It is assumed that the town developed out of a colony of prisoners of war who settled there in the 15th century. The Jewish community was formed soon after the town was founded. Most of the Jews were merchants of wines imported from Hungary. About 1594 the Council of Four Lands (see *Councils of the Lands) debated the matter, and as a result, the community was warned by Meir b. Gedaliah of *Lublin to be careful about libation wine. At first the council intended to forbid the Jews entirely to deal in such wine, but since it was their main occupation a decision was made finally to issue just a warning. In connection with their commerce the Jews of Rymanow had to visit Krasno, a town in the same province, which had the privilege of excluding Jews (*de non tolerandis Judaeis*). This led to tensions between them and the townsmen of Krasno. In the 17th and 18th centuries the municipality of Krasno allowed its townsmen to rob and even put to death any Jew from Rymanow who attended the fair at Krasno. At the beginning of the 17th century, the Jews of Rymanow were prosecuted by the bishop of Przemysl for the alleged profaning of Christian festivals; the bishop won the suit. In 1765 there were 1,015 Jews in Rymanow (42.8% of the total population). At the beginning of the 19th century, as a result of the activity of R. Hirsch Mesharet, mentioned in 1838 by the head of the police in Lvov as having great influence on the Jews of Galicia, Rymanow became an important Ḥasidic center. It was the seat of the *Zaddikim* Menahem Mendel *Rymanower and his disciple Zevi Hirsch *Rymanower. The dwelling of the Ḥasidic rabbi, and the synagogue, erected in the 16th or 17th century, were the finest buildings in the town. At the end of the 19th century, Jewish communal life in Rymanow expanded.

This continued when Rymanow reverted to independent Poland after World War I. Controversies arose, however, es-

pecially between *Agudat Israel and the Zionists. In the 1930s Agudat Israel gained the majority within the community council, whereas in the elections to the municipal council in early 1939 the Zionists won three out of the five places reserved for Jews. Because of the anti-Jewish *boycott in the 1930s, the Jews suffered economically; in 1938 Jews were not permitted to deal in tobacco, a state-owned monopoly in Poland. The Jewish population numbered 1,391 (42.8% of the total) in 1865, and 1,412 (39.9%) in 1921.

[Shimshon Leib Kirshenboim]

Holocaust Period

After the outbreak of World War II, when the Germans occupied Rymanow at the end of September 1939, they issued an order for almost all the Jews in Rymanow to move within 24 hours to the Soviet-occupied area on the east bank of the River San. Only a small number were permitted to remain in the city. Many of those who went to the Soviet area were deported in the summer of 1940 to the Soviet interior. Those remaining in Rymanow were compelled by the Germans to pay fines, and subjected to confiscation of property and forced labor. On Aug. 1, 1942, all Jewish males aged 14 to 35 were deported to the Plaszow labor camp, where many met their deaths. On Aug. 13, 1942, the remainder of the Jewish community was deported to the *Belzec death camp.

RYMANOWER (of Rymanow), MENAHEM MENDEL (d. 1815), *ḥasidic zaddik*. A pupil of *Elimelech of Lyzhansk, he was born in Przytyk but spent most of his life in Rymanow. Ḥasidic tradition relates that in his youth he attended various yeshivot, finally settling at that of Shmelke of Nikolsburg (Mikulov). Legends about Menahem Mendel are included in stories concerning his pupil, Naphtali Zevi *Ropshitzer. An ascetic, he became known for his regulations dealing with women's dress; he also instituted regulations concerning weights and measures. According to legend, he saw the Napoleonic wars as the battles of Gog and Magog which will precede redemption and the coming of the Messiah and he prayed for Napoleon's victory. Menahem Mendel appears in *David of Makow's list (1798–1800) of the cursed *zaddikim* of the generation (*Shever Poshe'im*, in M. Wilensky's *Ḥasidim u-Mitnaggedim*, 2 (1970), 102).

Menahem Mendel's works are *Ilana de-Hayyei* (1908), a commentary on the Pentateuch; *Menaḥem Ziyyon* (1851), sermons for Sabbath and festivals, collected by his pupil Ezekiel *Panet; *Divrei Menaḥem* (1863), sermons for Sabbath; *Ateret Menaḥem* (1910), practical talks and interpretations of the law; and *Torat Menaḥem* (1876), sermons on the weekly portions.

RYMANOWER, ZEVI HIRSH (1778–1847), Ḥasidic leader known as “Hirsh Mesharet” (“Hirsh the Attendant”). He was born in Dombrowa and learned tailoring as a boy. Under the influence of Moses of Przeworsk he became a Ḥasid and disciple of Mendel Rymanower. After the latter's death he stayed with Naphtali Zevi *Ropshitzer for about 12 years, was recognized as his successor in 1827, and became known as a miracle-worker. His only son, Joseph ha-Kohen Rymanower (d. 1913), was his successor. *Be'erot ha-Mayim* (1894), edited by A.A. Kanarvogel, contains Zevi Hirsh's sermons on the daily portions of the Torah and those for Sabbath and festivals. Between the sermons, the editor included tales about Zevi Hirsh, adding at the end of the book a collection of sermons called *Yikkavu ha-Mayim* by Zevi Hirsh and some other Ḥasidic leaders.

RYPIN, town in Budgoszcz province, N. central Poland; from 1815 until World War I within Russia. In 1799 the Jews of Rypin were granted civic rights and freedoms by the municipal council, which sought to improve the economic situation of the town with their assistance. Henceforward the Jewish population increased, numbering 517 (35% of the total population) in 1827; 1,024 (47.8%) in 1856; 1,706 (38.6%) in 1897; and 2,791 (38.6%) in 1921. The Jews developed commerce and crafts in the town. After World War I, 300 Jewish families (about 60% of the total Jewish population) were engaged in commerce, and 25% in the crafts. In the 1930s their economic situation was undermined, however, as a result of a campaign launched by antisemites.

The community was organized on democratic principles after World War I. In the first elections to the council held in 1924, as well as in those of 1931 and 1936, the Zionists obtained a majority, although the Ḥasidim had considerable influence within the Jewish population. Noteworthy of the community's rabbis were Nahum Manasseh Guttentag-Tavyomi, who appears to have participated in the Polish uprising of 1863, and Asher Gershon Luria, rabbi of the town for 40 years (d. 1932). There was a network of Jewish schools and cultural institutions of various kinds. Modern social and cultural activity began under the German occupation of World War I.

[Shimshon Leib Kirshenboim]

Holocaust Period

During the Nazi occupation, Rypin was part of Reichsgau Danzig-Westpreussen by Hitler's decree of Oct. 26, 1939. Before the outbreak of World War II, Rypin had nearly 2,500 Jews. Before the Germans entered on September 8, many Jews escaped, but trickled back afterward. Some 100–150 refugees who returned were probably shot on the outskirts of town. In September and October 1939, several Jews were arrested

and some leading persons were murdered. The Germans set the main synagogue and *bet midrash* on fire. The Germans arrested the president of the community, Shimeon Kron (or Kran), for starting the fire, and the community was obliged to pay a high “contribution” (or fine). A large number of Jews, especially youth, escaped to the Soviet-occupied territories. The remaining Jews, ordered by the German authorities to leave the town in the middle of November 1939, became dispersed in various towns – *Mława, *Ciechanow, *Plonsk, Szrensk, and others. Some went to Warsaw. After this exodus, the Germans destroyed the two Jewish cemeteries. About 280 Jews from Rypin survived the Holocaust, including 180 who eventually returned from the Soviet Union, and 65 who survived in labor and concentration camps. The remainder had “Aryan” documents or were hidden by Christians. A number of the survivors returned to Rypin in 1945–46 but remained only a short time. Most of them emigrated.

RYSHKANY (formerly **Ryshkanovca**, Rom. **Râșcani**), town in N. Moldova. Ryshkany developed into an urban community during the 19th century as a result of the large Jewish settlement in Bessarabia at that time. In 1897 there were 2,247 Jews (69% of the total population) in the town, and in 1930 there were 2,055 (66% of the total). In the 1930s the communal institutions included a kindergarten and an elementary school, both maintained by the *Tarbut organization. The community was destroyed when the Germans and Romanians entered Bessarabia in July 1941. In 1970 the Jewish population was estimated at about 150 families.

°RYSEL, VICTOR (1849–1905), German Protestant Bible critic who taught at the University of Leipzig. The fruit of his activity as teacher appeared in writings on exegesis, hermeneutics, theology, and particularly in commentaries on the Bible and the Apocrypha.

For “*Kurzgefasstes exegetisches Handbuch zum Alten Testament*,” he revised A. *Dillmann’s *Exodus-Leviticus* (1897³) and E. Bertheau’s *Esra, Nechemia und Esther* (1887²). His studies of the Prayer of Manasseh, the Additions to Esther, Ecclesiasticus, the Syriac Apocalypse of Baruch, and the Greek Apocalypse of Baruch, all of which appear in E. Kautzsch, *Die Apokryphen und Pseudepigraphen des Alten Testaments* (1900; 1921), represent the classic German investigation of this literature.

RYVEL (pseudonym of **Raphael Lévy**; 1898–1972), Tunisian author and educator. He was born in *Tunis and received pedagogical training at the Ecole Normale Israélite Orientale (ENIO), the teachers’ school of the *Alliance Israélite Universelle (AIU). After completing his training, Ryvel returned to

*Tunisia where he taught at the AIU primary school in Sousse. He was later recruited to teach at the AIU boys’ schools in *Casablanca and Tunis. In the latter city, he served as the school’s principal. Ryvel belonged to a small nucleus of AIU teachers that often opposed that organization’s hostility or indifference to Zionism. He was instrumental in promoting aspects of modern Hebrew studies at the Tunis school. During this time he published more than a dozen books of stories, poems, and plays on Tunisian daily Jewish life, many of which were performed. His most representative works are *La hara conte* (1920), a compilation of essays dealing with life in the Jewish ghetto, *Terre d’Israël* (1927), and *L’enfant de l’Oukala*, also on Jewish quarter folklore, for which he received the important *Prix de Carthage* in 1931.

RZESZOW (Pol. **Rzeszow**; Heb. **Risha**), capital of Rzeszow province, S.E. Poland. Until the 18th century Rzeszow was a private city; its last owners, the Lubomirsky family, ruled the city until the Austrian annexation in 1772. The Jewish community of Rzeszow dates back to the 15th century. Jewish settlement there was authorized by King Stephen Bathory. The community was heavily taxed and was subject to various restrictions on commerce and crafts. In the 17th century, a synagogue was erected (later known as the “old” synagogue) and a cemetery was opened. Within the framework of the *Councils of the Lands, Rzeszow belonged to the Land of “Russia.” At the beginning of the 18th century, a controversy broke out between the Rzeszow and *Przemysl communities over R. Ezekiel Joshua Feivel Fraenkel-Teomim, who was first rabbi of Przemysl and subsequently moved to Rzeszow. The Przemysl community then deprived him of his office as rabbi of the province (*galil*) and elected Samuel Mendelowicz of Lvov rabbi of the Przemysl community and the province. The controversy was debated at a convention of the provincial council of Przemysl in 1715 and at a convention of the Land of “Russia” at Jaroslav. Following the dispute, the Rzeszow community broke away from the provincial council and constituted itself an independent entity in relation to the Council of the Four Lands. The amount of tax which the Rzeszow community paid the Council in 1715–19 shows that it was then a large community. In the middle of the 18th century, the budget of the community amounted to 17,000 zlotys. At that time most of the city’s shops were Jewish-owned. Cloth trade and goldsmithing were exclusively Jewish occupations, and the high quality of their products was known throughout Europe. “Rzeszow gold” was noted at fairs. The Jewish seal engravers there also became celebrated and they supplied the courts at Stockholm and St. Petersburg. A non-Jewish traveler in Rzeszow in the middle of the 19th century referred to Rzeszow as the “little Jerusalem.” Various economic and political restrictions remained in force until the Austrian

revolution in 1848. By the end of the 19th and beginning of the 20th centuries, the Jews of Rzeszow enjoyed equal rights and participated in municipal and parliamentary elections.

The Jewish population numbered 1,202 in 1765; 3,375 (c. 75% of the total) in 1800; 7,000 (38.2%) in 1900; 8,000 (36.3%) in 1910; and 11,228 in 1931.

The *Haskalah movement was particularly influential there. Its early *maskilim* included Wilhelm Turteltaub. Prominent in Hebrew literature were Moses David Geschwind (1846–1905), a translator of the Polish poet J. Slowacki into Hebrew, and Abraham Abba Appelbaum (1861–1933), an early member of the Hovevei Zion in Galicia and founder of the first Hebrew school in the city, who wrote historical essays in the field of Jewish history in Italy.

Hasidism began to spread in Rzeszow in the 19th century. A large synagogue was built in the 19th century, as well as a hospital, old age home, and charitable and cultural institutions. The rabbis of the community included Samuel Ha-Levi (d. 1729), son-in-law of R. *Isaac b. Eliakim of Poznan (Posen), and Jacob *Reischer, head of the yeshivah and author of *Shevut Ya'akov*, who also served as rabbi in *Worms. The later rabbis include Aaron b. Nathan *Lewin, who was a representative of *Agudat Israel in the Polish Sejm. In the 20th century there was large-scale Zionist activity and Zionists were members of the community council, replacing the assimilationists. Hebrew was taught in the kindergartens, and a Hebrew school established in the Bet ha-Am. The latter became a center for young Zionist pioneers. Zionist organizations were established, such as Shulamit, a Zionist women's organization.

[Klara Maayan]

Holocaust Period

On the outbreak of World War II, there were about 14,000 Jews in Rzeszow. The German army entered the city on Sept. 10, 1939, and the anti-Jewish reign of terror began. In December 1941 a closed ghetto was established in Rzeszow. On July 7–13, 1942, the first mass deportation took place: about 14,000 Jews from the entire district of Rzeszow were concentrated in the ghetto and immediately deported together with some 8,000 Jews from the city to the *Belzec death camp. At the time of the deportation, 238 Jews were shot for offering passive resistance, while another 1,000 were taken to the nearby Rudna Forest and executed there. On Aug. 8, 1942, about 1,000 women and children were deported from the ghetto to the Peikinia concentration camp, where all of them were exterminated shortly afterward. In November 1942 only about 3,000 Jews still remained in the ghetto, which was transformed into a forced-labor camp and divided into two isolated parts: "A" for slave laborers, and "B" for members of their families. In September 1943 part A was transferred to the forced-labor camp of Szebnia, where the majority of the inmates met their death; part B was liquidated in November 1943, when all the inmates were deported to *Auschwitz and exterminated. Only about 600 Jews remained in a local forced-labor camp until July 1944. Some of them succeeded in escaping and hiding themselves in the nearby forests; others were deported to Germany. Jewish life was not reconstituted in Rzeszow after the war.

SAA-SAM

SA'AD (Heb. סֵעַד; "Buttress"), kibbutz in southern Israel, on the border of the Negev, 4 mi. (6 km.) southeast of Gaza, affiliated with Ha-Kibbutz ha-Dati. Sa'ad was founded in 1947 by *Youth Aliyah graduates from Germany and Austria. The settlers were joined by Israeli-born youth and immigrants from various countries. In the *War of Independence Sa'ad was completely leveled in long and bitter battles with the invading Egyptian army. The settlers held out in underground dugouts. After the war they built the village anew about 1 mi. (2 km.) further east. Sa'ad then developed intensive farming with irrigation from the Yarkon-Negev line and, later, from the National Water Carrier. The economy was based on livestock, field crops, citrus and other fruit, poultry, and dairy cattle. The kibbutz also had plants manufacturing plastic shrinkwrap film for packaging, as well as popcorn products and pet food. Other enterprises were a fashion outlet, a handmade jewelry workshop, and an auto service center. In 1970 there were 530 inhabitants; in 2002, 582.

SAADIAH (Sa'id; c. 16th century), poet. Saadiah ranks among the group of early Yemenite poets. His poetry is distinguished for its motifs, style, and form, which later, during the Masṭā period (17th century), became the principal elements of Yemenite poetry.

The subjects of his poetry are the Sabbath, the festivals, exile and redemption, friendship, and *Kabbalah. His poetry

is mostly written in Hebrew. His poem *La-Ner ve-li-Vesamim*, a *Havdalah* for the conclusion of the Sabbath, is still recited in the homes of Yemenite Jews.

SAADIAH BEN JOSEPH HA-LEVI (16th century), Yemenite rabbi, poet, and *paytan*. Saadiah was one of the leading scholars of his time in *San'a (and later in Jiblah). He composed *piyyutim* and poems.

Several of his *piyyutim*, including one on the *Akedah* (the binding of Isaac), were published or mentioned by H. Brody, D. Sassoon, and A.Z. Idelsohn (see bibliography). *Zechariah al-Dahiri composed a panegyric in his honor, published in the *Sefer ha-Musar*, in which he notes that Saadiah lived in San'a at the time of the persecutions of 1568 and describes the latter's greatness in Torah. He may possibly be the Saadiah b. Joseph whose *piyyut* was published in the *Aleppo prayer book of 1527.

SAADIAH (Ben Joseph) GAON (882–942), greatest scholar and author of the geonic period and important leader of Babylonian Jewry. Saadiah was born in Pithom (Abu Suweir), in the Faiyum district in Egypt. Little is known about his family except that his opponents slandered his father because he was not a scholar and earned his living from manual labor. Perhaps there is some truth to his opponents' claim that his father was banished from Egypt and died in Jaffa, but no reason for this expulsion is given. It is noteworthy that Sherira Gaon refers to Saadiah's father with respect (*Iggeret Rav Sherira Gaon*, ed. by B.M. Lewin (1921), 112). The information given on the members of his family, apart from his wife and children, is mere speculation. While there is no doubt that in his youth he already displayed outstanding talents both as an author and in communal activity, there is scant information about his teachers, whether in Jewish studies or in Greco-Arabic philosophy. The Arab writer Mas'udi states that when Saadiah was in Erez Israel, he studied under Abu Kathir Yahya b. Zechariah al-Katib of Tiberias. However, earlier than that, when he still lived in Egypt, he had already written two books (see below) and corresponded with R. Isaac b. Solomon *Israeli of Kairouan. It is therefore certain that when he left Egypt he was already a learned scholar of Torah and secular sciences, and had left behind many disciples. There is no information about him between the years 905, when he wrote his responsum to Anan (see below), and 921; nor are the reasons for his departure from Egypt clear. From a fragment of a letter written in the summer of that year it is known that he was then in Aleppo, from where he proceeded to Baghdad, and, as stated above, it is known that he had been in Erez Israel.

From 921 Saadiah appears as the leading protagonist in an ongoing bitter struggle between Aaron *Ben Meir, head of the Jerusalem academy, and the leaders of the Jewish communities in Babylonia. In 922 (4682) Ben Meir announced that Passover that year would fall on Sunday, and not on Tuesday as accepted according to the Babylonian calendar, and therefore that Rosh Ha-Shanah would fall on Tuesday and not Thursday. These changes would also affect the fixing of the days of the other holidays during the year 923/4 (see *Calendar). Ben Meir also deviated from accepted practice of midday as the deciding line for the declaration of the new moon. Scholars agree that the head of the Jerusalem academy did not deviate from the norm willingly. It is not clear on what or whose authority he based this deviation and he upheld a tradition that recognized the sole right of Erez Israel to declare new moons and holidays. Ben Meir sincerely believed in the halakhic rightness of his acts. In his demand that the Babylonian authorities accept his view, he claimed the prerogative both of *halakhah* and of Erez Israel; perhaps he hoped to magnify the importance of the academy which he headed. Saadiah and his followers, however, denied the validity of Ben Meir's arguments. Possibly while he was still in Erez Israel, Saadiah became aware that he and Ben Meir differed with regard to the calendar and he consequently wrote to Yehudai b. Nahman Gaon regarding the fixing of the calendar.

While Saadiah was still in Aleppo, he was informed by some students who came from Baghdad of Ben Meir's intentions, and he attempted to dissuade him from implementing it. Ben Meir, however, did not heed his advice. He considered his intended act as being of supreme importance and refused to heed demands that he abandon it. On the contrary, he felt obliged at all costs to defend the sole right of Jerusalem to establish the new moon and fix the calendar; he thus demanded that Babylonian Jewry act in accordance with his instructions, as all previous generations had depended on Jerusalem for the necessary information on this matter. The Babylonian authorities had in fact acknowledged the authority of the Jerusalem academy in this matter in 855 (Mann, Egypt, 1 (1920), 52–53; 2 (1922), 41–47). On his instructions his son declared from the Mount of Olives that in 4682 (921) Rosh Ha-Shanah would fall on Thursday, and Passover on Sunday. The leaders of the Jewish community in Babylonia were shaken by the danger of an impending schism in the Jewish community. In spite of their previous differences, the exilarch and the *geonim* agreed that Ben Meir must be prevented from carrying out his plan. Saadiah, who had returned to Babylonia, sent letters to Ben Meir and his colleagues, which at first were couched in conciliatory language, but to no avail. In a letter full of bitterness Ben Meir accused his former supporters of abandoning him to submit to the Babylonian authorities, and stated that under no circumstances would he change his mind. The controversy continued and the schism materialized. From a statement by the Karaite *Sahl b. Mazli'ah, who gleefully recorded the occasion, and by a Christian who mentions it in passing, it is known that the Jews in Erez Israel observed Rosh Ha-Shanah

in 4683 (922) on Tuesday, and the Jews in Babylonia, on Thursday, and it can be assumed that in both countries there were those who adhered to different days. The controversy grew in bitterness and invective and Ben Meir lost ground. The action of the Babylonian scholars in defending their tradition prevented people from following the head of the Palestinian academy, and caused some who had previously followed him to desert him. Saadiah was requested to compose a detailed account on the event which would serve as a reminder to Jews, and accordingly wrote *Sefer ha-Zikkaron*, which was read in public in Elul 922. The duration of the schism after 923 and the manner in which it was resolved cannot be determined. Ben Meir continued as head of the academy but Saadiah and the Babylonian leaders had achieved victory, and he was considered one of the greatest authorities in the field of fixing the calendar. He wrote *Sefer ha-Mo'adim*, which gives a complete account of the dispute.

It would appear that immediately on his arrival in Babylonia in 922, Saadiah was appointed to the yeshivah of Pumbedita, as from that year his letters bear his signature along with the title **resh* ("head of") *kallah* or **alluf*. After the Ben Meir controversy had subsided, Saadiah found time for literary work and several of his works were written in the 920s. His talents and personality attracted many, and some of the important leaders in Baghdad were his colleagues and aides, among them Sahl b. Netira, a wealthy merchant esteemed by the authorities. When the question of the continuation of the academy of Sura was under discussion, Saadiah's name was proposed. The famous academy had been through a difficult period. The honor in which it had been held had declined. His predecessor, R. Yom Tov Kahana b. Mar Rav Jacob, who headed it for ten years, was a weaver by calling, and after his death it was suggested that the academy be closed down completely and the students transferred to Pumbedita. The exilarch **David b. Zakkai*, however, decided to maintain the Sura academy. At first, however, R. Nathan the son of Yehudai Gaon was appointed *alluf*, but he died before he could take up the office (*Iggeret Ray Sherira Ga'on*, 112). The exilarch then wished to appoint Saadiah. According to **Nathan ha-Bavli*, there were other candidates, and perhaps there is a historical basis to the report that the exilarch had to decide whether to appoint R. Zemaḥ b. Shahin ("because he was wellborn and learned") or Saadiah (Neubauer, *Chronicles*, 2 (1895), 80). The family connections of the former certainly were taken into consideration. Most of the *geonim* came from a limited number of families and it was not easy to deviate from this tradition. Saadiah was a stranger, apparently not well connected. Although it was conceded that Saadiah was the greater scholar, it was difficult to ignore the characteristics enumerated by **Nissi b. Berechiah al-Nahrwani* which appear in Nathan ha-Bavli's report: "Although he [Saadiah] is a great man and a profound scholar, he is not afraid of any man and does not show favor to anyone because of his great knowledge, eloquence, and piety" (*ibid.*). Saadiah's virtues, however, determined the exilarch's decision.

His conflict with Ben Meir and his writings against heretics such as **Hiwi al-Balkhi* and against the Karaites had proved his fearlessness, his dedication to the Torah, and his loyalty to the exilarch. It could certainly be hoped that under Saadiah's leadership the academy of Sura would be revived. His standing and his firmness would counterbalance **Kohen Zedek b. Joseph*, the *gaon* of Pumbedita. David b. Zakkai thereupon appointed Saadiah head of the Sura academy in the spring of 928. As a precaution, the exilarch administered the oath to the new *gaon* "that he do not disobey me, or plot against me, or regard anyone but me as exilarch, or associate with any of my opponents" (A.E. Harkavy, *Zikkaron la-Rishonim*, 1 pt. 5 (1832), 232).

Saadiah immediately embarked upon his administrative work with energy and dedication. He set himself two tasks: to increase the number of students in the academy, and to secure the financial needs of the institution. To achieve the latter, he employed the methods of his predecessors (and to an even greater extent of his successors), of requesting aid from the Jewish communities far and near. Abraham **Ibn Daud* reports in the name of R. Meir ibn Bibas that Saadiah sent a letter to Spain, "to the communities of Cordoba, Elvira, Lucena... and all the Jewish communities in its vicinity" (*Sefer ha-Qabbalah* (G.D. Cohen, ed., 1967), 79). Of special significance are the two successive requests he sent to Egypt, "to the Jewish communities in the city of Fostat" (B.M. Lewin, in: *Ginzei Kedem*, 2 (1963) 34, 35), the first containing the greetings of the head of the academy, his son She'orit, and the *allufim*, as well as the rest of the scholars of the academy and the "important and esteemed burghers of Baghdad." He further says that the aforesaid "burghers," "the sons of Mar Rav Netira and Mar Rav Aaron," will help him in obtaining any request from the government. Saadiah also urged the Jews in Egypt to maintain contact with him, in order that he could regard himself as the acknowledged leader of all Jewry. The second letter refers with satisfaction to his early leadership of the academy; it is composed entirely of admonitions and moral instruction to the people (every verse begins with the phrase "the children of Israel") and is written in a tone of authority. Saadiah openly requested support for the academy in both letters. He also gathered the members of the academy who had left or had moved to Pumbedita during Sura's decline and restored it to its former glory. Saadiah's character aided him in his energetic fulfillment of his task. Whatever one thinks of the grave accusations against him leveled by David b. Zakkai, it must be conceded that while Saadiah was *Gaon* he was not intimidated by those in power and did not show favoritism.

His ways and deeds probably stimulated envy and complaints on the part of the exilarch. Only on the assumption that there already existed tension between Saadiah and the exilarch prior to their final quarrel is it possible to understand how a single incident could have provoked a bitter and difficult dispute. According to Nathan ha-Bavli (Neubauer, *ibid.*, 80–81), Saadiah refused to confirm the terms of settlement of a will which would greatly benefit the exilarch. At

first Saadiah was evasive and requested that Kohen Zedek, the head of the Pumbedita academy, should first append his signature, anticipating that he would not sign. When, however, Kohen Zedek did sign, Saadiah announced his refusal to confirm the inheritance. There is no doubt that Saadiah acted in accordance with the law; his answer to the son of the exilarch, “ye shall not respect persons in judgment” (Deut. 1.17), showed that he was conscious of his high office as an impartial judge. On the other hand, from the fact that Kohen Zedek confirmed the decision, it may be assumed that there was no definite miscarriage of justice, but that it was a controversial issue, which was difficult to decide. David b. Zakkai’s anger at Saadiah was boundless and the quarrel came out in the open. He deposed Saadiah, appointing *Joseph b. Jacob bar Satia as *Gaon*. Saadiah in his turn appointed another exilarch, Josiah Hasan, the brother of David b. Zakkai. Apparently, when the quarrel started, the *gaon* was certain of his victory. Close to the wealthy classes in the city, he hoped that with their influence he would prevail in his dispute with the exilarch. Nonetheless, it seems that those interested in the quarrel, i.e., the members of the academy and the elite of the community, were divided into two camps. Nathan ha-Bavli’s statement that “all the wealthy in Babylonia, the academy students, and prominent members of the community were on Saadiah’s side,” assisting him financially in presenting his case to the caliph, his officers, and advisors (Neubauer, *ibid.*, 80) is probably exaggerated. He himself states earlier that Khalaf b. Sarjado (*Aaron b. Joseph Sargado; Sarjado) had assisted the exilarch and that the head of the Pumbedita academy supported him. Until 932, Saadiah was in a strong, if not a dominant, position. At that time he wrote the first version of *Sefer ha-Galui* in flowery Hebrew. The work exudes self-confidence. In a letter attacking Saadiah (Harkavy, *ibid.*, 227), the *gaon*’s conduct during those years is criticized. However, when the caliph al-Kahir (932–934) assumed the throne, his fortune changed. The caliph needed money badly and Aaron Sarjado’s contribution decided the issue. The sons of Netira and the sons of Aaron did not wish to become involved in the issue, as their influence had waned, especially after Aaron Sarjado appeared as the leading antagonist of the *gaon*. The reasons for his deep hatred of the *gaon* are not known. It is possible that it stemmed from his own ambitions to become *gaon*, which he did not attain until 943, or he was hurt by Saadiah’s arrogance. In any case, he became Saadiah’s inveterate enemy, and his invective and insults were harsher than those of David b. Zakkai and Kohen Zedek. Aaron Sarjado’s open support of David b. Zakkai and the fact that the other wealthy members of the community were either unable or unwilling to become involved, resulted in Josiah Hasan’s banishment to Khurasan, where, apparently, he died shortly afterward. Saadiah was forced to relinquish the *gaonate* and take refuge from the wrath of his opponents. It was a blessing in disguise, since as a result Saadiah was free to pursue his creative work. During this period he wrote his philosophic work, *Emunot ve-De’ot* (“Beliefs and Opinions”), and a second version of *Sefer ha-Galui*, with a

long introduction in Arabic and an Arabic commentary on the original.

According to Nathan ha-Bavli (Neubauer, *ibid.*, 81–82), the opponents were reconciled in 937 when Bishr b. Aaron b. Amram, the father-in-law of Aaron Sarjado, was persuaded to intervene in this matter and make peace between the two sides. Bishr undoubtedly found the entire quarrel tiresome, and complied. He had supported Saadiah, as the *Gaon* testifies, and the differences between himself and his son-in-law did not please him. The disputants were also weary of the quarrel and were prepared for reconciliation. Saadiah again headed the academy in Sura, despite the fact that David b. Zakkai’s candidate, Joseph b. Mar Rav Jacob, continued to receive a salary. Sarjado’s stand regarding this change is not known. He apparently acquiesced in the face of a situation which he could not prevent. In the meantime he was busy with his own affairs. R. Kohen Zedek died early in 936; and Aaron Sarjado, to his dismay, was not appointed his successor. It was only in 943 that he succeeded to the position; according to Sherira Gaon, he took it by force. Saadiah’s last years were peaceful. The exilarch died in 942, while he was on good terms with the *gaon*. It is exemplified by the fact that when David’s son Judah died shortly after his father, Saadiah took Judah’s son into his home and brought him up.

[Abraham Solomon Halkin]

As Halakhist

Saadiah’s halakhic works are still largely in manuscript, particularly in thousands of scattered *Genizah* fragments, and although not even a small part has so far been assembled and investigated, the general picture nevertheless is gradually becoming clearer. From the little that has been published, as well as from the various evidences of Saadiah himself and of other *geonim*, the dimensions of his halakhic work can be reconstructed. It is clear that the largest and most important part of it consists of monographs on halakhic decisions, which covered most of what is at present included in the *Hoshen Mishpat* of the Shulhan Arukh, as well as books on Ritual Purity and Impurity (*Niddah*, *Shehitah*, *Terefot*), Incest, Festivals, and the proclamation of the new month. Saadiah was one of the creators of rabbinic literature, if not the actual pioneer in this field, and the first to write “books” in the modern sense of the word. He was also the first to give his halakhic works the form of monographs, assigning a separate one to each topic of Hebrew law: a book on the Laws of Gifts, another on the Laws of Commercial Transactions, and so on. He was likewise the first to set a standard pattern for his books of halakhic decisions by dividing each one into sections and subsections. Every subject begins with a brief definition of the topic under discussion, followed by various details and talmudic proofs of them. Saadiah goes into the fullest details of every halakhic topic he touches on, but he frequently omits entire *halakhot* which have a direct bearing on the subject at issue, either because he thought of dealing with them within the context of some other halakhic monograph, or because he regarded

them as too unimportant to be included in the discussion. Saadiah's halakhic books are thus distinguished by their systematic structure and logical order and by a lengthy detailed introduction which he prefaced to each book of halakhic decisions. One exception to all this is his Book of Inheritance, which omits the talmudic proofs of the *halakhot* mentioned in it. This gave rise to the conjecture among scholars that at first Saadiah's procedure was not to state the sources but that after complaints from rabbis he changed his method. There is, however, no support for this supposition. It is more probable that the extant Book of Inheritance is an abbreviated version of the original work, which contained the sources. Saadiah's books of halakhic decisions represent a complete revolution when compared to other similar lengthy works that preceded it, **Halakhot Gedolot* and **Halakhot Pesukot*, which, following the pattern of talmudic themes, lack the structure of a code. Saadiah was the first to write halakhic works in Arabic, which had in his days replaced Aramaic as the principal language spoken by the Jews in Babylonia. This constituted something of a revolution. Following him, various *geonim* also wrote extensively in this language. Saadiah's halakhic writings exercised a great influence on succeeding *geonim*, although this is not superficially apparent since the *geonim* seldom quoted the names of their geonic predecessors.

Several of Saadiah's halakhic works were collected and edited by J. Mueller and published in Paris in 1897. These consist of The Book of Inheritance; The Book of the 613 Commandments; An Interpretation of the Thirteen Hermeneutic Rules; collected responsa; and statements in his name collected from various sources. The Book of the 613 Commandments was republished with a very extensive commentary by Jeroham Fischel *Perla. The collected responsa ascribed to Saadiah require to be examined to authenticate their authorship. Extracts from *Sefer ha-Shetarot*, his book on documents and deeds, which had a unique structure and arrangement, were published by S. Assaf in: J.L. Fishman (ed.), *Rav Sa'adyah Gaon* (1957; see bibliography); further extracts appeared in *Tarbiz*, 9 (1938). The commentary on *Berakhot*, published by S.A. Wertheimer (1908) and attributed to Saadiah, is not by him. In addition, many of Saadiah's halakhic statements have been preserved in his *siddur* (see below). He also wrote on the methodology of the Talmud, apparently in a general introduction to it, of which a few extracts were quoted in a similar work of Bezalel *Ashkenazi that was published by A. Marx in *Festschrift... David Hoffmann* (1914) and in other writings of this scholar.

[Israel Moses Ta-Shma]

Saadiah's Philosophy

Although Saadiah was not the first medieval Jewish philosopher, in light of his public standing, the scope of his philosophical oeuvre, and the influence it had on subsequent generations, he can be considered the founding father of medieval Jewish philosophy.

Saadiah's major philosophic work, written in Arabic, *Kitāb al-Amānāt wa-al-Itiqādāt* (ed. by S. Landauer, 1880;

tr. by S. Rosenblatt, *The Book of Beliefs and Opinions*, 1948; abridged version, tr. by A. Altmann, in: *Three Jewish Philosophers*, 1965), is the earliest Jewish philosophic work from medieval times to have survived intact. It was translated into Hebrew by Judah ibn *Tibbon in 1186 under the title *Sefer ha-Emunot ve-ha-De'ot* (Constantinople, 1562), and in this version exercised a profound influence on Jewish thought. A new Hebrew translation was prepared by Y. Kafih and published together with the Arabic original (1970).

There exist several manuscripts of an earlier anonymous Hebrew paraphrase of the work, *Pitron Sefer ha-Emunah*, which was probably written by an author who lived within the boundaries of Byzantine culture in the 11–12th century (critical edition: Hebrew paraphrase of Saadiah Gaon's *Kitāb al-Amānāt wa-al-Itiqādāt*, ed. R.C. Kiener, Ph.D. thesis, University of Pennsylvania (1984); idem, in: *AJS Review*, 11:1 (1986), 1–25). Saadiah also wrote an Arabic commentary on the *Sefer Yezi'rah* ("The Book of Creation"), titled *Tafsīr Kitāb al-Mabādi* (ed. and tr. into French under the title *Commentaire sur le Sefer Yesira par le Gaon Saadya*, by M. Lambert, 1891), which was translated into Hebrew by Moses b. Joseph of Lucena, probably sometime during the 12th century (Ms. Munich, no. 92). A new Hebrew translation was prepared by Y. Kafih and published together with the Arabic original (1972). References to other Hebrew translations of this work are found in the commentary on *Sefer Yezi'rah* by *Judah ben Barzillai al-Bargeloni (ed. by S.J. Halberstam, 1885), and in Berechiah ha-Nakdan's *Mezaref* (ed. by Gollancz, 1902). Saadiah's philosophical views are also contained in some of his introductions to the Pentateuch (see Y. Kafih, *Perushei Rabbenu Sa'adyah Ga'on al ha-Torah*, 1963). Exegetical works, especially introductions to commentaries, also served as a vehicle for Saadiah to expound his philosophical system, e.g., in the introduction to Job he discusses at length divine justice and the suffering of the righteous, in the introduction to Daniel he refutes the validity of divination in general, and astrology in particular, to forecast the future, as opposed to prophecy, which is the only true source for knowing future events (notably the ultimate redemption), because of its divine origin.

Saadiah was close to the school of the Mu'tazilites (see **Kalām*), but it is evident that he was also influenced by Aristotelianism, Platonism, and Stoicism. He, in turn, influenced Jewish Neoplatonists, such as *Baḥya ibn Paquda, Moses *Ibn Ezra, and *Abraham ibn Ezra. Jewish Aristotelians such as Abraham *Ibn Daud also borrowed some of his ideas. The influence of Saadiah declined with the appearance of the *Guide of the Perplexed*, in which Maimonides attacks *Kalām* philosophy, alluding to Saadiah, although never mentioning him by name. However, in the 14th and 15th centuries, Maimonides' philosophical opponents drew upon Saadiah's work, and *Sefer ha-Emunot ve-ha-De'ot* was influential until the *Haskalah period.

In line with Mu'tazilite thought, Saadiah in *Sefer ha-Emunot ve-ha-De'ot* did not attempt to establish a complete philosophical system resting upon an independent foundation,

but rather set out to find a rational basis for the dogmas of the Oral and Written Law. Saadiah explains that he wrote this work in order to provide his fellow Jews with spiritual guidance in the face of the confusion which the multiple sects and religious disputes of the tenth century had created among the people, and to combat heretical views, such as those of Ḥiwī al-Balkhī. The *Emunot ve-De'ot* (as it is usually referred to) is a polemical work, in which Saadiah, in addition to clarifying and expounding his own views, devoted much space to disproving opposing theories. Saadiah believed that it was a religious obligation to provide a rational basis for the Law and the Jewish faith, in order to dispel doubts and refute views at variance with those which he accepts. Saadiah's importance lies in his being the first medieval Jewish philosopher to attempt to reconcile the Bible and rabbinic tradition with philosophy, reason with revelation and tradition. Unlike his predecessor *Al-Muqammi, Saadiah related his system of religious thought directly to the Jewish sources, and he did it with the authority of his position as *gaon*.

Saadiah was one of the earliest thinkers (though not the first) to establish a list of normative beliefs ("articles of faith," ten in number). Although he did not include this list in any halakhic work, and so did not give them any legally binding status, it seems that they had some influence, and may have paved the way for Maimonides in establishing his 13 articles of faith.

THEORY OF KNOWLEDGE. In the introduction to the *Emunot ve-De'ot*, in an attempt to refute the skeptics and to show that one can achieve a knowledge of the truth by means of speculation, Saadiah presents a psychological and epistemological account of the reasons for doubt, and explains why men in their search for the truth become involved in error. He identifies three sources of knowledge: (1) sense perception; (2) self-evident principles, such as the approval of telling the truth and the disapproval of lying, and (3) inferential knowledge gained by syllogistic reasoning.

He attacks the claim of the skeptics that these sources of knowledge are not to be relied upon, but at the same time discusses the errors that one may make in utilizing them, and the steps that one must take in order to insure their reliability. There is, in addition, a fourth source of knowledge, reliable tradition, i.e., confidence in the truth of the reports of others, which is indispensable for the functioning of human society. In Judaism reliable tradition has special significance in that it refers to the transmission, through Scripture and the oral tradition, of God's revelation to the prophets, and subsequently to the sages. Saadiah maintains that while one can arrive at a knowledge of the truth by means of speculation, revelation is necessary in order to impart the truth to those who are incapable of rational investigation, as well as to provide guidance for those who are involved in speculation. In the division between the three sources of rational knowledge and the reliable tradition Saadiah is part of the Mu'tazilite tradition. This division in turn is the basis for the distinction between rational

laws and revealed ones. Even while engaged in speculation one must not set aside the doctrines contained in Scripture.

Saadiah believes that there is a correspondence between reason and revelation, and that one cannot refute the other. Therefore, one must reject the validity of any prophet whose teachings contradict reason, even if he accompanies his teachings with miracles. Those biblical statements which appear to contradict the results of rational investigation (e.g., anthropomorphic descriptions of God) must be interpreted metaphorically. The establishment of a systematic exegetical methodology is for Saadiah an essential means for the correct rational interpretation of the Bible. Saadiah points out that in interpreting anthropomorphic expressions metaphorically he is not subordinating revelation to reason, but is actually following revelation, which teaches that God is incorporeal.

CREATION. In typical Mu'tazilite fashion, Saadiah opens the body of his work with a discussion of creation. He maintains that the world was created in time, that its creator was other than itself, and that it was created *ex nihilo*. He presents four proofs for creation, the first based indirectly (probably through an Arabic version of the writings of John Philoponus) on Aristotelian premises, the other three drawn from the *Kalām*. In the first proof, invoking the principles that the world is finite in its dimension, and that a finite body cannot possess an infinite force, Saadiah concludes that the force preserving the world is finite and consequently that the world itself must be finite, i.e., must have a beginning and an end. In the second proof, on the basis of the fact that whatever is composed must have been put together at some point in time, Saadiah argues that the world, which is composed of various elements, must have been created at some point in time. In the third proof Saadiah argues that the world is composed of various substances all of which are the bearers of accidents. Since accidents originate in time, and since substances cannot exist actually without accidents, the world itself must have originated in time. The fourth argument is taken from the nature of time. Were the world uncreated, time would be infinite. But infinite time cannot be traversed, and hence the present (or any other finite) moment could never have come to be. But the present clearly exists, and hence time cannot be infinite. It follows that the world must have had a beginning.

Following these four proofs for creation, thus refuting the eternity of the world, Saadiah adduces three arguments that prove that the world did not create itself, i.e., that it has a creator who is other than the world itself. Another set of five (unnumbered) arguments is then brought forward by Saadiah to prove that the Creator of the world made it out of nothing (*ex nihilo*). This set establishes the important principle that while the Creator is eternal everything else is generated in time.

Having advanced these three sets of proofs for creation in time by the Creator, Saadiah proceeds to refute 12 other cosmogonic theories which differ from his own. These range from theories which, while accepting the principle that a creator created the world in time, deny that it was created out of

nothing, through that which upholds the eternity of the world, to theories which are skeptical about the possibility of human knowledge and hence about demonstrating either the creation or eternity of the world (*Emunot ve-De'ot*, 1:3).

NATURE OF GOD. Saadiah's concept of the nature of God is based upon his view of God as creator. God is the cause of all corporeal existence, He cannot Himself be corporeal, for if He were corporeal, there would have to be something beyond Him which was the cause of His existence. Since God is incorporeal, He cannot be subject to the corporeal attributes of quantity and number (or any other property which may be defined by Aristotle's *Categories*, *Emunot ve-De'ot*, 2:9–12), and hence cannot be more than one. Turning to the question of divine attributes, Saadiah demonstrates that an analysis of the concept of God as creator leads to distinguishing three attributes of essence in Him: life, power, and wisdom. The attribution of these qualities to God does not imply a plurality in God. In reality all these qualities are united in Him, but we are forced to speak of them as separate because of the limitation of human language (*Emunot ve-De'ot*, ch. 2). Other scriptural descriptions of God have to be interpreted as referring to his actions, or otherwise to his revelations (*Shekhinah*) or messengers (notably angels). All Jewish thinkers who followed the system of Kalām accepted the distinction between attributes of the essence of God and attributes of His actions, which was typical of that system. Similarly to the Mu'tazilite position, the question thus turns into a linguistic-exegetical one rather than an ontological one. The creation of the world was not the result of a need or compulsion on the part of God, but an act of free will. In creating the world God wished to benefit His creatures by giving them the opportunity of serving Him through the observance of His commandments, by means of which they could attain true happiness (*Emunot ve-De'ot* 1:4).

CLASSIFICATION OF COMMANDMENTS. The laws given by God to Israel may be divided into two categories: the rational laws (*mitzvot sikhliyyot*), which have their basis in reason and which man would have discovered by means of reason even if they had not been revealed, because God planted them in the minds of human beings from their birth, and the traditional laws (*mitzvot shimiyyot*), ritual and ceremonial laws, such as the dietary laws, which do not have their basis in reason. This classification, which results from Saadiah's theory of knowledge (inspired by the Mu'tazila and which crystallized in Mu'tazilite thought about a generation before Saadiah), had a deep and enduring influence on Jewish philosophy in the Middle Ages. The acts to which the traditional laws refer are neither good nor evil from the point of view of reason, but are made so by the fact that they are commanded or prohibited by God. All the rational laws can be subsumed under three basic rational principles: First, reason demands that one express gratitude to one's benefactor. Hence, it is reasonable that God should demand that man render thanks to Him through worship. Second, reason demands that a wise person not per-

mit himself to be insulted. Hence, it is reasonable that God should prohibit man from insulting Him, i.e., should prohibit man from taking His name in vain, or from describing Him in human terms. Third, reason demands that creatures should not harm one another. Hence, it is reasonable that God prohibit men from stealing, murdering, and committing adultery, and harming one another in various other ways. While the individual traditional laws do not have their basis in reason, these laws as a class can also be subsumed under a principle of reason. It is reasonable for a wise man to give unnecessary employment to a poor man merely in order to be able to pay him and thereby confer a benefit upon him. Thus, it is reasonable that God should present man with various ceremonial laws in order to be able to reward man for observing them. While the basis of the traditional laws is the fact that they are commanded by God, it is possible upon careful examination to discern even in these laws a certain intrinsic value and rationality, or rather usefulness, which is termed by Saadiah as God's wisdom (Ar. *ḥikma*). For example, the commandment to refrain from work on the Sabbath provides man with an opportunity to devote himself to spiritual matters. Revelation is obviously necessary in order for man to arrive at the knowledge of the traditional laws. It is also necessary in the case of the rational laws, for reason grasps only abstract principles and general norms. The details necessary for the concrete application of these principles are communicated by means of revelation (*Emunot ve-De'ot*, ch. 3).

NATURE OF MAN AND DIVINE JUSTICE. Saadiah views man as a composite of body and soul. The soul is made of very fine material (comparable to the material of which the celestial spheres are made, and even finer than they are), and has three essential faculties: appetite, which controls growth and reproduction; spirit, which controls the emotions; and reason, which controls knowledge, and is ideally supposed to govern the other two faculties. The soul cannot act on its own, and is therefore placed in the body, which serves as its instrument. By means of his actions, i.e., by means of the performance of the divine commandments, man can attain true happiness. One may ask why God does not reward man without his having to undergo hardship and suffering in this world. Saadiah explains that the only real reward is that which man wins for himself through actions for which he is responsible. It is precisely the quality of infinite goodness in God which demands that man be given the opportunity to win his own reward (*Emunot ve-De'ot* 6:4). It follows that man must have freedom of choice, for if he did not, he would not be responsible for his actions, and God's rewarding and punishing him would be unjust. A further indication that man possesses freedom of choice is the fact that he feels that he is free to act, and does not feel anything preventing him from acting. Saadiah attempts to reconcile the paradox of free choice with God's foreknowledge by stating simply that God's knowledge is not a cause of man's actions, and hence does not restrict his freedom of choice. God merely knows what the outcome of man's delib-

eration will be (*Emunot ve-De'ot* 4:3, 4). The problem which troubles Saadiah more is the question of theodicy – why the evil prosper and the good suffer. The solution, according to Saadiah, lies in the balance between suffering in this world and the reward in the next. The righteous who suffer in this world will be rewarded in the **olam ha-ba*. In the latter part of *Emunot ve-De'ot* Saadiah discusses extensively problems of Jewish eschatology such as resurrection of the dead, the Messiah, and redemption. He concludes with a long ethical treatise describing how man should conduct himself in this world in order to achieve true happiness. The Golden Mean is a leading principle in this treatise.

As Grammarian

Saadiah devoted much attention to the Hebrew language. In addition to many linguistic annotations in his biblical commentary he wrote three separate works on the subject. His first work on the Hebrew language was *Sefer ha-Agron* (ed. by N. Allony, 1969), which he wrote at the age of 20, in vocalized, accented, and flowery Hebrew. After several years he issued a second edition with an introduction in Arabic, as well as an Arabic translation of the Hebrew text. His purpose was to provide a dictionary of a large part of the Hebrew language and in particular to help poets in writing Hebrew poetry by giving a rhyming dictionary of word-endings. In his work he also sought to teach the principles of grammar. In its Hebrew preface, of which only a fragment has survived, he explained the differences between the root letters and the affixes, enumerating the letters used as the latter. In the second edition he added a discussion, with examples, of some of the characteristic features of a poem. In the Arabic introduction he explicitly stated that he was prompted to compose the work through the influence of an Arab writer, but following in his footsteps he aimed only at what would promote the Hebrew language, a brief historical survey of which he embodied in the Hebrew preface to the book. Only fragments have been published.

His second linguistic work, *Pitron Shiv'im Millim*, ed. by Dukes in ZKM, 5 (1844) 115–36 and subsequent editions, contains an incomplete list of the **hapax legomena* in the Bible, which are explained from the language of the Mishnah. The form of the work, as extant in manuscripts and in printed versions, gives the impression of being a fragment of a much larger book from which it was detached to constitute a separate treatise. The aim of the work was polemical, in that it set out to prove that the Oral Law is indispensable, since it is impossible to comprehend these biblical words without the help of the Mishnah. Saadiah explicitly said: “They [that is, the **Karaites*] are unaware of the fact that they have come to know the sense of these words only from what I have adduced as proof and thus revealed their meaning from the Mishnah.” For their part, the Karaites accused him of distorting the truth so as to invent proof of the indispensability of the Mishnah.

Saadiah's third work, *Sefer Zahut ha-Lashon ha-Ivrit*, deals with Hebrew grammar; only fragments of it were discovered in recent times. The work is divided into 12 sections,

each of which treats of a grammatical problem. From these fragments it would appear that he replied to questions, and in doing so dealt with the letters and the vowels and their combinations, the inflection of the noun and of the verb, the formative letters, the *dagesh* and the *rafeh*, the rules of the *sheva*, and metathesis. He established the conjugation in Hebrew and illustrated it by *kal* and *hifil*. Like all his other writings, Saadiah's work on grammar attests to his extensive knowledge and the great vigor with which he applied himself to whatever task he undertook. His detailed knowledge of the Hebrew language as preserved in the masorah, extending even to the vowels, is astonishingly precise. It is still more astonishing to read his “*Shir shel ha-Otiyyot*,” which he wrote on each letter of the Hebrew alphabet, including the final letters. On each he composed two couplets which, by words and biblical allusions, give the number of times that particular letter occurs in the Bible. Each poem, in addition to giving the precise figure, conveys an idea. The lines written on *alef* will serve as an illustration:

אהל מכוני בניני ששם עליו זקני הקהל עשו קרבני ולזבח תודה באו בני
 ... the meaning of which is as follows: “The Temple, the foundation of all buildings, To which the elders of Israel went on pilgrimage, And where the people offered sacrifices, And the children of Israel came to sacrifice a thanksgiving offering.” The number of times the letter *alef* (אהל) occurs in the Bible corresponds to the numerical value of the initial letters of the words following אהל, that is, מ"ב (אלף) שע"ז (= 42,377), the mnemonics for which are הקהל (Neh. 7:66, “The whole congregation [הקהל] together was forty and two thousand three hundred and three score”) and ולזבח (Num. 7:17, “And for the sacrifice [ולזבח] of peace-offerings, two oxen, five rams, five he-goats, five he-lambs of the first year,” making a total of 42,360+17.

[Abraham Solomon Halkin / Haggai Ben-Shammai (2nd ed.)]

Saadiah's Translation of the Bible

All Saadiah's grammatical work was ancillary to his activity as an exegete, and his most enduring and comprehensive work in the field of exegesis is his Arabic translation of, and partial commentary to, the Bible. This was the first translation of the Bible from Hebrew into Arabic, and has remained the standard Bible for Arabic-speaking Jews. He first prepared a translation, probably of all books of the Bible with an extensive commentary designed for learned readers, and then proceeded to write a popular translation which, as its name *Tafsir* (commentary) indicates, was both translation and commentary. In order to make it accessible and intelligible to the ordinary reader, he did not confine himself to a literal translation, but translated freely, sometimes disregarding syntax or paraphrasing the whole chapter. The *Tafsir* is rational, and Saadiah goes out of his way to eliminate all anthropomorphisms. One of the peculiarities is that he follows the Pseudo-Jonathan Targum (not, as would appear from Malter, the Targum Onkelos) in translating the proper names in the Bible, for which he was severely taken to task by Abraham ibn Ezra

(to Gen. 2:21). Ibn Ezra, however, excuses him on the grounds that he probably did so in order to avoid criticism by those Muslims who might read the work that the Jews did not know the meaning of many words in their own Scriptures. Unlike many other Jewish scholars who wrote in Arabic, he used the Arabic and not the Hebrew alphabet (see also *Bible, Translations, Arabic).

As Liturgist and Paytan

Saadia devoted considerable attention to all matters appertaining to liturgy. Since in his time there did not yet exist a methodically arranged prayer book, he made a systematic compilation in Arabic of the prayers for the whole year. Titled *Kitāb Jam'ī al-Ṣalawāt wa al-Tasabīh* ("Collection of All Prayers and Praises"), the book was very well known in Egypt and in other countries where Arabic was the vernacular. With the passage of time, however, it was forgotten and was published only in recent times by I. Davidson, S. Assaf, and B.I. Joel under the name of *Siddur Rav Sa'adyah Ga'on* (1941) in the Arabic original, with a Hebrew translation, and with many additional *piyyutim*.

Saadia was a great innovator in the sphere of **piyyut*, in language, form, and content. His **bakkashot* received high praise from Abraham ibn Ezra; in his commentary to Ecclesiastes (5:1) he said of them "that no author had composed their like." Maimonides was asked whether it was necessary to stand when reciting the *bakkashot* of the *Gaon* (Responsa Maimonides, ed. by Blau, no. 14). Because of their importance and interest, they were translated into Arabic and circulated in many communities. In addition to the *bakkashot*, scholars through the generations also mention Saadia's **azharot* and his **hoshanot*. (His "*Shir shel ha-Otiyyot*," "The Poems of the Letters," belongs rather to grammar than to liturgy, and is dealt with in the appropriate section above.) Many of his *piyyutim* were found in the Cairo **Genizah* and edited by Menahem **Zulay*; they reveal Saadia as a prolific writer of *piyyutim*, deft in the use of language and the devices of the *piyyut* form. Today it is known that besides the *piyyutim* already mentioned, Saadia composed **kerovot*, **seliḥot*, **kinot* and philosophical poems. In his *tokheḥah* (poem of reproof) "*Im Lefi Behirkha*" ("If by your Choice"), Saadia gave expression to many of the philosophical ideas which are also found in his *Emunot ve-De'ot*. There are similar ideas in some of his *bakkashot*, and also in his hymn for the Day of Atonement *Barekhi Nafshi* ("Let My Soul Bless") and there is no doubt that he was the first to compose philosophical *piyyutim*. These were later to serve as a model for such Spanish *paytanim* as Solomon ibn **Gabirol* and **Judah Halevi*.

[Abraham Meir Habermann]

Saadia's Influence

Saadia is one of the dominant figures in the development of Judaism and its literature. Although he had predecessors in some of the branches of that literature in which he engaged, he was the first to weld these numerous and diverse studies into a complete system. He provided a powerful impetus to all those

who followed in his footsteps in the various branches of that literature, and there is hardly one of the outstanding figures in them who does not pay generous and laudatory tribute to his pioneering work. In philology, **Menahem b. Jacob ibn Saruq* speaks of "the accuracy of his interpretations and the comprehensiveness of his linguistics"; the renowned grammarian *Jonah *Ibn Janaḥ* praises his great work in that field; the mathematician and astronomer *Isaac b. Baruch ibn Abbatio* states that "he was greater in science than I am"; to *Abraham ibn Ezra* in his biblical commentary he is "the *Gaon*" par excellence, and in his devastating criticism of the *paytanim* (to Eccles. 5:1), he singles out Saadia as an exception. *Maimonides* disagreed with his philosophical views in many fundamental points, but states "were it not for Saadia the Torah would have well-nigh disappeared from the midst of Israel" (*Iggeret Teiman*). His halakhic works penetrated to the Franco-German center and to the *tosafists*. He is the most authoritative geonic source, a fact which incidentally is evidence that his Arabic works were early translated into Hebrew, in versions which are no longer extant. "Taken all in all" says *Malter*, "Saadia must be considered a remarkable milestone on the long road of Israel's development as a 'people of the book.'"

SAALSCHUETZ, JOSEPH LEWIN (1801–1863), German rabbi and archaeologist. Saalschuetz was born at Koenigsberg, where he served the Jewish community as preacher and teacher from 1835. In 1847 he was admitted to Koenigsberg University as lecturer in Hebrew archaeology, although he was denied a professorship, despite his undoubted capabilities, because of his Jewishness.

Among Saalschuetz's published works are *Von der Form der hebraeischen Poesie* (1825); *Archaeologie der Hebraeer* (2 pts., 1855/56), a pioneering work describing the dress, science, customs, and government of the Jews, which includes the earlier *Geschichte und Wuerdigung der Musik bei den Hebraeern* (1829); and, of special importance, *Das mosaische Recht, mir Beruecksichtigung des spaeteren juedischen* (2 pts., 1846–48), *Das mosaische Recht, nebst den vervollstaendigenden thalmudisch-rabbinischen Bestimmungen* (1853²). This work, dealing in its first part with public laws, and the second with private (civil) law, has retained its value as a source book for the study of Jewish law. Saalschuetz was among the contributors to the early volumes of the *Monatsschrift*.

His son, LOUIS SAALSCHUETZ (1835–1913), was a noted mathematician, who taught at Koenigsberg University.

SAARBRUECKEN, city in Germany, capital of the Saar. Jews were probably present in the city in 1321 when Duke John I granted the city its charter and reserved jurisdiction over the Jews. It is certain, however, that there were Jews in the adjacent villages of St. Wendel, Sarrebourg, and Sarreguemines at the time. There are no further sources mentioning the presence of Jews until 1732 when a *Judenordnung* ("Jewry regulation") was issued for the Saarbruecken community by the Count of Usingen-Nassau. During the French occupation (1792–1813) equality was granted and a Saarbruecken arrondissement was established with a Jewish population of 71. The Saarbruecken community grew from 10 families in 1837 to 376 persons in 1885 and 1,103 in 1910. Between 1920 and 1935 the Saar region was administered by the *League of Nations. The Saarbruecken community grew to 2,650, with another 1,700 Jews dispersed in 23 rural communities. At the time of the 1935 plebiscite on the future of the region, the Jews were accused of disloyalty and subjected to intensive harassment. Large numbers of Jews chose French and Belgian citizenship, and many emigrated with special "Nansen" passports. The Saarbruecken synagogue was burned down on Nov. 9/10, 1938, and by the summer of 1939 only 175 Jews were left. The Jews of the Saar were deported, together with Baden Jewry, to

*Gurs in 1940. After the war a new community was founded, which grew from 180 in 1945/6 to 224 in 1948 and 350 in January 1970. A new synagogue was built in 1951. The Jewish community numbered 700 in 1960; 236 in 1989; and 1,110 in 2004. The increase is due to the immigration of Jews from the former Soviet Union.

SAATCHI, CHARLES (1943–), British advertising agent and art collector. Born in Baghdad, the Saatchis fled to Britain in 1948 due to antisemitic pogroms by the Iraqis at the time of the creation of Israel. Charles Saatchi left school at 17 and founded the famous advertising agency Saatchi & Saatchi with his brother in the early 1970s. By the 1980s it had become one of the biggest advertising agencies in the world, and it is seen as an important factor in Margaret Thatcher's electoral victory in 1979, producing the famous poster "Labour Isn't Working." The Saatchis were ousted from their firm in a boardroom coup in 1994 and established a new agency, M & C Saatchi. Charles Saatchi is best known as one of the most important and controversial collectors and patrons of contemporary art in the world, giving a start to such artists as Damien Hirst. In 1985 he founded the Saatchi Gallery of Contemporary Art at the London County Hall site, and he has one of the most valuable private collections of contemporary art in the world. His brother BARON MAURICE SAATCHI (1946–) was also born in Baghdad and, following his career as an advertising agent, became an important force in the British Conservative Party. He was awarded a life peerage in 1996 and served as a Shadow spokesman in the House of Lords before becoming joint chairman of the Conservative Party in 2003.

SABA, ABRAHAM BEN JACOB (d. c. 1508), Spanish exegete, preacher, and kabbalist. On the expulsion of the Jews from *Spain, Abraham settled in Oporto (Portugal), where he wrote commentaries on the Pentateuch, the Five Scrolls, and on *Avot*. When the forced conversion of the Jews was decreed in Portugal in 1497, his two young sons were baptized and his extensive library plundered. He left Oporto, taking his writings with him, but when near Lisbon he was warned by the local Jews of the danger of entering the city with Hebrew books

in his possession, which was a capital offense. He thereupon buried his manuscripts under an olive tree. In Lisbon he was arrested and imprisoned together with other scholars, pressure being exerted on them to accept baptism. After nearly six months he succeeded in escaping to Fez in Morocco, where he fell ill. When he recovered, he began to rewrite his lost works from memory. He succeeded in completing only his commentaries on the Pentateuch, Ruth, and Esther. He remained in Fez for ten years, and in 1508 he was in Tlemcen in Algeria, and, it is thought, later in Italy.

H.J.D. Azulai tells an anecdote relating to Abraham. On a sea voyage to Verona, Saba became dangerously ill and, during a heavy storm, exacted a promise from his fellow travelers that, should he die, he would be given Jewish burial on dry land. As a result of his prayers the storm abated. He died on the eve of the Day of Atonement and the captain saw to it that the local Jews carried out his request. According to another account, however, he died in Fez. In Spain, Portugal, and Morocco Saba preached in the synagogues, urging the congregations to fulfill the principles of Judaism. He attributed their misfortunes to that, in their pride and arrogance, they had forgotten their ancestral land, building themselves palatial residences in alien countries, neglecting the Torah, and desecrating the Sabbath.

Abraham's works included *Zeror ha-Mor* (Venice, 1522), a commentary on the Pentateuch: a Latin translation of this by Conrad Pellicanus is extant in manuscript in the city library of Zurich; *Eshkol ha-Kofer*, commentaries on the Five Scrolls (the commentary on Esther published in 1904, on Ruth published in 1908); *Perush Eser Sefirot*, on the ten *Sefirot*, extant in manuscript, which he wrote in Tlemcen. His lost works include commentaries on Job; on the commandments, *Zeror ha-Kesef*, which he wrote in his youth; *Zeror ha-Hayyim*, on tractate *Avot*; on Psalms; and a kabbalistic commentary on the daily prayers.

SABA, UMBERTO (pseudonym of **Umberto Poli**; 1883–1957), Italian poet. Saba's mother, a niece of S.D. *Luzzatto, was abandoned by her Catholic husband before the birth of her son, and some scholars have argued that he adopted the Hebrew surname Saba ("grandfather") as a tribute to Luzzatto; but more likely the surname was chosen by him for its assonance to his Slovenian nurse's name, Saber. In his youth, Saba struggled with hardship and poverty and, after abandoning commercial studies, joined the mercantile marine and later the army, enlisting in an infantry regiment in 1908. His early *Versi militari* date back to those years and were later collected, with others, in *Coi miei occhi* (1912), the book which first brought him renown. Saba opened a secondhand bookshop in Trieste, his birthplace, which became a rendezvous for poets and writers. For almost 30 years he continued to publish poetry, but, despite its favorable reception by critics,

he remained a literary outsider. Antisemitic persecution did not spare Saba: aware of the conflict between the two worlds to which he belonged, he chose to share the fate of the Jews. He immigrated to Paris, but returned to Italy in 1943, and remained in hiding until the end of World War II. Sick and exhausted, he then returned to Trieste.

Saba is considered one of the major contemporary Italian poets. His themes include Trieste, its sailors and people, his troubled youth, his wife, daughter, and friends, human suffering, animals, and nature. His verse is tinged with melancholy and pessimism, and enriched with a deep feeling for the world's misery, and eagerness for warm human contacts. With his lucid style, and a language that is almost prosaic in its use of everyday words and expressions, Saba achieves a musical and deeply poetic effect. His works include *Il Canzoniere* (1921), *Autobiografia* (1924), *Figure e canti* (1926), *Tre Composizioni* (1933), and *Parole* (1934). Poems of the years 1900–54 appear in a second *Canzoniere* (1963), while a complete edition of his poems has been published in a dozen volumes.

In order to explain the inner development of his poetry, Saba wrote a detailed self-critical and autobiographical essay in *Storia e cronistoria del Canzoniere* (1948). Autobiographic details also appear in two other prose works, *Scorciatoie e raccontini* (1946) and *Ricordi-Racconti* (1956). In the latter, some chapters collected under the title "Gli Ebrei" ("Jews," pp. 22–87, with a preamble by Carlo *Levi) give sketches of the life of the Jewish community of Trieste in the author's boyhood years. Among these sketches there is a description of an episode in the life of the young Luzzatto. Notes at the end of each narrative show that Saba had some knowledge of Hebrew and of the vernacular of Trieste's Jews. In his introduction to "Gli Ebrei" Saba emphasizes, somehow apologetically, that these tales, describing Jewish life in Trieste in an ironical and not always sympathetic way, were written at the beginning of the 20th century, far before the explosion of antisemitism in Europe and the tragedy of the Holocaust. Also in his poetry Saba shows ambivalence towards his Jewish roots, sometimes identifying himself with his Jewish ancestors and relatives, and sometimes criticizing them. Many of his poems have been translated into other languages.

[Giorgio Romano]

SABAN, HAIM (1944–), American-Israeli media executive. A native of Alexandria, Egypt, Saban and his parents fled to

Tel Aviv following the Suez War of 1956. He attended agricultural school and served in the Israel Defense Forces. After establishing a leading tour business, he relocated to France in 1975 and built a record company that became a major European label, selling over 18 million albums in eight years. In 1983, Saban moved to Los Angeles, where he launched a chain of recording studios that became one of the leading suppliers of music for television. He formed Saban Entertainment in 1988, an international television, production, distribution, and merchandising company, best known for creating the Mighty Morphin Power Rangers, to this day the No. 1-selling toy for boys in the United States. In 1995, Saban merged his company with Rupert Murdoch's Fox Kids Network and acquired the Fox Family Channel (restructured as Fox Family Worldwide) in 1997. He sold it to the Walt Disney Co. in 2001 and became founder and CEO of Saban Capital Group, Inc. Saban supported many charities, including the Israel Cancer Research Fund, the John Wayne Cancer Institute, the Children's Hospital of Los Angeles, and the Milken Community High School. He also founded the Saban Institute for the Study of the American Political System at the University of Tel Aviv and the Saban Center for Middle East Policy at the Brookings Institute in Washington, D.C. In 2002, Governor Gray Davis appointed Saban to the University of California Board of Regents, the governing body of the University of California. Saban resigned from this post in 2004 after being publicly criticized for not attending meetings.

[Amy Handelsman (2nd ed.)]

SABATH, ADOLF JOACHIM (1866–1952), U.S. congressman. Sabath, who was born in Zabori, Bohemia, went to the U.S. at the age of 15 and settled in Chicago. He subsequently began practicing law in 1893 and became a justice of the peace in 1895. As a police magistrate from 1897 to 1907, Sabath was instrumental in the abolition of the fee system, the establishment of the juvenile court, and the implementation of a parole system. Elected to the U.S. Congress as a Democrat from Chicago's Fifth District in 1906, Sabath served in the House for 23 consecutive terms until his death, the second longest continuous service of any congressman. Representing a reform-minded immigrant constituency, he was a vigorous liberal who used his seniority and influence fully on behalf of New Deal and Fair Deal legislation.

In contrast to the prevailing climate of opinion during the 1930s, Sabath was a strong supporter of military preparedness and subsequently voted for the Lend-Lease Act. Sabath unsuccessfully sought the abolition of the House Un-American Activities Committee, which he considered detrimental to civil liberties in the U.S. From 1939 to 1947, and from 1949 to 1952, he was chairman of the powerful House Rules Committee.

SABBATH (Heb. שַׁבָּת; *Shabbat*; related to the verb *shavat*, "cease, desist, rest"), the seventh day of the week, the day of rest and abstention from work.

In the Bible

The etiology of the Sabbath is given in Genesis 1:1–2:3, although the name of the day does not appear there: God worked six days at creating the world; on the seventh he ceased working (*shavat mi-kol mela'khto*), blessed the day, and declared it holy (see 2:1–3). The special status of the seventh day and its name were disclosed to Israel in the episode of the manna. God supplied each day's need of manna for five days; on the sixth, a double portion was provided to last through the seventh day, on which no manna appeared. Correspondingly, the Israelites were commanded to go out, collect, and prepare each day's portion for the first five days; on the sixth, they were to prepare for two days; on the seventh they were not to go out at all but were to remain at home. Thus they learned that the seventh day was "a Sabbath of the Lord," which they must honor by desisting from their daily food-gathering labor (Ex. 16:22). The fourth "word" of the *Decalogue generalizes the lesson of the manna. All work (*mela'kha*) is banned on the Sabbath, which here for the first time is given a rationale, drawn directly from the formulation of Genesis 2:1–3 and expressly identifying the Sabbath with the seventh day of creation (Ex. 20:8–11). The meaning of the "blessedness" and "sanctity" of the day is inferrable from the manna experience.

According to Exodus 23:12 and 34:21, work is to cease on the seventh day in order to give slaves and draft animals rest; this must be observed even during the critical seasons of plowing and harvest. Deuteronomy's version of the Decalogue embodies this humanitarian motive in its divergent rationale of the Sabbath rest; Israel is to keep the Sabbath so that its slaves might rest, and because God, who liberated it from Egyptian bondage, so commanded (Deut. 5:14–15). God's instructions concerning the building of the Tabernacle end, and Moses' conveyance of them to the people begins, with an admonition to keep the Sabbath, indicating its precedence even over the duty of building the Sanctuary. The Sabbath is called a sign both of God's consecration of Israel, and of His six-day creation. The rulings are applied in the exemplary tale of Numbers 15:32ff. A man was found collecting wood (to make a fire) on the Sabbath. Apprehended by witnesses and brought before Moses, he was sentenced to death by stoning at the hands of the whole community. Besides the daily sacrificial offering, an additional one, amounting to the total offering of a weekday, was prescribed for the Sabbath (Num. 28:9–10; cf. Num. 28:3–8). Admonitions to observe the Sabbath are coupled once with reverence toward parents (Lev. 19:3; cf. the juxtaposition in the Decalogue), and twice with reverence toward the Sanctuary (Lev. 19:30; 26:2). As a time marker, the Sabbath terminated the week. Thus in the Tabernacle cult, the weekly replacement of shewbread occurred on the Sabbath (Lev. 24:8; 1 Chron. 9:32).

Only scraps of evidence are available concerning the nature of the Sabbath during the monarchy. In the Northern Kingdom during the ninth and eighth centuries, Sabbath and New Moon are mentioned together as days when business activity was halted (Amos 8:5), and people paid visits to

men of God (11 Kings 4:23). From Hosea 2:13 it appears that the Sabbath, like the New Moon and the festival mentioned before it, was among “all the joys” of the North that were under God’s doom; this is a precious attestation of the joyous character of the day. In eighth-century Judah, too, Sabbath and New Moon were popularly celebrated in sacred convocations held in the Jerusalem Temple (Isa. 1:13; cf. Lam. 2:6 for later times). Again, as a time marker, the Sabbath was the day on which the palace guard was changed weekly (11 Kings 11:5–9). Esteem of the Sabbath rose just before, during, and after the Exile. Jeremiah 17:19–27 berates the rulers and populace of Judah for condoning the hauling of burdens (market wares) into and within Jerusalem on the Sabbath. In an unprecedented prophecy, the fate of the dynasty and the city is made to depend upon the observance of the Sabbath. Ezekiel contains similar prophecies. Chapter 20:12ff. lays stress on the Sabbath as a sign of Israel’s consecration to God; its significance is shown by juxtaposition with all the rest of the divine laws, the Sabbath alone being singled out by name. In catalogs of sins for which Jerusalem was doomed, desecration of the Sabbath occurs repeatedly. As part of his program for a reconstituted Israel, the prophet innovates the priestly duty of seeing that the Sabbath is kept holy (44:24). Noteworthy too is the increase in the number of animals prescribed for the Sabbath sacrifice from double that of the weekday to the befitting number seven (Ezek. 46:4). The Exilic “Isaiah” also singles out the observance of the Sabbath, juxtaposing it to all the rest of the covenant obligations as the precondition of individual and national restoration (56:2, 4, 6; 58:13: “If you call the Sabbath a delight/That which the Lord has sanctified – a day to be honored”). This prophet looks to an eventual universalization of the Sabbath among all nations (66: 23).

The prophets’ estimate of the fateful importance of Sabbath observance was taken to heart in the fifth-century community of restored Jerusalem. The public confession of Nehemiah 9:14 once again singles out the Sabbath from all the “commandments, laws, and teachings” given to Israel through Moses. A special clause in the covenant subscribed to by the community’s representatives forbids commerce with outsiders on Sabbaths and holy days (Neh. 10:32). Nehemiah enforced this clause rigorously as governor of Judah, reminding the indifferent aristocrats that for desecrating the Sabbath their ancestors had been visited with catastrophe (13:15–22).

HISTORICAL AND LITERARY-HISTORICAL CONSIDERATIONS. Evidence that in the period of the monarchy the Sabbath was a popular, joyous holy day, marked by cessation of business and celebrated publicly and by the individual, in the Sanctuary and outside it, accords with the pentateuchal traditions that it was among the chief stipulations of the Mosaic covenant. The antiquity and interrelation of the various rationales given in the Pentateuch for the Sabbath are, however, problematic. Such rationales appear in both versions of the Decalogue. That of Exodus, associating the Sabbath with the Creation, is theocentric and sacramental. The sanctity of

the day is grounded in an event in the life of God – His cessation from work, His rest, His blessing and consecration. Israel’s observance of the day is imitative and out of respect for God’s authority. The revelation of the day’s sanctity exclusively to Israel – with the attendant obligation to keep it – is a sign of Israel’s consecration to God. This rationale is worked out in the creation story, the Exodus Decalogue, and the two admonitions connected with the building of the Tabernacle. Critical analysis assigns all these passages to the Priestly Source (P); their interrelation is, in any event, beyond dispute. The Deuteronomic version of the Decalogue grounds the Sabbath, ambiguously, on the liberation of Israel from slavery. On the one hand, the humane concern of Exodus 23 over the welfare of slaves is involved, on the other, the authority of God to give such laws by virtue of His having redeemed Israel. Since none of these rationales is reflected in the meager extra-pentateuchal passages on the Sabbath, speculation on their age and interrelationship can be based only on internal evidence. Even if conceptual or literary development can be shown, absolute dating is impossible – all the more so when it is borne in mind that presently interrelated ideas may have arisen independently and contemporaneously, and in either case, before their literary embodiment. The compassionate ground of Exodus 23:12 is conceptually simpler than the historical-humanistic one of Deuteronomy. On the other hand, Deuteronomy’s is tangential to the essence of the Sabbath day – its holiness. That is accounted for only by the cosmic-sacramental rationale associated with the Exodus Decalogue. But if the rationale in Exodus is the best developed, it is not necessarily the latest. Deuteronomy’s seems to have been substituted for it, as more in accord with the spirit of that work, in its version of the Sabbath commandment. Critics consider the sacramental (probably priestly) rationale an Exilic conception, since its esteem of the Sabbath as a sign of Israel’s consecration agrees with the Exilic views of the importance of the day. But is a historical explanation really needed for the priestly esteem of a holy day whose centrality in Israel’s life is vouched for by its inclusion in the Decalogue – the only holy day so honored? Distinctively Exilic is the appreciation of the Sabbath as a decisive factor in national destiny, and that is lacking in the priestly material as elsewhere in the Pentateuch. Warnings of doom for violation of the covenant laws single out idolatry (Ex. 23:24; Deut. 4:25ff.) as the fatal national sin; Leviticus 26:34–35, 43 – of priestly provenance – adds neglect of the Sabbatical (fallow) Year to the causes of national doom. But violation of the Sabbath day is nowhere held to be a factor in Israel’s downfall, nor is its observance a warrant of national well-being – as in Jeremiah, Ezekiel, the Exilic Isaiah, and Nehemiah. This suggests that the age of Jeremiah is the *terminus ad quem* of the pentateuchal material on the Sabbath. The increased regard for the Sabbath from Jeremiah’s time on is to be connected with the danger of assimilation to the gentiles that loomed since the reign of Manasseh (cf. Zeph. 1), and greatly troubled the religious leaders of the Exile (Ezek. 20:32ff). With the Temple destroyed and the Jews dispersed, the distinctively Israelite day

of rest, which allowed for public and private expression and which was not essentially bound up with a sacrificial cult, became a chief vehicle of identification with the covenant community. To mark oneself off from the gentiles by observing the peculiar, weekly “sign” of God’s consecration of Israel was an act of loyalty which might well be counted the equivalent of the rest of the covenant commandments, while disregard of the Sabbath might well be considered as serious a breach of faith with the God of Israel as the worship of alien gods. Such in fact was the view of Exilic and post-Exilic thinkers who put forward the idea that the breaking of the Sabbath was a cause of the nation’s collapse.

Speculation on the origin of the Sabbath has centered on the apparent Babylonian cognate, *šapattu*, the mid-month day of the full moon, called “the day of calming [the god’s] heart” – apparently an auspicious day. The biblical combination of “New Moon and Sabbath” has been thought, accordingly, to reflect what were originally two holy days, one at the start, the other in the middle of the month. Another partial analogy to the Sabbath has been found in the “evil days” of the Babylonian month (mostly at seven-day intervals) on which the king’s activity was severely restricted. How the *šapattu* might have been combined with the entirely distinct “evil days,” become dissociated from the lunar cycle, and finally emerge as the joyous, weekly “Sabbath of the Lord” has not been persuasively explained. Nonetheless an ultimate connection between the biblical and the Babylonian phenomena seems likely. If so, the history of the Sabbath began with a radical severance from the past. The particularity of the biblical day was its positive sanctity – so that abstention from work on it expressed piety, and that sanctity was a divine ordinance – not a matter of lucky and unlucky times. It was perhaps first grounded on God’s compassion toward workers, later brought into relation with the Creation, and later still with the Exodus.

[Michael J. Graetz]

In the Apocrypha

According to the Book of Maccabees, the Sabbath was at one time observed so strictly that on one occasion during the Maccabean revolt, the Jews allowed themselves to be killed rather than resist on the Sabbath (1 Macc. 2:31–38). Later, it was decided that the Sabbath may be transgressed in order to save life (1 Macc. 2:40–41). The Book of Jubilees (2:17–32 and 50:6–13) is extremely severe on Sabbath desecration, death being the penalty even for such offenses as walking any distance, fasts, or traveling on a ship on the Sabbath. The Book of Jubilees (50:8) also forbids marital relations on the Sabbath, whereas in the rabbinic teaching it is considered meritorious to perform these on the Sabbath (BK 82a, Ket. 62b).

In Rabbinic Literature

The rabbis wax eloquent on the value of Sabbath observance. “If Israel keeps one Sabbath as it should be kept, the Messiah will come. The Sabbath is equal to all the other precepts of the Torah” (Ex. R. 25:12). “God said to Moses: ‘Moses, I have a precious gift in My treasury whose name is the Sabbath and

I want to give it to Israel. Go and tell them” (Bezah 16a). “The Sabbath is one sixtieth of the world to come” (Ber. 57b). “The Sabbath increases Israel’s holiness. ‘Why does so-and-so close his shop?’ ‘Because he keeps the Sabbath.’ ‘Why does so-and-so refrain from work?’ ‘Because he keeps the Sabbath.’ Furthermore, whoever keeps the Sabbath testifies of Him at whose word the world came into being; that He created the world in six days and rested on the seventh” (Mekh. Sb-Y to Ex. 31:14). The juxtaposition of the instructions to build the Sanctuary and the prohibition of Sabbath work caused the rabbis to deduce that it was forbidden on the Sabbath to do any work that was required for the Sanctuary. The rabbinic definition of forbidden Sabbath work is, therefore, that which was needed for the Sanctuary (Mekh. Sb-Y. to Ex. 35:1; Shab. 49b). Any work analogous to those types used for the building of the Sanctuary is classified as being biblically forbidden. There are thus 39 main classes of work (“fathers of work,” *avot*) used in the building of the Sanctuary, and many others derived from these (“offspring,” *toledot*), with only slight technical differences between “father” and “offspring” (BK 2a). Watering of plants, for instance, is a *toledah* of sowing; weeding, of plowing; adding oil to a burning lamp, of lighting a fire. The Mishnah (Shab. 7:2) gives a list of the 39 main classes of work. (It has been noted that the number 39 is a standard number in rabbinic literature and that these types of work are all of a kind obtaining in the rabbinic period.) The Mishnah (Ḥag. 1:8) also states that the laws of forbidden work on the Sabbath are as mountains hanging by a hair, for there is little on the subject in the Scriptures yet the rules are many. In addition to the biblical prohibitions, there are various rabbinic prohibitions introduced as a “fence to the Torah” (Avot 1:1), such as the handling of tools or money (*mukzeh*), riding a horse, instructing a gentile to do work. These rabbinic prohibitions are known as *shevut* (“rest”; Bezah 5:2). One who profanes the Sabbath in public is treated as an idolator (Ḥul. 5a). Conversely, whoever observes the Sabbath as it should be, is forgiven his sins, even if he practiced idolatry (Shab. 118b).

The Sabbath is a festive day and three meals should be eaten on it (Shab. 118a). It was considered meritorious for a man to make some preparations for the Sabbath himself, even if he had servants to do it for him (Kid. 41a). R. Safra used to singe the head of an animal, R. Huna used to light the lamp, R. Papa to plait the wicks, R. Ḥisda to cut up the beets, Rabbah and R. Joseph to chop the wood, R. Zera to kindle the fire (Shab. 119a). R. Ḥanina would say on the eve of the Sabbath: “Come let us go out to meet the Bride, the Queen.” R. Yannai used to adorn himself and say: “Come O Bride, come O Bride” (*ibid.*, BK 32a–b). Out of respect for the sacred day, it was forbidden to fast on the eve of the Sabbath (Ta’an. 27b). In a well-known passage (Shab. 119b), it is said that on the eve of the Sabbath two ministering angels accompany a man from the synagogue to his home. If, when he arrives home, he finds the lamp burning, the table laid, and the couch covered with a spread, the good angel declares, “May it be thus on another Sabbath too” and the evil angel is obliged to answer “Amen.”

But if not, the evil angel declares, “May it be thus on another Sabbath too” and the good angel is obliged to answer “Amen.” At the beginning of the Sabbath, the special sanctification (**Kiddush*) is recited (Pes. 106a), and after the termination of the Sabbath the **Havdalah* (“distinction”) benediction (which signifies the separation of the Sabbath from the weekday) is recited (Ber. 33a), both over a cup of wine. A man should wear special garments in honor of the Sabbath; he should walk differently from the way he does on a weekday, and even his speech should be different (Shab. 11a–b).

In Jewish Thought

From an early period, the Sabbath became a day of spiritual refreshment. Philo (11 Mos. 216) and Josephus (Apion, 2:175) refer to the practice of public discourses on the Torah on this day, as do the rabbis (Yal., Ex. 108). Philo (Decal. 96) sees the Sabbath as an opportunity for man to imitate his Creator who rested on the seventh day. Man, too, should rest from his weekday labors in order to devote himself to contemplation and to the improvement of his character. The Midrash (Mekh. Sb-Y to 20:11) similarly states that if God, who exerts no effort, “writes about Himself” that he rested, how much more should man rest of whom it is said that he was born to toil. The benediction for the Sabbath afternoon service sums up the rabbinic attitude to the Sabbath as a precious gift from God, and as a sacred day kept even by the Patriarchs: “Thou art One and Thy Name is One, and who is like Thy people a unique nation upon the earth? Glorious greatness and a crown of salvation, even the day of rest and holiness, Thou hast given unto Thy people – Abraham was glad, Isaac rejoiced, Jacob and his sons rested thereon – a rest granted in love, a true and faithful rest, a rest in peace and tranquility, in quietude and safety, a perfect rest wherein Thou delightest. Let Thy children perceive and know that this their rest is from Thee, and by their rest may they hallow Thy Name.”

The medieval Jewish philosophers tend to dwell on the symbolic nature of the day. For Maimonides (*Guide*, 2, 31), the Sabbath has a twofold significance: It teaches the true opinion that God created the world, and it provides man with physical rest and refreshment. According to Isaac Arama (*Akedat Yizhak*, 55 ed. Bialystok (1849), 285–89), the Sabbath teaches the three fundamental principles of Judaism: belief in *creatio ex nihilo*, in revelation (because the Sabbath is a time when the Torah is studied), and in the world to come (of which the Sabbath is a foretaste). *Judah Halevi looks upon the Sabbath as a God-given opportunity for men to enjoy complete rest of body and soul for a sixth part of their lives, in a way denied even to kings, who know nothing of this precious boon of complete cessation from toil and distraction (*Kuzari*, 3, 10).

Samson Raphael *Hirsch (*Horeb*, section 2:21; tr. by I. Grunfeld, 1 (1962), 61–78) understands the prohibition of creative activity on the Sabbath (the types of forbidden work do not so much involve effort, as they are creative) to be a lesson for man to acknowledge his Creator as Creator of everything there is. Man is allowed to rule over the world for six days by

God’s will, but is forbidden on the seventh day to fashion anything for his own purpose. On each Sabbath man restores the world to God, as it were, and thus proclaims that he enjoys only a borrowed authority.

The Laws and Customs of the Sabbath

The mistress of the house kindles at least two candles before the advent of the Sabbath, one corresponding to “remember the Sabbath day” (Ex. 20:8), the other to “observe the Sabbath day” (Deut. 5:12). For each meal two whole loaves of bread are placed on the table, covered by a cloth, to correspond to the double portion of manna for the Sabbath (Ex. 16:22–26). Before the *Kiddush* is recited, the parents bless the children. During the festive meals of the day, special table hymns (**zemiroth*) are chanted. Whenever possible, guests should be invited to participate in the Sabbath meals. There is a special order of service for Sabbath in the synagogue. Psalms are recited before the evening service on Friday night, and the morning service includes the weekly readings from the Torah, as well as a *Musaf Amidah*. The afternoon service also includes a Torah reading from the portion to be read on the following Sabbath. When the Sabbath is over, the *Havdalah* benediction is recited, together with a benediction over spices (to restore the soul saddened by the departure of the day), and over light (which could neither be lit nor blessed on the Sabbath). Where there is danger to life (**pikku’ah nefesh*), the Sabbath must be set aside and Sabbath profanation in such circumstances is meritorious in the extreme. Unlike the *Karaites, who took the verse “let no man go out of his place on the seventh day” (Ex. 16:29) literally, the rabbis placed no restrictions on freedom of movement within one’s town, but they prohibited any walking outside the town beyond a distance of 2,000 cubits (a little more than half a mile). This boundary is known as the *tehum shabbat* (Sabbath limit). It is, however, permitted to place, before the Sabbath, sufficient food for two meals at the limits of the 2,000 cubits; then, by a legal fiction known as **eruv*, this place becomes one’s “abode” for the duration of the Sabbath, so that the 2,000 cubits may then be walked from there. It is forbidden to instruct a non-Jew to do any work on the Sabbath which is not permitted to a Jew, unless it is for the sake of health. In cold climes, the heating of the home by a non-Jew falls under the heading “for the sake of health.”

Modern inventions have produced a host of new questions regarding Sabbath observance. Orthodox Judaism forbids travel by automobile on the Sabbath, Reform Judaism permits it. Conservative Judaism has differing views on this question, but generally permits travel by automobile on the Sabbath solely for the purpose of attending synagogue. The basic legal question regarding the switching on of electric lights is whether the noncombustive type of burning produced by electricity falls under the prohibition of making a fire or any of the other prohibitions listed above. Orthodox Jews refrain from the use of electrical appliances on the Sabbath, with the exception of the refrigerator, which may be opened and closed on the grounds that any electrical current produced

in the process is incidental and without express intention. It has, however, become the practice for observant Jews to use electrical appliances on the Sabbath which are operated by time switches set before the Sabbath. In Israel, on religious kibbutzim, the same procedure is used to milk the cows on the Sabbath. Israel also has local bylaws forbidding certain activities on the Sabbath. There is, however, no comprehensive law covering the whole country. Thus, whereas public transportation does not operate on the Sabbath in Jerusalem and in Tel Aviv, it does in Haifa. Except for specifically non-Jewish sections of the country, the Sabbath is the official day of rest on which all business and stores must close, but there is some doubt as to what is a business for this law (see *Israel, State of: Religious Life).

[Louis Jacobs]

In Kabbalah

The seven days of the week, reflections of the seven primeval days of creation, symbolize in Kabbalah the seven lower *Sefirot*, from *Hesed* to *Malkhut*, which are known as the *Sefirot ha-Binyan* because of their part in “building” creation. According to the kabbalists, the Torah hints at the existence of the two Sabbaths in the system of the *Sefirot* when it says “Ye shall keep My Sabbaths” (Lev. 19:30). Even in the kabbalistic literature, which was influenced by the Zohar to a slight degree or not at all, and which generally avoids stressing erotic elements in divinity, the Sabbath was interpreted as the element of union in the system of the *Sefirot*. Interpreting “And God blessed the seventh day, and hallowed [*va-yekaddesh*] it” (Gen. 2:3), these kabbalists linked *va-yekaddesh* with *kiddushin* (“betrothal”) since the “*atarah* [*Malkhut*] is betrothed to *Tiferet*” (*Ma'arekhet ha-Elohut* (Mantua, 1558), 185a). In the same way they interpreted the Sabbath eve prayer: “You hallowed [*kiddashta*] the seventh day” as meaning “you betrothed the seventh day, which is the basis to the *atarah*” (*ibid.*).

Inverting the story in *Genesis Rabbah* 11:8, in which the Sabbath complains to God: “You gave a mate to everyone, while I have none,” and was given **Keneset Yisrael* as her mate, the kabbalists regarded *Keneset Yisrael* as the symbol of the *Sefirah Malkhut*, as the feminine mate of the Sabbath, which is the masculine principle in divinity (*Yesod* or *Tiferet*). Since according to the kabbalists the souls are the outcome of the union in the system of *Sefirot*, the idea of the holy union which takes place on the Sabbath is linked to the Sages’ belief that on Sabbath additional souls are given. In the *Sefer *ha-Bahir* this word is expounded in connection with the *Sefirah Yesod*, which “maintains all the souls” and from which the souls fly. Many sayings of the Sages and the different customs they initiated are given a mystical meaning in Kabbalah. The concept of “family peace” (*shelom bayit*), which must be kept especially on the Sabbath, is interpreted in Kabbalah as “peace, which is the *Sefirah Yesod*, is at home [*bayit*] in the *Sefirah Malkhut*” (*ibid.*). The Sabbath candles lit by the wife are symbols of the additional souls emanating from the *Sefirah Malkhut*, which is called *sukkat shalom* (“canopy of peace”). The Zohar treats at length of the Sabbath, the time when the entire arrangement

of the order of the worlds is changed. Lights descend like dew from the upper to the lower *Sefirot*, and from there the divine abundance flows to all creatures. The additional souls that descend through the medium of the divine harmony illuminate the faces of the people who enjoy the holiness of the Sabbath. Many passages in the Zohar are poetical descriptions of the position of the worlds on the Sabbath. A typical passage is to be found in the second part of the Zohar, 135a–b. This passage is reproduced in Ḥasidic prayer books and is recited ecstatically on Sabbath eve.

The author of the Zohar and other kabbalists who followed him decided not to recite the part of the *Ma'ariv* prayer beginning “and He is compassionate” on Sabbath eve, for they feared that the mention of sins in the prayer might awaken the forces of the *sitra aḥra*, which, according to the Zohar, do not have any power on the Sabbath.

During the renaissance of Kabbalah in 16th-century Safed, new customs were established which spread to the Diaspora. Two of the main ones were the order of *Kabbalat Shabbat* (“the reception of the Sabbath”) and matters concerning the Sabbath meal. It is said that Isaac *Luria and his disciples used to go out of Safed on Friday afternoon to meet the Sabbath, a practice which is described in the *Shulḥan Arukh shel ha-Ari*: “The Sabbath is received in the field: you must stand facing west, preferably in a high place, and there must be an open space behind you.” While singing Psalm 92 during the reception of the Sabbath, the kabbalists used to close their eyes to identify themselves with the *Shekhinah, who lost her sight by weeping incessantly for the exile of Israel. There are signs that in Safed itself there was some opposition to this custom of going out into the fields, which is expressed in Moses *Cordovero’s commentary on the prayers and in the writings of Isaiah *Horowitz (the Shelah). Some of the kabbalists used to go out into the garden or the courtyard, but eventually the custom of turning westward was adopted. The author of *Ḥemdat Yamim* notes with resentment that he is not able to go out into the fields as was formerly done and states that in his own day (c. 1700?) this was still the custom in Jerusalem. Moses Cordovero’s circle adopted the custom of reciting during this service six psalms for the six days of the week, along with Psalm 92 for the Sabbath. This order of the *Kabbalat Shabbat* service, including the hymns *Lekhah Dodi*, written by Solomon Alkabez, and *Bar Yoḥai*, written by Simeon *Labi, is to be found in the books of *Tikkunei Shabbat* which were printed at the beginning of the 17th century.

Concerning the Sabbath meal, these books state that it was the custom to recite *Shalom Aleikhem* and *Eshet Ḥayil* (Prov. 31:10–31), the latter being introduced since it is expounded by the Zohar and various kabbalists as referring to the *Shekhinah*. These books also contain hymns which Isaac Luria wrote for each of the Sabbath meals and the invocation of the divine powers in accordance with one of the ways instituted by the Zohar. Among some kabbalists great importance was attached to the fourth Sabbath meal which takes place at

the end of the Sabbath. In the same way as the first three Sabbath meals were related to the Patriarchs, this fourth one was identified with David, the King Messiah. It therefore became particularly significant for the Shabbateans (see *Shabbetai Zevi), who often continued it until midnight. The third meal was of special importance for the Ḥasidim; it took place at a “favorable hour,” which, according to the kabbalists, was the time of the *Minḥah* prayer on Sabbath.

[Efraim Gottlieb]

In Art

THE SABBATH LIGHT. The commandment of kindling the Sabbath lights has been fulfilled in a myriad of ways over the generations. Rabbinic texts from the Mishnah onwards are concerned with the types of fuel used to light and the material of the wicks, but not with the type of implements that contain the sources of light. Both local custom and the need to provide light throughout the day no doubt influenced the design of lamps for the Sabbath. In the ancient period clay lamps with one or more spouts were used. Later versions were probably made of metal. Archaeological evidence from the Land of Israel after the destruction of the Second Temple shows that ceramic lamps in use by the Jews were decorated with Jewish symbols to distinguish them from the lamps used by the local non-Jewish populace.

European Sabbath Lamps. Hanging Sabbath lamps of the Middle Ages consist of nozzles arranged in a circle at the periphery of an open, flat saucer filled with oil, thus creating their characteristic star shape. These lamps, usually made out of bronze or silver, often were hung at the end of a ratcheted hook which enabled raising and lowering. Certain lamps had bowls underneath for the collection of oil drips, some connected the nozzles to this bowl with attached metal ducts, others had various tools attached to them for trimming and cleaning. More elaborate lamps, made by non-Jewish craftsman, are embellished with figurines, narrative reliefs or other decorations. The Italians deepened the central saucer into a bowl, provided a silver drip pan to catch the excess oil, and hung the lamp by chains which converged at the top in a finial. In central and eastern Europe the central bowl was kept small and the spouts enlarged, the result being a star-shaped lamp called the *Judenstern*. While the form of the lamp was influenced by local design, the term *Judenstern* has been found in a record book of a silversmith from the 16th century, showing the association of this item with Jewish practice. Depictions of such lamps appear in Jewish manuscripts from both Spain and Ashkenaz of the 14th and 15th centuries (for example, the *Sarajevo Haggadah* (Sarajevo, National Museum of Bosnia and Herzegovina, fol. 31v), the *Second Nuremburg Haggadah* (Jerusalem, Schocken Ms. 24087, fol. 4v), and the *Ashkenazi Haggadah* (London, British Library, Ms. 14762, fol. 6r)). The Italian rabbi, Leone *Modena (1571–1648), mentions in his *Historia de riti Hebraici* that women would light anywhere from four to six lights, congruent to the six pointed lamps depicted in manuscripts and printed books.

Candles were also used for lighting in the medieval period in Europe, as revealed by both halakhic texts and illuminated manuscripts. The candlesticks depicted in the Rothschild Miscellany (Jerusalem, Israel Museum Ms. 180/51), late 15th century Italy (fols. 55v, 156v), show striking similarity with candlesticks in use in private homes in Europe. Candles in Europe were often made from animal fat and thus not permissible for Jewish use. The 19th-century development of synthetic materials for candles led to their greater diffusion among the Jews. Concomitantly, advances in indoor illumination technology gave the lighting of the Sabbath candles a more symbolic and less practical function, also prompting the move away from oil lamps. In Poland, brass candlesticks with anywhere from three to seven candles, decorated with lions and eagles, often inscribed in Hebrew “to kindle the Sabbath lights,” were common in Jewish homes, besides pairs of candlesticks.

North African and Oriental Jewish Communities. The use of oil as the main form of fuel among the North African and Oriental Jewish communities continued until the contemporary era. In Morocco, sheet brass rectangular vessels with wicks in the four corners were traditionally used for lighting. In Persia and Afghanistan, the silver vessel used for lighting resembled the shape of the ancient clay oil lamp, with a deep bowl for the oil and two wick-nozzles. Sometimes there were two separate bowls, one for each light. The base was often decorated with birds or floral motifs and engraved with the woman’s name. In Yemen, a simple hanging round stone lamp with notches for multiple wicks was used.

KIDDUSH CUPS. There is speculation that the gold glasses found in the catacombs of Italy were originally used for the blessing on wine. Jewish illuminated *Haggadot* from the late Middle Ages show elaborate goblets, sometimes with lids, sometimes double goblets, such as those depicted in the *Ashkenazi Haggadah* (London, British Library, Ms. 14762, fol. 2v) and the *Cincinnati Haggadah* (Cincinnati, Hebrew Union College, Ms. 444, fol. 2v). As with Sabbath candlesticks, these cups were often copies of local types, generally made by non-Jewish craftsmen, and often decorated with vegetal motifs or geometric designs. In certain Oriental Jewish communities, the tradition of the lidded kiddush cup continues to the present time, often decorated with a small bird on the lid.

ḤALLAH COVERS AND KNIVES. Other ritual objects for use on the Sabbath include a special cover for the *ḥallah and a special knife for cutting the ḥallah. Leone Modena mentions a long cloth used to cover the ḥallah, as depicted in both the *Ashkenazi* (fol. 6r) and the *Cincinnati Haggadot* (fol. 2v). Extant examples of embroidered ḥallah covers from the 19th century from various European communities have survived, as well as such knives.

CONTEMPORARY RITUAL ART. Twentieth-century Jewish artists, such as Ludwig Wolpert and Moshe Zabari, applied

their skills to making modern versions of all the Sabbath implements, and contemporary Judaica artists such as Zelig Segal continue this trend for a growing market. The blossoming of contemporary Jewish art makes the list of artists working in this field too numerous to mention.

THE SABBATH IN PAINTING. The earliest printed depiction of a Jewish woman lighting a six-pointed *Judenstern* appears in the *Sefer ha-Minhagim* of Venice from the year 1593. Christian works on the Jews, such as Johann Christoph Georg Bodenschatz' *Kirchliche Verfassung der heutigen Juden sonderlich derer in Deutschland* (Frankfurt and Leipzig: Johannes Friedrich Becker, 1748–49) also show women lighting Sabbath lamps. Sabbath candlesticks as an attribute of the Jewish women appear on Jewish carved gravestones from the 19th century. Moritz *Oppenheim in Germany in his *Bilder aus dem altjüdischen Familienleben* ("Scenes from Traditional Jewish Family Life," 1866), shows a woman lighting a traditional oil lamp, and devotes several works in the series to the subject of the Sabbath. Jewish artists of the late 19th and early 20th centuries, such as Isidor *Kaufmann, show traditional Jewish women on Sabbath eve with two lit candlesticks on the table. The Scandinavian Jewish artist, Geskel Saloman, shows two women lighting from a four-branched Polish-style candlestick. The subject of the Sabbath appears in the works of Samuel Hirszenberg, Boris *Schatz, Hermann *Struck, Jacob *Steinhardt, Josef *Budko, and Max *Band, among others. The use of the candlesticks to symbolize Jewish tradition and the home can be found in the works of Marc *Chagall, and Naftali *Bezem, while Yossl *Bergner uses the spice box (see **Havdalah*). The subject of the Sabbath in the life of the pioneers was dealt with by Israel artists Yohanan Simon and Joseph Kossonogi.

SABBATHS, SPECIAL, those Sabbaths on which special events are commemorated. They are distinguished from the regular Sabbaths through variations in the liturgy and special customs. Two such Sabbaths, which recur on several occasions throughout the year, are numbers 1 and 2 below.

1) Shabbat Mevorekhin

(Heb. שַׁבַּת מְבֹרְכִין), the Sabbath that immediately precedes a new month. In the later Ashkenazi rite a special petition, composed by *Rav "to renew unto us this coming month for good and for blessing," etc. (Bet. 16b), is recited in the synagogue after the reading of the law. The older Ashkenazi rite, and that of Ḥabad, begins with "He who wrought miracles..." The name of the new month and the day on which Rosh Ḥodesh occurs are then announced. In many communities, where women did not usually attend Sabbath services, they went on *Shabbat Mevarekhin* because of the new month petition (see *New Moon, Announcement of).

2) Shabbat Rosh Ḥodesh

(Heb. שַׁבַּת ראש חֹדֶשׁ), a Sabbath which coincides with Rosh Ḥodesh. The reading of the Torah for the New Moon is added, and a special *haftarah (Isa. 66:1–24) is read.

The other Sabbaths (listed here chronologically according to the Jewish calendar) are:

3) Shabbat Shuvah

(Heb. שַׁבַּת שׁוּבָה; "Sabbath of Repentance"), also called (erroneously) *Shabbat Teshuvah* (תְּשׁוּבָה), the Sabbath which occurs during the *Ten Days of Penitence (between Rosh Ha-Shanah and the Day of Atonement). The name is derived from the initial word of the *haftarah* "Return [שׁוּבָה], O Israel, unto the Lord" (Hos. 14:2) read on that Sabbath. One main feature of *Shabbat Shuvah* is the sermons on repentance delivered by the congregational rabbis.

4) Shabbat Ḥol ha-Mo'ed

(Heb. שַׁבַּת חוֹל הַמּוֹעֵד), the Sabbath of the *Passover and *Sukkot intermediary days. The liturgy includes *piyyutim appropriate to the festivals and special Torah readings, instead of the regular weekly Torah portion. *Song of Songs during Passover and *Ecclesiastes during Sukkot are also recited.

5) Shabbat Ḥanukkah

(Heb. שַׁבַּת הַחֲנֻכָּה), the Sabbath (sometimes two) during *Ḥanukkah. It is marked by an added Torah reading for the festival and, if it coincides with Rosh Ḥodesh *Tevet, also for the New Moon (see above).

6) Shabbat Shirah

(Heb. שַׁבַּת שִׁירָה; "The Sabbath of the Song"), the Sabbath on which the Torah reading is Exodus 14–17. The name is derived from Exodus 15, which includes "The song of Moses and of the children of Israel" at the Red Sea. In some rituals special *piyyutim* are also recited. This Sabbath does not occur on a specific date but depends on when the Torah portion is read.

7) Shabbat Shekalim

(Heb. שַׁבַּת שְׁקָלִים), the first of four special Sabbaths, which are

also called *Arba Parashiyot* (“the four pericopes”), and which occur in spring. *Shabbat Shekalim* is observed on the Sabbath immediately preceding the month of *Adar (in a leap year, the second month of Adar). In addition to the weekly Torah portion, Exodus 30:11–16, whose theme is the duty of donating half a *shekel toward the upkeep of the Temple, is also read. It commemorates the custom according to which on the first of Adar special messengers were dispatched to all Jewish communities to collect these donations (Shek. 1:1). Special *piyyutim* are included in the ritual of the Sabbath.

8) *Shabbat Zakhor*

(Heb. שַׁבַּת זְכוֹר; “Sabbath of Remembrance”), the second of the four special Sabbaths. It is the Sabbath before Purim. The name derives from the additional Torah portion read from Deuteronomy 25:17–19 whose theme is the duty “to remember” what *Amalek did to Israel. The traditional belief is that *Haman the Agagite was a direct descendant of Agag, the king of the Amalekites (e.g., 1 Sam. 15:9 ff.). In some rites special *piyyutim* are recited.

9) *Shabbat Parah*

(Heb. שַׁבַּת פָּרָה; “Sabbath of the Red Heifer”), the third of the four special Sabbaths. It is the Sabbath preceding *Shabbat ha-Hodesh*. An additional portion is read from the Torah (Num. 19:1–22) whose theme is the ritual purification with the ashes of the red heifer. The purification was compulsory in Temple times for all those who had been defiled by contact with a corpse. *Shabbat Parah* commemorates the custom of everyone who would participate in the Passover pilgrimage to Jerusalem having to cleanse himself in due time. Special *piyyutim* are also added to the liturgy in some rites.

10) *Shabbat ha-Hodesh*

(Heb. שַׁבַּת הַחֹדֶשׁ; “Sabbath of the Month”), the last of the four special Sabbaths. It precedes, or falls on the first day of, the month of *Nisan. On it, in addition to the weekly Torah portion, Exodus 12:1–20 is also read. It states that the month of Nisan “shall be the beginning of the months [of the Jewish year]” and includes many details on the ritual laws concerning the Passover sacrifice and the interdiction to eat leavened bread (**hamez*) on the festival. Special *piyyutim* are also recited in some communities.

11) **Shabbat ha-Gadol*

12) *Shabbat Hazon*

(Heb. שַׁבַּת הַזֹּהֵן; “Sabbath of Vision”), the Sabbath that precedes the Ninth of *Av. The name is derived from the initial word of its *haftarah*. “The vision of Isaiah” (Isa. 1:1–27), in which the afflictions which God will visit on Israel in punishment of its sins are prophesied. The Yemenites call this Sabbath “*Shabbat Eikhah*,” and read Isaiah 1:21 ff. for the *haftarah* portion. *Shabbat Hazon* occurs during the period of mourning (see *Nine Days) for the destruction of the Temple, and the *haftarah* is therefore appropriate since its theme is destruction and possible redemption. The destruction is understood as a punishment for the sins of Israel, and repentance is a prerequisite for the restoration of the Temple. It was customary not to dress in

festive garments during that period, including (in a few communities) the Sabbath.

13) *Shabbat Nahamu*

(Heb. שַׁבַּת נַחֲמוּ, the Sabbath immediately following the Ninth of Av. It is so called after the first word of the *haftarah* “Comfort ye [Nahamu], Comfort ye My people” (Isa. 40:1).

On most of these special Sabbaths the memorial prayer for the deceased (see *Av ha-Raḥamim) as well as the prayer *Zidkatkha* in the *Minḥah service are omitted. In the Reform ritual some of these Sabbaths (e.g., *Zakhor*, *Parah*) are not observed. On the other hand, other special Sabbaths (e.g., “Brotherhood Sabbath,” “Sisterhood Sabbath,” “United Nations Sabbath”) have been innovated.

SABBATICAL YEAR AND JUBILEE (Heb. שְׁמִיטָה, *shemittah*; יוֹבֵל, *yovel*). According to the Bible, during the seventh year all land had to be fallow and debts were to be remitted (Ex. 23:10–11; Lev. 25:1–7, 18–22; Deut. 15:1–11). The close of seven sabbatical cycles instituted the Jubilee (Lev. 27:16–25; Num. 36:4; whether the Jubilee Year was the 49th or the 50th see below).

A brief statement in the Book of Nehemiah (10:32) records the post-Exilic community’s firm agreement to suspend all agricultural work during the seventh year and to forgo all debts as commanded in the “Law of God.” The reference is to these three passages in the Torah, each of which dwells on a different aspect of the seventh-year release. The earliest, found in the Book of the Covenant (Ex. 23:10–11), calls on the Israelites to let the land lie fallow and the vineyards and olive groves untouched that the poor people may eat of them, as well as the wild beasts. The second passage (Lev. 25:1–7, 18–22) refers to the fallow year as a “Sabbath of the Lord” and a year of complete rest for the land, promising the divine blessing on the crop of the sixth year to those who suspend their work on the seventh (cf. the double portion of manna on the sixth day; Ex. 16:22 ff.). The Deuteronomist (Deut. 15:1–11) commands the Israelites to observe every seventh year as a “year of release,” when debts contracted by fellow countrymen are to be remitted. At the same time, they are cautioned not to let the recurrence of the seventh-year release harden their hearts against the distressed who seek loans in the hour of their need. While Deuteronomy does not mention the fallow, the passage is clearly connected with that of Exodus by the use of the common verb *šmt* (שָׁמַט). D. Hoffmann argued that the remission of debts is entailed by the fallow – that it is precisely because the debtor cannot work his fields during the seventh year that he is unable to make his payments, and the creditor is enjoined not to dun him for them. The same reasoning, according to Hoffmann, explains why the debts of aliens are not remitted – i.e., the fact that their income is not affected by the Sabbatical Year.

Ever since J. Wellhausen, a number of scholars have seen a connection between the surrender of the produce of the seventh year to the poor (Ex. 23:11) and the liberation of the Hebrew slave following the sixth year of his purchase (Ex. 21:2–6; cf. Deut. 15:12–18). Accordingly, they maintain that the Book of the Covenant did not intend the seventh-year fallow to be observed throughout the land on a fixed date any more than the manumission of all of the Hebrew slaves. Each field, vineyard, and olive grove, then, had its own fallow cycle, just as each slave had his own release date. Otherwise, the practice could not possibly have been observed, for there would not have been enough food for all of the inhabitants of the land. Hence, the Deuteronomist, who had to operate within the framework of a fixed, universal, seventh-year release (cf. Deut. 15:9), disregarded the agricultural fallow and called for the remission of debts instead, as well as the release of debtors who had been enslaved (15:12–18). This is why, according to A. Menes, the Deuteronomist also commanded that the Torah be read aloud every year of remission in the hearing of all Israel (31:10ff.). Such an assembly could take place then, after all the Israelite debtors had been set free and were able to appear as equals among their people. The Sabbatical Year, a fixed, universal, seventh-year fallow, as opposed to the year of remission, then, was a later construction of the priestly writers which was never observed in the pre-Exilic period (cf. Lev. 26:34–35, 43; 11 Chron. 36:21), and is attested for the first time during the Second Temple period, and then only in certain parts of the land (cf. 1 Macc. 6:49, 53).

Plausible as it has seemed to many scholars, the theory is not supported by the evidence. In the first place, there is no necessary connection between the manumission of the Hebrew slave and the fallow year other than the fact that both involve a seven-year period. Secondly, Wellhausen failed to see that not only the Priestly Code but also the Covenant Code connect the seventh-year fallow with the weekly Sabbath (cf. Ex. 23:12 with 23:10–11). As M. Noth correctly observes, both commandments require that the animals benefit in some way from their observance – a concern that derives not merely from compassion for dumb beasts but from the recognition that they are part of the nature which man must cease to dominate on the Sabbath. Finally, since Wellhausen claims that the demands of the Deuteronomist were utopian in character, the argument that a universally fixed date for the fallow year is impossible because of its impracticality is inapplicable. It is true that, outside the legislative texts of the Bible, there is no reference to the Sabbatical Year in the pre-Exilic sources. But an *argumentum ex silentio* is of dubious value, especially when dealing with ancient historical materials.

A similar problem exists with regard to the Jubilee Year, which is described in detail in Leviticus 25:8–17, 23–55. Among its provisions are: the dating of the recurrent Jubilee Year, the proclamation of its start with the sounding of the *shofar* on the Day of Atonement, the return of all Israelites to their ancestral lands and families, the observance of the fallow, the fixing of prices for the sale of land (except for houses in cities) in rela-

tion to the occurrence of the Jubilee, the redemption of the land of next of kin, special land regulations for levites, and the freeing of defaulting debtors and all Israelite slaves. The text justifies these prescriptions in terms of two basic principles: God's ownership of the land (25:23) and His undisputed possession of all Israelites as His slaves (25:55).

Two other passages in the Priestly Code refer to the Jubilee Year (Lev. 27:16–25; Num. 36:4), as does possibly Ezekiel (46:16ff.), but it is not mentioned in any historical texts, not even in post-Exilic ones. Evidently, it was not observed in Second Temple times, as is attested by the conditions in the time of Nehemiah (cf. 5:1–13, where there is no mention of the institution), the obscure description of it in Josephus (Ant. 3:280ff.), and the explicit comment of one of the *tan-naim* (Sifra 8:2).

Though the Priestly Code clearly distinguishes between the Jubilee and the Sabbatical Years, many scholars consider the former a post-Exilic theoretical reworking of the latter. Thus, they suggest that the manumission of slaves on the Jubilee replaces the one on the Sabbatical Year, and that the notion of the divine ownership of the land is an extension of the claim that all Israelites belong to God. They concede that the Jubilee law does not require the remission of debts. Still, Leviticus 25:24 may be interpreted, they maintain, as a form of debt release, with the alienated property comparable to a foreclosed mortgage. The Jubilee, then, is “an artificial institution superimposed upon the years of fallow regarded as harvest Sabbaths after the analogy of Pentecost” (Wellhausen). In this way, one can explain the impossible demand for a two-year fallow created by the Jubilee following the Sabbatical Year, as well as the directions for the manumission of slaves, which were inconsistent with the earlier ones of the Covenant Code.

That the matter is not so simple is evidenced by the appearance of ancient terms in Leviticus 25 as well as pre-Israelite usages (see next section).

The etymology of *yovel* (יִבְלֵ) is not clear, with some suggesting that it is derived from the root (יָבַל) meaning “to bear along [in procession],” hence *yevul* (יָבֹל) signifying “produce” or “that which is borne,” and *yuvul* (יִבְלֵ), “transfer” (of properties; cf. Ibn Ezra on Lev. 25:10). More likely, the basic meaning of *yovel* is “ram's horn” (cf. Ex. 19:13; Josh. 6:5; cf. also Phoenician *ybl*, “ram,” and the comment of R. Akiva quoted by Bertinoro on RH 3:2). The Jubilee, then, is “the year that is inaugurated by the blowing of the ram's horn” (W.R. Smith). If this is so, then serious consideration must be given to R. North's suggestion that this is an ancient Near Eastern legal requirement for a public proclamation (*Šūdūtu*) “as a sort of registration-formality prerequisite to the exchange of property administration.”

Closer inspection of the biblical text, too, proves the arguments of the Wellhausen school to be far from convincing. The assumption that Hebrew slaves were to be released in the Sabbatical Year is, as seen, unwarranted. The Jubilee laws do not refer to mortgaged properties but to those that have actually been sold. And, finally, it is highly doubtful that the belief

in the divine ownership of the land arose at a late period in Israel's history. On the contrary, the evidence seems to point in the opposite direction, i.e., both the Sabbatical and Jubilee Years are rooted in ancient traditions, although some of the prescriptions connected with them, such as the restrictions on the redemption of houses in a city (Lev. 25:29 ff.) and the remission of debts (Deut. 15:1 ff.), were added later. Moreover, the elements basic to both institutions go back to early Israelite, and even pre-Israelite, times. They are the seven- and 50-year cycles, the fallow, the inalienability of ancestral lands (see below), and the maintenance of the integrity of the clan.

As far as the seven-year cycle is concerned, there is reference to it in the Joseph stories (Gen. 41:25 ff.) and in the earlier Near Eastern texts. Thus, the land is blighted for a seven-year period because of the death of Aqhat (Pritchard, Texts 153), just as it flourishes for seven years after Baal defeats Mot (*Poems about Baal and Anath*, 5; Pritchard, Texts, 141). Similarly, Anu warns Ishtar that a seven-year drought would follow the slaying of Gilgamesh (*Gilgamesh Epic*, 6, lines 101–106; Pritchard, Texts, 84–85). As for the existence of a 50-year cycle, this is not as clearly attested, though J. Lewy claims to have discovered a primitive agricultural “pentecontad” calendar among the Amorites of Assyria, Babylonia, Syria, and Palestine near the end of the third millennium B.C.E. His interpretation of the relevant texts is, however, open to question, and note should be taken of a recent suggestion that the Jubilee occurred not in the 50th but in the 49th year, coinciding with the seventh Sabbatical Year (cf. Lev. 25:8–9 and M. Noth on 25:10).

The fallow, as described in the Torah, has nothing to do with crop rotation and does not seem to have had any agricultural value, such as that of replenishing the soil; no other crop was planted that year nor were the fields worked, as this was strictly forbidden during the Sabbatical Year. C.H. Gordon suggests that it was originally connected with Canaanite fertility rites. However, even if this is not so, Noth is undoubtedly correct in considering it an example of *restitutio in integrum*, when the land was permitted to return to its undisturbed rest. G. Dalman makes a similar observation with regard to the release of alienated lands during the Jubilee, seeing in it a recognition by the Israelites that they had no right permanently to set aside the lands allotted by God to the tribes and clans at the time of the conquest of Canaan. The release of Israelite slaves, then, and their return to their ancestral lands may also be considered a *restitutio in integrum*, the restoration of the structure of Israelite society as it had been divinely ordained in ancient days.

Accordingly, A. Jirku concludes that the concept of both the Sabbatical and the Jubilee Years originated under simple economic and social conditions, possibly when agriculture was not yet the major source of the food supply of the Israelites. This relates to a time not long after the conquest, which also provides a proper setting for the idea of the Jubilee. At this early date, tribal solidarity was still strong, the consciousness of the common possession of the ground and soil fresh

in their minds, and the memory of the patriarchal relationships in the desert vivid.

These arguments, however, are not conclusive, since the ideals of the desert period lived on among the people for many centuries, especially outside the large centers. At any rate, neither the Sabbatical nor the Jubilee Year appears in the Bible as a nascent institution. While they drew on earlier Semitic practice for some of their ideas, in their present form they represent a unique Israelite attempt to combat the social evils that had infected Israelite society and to return to the idyllic period of the desert union when social equality and fraternal concern had prevailed.

[David L. Lieber]

Ancient Near Eastern Legal Background

The background of the legal conceptions embodied in the Sabbatical and Jubilee Years is illuminated by ancient Near Eastern evidence of (a) resistance in principle to the alienation of patrimonial lands; and (b) the institution of periodic royal releases from certain kinds of debt and obligation, in connection with which cognates to terms found in Leviticus 25 appear.

(a) Hurrian custom attested in the *Nuzi tablets banned the sale of patrimonial land. The prohibition seems to have been grounded on a feudal system, in which all land belonged to the king, and was held only as a grant or fief by his subjects. They had possession, but not ownership, of the property entrusted to them. In return, each subject owed some service to the king, but he had no right to dispose of or transfer his property to any person other than a male relative of his immediate family (cf. Laws of Hammurapi 36–39; Pritchard, Texts, 167–8). In order to transfer real estate out of the family, the fiction of adoption was resorted to, by which the seller “adopted” the buyer as his “son,” in consideration of the latter’s “gift” – the purchase price (Steele, in bibl., 14–15). The conception of possession without ownership, with its concomitant ban on alienation of property, evokes the biblical notion that the land of Israel is God’s, and that Israel are merely His tenants (“you are but strangers resident with Me,” Lev. 25:23). The time of the Nuzi tablets (mid-second millennium), and the chief region of Hurrian influence (the Khabur River Valley) coincide with the period, and pre-Canaan location, of Israel’s ancestors. This is but one of several indications that Hurrian culture left a mark on Israelite ideas and institutions (see bibl.).

Old Babylonian legal writings contain a law (Eshnunna 39; Pritchard, Texts, 163) and a number of contracts showing the right of an owner of real property to redeem it after he had been forced by financial need to sell it. One of the contracts suggests that the right may have existed even when the property was not up for sale (as in Lev. 25:25–32).

(b) In their first full regnal year, Old Babylonian kings were accustomed to issue an edict of “justice” (*mīšarum*) throughout their realm, referred to in date formulas and inscriptions as “establishing the freedom” (*andurarum*, cognate with Heb. *deror* (Lev. 25:10, etc.)) of their subjects. The one extant exemplar – attributed to Ammi-šaduqa (second half of the 17th century B.C.E.) – consists mainly of remissions (for

a limited period) of specific kinds of debts and obligations, including the release of persons held in debt-bondage. Such edicts were demonstrably enforced, and were issued at intervals of seven or more years – the periodicity being as yet unknown (Finkelstein). Property (real and human) for which the full price had been paid, however, was not subject to the *andurarum*-release (Levy); such property is described in a Ras Shamra (Ugarit) document as *šamit ana... ana dariti*, “finally transferred [lit. yoked] to... forever” – compare Leviticus 25:30, *lizmitut le-X le-dorotaw*. Y. Muffs has suggested that the theory of Leviticus 25 is that the full price of land was never paid: only crop years are bought (25:15–16), hence land could never be finally transferred but was always subject to the release. Similarly, in the case of self-sale of persons, no sale could be final since title to every Israelite is vested solely in God (25:42).

The Sabbatical and Jubilee Years thus adapt, elaborate, and synthesize pre-Israelite elements. In the new creation, the Divine King, having liberated His people and made them free men in His land, provides for the preservation of their liberty through periodic corrections of the economic imbalances that, sundering men from the land, would turn them into slaves again. His authority flows from His ownership of both people and land, and is, in turn, brought to mind through the execution of His decrees.

[Moshe Greenberg]

Post-Biblical

Whereas the Sabbatical Year was in force during the Second Temple period (and is applicable, in theory, to the present day), the Jubilee was no longer observed. The two subjects are therefore treated separately.

Jubilee in the Second Temple Period

HALAKHAH AND DEVELOPMENT. The relevant laws in the literature of the Second Temple period are primarily the interpretation of the biblical precepts of the Sabbatical Year and the Jubilee, and of the law of emancipation of the Hebrew slave whose ear was pierced, since *le-olam* (“forever”; Ex. 21:6) was interpreted to mean “until the Jubilee” (Mekh., Nezikin 2). The laws of the Jubilee were not in practice in the time of the Second Temple (see below), but since the laws of the Jubilee and the calculation of the years of the *shemittah* are linked with the laws of the Sabbatical Year, which were in force, one can find in these *halakhot* something of the life and customs of that period. According to the *halakhah*, all rules applicable to the Sabbatical Year, with regard to the prohibition of land cultivation, the renunciation of ownership of produce, and the obligation of the householder to remove all produce gathered for his needs when that species is not found in the field, apply also to the Jubilee: “What applies to the Sabbatical Year applies equally to the Jubilee” (Sifra, Be-Har 3:2). From the verse, “For it is a Jubilee, it shall be holy to you” (Lev. 25:12), the tannaim derived that the sanctity of the produce of the Sabbatical Year was such that, if the householder sold it and bought meat with the proceeds, the stringencies of the Sabbatical Year applied

both to the produce itself and to the meat, i.e., they deduced the laws of the Sabbatical Year from verses dealing with the Jubilee and vice versa. Thus, in the verse applying to the Jubilee, “Ye shall eat the increase cleared out of the field” (*ibid.*), they taught, “As long as you eat from the field you may eat from your house. If what is in the field has been consumed, then you must clear out what is in the house” (Sifra, Be-Har 3:4), applying it to the Sabbatical Year. The *halakhah* also combined the Jubilee with the Sabbatical Year with regard to their applicability during the Second Temple period; the opinion was even expressed that, since the Jubilee does not apply “at the present day” so also the observance of the Sabbatical Year is not a biblical precept, but merely rabbinic (TJ, Shev. 10:3, 39c). This conception probably served Judah II (Nesiah) as a theoretical basis for many of the relaxations in the law which he inaugurated in respect of the Sabbatical Year (TJ, Shev. 6:4; Hul. 6b and parallel texts).

Only the law on the remission of debts which comes into force at the end of the Sabbatical Year (Sif. Deut. 111) does not apply to the Jubilee; against this, however, there are, according to the *halakhah*, two precepts of the Jubilee which do not apply to the Sabbatical Year – that land sold returns to its owners during the Jubilee Years (Lev. 25:23, 24) and that slaves go free (Sifra, Be-Har 3:6). The verse, “And in the seventh he shall go out free for nothing” (Ex. 21:2), was interpreted as referring not to the seventh year, which was the Sabbatical Year, but to the seventh year from the date on which he was sold (TJ, Kid. 1:2, 59a); if the Jubilee came in the middle of his six-year term, however, the slave went free then (Kid. 1:2). This law was also applied to the Hebrew bondswoman, although it is not explicitly mentioned in the Torah, and was apparently an innovation of the *tannaim*. A Hebrew slave sold to a gentile did not go free in the seventh year but only in the Jubilee (Sifra, Be-Har 8:4). In addition, the Hebrew slave who refused to go free in his seventh year went free on the Jubilee (Mekh., Nezikin 2; cf. Jos., Ant. 4:273).

THE CALCULATION OF THE JUBILEE. Both in the tannaitic literature and in the Apocrypha two different systems of calculation for the Jubilee and the Sabbatical Year are found. A *baraita* declares that the Jubilee year is the 50th year, after the completion of the seven sabbatical cycles, the following year being the first of the ensuing *shemittah* (Ned. 61a; TJ, Kid. 1:2, 59a). This cyclical system also occurs in the *Seder Olam in respect of the First Temple period. Judah, however, holds that “the Jubilee year enters into the calculation of the heptad,” i.e., the Jubilee Year is the 50th year after the previous Jubilee and thus also the first of the ensuing *shemittah* and Jubilee (Ned. 61a). According to Judah’s view there was a widespread tannaitic tradition that, with the exile of the tribes of Reuben, Gad, and the half-tribe of Manasseh, the laws of the Jubilee fell into desuetude. According to the *geonim*, not only were the laws of the Jubilee not in force from the time of the exile of these tribes (see later), but after the destruction of the First Temple the Jubilee Years were not even calculated; only those

of the *shemittot* (A. Harkavy, *Teshuvot ha-Ge'onim*, in: *Zikkaron la-Rishonim ve-la-Aḥaronim*, 14 (1887) 20 no. 45; Responsa of Maimonides, ed. J. Blau, 2 (1960), 666 no. 389). Whether in accordance with the view of Judah or with the tradition that the Jubilee was not calculated in the period of the Second Temple, the fact is that only Sabbatical Years were counted from the Second Temple period onward. Whether to chronicle the years or to determine the Sabbatical Year, the author of the Book of Jubilees, which gives the chronology from the creation by Jubilees, counts a Jubilee period as 49 years only; the 127 years of Sarah's life are specifically referred to as "two Jubilees, four heptads, and one year" (19:7), and this applies throughout the book. According to the Book of Maccabees, Simeon the Hasmonean was murdered in the month of Shevat, in the year 177 of the Seleucid era, corresponding to 135 B.C.E. John Hyrcanus sought to avenge his father's murder and besieged the fortress of Dagon in which Ptolemy, the murderer, had shut himself. The siege dragged on, but as a result of famine due to the fact that it was a Sabbatical Year, he was compelled to raise the siege (1 Macc. 16: 14ff; Jos., Ant. 13:228–35). The Sabbatical Year nearest to that date was in the year 3724 of the creation, i.e., 37 B.C.E., since Josephus tells that in Herod's conquest of Jerusalem in the summer of that year, the besieged in the city suffered from a food shortage because of the Sabbatical Year (Jos., Ant. 14:475). That the 98 years between those two dates are equivalent to 14 *shemittot* without an intervening Jubilee Year is confirmed from other references. The Samaritans also reckoned only according to *shemittot*, and even where they divided periods into Jubilees, it was a Jubilee of 49 years (see A. Neubauer, *Chronique Samaritaine* (1873), 3, 8ff.).

According to the Talmud, the Jubilee Year did not come into effect automatically, with the advent of the 50th year, but the *bet din* had to see to its implementation and officially proclaim it by sounding the *shofar* (cf. Lev. 25:9). It was the duty of the *bet din* to count the years of the *shemittah* as one counts the days of the *Omer, but whereas the latter was the duty of every individual Jew, the Jubilee Years were counted only by the *bet din* (Sifra, Be-Har 2, 106c). According to the majority of the sages, if land was not returned to its owner, slaves not freed, and the *shofar* not sounded, the sanctity of the Jubilee Year did not obtain. Judah, however, made the sanctity of the Jubilee dependent solely on the emancipation of the slaves, while Yose made it dependent only on the sounding of the *shofar* (TJ, RH 3:5, 58d; RH 9b; Sifra, Be-Har 2, 107a). The *shofar* had to be sounded by every individual, even on the Sabbath (Sifra, Be-Har 106d). Although, according to the Bible (Lev. 25:9), the release of slaves and the return of land took effect on the Day of Atonement, the Jubilee was regarded as starting on Rosh Ha-Shanah (Sifra, *ibid.*). At the beginning of the Jubilee Year, in addition to the sounding of the *shofar*, a special prayer was recited which included **Malkhuyyot*, **Zikhronot*, and **Shofarot*, as on Rosh Ha-Shanah (RH 29a).

THE JUBILEE IN HISTORY, That the Jubilee did not apply during the period of the Second Temple was deduced from the

verse "unto all the inhabitants thereof" (Lev. 25:10), with the corollary that "from the time that the tribes of Reuben and Gad and the half-tribe of Manasseh were exiled the Jubilees were discontinued" (Sifra, Be-Har 2:3). The Talmuds, also, in discussing the various problems relating to the observance of the precepts of the Sabbatical Year in the Second Temple period (such as the laws of walled cities and of the Hebrew slave), assume it as a fact that the Jubilee did not apply at that time (TJ, Git. 4:3, 45d; Kid. 69a). It is difficult to determine when this conception had its origin, since a number of precepts which according to tradition depend on the observance of the Jubilee (such as the laws appertaining to the Sabbatical Year, the canceling of debts (TJ, Git. 4:3, 45d), or walled cities), continued to apply throughout the Second Temple period (Ar. 29a). According to this view, all the precepts bound up with the Sabbatical Year and the Jubilee are regarded as a whole, with the result that, where the precepts of the Jubilee cannot be observed, the other precepts do not apply; nevertheless, it is certain that the precepts of the Sabbatical Year, such as the remission of debts at the close of the Sabbatical Year and the redemption of houses, were practiced, as is shown by numerous references in both tannaitic and other sources. However, while there is evidence of the observance of the other precepts and of various regulations made to modify their severity, there is no evidence throughout the whole Temple period of the actual observance of the Jubilee, reflecting the difficulties involved in observing it. The *halakhah* provides, for instance, that only the Sabbatical Year is not to be made a leap year, etc.

From Alexander's conquest and during the period of Roman rule, there is evidence that foreign rulers took into account the problem of tax payments on agricultural produce in the Sabbatical Year, when the Jews did not cultivate their fields. Either they freed them from taxes, as did Alexander the Great and Julius Caesar, or insisted on payment, as did Hadrian after the Bar Kokhba war. There is, however, no echo of the complex problems which would have been raised by the Jubilee in this regard either in the Talmud or in other contemporary documents. Nevertheless, although the Jubilee was not in force for as long as the *shemittah*, the problems which it raised were of greater gravity than those of the Sabbatical Year. The commandment of the Jubilee brought in its train complicated questions concerning the commercial laws of the sale and hiring of land; yet there is hardly an echo of the existence of the Jubilee either in the *halakhah* which deals with it or in any reference in the various passages dealing with practical life, whether in the talmudic literature or in documents revealed by archaeology. Despite this fact the ideas contained in the precepts of the Jubilee were of considerable influence, both on the *halakhah* and on events of the Second Temple period.

In the *halakhah* and in various traditions reflecting ancient custom, there is evidence of the concern over keeping the patrimonial estate in the family, the farmer's concern to safeguard the ownership of his plot of land, and the obligation to redeem land that had been sold. Although the *halakhah*

did not forbid the absolute sale of land, it viewed it unfavorably: “One is not permitted to sell his property... unless he become impoverished. If he does sell it, however, the sale is valid” (Tosef., Ar. 5:6). A public ceremony even took place in order to shame a person who sold his patrimony, and he was praised when he redeemed it: “When a man sold his field, his relatives would take jugs filled with roasted grains and nuts and smash them in front of the children, who would gather them and say, ‘So and so has cut himself off from his possession.’ And when the field returned to him they should do the same and say, ‘So and so has returned to his possession’” (TJ, Ket. 2:10, 26d; see **Keḏazah*). Similarly the *halakhah* laid down that when a man inherited land from his wife, her relatives paid him for it in order to get it back from him (Tosef., Bek. 6:19). In contrast to the situation prevalent in the Orient, where extensive land belonged to the temples, the Jewish Temple possessed no landed property of its own. Even if one consecrated his land, it would be sold, and it was the duty of the former owner to be first in its redemption (Ar. 8:1). These *halakhot* and practices exercised a decisive influence, which accounts for the fact that in the last generations of the Temple period and for a considerable period afterward, most of the land in the country was not in the hands of large landowners but remained in the possession of smallholders.

THE JUBILEE IN THE AGGADAH. Mention has already been made of the link which the sages saw between the precepts of the Jubilee and those of the Sabbatical Year. It is certain that in every period they saw a link between the laws of the emancipation of slaves, remission of debts, and prohibition of land cultivation in the Sabbatical Year, which are the capstone of these laws, and the precepts of the Jubilee, since the Jubilee involves them all. The sages emphasized the practical and social connections between the various precepts of the Jubilee, as well as the religious and metaphysical connection between them. They reckoned the historical order and the end of time by Sabbatical Years and Jubilees: “Israel counted 17 Jubilees from the time they entered the land to the time they left it” (Ar. 12b). Elijah told Judah, the brother of Sala Ḥasida, “The world will endure not less than 85 Jubilees, and on the last Jubilee the Son of David will come” (Sanh. 97b). The precept of the Jubilee is often regarded as one of the basic precepts of the Torah. “And its seven lamps thereon” (Zech. 4:2) is interpreted as referring to the seven precepts – “offerings, tithes, *shemittot*, Jubilees, circumcision, honor of father and mother, and study of the Torah, which excels them all” (PR 8:4). The continued dwelling in the land was dependent upon the observance of the *shemittah* and the Jubilee (Shab. 33a).

[Shmuel Safrai]

Sabbatical Year in Post-Biblical Times

According to the exposition of the Talmud, the precept of the Sabbatical Year includes three positive commandments and six prohibitions (see **Commandments, The 613*). The three positive commands are that in “the seventh year thou shalt let it rest and lie fallow” (Ex. 23:11); “the seventh year shall be a Sab-

bath of solemn rest for the land” (Lev. 25:4); and “At the end of every seven years thou shalt make a release. And this is the manner of the release: every creditor shall release that which he hath lent unto his neighbor” (Deut. 15:1–2). The six negative precepts are “[1] Thou shalt neither sow thy field [2] nor prune thy vineyard. [3] That which groweth of itself of thy harvest thou shalt not reap, [4] and the grapes of thy undressed vine thou shalt not gather” (Lev. 25:4–5). [5] “He shall not exact it [the loan] of his neighbor” (Deut. 15:2). [6] “Beware that there be not a base thought in thy heart, saying: ‘The seventh year, the year of release, is at hand’; and thine eye be evil against thy needy brother, and thou give him nought” (Deut. 15:9).

The laws of the sabbatical remittance of debts are applicable both in Erez Israel and in the Diaspora. However, the obligation to let the land lie fallow is limited to the boundaries of Erez Israel in accordance with the verse that these laws begin only “When ye come into the land which I give you” (Lev. 25:2). Whether the sabbatical laws are still biblically relevant after the destruction of the First Temple, when the Jubilee Year is no longer operative, is disputed in the Talmud. According to Judah II, it is only observed today because of rabbinic enactment to “perpetuate the memory of the Sabbatical Year.” However, the rabbis held the operation of the Sabbatical Year nowadays still to be biblical (MK 2b; Git. 36a–b). Later commentaries and codes remained divided on this issue; Maimonides seemingly ruled in accordance with the viewpoint of Judah (Maim. Yad, Shemittah 9:2, 3 and Kesef Mishneh ad loc.; cf. Kesef Mishneh to Shemittah 4:29).

At the time of the Temple, it was also biblically forbidden to work the land during the 30 days prior to the start of the Sabbatical Year. The rabbis extended this pre-sabbatical prohibition until the preceding Shavuot for orchards, and Passover for grain fields. After the destruction of the Temple these additional restrictions were no longer in force, and today it is permissible to work the land until Rosh Ha-Shanah of the Sabbatical Year (MK 3b–4a).

Produce which grows of itself during the Sabbatical Year is considered holy and its usage is restricted. It is forbidden to harvest this growth solely for commercial purposes (Shev. 7:3) or to remove it from Erez Israel (Shev. 6:5). It may only be eaten or utilized in its usual fashion, so that items such as wine and vinegar may only be used for nourishment and not for anointing purposes (Shev. 8:2). The sabbatical produce may only be eaten as long as similar produce is still available in the field for the consumption of animals (Shev. 9:4). Once such produce has been consumed, all remaining sabbatical products of the same species must also be destroyed (Shev. 9:8).

The sabbatical money release was intended to free the poor from their debts and to enable them to attempt again to achieve financial stability. However, when **Hillel* later saw that people refrained from lending money before the Sabbatical Year, he instituted the **prosbul* (Git. 36a). The following are excluded from cancellation by the Sabbatical Year: wages, merchandise on credit, loans on pledges, a note guaranteed by mortgage, a note turned over to the *bet din* for col-

lection, and the debtor's waiving the cancelation of his debt (Git. 36a–b, 37a–b).

Observance

POST-BIBLICAL PERIOD. Among the commitments which the Jews took upon themselves at the famous assembly described in Nehemiah was a promise to observe the Sabbatical Year (Neh. 10:32). There is evidence that during the whole of the Second Temple period they rigidly adhered to this commitment. When *Alexander the Great reached Jerusalem during his march through Erez Israel, he acceded to the high priest's request that the Jews be exempted from paying tribute during the Sabbatical Year, when they did not work their land (Jos., Ant. 11:338). During the Hasmonean War, the fall of Beth Zur to the forces under Lysias and Eupator was attributed to a famine within the city since it was a Sabbatical Year (I Macc. 6:49, 53–54). Julius Caesar later reaffirmed this privilege of tax exemption during the Sabbatical Year since "they neither take fruit from the trees nor do they sow" (Jos., Ant. 14:202).

Following the destruction of the Temple (70 C.E.), the observance of the sabbatical prohibitions imposed ever-increasing economic hardships upon the agrarian society of ancient Israel. It became a constant source of challenge to the religious tenacity of the farmers. The rabbis constantly exhorted the masses to continue to observe properly the sabbatical restrictions, declaring that exile (Shab. 33a), poverty (Suk. 40b), and pestilence (Avot 5:9) result from the transgression of these laws. Immediately following the destruction, most of the land was left in Jewish hands and the Sabbatical Year was observed. Permissible organized distribution of sabbatical produce was arranged by the rabbis in order to ease the burden of the farmers, although there was some opposition to this procedure (Shev. 4:2; and see S. Safrai in bibl., 312–18). However, after the unsuccessful *Bar Kokhba Revolt (132–135 C.E.), the Roman government abrogated its previous tax exemption (Safrai, 320f.). Many Jews now compromised their observances due to the new economic pressures engendered by the demand for taxes during this year (Mekh., Shabbata 1). Some gathered sabbatical crops in order to pay these taxes, while others even traded in the produce (Sanh. 3:3, 26a). An entire city was described in which all the residents transgressed the sabbatical laws (Tosef., Dem. 3:17). An instance was even recorded where a proselyte retorted to the reproaches of a native Jew by exclaiming, "I will merit divine reward since I have not eaten the fruits of the Sabbatical Year like you" (Bek. 30a; Git. 54a). Nevertheless, even during this period, there were individuals who resolutely observed the sabbatical restrictions. R. Eleazar b. Zadok remarked about such a person, "I have never seen a man walking in the paths of righteousness as this man" (Suk. 44b).

As a consequence of the hardships now encountered in sabbatical observances, the rabbis relaxed many of the prohibitions. Their actions were probably also prompted by the viewpoint of *Judah II that the institution of the Sabbatical

Year was only rabbinic during the Second Temple period when the Jubilee was not operative because the land was not fully occupied by Israel (Git. 36a–b; Rashi and Tos. ad loc.; S.J. Zevin, in bibl., 105–12). Areas such as Ashkelon (Tosef., Oho. 18:4), Beth-Shean, Caesarea, Bet Guvrin, and Kefar Zemar (TJ, Dem. 2:1, 22c) were exempted from the restrictions of the Sabbatical Year. Judah ha-Nasi also permitted the buying of vegetables immediately after the close of the Sabbatical Year (Shev. 6:4) and the importing of produce from the Diaspora during the Sabbatical Year (TJ, Shev. 6:4, 37a; 7:2, 37b), both transactions which were previously forbidden. Many Jews still transgressed the sabbatical prohibitions which remained in force since they knew that their institution was only rabbinic (TJ, Dem. 2:1, 22d). It was related that an individual disobeyed the sabbatical laws but carefully observed the **hallah* rules, since the latter was still a biblical commandment (TJ, Shev. 9:8, 39a).

Rabban *Gamaliel, the son of Judah ha-Nasi, continued his father's policies, and also relaxed sabbatical restrictions. He permitted the previously forbidden actions of tilling the fields until the actual start – Rosh Ha-Shanah – of the Sabbatical Year (MK 3b; Tosef., Shev. 1:1), and the preparation of olives with an olive-crusher during this year (Shev. 8:6; Tosef., Shev. 6:27). During the third century, conditions worsened for the Jewish farmers. Taxes were increased, so that the constantly changing Roman rulers could support their armies and military expeditions. The rabbis therefore permitted the actual sowing of the seeds that produced the necessary food for the foreign armies (Sanh. 26a; TJ, Sanh. 3:6, 21b; Maim. Yad, Shemittah, 1:11). They also extended the time that fruits could be harvested and eaten during the Sabbatical Year (Shev. 9:3; Pes. 53a). Even during this difficult period, individuals continued to be meticulous in their observances. It was related that R. Safra investigated the rules governing his removing a barrel of Erez Israel sabbatical wine to the Diaspora before he did so (Pes. 52b). The rabbis declared that the verse "Ye mighty in strength, that fulfill His word" (Ps. 103:20) refers to those who leave their fields and vineyards untilled for a full year and still do not complain when they pay their taxes to the Roman government (Lev. R. 1:1). The observance of these laws remained sufficiently widespread so that the gentile nations were able to mock the Jews by stating, "The Jews observe the law of the Sabbatical Year and therefore have no vegetables. Consequently, the Jews sadden camels by eating the thorns which otherwise would have been consumed by the camels" (Lam. R., Proem 17).

MODERN PERIOD. For centuries, *shemittah* remained a theoretical problem, discussed solely by talmudic scholars. However, with the dawn of modern Zionism and the subsequent settlement of Erez Israel, it became a practical problem for the settlers. Before the *shemittah* of 1889, the leading rabbis of the generation debated whether it was permissible to enact a formal sale of all the Jewish-owned fields and vineyards to non-Jews in order to permit the working of the land during

the Sabbatical Year. R. Isaac Elhanan *Spektor of Kovno issued the following statement permitting this transaction:

I was asked several months ago to express my opinion concerning Jewish colonists, who live on the produce of the fields and vineyards of our Holy Land, as the *shemittah* year is approaching in 1889. If we do not find a *hetter* it is possible that the land will become desolate and the colonies will turn into wasteland, God forbid. Hundreds of souls will be affected by it. Although I am very much preoccupied and very weak, yet I find it necessary to deal with this important problem and permit the work in the fields, by selling them to the Muslims for a period of two years only. After that period, the vineyard and the fields go back to the owners; and the sale must be to Muslims only and may take place during the coming summer. I prepared, with the help of God, a special brochure dealing with this subject, but in practice I never came out with a *hetter* because I did not want to be the only one in this new matter, as is always my practice in such things.

But now that I received a letter informing me that my good friends, the rabbis: R. Israel Joshua of Kutna, R. Samuel Mohilewer of Bialystok, and R. Samuel Zanwil of Warsaw gave due consideration to this problem and came out with a *hetter*, and wait for my approval, I am greatly pleased to find that I am not alone in this great issue. My opinion is, therefore, to follow my above mentioned suggestion [sell the land to non-Jews]. Furthermore, the work in the fields and vineyards is to be done by non-Jews, but in the case of poor people who cannot afford to engage non-Jewish labor, let them consult the aforementioned honored rabbis; and may the Lord grant us the privilege to come joyously to our land, and observe the mitzvah of *shemittah* as it was originally ordained for us and in accordance with all its rules and regulations.

It must be explicitly stated that this *hetter* is only for the year 5649 (1889) but not for future *shemittot*. Then further meditation will be necessary, and a new *hetter* will be required; and may the Lord help His people so that they should not need any *hetter* and should observe *shemittah* in accordance with the Law, as I have fully explained it in the special brochure, with the help of God (E. Shimoff, Rabbi Isaac Elchanan Spektor (1959), 134f.).

Spektor's lenient decision was opposed by the Ashkenazi *kehillah* of Jerusalem and its rabbis, Moses Joshua Judah Leib *Diskin and Samuel *Salant. Many of the colonists originally refrained from work during the Sabbatical Year in accordance with the stringent ruling. However, with the continued growth of the new settlements, many more farmers abided by the lenient decision during the next *shemittah* of 1896.

Before the Sabbatical Year of 1910, the controversy regarding the sale of the land to Muslims revived. Rabbi Abraham Isaac *Kook, then the chief rabbi of Jaffa, was the leading proponent of the sale, while Rabbi Jacob David *Willowsky of Safed opposed it. During the ensuing *shemittah* years, the chief rabbinate of Erez Israel continued to abide by the lenient ruling, although there was always opposition to its decisions. Most prominent among the opponents has been Rabbi Abraham Isaiah *Karelitz of Bene-Berak. In Kibbutz Hafez Hayyim attempts to grow vegetables in water (hydroponics) have met with some success as a method of observing the restric-

tions of the Sabbatical Year. Various Israel institutes devoted to studying agriculture in light of *halakhah* also experiment with methods suitable to growing fruits and vegetables during Sabbatical years.

Sabbatical Years during the second half of the 20th century fell during 5712 (1951/52); 5719 (1958/59); 5726 (1965/66); 5733 (1972/73); 5740 (1979/80); 5747 (1986/87); and 5754 (1993/94).

SABBIONETA, town in Lombardy, Italy, in the former duchy of *Mantua. Jewish settlement in Sabbioneta dates from the 15th century. In 1436 the brothers Azariah and Meshullam, the sons of Joab of Pisa, arrived there to found the third bank of the duchy of Mantua. On Feb. 10, 1530, the adventurer David *Reuveni visited the town and stayed in the home of Eleazar *Portaleone. From the 16th century, the Jewish population of Sabbioneta constantly increased. In 1746 the town came under Austrian rule. In 1779, in the reign of Maria *Theresa, the first attempt was made to abolish the judicial autonomy of the Mantuan communities, including Sabbioneta. Rabbis and scholars of Sabbioneta including Azriel b. Solomon *Dienna, Johanan b. Joseph *Treves, and Joseph b. Jacob Padua Ashkenazi.

Printing

Sabbioneta is best known, however, for its Hebrew press, which was founded in 1551 by Joseph b. Jacob Shalit of Padua

and Jacob b. Naphtali of Gazzuala, in the house of Tobias b. Eliezer *Foa. In 1553 Foa became sole owner of the press, with Cornelio *Adelkind as the printing expert, and Joshua Boaz Baruch as corrector and setter. After Adelkind converted to Christianity, Foa's sons, Eliezer and Mordecai, took his place; 26 books were issued, including the first printed edition of Isaac Abrabanel's *Mirkevet ha-Mishneh* (1551), before the press was compelled to close down in 1559. A proposed edition of the Talmud did not go beyond one tractate (*Kiddushin*, 1553), and a Mishnah edition with Maimonides' and Bertinoro's commentaries was not printed beyond the order *Zera'im* and part of *Mo'ed* (1558); the rest appeared in Mantua.

In 1567 Vincenzo Conti, the gentile printer of *Cremona, who had served his apprenticeship with Foa at Sabbioneta, left Cremona and in that year printed a number of works at Sabbioneta.

SABEA (Heb. סָבְאָה, שָׁבְאָה – *S(h)eva*?; Ass. *Saba'ai* (Tiglath-Pileser III); Sum. *Sabum/Sabu*? (see Montgomery in bibl.)), state in S. Arabia in the region exposed to the monsoon from Hadhramaut to Yemen, contemporary with the Israelite monarchy. Explorations and excavations conducted by the University of Louvain (1951–52) and the American Foundation for the Study of Man (1950–53) uncovered epigraphic evidence in the area, dating from the beginning of the second millennium B.C.E. to the sixth century C.E., which reflects political development from theocracy, through secular monarchy, to oligarchy.

Sabea, roughly coinciding with Yemen, displayed the greatest durability in the various shifts of power between the Sabean, Minean, and Qatabanian states. Radiocarbon dating indicates that Sabea flourished from around 900 to 450 B.C.E. (for beginnings, see Grohmann in bibl.). Besides engaging in agriculture, which utilized seasonal rainfall and advanced irrigation, these kingdoms, exploiting their proximity to Africa across the Straits of Bab el Mandeb, were essentially trading empires, serving as entrepôts of maritime trade from India and East Africa, and transporting foreign luxuries and their home-produced incense (Jer. 6:20; Ps. 72:15) by camel caravans (Isa. 60:6; Job 6:19 [?]) to Mesopotamia, Syria, and Egypt. A South Arabian clay seal from the ninth century found in debris at Beth-El possibly attests to such trade with the early Israelite monarchy.

The visit of the Queen of *Sheba (1 Kings 10) is one of the earliest examples of a trade mission. It was occasioned by Solomon's occupation of the head of the Gulf of Akaba and his enterprise in the Red Sea, which was a threat to South Arabian monopoly of the caravan trade. The alphabetic inscriptions from South Arabia furnish no evidence for women rulers, but Assyrian inscriptions repeatedly mention Arab queens in the

north, so that the Queen of Sheba may have been one of these; Northern Sabeans were also doubtless those mentioned in Job 1:15 (cf. Gen. 25:3; 1 Chron. 1:32) and their name may have survived in the Wadi Shaba northeast of Medina. Both southern and northern Sheba are to be distinguished from Seba (Heb. סָבָא, north Sudan (Isa. 43:3; Ps. 72:10)).

By the end of the first century B.C.E. the Sabean state had absorbed the Minean kingdom to the south and Qataban to the north, and soon also the Hadhramaut. This aggrandizement eventually involved Sabea in war with the Abyssinians, but its final decline was due to internal dissensions between Jews and Christians, the latter sponsored by Abyssinia, then a Christian state, and the former identified with Arab nationalism. The last king of Sabea, Yusuf *Dhû-Nuwâs, adopted the Jewish faith. His persecution of the Christians provoked an Abyssinian invasion in 525 C.E. and occupation of the land and the oases on the caravan route to the north. This, together with the development of the Red Sea trade route, brought about the end of the state of Sabea, conventionally associated with the bursting of the great dam at Ma'rib in 542 which is symptomatic of the general neglect of the vital irrigation works after the collapse of the native government. The Abyssinian rule ended by 575 and was succeeded by Persian dominion for just over half a century, whereafter the native Sabeans were finally absorbed in the politico-religious empire of Islam.

The religion of Sabea was as well organized as that of any Semitic state in the Ancient Near East. Temples were well built and endowed with a large and well-organized staff. Inscriptions attest to native polytheism, including many unnamed gods of families and divine local lords (Baals). The chief gods were the moon-god, called A'lmaqah in Sabea; the sun-goddess; and 'Athtar, the god of the planet Venus, the brightest star in those latitudes, who was the guide of caravans. Unlike the Mesopotamian Venus deity Ishtar, the South Arabian 'Athtar was not worshipped as a goddess but as a god.

[John Gray]

SABIN, ALBERT BRUCE (1906–1993), U.S. virologist. Sabin was born in Bialystok, Poland, and emigrated to Paterson, New Jersey, with his family in 1921. He graduated in medicine from New York University and thereafter worked on polio viruses and other infectious agents at the Rockefeller Institute in 1935–39. He joined the University of Cincinnati College of Medicine, where he progressed to professor of research pediatrics and distinguished service professor (1939–69), a period interrupted by World War II service in the U.S. Army Medical Corps, where he studied viral infections such as dengue fever threatening U.S. troops. He developed a live “attenuated” po-

lio virus, which did not cause disease but induced immunity to polio virus infections and was given orally. Its safety and efficacy were established in 1960 after European trials, and it was used extensively in the U.S. between 1962 and 1964, supplanting the *Salk intramuscular killed viral vaccine at least temporarily. The respective merits of the two vaccines caused great general and personal controversy. He also worked on the genetics of antiviral resistance and on a simple test for antibodies to the toxoplasma parasite. After 1969 his services were in great demand as a visiting professor and as a member of expert committees in the U.S. and abroad; he was president of the Weizmann Institute of Science (1970–72). He was elected to the U.S. National Academy of Sciences (1951) and the U.S.S.R. Academy of Medical Sciences, and received the U.S. National Medal of Science in 1970. His contributions were broadly humanitarian as well as scientific. He is buried in the Arlington National Cemetery.

[Michael Denman (2nd ed.)]

SABINUS (end of first century B.C.E.), Roman official. Sabinus, then Augustus' treasurer in Syria, was sent to Judea after Herod's death in 4 B.C.E., to take charge of the latter's estate as procurator. On his arrival he acceded to the request of Varus, governor of Syria, to hand over the custody of the citadels and treasures to Herod's son *Archelaus, pending Caesar's decision concerning Herod's will. However, immediately after the departure of Varus and Archelaus for Antioch and Rome, respectively, he took possession of the royal palace and demanded from the custodians particulars regarding Herod's treasure. Sabinus' conduct caused a revolt on the festival of Shavuot, when many pilgrims had assembled in Jerusalem. Sabinus seized the Tower of Phasael, from which he gave the signal to attack the rebels. As the battle developed, the Romans set fire to the Temple chambers, capturing and plundering the Temple treasury. These acts further enraged the people, and they besieged the royal palace where Sabinus and his followers had fortified themselves. The Jews demanded that the Romans leave the city, offering to spare their lives, but Sabinus would not trust them. Riots continued throughout Judea until Varus hurried back to suppress them. When he reached Jerusalem, Sabinus fled.

[Lea Roth]

SABSOVICH, H.L. (Hirsch Loeb; 1861–1915), U.S. agronomist and a leader of the Am Olam movement. Sabsovich was born in Berdiansk, Russia. As a law student at Odessa University during the 1881 pogroms, he helped to organize Jewish self-defense. After advanced agronomy studies in Switzerland, Sabsovich became manager of an estate in the Rostov region. Immigrating to the United States in 1887, Sabsovich obtained a post as assistant director of the Agricultural Experiment Sta-

tion in Fort Collins, Colorado. He was then called upon by the Baron de Hirsch Fund to direct the founding of Woodbine, New Jersey (1891), a Jewish farming-industrial community, where he was superintendent for 15 years, followed by another decade as the Fund's general agent in New York. Among his achievements was the pioneering Baron de Hirsch Agricultural School (1894–1919). Sabsovich worked closely with the Jewish Agricultural Society, the Federation of Jewish Farmers, and the Society of Jewish Social Workers of Greater New York (as president).

[Joseph Brandes]

SACERDOTE, DAVID (1550–1625), composer and banker. He came from Rovré or Rovere in the duchy of Piedmont (today Roreto Chisone in the province of Turin) and is known as the author of a single work written in his youth, *Il primo libro di madrigali a sei voci*, published in Venice in 1575. Only one copy, and that of the part-book *quinto* (fifth voice), has been found so far and is in the British Museum. Sacerdote, who at that time lived in Casale Monferrato, dedicated the work to the Marquis Alfonso del Vasto, the son of Isabella Gonzaga, who was governor of the marquisate of Monferrato on behalf of her brother Guglielmo Gonzaga, duke of Mantua.

Sacerdote was also a banker, first at Casale, together with his brother Leone (1576–80), then at Acqui (1580–85), and finally at Cortemilia in Piedmont (from 1585 onward), together with his relative Ventura Bacchi. He was also then the holder of a moneylender's concession at Bologna (from 1587 onward), at the Marchese Del Carreto fiefs in Calizzano and Carcare (1591–1611), and finally, from 1618 onward, at Cengio, which then belonged to another branch of the Del Carretto family.

The musical value and stylistic relationships of the *Madrigali* cannot be discerned from the surviving *quinto* part; neither has it been possible as yet to connect it definitely with the circle of Jewish musicians around Salamone de' *Rossi. The combination of the banker's profession with a musical education is typical of his time and social circumstances.

Loevinsohn, in: REJ, 93 (1932), 49, 159, 163, 168 (correct: David instead of Daniele Sacerdote di Rovere); A. Einstein, in: J. Newman, *Madrigals of Salomon De Rossi* (1962), 321 (Diss. Colum. Univ. N.Y.).

[Vittore Colorni]

SACERDOTI, ANGELO-RAPHAEL CHAIM (1886–1935), chief rabbi of Rome and Zionist leader in Italy. Born and educated in Florence, he officiated as the rabbi of Reggio Emilia until 1912, when he was invited to take up the post of chief rabbi of Rome, which he retained until his death. While he was preoccupied with the reorganization of the Rome community, World War I broke out. He volunteered to serve as an army chaplain and organized Jewish chaplains to serve on all the

fronts. After the war he began an active campaign to revitalize Italian Jewry, of which he was a leading guide and teacher. When Mussolini assumed power, Sacerdoti held a series of meetings with him in an attempt to protect Jewish interests and ensure that the Jews of Italy would not be harmed by the Fascist regime. He was instrumental in obtaining the passage of a law that required all Italian Jews to belong to one of the 26 united communities, unless they specifically renounced their Judaism. This led to increased participation in Jewish community life. He also transferred the Rabbinical Seminary from Florence to Rome. Sacerdoti was active in the Zionist field, participating in the opening of The Hebrew University (1925) as the representative of the Rome community and the Italian government. Due to his efforts, a political office of the Zionist Organization was established in Rome.

[Getzel Kressel]

SACHAR, ABRAM LEON (1899–1993), U.S. educator and historian; founding president of *Brandeis University. Sachar was born in New York and brought up in Saint Louis. In 1929 he began to teach history at the University of Illinois. Sachar was one of the organizers of the B'nai B'rith Hillel Foundation and played an important role in its development, establishing Hillel Houses for Jewish students on the campuses of American universities. He himself directed the University of Illinois unit from 1929 to 1933 and then served as national director of the Hillel Foundations from 1933 to 1948. In 1948 he was appointed the first president of Brandeis University and was largely responsible for its rapid development, guiding its academic progress and raising the requisite funds for the construction of its extensive campus. In 1968 Sachar was appointed chancellor of the university and a fellow of the American Academy of Arts and Sciences. His writings include a popular one-volume *A History of the Jews* (1965⁵); a history of Jewish life between the two world wars, *Sufferance Is the Badge* (1939); *The Course of Our Times* (1972); *Brandeis University: A Host at Last* (1976); and *The Redemption of the Unwanted: From the Liberation of the Death Camps to the Founding of Israel* (1983).

His son HOWARD MORLEY SACHAR (1928–), historian, was born in St. Louis, Missouri. He taught history at the University of Massachusetts in 1953 and later directed Hillel Foundations at UCLA and Stanford University. In 1961 he became founder-director of Brandeis University's Jacob Hiatt Institute in Israel. From 1965 he taught modern and Middle Eastern history at George Washington University, Washington, D.C. In 2004 he became professor emeritus at the university. Sachar's works include *The Course of Modern Jewish History* (1958); *Aliyah: The Peoples of Israel* (1961); *From the Ends of the Earth: The Peoples of Israel* (1964); *Emergence of the Middle East, 1914–1924* (1969); *Europe Leaves the Middle East, 1936–1954* (1972); a novel, *The Man on the Camel* (1980); *Egypt and Israel* (1983); *Diaspora: An Inquiry into the Contem-*

porary Jewish World (1985); and *A History of Israel: From the Aftermath of the Yom Kippur War* (1987).

[David Rudavsky / Ruth Beloff (2nd ed.)]

SACHER, HARRY (1881–1971), British Zionist and lawyer. Born in London, the son of a tailor, Sacher was educated at London and Oxford Universities (winning a scholarship) and in Europe. He was called to the bar but did not practice. During 1905–09 and 1915–19 he was a member of the editorial board of the *Manchester Guardian* and achieved prominence in the field of political analysis. He belonged to the Manchester Zionist Circle headed by Chaim *Weizmann and was instrumental in winning the *Manchester Guardian* to the Zionist cause during the political efforts preceding the *Balfour Declaration. Sacher was married to the sister of Simon *Marks (later Lord Marks of Broughton), one of the founders of Marks & Spencer and an ardent Zionist and patron of Zionist causes. In 1920 Sacher settled in Palestine, where he practiced law.

At the 15th Zionist Congress (Basle, 1927) Sacher was elected to the Zionist Executive and was reelected to it in 1929 at the 16th Congress (Zurich), serving until 1931. His term began during the days of an economic crisis in the *yishuv*, following the height of the Fourth Aliyah. He channeled the economic policy of the Zionist Organization with a firm hand in an effort to balance its budget, encountering strong opposition on the part of the labor movement. The "Sacher regime" became synonymous with economic efficiency, in contrast to various other – daring – programs, which lacked the means of implementation. The second part of Sacher's term coincided with the Arab riots of 1929, when he defended Zionism against its detractors among Arabs and the British authorities. In his testimony before the Shaw Commission, which set out from London to investigate the causes of the riots, he defined the Zionist aims for Jewish-Arab relations: "We do not wish to rule over others, but we do not wish others to rule over us."

Sacher returned to England in 1930 and became a director of Marks and Spencer, serving until 1962. Throughout the years he remained active in the Zionist movement and, after 1948, in pro-Israel affairs. He edited Anglo-Jewish Zionist journals, such as *The Jewish Review*. His books include *Israel, The Establishment of a State* (1952) and *Zionist Portraits and Other Essays* (1959); he edited the anthology, *Zionism and the Jewish Future* (1916). He also donated the Sacher Building to New College, Oxford, and was one of the greatest benefactors of the college in its history.

His wife, MIRIAM (née Marks, a sister of Baron *Marks, 1892–1975), was one of the leaders of *WIZO. His son, MICHAEL (1917–1986), was active in fund-raising for Israel in Britain and a governor of the Weizmann Institute of Science. In 1971 he was elected to the Jewish Agency Executive.

SACHS, family of U.S. educators, physicians, and bankers. JOSEPH SACHS, who immigrated to the United States in 1848, was briefly a rabbi in Baltimore and Boston. His oldest son, Julius *Sachs, was an educator and philologist. Another son, Bernard *Sachs, was a noted neurologist. Two other sons of Joseph Sachs, SAMUEL and HARRY SACHS, were founding members of the banking house of *Goldman, Sachs and Company. Samuel Sachs' son, WALTER EDWARD SACHS (1884–1980), and Harry Sachs' son, HOWARD JOSEPH SACHS (1891–1969), succeeded their fathers as partners in the firm. Julius Sachs' son, ERNEST SACHS (1879–1958), became a prominent neurosurgeon in St. Louis, Missouri, and Samuel Sachs' son, PAUL J. SACHS (1878–1965), was professor of fine arts at Harvard and director of the Fogg Art Museum.

BIBLIOGRAPHY: L. Endlich, *Goldman Sachs: The Culture of Success* (1999).

SACHS, ANDREW (1930–), British actor. Born in Berlin, Sachs came to Britain as a child, following his father, who had been arrested and released by the Gestapo a few days before **Kristallnacht*. Sachs was an actor from 1948 and appeared in supporting roles in dozens of films, as well as on television and radio. He became internationally renowned for playing “Manuel,” the hapless Spanish waiter, in the BBC’s *Fawlty Towers*, produced in two series in 1975 and 1979 and often regarded as the greatest British television comedy ever made. In 2004 Sachs produced a series for BBC radio on the history of the Jews of Britain, *The Jewish Tapestry*.

[William D. Rubinstein (2nd ed.)]

SACHS, BERNARD (1858–1944), U.S. neurologist. Sachs, who was born in Baltimore, belonged to the *Sachs family of scholars. He studied medicine in Europe and, when he returned to the U.S., became professor of nervous and mental diseases at the New York Polyclinic and professor of clinical neurology at Columbia University. He was president of the First International Neurological Congress which was held in 1931. Sachs, a pioneer in the field of child neurology, is best known for his description of the Tay-Sachs disease in children – a progressive impairment of mental functions, muscles, and vision ending in blindness. He made various studies on nervous disorders in children and published several books on the subject, among them: *A Treatise on the Nervous Diseases of Children* (1895, 1905²); *The Normal* (1925); and *Puberty and Adolescence* (1936).

SACHS, CURT (1881–1959), German musicologist. Born in Berlin, Sachs became director of the Berlin state collection of instruments in 1919. The same year he began to lecture at the University of Berlin, and from 1933 to 1937 was adviser to the museum of musical instruments at the Musée de Trocadéro in

Paris. He supervised the production of two series of historical recordings, *2,000 Jahre Musik* (Berlin) and *L’Anthologie Sonore* (Paris). In 1937 he emigrated to the U.S., where he lectured at New York University until 1957 and at Columbia from 1953. The wide scope of his research included an inquiry into the creative origins and evolution of musical instruments which led him, with E.M. von Hornbostel, to compose a classification system which bears their names. Sachs was a pioneer in the comparative study of musical instruments and embodied his researches on this subject in his *History of Musical Instruments* (1940).

He published *Eine Weltgeschichte des Tanzes* (1933; *A World History of the Dance*, 1937, 1963²); *The Rise of Music in the Ancient World – East and West* (1943); and *Rhythm and Tempo* (1953), on the relationship of rhythmic expression and musical styles. In *The Commonwealth of Art* (1946) Sachs gave expression to his personal philosophy of the unity of the arts. His other works include *Our Musical Heritage* (1948, 1955²), a short history of music; and *The Wellsprings of Music* (1962, ed. posthumously by Jaap Kunst).

Hahn, in: *Acta Musicologica*, 29 (1957), 94–106, a bibliography of Sachs’s writings; E. Gerson-Kiwi, in: *Tazlil*, no. 5 (1965), 96–98 (Heb.), incl. bibl.

[Edith Gerson-Kiwi]

SACHS, HANNS (1881–1947), non-medical psychoanalyst. Sachs was born in Vienna and studied law. In 1904 he read Freud’s *Interpretation of Dreams* and in 1909 joined Freud’s group, becoming a member of its executive the following year. Sachs was one of the six men closest to Freud, “The Committee,” and in 1912 he was appointed coeditor of *Imago* with Otto *Rank. In 1918 he abandoned law and opened a psychoanalytic practice in Zurich. In 1920 he was invited to become a training analyst in Berlin. In 1932 Sachs left Berlin for Boston, where he continued as a training analyst and lectured. He received one of the few non-medical appointments as an instructor at the Harvard Medical School. Sachs was an indefatigable editor and teacher. His early writings are essentially devoted to questions of dream interpretation and everyday terrors. His later works mainly concern the application of psychoanalysis to literature and art.

Together with Karl *Abraham he advised Pabst, the film director of *Secrets of the Soul*. Sachs kept in touch with Pabst and in 1925 wrote *Notes About the Psychology of the Film*. His first major publication, written with Otto Rank, was *The Significance of Psychoanalysis for the Mental Sciences* (1915), which deals with the application of psychoanalysis to civilization, myth, religion, art, and philosophy. Other books include *Psychotherapy and the Pursuit of Happiness* (1941), *The Creative Unconscious* (1942), and *Freud, Master and Friend* (1944). Sachs’s literary research was far-reaching. He thought that in writing *The Tempest*, Shakespeare freed himself from guilt at having left his daughter when she was a child (*Der Sturm*,

1912). Sachs wrote three books in his search to understand human beings and how clearly they may know themselves: *Caligula* (1931), *Notes About the Knowledge of Human Beings* (1936; not translated), and his last book, published posthumously and given the title by A.A. Roback, *Masks of Love and Life* (1948); it contains a sketch of Julius Caesar's personality and a chapter about the apostle Paul.

[Louis Miller]

SACHS, JULIUS (1832–1897), German botanist. Born in Breslau of a poor family, he was encouraged in his studies by the Czech physiologist Johannes Evangelista Purkinje (1787–1869), then at the University of Breslau. When Sachs was 18, Purkinje moved to Prague, and he invited Sachs to come to his institute as an assistant. After obtaining his degree at the University of Prague, Sachs went to Tharandt, where first he taught botany at the forestry school; in 1861 he was appointed professor at the agricultural school at Poppelsdorf, near Bonn. In 1867 Sachs became professor of botany at Wuerzburg, remaining for nearly 30 years.

Sachs held an important place in the history of biology, both as a teacher and as a researcher. His textbooks, *Handbuch der Experimentalphysiologie der Pflanzen* (1865) and the *Lehrbuch der Botanik* (1868; *Textbook of Botany*, 1875), widely influenced the teaching of botany. Sachs's personal influence as a teacher was equally great. Under his genial and enthusiastic leadership, Wuerzburg became an international center for plant physiology, where some of Europe's most eminent botanists were trained.

Sachs has been called the creator of experimental botany. Among Sachs's noteworthy contributions were his demonstration that starch is the first perceptible product of photosynthesis and that it is translocated from the leaf in the form of sugar. Sachs was the first to demonstrate that the chloroplasts are the site of photosynthesis, and it was he who showed that light is necessary for the synthesis of chlorophyll. Sachs also pioneered in studies of the nutritional requirements of plants; he published the first formula for a standard culture solution, a necessary basis for identifying the mineral elements essential for growth. Sachs introduced the auxanometer, an instrument for quantitatively studying plant growth, and the clinostat, a rotating apparatus by means of which he investigated the plant's response to gravity.

BIBLIOGRAPHY: E.G. Pringsheim, *Julius Sachs* (Ger., 1932).

[Mordecai L. Gabriel]

SACHS, JULIUS (1849–1934), U.S. educator. Sachs, who was born in Baltimore, Maryland, was founder and headmaster of the Sachs Collegiate Institute School of Boys in New York City (1871–1904), a school considerably attended by the German-Jewish upper class of that city; and professor of secondary education at Columbia Teachers College (1902–17). Sachs gained

national recognition for leadership in raising the standards of secondary school education and improving teacher training. He served as president of the Schoolmasters' Association of New York (1889) and the Headmasters' Association of the United States (1899). In addition to activities and publications concerned with education, Sachs produced several studies in the field of philology and archaeology. He was president of the American Philological Association in 1891. He belonged to the *Sachs family of educators.

[Frederick M. Binder]

SACHS, LEO (1924–), Israeli geneticist. Sachs was born in Leipzig, Germany, and in 1933 immigrated to England with his parents following Hitler's accession to power. He received his doctorate from Cambridge in 1951 and in 1952 came to Israel as a research scientist at the Weizmann Institute of Science, Rehovot. He initiated research on various aspects of biomedical sciences and established the Department of Genetics and Virology. He was appointed associate professor in 1960 and full professor in 1962. His research pioneered new approaches to basic and medically applied aspects of stem cell biology, development, hematology, and oncology, and led to new therapies. His honors include the Israel Prize for natural sciences (1972), the Rothschild Prize in biological sciences (1977), the Wolf Prize in medicine (1980), and the EMET Prize for life sciences, medicine, and genetics (2002). He is a member of the Israel Academy of Sciences and Humanities, a foreign associate of the U.S. National Academy of Sciences, and a fellow of the Royal Society, London, since 1997.

[Bracha Rager (2nd ed.)]

SACHS, LEONARD (1909–1990), British actor. Sachs went to England from South Africa in 1930 and acted with repertory companies. In 1936 he and Peter Ridgeway founded the Players' Theatre in London, and apart from three years in the army, Sachs continued to direct there until 1947. In 1951 he launched *Mr. Sachs's Song Saloon* at the Battersea Festival Gardens and took it on tour through Britain. Sachs appeared, generally in supporting roles, in numerous British films and television plays between 1936 and 1976.

SACHS, MAURICE (originally **Jean-Maurice Ettinghausen**; 1906–1945?), French author, critic, and translator. Born in Paris, Sachs was abandoned by his parents and fell prey to alcoholism, homosexuality, and kleptomania. Vainly trying to free himself from moral depravity, he became a Catholic and entered a seminary, but left it and went to the U.S., where he married a Protestant minister's daughter. Returning to France, he became a Nazi collaborator and black marketeer. He is believed to have died in a prison fight in Hamburg toward the end of World War II. Sachs' literary talent revealed itself in novels, essays, and a number of picaresque stories.

These include *La Décade de l'illusion* (1950), published first in English as *The Decade of Illusion* (1933); *André Gide* (1936); and *Au temps du Boeuf sur le Toit* (1939). *Le Sabbat* (*The*

Day of Wrath, 1953), written in 1939 and published in 1946, is the brutal confession of a lost soul, a brilliantly written, penetrating analysis of bohemian life in Paris. Most of Sachs' works are autobiographical. Those published posthumously include *La Chasse à courre* (1948), *Chronique joyeuse et scandaleuse* (1948), *Tableau des moeurs de ce temps* (1951), *Abracadabra* (1952), and *Le Voile de Véronique* (1958).

BIBLIOGRAPHY: P. Monceau, *Le Dernier Sabbat de M. Sachs* (1950); Catane, in: *Màariv* (Dec. 2, 1960).

[Moshe Catane]

SACHS, MICHAEL (1808–1864), German rabbi and scholar. Sachs, who was born in Glogau, Silesia, became a preacher in Prague in 1836, succeeding L. Zunz, and from 1844 was a preacher in Berlin, where he also served as *dayyan* at the *bet din*. He declined an invitation to become rabbi to the small but growing Orthodox congregation in Frankfurt, which eventually chose S.R. *Hirsch. A strong traditionalist, Sachs opposed the introduction of the organ – more for historical than halakhic reasons – although he consented to the omission of *piyyutim* from the synagogue service. His middle-of-the-road position earned him the suspicion and antagonism of the old-time Orthodox, while he disappointed the hopes of the Reformers (he threatened to resign when in 1860 the Berlin Jewish community planned to bury the Reform leader S. *Holdheim in the “Rabbis’ Row” of the cemetery).

Sachs possessed a wide Jewish and general education, and was familiar with classics and Semitics and their modern philological-historical methodology no less than with Bible, Talmud, and particularly Midrash, as shown by his commentaries on the *piyyutim*. As a scholar, he was one of the leaders in the emerging *Wissenschaft des Judentums. He worked on a German Bible translation with Zunz, contributing 15 books, including Psalms (1835), which appealed to his lyric-poetical nature. Sachs' major work was *Religioese Poesie der Juden in Spanien* (1845, 1901²), which consisted of renderings of the poetry of the great medieval Spanish-Hebrew poets, as well as a historical survey. This influential work probably inspired Heinrich Heine's *Hebraeische Melodien*.

Of a more philological nature were Sachs' *Beitraege zur Sprach- und Altertumsforschung* (2 vols., 1852–54), in which he treated the relationship between the classical world and that of the Talmud and Midrash. His *Stimmen von Jordan und Euphrat* (2 vols., 1853, 1891²) is an anthology of *aggadah*. Sachs' edition of the *mahzor* in both the German and East German (Polish) rites, with translation and notes (9 vols., 1855 and many subsequent editions), was highly popular with German Jewry, as was his edition and translation of the *siddur* (1858 ff.). In an appendix to the *mahzor* (*Be'er Mikha'el*, published posthumously by A.A. Ehrlich), Sachs occasionally expressed criticism of W. *Heidenheim, his great predecessor in this field. Sachs was an outstanding preacher, and two volumes of his sermons were published posthumously, *Predigten* (1867–69). A memorial volume was published on the 100th anniversary of his birth.

[Ernst Daniel Goldschmidt]

SACHS, NELLY (Leonie; 1891–1970), German poet and Nobel Prize winner. The daughter of a Berlin industrialist, Nelly Sachs grew up in an artistic home where she early imbibed a love of literature. At 17 she began writing neoromantic poetry in traditional, rhymed forms and puppet plays with a fairy-tale flavor. Her first work, *Legenden und Erzaehlungen* (1921), reflected a Christian intellectual world tinged with mysticism. The poet was then rooted in the world of German Romanticism, the Catholic Middle Ages, and the mysticism of Jacob Boehme. After 1933, when Nelly Sachs, like so many other assimilated German Jews, discovered her Jewish heritage, she found ideas akin to Boehme's in the Zohar. Her early work remained largely unknown, and she refused to allow it to be republished. Her reputation is largely based on her output after the end of World War II. In 1940 Nelly Sachs emigrated to Sweden through the good offices of the writer Selma Lagerlöf and the Swedish royal family. At first she made a modest living in Stockholm by translating Swedish poetry into German, but eventually published several successful volumes of her translations.

Throughout the war years, however, Nelly Sachs wrote some of the poetry that was to bring her fame. The motif of flight and pursuit, the symbol of the hunter and his quarry, are at the center of her poetic thought. Her poetry is ecstatic, mystical, and visionary. It is also very much in the German romantic tradition and, as such, has been criticized by some as disingenuous and incompatible with her subject matter. Although her poems were mostly composed in free verse, she wrote with careful craftsmanship, using an exquisite German flavored with the Psalms and filled with mystical imagery of Hasidic origin. “If I could not have written, I could not have survived,” Nelly Sachs wrote. “Death was my teacher... my metaphors are my sounds.” *In den Wohnungen des Todes* (1946), dedicated “to my dead brothers and sisters,” includes cycles titled “Prayers for the Dead Fiancé,” “Epitaphs Written On Air,” and “Choruses After Midnight.” *Sternverdunkelung* (1949) contains poems expressing unquenchable faith in the indestructibility of the people of Israel and the importance of its mission. Three subsequent collections were *Und niemand weiss weiter* (1957), *Flucht und Verwandlung* (1958), and *Die Suchende* (1966). On the occasion of her 70th birthday, her collected poetry was issued as *Fahrt ins Staublose* (1961). Her *Spaete Gedichte* (1965) contains the extended poetic sequence “Gluehende Raetsel” (1964) and suggests a mystical border whose language touches silence.

The 14 collected plays of *Zeichen im Sand* (1962) include *Eli, ein Mysterienspiel vom Leiden Israels* (1951). Written in 1943, this deals with the cosmic aftermath of the Holocaust. In 17 loosely connected scenes, the tragedy of an eight-year old Polish shepherd boy, who raises his flute heavenward in an-

guish and is murdered by a German soldier, is interwoven with the old Jewish legend of the *Lamed Vav Zaddikim* (36 Hidden Saints). *Eli* was later presented as a radio play and as an opera. *O the Chimneys*, an English version of selected poems and of *Eli* by Michael Hamburger and other translators, was published in 1967. The 1966 Nobel Prize for literature, which Nelly Sachs shared with S.Y. *Agnon ("Agnon represents the State of Israel. I represent the tragedy of the Jewish people"), was the culmination of several awards honoring her work.

SACHS, SENIOR (1815–1892), Hebrew scholar. Born near Kovno, Lithuania, Sachs lived for two years in Brody (1839–40), studying Hebrew scholarly and philosophic literature, and specializing in German and other ancient and modern languages. For two years he taught in Raseiniai, where he befriended the novelist Abraham *Mapu. In 1856, Baron J. *Guenzburg took him to Paris to teach his son and grandson; Sachs remained there until the end of his life. His studies encompassed several aspects of medieval Jewish literature, especially religio-philosophical thought and the Hebrew poetry of Spain. From ancient manuscripts he published many selections, concentrating especially on Solomon ibn *Gabirol. His articles and studies, written only in Hebrew, were published in the Hebrew periodicals from the 1840s on.

Among the pamphlets and journals which he edited were *Kanfei Yonah* (1848); *Ha-Palit* (1850); *Ha-Tehiyyah* (2 vols., 1850–57), a journal that published old manuscripts with notes; and *Kikayon Yonah* (1860). He also compiled a list of books and manuscripts in the Guenzburg library (unpublished), *Reshimot Sefarim Kitvei Yad* (1866); and *Shir ha-Shirim Asher li-Shelomo Gevirol* (1868). He edited *Kerem Hemed from 1854 to 1856.

[Getzel Kressel]

SACHSENHAUSEN-ORANIENBURG, Nazi concentration camp near Berlin, opened in 1936. It served as the chief concentration camp for Berlin. The first German-Jewish prisoners arrived in Sachsenhausen-Oranienburg in June 1938. The camp was built in the area of the Inspectorate of Concentration Camps on the outskirts of Oranienburg. After the November pogroms known as **Kristallnacht*, *Himmler ordered the deportation of Jewish men age 16–60 to concentration camps and 10,000 Jews from Berlin, Hamburg, Mecklenburg, and Pomerania were interned there. Subsequently, the majority of them were released if they could prove that they were able to leave Germany (i.e., if they possessed emigration papers). At that point the forced emigration of Jews was German policy. At the outbreak of World War II, thousands of political suspects and stateless or Polish Jews were imprisoned in the camp. Conditions worsened. Disease, starvation, exhaustion,

exposure, and abuse claimed many lives. During the war prisoners arrived from all over Europe. Twelve hundred Polish prisoners were sent to Sachsenhausen in 1940 from Pawiak prison in Warsaw, among them 60 Polish priests, as an essential part of the German plan to destroy the elite of Polish non-Jewish society and to make the Poles a subservient people. In the fall of 1941, 1,800 Soviet prisoners of war were shot there; afterwards thousands more were either shot or killed by phenol injection. Some 13,000 Soviet POWs were killed in all. A Nazi-directed counterfeiting operation was set up in the camp by an SS man, Bernhard Krueger. He employed 140 Jews in forging British currency as well as stamps, passports, identity documents, secret credentials, false code books, etc. Nearly all these Jews survived, in part because of their unique skills. In October 1942 all the Jewish prisoners, except those employed in the counterfeit operation, were transferred to *Auschwitz. Jewish prisoners were sent back beginning in the summer of 1944. The camp supplied slave labor for the German armament industry and housed several factories. In 1944 after the Warsaw Uprising (not to be confused with the 1943 Warsaw Ghetto Uprising) 3,500 Poles were sent to Sachsenhausen. There was a gas chamber in Sachsenhausen but it was used only under special circumstances. As in other camps, the prisoners also served as human guinea pigs for pseudo-medical experiments. In mid-January 1945 there were 65,000 prisoners, including 13,000 women, in the overpopulated camp. In the latter half of April 1945, the SS evacuated the bulk of the inmates on a death march. Those who endured the march were liberated by the Red Army near Schwerin, Germany. Of the total of 140,000 inmates who were sent to this camp, at least 30,000 died there. The number may actually have been much larger.

A Soviet Military Tribunal tried 16 former SS guards from Sachsenhausen in late October 1947. One year later all were convicted. Fourteen were sentenced to life imprisonment and two received 15-year sentences.

In postwar East Germany, the camp became a hodge-podge of would-be memorials, a virtual lesson in how not to preserve an authentic site. Since the reunification of Germany, efforts have been made to rectify the situation. The task is ongoing and Herculean.

SACK, BENJAMIN G. (1889–1967), Canadian journalist and historian. Born in the Kovno region of Lithuania, in 1905 Sack and members of his family joined his father, already in Montreal. Sack received some traditional education, but was for the most part an autodidact who overcame poverty and muscular dystrophy to learn Russian and English while still in Europe, and French and various secular subjects in Canada. With the encouragement of his older brother, Sack began writing po-

etry and drama in Hebrew and Yiddish. In 1907 Sack began a 50-year relationship with the Montreal Yiddish daily the *Keneder Adler*. He served as editor-in-chief in 1914–16, and again in 1922–28, and as associate editor from 1929 until his retirement. Sack wrote some 5,000 articles on subjects ranging from local news to literature, published for the most part in the *Adler*, although some of his articles also appeared elsewhere in the Yiddish and English press.

From his early days on the *Adler*, Sack was drawn to Canadian Jewish history, an area that was virtually untouched and in which he would become a pioneer. Drawing on material in archives, discussions and correspondence with informants, occasionally using sources in private hands that no longer survive, as well as consulting the Jewish and non-Jewish press, Sack produced a substantial survey of Canadian Jewish history in A.D. Hart's *The Jew in Canada* (1926). Another noteworthy achievement was the publication of the first volume of what was to be a two-volume study of Canadian Jewish history. It was published first in English in 1945 as *History of the Jews in Canada: From the Earliest Beginnings to the Present Day* and in Yiddish in 1948 as *Geshikhte fun Yidn in Kanade*. He never completed volume two, but the English translation of his unfinished manuscript has been published as *Canadian Jews – Early in this Century* (Montreal, 1975). Sack also served as a contributing editor for the *Universal Jewish Encyclopedia*. In his *History* and other historical writings, Sack could be over-enthusiastic in his celebration of certain Jewish heroes, and he certainly wanted to demonstrate to Jews and non-Jews alike the positive contributions of Jews to Canadian history, even reaching back to New France when no Jews lived there. For all their shortcomings, Sack's publications, both his journalism and historical efforts, rank among the most important bodies of work in Canadian Jewish nonfiction.

SACKLER, HARRY (1883–1974), U.S. Hebrew and Yiddish author. Born in Bohorodczany (Bogorodchany), Galicia, Sackler emigrated to the United States in 1902. An attorney by profession, he served as secretary of the *Kehillah* in New York City (1917–18); member of the staff of the Zionist Organization of America (1918–23); administrative secretary of the Jewish Education Association (1923–26); executive secretary of the Brooklyn Jewish Community Council (1940–44); and member of the executive staff of the Joint Distribution Committee (1945–55) in whose public relations office he later served. After his retirement in 1955 he devoted himself entirely to his writing.

The most eminent exponent of historicism in Hebrew letters in the United States, Sackler, a prolific writer, endeavored

to fathom the mystery of Jewish existence. In story, novel, play, and essay he recreated a panorama of Jewry throughout the ages, and asserted, above all, the strength and the innocence of Judaism's spiritual leaders. His themes are drawn from remote times, e.g., the patriarchal period and the conquest of Jericho, and from recent times, e.g., the lot of the immigrant in the United States. Messianic and Hasidic innovations intrigued his imagination. He wrote mainly in Hebrew and Yiddish. *Festival at Meron* (1935), however, his best novel, was published in English. It depicts the period of the *Bar Kokhba revolt and is almost pure fiction, since the primary sources are sparse. Its central figure is the paradoxical and fascinating *Simeon b. Yoḥai.

Sackler's other works include the novels *U-Sefor ha-Kokhavim* (1961), about the patriarch Abraham; *Bein Erez ve-Shamayim* (1964); *Sefer ha-Mahazot* (1943), and *Masakh u-Masekhot*, various plays (1964); the autobiographical *Sof Pasuk* (1966); and, in Yiddish, *Dramen fun H. Sackler* (4 vols., 1925–28).

[Eisig Silberschlag]

SACKS, JONATHAN HENRY (1948–), chief rabbi of the British Commonwealth, from 1991. Born in London, Sacks combined brilliant success in secular studies with his Jewish education. He obtained a doctorate in moral philosophy at London University in 1981 and was ordained from both Jews' College and Yeshivat Etz Hayyim in London, in 1976. After lecturing in moral philosophy at Middlesex Polytechnic, he taught Jewish philosophy and Talmud at Jews' College from 1973 to 1982 and served as the college's principal from 1984 to 1990. Simultaneously he was rabbi of Golders Green Synagogue, 1978–82, and Marble Arch Synagogue, 1983–90. He edited *Tradition and Transition* (1986) and *Traditional Alternatives* (1989), which stemmed from a major conference on contemporary Judaism that he convened in 1989. It was followed in 1990 by a gathering focused on women in Judaism.

A frequent radio broadcaster, Rabbi Dr. Sacks delivered the prestigious Reith Lectures in 1990, subsequently published to wide acclaim as *The Persistence of Faith* (1991). He also published *Tradition in an Untraditional Age* (1991) and *Covenant and Crisis: Jewish Thought after the Holocaust* (1992). His broadcasts and publications established the new chief rabbi as a popular representative of Judaism, although this has not been matched by uniform acceptance among British Jews. He created controversy in 1985 with a pamphlet on Jewish attitudes to wealth and poverty, issued by the right-wing Social Affairs Unit.

His scope for initiative in office was limited by a financial crisis in the United Synagogue and the polarization of Anglo-

Jewry. He disappointed Progressive Jews by declining to participate in a radio discussion if a Reform rabbi was included. He inaugurated an unprecedented review of the position of women in the United Synagogue, but his decision to permit women's prayer groups only outside the synagogue, and without use of a Scroll of the Law, was considered a conservative compromise. Popular hostility to the recognition of homosexuals within communal life led him to sanction their exclusion from a fund-raising event, dismayed liberal opinion. These controversies overshadowed his achievements in promoting Jewish learning under the banner "Decade of Renewal."

[David Cesarani]

SACKUR, OTTO (1880–1914), German physical chemist, born Breslau. Sackur was professor of physical chemistry, University of Breslau (1911), and departmental head in the Kaiser Wilhelm Institute for Physical Chemistry, Berlin-Dahlem (1914). He died as a result of an explosion in his laboratory. He wrote *Die chemische Affinität und ihre Messung* (1908) and *Lehrbuch der Thermochemie und der Thermodynamik* (1912; *Text of Thermochemistry and Thermodynamics*, 1917).

SACRAMENTO, capital of California, 90 miles N.E. of San Francisco in the Central Valley; Jewish population (2005) 25,000. Jewish settlement in Sacramento began in 1849 with the arrival of merchants who catered to the local trade and supplied goods for resale during the Gold Rush. One such merchant, David Lubin, opened a clothing store with his half brother, Harris Weinstock, in 1874, which became the Weinstock-Lubin department store (now all Macy's). By 1851, Orthodox Congregation B'nai Israel, composed of Germans and Poles, owned and occupied the first synagogue building in the state. The early rabbis of the congregation conducted services locally and in interior mining towns. The members of the community founded men's and ladies' Hebrew benevolent societies. The B'nai B'rith Lodge, organized in 1859, is the second oldest in California. In 1895 Congregation B'nai Israel became Reform. In 1916, 150 Jewish families lived in Sacramento. About 1912 East European Jews organized the Mosaic Law Congregation, which became Conservative in about 1947. In 2005 Jews were engaged in all occupations and professions, well integrated into the social, cultural, and political activities in the city. The State Legislature meets annually and has a number of Jewish members; many Jews are employed in the state civil service. The existence of many high tech companies provides jobs for both local Jewry and itinerant Israelis.

Jewish life is organized around the synagogues, which include Reform, Conservative and Orthodox. Each congregation has a religious school, although the Jewish community high school, Yachad, is run by the Jewish Federation of the Sacramento Region. There is one Jewish day school, Shalom School; a Jewish social service agency, Jewish Family Service; and a Hillel for California State University, Sacramento, and the University of California, Davis. For the observant, there is a *mikveh*, a kosher store, and a number of kosher caterers.

There is a Jewish cemetery, Home of Peace, in addition to designated areas in other cemeteries. In terms of cultural events, there is a Jewish film festival, Jewish food fair, and community-wide observances of Yom ha-Sho'ah, Hanukkah, Israel Independence Day, and other Jewish holidays. In addition to the Jewish Federation, there are local chapters of many national Jewish organizations.

In 1998, the Sacramento Jewish community experienced a major antisemitic attack when three area synagogues were firebombed in one night. As is customary in the United States, the general community turned out in full force and supported the Jewish community as more than 4,500 people attended a memorial gathering. The perpetrators were convicted and sentenced for their crimes, which included murdering a gay couple in addition to the arsons.

Prominent Jewish elected officials include former Sacramento Mayor Anne Rudin, former Assemblyman Darrell Steinberg, Sacramento City Councilman Steve Cohn, and Sacramento Municipal Utility District members Peter Keat and Bill Slaton.

[Robert E. Levinson / Kathleen Kahl (2nd ed.)]

SACRIFICE.

IN THE BIBLE

In the Bible various verbs are used to designate the act of sacrifice. Two of them, שָׁחַט and טָבַח, are used for the slaughter of animals for both secular (cf. Gen. 43:16; Num. 11:22) and sacred purposes, while the verbs זָבַח (hence the name of the talmudic treatise *Zevahim*, dealing only with the slaughter of animals for sacrifice, as distinct from *Hullin*, which deals with slaughter for food), העֲלֶה and הִקְרִיב are only used for sacrifice. The last word, as does its cognate noun *korban*, expresses the idea "to bring near."

Although libation of wine and meal offerings played a prominent role in the rituals, the most important sacrifices were those of animals. The surrender of a living thing was a major factor in nearly every kind of sacrificial ritual; that life was being forfeited was signified by the extraction of an animal's blood: "For the life of the flesh is in the blood; and I have given it for you upon the altar to make atonement for your souls; for it is the blood that makes atonement, by reason of the life [that is in it]" (Lev. 17:11). The people were therefore forbidden to eat the blood (Lev. 17:10; also Gen. 9:4; Lev. 3:17; 7:26; Deut. 12:16, 23; 15:23), since life belonged only to God. The offering had to be the property of the person making the sacrifice (Lev. 1:2). Only domesticated animals raised for the purpose of providing food were acceptable, thus excluding both wild animals and work animals (contrast the allusions to slaying an ass at Mari, ARM II No. 37. 11.5–12.4). The sacrificial animal had to be without physical blemishes, which are defined and summarized in Leviticus 22:17–25 (see *Blemish). An animal could not be offered before it was eight days old (Lev. 22:26–30).

The sacrifices can be divided into various categories: propitiatory and dedicatory offerings, meal offerings, libation of-

ferings, fellowship offerings, thanksgiving offerings, freewill offerings, and ordination offerings.

Propitiatory Offerings

Two sacrifices belong to this category, the sin offering (אתֶּחֱטֵא, *hatta't*) and the guilt offering (אֲשָׁמָה, *asham*).

SIN OFFERINGS. The sin offering was suited to the rank and circumstance of the person offering it. The high priest brought a young bull (Lev. 4:3) as did the congregation (4:14), except, apparently, when a ritual infraction was involved (Num. 15:24). A *nasi* ("ruler") brought a male goat (Lev. 4:23), and a commoner a female goat (Lev. 4:28; Num. 15:27) or a lamb (Lev. 4:32). If he was poor, he could bring two turtledoves or two young pigeons (one of the pair served as a burnt offering; Lev. 5:7), or, in extreme cases, even merely a tenth of an *ephah* of fine flour (Lev. 5:11–13; cf. Heb. 9:22).

The offerer executed the symbolic act of laying his hand on the offering (Lev. 4:4, and passim), thus identifying it with himself. The animal was slain on the north side of the altar (Lev. 4:24, 29; 1:11). The high priest collected the blood of his own, or of the congregation's sacrifice, in order to sprinkle some before the veil and some on the horns of the incense altar there (Lev. 4:5–7, 16–18). On the Day of Atonement he took his and the people's sacrificial blood into the Holy of Holies (Lev. 16:14–15). From all the other animals the blood was applied to the horns of the altar of burnt offering (Lev. 4:18, et al.); that of the birds was sprinkled on the side of the altar (Lev. 5:9). The remaining blood was poured or drained out at the base of the altar (Lev. 4:7, and passim). The choice parts of the entrails – the fatty tissue (בֶּלֶן, *helev*) over and on the entrails, the two kidneys and their fat, and the appendage to the liver – were all consumed on the altar (Lev. 4:8–10, and passim). In the case of a bull for the priest or the people, the carcass and the remaining entrails were disposed of by burning outside the camp (Lev. 4:11–12, 21). This rule prevailed for the bull in the ordination rites of Aaron and his sons (Ex. 29:10–14; Lev. 8:14–17). Otherwise the priest received the edible flesh for food; it was to be eaten within the sacred precincts, and very strict rules of ritual purity governed its handling (Lev. 6:25–30; cf. 10:16–20).

A sin offering of one male goat was required at each of the sacred festivals: the New Moon (Num. 28:15), each day of Passover (Num. 25:22–24), Shavuot (Num. 28:30), Rosh Ha-Shanah (Num. 29:5), the Day of Atonement (Num. 29:11; besides the special sin offerings for that day), and each day of Sukkot (29:16, 19, and passim). The high priest brought a bull for himself and then offered one of the two goats on the *Day of Atonement. Rites of purification called for lesser sin offerings, lambs or birds, after childbirth (Lev. 12:6–8), leprosy (Lev. 14:12–14, 19, 22, 31), unclean issues and hemorrhages (Lev. 15:15, 30), or defilement during the period of a Nazirite vow (Num. 6:10–11; for the strictly individual cases requiring sin offerings see below).

GUILT OFFERINGS. The guilt offering (Lev. 5:14; 7:1–7) was a special kind of sin offering (cf. Lev. 5:7) required when

someone had been denied his rightful due; in addition to the reparation of the amount defrauded, plus a fine of 20% (Lev. 5:16–24), the guilty person had to bring a guilt offering. The animal prescribed was usually a ram (Lev. 5:15, 18; 19:21); the leper after cleansing and the defiled Nazirite brought a male lamb (Lev. 14:12, 21; Num. 6:12). The offerer's part in the ritual was probably identical to his part in the sin offering, but the priest sprinkled the blood around the altar (Lev. 7:2). The choice entrails were consumed on the altar as usual (Lev. 7:3–5). In the case of the cleansed leper, some of the blood was then applied to the tip of his (the leper's) right ear, thumb, and big toe (Lev. 14:14). As with the sin offering, the animal went to the priest as food (Lev. 7:6–7; 14:13). Ritual infractions, such as eating unlawfully of the "holy things" (Lev. 5:14–19; 22:14), required payment of the sum (or commodity) that had rightfully belonged to God, plus one-fifth of the amount concerned, and the fine was given to the priest (Lev. 5:16; 11 Kings 12:17). The case of the leper can be assigned to this category, in that the Lord was deprived of the service due from the infected person so long as his disease kept him outside the pale of the ritually clean society (Lev. 14:12–18). Likewise, the Nazirite who became defiled during the course of his period of Nazirite separation had to bring a guilt offering in reparation for what he had pledged and not fulfilled (Num. 6:12).

On the social plane, swearing falsely with regard to violation of property rights through fraud could be atoned for only by the guilt offering and a 20% fine. Such acts included cheating in matters of deposit or security, robbery or oppression, denying the finding of lost property, or failing to testify (Lev. 5:20–25). Seduction of a betrothed slave girl (Lev. 19:20–22) was also a violation of property rights. In every case the guilty party had to confess his sin, make full restitution plus the fine of one-fifth, and offer the guilt offering. If the offended party was no longer alive and there were no surviving kinsmen, the payment went to the priests (Num. 5:5–10).

Dedicatory Offerings

The offerings in this category reflect the more universal idea of offering. The emphasis is on surrender of the gift to God (though only a handful of the meal offering was consumed on the altar). They represented the act of committal that should follow the repentance expressed by the sin and guilt offerings, thus opening the way to the fellowship or communal sacrifices that could follow.

Burnt Offerings

Burnt offerings (Heb. עֹלָה *olah*, "that which goes up") are referred to in Lev. 1:3–17; 6:1–6). The burnt offering consisted of a bull (Lev. 1:3–5), a sheep or goat (Lev. 1:10), or a bird (Lev. 1:14). The offerer brought the animal, laid his hand on it, and slaughtered it on the north side of the altar (Lev. 1:3–5, 11); the bird was then handed over to the priest (Lev. 1:15). The priest collected the blood, presented it before the Lord, and sprinkled it around the altar (Lev. 4:5, 11). In the case of a bird, he killed it by pinching the back of its neck and drained the blood out

on the side of the altar (Lev. 1:15). There was emphasis on the flaying and dissection of the animal, the washing of its unclean parts, and the careful arrangement of all the pieces (except the crop and feathers of the bird) on the altar (Lev. 1:6–9, 12–13). The consumption of the whole was meant as *re'ah niho'ah* (“a pleasing odor”) to the Lord. Only the hide was given to the priest (Lev. 7:8). The main administrative concern was for constant maintenance of the fire (thus the need for an uninterrupted supply of fuel) and the proper attire of the officiating priest during the ritual of renewing the fire each morning (Lev. 6:1–6). The burnt offerings were by far the most frequent sacrifices at the Israelite sanctuary.

The continual burnt offering (עֹלָה, עֹלֹת תָּמִיד, *olah, olat* (*ha-*) *tamid*, or simply *ha-tamid*) was made twice daily – a male lamb morning and evening (Ex. 29:38–42; Num. 28:18, and *passim*). The entire procedure for the morning sacrifice is vividly described in the Mishnah (*Tamid*; see sacrifices during the Second Temple period below). Two additional lambs were offered each Sabbath (Num. 28:9–10). No sin offerings accompanied these sacrifices. On the other hand, a sin offering of one goat was required along with the burnt offerings on the other holy days. On the New Moon, two young bulls, one ram, and seven male lambs were sacrificed (Num. 28:11–14). The same number of animals was required for each day of the Passover (Num. 28:19–24) and again on Shavuot (Num. 28:26–29). For Rosh Ha-Shanah and the Day of Atonement the standard was one bull, one ram, and seven lambs (Num. 29:2–4, 8), besides the special burnt offerings for the atonement ritual itself, which consisted of one ram for the high priest and one for the people (Lev. 16:3, 5, 24). The last of the annual festivals, Sukkot, was marked by a series of elaborate burnt offerings (plus one goat per day as a sin offering). On the first day the regulations called for 13 young bulls, two rams, and 14 male lambs (Num. 29:12–16). Each day thereafter the number of bulls was decreased by one until on the seventh day there were only seven (the number of rams and lambs remained the same; Num. 29:17–34). The eighth day saw a return to the amounts designated for Rosh Ha-Shanah and the Day of Atonement, i.e., one bull, one ram, and seven lambs (Num. 29:35–38; for the associated meal and drink offerings, cf. below). Various purification rituals also called for burnt offerings as well as sin offerings: after childbirth (Lev. 12:6–8), unclean issues (Lev. 15:14–15) and hemorrhages (Lev. 15:29–30), or after defilement during a Nazirite vow (Num. 6:10–11). Meal offerings were offered only for the cleansing from leprosy (Lev. 14:10, 19–20, 22, 31) and the completion of a Nazirite vow (Num. 6:14, 16). The burnt offerings, signifying complete surrender to God, were therefore associated with sin offerings in the process of atonement (as in the purification rites above; cf. also II Chron.).

Meal Offerings (Lev. 2; 6:7–16).

A regular concomitant of the animal sacrifices was the meal offering (מִנְחָה, *minḥah*). Outside the ritual codes the term *minḥah* could refer to any gift or offering, including animals

(Gen. 4:3–5; Judg. 6:18; I Sam 2:17), but in prescriptive texts it signifies a concoction of fine flour (*solet*), oil (*shemen*), and frankincense (*levonah*). Its form could be baked loaves (*hallot*), wafers (*rekikim*), or morsels (*pittim*); the offerings of firstfruits (*bikkurim*) were to be “crushed new grain from fresh ears” (Lev. 2:14). No leaven or honey was permitted (Lev. 2:11) on the cakes being offered, though those commodities were acceptable as a firstfruits offering (Lev. 2:12), in which case they went to the priests. The offerer was responsible for bringing the prepared loaves or wafers, etc. to the sanctuary. The priest burned one handful on the altar as its “invocation” (*azkarah*; Lev. 2:2 et al.), and the rest was his to eat (Lev. 6:9; 7:9). When the priest offered a meal offering for himself, it was wholly burnt on the altar (Lev. 46:15–16).

The meal offering normally accompanied every burnt offering, especially those in the sacred calendar (Num. 28–29, *passim*). The quantities were fixed according to the animal being sacrificed: three-tenths of an *ephah* and one-half *hin* of oil for a bull, two-tenths *ephah* and one-third *hin* for a ram, and one-tenth *ephah* plus one-fourth *hin* for a lamb (Num. 15:2–10). Other joyous occasions included the cleansing of a leper (Lev. 14:10, 20, 21, 31) and the successful consummation of a Nazirite vow (Num. 6:15, 19). That no meal offering accompanied the rites for cleansing after childbirth (Lev. 12:6–8), unclean issues (Lev. 15:14–15), or hemorrhages (Lev. 15:29, 30) may be accounted for by the fact that sacrifices of a more somber nature were intentionally made without a meal offering. On the other hand, peace offerings were always accompanied by such offerings (Lev. 7:12–14; Num. 15:4). One of each from the cakes and wafers went to the priest. The rest was to be eaten with the flesh of the sacrificial animal. Wheat flour was used for the meal offering, the only exception being the one-tenth of an *ephah* of barley meal required in the jealousy ritual; it was to have no oil or frankincense (Num. 5:15, 18, 25–26). A very poor person could bring one-tenth of an *ephah* of fine flour, also without oil or frankincense, as a sin offering (Lev. 5:11–13).

Libation Offerings (נֶסֶךְ, *nesekh*)

A libation normally accompanied burnt and peace offerings (Num. 15:1–10); the standard was one-fourth of a *hin* of wine for a lamb, one-third for a ram, and one-half for a bull. The expression “strong drink” (שֶׁכָר, *shekhar*), used with reference to the drink offering (Num. 28:7), is apparently only a synonym for wine (Ex. 29:40). The libation was considered an additional “pleasing odor” offering (Num. 15:7). As with the burnt offering, all was expended and nothing was given to the priest; the entire libation was poured out in the sanctuary (Num. 28:7). Drink offerings are specifically mentioned with the daily offering (Ex. 29:40–41; Num. 28:7) and with the offerings for the Sabbath (Num. 28:9) and the New Moon (Num. 28:14). Likewise, reference is made to them in connection with the days following Shavuot (Num. 29:18, 21, 24, 27, 30, 33, 37). The same may hold true for the Passover, firstfruits, and Rosh Ha-Shanah rituals (Num. 28:16–29; 11; cf. Ezek. 45:17). A libation

was specified for the Nazirite's concluding rites (Num. 6:17), but not for the cleansing of the leper (Lev. 14:10–20). It never accompanied a sin or guilt offering alone.

Fellowship Offerings

This category consists of those offerings that expressed a voluntary desire on the part of the offerer. They were not required (except in the case of the Nazirite – Num. 6:17 – and Shavuot – Lev. 23:19–20) by explicit regulations, but were permitted on condition that the offerer had met with the requirements of expiation and consecration. Burnt offerings could accompany these sacrifices as an additional expression of devotion (cf. above).

Peace Offerings

The term “peace offerings” (the singular שְׁלֵמִים, *shelem*, occurs only in Amos 5:22, otherwise pl. שְׁלָמִים, *shelamim*; Lev. 3:7:11–36). This is the basic sacrifice of all communal offerings; the others are simply different types of the peace offering. In terms of “holiness,” i.e., restrictedness, they were not so strictly defined as those discussed above. Any domesticated animal from the herd or flock, male or female (Lev. 3:1, 6, 12), was permissible. The usual rules of freedom from blemishes were in force. Unleavened cakes were also stipulated, at least for the thanksgiving (Lev. 7:12–13) and Nazirite offerings (Num. 6:15, 17, 19; see below). The presentation and laying on of the hand were the same as for other offerings, but instead of the animal being slaughtered on the north side of the altar, it was done at the door of the sanctuary, i.e., to the outer court (Lev. 3:1–2, 7–8, 12–13). The priest collected the blood and threw it against the altar as with the burnt offering (Lev. 3:2, 8, 13). The choice entrails were burnt for a “pleasing odor” (Lev. 3:3–5, 6–11 (including the fat tail of the sheep), 14–16 (cf. Lev. 7:22–25); 7:30–31). Certain portions of the offering were allotted to the priest; he was permitted to eat it in any ritually clean place and to share it with his family (Lev. 7:14 and 30–36), whereas the other sacrifices had to be eaten in the sanctuary compound (Num. 18:10–11). He received one of the cakes and the breast as a wave offering (cf. below), and the right thigh as a “contribution” from the offerer. This latter is the so-called heave offering; the technical term used, *terumah* (תְּרוּמָה), though developed from the root signifying “to be high” and meaning “that which is lifted up,” did not represent a special type of presentation ceremony (in contrast to the wave offering, below).

Every peace offering culminated in a communal meal. Except for the portions burned on the altar or assigned to the priest, the sacrificial animal was given to the offerer. He used it as food for a communal meal for himself, his family, and also the levite in his community (Deut. 12:12, 18–19). This had to take place at the divinely appointed sanctuary (Deut. 12:6–7, 11–12, 15–19, 26; cf. I Sam 1:3–4), and very strict rules of purity had to be observed by the participants (Lev. 7:19–21). The meat of a thanksgiving offering had to be eaten on the same day as the sacrifice (Lev. 7:15), while that of the votive or freewill offerings could be finished off on the next

day (Lev. 7:16–18). Whatever was left over from either kind had to be burned within a specific time. The peace offering was only specified in three instances, i.e., in the celebration of Shavuot (Lev. 23:19–20), in the ritual for completion of a Nazirite vow (Num. 6:17–20), and at the installation of the priesthood (cf. the ordination offering, below). Other public ritual occasions included the inauguration of the Tent of Meeting (Lev. 9:8–21) and of the Temple (I Kings 8:63; II Chron. 7:7). National events that called forth the peace offering were: successful conclusion of a military campaign (I Sam 11:15), cessation of famine or pestilence (II Sam 24:25), acclamation of a candidate for kingship (I Kings 1:9, 19), or a time of national spiritual renewal (II Chron. 29:31–36). At the local level, they were sacrificed for the annual family reunion (I Sam 20:6) or other festive events, such as the harvesting of the firstfruits (I Sam. 9:11–13, 22–24; 16:4–5).

THANKSGIVING OFFERINGS (תְּנוּפָה), ZEVAH (חַטֹּאתֵינוּ). The most frequently mentioned type of peace offering was the thanksgiving offering (Lev. 7:12–13, 15; 22:29) for blessings already bestowed (Ps. 56:13–14; 107:22; 116:17; Jer. 33:11). In many contexts the term thanksgiving offering is used as the virtual synonym for peace offering (e.g., II Chron. 29:31; Jer. 17:26; cf. II Chron. 33:16).

Wave Offerings (תְּנוּפָה, *tenufah*)

The priest's portion of the peace offering (cf. above) was “waved” before the Lord as a special act signifying that it was His. Then it went to the officiant as his personal share. This is reminiscent of the presentation of the ceremonial food to the Mesopotamian deity, after which it was given to the king. The basic difference seems to be that there the deity was considered to have partaken of the food and added his “radiance” to it, while in Israel the priest ate the divine portion as God's representative, thus showing that the offerer's food was being shared by Him. The same technical term was applied to offerings other than the communal sacrifices: the precious metals given for construction of the sacred artifacts (Ex. 35:22; 38:29), the guilt offering of the cleansed leper (Lev. 14:12, 21, 24), the sheaf of firstfruits (Lev. 23:15), the two loaves at Shavuot (Lev. 23:17, 20), and the levites themselves (Num. 8:11, 13, 15, 21).

Votive Offerings (נֶדֶב, *neder*)

This was usually a peace offering, and the flesh could be eaten on the second day but not the third (Lev. 7:16–17); but it could also be a burnt offering (Lev. 22:17–20). A specific example was the vow of a Nazirite which was consummated by a peace offering (Num. 6:17–20). In the broadest sense the vow included any kind of offerings or gifts promised to the Lord (Num. 30, *passim*).

Freewill Offerings (נְדָבָה, *nedavah*)

The minimum offering that one could bring to the holy convocations that took place on the three Pilgrim Festivals (II Chron. 35:8; Ezra 3:5) was the freewill offering (Lev. 7:16; 22:18, 21, 23; Num. 15:3; 29:39; Deut. 12:6, 17). Like the votive offering, it could be a burnt as well as a peace offering (Lev.

22:17–24; Ezek. 46:12), and if it were the latter, the flesh could be consumed on the second day but had to be burned before the third (Lev. 7:16–17).

Ordination Offerings (מִלּוּ'יִם, *millu'im*)

The Septuagint interprets this sacrifice as one of “completion,” or “perfection”; however, the same Hebrew term is used with regard to the “settings” of precious stones (Ex. 25:7; 35:9, 27; 1 Chron. 29:2), so perhaps the modern expression “installation” is more suitable. The ordination offering was intimately related to the concept of “filling the hand” (מִלֵּא יָד, *mille' yad*), which meant consecrating someone, or oneself, to divine service (Ex. 28:41; 29 passim; cf. Ex. 32:29, et al.), and it required a state of ritual purity and spiritual devotion (11 Chron. 29:31). The details of the ritual are spelled out in a prescriptive (Ex. 29:19–34) and a narrative-descriptive (Lev. 8:22–32) text. Moses appears in the role of the officiant, since Aaron and his sons were obviously not qualified to serve in their own ordination. He brought the ram of consecration and the priests laid their hands on it. Then Moses slew it and handled the blood in a special manner. It was applied by him to the tip of the right ear, thumb, and big toe of Aaron and of each of his sons; then the rest was thrown about the altar. The waving of this offering was also unique in its execution: the choice entrails, three of the accompanying cakes, and the right thigh were all placed in the hands of the candidates for priesthood and waved before the Lord; then they were all consumed together on the altar as a “pleasing odor.” Though Moses did not receive the thigh, he was granted the breast, which he waved himself and took as his portion. Finally, the anointing oil mixed with blood from the altar was sprinkled upon the candidates and their garments. They were thus prepared to eat the remaining flesh of the ordination offering, which they had to boil at the entrance to the sanctuary. Like the votive offering, none was allowed to remain to the following day.

IN BIBLICAL TRADITION AND HISTORY

Age of the Patriarchs

The terminology used with regard to the patriarchal age is that of the Torah as a whole; it is unlikely that the same words in Genesis mean something different in the other Books of Moses. Thus, Cain and Abel each brought a “gift” (*minhah*; Gen. 4:4f.), which was usually of a cereal nature, as brought by Cain (Lev. 2, et al.), but could also refer to an animal offering (1 Sam. 2:17; 26:19). Noah offered up a burnt offering (*olah*; Gen. 8:20 ff.) and the pleasing odor of the sacrifice is stressed. Job is also depicted as making burnt offerings periodically (Job 1:5) and for specific purposes (Job 42:7–9). The Patriarchs normally are said to have “called on the name of the Lord,” e.g., Abraham (Gen. 12:8, 13–4; 21:33) and Isaac (Gen. 26:25). The association of this phrase with the building of an altar shows that it refers to the approach to God through sacrifice. With Jacob the naming of the specific altar is stressed (Gen. 33:20; 35:7). Once Abraham is said to have offered an *'olah* (Gen. 22:13), but Jacob (Gen. 31:54; 46:1) offered *zevachim*.

The most unusual sacrifices described in Genesis are the covenant ritual with the divided carcasses (Gen. 15:4ff.) and the almost consummated sacrifice of Isaac (Gen. 22; see **Akedah*).

From Moses to Samuel

The covenant sacrifice inaugurating the relationship between the Lord and His people (Ex. 24:3–8) is not paralleled by specific rituals in the Mosaic liturgy. Burnt and peace offerings were first offered, and then the blood from them (not from a sin offering) was thrown half against the altar and half upon the people. In the land of Canaan the Israelites made sacrifices at various places, e.g., at Bochim (Judg. 2:1–5) and Ophrah (Judg. 6:24–26). The human sacrifice of Jephthah's daughter (Judg. 11:30–40) was hardly normative; instead it is pointed out as evidence of Israel's sad spiritual state at that time. The main center for sacrificial ritual was at Shiloh (1 Sam 1:3ff.), where faithful Israelites came for an annual festive offering. That the ritual there was highly developed and detailed is proven by the explicit description of malpractice on the part of Eli's sons (1 Sam 2:13–17) in taking their portion of the meat before the entrails were burned. However, Shiloh was not the only legitimate place of sacrifice; others included Beth-Shemesh (1 Sam 6:14–15), Mizpah (1 Sam 7:9), Ramah (1 Sam. 7:17; 9:11–24), and Gilgal (1 Sam. 10:8; 11:15; 13:9). Family and clan sacrifices were commonplace (1 Sam. 16:2–5).

THE MONARCHY. Under Saul the main center of worship was evidently Nob (1 Sam. 21:1ff.), though private offerings were made at Shiloh (11 Sam. 15:12). Saul and David's families made peace offerings and held family feasts at the time of the New Moon (1 Sam. 20:5, 24–25). David inaugurated a new cult center in Jerusalem at the threshing floor of Araunah (Ornan; 1 Chron. 21:23–26), to which he moved the Ark (11 Sam. 6:17–18; 1 Chron. 16:2, 40). The horned altar had been located at Gibeon (11 Chron. 1:3; 1 Chron. 21:29) but was soon moved to Jerusalem (1 Chron. 22:1). David is credited with a complete reorganization of the ritual and the attendant personnel (1 Chron. 23:28–31).

With the dedication of Solomon's Temple, Jerusalem became the main focus of sacrificial ritual (1 Kings 8:5, 62–65; 11 Chron. 5:6; 7:4–8). Nevertheless, high places continued in use locally (1 Kings 13:2ff.; 18:30–32; 11 Kings 14:4; 15:4, 35; et al.). Jeroboam I of the northern kingdom established shrines at Dan and Bethel (1 Kings 12:28–29); besides these famous sites in Israel, Beer-Sheba may have enjoyed a similar status in Judah (Amos 5:5). Various references show that sacrifices were offered regularly at Jerusalem (11 Chron. 13:10–11; 23:18; 24:14; 11 Kings 12:5–17; 16:13–15). Sacrificing on the high places was also tolerated in Judah (11 Chron. 15:17; 20:33); Hezekiah abolished many of them (11 Kings 18:4) and seems to have reconstituted the Temple as a sacrificial center (11 Chron. 29:21–35; 32:12; cf. above). The high places returned under Manasseh (11 Chron. 33:3–4) and were again removed by Josiah (11 Chron. 34:3–13).

The Return to Zion

Offerings were reconstituted soon after the return (Ezra 3:2–7), and when Darius authorized the building of the Temple, he ordered that provisions be furnished for the cultus (Ezra 6:9–10). Henceforth, the Second Temple became the sole center for Judean sacrificial ritual (Ezra 6:17; 7:17; 8:35; 10:19; Neh. 10:33–37; 13:5, 9). At Elephantine in Egypt, a colony of Jewish mercenaries had maintained their own temple replete with meal offerings, incense, and burnt offerings. It had been standing long before 525 B.C.E., when Cambyses invaded Egypt, and was destroyed by jealous opponents in 410. In 407 the priest and his colleagues wrote to Bagohi, the governor of Judah, as well as to Helaiah and Shelemiah, the sons of Sanballat, governor of Samaria, asking them to exert their influence toward having the ruined temple rebuilt. Though they yearn for restoration of the entire sacrificial cultus, the reply suggests that they apply to Arsames for resumption of the meal offerings and the incense, which they did (Pritchard, Texts, 492). This tendency to permit worship at local shrines, but without animal sacrifice, may be reflected in the fact that the Jewish temple at Lachish (so-called Solar Shrine) had no altar for burnt offerings, while its pre-Exilic counterpart at Arad did. The Lachish temple was evidently built in the post-Exilic period and refurbished in the Hellenistic period (probably under John Hyrcanus, late second century B.C.E.; see also Temple of *Onias).

The Prophetic and Wisdom Literature

The prophets of the First Temple period often spoke out against sacrificial ritual (Amos 5:21–27; Hos. 6:6; Micah 6:6–8; Isa. 1:11–17; Jer. 6:20; 7:21–22). Righteous and just behavior, along with obedience to the Lord, is contrasted with the conduct of rituals unaccompanied by proper ethical and moral attitudes (Amos 5:24; Micah 6:8; Isa. 1:16–17; Jer. 7:23). It has thus been assumed by many scholars that the prophets condemned all sacrificial rituals. De Vaux has shown the absurdity of such a conclusion since Isaiah 1:15 also condemns prayer. No one holds that the prophets rejected prayer; it was prayer offered without the proper moral commitment that was being denounced; the same holds true for the oracles against formal rituals. Similar allusions in the Psalms, which might be taken as a complete rejection of sacrifice (e.g., 40:7–8; 50:8–15), actually express the same concern for inner attitude as the prophets. The wisdom literature sometimes reflects the same concern for moral and ethical values over empty sacerdotal acts (Prov. 15:8; 21:3, 27).

Certain other statements by Amos (5:25) and Jeremiah (7:22) have been taken to mean that the prophets knew nothing of a ritual practice followed in the wilderness experience of Israel. De Vaux has noted that Jeremiah clearly knew Deuteronomy 12:6–14 and regarded it as the Law of Moses. The prophetic oracles against sacrifice in the desert are really saying that the original Israelite sacrificial system was not meant to be the empty, hypocritical formalism practiced by their contemporaries. The demand by Hosea for “mercy and not sacri-

fice... knowledge of God more than burnt offerings” (Hos. 6:6; cf. Matt. 9:13; 12:7) is surely to be taken as relative, a statement of priorities (cf. also 1 Sam. 15:22). The inner attitude was prerequisite to any valid ritual expression (Isa. 29:13). Foreign elements that had penetrated the Israelite sacrificial system were, of course, roundly condemned by the prophets. Such was especially the case with Israel (Amos 4:5; Hos. 2:13–15; 4:11–13; 13:2) but also in Judah (Jer. 7:17–18; Ezek. 8; et al.).

[Anson Rainey]

SECOND TEMPLE PERIOD

During the Second Temple period sacrifices were offered only in the Temple in Jerusalem, with the sole exception of the Temple of Onias in Egypt. The order of the sacrificial service in general followed that of the Bible. The only rigidly significant addition to the sacrificial order given in the Bible was the water libation on Sukkot (see below). After the sacrificial system came to an end with the destruction of the Temple, the rabbis saw in the theoretical study of the sacrifices a substitute for the actual offerings (Ta’an. 27b; Men. 110a) and devoted themselves to that study. Most of the discussion in the Mishnah and Talmud is post-Temple and is therefore largely academic. However, in the Talmud, particularly in tractate *Tamid*, full details of the sacrificial service are preserved. The fifth chapter of tractate *Zevahim* gives every detail of the places where the various sacrifices were slaughtered and eaten and the time allotted for their consumption. The rabbis divided the sacrifices into two categories: one was: *kodshei kodashim* (the “most holy”), which are so termed in the Bible (Ex. 30:10); for the others they coined the term *kodashim kalim* (“those of lesser sanctity”).

The following is a detailed account of the sacrificial system and order of service. The high points of the sacrificial service were the two daily offerings, the *tamid*, one at daybreak and the other in the afternoon, which began and concluded each day’s sacrifices. All other individual and public sacrifices were brought in between them. Although the Pentateuch does not mention any prayers which accompanied the sacrifices, liturgical additions were made during the Second Temple period. These included petitions, blessings, and readings from the Pentateuch. After the incense was offered, the priests recited the *priestly blessing as a single sentence (Tam. 7:2). Daily, the priests recited the **Shema* and its blessings, the Ten Commandments, and the *Avodah* and *Sim Shalom* blessings from the **Amidah*. On the Sabbath they added a blessing for the incoming watch of priests, the outgoing saying to the incoming, “May He who has caused His name to dwell in this house cause to dwell among you love, brotherhood, peace, and friendship” (Tam. 5:1; Ber. 12a). The levites played musical instruments and recited the daily psalm during the service (Tam. 7:4; Maim. Yad, Keli ha-Mikdash, 3:4–5). After the sacrifices, the representative *ma’amad* of Israelites prayed and read from the Pentateuch (see **Mishmarot* and *Ma’amadot*). On the Day of Atonement, the high priest read from the Torah, concluding with eight benedictions (Yoma 7:1). On the Sabbath, festivals,

and the New Moon, the additional **Musaf* sacrifice was also offered. There were also specific services for the various holidays such as the **omer* on Passover, the two wave-loaves of Shavuot, and the water-drawing ceremony of Sukkot.

Daily Service

The service began immediately after dawn, when the herald announced that “The priests should prepare for the service, the levites for song, and the Israelites for the *ma’amad*” (TJ, Shek. 5:2, 48d). The first part of the service was the removal of ashes from the altar, since sacrificial meat was consumed on it all night. Those priests desiring to do this rose early and immersed themselves before the superintendent came. He usually came around dawn, and lots were then drawn to choose the priest to remove the ashes (see **Lots*). The superintendent then took the key, opened the small door, and went from the Fire Chamber into the Temple court. The priests went in after him, carrying two lighted torches. They divided into two groups, one of which went along the portico to the east, while the other went along it to the west. They made an inspection to see whether all the vessels were in order, finally arriving at the place where the griddle cakes (Lev. 6:12–15) were made. There the two groups met and verified that all was in place. They then appointed the griddle cake maker to make the cakes, and instructed the priest who had won the lottery exactly how he was to clear away the ashes. When he had completed this task, the other priests hastened to wash their hands and feet in the laver. They then went up to the top of the altar, where they rearranged the unconsumed limbs and pieces of fat on special large blocks of wood which were brought up to the altar for that purpose. They then kindled the fire, and descended and went to the Chamber of Hewn Stone (Tam. 1:2–4; 2:1–5).

Lots were then cast to decide which of them should carry out the various duties associated with the sacrifice. A priest stationed on a roof would announce that the first light of dawn had illumined the whole of the sky as far as Hebron. The silver and gold vessels for the day’s service were then arranged, and the sacrificial lamb which had been examined on the previous evening was again inspected by torchlight. They to whom it fell to clear the inner incense altar of ashes and to trim the candlesticks now proceeded toward the porch. The priest selected for slaughtering the *tamid* did not commence his duties before he heard the great gate that led to the sanctuary being opened. The priest who cleared the inner altar scooped up the ash in his fists and deposited it inside the ash-bin. He then swept up what was left and departed. The priest who cleaned the candlesticks entered, and if he found the two western lights burning, he trimmed the rest, leaving these two burning. If he found that they had been extinguished, he trimmed them and kindled them from those that were still alight, and then trimmed the rest (but see Maim. Yad, Temidin u-Musafin 3:13 and Rabad ad loc.). Meanwhile the lamb was slaughtered and its blood sprinkled against the altar. The portions of the sacrifice were then prepared for the altar and left on the lower half of the ascent of the altar, together with

the fine flour for the meal offering, the griddle cake offering of the high priest, and the wine for the drink offering. The priests then came down to the Chamber of Hewn Stone to recite prayers (Tam. 3:1–9; 4:1–3).

At this point the superintendent told them to pronounce one blessing, either the blessing for light or the *Ahavah Rabbah* (Ber. 11b). It was followed by the Ten Commandments, the three portions of the *Shema*, and three benedictions. These were: “True and Firm,” *Avodah*, and the concluding *Sim Shalom* blessing of the *Amidah* (Tam. 5:1). On the Sabbath a fourth blessing was added for the incoming watch of priests. On the completion of the prayers, those who had never yet offered the incense cast lots for this privilege. All the priests were, however, permitted to cast lots for the right to take the sacrificial portions from the ramp (*kevesh*) to the altar. The incense was then placed in the sanctuary by the designated priest, assisted by another priest who brought glowing coals from the outer altar to the inner altar for this offering. Afterward they struck with the *magrefah*, a gong shaped like a shovel, between the porch and the altar. It caused a reverberation so loud “that it drowned conversation in Jerusalem.” Priests would thus know that their colleagues were about to prostrate themselves and would rush to join them. Similarly, levites would hasten to join their fellow levites in the singing. All ritually unclean priests were made to stand at the eastern gate to show that it was not out of idleness that they were not serving in the Temple (Tam. 5:1–6; Rosh to 5:6).

Those who had been chosen to clear the inner altar and the candlestick led the procession back to the sanctuary. The ash-bin was removed, and only the westernmost lamp of the candlestick was left burning for the day, since from it all the lights were later kindled in the evening. The coals were then spread on the inner altar and the incense was scattered and burned by the designated priests. As each priest finished his duty, he prostrated himself and left the sanctuary. The high priest next went in and prostrated himself, followed by the other priests (Tam. 6:1–3; 7:1). While the incense was being offered, the *ma’amad* of Israelites present in the Temple also gathered together to pray. Apparently Jews outside the Temple also prayed at this time (cf. Judith 9:1).

All the priests who had completed their allotted tasks came and stood on the steps of the porch. They then pronounced the priestly blessing over the people as a single benediction, enunciating the ineffable Name of God. All apart from the high priest raised their hands above their heads during the blessing. The high priest did not raise his hands above the plate (*ziz*) on his forehead, since the Name of God was inscribed on it (Tam. 7:2; Sot. 7:6). When those assembled in the Temple heard the Divine Name pronounced, they prostrated themselves (Ecclus. 50:21; for the practice of praying daily in the Temple see Lam. R. to 3:9, no. 3). After this benediction, the limbs were lifted up to the top of the altar and thrown onto its fire, the meal offering was sacrificed, and the wine offering was poured out upon the appropriate places of the altar. Before the libation of the wine, a *teki’ah*, *teru’ah*, and *teki’ah*

(see **Shofar*) were sounded on the trumpets. During the libation, the cymbals were struck, and the levites chanted the daily psalm. At stated intervals in the psalm, a *teki'ah* was sounded and the public prostrated themselves. With the conclusion of the psalm, the service of the morning *tamid* was completed (Tam. 7:3–4; Suk. 5:5).

The offering of individual sacrifices was completed by half past the eighth hour of daylight, and the sacrifice of the concluding afternoon *tamid* then took place. It was slaughtered and offered up an hour later (Pes. 5:1). The ritual of the afternoon *tamid* resembled that of the morning lamb, except that the wood on the altar was not rearranged and the priestly blessing was not recited. Two new logs of wood were brought up by two priests to reinforce the flames (Yoma 26b). Oil was also added to the candlestick, and all seven lamps were kindled. Following the sacrifice of the afternoon *tamid*, the gates to the sanctuary and to the priestly court were closed. Nonetheless, a few priests still entered the court during the night, so that they could place the limbs from the day's sacrifices on the altar and continue to add wood to its fire (cf. Zev. 9:6; Ber. 1:1).

Sabbath Service

The sacrifices of private individuals were not offered on the Sabbath, but all work connected with the public offerings was permitted. In addition to the two *tamid* offerings, a *Musaf* sacrifice was also brought and the *shewbread set in order. After the *Musaf*, the watches of the priests were changed, although the new watch was already present for the morning *tamid* when it was blessed by the outgoing group of priests (Tosef., Suk. 4:24–25). A section of the Song of *Ha'azinu* (Deut. 32:1–43), which was divided into six portions, was recited while the *Musaf* was brought (RH 31a). The service of the new group of priests began with their arranging the new shewbread. Eight priests entered the sanctuary, two carrying the two rows of shewbread and two the two dishes of frankincense which accompanied the loaves. The other four removed the shewbread and frankincense of the previous week. Those who brought them in stood at the north side facing the south, and those who removed them stood at the south side facing north. They removed them in such a way that always one handbreadth of one overlay a handbreadth of the other, thus fulfilling "Before me always" (Ex. 25:30; Men. 11:7).

The Pilgrim Festivals

On the Pilgrim Festivals, the order of the Temple service was changed to accommodate the vast number of sacrifices which were brought. In addition to the festival's *Musaf* offering, there were also the festival peace offerings and whole offerings of those who made the pilgrimage to Jerusalem (Bezah 2:4). In contrast to the daily practice of removing the ashes from the outer altar after dawn, this altar was already cleaned before midnight. The gates to the Temple court were opened at midnight, and by dawn the courtyard was filled with Israelites (Yoma 1:8; Jos., Ant., 18:29). The gates and curtains leading to the sanctuary were also left open, so that the pilgrims

could see the Temple vessels (Yoma 54a; Jos., Ant., 3:128). For these festivals, priests from all parts of Erez Israel came to the Temple, and they all shared equally in the holiday's sacrifices and in the division of the shewbread (Suk. 5:7).

PASSOVER. The paschal lamb was unique in that it was offered by groups of Israelites rather than individuals. Between ten and twenty persons jointly brought one lamb (Pes. 64b; Jos., Wars, 6:425). To accommodate the large number of paschal sacrifices, the daily afternoon *tamid* on the eve of Passover was slaughtered at half after the seventh hour and offered up an hour later. After this, the Passover offering was brought (Pes. 5:1), and it was slaughtered in three groups. When the first group entered and filled the Temple court, its gates were closed and the *shofar* was sounded. The priests stood in rows and in their hands were basins of silver and gold. The basins were not mixed, each row being wholly silver or wholly gold. The Israelites slaughtered their own offerings and the priests caught the blood. The priest passed the basins filled with blood to fellow priests, each receiving a full basin and giving back an empty one. The priest nearest to the altar tossed the blood in one motion against the base of the altar. When the first group left, the second group came in; and when the second group was finished the third group came in. The rite was repeated for each group, and during the entire time **Hallel* was chanted by the levites (Pes. 5:5–7). After the lamb was roasted, it was eaten after nightfall by the company which brought it as part of the Passover *sefer* (Pes. 10:1–9). The size of the throng that participated in this ritual is emphasized by the Talmud, which relates that King Agrippa once took a census of the Jewish people. At his request, the high priest took a kidney from each paschal lamb, and 600,000 pairs of kidneys were counted, despite the fact that those who were unclean and on a distant journey were excluded from participating. Since there was not a single paschal lamb for which a minimum of ten people had not registered, they called it "the Passover of the dense throngs" (Pes. 64b). Josephus estimated from the number of lambs offered on the Passover before the outbreak of the Jewish War (65 C.E.) that more than 3,000,000 Jews gathered in Jerusalem for that Passover festival (Jos., Wars 2:280; cf. Wars 6:425).

The evening after the first day of Passover, preparations began for the bringing of the *Omer* on the next day. This was in accordance with the view of the Pharisees that "from the morrow after the day of rest" (Lev. 23:15) means after the first day of Passover, and not after the Sabbath that falls during Passover as the Sadducees advocated (Men. 65b–66a). The rabbis therefore insisted that the *omer* be reaped with much display to indicate that the Sadducees were mistaken in their interpretation (Men. 10:3). After the barley was reaped that evening, it was placed in baskets and brought to the Temple court. There it was prepared as fine flour, and the next day it was mixed together with oil and frankincense. A handful was removed by the officiating priest and burned on the altar, and the remainder was eaten by the priests. Soon after the *omer*

was offered, the markets of Jerusalem were full of meal and parched corn of the new produce, though the sages disapproved (Men. 10:4–5).

SHAVUOT. The two leavened wave-loaves which were brought on Shavuot (Lev. 23:16–20) were divided among all the priests present in the Temple and not confined to those of the weekly watch. The rabbis added six days to the Shavuot celebration during which the Jewish pilgrims could offer their holiday sacrifices (Ḥag. 17a–b). Beginning with this holiday, *first fruits (*bikkurim*) were brought to the Temple. The *bikkurim* procession was led by an ox which was later sacrificed as a peace offering (Bik. 3:3).

SUKKOT. Due to the large number of the Sukkot sacrifices (Num. 29:12–35), this holiday comprised eight of the 12 annual days on which the entire *Hallel* was recited and the flute played before the altar (Ar. 2:3; TJ, Suk. 5:1, 55a). On each of the seven days of the festival, a libation of water was made together with the libation of wine at the morning service (Suk. 4:1). The water was drawn in a golden flagon holding three *logs* from the pool of Siloam. It was carried to the water gate of the Temple where a *teki'ah*, *teru'ah*, and *teki'ah* were sounded on the *shofar*. The officiating priest then took it up the ramp of the altar and turned to his left, where there were two silver bowls. One was for water and the other was for wine, and both libations were poured out simultaneously (Suk. 4:9). Since this water libation is not mentioned in the Bible, the rabbis declared that it was a Mosaic law from Sinai (Zev. 110b) or an institution of the prophets (TJ, Suk. 4:1, 54b), and found homiletical justification for it in the Pentateuch itself (Shab. 103b). The water libation was offered at this time of the year “in order that the new rainy season would be blessed” (RH 16a). The Sadducees strongly opposed this innovation and totally denied its validity. The refusal of King Alexander *Yannai, Sadducean high priest (107–76 B.C.E.), to make the libation caused a bloody riot in the Temple. When he contemptuously poured the water on his feet, all those present in the Temple area pelted him with their *etrogim* (Suk. 48b; Jos., Ant., 13:372). Subsequently, the rabbis required the officiating priest to raise his hand when he poured out the water at the libation, so that it could be observed that he was properly discharging the precept (Suk. 4:9).

The New Year

The sacrifices offered on New Year followed the biblical description (Num. 29:2–6). The special New Year sacrifices were offered in addition to those of the New Moon and the two daily *tamid* sacrifices.

The Day of Atonement

For the Temple ritual on the Day of Atonement, see **Avodah*.

Sacrifices from Non-Jews

Sacrifices could be accepted from gentiles (Lev. 22:25; 1 Kings 8:41–43), and this became common during the Second Temple period. The rabbis established as the rule that “what is vowed

or freely offered is accepted of them, but what is not vowed or freely offered is not accepted of them” (Shek. 1:5). It was also ordained that, if a gentile sent a whole offering from a distant region without sending the accompanying drink offering, the latter was offered at the expense of communal funds (Shek. 7:6). Josephus records numerous instances of non-Jews sacrificing upon the altar (e.g., Jos., Ant., 13:242; 16:14), and declared that this sacred spot was “reverenced by all mankind” (Jos., Wars, 5:17). In addition to the sacrifices sent by gentiles, offerings were also made for the well-being of the non-Jewish rulers (e.g., Ezra 6:10; 1 Macc. 7:33). Sacrifices were later offered daily for the Roman emperor (Jos., Wars, 2:197), and at times the emperor himself contributed toward the cost of these sacrifices (Philo, *On the Embassy to Gaius*, 157). The destruction of Jerusalem was attributed to the refusal of the rabbis to accept an offering which contained a slight blemish, although it had been sent by the Roman emperor (Git. 56a). The revolt against Rome was signaled by the refusal of those who officiated in the Temple to sacrifice on behalf of the emperor (Jos., Wars, 2:409).

Cessation of Sacrifice

The importance which the Jews attached to sacrifice is evidenced by the fact that they continued to offer the daily *tamid* sacrifice throughout almost the entire period of the siege of Jerusalem. Despite the hardship and privations of this period and the famine which raged, the Temple service continued until the walls of the city were breached by the Romans on the 17th of Tammuz. The *tamid* sacrifice then had to be discontinued due to the lack of lambs and qualified priests within the Temple precincts (Ta'an. 4:6; Jos., Wars, 6:94). Three weeks later, on the Ninth of *Av, the Temple was destroyed by the Romans and the sacrificial system came to an end. (With regard to the question of the possibility of the reintroduction of sacrifice, and particularly the offering of the paschal lamb even after the destruction of the Temple, see *Temple Mount.)

LATER INTERPRETATIONS

Throughout the ages attempts have been made to find a spiritual meaning for the sacrificial system. The proposed explanations can be divided into three categories: the symbolic, juridical, and rational.

Symbolic

Philo devoted a treatise to the subject (*De Victimis*; see Spec. 1:112–256). He pointed out that only domesticated animals and the most gentle birds were suitable for sacrifice and that they had to be free of blemish, which he took as a symbol that the offerers must also be wholesome in body and soul. The Jew had to approach the altar with his soul purged of its passions and viciousness if the sacrifice was to be acceptable (Spec. 1:166/167, 257). The wicked would be rejected, even if they offered hundreds of sacrifices (Spec. 1:271). The rabbis stated that the sacrificial statutes indicated that God is with the persecuted. The ox is pursued by the lion, the goat by the leopard, and the lamb by the wolf. Therefore God com-

manded, “Do not offer those that persecute, but rather those that are persecuted” (Lev. R. 27:5). The requirement that fowl be offered with their feathers symbolized that a poor man was not to be despised. Therefore his offering was placed on the altar in its full adornment, despite the nauseating odor normally arising from the burning of feathers (Lev. R. 3:5). Salt, an indispensable ingredient of sacrifice, was symbolic of the moral effect of suffering, which purifies man and causes sins to be forgiven (Ber. 5a). Judah Halevi declared that the fire on the altar was kindled by the will of God, as a sign that the people found favor in His sight and that He was accepting their hospitality and offerings (Kuzari 2:26). Samson Raphael Hirsch explained that the Pentateuch required the person to lay his hands upon the head of the sacrifice to indicate that the “hands” that have become morally weakened “support” themselves on the resolution of the future betterment that is expressed by the offering (his commentary to Lev. 1:4). David Hoffmann declared that sacrifices are symbols of man’s gratitude to God and his dependence on Him, of the absolute devotion man owes to God, as well as of man’s confidence in Him (Introd. to commentary on Lev. (Heb. ed.), 64–67).

Juridical

The juridical approach is put forward by Ibn Ezra (commentary to Lev. 1:1) and to some extent by Nahmanides (commentary to Lev. 1:9). According to them, the sinner’s life is forfeit to God, but by a gracious provision he is permitted to substitute a faultless victim. His guilt is transferred to the offering by the symbolic act of placing his hands on the victim. When observing the pouring out of the blood and the burning of the sacrifice, the person should acknowledge that, were it not for divine grace, he should be the victim, expiating his sin with his own blood and limbs (Nahmanides to Lev. 1:9). Many Christian exegetes adopted this explanation and on it built the whole theological foundation of their Church.

Rational

Quite different is the rational view of sacrifice advocated by Maimonides. He rejected the symbolist position which discovered reasons for the details of the various sacrifices. Those who trouble themselves to discover why one offering should be a lamb, while another is a ram, are “void of sense; they do not remove any difficulties, but rather increase them” (Guide, 3:26). Maimonides held that the sacrificial service was not really of Jewish origin. It was the universal custom among all peoples at the time of Moses to worship by means of sacrifices. Since the Israelites had been brought up in this atmosphere, God realized that they could not immediately completely abandon sacrifice. He therefore limited its application by confining it to one place in the world, with the ultimate intention of weaning them from the debased religious rituals of their idolatrous neighbors. The new service stressed the existence and unity of God, “without deterring or confusing the minds of the people by the abolition of the service to which they were accustomed and which alone was familiar to them.” Maimonides cited the experience of Israel, led not by the shorter way, but by the cir-

cuitous route through the land of the Philistines (Ex. 13:17). Likewise, through a circuitous road, Israel was to be led gradually and slowly to a deeper perception of religion and divine worship (Guide, 3:32). He gives the added remarkable parallel that it would be equally incomprehensible for anyone in his generation to suggest that prayer could be offered in thought alone, without the recitation of words.

Abrabanel strengthened the arguments for Maimonides’ viewpoint. He explained that only within this framework can it be understood why the Torah limited the sacrificial service to one locality, while prayers may be recited in all places (Introd. to his commentary on Lev., 2d). Abrabanel cites a Midrash which states that the Hebrews had become accustomed to idolatrous sacrifices while in Egypt. To wean them from these idolatrous practices, God commanded, while tolerating the sacrifices, that they be offered in one central sanctuary. This was illustrated by the parable of a king who observed that his son loved to eat forbidden foods. The king then decided to serve him these foods daily, so that he would ultimately lose his desire for them and forego his evil habits (Lev. R. 22:8). D. Hoffmann later proposed a different explanation for this Midrash, declaring that the king insisted that the son was to eat exclusively at his table, so that he would only be served proper food and thus curb his appetite for forbidden foodstuffs (Introd. to commentary on Lev., p. 61).

With the destruction of the Temple and the automatic cessation of the sacrificial system, it was laid down that prayer took the place of the sacrifices. The *Shaharit* service was regarded as taking the place of the morning *tamid* and the *Minhah* service, the afternoon *tamid*. On all occasions when an additional offering was brought, the *Musaf* prayer was introduced (Ber. 4:1, 7; 26b). One of the rabbis later declared that prayer was even more efficacious than offerings (Ber. 32b). Nevertheless, the rabbis never ceased to look forward to the rebuilding of the Temple and the reinstatement of sacrifice during the messianic era. An additional supplication was introduced at the end of the *Amidah* requesting “that the Temple be speedily rebuilt in our days... And there we will serve Thee with awe... Then shall the offering of Judah and Jerusalem be pleasant unto the Lord, as in the days of old, and as in ancient years” (Hertz Prayer Book, 157).

The Reform movement entirely abolished or modified the *Musaf* service and other liturgical references to sacrifice, since Reform Judaism no longer anticipated the restoration of this service. Some Conservative congregations also have rephrased references to the sacrifices, so that they indicate solely past events without implying any hope for the future restoration of sacrifice. Orthodox Jews nevertheless continue to pray for its reinstatement. Joseph *Hertz declared:

Moderns do not always realize the genuine hold that the sacrificial service had upon the affections of the people in ancient Israel. The Central Sanctuary was the axis round which the national life revolved. The people loved the Temple, its pomp and ceremony, the music and song of the levites and the ministrations of the priests, the high priest as he stood and blessed the

prostrate worshippers amid profound silence on the Atonement Day (Hertz Prayer Book, 33–34).

The position of Orthodoxy was thus stated by Michael *Friedlaender:

The revival of the sacrificial service must, likewise, be sanctioned by the divine voice of a prophet. The mere acquisition of the Temple mount or Palestine by Jews, whether by war or political combinations, could not justify the revival. It is only the return of the Jews to Palestine, and the rebuilding of the Temple by divine command and by divine intervention, that will be followed by the restoration of the sacrificial service (*The Jewish Religion* (1913), 417; cf. Maim. Yad, Melakhim, 11:4).

[Aaron Rothkoff]

In the Kabbalah

The kabbalistic interpretation of the sacrifices is usually associated with the esoteric exposition of the tabernacle and the Temple, whose every detail has symbolic significance in the realm of the *Sefirot*, and with the connection between the individual Jew and the Jewish people as a whole and the divine world, both the good powers and the evil. In the Sefer ha-**Bahir*, the earliest text of the Kabbalah, the sacrifices are explained as the process which symbolically unites the priest performing the sacrifices with the divine world. The Hebrew term for sacrifice, *korban*, is interpreted as coming from the root *karev* – to bring together, to unite. The ideas of the *Bahir* were explained and details added by *Isaac the Blind and developed by his pupil *Ezra b. Solomon and by *Azriel of Gerona. The mystical conception of the nature and purpose of sacrifice explains the act as a process which brings about the dynamic union of the divine powers, the *Sefirot*, and restores the soul of man and other created elements to their place of origin, that is to the *Sefirah* of which they had formed a part. The most detailed exposition of the symbolic meaning of the sacrifices is to be found in the *Zohar and in the writings of the subsequent kabbalists. It is possible that their detailed treatment of this subject had a polemical purpose – to oppose Maimonides' conception of sacrifice, which denied its intrinsic value and held that the practice originated in pagan customs which God conceded to the Jews after the exodus from Egypt, because they had not reached a high enough religious level to enable them to worship Him in a spiritual manner. The kabbalists, from the *Bahir* to the Zohar and onward, interpreted the sacrifices as spiritual worship of God in which material means are employed as symbols.

In the Zohar the unifying effect of the sacrifice is explained in three ways: it joins the upper and lower worlds, bringing together the believer and God Himself; it unites the *Sefirot Hokhmah* and *Binah* (the “father” and “mother”); and, most important, it brings about the union of masculine and feminine principles in the divine world – the *Shekhinah*, that is the *Sefirah Malkhut*, and her husband, the *Sefirah Tiferet*. This symbolic process is interpreted in great detail in the Zohar, especially regarding the sacrifices on the Day of Atonement. The material nature of the sacrifice, the use and slaughter of ani-

mals, is explained as a symbolic atonement for material sins. Because the evil powers in man are embedded in his flesh and blood, flesh and blood have to be sacrificed. More than that, the sacrifice frees the spirit of the animal, enabling it to rise to its divine root; the animals are symbolically connected with the animals described by Ezekiel in the throne-chariot, the *Merkabah. According to the Zohar and later kabbalists, the sacrifices are also significant in the cosmic fight between good and evil in the divine world. In one place it is stated that the flesh of the sacrifice is, in fact, intended for Satan, and God receives only the *kavvanah*, the religious intention of the person who gives the sacrifice. Most kabbalists consider that at least part of the sacrifice is given to the evil power, the *sitra ahra*, to placate it. Other sacrifices are intended solely for the *sitra ahra*, especially the scapegoat on the Day of Atonement. Its purpose is to drive the evil powers away from the holy union between Israel and God which is achieved on this day; it may also turn the Satan's enmity toward Israel into a more positive attitude and thus help achieve this union.

SACRILEGE, the deliberate or inadvertent violation of sacred things. The Torah ordains the punishment of *karet for anyone who deliberately flouts the sanctity of the Temple precincts or deviates in the slightest from any of the rules or rituals connected with its service. Under this heading comes slaughtering, offering, or partaking of the sacrifices outside their appointed time or place, entering the sanctuary, officiating, or eating holy things while ritually unclean or when disqualified by reason of non-priestly status (Lev. 17:1–9; 19:5–8; 22:1–16). The priest profaned his sacred office by officiating, when suffering from a *blemish, when in mourning, or by contracting a forbidden union, such as marrying a divorcée, which disqualified his offspring from the priesthood and from mar-

rying a priest (Lev. 21). To make a replica of any of the utensils or ingredients, such as the incense used in the Temple, is also regarded as sacrilege (Ex. 30:32). The seriousness of the sin of sacrilege is underlined by the biblical stories of Nadab and Abihu, burnt to death for offering “strange fire,” and the stoning of Achan for taking the spoils of war dedicated to the sanctuary (Lev. 10:1–2; Josh. 7). The inadvertent use of sacred things, termed *me'ilah*, is also penalized in the Pentateuch (Lev. 5:14ff.). The offender is required to bring a guilt offering and reimburse the Temple treasury to the value of the theft plus one-fifth.

A whole tractate of the Talmud (see **Me'ilah*) is devoted to the offense which became obsolete with the destruction of the Temple. But the principle involved lived on to safeguard the remaining sancta of Jewish life, in a carefully graded order of holiness: the *Sefer Torah*, religious articles such as *tefillin* and *zizit*, printed holy books, and the synagogue and its appurtenances. The rabbis adopted the formula of *ma'alin be-kodesh ve-ein moridin* – “holiness may be increased but not decreased.” The Mishnah in *Megillah* (3:1, 2) forbids the sale of a synagogue for a public bath or tannery, a *Sefer Torah* for books of lesser sanctity such as the Prophets. Even a disused synagogue may not be used as a shortcut or for spreading nets or drying fruit. Printed pages of holy books must be buried (see **Genizah*) out of respect for the name of God inscribed therein (see **Shemot*). No benefit may be derived from the dead, including the shroud or the corpse itself, except for the purpose of saving life (see **Autopsies*). Cemeteries must be treated with the utmost reverence, and it is not permitted to walk over the graves or pasture cattle there (Sh. Ar., YD 368). The scholar who adopted an irreverent approach to difficult passages in the Torah was guilty of sacrilege too (Maimonides, *Hilkhot Me'ilah*, end).

Under a law promulgated by the State of Israel for safeguarding the holy sites of Judaism and other faiths (1967), there is a penalty of seven years' imprisonment for “profaning a holy place or violating it in any manner” (see **Holy Places*). Detailed regulations have been gazetted by the Ministry of Religious Affairs prohibiting sacrilegious behavior at Jewish holy sites (Protection of Holy Places Law, 5727 – 1967, in: *Laws of the State of Israel*, 21 (1966/67), 76). These prohibit ritual slaughter, eating and drinking, smoking, sleeping, hawking, profanation of the Sabbath and festivals, and immodest dress. These regulations have been applied to Jewish holy sites in Jerusalem and other parts of Erez Israel. After the Six-Day War the Israel Chief Rabbinate proclaimed it sacrilegious for a Jew to enter the Temple Mount because of ritual defilement.

[Aryeh Newman]

***SACY, ANTOINE ISAAC SILVESTRE DE** (1758–1838), French Orientalist and Hebraist of the Romantic-Catholic school. In 1817, he published a pamphlet entitled *Lettre à M. Le Conseiller de S.M. le Roi de Saxe...* opposing the integration of the Jews within Christian society, written in criticism of C. *Bail's *Des Juifs au 19^e siècle* (1816). In the opinion of Sacy,

integration of the Jews would be equivalent to a unification of religions or abolition of the specific characteristics of the various religions. This he considered an impossibility:

The believing Jew cannot doubt that he is a member of the Chosen People of God which has been separated from all other peoples; or that its autonomy, its political existence, its ritual, and its national glory must one day be reestablished. On the other hand, the Christian knows that the Bible has taught him that this people, still awaiting a Messiah who has already come, has been preserved among the nations by Divine Providence as a living witness of heavenly retribution, but at the same time is a precious offspring of promised regeneration.

Sacy's work aroused lively polemics in France and Germany which continued until around 1825.

[Baruch Mevorah]

SADAGORA (Rom. **Sadagura**; Ger. **Sadagora**), town in Chernovtsy district, Ukraine. From 1775 until World War I Sadagora passed to Austria and between the two world wars was within Romania. The first Jews settled there during the 17th century. In 1775, 45 Jewish families (186 persons) were enumerated among 180 families in the town. There were 100 Jewish families in 1808, and 3,888 Jews (80.3% of the total population) according to the census of 1880. Once the community developed, 16 smaller Jewish communities were affiliated to it. Communal institutions developed from the 18th century. The central synagogue was apparently built about 1770, but there were also numerous additional synagogues and prayer houses. The community had a yeshivah and a Jewish school, established under Austrian rule. The Jews of Sadagora mainly engaged in commerce and crafts, while among the Jews of the vicinity, who in practice belonged to the community of Sadagora, there were also lessees and wealthy landowners. A special occupation of the local Jewish poor was the haulage of water in barrels from distant wells to houses in the town. Between 1883 and 1914, a Jew was town mayor.

In 1914, before the outbreak of World War I, there were 5,060 Jews living in Sadagora and a further 3,000 in the 16 communities affiliated to it. During World War I the town and its surroundings suffered extensively from the fighting there, and many of its Jewish inhabitants left, and the number of Jews had declined to 900 in 1919. After the war a number returned and continued to live there under Romanian rule. There were 1,459 in 1930, declining to 654 in 1941. Zionist organizations were early established in Sadagora and were particularly active in the interwar period under the Romanian rule. Jews also took part in the municipal life, and their parties were well represented in the municipal administration. In June 1940 the town was annexed to the U.S.S.R., and the Soviets exiled many Jewish merchants and artisans to Siberia.

Sadagora was an important center of Hasidism, from the period of Austrian rule over Bukovina until the liquidation of

the community. Most of the Jewish inhabitants of the town belonged to the *Ruzhin Ḥasidim. R. Israel Friedmann of Ruzhin arrived in Sadagora after he was released from prison in Russia and established a magnificent “court” there. His royal style of living aroused opposition from the Ḥasidim of Zanz (see *Halberstam). After World War II the center of the Sadagora dynasty was transferred to Erez Israel.

Holocaust and Contemporary Periods

In 1941 the town was restored to Romanian administration, which collaborated with the Germans. During this period 186 Jews lost their lives in attacks made against the Jews. In 1941 almost all of the 1,488 Jews remaining in Sadagora were deported by the Romanian and German authorities to death camps in *Transnistria. A few Jews returned to Sadagora in 1944, but community life was not reorganized after the war.

[Yehouda Marton]

ŞA'DAH, walled city, capital of north *Yemen. Şadāh was once an iron mining and tanning center and an important station along the Ḥimyar *Sanā-Mecca trade route. Later, Şadāh was chosen as the capital of the Zaydi state and became the center of Zaydi learning in the al-Hādī Mosque. It is still an important institution for education in Zaydism. It is built on a 2,300 m high plateau about 250 km north of Sanā. Evidence for the existence of a Jewish settlement in Şadāh in the first half of the Middle Ages is found in fragments from the Cairo *Genizah. A *gaon*, whose name is unknown, rebukes Amram b. Johanan of Şadāh for having abandoned the custom of his forefathers by not sending the pledges and contributions from himself and from his town to the yeshivah, sending them instead to another yeshivah. Indeed, many letters from the people of Yemen and Yamāmah to the yeshivah also describe Amram's evil deeds. At the end of his *iggeret* (“letter”) the *gaon* demands that all pledges and contributions be sent immediately to him by way of the *sar* (“minister”) Nethanel in Şadāh. A different document speaks of a Jew from Şadāh who visited Fustat (in 1134) and, when called upon to lead the prayers, added to the *kaddish* a prayer for the head of the academy in *Egypt. The representative of the Babylonian academy was insulted by this, for according to the usual custom only the head of the Babylonian academy was entitled to this honor. In the 14th century one of the rabbis of Şadāh wrote an allegorical commentary on the Pentateuch. He was severely criticized by the rabbis of Sanā, but the rabbis of Şadāh supported him and rejected the criticism.

According to tradition, when the Zaydi imam conquered Şadāh (c. 1200), he destroyed all synagogues because the Jews sold wine to the Muslims. In general, however, the conditions in northern Yemen were more favorable for the Jews, and the restrictions and ordinances of the Covenant of *Omar were not strictly enforced. For example, the Jews' houses were as high as those of the Muslims, and they were permitted to carry daggers and even live ammunition. There is no definite infor-

mation, however, about the size of the Jewish population. A. Tabib recounts heavy losses suffered by the Jews of the area in the upheavals of 1906. In addition to their traditional livelihoods, the Jews of Şadāh also engaged in wholesale trading. Prior to the immigration to Israel the community numbered about 60 families (280 souls) with three synagogues; most of the Jews were silversmiths, coppersmiths and cobblers.

SADAI, YIZḤAK (1935–), Israeli composer and music theorist. Born in Sofia, Bulgaria, Sadai came to Israel at the age of 14 (in 1949). In 1956 he graduated from the Tel Aviv Academy of Music under A.A. *Boskovich and also studied composition with Joseph *Tal (1954) and *Haubenstock-Ramati (1959). His works consist of orchestral and chamber music as well as electronic music, and they have been performed at four international festivals of contemporary music. Sadai founded the electronic music studio at Tel Aviv Univeristy (1974), and from 1960 he was a lecturer at the Rubin Academy of Music in Jerusalem and at the Rubin Academy of Music at Tel Aviv University (since 1966), where in 1980 he was appointed professor. His special interest lies in interdisciplinary research. His early works as a composer show an integration of *maqāmāt* with Bergian expressionism (in the chamber cantata *Ecclesiastes* and in the *Ricercare symphonique*). From 1965 Sadai embarked on a post-Webern Impressionist style (*Interpopulation* for strings and harpsichord; *Nuances* for orchestra; and *Prelude à Jerusalem* for choir, orchestra, and electronic tape). Among his other compositions are three canatas – *Kohelet*, *Ha-Ṭevi Yisrael*, and *Psikoanalisaḥ*; *Serenade* for woodwinds; and *Anamorphoses* (1981–82) for orchestra and electronic tape.

He published a book on methodology of musical theory (1960) as well as *Harmony in Its Systemic and Its Phenomenological Aspects* (1980).

[Yohanan Boehm and Uri (Erich) Toeplitz / Israela Stein (2nd ed.)]

SA'D AL-DAWLA AL-ŞAFĪ IBN HIBBATALLAH (d. 1291), court physician and vizier in Mongol *Persia. He came from Abhar in the province of Jibāl. The sources refer to him by the honorific title “Sa'd al-Dawla” (“support of the State”) or “the Jewish vizier,” etc.

In two devastating attacks, the *Mongols succeeded in crushing three important Persian centers of power, namely in Khwārazm, in Alamut, and, finally in *Baghdad, the capital of the Abbasid Caliphate. Thus, in the middle of the 13th century, a new era began in Persia which continued until the end of the Ilkhanid in 1335. Significant changes were introduced

in the social, economic, legal, and governmental structures of Persia during this period. These changes influenced numerous intellectual activities, especially those related to art, historiography, prose, and poetry. Because of the religious attitude of the *Mongols, especially that of the first rulers, the Muslims lost some of their privileges as the rulers and governors in the Islamic lands. This change allowed members of religious minorities to occupy high positions under those Mongol rulers who had not yet accepted Islam as their religion. Sa'd al Dawla was a product of this change.

His Hebrew name is unknown. Sa'd al-Dawla is first mentioned in *Mosul. He subsequently moved to Baghdad where he practiced in 1284 as a physician. There he acquired expert knowledge of the financial administration and in 1285 was appointed a member of the *diwan*. His abilities and promotion evidently aroused the enmity of his colleagues, who in 1288 obtained his transfer as physician to the court of Arghūn Khān, in *Tabriz, Azerbaijan. A brilliant scholar and linguist, speaking Persian, Arabic, Turkish, and Mongolian, Sa'd al-Dawla soon won favor with the Mongol ruler, and in 1289 was appointed vizier of the whole Īl-Khān kingdom. According to custom, he immediately removed his opponents and filled the key posts in the administration with dependable Mongols, Christians, or Jews, primarily with members of his own family. He appointed one brother, Fakhr al-Dawla, governor of Baghdad; another brother, Amīn al-Dawla, was put in charge of the districts of Mosul and Diyār Bakr, Diyār Rabī'a, and Mardin. The Persian and Arabic sources credit him with the establishment of the administration on the basis of law and justice. But the rule of these Jewish officials caused much resentment among the Muslim population. Moreover, Sa'd al-Dawla had personal enemies among Mongol leaders, who were jealous of Arghūn's unlimited confidence in him. When Arghūn became dangerously ill, court circles accused the vizier of having poisoned his benefactor. At a banquet, Sa'd al-Dawla and the majority of his supporters were arrested, a large number were slain at once, and Sa'd al-Dawla was executed the following day. A large-scale persecution of Jews in Tabriz, Baghdad, and other Jewish communities ensued. All his brethren and relatives subsequently met a violent death, described in the Arabic writings of Ibn al-Fūṭī, *Bar-Hebraeus, and others.

SADAN (Stock), DOV (1902–1989), Yiddish and Hebrew writer and scholar. Born in Brody, Eastern Galicia, from his youth Sadan was an ardent Zionist and active in the propagation of the Hebrew language and culture. In the early 1920s he was a leader of the He-Ḥalutz movement in Poland.

After immigrating to Erez Israel in 1925, Sadan worked

as an agricultural laborer until 1927, when Berl Katznelson offered him a position on the staff of the newspaper *Davar*. In 1928 he went to Germany on behalf of the He-Ḥalutz movement. There he came in close contact with modern Germanic culture, especially with the new trends of culture history and psychoanalysis. Upon his return he taught in schools in Lower Galilee and in Jerusalem, but in 1933 he resumed his work on *Davar*, where he remained for the next ten years. In 1944 he joined the staff of Am Oved, the publishing house of the Histadrut. Sadan became a faculty member of The Hebrew University, teaching Hebrew composition, and was appointed chairman of the Yiddish department in 1952. From 1965 to 1970 he also taught Hebrew literature at Tel Aviv University. Elected to the Knesset as a member of Mapai in 1965, he resigned before the end of his term. He was an active member on the boards of many literary and cultural institutions, such as the Academy of the Hebrew Language and the board of directors of Mosad Bialik.

Sadan began his prolific literary career at an early age; his more than 50 volumes represent less than half his total output. Although his initial literary efforts were in poetry, he abandoned this medium and, turning to prose, became one of the great masters of modern Hebrew prose. He developed a highly individual style, complex, very "literary," rooted in Jewish sources, and yet graceful and flexible. Throughout his career he experimented with various modes of fiction, ranging from the memoir story (he published two volumes of childhood memories) to the modern surrealistic story (Sadan was the first to translate Kafka into Hebrew). The bulk of his work, however, comprises nonfiction, especially essays and literary and scholarly articles in Judaic studies. His essays cover a wide variety of subjects, such as current events, memoirs, portraits of famous personalities, and essays on problems of Jewish culture. He pursued research in such areas as folklore, humor, idioms, and the Hebrew and Yiddish languages, etc. His literary and scholarly creativity, however, reached its zenith in his studies of Hebrew and Yiddish literature.

Sadan's critical approach to literature and other Jewish studies is based on a broad and novel view of modern Jewish history. He rejects the view which identifies modern Jewish literature only with those Hebrew and Yiddish literary trends that grew out of the modern "secular" Jewish culture, beginning with the Haskalah (18th and 19th centuries) and continuing in the nationalistic literature (end of the 19th and the beginning of the 20th centuries). He argues that modern Jewish literature was a major reaction to the crisis in traditional Jewish culture in Central, and especially Eastern, Europe at the end of the long Jewish "Middle Ages" in the 18th century. It developed in three principal directions, and not one, as claimed by the *maskilim*: (1) the new "rabbinic" movement, centered mainly around the Lithuanian Mitnaggedic movement, which was a revitalized continuation of halakhic literature; (2) the mystic-ḥasidic trend which developed a versatile literature consisting of many genres (sermons, parables, allegory, legend, hagiography, mystic-philosophic writings);

(3) the Haskalah trend which aimed at creating a European humanistic literature.

This vast, complex, and intricate body of literary writings, written in several languages (Hebrew, neo-biblical, as well as late Hebrew, Yiddish and European languages), with its different spiritual trends, Sadan sees as one literature, which he terms “the Israel literature,” and defines it all as literature written by Jews for a Jewish readership. In this giant network Hebrew literature must be the foundation and principal axis, yet the scholar or the critic should not concentrate exclusively on it. Sadan demands that the literary historian and critic: (1) see modern Jewish literature (“Israel literature”) as one multi-faceted unified body and accept the different languages in which it was written; (2) study each of the above areas individually but at the same time try to find ideational, thematic, and linguistic links between them. For instance, it is impossible to give a profound, objective, and critical evaluation of the biting, at times virulent, satirical-parodic anti-ḥasidic Haskalah literature without studying it in relation to ḥasidic literature’s “mixed” Hebrew, which was the butt of the Haskalah parody; (3) study the dialectical essence of the relationship between the different areas of the literature. According to Sadan, the antithetical tension between these areas will, in time, be resolved into a harmonious synthesis.

Central to Sadan’s Jewish world view is the belief that the modern “secular” Jewish culture which broke away from traditional Judaism is only an antithetical transient (“episodic”) stage in the history of Jewish culture. The emerging Jewish culture, however, will not return to its ancient traditional form but, deriving its inspiration from the source of all Jewish culture – religious faith – will be molded into a new cultural synthesis in which the experience gained by the Jewish culture in its temporary secular stage will play a significant role. Sadan finds the first signs of this synthesis in modern Jewish literature at climactic points of development where the Jewish culture reaches the zenith of artistic and aesthetic accomplishment. In Hebrew literature he points to two artistic peaks: Bialik’s poetry and Agnon’s fiction.

Sadan uses different critical methods to establish the connecting links between the different areas of Jewish culture, which are often contradictory in their literary expression. He most frequently resorts to the study of motifs, idioms, and linguistic combinations, a method founded on Freud’s theory of the psychic. The psychoanalytical approach is particularly apparent in his early critical works (especially in his articles on J.H. Brenner and H.N. Bialik); later, however, this method is used only indirectly. (Sadan introduced the psychoanalytic approach into Hebrew literary criticism.) He continued, however, to employ freely the method of “investigation” which requires of the critic keen perception and a phenomenal amount of knowledge in all the facets of literature. This method lends a “technical” character to some of his scholarly writings, and Sadan therefore often resorts to the graceful short essay form which gives him an all-embracing and original view of the world of an author and the whole

body of his works. Sadan’s literary criticism is always sensitive to the canons of good taste.

Sadan translated many volumes from Yiddish, German, and Polish and two large volumes of Jewish jokes (*Kāarat Egozim*, 1953; *Kāarat Zimmukim*, 1950) which he compiled.

His main collections of Hebrew literary criticism are *Avnei Boḥan* (1951), *Al S.Y. Agnon* (1959), *Avnei Bedek* (1962), *Bein Din le-Ḥeshbon* (1963), *Bein She’ilah le-Kinyan* (1968), and *Avnei Gader* (1970). Late works include *Avnei Sha’ashu’a* (1983) and a collection of essays on Hebrew and Yiddish literature entitled *Ḥadashim Gam Yeshanim* (1987). A bibliography of his works was prepared by Y. Galron-Goldschlager (1987; 1994). His main collection of Yiddish literary criticism is *Avnei Miftan* (vols. 1 and 2 (1961, 1970)).

[Dan Miron]

SADAT, MUHAMMAD ANWAR AL- (1918–1981), president of the Arab Republic of Egypt, Oct. 1970–Oct. 1981. Sadat was born to poor parents in the Egyptian village of Mit Abu-Kom. He joined the army and during World War II was active in an anti-British underground group (and was arrested in consequence). After the war, still in the army, he joined the “Free Officers” group, led by *Nasser, which carried out the July 1952 Revolution. Overshadowed by Nasser, Sadat managed the new regime’s daily, *al-Gumhuriyyah*, served as a cabinet minister for one year and then as speaker of the parliament. Appointed as Nasser’s vice president after the 1967 defeat, Sadat was elected president after Nasser’s death on September 28, 1970.

Gradually, Sadat asserted himself increasingly as president and introduced a growing measure of economic and political liberalization, which bolstered his increasing popularity. Eager to overcome Egypt’s military inferiority versus Israel, he signed a treaty of friendship with the Soviets which, however, failed to deliver the needed hardware for war. Consequently, he expelled them from Egypt in 1972 and started to prepare for war on his own, all the while attempting a political rapprochement with certain European states and the U.S. in order to secure their sympathy for his military moves against Israel.

The October 1973 attack in Sinai, while not leading to an Egyptian victory, gave Egypt the pretext to coopt the U.S. as an honest broker instead of a partisan of Israel. Thus, the Disengagement Treaties of May 1974 and September 1975 with Israel increased Sadat's prestige and started the process towards a settlement with Israel. Sadat's main argument was that such a peace should be achieved in parallel with Israel's renunciation of the so-called "conquered territories." This was the ideological basis of Sadat's visit to Jerusalem in November 1977 and of the Camp David negotiations, sponsored by Jimmy Carter, in September 1978. Israel's agreement to recognize the autonomy of the Palestinians paved the way for the signing of the peace treaty between Egypt and Israel on the lawn of the White House in March 1979. This was the peak of Sadat's achievement, for which he was awarded, together with *Begin, the Nobel Peace Prize.

In subsequent years, Sadat's international prestige grew, but in Egypt, owing to the increasing poverty and unemployment, social criticism of Sadat increased, exploiting the very openness he had encouraged. Some of this nurtured Islamic fundamentalism. Sadat, an orthodox Muslim himself, first attempted to persuade the Islamic leaders to tone down their zeal, then started to arrest them in the thousands during the last months of his life. His assassination, during a festive military review on the eighth anniversary of the Yom Kippur War, ended the plans he had for Egypt.

In his later years, Sadat openly expressed his disappointment with Israel's policies, especially the June 1981 Israeli attack on the Iraqi nuclear reactor and what he considered as Israel's dragging its feet over the granting of Palestinian autonomy. He argued that the return of Sinai was a "natural" act, since this had been Egyptian territory, and he perceived Israel as "ungrateful." U.S. economic assistance, too, could not solve Egypt's numerous social problems, nor appease popular criticism of his regime.

Sadat's assassination was welcomed by many, in contrast with the bitter national mourning following Nasser's death. Nevertheless, Sadat's legacy was both revolutionary and original, the likes of which have not yet been seen in Arab countries. His colorful and dynamic personality, aiming at radical solutions, was expressed in the heat of war and the challenges of peace. His talent for changing direction and undertaking new initiatives was unique. He was criticized by several Arab states for signing a peace with Israel which enabled it – they claimed – to oppress the Palestinians and attack Lebanon. However, Arab and Muslim states which had ostracized him found themselves following his example some 20 years later. Although relations between Egypt and Israel since 1977 have had their ups and downs, the treaty has served as a model for others.

[Raphael Israeli (2nd ed.)]

SADDUCEES (Heb. סַדּוּקִיִּם, *Zedukim*), sect of the latter half of the Second Temple period, formed about 200 B.C.E. Active in political and economic life, the Sadducean party was composed largely of the wealthier elements of the population – priests, merchants, and aristocrats. They dominated the Temple worship and its rites and many of them were members of the Sanhedrin (the supreme Jewish council and tribunal of the Second Temple period).

Origin of the Name

According to a talmudic tradition (ARN1⁵), the name derives from Zadok, a disciple of Antigonus of *Sokho who, misunderstanding his teacher's maxim, denied afterlife and resurrection and formed a sect in accordance with those views (see *Boethusians). The most probable explanation of the name, however, is that it is derived from Zadok, the high priest in the days of David (11 Sam. 8:17 and 15:24) and Solomon (cf. 1 Kings 1:34ff. and 1 Chron. 12:29). Ezekiel (40:46, 43:19 and 44:10–15) selected this family as worthy of being entrusted with the control of the Temple. Descendants of this family constituted the Temple hierarchy down to the second century B.C.E., though not all priests were Sadducees. Hence the name "Sadducees" may best be taken to mean anyone who was a sympathizer with the Zadokites, the priestly descendants of Zadok. In the talmudic literature, the designations Boethusians and Sadducees are used interchangeably to designate the same party or sect. Some scholars believe, however, that the Boethusians were a branch of the Sadducees, deriving their name from their leader Boethus. (See L. Ginzberg, in: JE, 3 (1902), 284–5, and Schuerer, *Gesch.*, 2 (1907⁴), 478–9.)

Beliefs and Doctrines

The Sadducees were the conservative priestly group, holding to the older doctrines, and cherishing the highest regard for the sacrificial cult of the Temple. The party was opposed to the *Pharisees down to the time of the destruction of Jerusalem in 70 C.E. The main difference between the Pharisees and the Sadducees concerned their attitudes toward the Torah. The supremacy of the Torah was acknowledged by both parties. However, the Pharisees assigned to the Oral Law a place of authority side by side with the written Torah, and determined its interpretation accordingly, whereas the Sadducees refused to accept any precept as binding unless it was based directly on the Torah. The theological struggle between the two parties, as J.Z. Lauterbach puts it (*Rabbinic Essays*, 23–162), was actually a struggle between two concepts of God. The Sadducees sought to bring God down to man. Their God was anthropomorphic and the worship offered him was like homage paid a human king or ruler. The Pharisees, on the other hand, sought to raise man to divine heights and to bring him nearer to a spiritual and transcendent God.

The Sadducees therefore rejected the Pharisaic supernatural beliefs, claiming that they had no basis in Mosaic Law. They denied the doctrine of the resurrection of the body (Matt. 22:23; Mark 12:18; Luke 20:27; Acts 23:8), denied the immortality of the soul (Jos., *Wars*, 2:162f. and *Ant.*, 18:16), and

rejected the Pharisaic doctrine regarding the existence of angels and ministering spirits (Acts 23:8). Because of the strict adherence to the letter of the law, the Sadducees acted severely in cases involving the death penalty. The Mosaic principle of *Lex talionis*, for instance (Ex. 21:24), was interpreted literally rather than construed as monetary compensation – the view adopted by the Pharisees. They were opposed to changes and innovations and refused to accept the oral traditions with which the Pharisees supplemented the Written Law. It was never a question of whether certain laws were derived from tradition, but whether those laws that were admittedly derived from tradition were obligatory. Apart from differences between the Pharisees and the Sadducees as to the oral tradition and supernatural beliefs, there were numerous legal ritualistic details upon which these two parties differed, especially those connected with the Temple. On the whole, it can be said that while the Pharisees claimed the authority of piety and learning, the Sadducees claimed that of genealogy and position.

The rivalry between the Pharisees and the Sadducees was, in a sense, the renewal of a conflict between the prophets and priests of pre-Exilic times. Following the restoration of the Temple and its sacrificial cult, the priests were also restored to their former position as religious leaders. Priestly authority was, however, weakened by two factors: the rise of laymen and “scribes” who possessed a knowledge of the law; and the advent of Greek rule – since among the Greeks themselves priests were the servants not the leaders of the community.

Attitude Toward Prayer and Sacrifice

Josephus and the Talmud say little about the Sadducean position on prayer, but the Sadducees would naturally not favor a religious service consisting of prayer and study alone, as would the Pharisees. This would tend to lessen the importance of the sacrificial cult and thereby weaken their own position as priests.

Fate

On the problem of human conduct and activities, the Sadducees seemed to have believed that God is not concerned with man's affairs. As Josephus puts it: “As for the Sadducees they take away fate and say there is no such thing, and that the events of human affairs are not at its disposal, but they suppose that all our actions are in our own power, so that we ourselves are the cause of what is good and receive what is evil from our own folly” (Ant., 13:173). Unfortunately no statement has survived from the Sadducean side on their beliefs and principles. There are controversial references in rabbinical literature with regard to the Sadducean interpretation of the law. The Sadducees have been represented as lax and worldly-minded aristocrats, primarily interested in maintaining their own privileged position, and favoring Greco-Roman culture.

The Sadducees and the New Testament

In the New Testament, John the Baptist jointly condemned the Pharisees and the Sadducees, calling them a “generation of

vipers” and challenging them both to “bring forth fruits meet for repentance” (Matt. 3:7ff.). In his denunciation of their doctrines, Jesus, too, grouped Sadducees and Pharisees together (Matt. 16:6ff.) and both parties were said to have posed questions designed to perplex Jesus (Matt. 15:1). According to Acts (4:1ff., 5:17), Peter and John were imprisoned by them. Since many Christian doctrines have more in common with those of the Pharisees than with those of the Sadducees, it is clear why the Apostolic Church, in the first years of its existence, had most to fear from the Sadducees (Acts 4 and 5).

Historically the Sadducees came under the influence of Hellenism and later were in good standing with the Roman rulers, though unpopular with the common people, from whom they kept aloof. The Sadducean hierarchy had its stronghold in the Temple, and it was only during the last two decades of the Temple's existence that the Pharisees finally gained control. Since the whole power and *raison d'être* of the Sadducees were bound up with the Temple cult, the group ceased to exist after the destruction of the Temple in 70 C.E.

[Menahem Mansoor]

ŞADE (**Zadi**; Heb. זָדִי, זָדִי; זָדִי), the eighteenth letter of the Hebrew alphabet; its numerical value is 90. It is assumed that the earliest form of the *şade* was a pictograph of a blossom זָדִי. In the late second and early first millennia B.C.E., the *şade* became זָדִי. In the Hebrew script, from the eighth century B.C.E. onward, the downstroke was shortened and a hook was added on the letter's right side זָדִי, which has been preserved in the Samaritan זָדִי. The Phoenician and Aramaic scripts lengthened the downstroke זָדִי and thus in the fifth century B.C.E. Aramaic script three forms developed: זָדִי, זָדִי, זָדִי. While from the first form, through the Nabatean זָדִי, זָדִי the Arabic *şad* زَاد evolved, the Jewish script adopted the third form, which was the ancestor of the medial זָדִי and final *şade* זָדִי. See *Alphabet, Hebrew.

[Joseph Naveh]

SADEH, PINHAS (1929–1994), Israeli writer. Born in Lvov, Sadeh was taken to Palestine in 1934 and lived for a while in Tel Aviv. A radical individualist and autodidact, he then worked as a shepherd in the Jezreel valley, and later as a night watchman in Jerusalem. His first publications were a story in *Ba-Ma'aleh* (1945) and a poem in *Ittim* (1946). The first collection of poems, *Massa Dumah* (“Vision of Dumah”), positioned him in the tradition of Hebrew Expressionism and his first novel, *Ha-Hayyim ke-Mashal* (1958, 1968; *Life as a Parable*, 1966), foreshadows Expressionistic principles, mainly, the work of art as a cry of protest and an expression of the self. In confessional style, interweaving reflections and meditations on human existence and nature with personal experiences, Sadeh's autobiographical novel rejected the ubiquitous collective experience in favor of far-reaching individualism. The novel

echoes perceptions and views which are closer to Christianity and to marginal religious sects in Jewish history (such as Shabbateanism and to the Frankists) than to the norms dear to Zionist society in Israel of the 1950s. With his work distinguished by images taken from his own life, Sadeh writes about love, erotic excitement, and loneliness, contemplates sin and grace, alludes to the New Testament and to Kierkegaard's and Dostoyevsky's oeuvre. Following the success of this unusual novel, Sadeh became, both on account of his writing and his sequestered, self-dramatized way of life, an idol for young Israelis and would-be artists. In 1967 he published *Al Mazzavoshel ha-Adam* ("Notes on Man's Condition") followed by the novella *Mot Avimelekh* ("The Death of Avimelech," 1969). Sadeh published further collections of poetry, in which he extols feminine beauty and women's self-sacrifice and reflects on nature, transience, and mortality. Among these are *Sefer ha-Shirim* ("Book of Poems"), *El Shetei Ne'arot Nikhbadot* ("To Two Honorable Young Ladies," 1977), and *Sefer ha-Agasim ha-Zehubim* (1985). He also wrote essays on Bialik (1985) and books for children (*Ha-Ganav*, "The Thief," 1988), edited a selection of European stories, *Mivhar ha-Sippur ha-Eiropi* (1959), and anthologized hasidic legends (English translation as *Jewish Folktales*, 1989; 1990). Sadeh's *Collected Poems* appeared in 2005. Sadeh, who lived in his later life in Ramat Gan, received the Bialik Prize in 1990. For translations of his work see the ITHL website at www.ithl.org.il.

[Anat Feinberg (2nd ed.)]

SADEH (Landsberg), YIZHAK (1890–1952), creator of the *Palmah and its first commander. Born in Lublin, Poland, Sadeh served in the Russian army in World War I and was decorated for bravery. He continued to serve in the Red Army, where he commanded the first company of the first battalion. After the war he enrolled at the University of Simferopol, Crimea, studying philology and philosophy, and became a champion wrestler and weight-lifter. A meeting with Joseph *Trumpeldor, which took place in 1917, had a profound influence on the course of Sadeh's life. In 1920, when news reached him of Trumpeldor's death in action at Tel Hai, Sadeh left for Erez Israel, where he became one of the founders of *Gedud ha-Avodah (the Joseph Trumpeldor Labor Battalion) and was elected its head. As such, he divided his time between working as a skilled laborer (he was an expert stone quarrier) and

providing the men of the Gedud ha-Avodah with military training. When the Gedud ha-Avodah disintegrated, Sadeh retired for a while from public service, but presented himself again to the *Haganah at the outbreak of the 1936 riots. He was the first to propose to the Haganah the policy of "breaking out of the perimeter," i.e., not to confine itself to static defense behind the barbed wire fence of the settlement, but to attack the Arab terrorist bands in the open. This policy resulted in the formation of the Haganah field companies (*peluggot sadeh*, abbr. "Fosh"), which Sadeh commanded until 1938, when they were replaced by the field corps (*heil sadeh*, abbr. "Hish"). Sadeh also became the commander of the new formation and within its framework founded a special commando unit (*peluggah li-fe'ullot meyuhadot*, abbr. "Pom"), which incorporated a naval platoon and was trained for fighting on land and at sea. Sadeh commanded the operations of this unit in defending the establishment of the strategically placed new settlement *Hanitah in western Galilee. In 1941, when the Palmah was founded – largely on Sadeh's initiative – he became staff officer for Palmah affairs at Haganah headquarters and after a short while was appointed commanding officer of the Palmah, which now had become a countrywide formation. He remained at this post until 1945, when he was promoted to acting chief of the Haganah general staff, and as such coordinated the combined resistance activities of the Haganah and the *Irgun Zeva'i Le'ummi and *Lo'amei Herut Israel against the government in the final years of the Mandatory regime.

During the *War of Independence, Sadeh took part in a series of significant operations, the battle for Jerusalem among them. It was he who commanded the successful defense of Mishmar ha-Emek, which turned into a rout of the Arab Liberation Army. Upon his initiative, the Israel army formed its first armored brigade (which eventually became the Eighth Brigade); Sadeh became its commander, with the rank of *alluf*, and as such took part in "Operation Dani," capturing Lydda Airport and other points of strategic importance in the central sector of the front. One of the brigade battalions played a key role in the capture of the town of Lydda. In October 1948 the brigade was transferred to the Southern Command and in "Operation Yo'av" captured the Egyptian-held police fortress of Iraq-Suwaydan. In "Operation Horev" (December 1948–January 1949) he took Nizzanah on the Sinai border and took part in the fighting around Rafiah (Rafah).

At the end of the war Sadeh retired from the Israel Defense Forces (IDF). Throughout his military career he had had a profound influence on the training, tactics, and strategy employed by the Haganah and the IDF and was both teacher and commander of most of Israel's senior military officers. Reconnaissance, field engineering, naval, and air operations were all innovations first introduced by him.

Sadeh was also a prolific writer of articles, short stories, and particularly plays, only a part of which were published. In the last years of his life, he worked on his memoirs, of which he completed the part dealing with his childhood and adolescence (*Ha-Pinkas Patuah*, 1952). He also wrote *Mi-Saviv la-*

Medurah (1946) and *Mah Hiddesh ha-Palmaḥ* (1950). He was buried at kibbutz Givat Brenner.

[Yigal Allon]

SADĪ, SA'ID BEN SHELOMO (late 17th early–18th centuries), Yemenite historian who lived in *San'ā, the author of *Dofī ha-Zeman* ("Fault of the Times"), a chronicle on the history of the Jews in *Yemen between 1717 and 1726. It was the first historical work to be written by a Yemenite scholar, followed by many others into the 20th century. It reflects the severe moral deterioration of the Jewish community of San'ā as a result of the destruction of the communal system after Yemenite Jews returned from their exile in *Mawza'. The authority of the religious and temporal authorities was almost completely lost – there were even Jewish prostitutes in San'ā. So the principal objective of this work, like that of his contemporary R. Yiḥye Ṣaliḥ in his *Peri Zaddik*, was to show the moral to be drawn from the misfortunes which befell Yemenite Jewry. It is therefore not surprising that the *tokhaḥot* of the author hold an important place in the work. The above events also left a deep impression on the author himself, because he lost three of his sons at that time.

SADIE, STANLEY (John, 1930–), British music critic, musicologist, author, and editor. Sadie was born in London, where he received his education, as well as at Gonville and Caius College, Cambridge. His dissertation was on "British Chamber Music, 1720–1790" (U. of Cambridge, 1958). He was a teacher at the Trinity College of Music, London (1957–65), a music critic of the *London Times* from 1964 to 1981, and a reviewer for *Gramophone* (1965–). He took over the editorship of the *Musical Times* in 1967 and was the editor in chief of the *New Grove's Dictionary of Music and Musicians* (1980) as well as its second edition (London 2000). Sadie served as president of the councils of the Royal Musical Association (1989–94) and The International Musicological Society (1992–97) and on the boards of several journals, including *Music and Letters*, from 1989, and *Journal of Musicology*, from 1982. His publications include *Handel* (1962), *Mozart* (1966, 1981), *Beethoven* (1967), *The Pan Book of Opera/ The Opera Guide* (with Arthur Jacobs, 1964, 1969), and *Handel Organ Concertos* (1972). A frequent contributor to musical journals, Sadie edited much 18th-century music, on which – as on Mozart and Handel – he was considered an expert. Along with his writings Sadie and his wife, the cellist, bass viol player, and musicologist Julie Anne Ver-trees, initiated the foundation of the Handel House Museum

in London; they are authors of a guide to European composer museums, *Calling on the Composer* (London 2000).

SA'DIS (Banū Sa'd), Arab dynasty of *sharīfs* (descendants of the Prophet *Muhammad) who penetrated *Morocco and ruled it from the mid-16th century to the 1660s. They succeeded the *Wattasids, retained *Fez as their capital, and fought relentlessly against the Spanish and Portuguese occupation of parts of Morocco. At first the Sa'dis appeared to be fanatical religious zealots who were intolerant of non-Muslims. They imposed heavy taxes on the local Jewish community. As they consolidated their authority in the country, however, they gradually evinced greater toleration toward the Jewish minority. Like their Wattasid predecessors, the Sa'di sultans now employed Jews as physicians, diplomatic emissaries, and interpreters. Beginning in 1603, Abraham bin Wach and later Judah Levi served as ministers of the treasury. Members of the Jewish aristocratic Cabessa and Palache families were recruited by the sultan's court as agents and negotiators with European merchants who entered the country. Whereas the authorities increasingly proved to be friendly toward the Jews, the same could hardly be said of the Muslim masses as well as local urban and rural chieftains and governors – the Arabs more than the *Berbers – who from time to time subjected them to harsh humiliations. The Sa'dis were succeeded in 1666 by another branch of their family, the *Alawid dynasty, whose sultans and kings ruled Morocco continuously. The current king of Morocco, Muhammad VI, is a member of this dynasty.

SAFDIE, MOSHE (1938–), architect and urban designer. Safdie was born in Haifa. A youthful Zionist and socialist, he was dismayed when his family relocated to Montreal when he was 15. He graduated in architecture at McGill University in 1961 before moving to Philadelphia, where he apprenticed for two years under Louis I. *Kahn. Safdie returned to Montreal to open his own architectural office. He took charge of the master plan for Expo '67 in Montreal and was able to realize his graduate thesis as "Habitat 67," a cellular housing scheme. Like LEGO, this prefabricated residence complex could be transported and resituated. This innovative design brought Safdie immediate international recognition and project commissions in Puerto Rico and New York.

In 1967 Safdie returned to Israel and a Jerusalem reunified after the Six-Day War. He opened a Jerusalem office in 1970 and contributed significantly to the restoration of the Old City of Jerusalem and to connecting the New and Old Cities of Jerusalem. He also was engaged in developing the city of

Modi'in, the Yad Vashem Holocaust Museum, the Rabin Memorial Center, and the new Ben-Gurion International Airport in Israel.

In 1978, Safdie was appointed Ian Woodner Professor of Architecture and Urban Design at the Harvard Graduate School of Design and established his firm's main office in Somerville, Massachusetts. However, he continued to have a strong Canadian presence. He designed major Canadian public institutions, including the Vancouver Public Library, the Quebec Museum of Civilization, and the National Gallery of Canada. Safdie's institutional, cultural, and educational commissions are also found across the United States, in Israel, and around the world, with projects in Singapore, Iran, Senegal, India, and the Canadian arctic. Many of his commissions have been honored with major national and international awards.

In addition to his headquarters in Somerville, Safdie maintains offices in Toronto and Jerusalem. In 1986 Safdie was made an Officer of the Order of Canada. He is the brother of the artist Sylvia *Safdie.

[Aliza Cramer (2nd ed.)]

SAFDIE, SYLVIA (1942–), artist. The daughter of Leon and Rachel (Essen) Safdie, Sylvia Safdie was born in Aley ('Aleih), near *Beirut, Lebanon, into an artistic and literary family. Her brother Moshe *Safdie (1938–) is a renowned architect. Her brother GABRIEL SAFDIE (1940–) is a poet and teacher of literature. Sylvia Safdie spent her early years in Haifa but immigrated to Montreal with her family in 1953. After graduating from Concordia University in Fine Arts, Safdie earned a national and international reputation as a visual and conceptual artist, with numerous solo and group shows to her credit. She employed a wide variety of media, from traditional drawing, painting, and sculpture to inventories of found objects, installation art, and video. Her work is in permanent collections in Canada, Brazil, Denmark, Switzerland, and the United States. With her trip to Israel in 1978, when she visited desert areas as well as older parts of Haifa, Jaffa, and Jerusalem, Safdie's art embraced her Israeli roots. Other significant art trips took her to Morocco in 1981, Mexico in 1985, and more recently to India. Her pieces are usually developed in specific series, sometimes over many years, often carrying simple Hebrew words as titles: *Be'er* (well), *Ever* (other side), *Glimot* (cloaks), *Keren* (light ray), *Ke'ver* (grave), *Lehav* (eternal flame), *Sefer* (book), *Tzel* (shadow), *Zakhor* (memory). Other series titles include: Bronze/Stone, Earth Marks, Earth Notes, Conjunctions, Feet, Head, Journals, Notations, Source, Steel/Stone, Threshold. Safdie seems to find her strongest inspiration in natural organic forms, including the human figure, and in cultural artifacts. One of her most interesting pieces is *Earth* (1977), an ongoing collection and installation of small vessels filled with earth of various colors and textures collected from some 500 places around the world.

[Bernard Katz (2nd ed.)]

SAFED (Heb. סַפְדִּיָּה), principal town of Upper Galilee, situated on a mountain 2,780 ft. (850 m.) high, 30 mi. (48 km.) east of Acre, 25 mi. (40 km.) north of Tiberias. Not mentioned in the Bible, Safed has sometimes been identified with Sepph (Gr. Σεπφ), the city fortified by Josephus in the Upper Galilee at the time of an expected Roman attack in 66 C.E. (Wars, 2:573); the name is missing in a parallel list (Life, 187–8). In the Jerusalem Talmud (RH 2:1, 58a) Safed is mentioned as one of the mountaintop points from which fire signals were given to announce the New Moon and festivals during the Second Temple period. Two liturgical poems for the Ninth of Av by Eleazar *Kallir, *Eikhah Yashevah* and *Zekhor Eikhah*, refer to Safed as a place where priestly families (Jakim and Pashhur) settled after the destruction of the Temple. The name is repeated in the various *kerovot* (hymns recited before the *Amidah*) by poets who wrote in the sixth, seventh, and eighth centuries.

Between the talmudic period and the Crusades the history of Safed is not known. The town reappears in 1140 under the name Saphet, a "fortress of very great strength between Acre and the Sea of Galilee" built by King Fulk of Anjou. Amalric I, the king of Jerusalem, handed it over in 1168 to the Knights Templar. Twenty years later, after his victory at Hittin, *Saladin took Safed (December 1188). His successors, the *Ayyubids, ordered the dismantling of the fortress in 1220; however, in 1240 Safed was recaptured and rebuilt by the Knights Templar. In 1266 it passed from the crusaders to the Mamluk sultan Baybars, who continued to strengthen its fortifications. In Safed, the *Mamluks established the headquarters of a "Mamlakah," a province which extended over Galilee and the Lebanon.

Jewish settlement in Safed is attested by *genizah* documents from the first half of the 11th century. However, Benjamin of Tudela, who visited the city in 1170/71, stated that no Jews lived there. Fifty years later the settlement was revived under Mamluk protection; R. Zadok, head of an academy of the *gaon* Jacob, was its most prominent member. **Genizah* documents confirm that there was a community at Safed in the 13th century; it continued to exist in the time of R. *Estori ha-Parhi (early 14th century). In 1481 the Jewish community of Safed and of the villages in its vicinity numbered 300 families; it flourished under the protection of the Mamluk governors. Toward the end of Mamluk rule the community was greatly strengthened by an influx of refugees from Spain (1492). In 1495 the Jews of Safed were reported as trading in spices, cheese, oil, vegetables, and fruits. The Sephardi element further increased after the Ottoman conquest in 1516. In 1522 R. Moses *Basola found 300 Jewish families in Safed, composed of Sephardim, Moriscos, and Jews from the Maghreb. Later,

three groups emerged among the Jews of Safed: Sephardim, Ashkenazim, and Italians. Among the prominent leaders of the community in the 16th century was R. Jacob (I) *Berab, who tried to reestablish the Sanhedrin and renew rabbinical ordination (**semikhah*). Other prominent rabbis included R. Joseph *Caro, the author of the *Shulḥan Arukh*, and his contemporary R. Moses *Trani. The leading kabbalist R. Isaac *Luria lived in Safed and his important disciple R. Ḥayyim *Vital resided there for some time. In the 16th century Safed was the center of Jewish mysticism (see *Kabbalah). The spiritual flowering of the town was accompanied by material prosperity. The newcomers established looms, whose products competed with those of *Venice. In addition the Jews of Safed traded in the local produce of Galilee: oil, honey, silk, and spices. They also received both Jewish and gentile pilgrims in their homes.

Turkish statistics of 1548 show Safed as the center of a district of 282 villages. Approximately 1,900 families of taxpayers lived in the town (716 of them Jewish), as well as 251 single taxpayers (only 56 of them Jewish). In 1563 the brothers Ashkenazi set up the first printing press in the town (see below); it was not only the first one in Erez Israel but also the first in the Orient. The Jews of Safed had eight synagogues; they numbered their town among the Four Sacred Cities of the Holy Land, calling it also Beth-El. In addition to the Jewish community, Samaritans also lived there during the 16th century. With the gradual decline in the quality of Turkish rule in the 17th century, the prosperity of the Jewish community also began to drop off. The material decline did not immediately influence the spiritual level of the community. In spite of high taxes and 1,200 poor living on charity, there were 300 rabbinical scholars, 18 schools, 21 synagogues and a large yeshivah with 100 pupils, and 20 teachers at the beginning of the 17th century. The Jewish community at that time split into four congregations: Ashkenazim, Portuguese Jews, Provençal Jews, and Italians. Toward the end of the 17th century the community declined rapidly – in 1695/96 only 20 Jews paid the poll tax. An epidemic decimated the community in 1747 and an earthquake in 1759 killed 2,000, among them 190 Jews. After the disaster the survivors began to leave the town; by 1764 there were only 50 Sephardi families in Safed.

Toward the end of the 18th century the establishment of a more stable government in Galilee (first by the sheikh Dhāhir al Omar and then by Jazzr Pasha) led to an improvement in the position of the community. Moreover, immigration was renewed, with settlers coming from East European countries. In 1778 over 300 Ḥasidim, disciples of R. *Israel b. Eliezer Ba'al Shem Tov, settled in Safed; they were led by R. *Menahem Mendel of Vitebsk. The disciples of Elijah, the Gaon of Vilna, who were opponents of the Ḥasidim, came in 1810, led by R. *Israel b. Samuel of Shklov. Renewed warfare between the Bedouins, and epidemics in 1812–14, caused an exodus of Jews, mainly to Jerusalem and the villages in Galilee.

[Michael Avi-Yonah]

Modern Period

Under the benevolent rule of *Ibrahim Pasha (1831–40) the town at first progressed and became Galilee's commercial center, but toward the end of his rule it suffered from the strife between Arabs and Druzes and the Arab revolt against Ibrahim Pasha. It was particularly stricken in a violent earthquake (1837) which destroyed most of its houses and reportedly caused the death of 5,000 persons, 4,000 of whom were Jews. Many of the surviving rabbinical scholars went to Hebron. The Hebrew printing press of Israel *Bak, which had been founded in 1831, was transferred after the earthquake to Kefar Jarmaq (Mount Meron) and later to *Jerusalem (see below). The Jewish community, which in 1839 had dwindled to 1,500 persons, further decreased to a mere 400 in 1845. However, the country's administration stabilized under the Turkish sultan 'Abdul Majid and Safed's situation improved. The former Jewish inhabitants returned and new immigrants settled, bringing the Jewish community to 2,100 persons in 1856, and to 6,620 in 1895 (comprising 4,500 Ashkenazim and 2,120 Sephardim), who then constituted the majority of a total population of 12,820. The Jewish community increased further to 8,000 persons in 1908, and to 11,000 (out of a total population of 25,000) in 1913.

At the end of the 19th century Rabbi M. Taubenhau founded a weaving shop at Safed to provide employment for Jewish workers, and opened a soup kitchen for the poor. The first Jewish kindergarten was opened on his initiative in 1906 with the support of B'nai B'rith; in 1910 it was enlarged to become a modern elementary school. The initiative for the changeover to productive work in this community influenced groups of Jews from Safed to attempt agricultural settlement at Gei Oni (later *Rosh Pinnah) and at Benei Yehudah on the Golan. Workshops, mostly for local consumption (e.g., bakeries), were opened in the Jewish quarter, but the majority of the community remained dependent on **ḥalukkah* from abroad. In World War I the Safed community was cut off from its sources of support in Europe, and its Jewish population was decimated by hunger and disease. The city's Arab population, whose economy was based on trade, commerce, and auxiliary farming, was less affected. On Sept. 28, 1918, the town was occupied by the British forces under Allenby. In 1922 Safed's population of 8,760 was composed of 5,431 Muslims, 2,986 Jews, and 343 Christians. While good relations between Arabs and Jews had previously been the rule, the Arab population, instigated by the nationalists, assaulted the Jewish quarter in the 1929 riots and killed several of the inhabitants. By 1935 the number of Jews decreased to 2,475, and their percentage in the total population fell to 27%. It shrank further in the 1930s and 1940s when local educational and economic opportunities for the community's youth were limited. In Israel's *War of Independence (1948), less than 2,000 of the 12,000 inhabitants were Jews, living in the narrow quarter on the northern and northwestern slope of Safed Hill. When the British evacuated the town they permitted Arab forces (estimated at 4,000–4,500 men, including detachments of the Iraqi and

Lebanese armies) to occupy the two large police buildings in key positions, thereby sealing off the Jewish quarter. On May 1, 1948, a *Palmah force advanced from positions on Mount Canaan and *Biriyyah, occupied the Arab villages of Biriyyah and Ein Zeitun, and from there entered the Jewish quarter by hidden paths, bringing the number of its defenders from about 60 to 222. On May 10–11, 1948, the defenders launched attacks on the Arab positions and captured them as well as the Mezudah (“fortress”) on top of Safed Hill. The entire Arab population and armed forces fled. Safed became a Jewish town.

After 1948 mainly new immigrants from different countries settled in Safed. Its population numbered 7,900 in 1953 and 13,100 in 1970. The town’s economy was based principally on branches of tourism, recreation, and industry. Some of the hotels operated mainly in the summer months. The dry mountain air in summer is noted for its curative quality for respiratory ailments. The hotels were situated both in the town proper and on Mt. Canaan (3,000 ft., 920m., above sea level). A regional hospital with 500 beds was built in 1970. Industry included metal factories (for sewing machines), textile weaving and apparel, food products (notably instant coffee), tobacco, and diamond polishing.

In 2002 the population of Safed was 26,400, occupying an area of 15 sq. mi. (40 sq. km.). Residents were employed in industry, services, and commerce. The picturesque artists’ quarter, where scores of painters and sculptors live permanently or seasonally, continued to constitute a tourist attraction. In addition to the individual artists’ galleries there was a communal exhibit in the quarter. There were also Bible and Kabbalah museums and a flourishing *ba’alei teshuvah* community as well as thousands of Russian and Ethiopian immigrants. Every summer the city hosts a klezmer festival and pilgrims flock to the graves of Jewish saints on the outskirts of the city, the most famous being the grave of R. *Simeon Bar Yoḥai, where tens of thousands congregate on *Lag ba-Omer.

Historic Buildings and Archaeological Restorations

Safed still contains six old synagogues, including the famous Ari synagogue (of R. Isaac Luria) dating from the 16th century, which belongs to the Sephardi community and consists of two vaulted rooms with a courtyard. Another synagogue of Luria belongs to the Ashkenazim and was renewed after the earthquake of 1837. Other famous synagogues are named after R. Yose ha-Bannai, R. Joseph *Caro, and R. Isaac *Aboab.

Muslim rule in Safed has left numerous monuments, mostly of the Mamluks. These include: the so-called Zāwiyat Banāt Hamīd (built in 1372 with additions in 1449); the Red Mosque (el-Jami’ el-Aḥmar; built in 1275–76); the Jami’ el-Jukandār (named after a Mamluk ruler of 1309–11, though the building actually is from a later date); the “Cave of the Daughters of Jacob” (*Magharat Banī Ya’qūb*) and its adjoining mosque (both repaired in 1412); and the Main Mosque (Jami’ as-Sūq) of 1901 and another of 1913. Excavations were started under Israeli auspices in the citadel by M. Dothan in

1950 on behalf of the Department of Antiquities. Crusader and Mamluk walls and foundations were uncovered (most of the walls visible above the surface had been dismantled by the Arabs) as were a complicated system of wells and channels underground.

[Michael Avi-Yonah]

Hebrew Printing

In 1573 the well-known Hebrew printer Eliezer b. Isaac Ashkenazi and his son, Isaac of Prague, left Lublin for Erez Israel, taking with them their printing tools, type, and decorations. After three years in *Constantinople, where they printed some books, they proceeded to Safed. There they set up as printers in partnership with Abraham b. Isaac Ashkenazi, a resident of Safed who provided the funds necessary for the enterprise. Between 1577 and 1580 they issued three books. Then Abraham left for *Yemen as an emissary of the Tiberias yeshivah, selling his books at the same time. In 1587 Eliezer printed three more books; like the first three, they were all by Safed authors.

In 1832 the printer Israel Bak of Berdichev settled in Safed and issued four books up to 1834, the year the community was pillaged by Arab villagers. In 1836 printing was resumed with the publication of *Pe’at ha-Shulḥan* by Israel of Shklov. As a result of the earthquake of 1837 Bak went on to Jerusalem. Between 1863 and 1866 Dober b. Samuel Kara, of Skole (Galicia), printed some eight books in Safed. Ten years later Abraham Zevi Spiegelmann and his partners began printing, but only three works are known to have appeared up to 1885. In 1913 Barukh Barzel and his partners opened a Hebrew press called “Defus ha-Galil,” with some 20 books being printed up to 1926. This press served Hebrew writers who found refuge in Safed during World War I. Later, A. Friedmann took over the press, which printed the Haganah paper *Kol Zefat* during the War of Independence.

SAFFRON (Heb. כַּרְמִים, *karkom*), the *Crocus sativus*; an aromatic golden dye was extracted from the stigmas of its golden blossoms. It was also dried and used for flavoring foods. In the Bible *karkom* is mentioned once among the various spices that grew in the imaginary spice garden to which the charms of the beloved are compared (Song 4:14). Most of them are enumerated in an early *baraita* as ingredients of the incense used in the Temple (Ker. 6a; v. *Pittum ha-Ketoret*). Since both passages refer to tropical spices brought from distant lands, Immanuel Loew was of the opinion that the *karkom* is a tropical incense plant, the *Curcuma longa*, called by the ancients “Indian saffron,” *Crocus indicus*. This belongs to the family of Zingiberaceae from whose rhizome a golden yellow material called Curcumin is extracted and used for dyeing and flavoring food, as well as for dyeing clothes. This identification is doubtful, however, because the substance is not especially aromatic, nor is there any reason to doubt the traditional explanation that biblical *karkom* is indeed identical with saffron (Sanskrit *kurkuma*, Gr. and Lat. *krokos*). It is a tuber which apparently originated in the mountains of the Caspian Sea region. Its name in Aramaic and Arabic is *zafarana*, from which the word saffron is derived. During the mishnaic and talmudic period saffron was widely used in Erez Israel and Babylon. It was planted in fields, and a “field full of saffron” was considered very precious. According to tradition, Joshua the son of Nun had already made regulations with regard to this plant (BK 81a). The verb *nitkarkem* (i.e., “turned yellow,” pale) derives from the yellow color of the *karkom* (Gen. R. 99:9 et al.). In the Talmud, Abbaye describes the structure of the stigma from which the saffron was extracted (Nid. 20a). In medieval times saffron was a valuable commodity and Jews traded extensively in it. Since some adulterated saffron by adding fibers of horse meat to it, Solomon b. Abraham Adret of Barcelona in the 13th century forbade its use in food. The yellow *badge the Jews were compelled to wear – according to the first papal decree instituting it – had to be dyed with saffron (see Singermann in bibl.). The importance of saffron has diminished, although Oriental Jews occasionally use it to color and flavor their food. It is hardly grown at all in Israel. Seven species of crocus, some with very beautiful flowers, grow wild in Israel.

[Jehuda Feliks]

SAFI, formerly **Asfi**, Atlantic seaport, provincial capital, and province, Tansift region, western *Morocco. It was originally

settled by the Canaanites and absorbed such groups as the Carthaginians, who named the city Asfi, Romans, Jews who arrived from Palestine, Goths, and, after 640 C.E., the invading Arab Muslims. The Portuguese conquered and occupied Safi at the beginning of the 16th century and held on to it until 1541, building a citadel around it. Since then Safi was dominated by the Sharifian dynasties – the Saḍis and Alawites. Safi became a prosperous port serving as a link between vital commercial arteries for parts of southern and western Morocco, and as the port for the export goods of important inland cities like *Marrakesh. The city's prosperity reached its zenith in the first half of the 17th century. Nevertheless, this port is still blessed to this day with burgeoning textile and chemical (phosphate-based) industries. It also conducts major fishing and sardine canning activities.

Safi's Jewish community maintained vital trade relations with Majorca and Portugal during the 14th and 15th centuries. Its Jews were entrusted with overseeing business affairs in the trade conduits between Morocco, Portugal, and Guinea. Numerous exiles (*megorashim*) from the Iberian Peninsula settled there in 1492 and 1497. Even though Portugal expelled its Jews, in Safi and other parts of Morocco, the occupiers – the Portuguese – collaborated with the expelled – the Jewish refugees – in commercial activity.

Under the rule of the Portuguese, the Jews were assured that they would neither be exiled from Safi nor be compelled to accept Christianity. The Portuguese monarchy elevated a number of Jews to prominence, such as interpreters, officials, counselors, and trade negotiators. After the retreat of Portugal and the ascendance of the *Saḍis (the 1540s), the position of the Jews improved markedly. Moreover, with the penetration of British trade and political influence into Moroccan towns along the Atlantic coast, among them Essaouira (*Mogador) and Safi, beginning in the 17th century, the port of Safi was often leased to Jewish merchants, who gradually cultivated a monopoly of the commercial transactions with Europe and the Americas. Among the noted Jewish families engaged in trade were the *Palaches, Xèrès, Corcos, and *Chriqui-Delevante.

On the eve of World War I there were approximately 2,500 Jews in Safi out of no more than 25,000 inhabitants. The community managed to remain large (over 3,600 in 1936 and 4,500 in 1951) throughout the French protectorate era. After Moroccan independence in 1956, its numbers dwindled to 1,434 in 1960 and fewer than 700 in 1968. This was attributed to migration to parts of Europe, Canada, and *aliyah* to Israel.

[Michael M. Laskier (2nd ed.)]

SAFIRE, WILLIAM (1929–), columnist. Born in New York, he studied at Syracuse University but left after only two years,

in 1949. His first job was as a researcher for Tex McCrary, who had a gossip column in the *New York Herald Tribune*. After serving as a correspondent in Europe and the Middle East for WNBC radio and TV, he joined the U.S. Army in 1952, working for the Armed Forces Radio Network for the next two years.

On leaving the service, Safire returned to New York, where he worked for Tex McCrary's public relations firm and helped to produce McCrary's syndicated radio show. In 1959 Safire opened his own public relations firm and traveled to Moscow that year for the American National Exhibition. While there, he met Vice President Richard Nixon and helped to set up the famous "kitchen debate" between Nixon and Soviet Premier Nikita Khrushchev, in which each leader argued the merits of his country's particular system of government.

During the 1960 presidential campaign, Safire was in charge of special projects for the Nixon-Lodge candidacy and wrote much of the campaign literature. In 1961 he established Safire Public Relations Inc., which handled the campaigns of a number of New York Republican leaders, including Nelson Rockefeller, Jacob Javits, and John Lindsay. His first two books appeared during this period, *The Relations Explosion* (1963) and *Plunging into Politics* (1964).

From 1965 on Safire was immersed in Richard Nixon's campaign for the presidency. He ghostwrote Nixon's syndicated column and, in 1968, authored Nixon's election victory speech. His third book appeared that year entitled *The New Language of Politics*. As a special assistant to President Nixon, Safire wrote major speeches for the president on the Vietnam War and economic policies. On loan to Spiro Agnew in 1972, Safire coined the oft-quoted alliterative phrases "nattering nabobs of negativism" and "hopeless hysterical hypochondriacs of history." His articles for the *New York Times* and *Washington Post* during the campaign ultimately led to the invitation for him to write a regular column in the *New York Times*, which he began in 1974.

Safire wrote his White House memoirs in a non-fiction volume entitled *Before the Fall* (1975) and in a political novel, *Full Disclosure* (1977). He combined the talents of columnist and investigative reporter when in 1977 he broke the story on the financial affairs of Bert Lance, President Jimmy Carter's special assistant and key fundraiser. That investigation led to Safire's winning a Pulitzer Prize in 1978 for "distinguished commentary."

In 1979 he began a regular Sunday column in *The New York Times Magazine* entitled "On Language," which focuses on grammar, usage, and etymology.

An avowed "hawk" on foreign policy, Safire also strongly supported Israel. He especially championed the government of Menachem Begin and Begin's bombing of the nuclear reactor in Iraq.

His other books include *On Language* (1980), *Safire's Washington* (1980), *Leadership* (1991), *Fumblerulers* (1991), *Safire's New Political Dictionary* (1993), *The First Dissident: The Book of Job in Today's Politics* (1992), *No Uncertain Terms* (2003), and the novels *Freedom* (1987), *Sleeper Spy* (1995), and

Scandalmonger (2000). He also edited *Good Advice* (with L. Safire, 1993) and *Lend Me Your Ears: Great Speeches in History* (1997).

Safire's grandfather was the publisher of one of New York's daily Yiddish newspapers.

[David Geffen / Ruth Beloff (2nd ed.)]

SAFRA (first half of fourth century C.E.), Babylonian *amora*. In Babylon, Safra studied under *Abba (Pes. 51b). He paid several visits to Erez Israel but never received permission to teach there. His decisions are not quoted in Palestinian sources, although he is known to have discussed *halakhah* with such Palestinian authorities as *Abbahu (Av. Zar. 4a; Git. 29b). As a result he transmitted to Babylon some of the early traditions followed in Erez Israel (Kid. 30a). *Abbaye states that Safra's reports were often quoted in the Babylonian academies (MK 25a), and Safra also asked Zerika specific questions on Abbaye's behalf (Hul. 110b). Among his Babylonian colleagues were *Hanina b. Papa (Git. 29b) and Huna b. Hanina (Shab. 124a). Like most Babylonian scholars, Safra was more versed in the *halakhah* than in *aggadah*. On one occasion, when the authorities of Caesarea doubted Safra's right to exemption from the payment of tax (a concession to scholars), Abbahu pointed out "He is a scholar of the Talmud, not of the Bible" (Av. Zar. 4a).

Safra was a businessman (BB 144a), a partner of *Issur Giora (BM 31b), and his business honesty was legendary (Mak. 24a). It is related that once, while praying, he was approached by a prospective buyer for his ass. The buyer, interpreting Safra's refusal to interrupt his prayers as a sign of disapproval of the price offered, successively raised his bids. However, when Safra had completed his prayers, he insisted on taking the price first offered (*She'iltot, Parshat Va-Yehi*, ed. Minsky, 252). He was also highly praised for his piety and modesty (Pes. 113a–b), and for his courtesy toward his colleagues (Suk. 39a; cf. Hul. 94b). Little is known of Safra's private life. His wife died soon after their marriage, and he never remarried (Pes. 113a). His brother Dimi was also a scholar. When Safra died, in Pumbedita, Abbaye instructed his pupils to accord him the highest honors due to a deceased scholar (MK 25a).

BIBLIOGRAPHY: Hyman, Toledot, 966–9.

SAFRA, family of bankers. The family's roots in banking go back to the early 19th century, in *Aleppo, Syria. From there the Safra family financed trade and exchanged currencies from several different countries in Asia, Europe, and Africa, as well as precious metals such as silver and gold. In the mid-19th century, the family founded Safra Frères et Cie, the first bank bearing the family's name. The reputation acquired by the bank enabled its expansion to Istanbul, Alexandria, and Beirut, and in the 20th century also to Europe and America.

In the early 20th century, JACOB SAFRA (1891–1963) founded the Jacob Safra Bank in *Beirut. He laid the foundation for modern banking based on improved communication and the growing demand for trade between the Middle

East and North America. In 1951 the Safra family moved beyond the Middle East, first to Italy and then, in 1952, to Brazil. Since then the family banking business has expanded to Europe, the United States, and throughout selected markets in Latin America.

Under the direction of Jacob's sons – ELIE (1922–), EDMOND (1932–1999), MOISE, and JOSEPH (1938–) – the Safra's business expanded. Edmond and Joseph focused primarily on furthering the family's prominence in banking worldwide, particularly private banking.

Edmond Safra founded with his father the Trade Development Bank in 1956, which was sold to American Express in 1983. In 1966, Edmond founded the Republic National Bank of New York, which became one of the most respected banks worldwide. In 1988, he established Safra Republic Holdings s.a., a wealth management firm catering to the European marketplace. Both companies were sold to HSBC in 1999.

Joseph built the Safra Brazilian banking and investment businesses, the most prominent of which were Banco Safra Brazil in 1957; Safra National Bank of New York in 1980; Banque Safra Luxembourg in 1985; Banque Jacob Safra Suisse in 2000. Among other successful global investments are Ara-cruz in 1985 (pulp factory) and Cellcom Israel (cellular phone company) in 1994, which was sold in 2005.

The Safra family is distinguished for its prolific philanthropy and is particularly generous to Jewish causes. They have undertaken numerous donations to hospitals, schools, universities, and synagogues throughout the world.

[Rachel Mizrahi (2nd ed.)]

SAFRAI, SHMUEL (1919–2003), scholar in the fields of Jewish history, Talmud, and Bible. Safrai was born in Warsaw and arrived in Palestine with his parents in 1922. From 1931 to 1939 he studied at the Merkaz ha-Rav Yeshivah, being ordained there as a rabbi at the age of 20. In 1952 and 1957 he received his M.A. and Ph.D. degrees from The Hebrew University of Jerusalem, becoming a professor there in 1978. With his colleagues David *Flusser and Robert Lindsey, he founded the Jerusalem School of Synoptic Research, dedicated to the historical, linguistic, and critical study of the synoptic gospels. He was also a frequent contributor to *Jerusalem Perspective* magazine. Safrai received the Jerusalem Prize in 1986 and the Israel Prize in 2002 for “his great expertise in the Mishnah and Talmud, in Greek and Latin sources, and in the formation of nascent Christianity.” He wrote over 80 articles and 12 books, including *Pilgrimage in the Period of the Second Temple* and *Rabbi Akiva ben Yosef: His Life and Teachings*.

[Shaked Gilboa (2nd ed.)]

SAFRAN, ALEXANDER (1910–2006), rabbi. Born in Bacău, Romania, he was elected chief rabbi of Romania in 1940, thereby becoming the only representative of the Jewish community in the Romanian Senate. The Fascist government made Safran their first Jewish hostage, but this did not prevent him from making his home the center of the Jewish underground

movement. He repeatedly intervened with Romanian government officials, the Church, diplomatic representatives of neutral countries, and other international bodies to alleviate anti-Jewish measures and in 1942 was able to bring pressure on the government to resist the Nazi demand that the Romanian Jews be deported. On the advent of Communism in 1948, he moved to Switzerland and was appointed chief rabbi of Geneva and lecturer in Jewish thought at Geneva University. Safran was active in many international Jewish organizations and wrote books on Jewish subjects.

SAFRAN, BEZALEL ZE'EV (1866–1930), Romanian rabbi. Safran studied under his grandfather Hanoch Henikh Safran of Pomeran, Galicia, Isaac Aaron Ittinga of Lemberg and Jacob Wiedefeld of Grimailov. He served as rabbi of the Romanian towns of Secueni from 1887, and of Ștefanești from 1899. From 1905 until his death he was rabbi of the Romanian oil town Bacău and district. He was regarded as the most important halakhic authority in Romania and virtually every Romanian rabbi addressed problems to him. In his responsa he discusses topical problems, such as mixed dancing at weddings, and the heating of food in an electric oven activated on the Sabbath by a time switch. In his responsa he makes wide use of the Jerusalem Talmud, which was generally ignored as a source by the authors of responsa. J.J. Weinberg described him as “one of the most erudite scholars of our generation,” and “a living library of the vast rabbinic literature.”

He wrote *Responsa Rabaz* on the Shulhan Arukh *Orah Hayyim* and *Yoreh De'ah* (1930), and on *Even ha-Ezer* (1962); *Yalkut ha-Hinnukhi*, responsa on aggadic matters – an appendix to Part 1 of the *Responsa Rabaz*; *Doresh le-Ziyyon*, on the religious duty of settling in Erez Israel (about which he expresses enthusiasm), also included in the *Minhat Azkarah* (1933), which contains his biography, and letters appraising his *Responsa Rabaz*; and *Yevakkesh Da'at*, glosses and notes to the *She'elot u-Teshuvot Maharsham* of Shalom Mordecai of Brzeziny. *Yevakkesh Da'at* was originally lost but was recovered among the various works saved from the Holocaust.

Safran left a ramified family, many of whom served in the Romanian rabbinate and were later dispersed throughout the world. They included Hanoch Henikh Safran, rabbi of Bucharest and publisher of his books; Dr. Alexander *Safran, chief rabbi of Romania and then rabbi of Geneva; Dr. Joseph Safran, chief rabbi of Jassy; and Dr. Menahem Safran, rabbi of Ploești.

[Itzhak Alfassi]

SAFRAN, JOSEPH (1911–), rabbi and educator. Safran, the son of Rabbi Bezalel Ze'ev Safran, was born in Bacău, Romania. He studied at the Jewish Theological Seminary in Vienna where, among his teachers were Samuel *Krauss and A. Aptow-

itzer, receiving his rabbinical diploma from the Seminary in 1936 and his doctorate from the University of Vienna in 1937.

In 1938 he was appointed chief rabbi of Jassy, Romania, where he developed a remarkable educational network which strengthened the Jewish educational system of the community, especially after the mass pogrom of 1941.

In 1944 he immigrated to Erez Israel and served as head of the Marriage Bureau of the Chief Rabbinate of Tel Aviv until 1957, when he emigrated to the United States. In the following year he was appointed to the teaching staff at the Yeshiva University in New York and then professor of Jewish Education at the Ferkauf Graduate School of Humanities and Social Sciences at Yeshiva University.

SAFRIN, ISAAC JUDAH JEHIEL (1806–1874), ḥasidic leader. Safrin was the son of Alexander Sender (d. 1818), author of *Zikhron Devarim* (1871), who served as rabbi in Zhidachov, Zhuravno, and Komarno, and founded the Komarno branch of the *Zhidachov dynasty. Isaac Safrin made his living at various times as a stonemason and bookkeeper, renting a tavern in a village and collecting tolls. His teachers in Ḥasidism were his father, his uncle Moses of Sambor, his father-in-law Abraham Mordecai of Pinczow, and Isaac Eizik of Zhidachov.

Safrin left a diary, *Megillat Setarim* (1944), a book of visions (*hezyonot*) similar to Ḥayyim *Vital's *Sefer ha-Hezyonot* (1954). It relates dreams, revelations, and his search for "the root" of individual souls. In it Safrin hints that he is the *Messiah the son of Joseph, using the numerical value of the date of his birth תקס"ו (1806) in a Hebrew letter equation of משיח בן יוסף *Meshi'ah Ben Yosef* ("Messiah son of Joseph"), though he considered that his soul was the reincarnation of Simeon bar *Yohai, Isaac *Luria, and Israel b. Eliezer Ba'al Shem *Tov. Central to his thought was the necessity to bring about the restoration of the world order (*tikkun olam*), considering himself as one who would bring about the imminent End of Days and the Redemption. Thus his attitude toward Shabbateanism combined both attraction and antagonism. Safrin relates in his diary that "from the age of two until I became five years old, I had marvelous visions. A holy spirit filled me and I spoke words of prophecy... and I indeed saw from one end of the world to the other" (*Megillat Setarim*). He tells about his poverty and asceticism; he ate little and slept only two hours daily. He maintained the idea of constant *devekut* ("devotion to God") which is integrated into the pattern of man's life even in acts performed merely for his survival. According to Safrin, *devekut* is a state of constant dialectic tension between the ego (*Ani*) and the divine mystic nothingness (*Ayin*). While aiming at self-denial and lack of consciousness, at the same time one remains conscious of one's own identity and self. "Every man must be in the aspect of *Ayin*... and there [in the aspect of *Ayin*] at every moment the aspects of *Ayin* and *Ani* become one" (*Nozer Hessed*, 2 (1856)).

Safrin reaches radical conclusions in his doctrine of the sublimation of impure or foreign thoughts (*maḥashavot zarot*). The attempt to banish such thoughts entirely from the con-

sciousness he considers heresy, being the denial of the presence of God at every level of existence. Man is obliged to elevate impure thoughts and abolish the evil that is in them by confronting them without utter rejection, despite the possible moral danger resulting from this involvement with the *sitra ahra* ("other side"; "evil"; see *Kabbalah). To dismiss impure thoughts means putting out the divine spark (*nitzotz*) present in evil. According to this theory, many of the disciples of Dov Baer the Maggid of *Mezhrich and other ḥasidic leaders were heretics.

Safrin's works include *Ozar Ḥayyim* (1858), a kabbalist commentary on the 613 precepts; *Zohar Ḥai*, on the *Zohar (pt. 1, 1875; pt. 3, 1881); *Nozer Hessed* (1856), on *Avot*, including *Sefer Adam Yashar*, remedies against the plague, according to Lurianic Kabbalah; and *Shulḥan ha-Tahor* (ed. A.A. Zis, 1963–65) on *Orah Ḥayyim* of the Shulḥan Arukh.

[Esther (Zweig) Liebes]

SAGALOWITZ, BENJAMIN (1901–1970), journalist and historian. Born in Vitebsk, Russia, he graduated in law in Zurich, Switzerland. He wrote for Jewish and non-Jewish papers and from 1938 to 1964 was in charge of the JUNA (Juedische Nachrichtenagentur), the news agency of the representative body of the Jewish communities, the SIG (Schweizerischer Israelitischer Gemeindebund).

In July 1942, a German industrialist, Edward Schulte, approached Sagalowitz about the Nazi plan to exterminate European Jewry. Sagalowitz transmitted this information to Gerhard Riegner, the representative of the WJC in Geneva, who informed the free world. However, the U.S. delayed the official publication for months.

After 1945 he was a correspondent for the influential paper *Neue Zuercher Zeitung* and reported from the Nuremberg Trials and later Nazi trials, and also from the Eichmann trial in Jerusalem.

He built a comprehensive archive about antisemitism and the rise of the Nazi system, but also about Jewish-Christian dialog. He was an active Zionist and supporter of Social Democracy. He received Swiss citizenship after living 39 years in Switzerland.

[Rafi Siano (2nd ed.)]

SAGAN, CARL EDWARD (1934–1996), astronomer. Sagan was born in New York. He graduated from the University of Chicago in 1954, received his doctorate in 1960, and was appointed astrophysicist at the Smithsonian Astrophysical Observatory in Cambridge, Mass. (1962–68), during which pe-

rior he was also assistant professor at Harvard. In 1968 he was appointed a member of the faculty of Cornell University, where he was David Duncan Professor of Astronomy and Space Sciences and Director of the Laboratory for Planetary Studies. He played a leading role in the Mariner, Viking and Voyager unmanned missions to the planets, and was from 1968 to 1980 editor-in-chief of *Icarus: The International Journal of Solar System Studies*. Sagan served as chairman of the Division for Planetary Sciences of the American Astronomical Society, as president of the Planetology Section of the American Geophysical Union, and was responsible for the Pioneer 10 and 11 and Voyager 1 and 2 interstellar messages.

He wrote *The Atmospheres of Mars and Venus* (1961), *Planets* (1966), *Intelligent Life in the Universe* (1966), *Planetary Exploration* (1970), *Mars and the Mind of Man* (1973), *The Cosmic Connection* (1973), *Other Worlds* (1975), *The Dragons of Eden* (1977), *Murmurs of Earth: The Voyager Interstellar Record* (1979), *Broca's Brain* (1979), and *Cosmos* (1980).

Sagan was the recipient of numerous awards, including the NASA Medals for Exceptional Scientific Achievement (1972), and for Distinguished Public Service (1977), the Prix Galabert (1973), and the Pulitzer Prize for Literature (1978).

SAGIS, family originally from Spain who settled in Brusa, Turkey. Among its members were:

(1) JOSEPH SAGIS (d. 1572), an eminent Safed rabbi and head of a yeshivah there. According to a tradition, which is not accepted, however, he was one of the four rabbis ordained by *Jacob Berab I. In Safed he was the main teacher of Eleazar *Azikri in Talmud, and his influence is clearly discernible in his works. He was associated with Joseph *Caro and Moses *Trani (the Mabit), and his signature appears together with theirs on many rulings. In 1570 he founded in Safed an association of Yirei Adonai ve-Hasidim ("God-fearing pious men") who met in the synagogue every Friday to give an account of their actions during the week.

(2) SOLOMON BEN MOSES SAGIS (d. between 1587 and 1589), Safed rabbi. According to one source he was the son-in-law of Isaac *Luria. Among his pupils were Joseph b. Moses *Trani, Hiyya *Rofe, and Tovijah b. Abraham ha-Levi, who quotes some of his teacher's novellae in his *Hen Tov* (Venice, 1605).

(3) JONATHAN SAGIS (16th century) was one of the important pupils of Isaac Luria and an associate of Hayyim Vital. His son-in-law was Moses *Galante I.

[Abraham David]

SAHAGÚN, town in Leon province, N.W. Spain. Jewish settlement there originated near the monastery, at the begin-

ning of the tenth century. Jews filled the roles of purveyors and craftsmen for the monastery. Subsequently the Jewish quarter was situated in a locality called Santa Cruz. In 1126 the town's 30 Jewish heads of families were handed over by King Alfonso *VII to the jurisdiction of the superior of the monastery. In 1171, the superior gave the Jews of Sahagún land for a cemetery situated in a district of vines outside the town. In the 13th century Sahagún was one of the thriving communities in the north. In 1255 Alfonso X formulated several of the regulations of the Sahagún community, which was granted the *fuero* (charter) of the community of Carrión de los Condes, and he made the community dependent for its internal affairs on *Burgos, a day's journey distant. Among other matters, the amount of ransom for the killing of a Jew was fixed at a total of 500 solidos payable to the head of the monastery, and in 1268 the king further prescribed a special *oath for the Jews of Sahagún. Few details are known about the Jews of Sahagún during the 14th century, but at its close it contained 30 heads of families occupied in agriculture and work for the monastery, around which the life of the town was concentrated. In 1401 Henry III yielded to the request of the community representatives and ordered the head of the monastery to take no steps against the community and to respect its rights. Despite this, Sahagún did not escape the impoverishment which befell the communities of Castile toward the middle of the 15th century. The last information available about the Jews of Sahagún dates from June 7, 1492, a few weeks after the edict of expulsion. This is an appeal from the Jews of Sahagún to the crown to ensure that debts be reimbursed to them, and that they not be imprisoned for nonpayment of debts. Comparison with other communities shows that in Sahagún, too, the Christian inhabitants declined to discharge their debts to the Jews compelled to leave the kingdom.

[Haim Beinart]

SAHL, MORT (Lyon, Morton Sahl; 1927-), U.S. comedian and satirist. Born in Montreal, Canada, Sahl worked in experimental theaters, but his success in a San Francisco nightclub in 1953 led to engagements in nightclubs throughout the U.S., and on radio and television. He excelled in monologue, directing his satire mostly at political figures, appealing to young, liberal, well-educated audiences. He prided himself in speaking his truth and "offending everyone." Once close to the Kennedys, he fell out of favor with the family when he made the new president the target of his wit. With Lenny *Bruce, he represented a new kind of stand-up comic, deflating icons and attacking sacred cows. In 1966 he opened his own nightclub in Los Angeles.

He appeared in the Broadway revue *The Next President* (1958) and in *Mort Sahl on Broadway* (1987) and *Comedy To-*

night (1994). On screen, he appeared in the films *In Love and War* (1958), *All The Young Men* (1960), *Johnny Cool* (1963), *Doctor, You've Got to Be Kidding* (1967), *Don't Make Waves* (1967), the documentary *Lenny Bruce without Tears* (1972), *Nothing Lasts Forever* (1984), and the TV documentaries *The Great Stand-ups* (1984), *Jonathan Winters: On the Ledge* (1987), *Sam Peckinpah: Man of Iron* (1992), and *Inside the Playboy Mansion* (2002). He was the subject of the TV documentary *Mort Sahl: The Loyal Opposition* (1989). Sahl was #40 in the film *Comedy Central Presents: 100 Greatest Stand-Ups of All Time* (2004). His book *Heartland* was published in 1976.

[Ruth Beloff (2nd ed.)]

SAHLĀN BEN ABRAHAM (11th cent.), leader of the Iraqi community in *Cairo. Sahlān was a member of an ancient Egyptian family which originated in the town of *Sunbāt. He inherited his position from his father Abraham (Barhūn in Arabic), a spice merchant who had become the leader of the Iraqi community. Sahlān was learned, wealthy, and had good relations with the government. He maintained a regular correspondence with the *gaon* *Solomon b. Judah, the head of the *Jerusalem academy, and supported the Jewish population in Palestine. In times of misfortune, the Jerusalem *gaon* appealed to him to intervene in favor of the scholars of the academy. However, as the community leader of the Jews of Iraqi origin, Sahlān recognized the authority of the *geonim* of Iraq and was referred to by the Iraqi title of **alluf*. R. *Hai Gaon, as well as the exilarch *Hezekiah b. David II, supported him when a controversy broke out within his community in the 1030s. He also wrote some religious poems.

[Eliyahu Ashtor]

SAHL BEN MAZLI'AH HA-KOHEN ABU AL-SURRĪ (second half of the 10th century), *Karaitic propagandist and author. Sahl ben Mazli'ah was a resident, and possibly a native, of Jerusalem, whence he appears to have undertaken periodical missionary journeys abroad in search of converts to Karaism from among the local Rabbanite communities. During one such journey, he came into conflict, presumably in Cairo, with an influential Rabbanite elder, Jacob ben Samuel, who was a zealous follower of *Saadia Gaon and therefore hostile toward the Karaites. When he heard of Sahl's missionary activity before Rabbanite audiences, Jacob addressed a letter to him in Arabic, accusing him of having come to a peaceful community in order to stir up controversy, and then fish in the troubled waters in order to obtain converts to his cause. In reply to this charge, Sahl indited a series of ten short responsa, followed by a long Epistle, both in Hebrew, in which he not only repudiated Jacob's accusations, but also appealed over his head to the Rabbanite community at large to accept his message.

The Hebrew text of Sahl's Epistle (Sahl himself states that "he may write an Ishmaelite (Arabic) version of this Epistle so that he who does not know the Jewish (Hebrew) language may read it." It is not known whether he did so, no copy of it having been discovered so far.) was edited by a 17th-century Karaite scholar, Elijah b. Baruch "Yerushalmi," who added a short foreword citing two (originally three?) of the responsa. The Epistle is prefaced by a Hebrew poem by Sahl criticizing the main Rabbanite doctrines. The work itself appears to be a composite of two original works, a polemical blast at Jacob ben Samuel personally and a Hebrew version of the standard missionary sermon delivered by Sahl, no doubt in Arabic, before Rabbanite audiences. The contrasting tone of these two components reveals Sahl's consummate skill as a propagandist: when addressing Jacob ben Samuel, his language is harsh and his discourse full of angry and contemptuous denunciations; when addressing the Rabbanite public, he assumes a humble and compassionate pose, commiserating with his audience and shrewdly appealing to them to cast off what he characterizes as the heavy yoke of their rapacious and hypocritical leaders, and to go back to the original and pure Mosaic faith, meaning of course Karaism.

The Epistle is of considerable historical value. It is the earliest preserved complete specimen of practical Karaite propaganda, addressed not to the Rabbanite upper class, from which Sahl could expect no sympathy, but to the ordinary Rabbanite man in the street. It describes a number of popular customs and superstitions prevalent at that time among the lower classes, as well as some of the reprehensible practices indulged in by some representatives of Rabbanite officialdom, and it gives some historical details about early Karaite scholars and their works. Sahl's statements are obviously not free from deliberate exaggeration and bias, however, and must be approached with some caution.

In addition to his Epistle, Sahl also wrote (in Arabic) a code of law (*Sefer ha-Mitzvot* and *Sefer Dinim*, presumably two parts of the same work), of which only the Hebrew introduction has been published (by A. Harkavy. *M'assef Niddahim*, 1, no. 13). A tract against Saadia, mentioned in the Epistle, has not yet been discovered. Fragments of a commentary on the Pentateuch, in Arabic, are also tentatively ascribed to him.

The Epistle was published by S. Pinsker, in *Likkutei Kadmoniyyot*, 2 (Vienna, 1860), 24–43; an abridged English translation appears in L. Nemoy, *Karaite Anthology* (New Haven, 1952), 109–22, 349–52.

[Leon Nemoy]

SAHL IBN FADL (al-Tustarī; Heb. Yashar b. Hēsed; late 11th century), *Karaitic scholar of Tustar, or Shustar, in *Persia. Of his numerous Arabic writings, fragments have been preserved

of a commentary on the Pentateuch; a theologico-philosophical treatise entitled *Al-Talwīḥ alā al-Tawḥīd wa-al-ʿAdl*; a disquisition on the *Metaphysics* of Aristotle; and a treatise on incest. Other works by him are known only by title.

[Leon Nemoy]

SAHLINS, MARSHALL (1930–), U.S. anthropologist. A native of Chicago, he was educated at the University of Michigan, where he received his bachelor's degree in 1951, and at Columbia University, where he received his Ph.D. in 1954. From 1955 to 1957 Sahlins was a lecturer in anthropology at Columbia University. He then taught at the University of Michigan at Ann Arbor, in 1957 as an assistant professor, and later as a full professor. In 1974 he left Ann Arbor to join the faculty of the University of Chicago as a professor of anthropology; he was later named the Charles F. Grey Distinguished Professor of Anthropology Emeritus.

Considered one of the most prominent American anthropologists of his era, Sahlins is known as an ethnographer and historian of Polynesia. His theories about European contact in Polynesia have sparked major debates, and his long-running scholarly debate with anthropologist Gananath Obeyesekere of Princeton University has apparently fueled several works by both authors. Much of this debate has involved differing interpretations of the reception of Captain James Cook by native Hawaiians in 1779. Sahlins in early works argued that Cook had been initially welcomed as the god Lono; on his return a week later, Cook was killed by the natives because of a cycle of worship that emphasized the warlike god Ku. Obeyesekere responded in his *Apotheosis of Captain Cook* (1992), emphasizing what he considered the erroneous influence of European myth models, and arguing that Sahlins's theory implied a condescending view of the native Hawaiians.

Sahlins's 1995 work, *How "Natives" Think: About Captain Cook, for Example*, continued the debate by challenging Obeyesekere's insistence on a practical rationality, which suggests that he is captive to Western concepts. Sahlins questions whether Western scholars (including Obeyesekere, as a Sri Lankan who works within a Western tradition) can ever really speak for non-Western peoples. Called an "analytical masterpiece," the work was said to challenge the definitions and practices of the postcolonial academic world.

Sahlins was a Guggenheim fellow in 1967–1968. He was a fellow of the British Academy and an honorary fellow of the Royal Anthropological Institute of Great Britain and Ireland and of the Association of Social Anthropologists of Oceania. He was awarded the Laing Prize by the University of Chicago in 1978 and 1996, and he received the Staley Prize from the School of American Research in 1998.

[Dorothy Bauhoff (2nd ed.)]

SAHULA, ISAAC BEN SOLOMON ABI (b. 1244), Hebrew poet, scholar, physician and kabbalist. Sahula, who had relatives in Burgos and in the town of Guadalajara in Castile, was a disciple of the kabbalist Moses of Burgos and was acquainted with *Moses b. Shem-Tov de Leon, his fellow townsman. He was also trained in traditional rabbinic studies and in medicine. He lived during the reign of Alfonso the Wise of Castile, and traveled from one place to another practicing medicine and avowing not to be dependent upon his patrons. In 1281 he was in Egypt, when he decided to consecrate his life to writing with a clearly moral purpose. His major work, *Meshal ha-Kadmoni* (between 1281 and 1284), was a book of fables expressly written to displace, with an original Hebrew work, such light literature as *Kalila and Dimna* and the *Voyages of Sinbad the Sailor*, which were read extensively by Jews in the Middle Ages in Hebrew translations. Hence Ibn Sahula introduced in his book a similar structure and mode of presentation, and even added illustrations to his book, as was prevalent in non-Jewish literature. The manuscripts and all the printed editions of the work are embellished with extremely interesting miniatures or woodcuts. Divided into five chapters, *Meshal ha-Kadmoni* contains a large collection of parables, stories, and tales, all written in *maqāma*-like form with pedagogical purpose. He declares his sorrow for the way his contemporaries use Hebrew. The author's mastery of language and exceptional talent as a storyteller are revealed in this work, obscured, however, by the large amount of popular scientific material woven into the narrative. Each section starts with the words of a Cynic against one of the main virtues (wisdom, penitence, sound counsel, humility) that are conveniently refuted by the Moralists; the fifth section, on "reverence," is a diatribe against astrology and determinism. The book contains three quotations of one of the oldest components of the *Zohar*, the *Midrash ha-Ne'lam*, but it is closer to Maimonides than to the doctrines of the Kabbalah. The *Meshal ha-Kadmoni* enjoyed a wide circulation in the Middle Ages. Some fragments of another *maqāma*, discovered and commented upon by Schirmann, in which the author calls himself "Isaac," could also be by Ibn Sahula.

Meshal ha-Kadmoni was reprinted eight times, first by Soncino in Brescia (c. 1491); in 1953 I. Zamora published it in Tel Aviv with a fully vocalized text and with the woodcut illustrations from the Venice edition (c. 1547); in 2004 Raphael Lowe published it with an English translation. Its Yiddish version (1st, Frankfurt on the Oder, 1693), the editions of which outnumbered the Hebrew (nine are known), also appeared with woodcuts. M. Steinschneider and M.Y. Bin Gorion translated some of the stories into German. In addition, Sahula wrote a commentary on the Song of Songs (still in manuscript) in a kabbalistic vein, and a commentary to some Psalms.

[Abraham Meir Habermann / Angel Sáenz-Badillos (2nd ed.)]

SAHULA, MEIR BEN SOLOMON ABI (1260?, perhaps 1251–after 1335), Spanish kabbalist, younger brother of Isaac Abi *Sahula. During the 1280s and 1290s, and possibly for a longer period, Sahula lived in *Guadalajara, the center of a group of kabbalists. Halakhic responsa were addressed to him in this city by Solomon b. Abraham Adret (Responsa 1: nos. 270–6, 280–92). His teacher in *Kabbalah was Joshua *Ibn Shuaib, a senior disciple of Solomon b. Abraham Adret. Sahula only began to write kabbalistic works in his later years. It is not clear whether Sahula's commentary (1875) on the esoteric material in *Nahmanides' commentary on the Bible is his own or that of his teacher. Sahula himself re-edited one of the commentaries on the kabbalistic allusions of Nahmanides, taking to task its author and supplanting the original comments with his own. The book that served as the subject of his criticism was not the commentary of Shuaib, but that of another scholar who was not his teacher. He began writing this commentary in 1320, but by 1325 he had only completed the part on Genesis. During that year he began a commentary on Sefer *Yezirah which he completed in 1331, after a delay of some years. The preface to this commentary is a lengthy commentary on *Midrash Shimon ha-Zaddik*, a kabbalistic book of the circle of *Sefer ha-Iyyun*. The commentary on *Sefer Yezirah* is a severe criticism of Nahmanides' comments on the first chapter of *Sefer Yezirah*. It also contains a long passage on the mystical account of creation.

His approach to Kabbalah differs from that of Nahmanides, Solomon b. Abraham Adret, and the *Zohar, and is based on his own speculations, which he ascribed to *Midrash Shimon ha-Zaddik*. In addition, he concentrated on the sayings of the kabbalists of Gerona and of *Asher b. David. When his commentary on *Sefer Yezirah* was completed, he began one on *Sefer ha-Bahir*; apparently he completed this commentary in 1335, and it was published anonymously in the 1883 edition of *Sefer ha-Bahir* under the title *Or ha-Ganuz*. Perhaps the entire manuscript, or at least a major part of his commentary on *Sefer Yezirah* in the Angelica Library of Rome (De Capua 53), is in the author's own handwriting. Sahula also wrote a kabbalistic commentary on *Pirkei de-R. Eli'ezer*, which is lost. His comments on *Sefer Yezirah* and *Sefer ha-Bahir* are highly arbitrary, and he attributes views to Nahmanides which contradict the latter's real opinions. The kabbalists of Salonika in the early 16th century were acquainted with his books. Thus, Solomon *Alkabez accused Sahula of "not aiming at the truth." On the other hand, Meir *Poppers praised his commentary on the *Yezirah* and made it a basis for his own commentary, *Or Bahir* (G. Scholem, *Kitvei Yad be-Kabbalah*, (1930), 147).

[Gershom Scholem]

SA'ID IBN HASAN (13th–14th cent.), Alexandrian Jew who converted to *Islam in 1298, became a fanatical Muslim, and oppressed his former coreligionists and the Christians. Sa'id relates that the cause for his apostasy was a severe illness during which, in a dream, he heard a voice which ordered him to convert. After his conversion, he requested that a public disputation be held between him and the Jewish and Christian scholars in the presence of the sultan. He prided himself that he would prove from the Bible the veracity of the Muslim claims against Judaism. Sa'id did not succeed in holding this disputation and therefore wrote a polemical book in which he presented his opinions. This book, *Maṣāliḥ al-Nazar fi Nubuwwat Sayyid al-Bashar* ("Methods of Study into the Prophecy of the Lord of All Men"), was written in 1320 in the Great Mosque of *Damascus, where Sa'id lived at that time. In this book he set out to prove that certain verses of the Bible are allusions to the coming of *Muhammad, and that it is forbidden to tolerate the adoration of the icons in the churches; he also means to reveal the real nature of the philosophers. However, Sa'id's knowledge of the Bible, Jewish history, and other branches of literature was scanty and his book is of low standard. Generally, Sa'id condemns the Christians more than the Jews. According to him, they are the worst disbelievers because they deify Jesus. The philosophers are the enemies of God and of the prophets, his messengers, and were the inventors of idol worship. Their greatest sin is their belief in the eternity of the world, which he tries to refute in a special chapter of his book.

[Eliyahu Ashtor]

ŞAINEANU, LAZAR (Lazar Schein; 1859–1934) philologist and folklorist. Born in Ploieşti, Romania, Şaineanu was appointed without salary to teach Romanian language and literature at the University of Bucharest and made a living teaching Latin in a high school. In spite of becoming well known and respected for his contribution to Romanian studies, as a Jew he always encountered general antagonism. He won prizes from the Romanian Academy and was the most prominent Romanian philologist, but was continuously denied Romanian citizenship even after he embraced Christianity. He finally left the country in 1901, taking up residence in Paris, where he taught Romanian folklore at the Ecole des Hautes Etudes at the Sorbonne. There he took the French form Sainéan as his name. While in Romania he contributed to Jewish publications under pseudonyms, writing Romanian Jewish history as well as Yiddish philology. He compiled a Romanian dictionary in four volumes (1895) which went through 84 editions. He also wrote several linguistic and folkloristic studies, his monumental work being a study on Oriental influences in Romanian culture and language (3 vols., 1900). As both a folklorist and linguist, he was interested in the popular elements of language which, in turn, led to his interest in slang. After settling in France he gained considerable notoriety for his studies on French slang and on Rabelais.

He published many books in these fields including: *L'Argot Ancien 1455–1850* (1907); *Les Sources de l'Argot Ancien* (1912, 2 vols.); *L'Argot des Tranchées* (1915); *Le Langage Parisien au XIX^e Siècle* (1920); *La Langue de Rabelais* (1922–23, 2 vols.); *L'Influence et la Réputation de Rabelais* (1930). He collaborated on the great edition of Rabelais by Abel Lefranc (1912–22). His opus magnum on French etymology is his *Les Sources Indigènes de l'Etymologie Française* (3 vols., 1925–30) and *Autour des Sources Indigènes* (1935).

[Abraham Feller]

SAINT-DENIS (Heb. דִּיאֲוִיזֵאן), a suburb N. of Paris. In 1111 King Louis VI granted the abbot of Saint-Denis jurisdiction over the five Jewish families who lived there. Jews played a considerable role in the economy of the abbey and contributed toward the development of its estates. A special officer, the “provost of the Jews,” was in charge of all Jewish affairs. The tax paid by Jews amounted to 40 pounds in 1302. On the eve of World War II several hundred Jewish families lived in Saint-Denis, and in 1941, 325 Jews were still accounted for. A community was reestablished after the war, and its size increased, especially with the arrival of Jews from North Africa. In 1971 there were about 2,000 Jews in Saint-Denis. In the early 2000s it was the scene of a number of antisemitic attacks.

SAINTEs, town in the Charente-Maritime department, W. France. The presence of Jews in Saintes is explicitly confirmed from 961. A charter of that date even mentions that they all lived together, probably in the street subsequently called Rue Juive, a name it retained until at least 1629 (it was later known as Rue des Jacobins). In 1236, when the Jews of the whole province of Saintonge, or perhaps only those of Saintes, were attacked by crusaders, Pope Gregory IX called on the bishop of the town to protect them. Although threatened with expulsion by *Alphonse of Poitiers in 1239, Jews were still living in Saintes in 1266. The only scholar of Saintes whose name has survived is a certain R. Isaac who ratified a decision of *Samuel of Evreux. Before 1735 Jewish merchants from *Bordeaux and *Comtat Venaissin were trading in Saintes, with the connivance of an important local personality whose house they used as a warehouse and shop. A few Jews lived in Saintes on the eve of World War II, but in 1970 there was no Jewish community.

SAINT GALL, canton and its capital city in N.E. Switzerland. The first document mentioning Jews in St. Gall is dated in 1268; in 1292 two houses in the town were inhabited by Jews. On Feb. 23, 1349, during the *Black Death, the Jewish inhabitants were burned or driven out. Jews were not allowed to settle in St. Gall again until the 19th century.

The mother community of St. Gall was Hohenems in nearby Vorarlberg. From 1617 Jewish businessmen were present in St. Gall on weekdays. After 1810 there seems to have been a de facto presence in the city, against all official rules. Since the government tried to curb the economic activity of the Jews by introducing costly “patents for Hebrews,” the Jews successfully boycotted the city and the fees were reduced.

The first synagogue, in a private home, was founded in 1866, and a permanent Moorish-style synagogue built in 1881, serving as the model for the synagogue of Zurich. In 1870 the Jewish population was 158. St. Gall had a distinctly liberal religious orientation until after the engagement of Rabbi Lothar Rothschild (1943–68). The rabbi of St. Gall also serves the Jewish community of Kreuzlingen (near Constance). Jews played a prominent role in the St. Gall textile industry until 1912, especially in the famous embroidery branch. In 1919 refugees from Eastern Europe settled in St. Gall, forming a separate community. German and Austrian Jewish refugees began crossing the border into the canton in 1938, and a refugee care organization was set up there. From 1939 to 1944 the town was the center for preparing Jewish refugee children for *Youth Aliyah to Palestine. In 1944, 1,350 Jews (mostly Hungarian) from *Bergen-Belsen concentration camp were brought to St. Gall (on the “Kasztner transport”), and a year later 1,200 Jews from *Theresienstadt camp arrived there. Police officer Paul Gruening, later designated as *Righteous among the Gentiles, helped Jewish refugees after 1938. He was ousted from office, lost his pension, and died in misery. Years after his death, citizens fought successfully for his posthumous rehabilitation. A square in St. Gall is named after him.

In 1952 the two Jewish communities united. In 2004 the community had about 153 members. Its future is uncertain, since many young couples have moved to bigger cities. In 1994 the community received state recognition. For many years, Rabbi Hermann Schmelzer (active from 1968), taught Jewish Studies at the St. Gall University.

The community takes care of the Jewish cemetery in nearby Hohenems (Austria/Vorarlberg). Hohenems is home to a well-organized Jewish museum that displays the history of the region, including eastern Switzerland.

SAINT-GILES, small town W. of Arles, France. The earliest implicit evidence of the presence of Jews in Saint-Giles dates from the beginning of the 12th century, with the polemic representation of an allegorical *Synagoga* on the abbey church (western face, southern door). About 1165 *Benjamin of Tudela found there 100 Jews (or heads of families). The community paid the abbot an annual tenure of 100 sols. In the autumn of 1215, Saint-Giles was the site of a meeting of delegates from communities between *Marseilles and *Narbonne who sought to forestall certain anti-Jewish canons which were being prepared for the Fourth *Lateran Council. After the expulsion of 1306, Jews of the locality took refuge in *Provence, and particularly in Marseilles. Scholars mentioned in Saint-Giles by Benjamin of Tudela are unknown from other sources.

[Bernhard Blumenkranz]

SAINT JAMES'S CONFERENCE (known also as the London Conference), a round-table conference with Jewish and Arab leaders convened by the British government in February–March 1939. After rejecting the partition plan of the Royal Commission (see *Palestine Partition Plans and *White Papers), the British government decided on a drastic change of policy toward Palestine. The round-table conference with Jewish and Arab leaders was to discuss the entire problem. Jewish leaders and representatives of the Palestinian Arabs and, for the first time, the Arab states were invited and convened on Feb. 7, 1939, in the Palace of St. James. Representatives of Iraq, Saudi Arabia, Egypt, and Transjordan attended the conference, together with the Arab delegation from Palestine, headed by Jamal al-Husseini, the lieutenant and kinsman of Amīn al-Husseini, the fugitive leader of the Arab rebellion of 1936–39. The Jewish delegation consisted of the leaders of the Jewish Agency, the Va'ad Le'ummi, Agudat Israel, and some leaders of the Jewish community in Britain. It was headed by Chaim *Weizmann, David *Ben-Gurion, Moshe *Sharett, and Stephen S. *Wise. The Arabs refused to attend joint meetings with the Jews, and the British conferred with each side separately.

The new British policy was based on the assumption that war with Nazi Germany and Fascist Italy was imminent and that the enmity of the Arab world would be a serious threat to British interests in the Middle East, whereas the Jewish side would have no choice in a conflict with the Nazis. The British thus asked that the Jewish leaders “of their own free will dispose of their rights by offering terms of conciliation,” as Lord Halifax, the foreign secretary, put it at a conference meeting on February 14. On March 15 the British government offered its proposals, according to which the “ultimate objective” of the government was “the establishment of an independent Palestine State possibly of a federal nature.” The new state would be neither Jewish nor Arab, but both nations would “share in government in such a way as to ensure that the essential interests of each be safeguarded.” Both the Jewish and Arab delegations

rejected the proposals, and the conference ended in failure on March 17, 1939. Two months later, on May 17, 1939, the British government published its statement of policy known as the White Paper 1939 or the MacDonald White Paper.

[Daniel Efron]

SAINT-JEAN-DE-LUZ, town in the Basses-Pyrénées department, S.W. France. There is no record of the presence of Jews in Saint-Jean during the Middle Ages; it was only from the 16th century that a number of Marranos settled there. In 1612 an official submitted a report to the Conseil d'Etat, notifying it of the presence of a large colony of Marranos. In 1619 Catherine de Fernandés, a woman who had recently arrived from Portugal, was accused of having spat at the Host when she went to receive communion. In spite of the criminal investigation conducted by the royal prosecutor, the populace seized the accused and burned her at the stake in the town square. At the same time a priest of Portuguese origin was also accused of being a crypto-Jew and of having been chosen as priest by a large number of Portuguese New Christians who, in fact, conducted themselves more like Jews than Christians. All the Portuguese New Christians were expelled from Saint-Jean, apparently fleeing to Biarritz.

[Bernhard Blumenkranz]

SAINT-LÉON, ARTHUR MICHEL (1815?–1870), dancer and choreographer; creator of famous 19th-century ballets. Saint-Léon came of a theatrical family and in the 1830s toured Europe, appearing from 1840–42 at the Vienna Opera. He married the celebrated ballerina Fanny Cerrito, and, until they separated in 1850, choreographed many ballets for her, including his first ballet, *La Vivandière*, in London in 1844. Among the many ballets and divertissements he did for the Paris Opera were *La Fille de Marbre* (1847), *Le Violon du Diable* (1849), in which he displayed his accomplishments as a violinist, and *Stella or The Smugglers* (1850), in which he introduced a group of Jewish merchants. In 1859 Saint-Léon became ballet master of the Imperial Theatre in St. Petersburg and there staged the first ballet on a Russian theme, *The Humpbacked Horse* (1864). Touring the European capitals as a guest choreographer, he restaged many of his own works under different titles, which made his output seem larger than it actually was. After the failure of his ballet *The Goldfish* (1867), he returned to the Paris Opera and was part author of the ballet *Coppélia*, staged in 1870 shortly before his death. In 1852 Saint-Léon published *La Sténochorégraphie ou l'art d'écrire promptement la danse*, an attempt at a workable system of dance notation.

[Marcia B. Siegel]

SAINT LOUIS, principal city in the state of Missouri, founded in 1764 as a French outpost in the Louisiana Territory. The area became part of the United States under the Louisiana Purchase in 1804. In 1876, the City of St. Louis formally split from St. Louis County, which itself contains numerous incorporated communities. The Jewish community of Greater St. Louis refers to the combined population of the City of St. Louis and St. Louis County. The professional Jewish Demographic Study, conducted in 1995 by Gary A. Tobin, found that the Jewish population in Greater St. Louis (City and County combined) was 59,400 Jews and related non-Jews living in 24,600 households. The *American Jewish Year Book* (2004) estimates the Jewish population of Greater St. Louis at 54,500. Through the years, formal surveys and *American Jewish Year Book* estimates have been remarkably stable, estimating the Jewish population as between 45,000 and 60,000, with most estimates closer to 55,000. The 2004 United States Census lists the population of the City of St. Louis at 343,279, down from its 1950 peak of 575,238. St. Louis County in 2004 had an overall population of 1,009,235. It is estimated that the Jewish population of Greater St. Louis is roughly 2.1 percent of the total.

Pierre Laclède, a French fur trader, founded St. Louis in 1764. In the 18th century, as in other French territories at the time, no non-Catholics were permitted to settle in St. Louis, a situation which would continue until after the Louisiana Purchase. Jews did make trips during this period in the 1760s from New Orleans and across into the English Illinois country.

According to research by St. Louis Jewish historian Donald I. Makovsky, and follow-up work by historian Dr. Walter Ehrlich, the first Jew definitively known to settle in the city was Joseph Philipson, a Jew of either Polish or German origins, who opened a store in St. Louis in 1807. He had immigrated to Philadelphia around 1800 at the age of 34, with his two brothers; they became involved in merchandising and the lead and fur businesses.

Philipson brought \$10,000 worth of goods from Baltimore to St. Louis, where he gradually expanded his enterprises to include ownership of a brewery (later one of the major industries of St. Louis), a distillery, a sawmill, large stockholdings in the city's second bank and substantial real estate. Philipson was active in cultural and community affairs, but there is no hard evidence that he helped start the local Jewish community. Cincinnati, a rival city, had its first Jewish congregation within a few years after the arrival of its first Jew in 1817, while St. Louis had to wait 30 years after Philipson's arrival, for the founding of a fledgling congregation.

Early Jewish Activities

During the late 1830s and early 1840s, St. Louis was on its way to becoming the fourth largest city in the United States by 1900. From 1835 to 1840, the city population jumped from 8,316 to 16,349, including fewer than 100 Jews. This small Jewish community formed numerous institutions between 1837 and 1842. Starting in 1837, High Holy Day *minyanim* were held, starting with services on the Mississippi River front. In 1840, 33

Jews contributed funds to establish the first Jewish cemetery. United Hebrew Congregation, originally Orthodox, and now Reform, was started officially in 1841 by 12 men from Posen (Prussia), Bohemia, and England. In 1842, the Hebrew Benevolent Society was formed to care for needy Jews.

In 1843–44, various religious practices were initiated by the United Hebrew Congregation. Regular Ashkenazi services in the Polish tradition were conducted in a rented room.

By 1850, when the city's total population was 77,680, about 700 Jews comprised the community. Most were merchants; only two physicians and one lawyer are known to have been among the Jewish community during this period. Factors which limited the growth of the St. Louis Jewish community included the St. Louis Fire of May 17, 1849, a cholera epidemic, and the Gold Rush, which lured many to California.

Civil War Period

Nearly the entire Jewish community in St. Louis supported the North during the Civil War. Isidore Bush (1822–1898), a member of the City Council and Board of Education, and an early congregational leader, strongly supported emancipation. Only one St. Louis Jew was known to be a slaveholder. When General Ulysses S. Grant issued his infamous antisemitic Order 11 in 1862, against Jews in Union-occupied territory, Mayer Friede (1821–1888), a jeweler and a B'nai El founder, serving as Missouri's first Jewish representative in the state legislature, denounced the order on the floor of the House. He was one of many influential Jews who persuaded President Lincoln to repudiate the order and the antisemitic sentiments it expressed.

Congregational Growth

A group of United Hebrew members desiring a less traditional ritual observance, founded Congregation Emanu El in 1847, made up largely of German Jews. In 1849, a similar group of Bohemian Jews formed Congregation B'nai B'rith. They merged in 1852 to form B'nai El Congregation. A proposed merger with United Hebrew fell through when B'nai El received a windfall gift of \$3,000 for a building from the estate of Jewish philanthropist Judah Touro. Completed in 1855 at Sixth and Cerre Streets, the B'nai El building was the first synagogue structure west of the Mississippi.

REFORM MOVEMENT TAKES ROOT. The 1860s was a period of continued growth of Reform Jewish congregations and institutions in St. Louis. The St. Louis Temple Association was founded in 1865, made up of dissident members of B'nai El. By 1867–68, the group was functioning as a nascent congregation, which was formally chartered in 1869, as Congregation Shaare Emeth, the first Reform synagogue in St. Louis, founded as such and part of the national movement. Dr. Solomon Sonneschein (1839–1908) was Shaare Emeth's first rabbi, but in 1866, the congregation's board split over his radical religious views, which resulted in his termination. Rabbi Sonneschein's supporters went with him to found Temple Israel. B'nai El, Shaare Emeth, and United Hebrew, which became

Reform, continue in the 21st century. Other Reform congregations include Temple Emanuel, Central Reform Congregation, Kol Am, and Kol Hanishama.

ORTHODOX AND CONSERVATIVE MOVEMENTS. In the 1870s, at least three Orthodox synagogues were formed, of which Beth Hamedrosh Hagodol (1879) survives. Other Orthodox congregations as of 2006 include Agudas Israel of St. Louis; Bais Abraham Congregation, Bais Menachem-Chabad, Nusach Ari B'nai Zion, Tpheris Israel, Traditional Congregation and Young Israel of St. Louis. B'nai Amoona was founded in 1881 as an Orthodox synagogue but later became Conservative. Shaare Zedek and Brith Sholom Kneseth Israel also serve the Conservative Jewish community of St. Louis.

RECONSTRUCTIONIST AND JEWISH RENEWAL MOVEMENTS. St. Louis is served by two Reconstructionist congregations, the Reconstructionist Minyan of St. Louis and Shir Hadash Reconstructionist Community. There is one local congregation associated with the Jewish Renewal movement, Neve Shalom.

Philanthropic Institutions

In the mid-to-late 19th century, various institutions were created to coordinate fund-raising to serve the entire Jewish community regardless of denomination. These included the Hebrew Benevolent Association (1842), B'nai B'rith Missouri Lodge 22 (1855), which continues to function; and Ebn Ezra Lodge 47, which later merged into the Missouri Lodge. The Hebrew Relief Association was formed in 1871 in the aftermath of the devastating Chicago Fire, which brought many Jewish refugees to St. Louis who were in desperate need of direct relief support. By 1898, various similar organizations merged into the United Jewish Educational and Charitable Associations, which evolved into the present-day Jewish Family and Children's Service. Other groups came together in 1901 to create the Jewish Educational and Charitable Union in order to better coordinate all Jewish philanthropic campaigns. The JECU later changed its name to the Jewish Federation of St. Louis, which continues to serve as the "central address" for all community-wide fund-raising, planning and budgeting for a family of local, national and overseas beneficiary agencies. The Jewish Federation's annual campaign typically raises in excess of \$10 million in its annual campaigns, and has also developed a substantial group of major endowment funds.

Eastern European Immigration

The large waves of Jews from Eastern Europe who came to America's shores from the 1880s through the 1920s, included many who chose St. Louis as their new home. The still-famous 1904 St. Louis World's Fair, formally called the Louisiana Purchase Exposition, celebrated modernism and the status of St. Louis as the fourth largest city in the United States. There was considerable work available for the immigrants in building, maintaining, and later dismantling the elaborate infrastructure for the World's Fair, which took place in the city's Forest Park, a facility larger than New York City's Central Park.

In 1880, the St. Louis Jewish community numbered 10,000 in a city of 350,000. The community was solidly "German," part of the larger wave of German immigrants who came to St. Louis after the Revolution of 1848. These largely acculturated and Reform German Jews, often openly expressed distaste and discomfort over their East European co-religionists, but the very institutions the German Jews helped establish – the Jewish Federation, the Jewish Hospital, the Jewish Family Service, etc. helped the East European Jews adjust to life in the New World. Local Jewish historian Walter Ehrlich, author of the two-volume history of the community, *Zion in the Valley: The Jewish Community of St. Louis*, credits the public school experience of young second-generation Jews at high schools like Soldan and University City High School, for having broken down the barriers between the "German" and "Russian" communities through social contact, dating, and eventual marriage.

Another point of positive contact between the German and Russian communities, which had founded rival country clubs – Westwood for the Germans and Meadowbrook for the Russians – was the Young Men's Hebrew Association (YMHA), founded locally in 1896. The YMHA, which later evolved into the present-day Jewish Community Center (JCC), was initially alien to the East European Orthodox Jewish community. The 1902 YMHA banquet featured an appetizer of Blue Point Oysters. Later, the JCC and other major Jewish organizations would accommodate the *kashrut* needs of the traditional Jewish community.

Other communal institutions were established during this period, which served both the "German" and "Russian" Jewish communities, including the Jewish Hospital (1902), now Barnes-Jewish Hospital. The needs of the elderly were served for many years by two separate institutions, the Jewish Orthodox Old Folks Home and the (Reform) Home for Aged and Infirm Israelites, which were later to merge into the Jewish Center for Aged, now the Cedars at the JCA.

World War I Period

The St. Louis Jewish community strongly supported the American war effort during World War I. The local German population, both Jewish and non-Jewish was especially eager to be seen as being pro-American and not in sympathy with Germany and its war aims. Several prominent members of the Jewish community had leadership roles during this period. Louis Aloe, a member of the Board of Freeholders and later of the Board of Aldermen, became acting mayor of St. Louis, when Mayor Henry Kiel fell ill in 1917. Rachel Stix Michael chaired the instruction committee of the Missouri Women's Committee of National Defense, which trained women to fill jobs vacated by men called to military service. Edwin B. Meissner, Sr. (1884–1956), vice president and later president for 19 years of Congregation Shaare Emeth, and president of the St. Louis Car Company, was commissioned a lieutenant colonel in the Ordinance Reserve in 1918. In addition to railroad and streetcar equipment and cars, his plant

produced aircraft, artillery carts and munitions vital to the war effort.

Residential and Occupational Patterns

In 1900, the Jewish population of St. Louis was about 40,000, among the total city population of 575,288. The German segment, now a minority, was English-speaking, upwardly mobile, middle class, Reform in its orientation, and moving west from the city into new suburbs, including University City and Clayton, and in later decades, Ladue, Olivette, Creve Coeur, Chesterfield and throughout the metropolitan region, including St. Charles County, which is served by B'nai Torah, an interdenominational synagogue. Initially, the Eastern Europeans, Orthodox, and largely Yiddish speaking in the first generation, remained in the immigrant sections of the city.

In 1920, when the total city population was 772,897, some 20,000 Jews had moved into the Central West End of the City and into St. Louis County suburbs in increasing numbers. The 30,000 Eastern Europeans were now moving west into the suburbs. Congregations which had been located in the city, which split from St. Louis County in 1876, began to move to suburban locations, starting with Temple Israel. By the 1970s, beginning with the formation of Central Reform Congregation and its Rabbi Susan Talve, the Jewish community in the city has made a dramatic comeback, although the overwhelming majority of St. Louis Jewry continues to reside in St. Louis County.

Other Local Institutions

The Orthodox and Conservative communities in 1924 established the Vaad Hoeir to oversee *kashrut* and personal status issues. The Vaad Hoeir was one of the few North American communities to employ a chief rabbi of the Orthodox Jewish Community, starting with Rabbi Hayim Fischel Epstein (1874–1942). He was succeeded by Rabbi Menachem Zvi Eichenstein (1911–1981), who in turn was succeeded by Rabbi Sholom Rivkin (b. 1926), who served from 1981 until his retirement as chief rabbi emeritus in 2005.

Day Schools

The Rabbi H.F. Epstein Hebrew Academy, formed in 1945, was the first Jewish day school in St. Louis. In addition, the community is also served by the Block Yeshiva High School and Torah Prep (Orthodox), the Solomon Schechter Day School (Conservative) and the Saul Mirowitz–Reform Jewish Day School (Reform). There is also a Central Agency for Jewish Education, formed in 1969, which works with the various congregational schools and day schools, and which sponsors a number of adult educational programs as well as the Jewish Community High School among others.

Community Relations

In 1938, following the infamous *Kristallnacht* in Nazi Germany, the local Jewish Community Relations Council was formed, bringing together under one umbrella a current total of 19 Jewish community relations, defense, and communal groups. Among its founding members were the Jewish Federation,

B'nai B'rith, and the local chapters of the American Jewish Committee, the American Jewish Congress, the Anti-Defamation League and Hadassah, among others.

Zionism

Chronicled in detail in the book *The Struggle for Zion's Rebirth* by Zionist leader Moses Joshua Slonim, organized Zionism took root in St. Louis by 1898. The first time the Zionist flag flew over an official building was at the Palace of Nations at the 1904 World's Fair. In 1911, several local Jews, led by Simon Goldman, sponsored a settlement in Palestine near Lake Kinneret, called Poriah. The project fell victim by 1916 to a series of misfortunes, but the village *Poriyyah took form on the site of the ruins of the original St. Louis Zionist enclave.

Over the years, a thriving chapter of the Zionist Organization of America, along with Hadassah and other Zionist groups, including the Pioneer Women (now Na'amat), took root and flourished over the decades. Jewish Federation-sponsored "Missions to Israel" and events sponsored by the local chapters of the American Israel Public Affairs Committee and other groups have also contributed to strong local Jewish support of the Jewish community in Israel. During the 1940s, there was an active chapter of the anti-Zionist American Council for Judaism, but the overwhelming majority of the local Jewish community is strongly pro-Israel.

Writers and Chroniclers

St. Louis Jewry has produced locally and nationally noted writers, novelists and poets through the decades, including Howard Schwartz, author of numerous books of poetry, stories, fables and a major work on Jewish mythology published in 2005. Schwartz and Barbara Raznick, director of the Saul Brodsky Jewish Community Library, have also co-edited several editions of *The Sagarin Review*, *First Harvest*, and *New Harvest*, collections of literary contributions, short stories, poems and life stories by St. Louis Jewish writers. Other writers of note include Louis Daniel Brodsky, a noted poet; historian Max I. Dimont (*Jews, God and History*), Fannie *Hurst, Stanley *Elkin, Harold Brodkey, Howard *Nemerov, poet Michael Castro, Stephen Schwarzschild, A.E. Hotchner, and Glenn Savan. Mystery writer Michael Kahn has also developed a national following, and Ellen Harris has published two acclaimed "true crime" books, including *Guarding the Secrets*, about a local cell of the Abu Nidal Palestinian terrorist organization.

Local Jewish historians include, notably, Dr. Walter Ehrlich, author of the definitive two-volume *Zion in the Valley: The Jewish Community of St. Louis*; Burton I. Boxerman; Murray Darrish, a leading expert on Jewish genealogy and local Jewish history; and Donald I. Makovsky, author of the definitive monograph on Joseph Philipson and his family, the first known Jews from St. Louis.

The back files of the *St. Louis Jewish Light* (first published in 1947; reorganized in 1963), the local Jewish community weekly newspaper, is also an excellent repository of information about St. Louis Jewry, as is the St. Louis Jewish Archives, located in the Saul Brodsky Jewish Community Library.

[Robert A. Cohn (2nd ed.)]

SAINT-PAUL-TROIS-CHÂTEAUX, town in the Drôme department, S.E. France. The first evidence of Jews in the town dates from 1206, when a Jew named Benicrescas is mentioned in a document. In 1239 a "Tour des Juifs" is recorded. Using the *blood libel of *Valréas as a pretext, in 1247 the bishop of Saint-Paul had the Jews of his diocese thrown into prison after he had stripped them of their belongings; Pope Innocent IV firmly protested against his action. Even after the Dauphiné – in which Saint-Paul-Trois-Châteaux was situated – had come under the authority of the king of France, Jews continued to live in Saint-Paul. However, in 1486 only three families remained there, and there is no further mention of the Jewish community after that date. A Hebrew inscription in the presbytery hall could still be seen at the close of the 19th century.

[Bernhard Blumenkranz]

SAINT PETERSBURG, Pinellas County, Florida. Florida's fourth largest city, with 61 square miles, is located on the west coast of Florida in Pinellas County (St. Petersburg, Clearwater, Palm Harbor, Largo, Gulfport and Tarpon Springs). It has 234 miles of coastline, mostly on the Gulf of Mexico, and is known as the "Sunshine City." The first-known Jews were Mr. and Mrs. Henry Schutz, who arrived from Germany in 1901 and opened a dry goods store, the only Jewish merchants for seven years. Their store on Central Avenue, which had a basket on a pulley to carry money to a balcony to make change, later served as a temporary home for St. Petersburg High School. Olga and Leon Manket opened a dry good store in 1908; their daughter Anne was the first-known Jewish child born there. The first-known boy was Julius Lovitz in 1909; the Lovitz family were the first-known Jews in Tarpon Springs, a Greek sponge fishing village. Sam Lovitz was known as "Mr.

Jew Sam." That family moved to Clearwater, and another relative, Abe Tarapani, had a store in St. Petersburg in 1911, before also moving to Tarpon Springs. The Ben Haliczers had a gas station and tire store from 1910 and had four children in Florida – two in St. Petersburg. Ben's brother Leon arrived in 1921 and had a watch repair store.

In 1920 St. Petersburg had 14,000 people, streetcars, daily band concerts in the park, unpaved streets, and people who went to the Beach to open businesses were thought "crazy." The pioneer Jewish families' names, in addition to those already mentioned, included Jacobs, Davis, Goldman, Sierkese, Cohen, Katz, Heller, Benjamin, Wittner, Rothblatt, Argintar, Lew, Solomon, and Gilbert. Some of these early families had come from Europe first to Key West, Florida, then migrated to other areas of Florida, including St. Petersburg. The Jews faced the "gentlemen's agreement" and antisemitic signs, lived near Central Avenue and had bicycle, jewelry, and grocery stores. On Sundays and holidays, Jewish families would drive through Pinellas County to pick oranges at the groves for 50 cents a bushel or drive to the waterfront and swim, filling jugs with the water that supposedly had health-giving properties – an early spa. In the evenings, the families would congregate in each other's homes to play poker and pinochle while their children played. They ordered kosher meat from Finman's in Tampa, which was delivered by boat across Tampa Bay; often it arrived spoiled, which discouraged many from keeping kosher. By 1925 a bridge was built and the meat came by bus – a big improvement!

The Jews also went to Tampa for religious services until 1923, when Congregation B'nai Israel was chartered and Conservative services were held in a rented store. The first president was Hymen Jacobs, and daughter Goldie Schuster recalls, "The discrimination and the schools were worse than her native Chicago." The first Jewish women's organization, the Ladies Auxiliary, was organized by Dora Goldberg to help the needy. In 1928 Reform Jews founded Temple Beth-El. The membership outgrew its original small home in downtown St. Petersburg, moving to its present location in 1955, and completing the Religious School addition in 2002 to meet the needs of its 600 member families.

During World War II, many Jewish servicemen enjoyed the hospitality of the small Jewish community for Sabbath dinners and the Passover *seder*. Bunny Rothblatt Katz collected scrap metal for the war effort in 1941 with her slogan "Your scrap will whip the Japs." Her father, David, was a legless veteran who owned Southern Grocery and was active in both civic and Jewish affairs. After the war, the Jewish population grew rapidly to about 1,500 families, and the first Jewish nursery school was opened in 1959. Since 1960 Gulf Coast Jewish Family Services has been helping infants, children, families and elders in serious physical, medical, mental, social and financial crisis, enabling them to remain free and independent with families and loved ones. In 1970 Menorah Manor was built to serve the Jewish aged; it includes a nursing home and assisted living facility. Philip Benjamin Tower

is an apartment complex adjacent to Menorah Manor. In the early 21st century plans were being made to build a \$16 million North County Campus of Menorah Manor. In 1986 the Jewish Federation of Pinellas County approached Jim Dawkins and Karen Wolfson Dawkins to start and publish their own Jewish community newspaper for Pinellas County, *Jewish Press*, which continues bi-weekly.

Opened in 1992 on the grounds of the former Jewish Community Center of Pinellas County in Madeira Beach, The Florida Holocaust Museum (www.flholocaustmuseum.org) – the fourth largest Holocaust museum in the U.S. – moved in 1998 to the heart of St. Petersburg’s museum district. The permanent exhibit includes an original boxcar from Poland once used to transport prisoners during the Holocaust. Traveling art and historical exhibitions change regularly, and the museum is currently the only one of its kind in the country to house a permanent art collection related to the Holocaust. The museum was begun as the vision of St. Petersburg philanthropist and businessman Walter Loebenberg, who escaped Nazi Germany in 1939, together with a group of other business and community leaders.

The Jewish Federation of Pinellas County has the following beneficiary agencies: Gulf Coast Jewish Family Services, Pinellas County Jewish Day School, Golda Meir/Kent Jewish Center in Clearwater, and TOP Jewish Foundation. A Jewish demographic study in Pinellas County in 1993 showed 24,200 Jews who live there year round. Most have come from Michigan, Ohio, New Jersey, New York, and Pennsylvania. The congregational roster for Pinellas County includes five Reform, three Conservative, two Orthodox, and one independent.

[Marcia Jo Zerivitz (2nd ed.)]

SAINT PETERSBURG (**Petrograd** from 1914 to 1924; **Leninograd** from 1924 to 1992), capital of Russia until 1918, now in the Russian Federation; industrial city and major port on the Baltic Sea. Some apostates or Marranos appeared in St. Petersburg soon after its foundation in 1703. Anton Divier, who was of Portuguese Jewish origin, was appointed the first police minister of the new capital in 1718. “The Portuguese Jew,” Jan Dacosta, was one of the jesters at the royal court during the first half of the 18th century. Jewish physicians and financiers held various positions in the city during the 18th century: Lippmann was financial agent of the court during the 1720s. In 1738 the proselyte officer Alexander *Voznitsyn and Baruch Leibov of Dubrovna, who had introduced him to Judaism, were burnt at the stake in St. Petersburg. Because of the intolerant attitude of Czarina Elizabeth (1741–62) the few Jews who lived in St. Petersburg left. *Catherine II, on the other hand, was interested in attracting Jewish contractors, industrialists, and physicians to the city, and issued instructions to the authorities to overlook the presence of those “useful” Jews who lived there with their families and clerks and had

the protection of court officials. Toward the end of Catherine’s reign, there was a large community in the town; most prominent was the contractor Abraham *Peretz, whose household included Mendel of Satanov and J.L. *Nevakhovich. The latter published the first work of Russian Jewish literature, *Vopldshcheri iudeyskoy*, in St. Petersburg in 1803.

From the end of the 18th century, when St. Petersburg had become the government center for millions of Jews who were incorporated into the Russian Empire after the partition of Poland, communal workers and *shtadlanim* streamed into the city. Many others arrived as a result of their business activities or in search of a livelihood in the prosperous city. During the years 1798 and 1800–01, Shneur Zalman of Lyady, the leader of the *Chabad* Hasidim, was imprisoned in St. Petersburg. In 1802 a group of Jews leased a plot of land in the Lutheran cemetery, thus laying the foundations of a permanent community in the city. The situation of the Jews worsened with the accession of Czar Nicholas I. He ordered that all Jews living in the city “without doing anything” be expelled. According to the official estimate, there were 370 Jews living in the city at that time. These included craftsmen, merchants, and various *shtadlanim*; most of them were ordered to leave. Regulations were issued authorizing Jews to stay in St. Petersburg on business for a maximum period of six weeks; by a special permit from the local authorities this could be extended to between six and ten months. Right of residence was granted to a number of physicians (including the czar’s dentist and the midwife of the royal court). After 1827 many *Cantonists went to St. Petersburg and some of them brought their families to the city. They maintained a prayer house, and those Jews who had to come to St. Petersburg on business found refuge in their homes. The prohibition on Jewish residence was stringently applied; anyone found living in the city without a permit was liable to be pressed into the army. From time to time the police hunted down Jews living in the city illegally. There was a large and increasing number of apostates, most of whom changed their names and disappeared among the general population.

The situation changed once more with the beginning of the reign of Alexander II, especially after the publication of the laws granting right of residence outside the *Pale of Settlement to merchants of the first guild, intellectuals, and craftsmen. Wealthy Jewish merchants and financiers (the families *Guenzburg, *Polyakov, A. *Varshavski, Friedland, L. *Rosenthal, and others), physicians, advocates, and scientists soon settled in the city. Many Jewish students registered at the university and the other higher schools of the city (326 in 1886 and 848 in 1911). The influence of the wealthy and the *maskilim* was decisive within the community. Jews and apostates played an important role in the life of the city as journalists, publishers, advocates, scientists, artists, and physicians. In 1881 there were 17,253 Jews (c. 2% of the total population) in St. Petersburg. Ten years later, after a period of strict supervision of residence rights under Police Minister Greser, there were 15,331 Jews (1.6%). According to the 1897 census there were 17,254 (including 310 Karaites), forming 1.4% of the popula-

tion. In fact, the number of Jews in the city was greater at all periods, because many, whose right to reside there was dubious, evaded the census officers.

Despite its small numbers, the St. Petersburg community played an important role in Russian Jewish life, thanks to the riches of individual members and their proximity to and influence at the court. The barons of the Guenzburg family, as well as other rich Jews, were considered as the spokesmen of the whole of Russian Jewry before the central government. From time to time gatherings of rabbis and community representatives were called to St. Petersburg for official and semiofficial meetings, at which vital problems were discussed. From the 1860s an organized community existed in the city. The right of a communal vote depended on payment of 25 rubles tax, thus assuring that the wealthy had control of the community. Several leading personalities held the position of **kazyonny ravvin* ("government appointed rabbi") in St. Petersburg, including A. Neumann, A. *Drabkin, and M. *Eisenstadt. Among the traditional rabbis was Isaac *Blaser, who held office from 1864 to 1878; the last rabbi of the community was David Tevel *Katzenellenbogen (1907–30). The poet J.L. *Gordon was the community secretary from 1872 to 1879. After many endeavors and numerous refusals, a magnificent central synagogue, containing 1,200 seats and built in the Moorish style, was completed in 1893. In spite of prohibitions and unremitting police persecutions, the community continued to grow, numbering 35,000 (1.8% of the population) in 1914. Severe *censorship regulations caused the Jewish press (Hebrew, Russian, and Yiddish) to be centered in St. Petersburg from the 1870s until the 1905 revolution. The newspapers *Ha-Meliz* (1871–73 and 1878–1904), *Ha-Yom* (1886–88), *Dos Yudishes Folksblat* (1881–90), and the first Russian daily newspaper in Yiddish, *Der Fraynd* (1903–08), were all published there. Above all, the city was the center of Russian-Jewish journalism and literature. The periodicals *Yevreyskaya Biblioteka* (1871–80), *Razsvet* (1879–83), and *Voskhod* (1881–1906), the Zionist organ *Razsvet* (1907–18), and many other newspapers, were also published in St. Petersburg. One of the outstanding publications was the Russian-Jewish encyclopedia, *Yevreyskaya Entsiklopediya*.

In addition to local cultural and charitable institutions (such as the Society for the Support of Poor Jews, which was established in 1907 to coordinate the activities of the various charitable societies and was recognized as a legal institution under whose aegis their work could be carried out), many nationwide Jewish organizations had their headquarters in St. Petersburg. Oldest of these organizations was the Society for the Promotion of Culture among the Jews of Russia (founded in 1863). Others included *ORT; the Jewish Colonization Association (ICA); the Hovevei Sefat Ever (called *Tarbut after the 1917 Revolution); the Historical-Ethnographic Society, which published the historical quarterly *Yevreyskaya Starina*; and the Society for Jewish Folk Music. The city's Asian museum housed a valuable Hebrew department, based on the library of the wealthy M. Friedland. The Imperial Public Library (now the State M.E. Saltykov-Shchedrin Public Library)

contains one of the world's oldest and most important collections of Hebrew manuscripts. Under the initiative of Baron D. *Guenzburg, courses in Oriental studies were opened in St. Petersburg in 1907. It was intended to develop these into a higher institute of Jewish studies. The concentration of public and cultural institutions in the town attracted Jewish authors and intellectuals (these included A.A. *Harkavy, J.L. *Katzenelson, S. *Dubnow, and M. *Kulisher).

With the outbreak of World War I, *YEKOPO ("Jewish Committee for the Relief of War Victims") was established to concentrate all the relief activities on behalf of hundreds of thousands of Jews who were refugees from the battle regions. After the February Revolution in 1917, all residence restrictions affecting the Jews of Petrograd were abolished, and the city became a center of the organizational activities of all the parties and factions of Russian Jewry. In June 1917, the seventh conference of the Zionist Organization of Russia was held in the town. Large numbers attended, demonstrating the strength of the movement and the loyalty of Russian Jews to the Zionist ideal even after they had been granted full civic emancipation. Preparations were also made to convene a general Jewish assembly in Petrograd. During the troubled days in the latter part of 1917 a Jewish battalion under the command of J. *Trumpeldor was formed, made up of Jewish soldiers of the local garrison. Around this battalion a self-defense unit was organized, which protected Jewish lives and property during the revolution of October 1917. The transfer of the seat of government from Petrograd to Moscow (1918) and the shortages and famine reigning in the city during the Russian civil war severely affected the Jewish community. Many Jews returned to their families in provincial towns. In 1920 there were 25,453 Jews (3.5% of the total population) in Petrograd. With the consolidation of the Soviet regime, the number of Jews rapidly increased, to 52,373 (4.9%) in 1923 and 84,505 (5.2%) in 1926. The 1926 census listed their occupations as: clerks (40.2%), craftsmen (14%), laborers (13.5%), government and municipal employees (10.2%), and liberal professions (2.5%); the remainder was unemployed. Organized Jewish life was liquidated in Leningrad as in all places throughout the Soviet Union. A small group of Russian-Jewish intellectuals attempted to continue its literary-scientific work under the new regime. They maintained their former cultural societies and continued to publish scientific and literary periodicals in Russian. By the end of the 1920s, these projects were also liquidated by the Soviet regime. Some intellectuals then left Russia (including S. *Dubnow and S. *Ginzburg), and others were integrated in Soviet life (I. *Zinberg, Yu. Hessen). In a poem, the Hebrew poet H. *Lenski described the atmosphere of the city during the Soviet period. According to the January 1939 census, there were 201,542 Jews (6.32% of the total population). The percentage of academicians among Jews was much higher than in the general population: 123 vs. 31 per 1,000 persons. Many thousands of Jews were drafted into the Red Army, and tens of thousands evacuated. The city was under German siege for 900 days (September 8, 1941–late Janu-

ary 1944), and about 900,000 inhabitants died from fighting activities and starvation, among them tens of thousands of Jews. Also remaining in the besieged city were Jewish writers such as A. Chakovski and Vera Inber, who documented the time. After the war, during the “Cosmopolitan” hunt, many intellectual Jews suffered.

[Yehuda Slutsky]

In the census of 1959, 162,344 Jews were registered in Leningrad but the real number was probably closer to 200,000; 13,728 of them declared Yiddish as their mother tongue. The city had one large, imposing synagogue, from the prerevolutionary period, a wedding room, a poultry slaughterhouse, and a *mazzah* bakery. Thousands of Jews congregated in the synagogue and its vicinity on the High Holidays. The congregation published a Jewish calendar on the eve of Rosh Ha-Shanah in the 1950s and 1960s. In the 1950s the city’s synagogue board had a dynamic chairman, Gedaliah Pecherski, who was not only devoted to the religious needs of his congregation, but also initiated petitions to the Soviet government and the municipal authorities asking to be allowed to organize courses in such subjects as Hebrew and Jewish history. One petition was also signed by scholars, among them the non-Jewish authority on ancient and medieval Hebrew literature, K.B. Starkova. The petitions were rejected out of hand, and Pecherski was arrested in 1961 and sentenced to seven years’ imprisonment, ostensibly for having “maintained contact with a foreign [Israel] embassy.” The rabbi of the synagogue, Rabbi Lubanov, who had been imprisoned in a forced labor camp during the Stalin era, returned to office and was venerated by the congregation as a scholar and spiritual leader.

The department of Oriental and Hebrew studies at Leningrad University was run mostly by scholars, Jewish and non-Jewish, who studied there before the Revolution and who tried to continue the tradition of independent research and scholarly publication in the field of Jewish history, archaeology, etc. Joseph Davidovich Amusin published a book on the Dead Sea Scrolls which became popular with the Soviet public at large. The Saltykov-Shchedrin Library contains a rich section of Hebrew and Yiddish books (about 40,000 volumes) and also displays a number of Hebrew and Yiddish periodicals from abroad, including Israel. Jews and non-Jews frequented this section, though it was generally assumed that “excessive interest” in Hebrew language and literature was viewed with suspicion by the security officials. In 1962 a Jewish drama circle was established, but it soon stopped functioning because of lack of funds.

In 1962–64, as in other parts of the U.S.S.R., the baking of *mazzah* in the Leningrad synagogue was discontinued by the authorities. In 1962, with the intensification of the anti-religious drive, directed mainly against Judaism, several Jews were arrested, some of them charged with “illegally” baking *mazzah*. The same year, on the eve of Simḥat Torah, 25 Jewish youths were arrested while dancing in the street near the synagogue. The local newspaper, *Vecherniy Leningrad*, carried an article (Oct. 27, 1962) condemning the synagogue’s activity. In

1963 flour for *mazzah* baking was confiscated in private Jewish homes. From 1963 the authorities prohibited the use of the Jewish cemetery, which was finally closed down in 1969. Jews buried their dead in a section allotted to them in the general cemetery. In 1964, when thousands of Jewish youths danced and sang near the synagogue on Simḥat Torah eve, several of them were arrested. Later the militia put up barriers in the street opposite the synagogue to prevent Jewish youth from congregating and dancing on Simḥat Torah.

After the Six-Day War (1967), Jewish youth displayed more openly its identification with Israel in spite of the official anti-Israel campaign. Many started to study Hebrew in private groups; others protested publicly against the refusal to grant them exit permits for Israel and their protests were published abroad. In June 1970 some of them were arrested in their homes and places of work and their trial has not yet taken place (January 1971). Another group of young Jews, mostly from Riga, together with two non-Jews, were tried in Leningrad in December 1970 for allegedly planning to hijack a Soviet plane in order to land abroad and ultimately to reach Israel. Two were sentenced to death and the others to prison terms of 4–15 years. A worldwide storm of protests, including by Communist parties and newspapers in the West, preceded the appeal of the condemned in the Supreme Court of the Russian Republic in Moscow 1971; the death sentences were commuted to 15 years’ hard labor and some of the other sentences were reduced.

Though mass emigration reduced its Jewish population from 107,000 in 1989 to 40,000 in 2002, Saint Petersburg re-emerged as a vibrant Jewish community after the fall of Communism, with a full range of religious and educational facilities, including a yeshivah and a Chabad House. Most cultural activities were centered in the Grand Choral Synagogue, which included a home for the poor and an orphanage.

SAINT-RÉMY-DE-PROVENCE, town in the Bouches-du-Rhône department, S.E. France. The presence of Jews in Saint-Rémy is confirmed from 1305 at the latest; at that time all the metal dealers were Jews. The community increased rapidly, augmented by refugees from the kingdom of France. That the community was important is indicated by the fact that it owned several synagogues, a bakery, a market, a butchery, and a cemetery (the last is still in existence). Until 1339 Jews supplied all the meat sold in Saint-Rémy, and the townsmen complained that the ritually slaughtered meat was tasteless. The community continued to exist until 1501 when the Jews were expelled from Provence. At that time several

local Jews accepted baptism. There was no subsequent settlement.

[Bernhard Blumenkranz]

SAINT-SIMONISM, a 19th-century social reform philosophy and movement, inspired by Claude-Henri de Rouvroy, Comte de Saint-Simon (1760–1825). It had prominent disciples of Jewish descent. Its ultimate goal was a technologically oriented industrial society, under a dictatorship of competent scientist-technicians and property-owning businessmen and bankers, inspired by the bizarre ideology of a “New Christianity” shorn of other-worldliness and asceticism. In a nonviolent fashion, caste privileges would be surrendered, work provided for all, rewards allocated according to merit, inheritance abolished, and equality of both sexes established. Saint-Simonism displayed an elective affinity toward the compassionate social messianism of the Hebraic prophets. Revivalist exaltation – upon which the sect eventually foundered – included the expectation of the woman-messiah “Mother,” a Jewess from the Orient, who would formulate the new morality and whom the disciples must go out and find. Saint-Simon’s earliest apostle was Benjamin Olinde Rodrigues (1795–1851), who was of Jewish origin. He nominated the two “supreme fathers” of the Saint-Simonian temple, Bazard (1791–1832) and Erefantini (1796–1864), and published Saint-Simon’s and the disciples’ collected writings. Among those Rodrigues introduced into the fold were his brother, Eugene, and his cousins, Emile and Isaac *Péire with whom, later, he promoted French railway construction and corporate banking. Other eminent Saint-Simonians were Léon *Halévy, Gustave d*Eichthal, and Jules *Carvallo. The active presence of the Jewish element sparked the violent reaction of both the Socialist Fourier and Catholic Church spokesmen, who denounced Saint-Simonism as a Jewish plot to subvert civilization. After due consideration it was rejected by Marx and Engels, together with all other pre-Marxist doctrines. However, among the contemporaries who were impressed by the doctrine were the historians Carlyle and Michelet, the sociologist Comte, the composers Berlioz and Liszt, and the author George Sand, in addition to such German Jewish intellectuals as Eduard *Gans, Heinrich *Heine, Rahel *Varnhagen, and Moritz *Veit.

[Hanns G. Reissner]

SAINT-SYMPHORIEN-D’OZON, village in the Isère department, S.E. France. When the village was ceded to *Dauphiné by *Savoy, there was already an important Jewish community there, which in 1355 was granted advantageous

privileges: freedom to bequeath both movable and immovable property; permission to engage in commerce and moneylending; exemption from various tolls; liberty of movement; and protection of the community against judicial irregularities. The numerical and economic importance of the community can be gauged from the fact that it paid almost half of the taxes imposed on the Jews of Dauphiné. In 1408 the municipality asked the dauphin to reduce the rate of interest of Jewish moneylenders from 50% to 25%. In the course of the 15th century the Jewish community ceased to exist.

[Bernhard Blumenkranz]

SAITOWITZ, STANLEY (1949–), U.S. architect. Saitowitz was born in Johannesburg, South Africa, and became professor of architecture at the University of California. Known in California for a variety of buildings, especially lofts, and home design, as well as the award-winning New England Holocaust Memorial (1995) in Boston, Saitowitz’s wide-ranging works also include schools, synagogues, skate parks, a house for the drummer of Metallica, and the San Francisco Embarcadero Promenade. He experimented with fusing elements of modernism with classicism. He was cautious in his use of computer-assisted designs, preferring to maintain the conceptual integrity of his designs. Speaking at Yale University in 2004, Saitowitz described his theory of “expanded architecture” to mean that he tends to focus on air rather than substance in his designs, in order to create a world of what he called “constructed emptiness.” His buildings are constructions of bars and rectangles characterized by wide, empty expanses and light. From his early houses in the Transvaal to his recent urban loft structures in the Bay area, he has focused on bringing light into his interiors. His loft buildings seem to squeeze remarkable spaces into densely crowded urban spaces. The Yerba Buena Lofts, south of Market Street in San Francisco, is a 300,000 square foot building containing 196 loft and live-work units, plus ground floor commercial space. His work has been described by Robert A.M. Stern, dean of the Art and Architecture School at Yale, as a “free-wheeling modernism.” He is conscious of the environmental effect of his buildings. For example he designed a house in Napa Valley, CA, whose rusted walls were meant to reflect the seasonal changing of the colors of the landscape. Such characteristics suffuse the New England Holocaust Memorial in Boston, which depends on air and light, and their opposite, darkness and shadow, for their dramatic effects. Situated in the very heart of downtown Boston, the Memorial has an open and airy feeling that contrasts sharply with its underground component and its fiery pit. The design features six 54” high glass towers lit from within. Their sides are etched with six million numbers suggesting the tattoos on the arms of murdered Jews. A black granite path passes under the towers. At the base of each tower, there is a stainless steel grate that covers a six foot deep chamber where the names

of the primary Nazi death camps are inscribed. Smoldering coals at the base of each pit illuminate these names. Saitowitz hoped to convey the ungraspable nature of the Holocaust, as well as survival and hope.

SAJAROFF, MIGUEL (1873–1958), pioneer of agrarian cooperativism in Argentina. Born in Mariupol, the Crimea (Russia), he earned a degree in agronomical engineering in Wittenberg, Germany. Under the influence of Tolstoyan thought, he aspired to become a farmer and live close to nature. Acquiescing to the request of his brother-in-law, Noah *Yarcho, he went to Argentina in 1899 and settled in the Colonia Leven, Entre Ríos, as an “independent settler,” on land granted him by the *Jewish Colonization Association (ICA). He hoped to improve the economy and the cultural life of the settlement by participating in the establishment of the cooperative Fondo Communal in Domínguez in 1904. After assuming its presidency in 1908, he advocated and promoted the development of agricultural cooperatives not only in all the Jewish settlements but also throughout Argentinean life. After his death a town in the province of Entre Ríos was named Ingeniero Miguel Sajaroff.

[Lazaro Schallman]

SAKEL, MANFRED JOSHUA (1900–1957), Austrian psychiatrist. Born in Nadvorna, Galicia (then Austria), Sakel went to Berlin, where he specialized in treating addicts. On an accidental overdose of the then newly discovered insulin, given to an addict who was diabetic, he observed that the patient lost her craving for narcotics. Sakel then started his experiments with the insulin cure for therapeutic purposes in schizophrenic patients. After the rise of Hitler, Sakel returned to Vienna and continued his work at the University Clinic, the birthplace of Wagner-Jareggs’ experimental malaria treatment and a center of therapeutic initiative. It was here that Sakel developed the details of the insulin coma treatment, which for many years was the standard therapy in schizophrenia, especially in its early stages. In 1935 he published his dissertation on insulin therapy; *Neue Behandlungsmethode der Schizophrenie*. In 1936 Sakel emigrated to the U.S. and continued his work at the New York State Mental Health Department. He refused many offers of academic appointments, preferring to remain independent. He died in New York. His two principal works, *Epilepsy* (1958) and *Schizophrenia* (1958), were published posthumously. A Sakel Foundation was established, which arranged two international congresses, one in 1959 and one in 1962, that dealt with the topic of biological therapy and, especially, insulin cure.

Sakel was a fervent Zionist and politically supported the *Irgun Zeva’i Le’ummi movement.

SAKIAI (Shakyai or Shakyay; Heb. Saki; Ger. Schaken; Pol. Szaki; Rus. Shaki), city in S.W. Lithuania. The first Jewish settlement was in the 18th century, and in 1897 there were 1,678 Jews (74% of the total population) in the town. In 1915 the Russian retreat during World War I brought pogroms against the Jews, who soon emigrated from Sakiai. When the war ended, some Jews returned, and in 1923 there were 1,276 Jews (62% of the total population) in the town. When the town became a district capital, the economic condition of the Jews began to deteriorate. Many immigrated abroad or to the large cities; a 1936 census showed that only 600 (20% of the total population) had remained in Sakiai. With the German invasion of 1941 the community was destroyed. Sakiai was the birthplace of the brothers Dov (Boris) and Isaac Leib *Goldberg.

[Yehuda Slutsky]

SAKOWITZ, BERNARD (1907–1981), U.S. retailer. Sakowitz was born in Galveston, Texas, five years after his father, Tobias, and his uncle Simon co-founded the specialty store that carried the family name in nearby Houston. Under Bernard Sakowitz’s leadership, Sakowitz Brothers would not only become a Houston institution but would enjoy national prominence. It would never go public but remained the last of the family-owned major specialty chains in the U.S. Sakowitz left Texas to attend the Wharton School of Commerce at the University of Pennsylvania, earning a B.S. in 1929. Almost immediately, he began his retail career at R.H. Macy & Co. in New York City, but before the year was out he returned to Houston to join the family business. He married the former Ann Baum in 1933. They had two children, ROBERT (1938–), who would eventually head the store, and LYNN, who would marry Oscar Wyatt, a controversial energy tycoon, and become an internationally distinguished hostess. In 1937, Sakowitz was named vice president in charge of merchandising. He served as a captain with the U.S. Army Air Force during World War II, then rejoined the store. In 1957, he was appointed president of the company, which by then had opened four stores in Houston. Two years later, Sakowitz expanded to the suburbs, building a store on Westheimer Road. The move turned that location into a robust retail destination. Neiman-Marcus soon joined Sakowitz there, as did the Galleria shopping mall, and the area became known as Uptown Houston. In the 1960s, Sakowitz opened branches in other cities, including Dallas and Midland, Texas, and Phoenix, Arizona. By the 1970s, the chain had 17 specialty stores in Texas, Arizona, and Oklahoma. Sakowitz, who was named Retailer of the Year by *Esquire* magazine in 1972, became chairman in 1975. He was succeeded as president by his son, who had joined the business in 1963 after graduating from Harvard University. When Sakowitz died in 1981, Robert added the titles of chairman and chief executive officer. Bernard Sakowitz was a prominent member of the Houston community. His interests ranged from the Houston Farm and Ranch Club to the city’s Contemporary Music Society. He was on the board of Congregation Beth Israel and was a director

of the Texas Medical Center and St. Luke's Episcopal Hospital, leading many fundraising campaigns for cancer research. Within four years after his death, a recession in the oil industry, upon which the Houston area was so dependent, had taken its toll and the store declared Chapter 11 bankruptcy. Hooker Corporation of Australia funded the Chapter 11 petition and took majority control, but to no avail. Sakowitz was put up for sale, but liquidated in 1990 after failing to find a buyer.

[Mort Sheinman (2nd ed.)]

SAKS, GENE (1921–), U.S. director, actor. Trained as an actor at the Dramatic Workshop of the New School for Social Research, a precursor of the Actors Studio, Saks was a co-founder of an acting troupe in the late 1940s. He made his Broadway acting debut in *Juno and the Paycock* (1947). He began directing on Broadway in 1963 with Carl *Reiner's play *Enter Laughing*, and went on to excel in staging comedies and musicals, including *Mame* (1966), which featured his then wife, Beatrice Arthur, and *Same Time, Next Year* (1975). But he became best known for his deft touch with comedic plays by Neil *Simon. He directed Simon's autobiographical trilogy *Brighton Beach Memoirs* (1983), *Biloxi Blues* (1985), and *Broadway Bound* (1986). He also directed several Simon movies, including *Barefoot in the Park* (1967), with Robert Redford and Jane Fonda, *The Odd Couple* (1968), with Jack Lemmon and Walter *Matthau, and *Last of the Red Hot Lovers* (1986). He made his film acting debut in 1965, recreating his stage role as a paranoid kiddie-show host, Chuckles the Chipmunk, in *A Thousand Clowns*.

[Stewart Kampel (2nd ed.)]

***SALADIN (Salah al-Dīn, Yūsuf ibn Ayyūb; 1138–1193)**, founder of the dynasty of *Ayyubid sultans, of Kurdish origin. In 1169 he was elevated to the rank of vizier in Egypt, which was then still under the weak dominion of the *Fatimids.

In 1171 he removed the last Fatimid sultan, al-Āḍid, from his throne, thus returning Egypt to the nominal rule of the *Abbasid caliphs by mentioning the name of al-Mustaḍī, the caliph who then ruled in Baghdad, in the Khuṭba (the sermon of the festive Friday prayer), and on coins. For a while, Saladin considered himself to be a vassal of Nūr al-Dīn, the Seljuqid *atabek* (maior domus) and ruler of Syria who lived in Damascus and had established the state which was a serious challenge to the crusaders in Erez Israel and Syria. Immediately after the death of Nūr al-Dīn in 1174, however, Saladin seized control of Syria. In a brilliant and rapid campaign, in 1187, at the head of 12,000 horsemen, Saladin conquered Tiberias, Hattin, and Jerusalem, and almost the whole of Erez Israel fell into his hands. These victories prompted Christian Europe to organize the Third Crusade (1189–92). In the meantime, Saladin's treasury had become empty and his troops were halted before Tyre, where some of them deserted him. The crusaders succeeded in occupying Acre after a siege which lasted two years (1189–91), and Saladin was compelled to sign a peace treaty with the king of England, Richard the Lionhearted, ac-

cording to which the Erez Israel coastal region from Jaffa to Tyre remained in the hands of the crusaders. Saladin died a short while later.

The attitude of Saladin toward the Jews, the Christians, and even the defeated Christians who lived under his rule, was most tolerant. According to Judah *Al-Ḥarizi, he issued a manifesto in 1190 in which he called upon the Jews to settle in Jerusalem (their presence in the town had been prohibited during its occupation by the Crusaders). Indeed, when Al-Ḥarizi visited Jerusalem in 1216, he found an important community which was composed of immigrants from France, the Maghreb, and former inhabitants of Ashkelon. Ibn Abi Uṣaybī'a, a friend of *Abraham ben Moses b. Maimon, relates that *Maimonides was the court physician of Saladin and of his son al-Malik al-Afdal, and that both greatly honored the Jewish physician and scholar. It appears, however, that there is no historical basis to this information.

[Haïm Zew Hirschberg]

SALAMAN, English family. **CHARLES KENSINGTON SALAMAN** (1814–1901), pianist and composer, was elected a member of the Royal Academy of Music at the age of ten, and made his debut on the concert platform in 1828. After completing his music studies in Paris, he returned to London in 1831 and, besides composing, teaching, and giving recitals, devoted much time to promoting the musical life of the capital. He inaugurated an annual series of orchestral concerts (1833), founded London's first amateur choral society (1849), helped to establish chamber concerts (1853), and was one of the founders of the Musical Society of London (1858).

In 70 years of composing, Charles Salaman produced many works for piano, organ, and orchestra, and a comic opera, *Pickwick* (1889). He was especially prolific as a writer of songs in English, Italian, and Hebrew and of devotional music for the synagogue. An early advocate of Reform Judaism, he composed more than a hundred settings for the service of the West London Synagogue, as well as anthems and settings of psalms. Several of his anthems were used by Anglicans, and his setting of the 84th Psalm was sung at the reopening of Worcester Cathedral. He wrote *Jews as they Are* (1882, 1885²). Four of Charles Salaman's sisters rose to prominence in art and literature. **JULIA SALAMAN** (1812–1906), who married Louis Goodman, was a well-known portrait artist who exhibited at the Royal Academy from 1838–1901. Her younger sister **KATE SALAMAN** (1821–1856) was noted for her miniature portraits. **RACHEL SALAMAN** married Sir John *Simon in 1843, and wrote *Records and Reflections*, selected from her writings during half a century (1894). **ANNETTE SALAMAN** (d. 1879) assisted in compiling a second edition of *Footsteps in the Way of Life* (1874²), an illustrated guide to the Bible, and the children's story book *Aunt Annette's Stories to Ada* (1876¹; 1879⁵).

Charles Salaman's oldest son, MALCOLM CHARLES SALAMAN (1855–1940), was a drama and art critic. From 1883 to 1894 he was a drama and art critic of the *Sunday Times* and, from 1890 to 1899, was also on the staff of the *Daily Graphic*. In the art world he was regarded as England's outstanding authority on color prints and woodcuts.

His numerous books on prints included *The Old Engravers of England* (1906), *Old English Colour-Prints* (1909), *The Great Painter-Etchers from Rembrandt to Whistler* (1913), and the series *Modern Masters of Etching and Masters of the Colour Print*. From 1923 to 1938 he published an annual review, *Fine Prints of the Year*. He edited the published plays of Sir Arthur Wing Pinero (1891–1900). Three of his own plays were staged – *Deceivers Ever* (1883), *Dimity's Dilemma* (1894), and *A Modern Eve* (1894). He also wrote a large number of song lyrics.

SALAMAN, REDCLIFFE NATHAN (1874–1955), pathologist and geneticist. He was director of the Pathological Institute of the London Hospital from 1901 to 1904. His later scientific investigations were devoted chiefly to the genetics and diseases of the potato, and in 1926 he was appointed director of the potato virus research station in Cambridge. One of his major achievements was the initiation of stocks of virus-free seed potatoes. He wrote *Jewish Achievements in Medicine* (1911) and *Racial Origins of Jewish Types* (1922). Two books on his specialty were *Potato Varieties* (1926) and *The History and Social Influence of the Potato* (1949). In 1935 he was elected a Fellow of the Royal Society.

During World War I Redcliffe Salaman served in Palestine and in 1920 published *Palestine Reclaimed*. He had a lifelong commitment to the Jewish community and to Zionism, was a trustee of Jews' College, London, and a governor of the Hebrew University of Jerusalem. He also served as president of the Jewish Historical Society of England, the Jewish Health Organization of Great Britain, and the Jewish Commission for Relief Abroad. His first wife, NINA RUTH SALAMAN (née Davis; 1877–1925), was well known as a poet and translator of medieval Hebrew poetry. Her own verse included *Apples and Honey* (1921) and she translated *Judah Halevi's poems (1924). Their son, MYER HEAD SALAMAN (1902–1994), was a bacteriologist and doctor. Engaged in cancer research and pathology in World War II, he joined the Department of Cancer Research, London Hospital Medical College, in 1946, where he became director in 1948.

[George H. Fried]

SALAMANCA, city in western Spain. The Jewish settlement of Salamanca seems to have been one of the oldest in the kingdom. From its start at the time of Christian rule, the Jewish quarter was close to the old citadel. The first documents

mentioning Jews in Salamanca date back to the end of the 12th century. In the *Fuero* granted to the city by Fernando II, the Jews enjoyed judicial equality with the Christians. Following the death of Alfonso IX of León, the Jews of Salamanca were severely attacked but soon recovered, and the community became one of the strongest and most prosperous in the area. In the middle of the 13th century a *barrio de iudeis* is mentioned. Later the quarter was called *iuderia*. In the second half of the 13th century three synagogues are mentioned: the *vieja* (old), the *menor* (small), and the *nueva* (new). At that time many of the streets in the Jewish quarter were well known; one of the synagogues was situated in that leading down to Calle Postigo Ciego, where the Jewish shops and workshops of the Jews were located. At the beginning of the 13th century the city was granted a charter (*fuero*) which included important sections relevant to the local Jews, and full rights of protection and justice equal to those of the other natives of Salamanca, Christians and Moors. At each feast of the nativity the Jews of Salamanca had to pay 15 gold pieces to the crown. The charter also regulated several matters regarding the slaughter of *kasher* meat and its sale in the town and Jewish quarter. In 1285 the community was made to pay 1,800 maravedis as a special war tax. At that time there were some 300 to 500 Jews in Salamanca. The Jews were merchants, moneylenders, physicians, shoemakers, and parchment makers.

From the 14th century several resolutions of the town council regarding the affairs of its Jews are known. In 1335 the council forbade Christians to receive medical aid from Jew or Moor; it was forbidden for Jewish or Moorish wet nurses to tend Christian children; Christians were forbidden to serve in Jewish houses; Jews and Moors were forbidden to rent houses in the neighborhood of the Christian churches and cemeteries. Four years later (1339) *Alfonso XI confirmed the privilege of the Jews of the town, dispensing them from appearing before Christian judges, lay or ecclesiastic, in matters concerning the collection of debts owed them by Christians, though, in principle, they had to be judged by Christian judges in mixed lawsuits. Toward the end of the 14th century R. Menahem b. Hayyim he-Arukh (d. 1425) was active as rabbi of the community. He approached *Isaac b. Sheshet Perfet (Responsum 251) in regard to the sentencing of two murderers who attacked a member of the community under orders from the *alcalde* (mayor) of the town. Isaac b. Sheshet permitted him to sentence them to death and execute them, but at the same time pointed out that the whole affair belonged to the jurisdiction of the king. In 1389 the Jews requested permission to erect a new synagogue, as one of their synagogues had been confiscated.

The sparing of the community of Salamanca during the persecutions in 1391 was accomplished by Vicente *Ferrer, who came to the town and preached in its synagogues in 1411–12. He succeeded in persuading many to convert, and one of the synagogues was turned into a school named "The True Cross." In 1413 Juan II conferred upon the University of Salamanca the *bet midrash* with its courts and all that belonged to it, most of

the community having left Judaism by then. In place of the *bet midrash*, a hostel for pupils of the university was set up.

It would appear that the community recovered in the course of the 15th century. Yet instead of the yearly tax of 14,740 maravedis in the old coinage, it only paid the sum of 1,200 maravedis in 1439. In 1456 the community was accused of murdering a Christian child (Joseph ha-Kohen, *Emek ha-Bakha* (1895), 93). However, Henry V intervened in time, and the Jews of the town were saved from the danger. Abraham b. Samuel *Zacuto, who was born there, was engaged in 1480 in astronomical work by the bishop of Salamanca. His *Sefer Yuhasin* is the most important chronicle written by a Jew from Sefarad.

In 1490 the community participated in the sum of 208,600 maravedis toward the redemption of the Jewish captives of *Málaga. When preparing to fulfill the order of expulsion, the community sold its synagogues and cemeteries. But on June 25 the crown forbade the sale or purchase of all congregational property. On July 30 the old synagogue was handed over to the head of the Church in the town, and he converted it into a residence. Abraham *Seneor, together with Luis de Alcalá, received the right to collect the debts which the Jews left behind. There were many Conversos in Salamanca, and there is also knowledge of Conversos who went there in order to revert to Judaism. On Oct. 25, 1490, theologians and jurists gathered there at the instigation of the monk Fernando de Santo Domingo to hold a *consulta de fé* in the matter of the child *La Guardia. Upon the expulsion, the Jews of Salamanca crossed the border to Portugal near Ciudad Real. Even after the expulsion the University of Salamanca continued to be a center for Hebrew studies, and in the 16th century some of the best intellects of Spain were concentrated in it.

The Jewish quarter in Salamanca, which was in the southwest of the city, was not exclusively inhabited by Jews, some of whom lived outside it.

[Haim Beinart / Yom Tov Assis (2nd ed.)]

SALAMON, ERNO (1912–1943), Hungarian poet. Born in Gyergyószentmiklós, Transylvania (now Gheorghieni, Romania), Salamon joined the clandestine Communist Party at Cluj. As a journalist of the left, he was persecuted for his political activities, first by the Romanians and, after 1940, when northern

Transylvania was annexed to Hungary, by the Hungarians. He was also imprisoned several times. In 1942, Salamon was mobilized into a forced labor unit of the Hungarian army and sent to the eastern front. During the Hungarian retreat, he caught spotted typhus and, delirious with fever, ran amok and was shot to death by Italian soldiers. Salamon is considered one of the outstanding modern Hungarian poets. Although his chief subject was the suffering of the exploited workers, Salamon also wrote daringly expressive love poems.

During his lifetime, he published two collections of verse, *Gyönyörű sors* (“A Wonderful Fate,” 1937), and *Szegények küszöbén* (“On the Threshold of the Poor,” 1938). Others appeared in an anthology published by a group of young Jewish intellectuals, with the support of the Cluj B’nai B’rith, entitled *Kelet és Nyugat között. Zsidó fiatalok antológiája* (“Between East and West – An Anthology of Young Jews,” 1937). Salamon contributed verse to the left-wing press, wrote plays, and translated poems from the Romanian. After World War II some of his works appeared in an anthology which also contained poems by two other Transylvanian-Jewish poets who died in the Holocaust, Sándor Korvin and Viktor Brassai; and volumes of Salamon’s selected poems were published in Bucharest, *Dal utódoknak* (1961, 1967²); *Összegyűjtött versek* (1966); and in Budapest, *Mindmáig békétlenül* (1966). On the occasion of the 25th anniversary of his death, a statue of Salamon was erected in his birthplace.

[Yehouda Marton]

SALANT, JOSEPH SUNDEL BEN BENJAMIN BENISH (1786–1866), spiritual father of the *Musar movement. A pupil of Ḥayyim *Volozhiner and of R. Akiva *Eger, he lived in Salant in Lithuania. Despite his great learning, he refused to accept a position as rabbi and barely earned a living as a small merchant, working only a few hours a day and for the rest of the day studying Torah. He conducted himself with extreme modesty, dressing as a humble peasant and never indicating his knowledge of the Torah. In 1831, during the Polish revolution, he was suspected of spying and miraculously saved from hanging. The First of Kislev, the day of his deliverance, was observed by his descendants as a holiday. In 1837 he went to Erez Israel, settling in Jerusalem. While he was still in Vilna, the heads of the Vilna *kolel* in Jerusalem appointed him to be their rabbi. However, when his son-in-law, R. Samuel *Salant, went to Erez Israel he vacated the office in his favor. Nevertheless, many continued to turn to R. Joseph Sundel. He established several institutions in Jerusalem, but occupied no official position in them. In Jerusalem too he refused to support himself from public funds and opened a vinegar factory. His humility and good-heartedness, which became legendary, greatly influenced his student R. Israel *Lipkin (Salanter), founder of the Musar movement, who held up Joseph Sundel as the ideal ethical man. In his will he requested no title of honor. He had two additional distinguished sons-in-law, Uri Shabbetai,

a member of the Jerusalem *bet din*, and Nathan Nata Natkin, one of the emissaries of the Holy Land.

[Itzhak Alfassi]

SALANT, SAMUEL (1816–1909), chief rabbi of *Jerusalem and one of the foremost 19th-century rabbis in Jerusalem. Born near Bialystok (Russia, now Poland), Salant studied at yeshivot in Vilna, Salant, and Volozhin. His second wife was the daughter of Joseph Sundel *Salant, who had inspired the Musar movement, and he continued studying at his father-in-law's house. He set out for Erez Israel in 1840, but was delayed for a few months in Constantinople, where he first met Sir Moses *Montefiore, with whom he established a firm friendship. In 1841 he reached Jerusalem, where the heads of the *kolel Lita* appointed him rabbi of the Ashkenazi community. A leading figure in Jerusalem, he became Ashkenazi chief rabbi in 1878, holding the position until his death. Salant strove to develop the institutions of the Ashkenazi community, which increased from 500 members at his arrival to 30,000 at the time of his death, and succeeded in obtaining for the Ashkenazim the official status previously enjoyed only by the Sephardi community. Between 1848 and 1851, and in 1860, he traveled to several European countries to collect money for religious institutions in Jerusalem. Salant was a founder of the Ez Ḥayyim Talmud Torah and Yeshivah, the Bikkur Ḥolim Hospital, and the Keneset Israel General Committee, which united all the *kolelim* under a single administration. He also encouraged the establishment of the Jewish quarters, such as Me'ah She'arim, Keneset Israel, and others, outside the Old City walls. His only son, BEINUSH, was one of the seven founders of the Naḥalat Shivah quarter. Salant's attitude to the Haskalah movement and Zionism was moderate. He favored the introduction of Hebrew and Arabic into the curriculum of the Talmud Torah schools and opposed the excommunications pronounced by zealots on "modernists." He also tried to lessen the friction between the veteran settlement and the new *yishuv*, combated the activities of the mission schools and ameliorated the relations between the Ashkenazi and Sephardi communities.

Salant lived an exemplary life of the utmost frugality. He devoted himself without stint to the needs of his community, even in the last years of his long life when his eyesight was affected. In his method of study he tended toward the plain meaning, eschewing *pilpul*, and followed the *minhag* of *Elijah b. Solomon Zalman, the Gaon of Vilna. He was an outstanding *posek*, distinguishing himself by his power of decision, and showed a definite tendency toward leniency in his decisions.

Some of his novellae have been published in the talmudic journals *Torat Ziyyon* and *Torah Or*, and in the *Ha-Tevunah* of Israel Lipkin *(Salanter). They are also found in the works of

contemporary rabbis. On his 90th birthday, in 1906, the Keren Shemu'el Fund was launched in Jerusalem.

[Geulah Bat Yehuda (Raphael)]

SALCHAH (Heb. סַלְכָה), town in Bashan, which marked the farthest limit of the territory of Og, king of Bashan, who was defeated and dispossessed by the Israelites (Deut. 3:10; Josh. 12:5; 13:11). According to 1 Chronicles 5:11, the tribe of Gad settled there. It is usually identified with modern Salkhad, but some question this identification, as it is doubtful if the area of Gad extended that far to the northeast.

In postbiblical times, the place is mentioned in several Nabatean inscriptions (as Salḥad) and was apparently part of the Nabatean kingdom in the first century c. e. Jewish sources identify it with Seleucia. In Roman times it was called Tricomias and was garrisoned by the Equites promoti Illyriciani (*Notitia Dignitatum* 81:15); it is mentioned as an independent locality in Georgius Cyprius (*Descriptia Orbis Romani*, line 1024). Salchah was an important town in Arab times, and in the 14th century contained a Jewish community. The modern town of Salkhad numbered approximately 15,000 inhabitants in the early 2000s, mainly Druze.

[Michael Avi-Yonah]

SALE (Heb. מְכִירָה, *mekhirah*). Sale may be defined as the permanent transfer for consideration of existing legal rights from one person to another. The consideration may be in money or in kind. By extension the term "sale" is also used to denote a transfer of rights for a lengthy (but predetermined) period, such as the sale of land for a period of many years (BM 79a; BB 136b; cf. Yad, She'elah, 1:5). When sale is mentioned, however, it primarily refers to the transfer of real or proprietary rights and not to mere personal rights, i.e., obligations or debts, since it was at first legally impossible to transfer such rights (see *Assignment). The *geonim* already laid down that rights in rem applied only to corporeal or tangible things (Hai Gaon, *Sefer ha-Mikvah ve-ha-Mimkar*, ch. 2, introd. i; cf. Resp. Maharashdam, ḤM 271), and therefore anything having neither length, breadth, nor depth – such as the smell of an apple or the taste of honey or the glitter of a precious stone – was incapable of being conveyed (Yad, Mekhirah, 12:14; cf. also TJ, BB 3:1, 13d and *Ha-Ittur*, vol. 1, introd., ch. 2, "Kinyan"). This is probably the reason why it is impossible to convey title in something which is not yet in existence – since, being intangible, it cannot be the subject matter of a real right – as also it is impossible to convey to someone who has not yet been born (see below).

In the biblical period the sale of real property was restricted. Thus, fields could only be sold until the Jubilee, in which year they would automatically revert to their owners (Lev. 25:13ff.), whereas dwelling houses in walled cities – if not redeemed within a year of their sale – would rest irrevocably with their purchasers regardless of the Jubilee (*ibid.*). In Jewish law the term sale does not mean an agreement to sell in the future, but an immediately effective transfer of ownership. Sale, nevertheless, raises many of the problems relating to the creation, interpretation, and execution of contractual obligations. In the Talmud, *mekhirah* is an example used for clarifying these problems, since the laws of sale are an application of the wider principles of property and contract. The transaction of a sale is concluded with the *gemirat ha-da'at* (“firm decision”) of the parties to transfer the relevant rights irrevocably from one to the other – at which point neither may renege from the bargain. The parties rely on the sale if there has been a manifestation of their *gemirat ha-da'at* by such a way of speech or conduct as will be understood by most people as an agreement to conclude the transaction – whether or not this is in accordance with the subjective intention of either of the parties. Undisclosed thoughts are of no consequence, and the test of the conclusion of the sale is purely objective; if in the particular circumstances most people would express their intention to conclude the transaction in that particular and manifest manner, the transaction will accordingly be effective, and it is immaterial that either party did not really intend to conclude the transaction in that particular way, or that there was no *consensus ad idem* between one party and the other. A corollary of this test is the principle that the parties need not make up their minds to the identical thing, and there may sometimes be no actual consensus between the parties even if outwardly their conduct is so interpreted. Moreover, when it is manifest that one of the parties had not properly made up his mind to the transaction, he may withdraw from it but not the other party who had done so – as may happen in the case where one party is mistaken as to the quality of the subject sold (Yad, Mekhirah, 17:1), or he has been overcharged in respect of the price (*ibid.*, 12:4).

The Decision of the Parties

The decision of the parties to conclude a sale is finalized by the performance of one of the appropriate acts of *kinyan* (“acquisition”) by one of the parties – generally the purchaser – after the other parties have expressed their agreement that this be done (Ned. 44a; BB 54b; see *Acquisition (*Kinyan*)). Ownership thereupon passes, regardless of the question of possession, since possession sometimes accompanies the passing of ownership and sometimes not (see, e.g., BM 46a–b). If the consideration for the sale is a monetary payment, the purchaser, upon the passing of ownership, undertakes to pay the purchase price and it becomes a debt for which he is liable (BM 45b, 78b).

Furthermore, if an act is performed that brings about the *gemirat ha-da'at* of one or all of the parties but is not con-

cluded by one of the customary acts of *kinyan*, any of the parties may withdraw; ownership will not have passed and the seller will remain responsible for the object. Nevertheless, since some of the parties rely upon such a sale and believe that all have made up their minds not to renege from it, any party who does retract is subject to the curse of “He who exacted vengeance from the generation of the flood and the generation of the dispersion will find redress from one who does not stand by his word” (BM 4:2). Hence, if the purchaser pays the consideration money to the seller but does not obtain possession of the object sold (i.e., *meshikhah*), the party who retracts will be subject to the said curse, since the payment of money is not a method of concluding a transaction in movables (BM 44a). Similarly, the fact that the seller has marked the object sold so as to distinguish it as his own will suffice to submit a retracting party to the curse – even though it is not local custom to conclude a transaction by making such a mark (BM 74a) – since there is a presumption that in affixing his mark the party concerned made up his mind to the bargain. Wherever the affixing of a mark is the customary manner of concluding a transaction, however, the sale will be effective and the parties will no longer be able to retract (BM 74a; see **Minhag*). The sages disapprove of a party who retracts, even where the transaction is only concluded verbally, without the performance of any act by any party. If, however, there was a verbal promise which was not relied upon, the promisor may withdraw (BM 49a).

When it is clear that one of the parties has not made his decision to conclude the transaction – i.e., when most people would not do so in the circumstances – he may retract even if it has been agreed that title be effected and the act of *kinyan* performed. This is illustrated in the case of overreaching (see **Ona'ah*), *mistake, certain cases of duress (see **Ones*), the nonfulfillment of a condition of the sale, or when one of the parties lacks understanding, and whenever people for any other reason would not normally rely on the transaction. If a person under duress sells a part of his property, the sale will be effective, since he makes up his mind and agrees to the sale simply to rid himself of the duress. Some scholars, however, express the opinion that if he is under duress to sell a specific field the sale will be void (BB 48a). If, prior to the sale, the seller made a statement before witnesses to the effect that he was selling only because of duress – whether of a physical or monetary nature – and the witnesses know of the duress, it will be manifest that the seller had not made up his mind to the sale and the transaction will be void (BB 40a–b).

This is also the law in the case of mistake as to price, whether due to deceit and intentional or inadvertent, or whether the object was sold for more than its true value and the purchaser overcharged, or sold for less than its true value and the seller thus deceived (BM 51a). If the mistake as to price is within a discrepancy of less than one-sixth, the sale will still be effective, since such comparatively small margins are usually overlooked; if the rate is one-sixth exactly, the sale will be effective, but the difference must be refunded; if the rate

exceeds one-sixth, the sale is voidable, and the party standing to lose may retract, since such a large mistake would not usually be tolerated. Refunding the difference or avoiding the transaction is only permitted within a specified period, during which the party at disadvantage could have become aware of his mistake; thereafter it is presumed that he has waived the rights arising from the mistake in favor of the other party and made up his mind to uphold the transaction as it stands (BM 49b; Rashi on the Mishnah, *ibid.*). The rules of mistake as to price apply equally to mistake in respect of any other aspect of the sale. Whenever the property sold or any of the conditions of the sale vary from that which the purchaser relied upon – and the variation is so great that people in similar circumstances would normally be particular enough to look upon the transaction as being something other than the one upon which they relied – it will be a case of a purchase in error (*mikkah ta'ut*) which voids the transaction (see Sh. Ar., ḤM 232:6 and glosses thereto). Generally, if as a result of a variation in the property sold it is unsuited for the use for which the purchaser wanted it, it will be a case of *mikkah ta'ut* (see, e.g., Yad, Mekhirah, 15:12, 13).

If the parties conclude the transaction of a sale and perform an act of *kinyan*, but have failed to determine the price, the purchaser will not have acquired title since there was no reliance on the transaction by the parties, and both of them may retract; if, however, the purchase price was fixed and known, the sale will be effective (Yad, Mekhirah, 4:11–12). Maimonides also expressed the opinion that a person cannot acquire from another something that is undetermined even as to species (Yad, Mekhirah, 21:1–3). Thus a purchaser cannot acquire title to “everything that is in this house, or box or sack, which the owner is selling for so much,” even if he has performed an act of *kinyan*, since he does not rely on this transaction; however, when the species is known, e.g., “this heap of wheat or cellar of wine at such and such a price,” the sale will be effective even if the actual measure and weight are unknown at that moment.

A sale by a person lacking legal capacity – such as a deaf-mute, idiot, or minor – is void, since he lacks understanding and hence the absence of the element of *gemirat ha-da'at*. The sages prescribed, however, that certain sales by such parties would be valid “for the sake of his sustenance” (Git. 59a), i.e., in order to procure the necessities of life. It was laid down that the minimum required age in the case of a minor would depend on the degree of his understanding (*ibid.*) and this was detailed as follows: a minor aged six years and over, having sufficient understanding to appreciate the nature of the transaction, could sell and purchase movable property; from the age of 13, his sale or purchase would be effective in respect of movables, even if he could not appreciate the nature of the transaction, but ineffective in respect of land unless he could appreciate the nature of the transaction; a minor could not sell land inherited from his ancestors until he reached the age of 20 (Yad, Mekhirah, 29:6ff.). In the post-talmudic period, too, the age of majority was varying determined in

respect of different legal transactions, depending upon the social and economic circumstances of the time (see Elon, in bibliography).

Sale of a Thing Not Yet in Existence

The Talmud records conflicting opinions as to whether or not a person can transfer title in respect of something not yet in existence. Some scholars answer in the negative, on the ground that the purchaser does not rely on the transaction, or for the reason that there is nothing to which ownership can apply and so ownership cannot be transferred. Another opinion in the Talmud is that a thing not yet in existence may be assigned and that the acquisition will take effect upon the thing's coming into existence, with the result that the parties may not retract. Even according to this opinion, however, only that which will come into existence in the ordinary course of events – such as the fruit of a tree – can be assigned; otherwise all the scholars agree that no transaction can be effected (BM 33b). The scholars who answer this point in the negative expressed the further opinion that a person could not transfer a thing which was not yet his, e.g., if he should say “let this field be acquired by you as of the moment that I shall have taken it for myself” and thus was the *halakhah* decided (Yad, Mekhirah, 22:5). The sages, however, prescribed that the sale by a poor hunter (lacking the necessities of life) of “everything that my hunt will produce to-day,” would be effective, as would similar acquisitions in keeping with this rule (Yad, Mekhirah, 22:6). On the other hand, a person can undertake an obligation to transfer a thing not yet in existence (Sh. Ar., ḤM 60:6; see Law of *Obligations; *Contract). He can furthermore transfer a real right in property which is in existence, e.g., by transferring “the body for its fruits,” and thereby confer title to a thing not yet in existence, such as a “tree for its fruit” or an “animal for its young” (Yad, Mekhirah, 23:1–2). An opinion is also expressed that if the thing which is sold is available on the market, the sale will be effective even though it is not yet the seller's, and the latter is obliged to deliver it to the purchaser (Yad, Mekhirah, 22:3 and *Kesef Mishneh* thereto).

With regard to a sale to a person as yet unborn, one opinion is that even if a person may transfer something that is not yet in existence, he cannot do so to a person as yet unborn; another opinion is that one can confer title in favor of a person as yet unborn even if he cannot do so with regard to a thing not yet in existence (Git. 13b and Tos. thereto). The *halakhah* was decided to the effect that a person could not confer title on a person as yet unborn, in the same way that he could not do so in respect of a thing not yet in existence (Sh. Ar., ḤM 210:1).

It is the accepted view that a person can neither consecrate nor confer title in respect of a thing which is not in his possession, even though it is his property (BK 70a and Tos. thereto); hence a person cannot do so in respect of property stolen from him, since the thief gains possession thereof (*ibid.*). However, another opinion is that one may consecrate,

renounce (see **Hefker*), and confer title even in respect to property which is not in one's possession (BK 68b).

The Conditions of the Sale

The decision of the parties to conclude a transaction is often made subject to various conditions, which must be fulfilled if the transaction is to be effective (see *Conditions). Thus if a person sells a house to another on condition that the latter perform some specific act on a specified day, the purchaser acquires the house if and when he performs the act in the specified manner, but not otherwise; the same applies if property is sold to the purchaser on condition that the latter give it to a third party, or if the seller has stipulated that the property is to be returned after a specified period – in which event the transaction is effective and the property must be returned (Yad, Mekhirah, 11:1). Likewise, the sale will be effective where a person stipulates that if he sells his field, the purchaser shall acquire it as of that moment, at a price to be determined later by three valuers (Yad, Mekhirah, 8:8).

The seller's decision to impose a condition on the sale must be manifest and made clear to all, including the purchaser, in the manner in which people would normally do so. Failing this, the sale may be effective but not the condition, since it will be seen from the seller's conduct that he did not intend to impose a material condition capable of voiding the transaction but a mere condition at large, not seriously intended. Hence, he must phrase his statements in the form of a double condition, i.e., specify what will be if the condition is fulfilled and what if not – since Hebrew-language usage requires both the affirmative and the negative to be specified, and if he does not follow the manner in which Hebrew is spoken, he is apparently not particular about fulfillment of the condition. Some scholars expressed the opinion that the requirement of a double condition applies only in the cases of *marriage and *divorce but not of sale, where a condition is effective whether a double one or not (*Hassagot Rabad*, Zekhiyyah, 3:8). Moreover, the phraseology of the condition requires the affirmative sentence to be included before the negative one, as only thus is it manifest that the party seriously intends to be particular about the fulfillment of the condition (*Beit ha-Behirah*, Kid, 61a); he must first state the condition and thereafter the act which is contingent on it, and not vice versa, and the condition must be one which is capable of being fulfilled by the purchaser, lest it appear that it was not seriously intended and the sale be effective without the condition (BM 94a; Kid. 61a).

At times, when it is manifest from the circumstances that the fulfillment of a condition has been relied upon, such condition will be effective even if the above-mentioned phraseology has not been adopted. Moreover, if it is manifest from the circumstances that the seller has relied on a certain condition, the condition will be effective even if he has not given any verbal expression thereto, since everything is dependent upon what people normally imply from the circumstances (Tos. to Kid. 49b). Often the parties do not specify any condi-

tions and may not even be thinking of any, but the presumption is that they intend to sell and purchase in accordance with local custom. Hence local customs relating to purchase and sale are superimposed to supplement the decision of the parties; furthermore, statements of conditions which are not clearly expressed are construed in accordance with local custom (Yad, Mekhirah, 17:6; 26:7–8; 27:11; also *Hassagot Rabad*, Mekhirah 24:12). If the parties wish to exclude the conditions of local custom, they must make express provisions to this effect. Thus a person who transfers ownership to another generally intends it to pass upon the performance of the *kinyan* by the transferee; however, if for example, he says, "perform the *kinyan* and acquire 30 days hereafter," the acquisition will only be complete after 30 days (Ket. 82a).

Of the customary conditions, the most important one is the warranty of authority. Thus, one who purchases something which is later taken from him for reasons connected with the seller – for instance, that the land was not his or that it was mortgaged to his creditor – may hold the seller liable and recover the cost of it from him. This warranty of ownership by the seller is implied in every sale, even if not expressly formulated (Yad, Mekhirah, 19:3). If the seller wishes to be absolved from all or any part of such responsibility, he must do so by express stipulation (*ibid.*, 19:8). Another opinion (BM 14a) is that in an ordinary sale the seller takes no responsibility upon himself unless a specific provision to the contrary is made.

The Mishnah, in listing various categories of sale, clarifies the different (implied) conditions that will be included unless otherwise provided for by the parties and if not contrary to local custom. Thus one who sells a field sells also the stones which serve the land, the unreaped grain, the watchman's booth, and the trees which have no intrinsic value, but not the stones that are not necessary to the land, or the grain that has been severed from the ground, and the like (BB 4:8). So too, one who sells a field for sowing does not include rifts in it or rocks which are more than ten handbreadths high (BB 7:1); one who buys two trees in another's field does not buy any land with them, but one who buys three trees, buys also the land on which they are growing (BB 5:4); one who has sold a wagon has not sold the mules, and if he has sold the mules he has not sold the wagon (BB 5:1); one who has sold the head of a large animal, has not sold its feet also, but in the case of sheep the feet are included in the sale of the head (BB 5:5). Similarly, the Mishnah enumerates that which is included or excluded in the sale of numerous items of property ranging from houses, buildings, and trees to slaves and animals (BB 4–7). Implied conditions also apply with regard to the price. Thus one who has sold wheat to another for a fixed amount of money without specifying the quantity, must deliver wheat according to the market price at the time of the sale (Yad, Mekhirah, 21:4).

In cases where there is difficulty in construing the parties' intention, their ultimate purpose may be arrived at with the aid of the rule that "he who sells, sells in a liberal spirit," i.e., a liberal interpretation of the agreement is made. Thus,

one who sells a house but does not include the cistern in the sale must purchase from the buyer a right of way to it, since the terms of the sale are to be interpreted liberally and he did not retain a right of way (BB 64a–b). However, a person who has sold a field but retained two trees for himself will also retain the soil in which they grow, even though the purchaser of only two trees acquires no soil with them (BB 71a). There are conflicting views on the matter, some scholars stating that a restrictive interpretation is also possible, i.e., “one who sells, sells in an illiberal spirit.” However, all scholars accept that the maxim of a liberal interpretation is applicable in the case of *gifts (BB 65a).

In the State of Israel

The rules of sale are set out in the Sales Law, 5828/1968, which in general adopts the draft uniform law relating to international sales, submitted at The Hague International Conference in 1964. In certain matters this law takes cognizance of the attitude of Jewish law (see Elon, in bibliography).

[Shalom Albeck]

SALEM, EMMANUEL RAPHAEL (1859–1940), Greek lawyer. Born in *Salonika, Salem specialized in international law and the law of capitulations, and became legal adviser to foreign consulates in *Turkey. He published several studies on the capitulations and on the conditions of foreign subjects in Turkey in international law periodicals in Paris and Brussels (1888–1900). In 1889 Pope Leo XIII awarded him the knighthood of the order of the Holy See. He served as the legal advisor to La Banque de Salonique (The Bank of Salonika), founded in 1888, which was Jewish run and owned, and the first bank established in Salonika.

Salem was active in the general communal life of Salonika. He donated an orphanage to the Jewish community, and assisted in the modernization of its hospital. With the revolution of the Young Turks of 1908, he went to *Istanbul to play an active part in the work of the Council for Legislative Reforms, which established the legal system of the Turkish republic. He solved many legal problems between the Ottoman and other governments. He also mediated between Turkey and the Vati-

can. He was frequently called by different governments in connection with diplomatic issues in the Near East. Salem was a member of the Ottoman delegation to the Lausanne Conference of 1922, where he played a considerable part in elaborating those sections dealing with the status of the Dardanelles and with the capitulations regime. In gratitude for his legal services and efforts, he received recognition and honors from the Ottoman sultans Abdul Hamid and Rashid, and the governments of Austria, Italy, France, Greece, Belgium, Bulgaria, and the Vatican. His wife, like wives of other Salonikan Jewish benefactors, dignitaries, and community leaders, received the Ottoman honor Şafakat Level II or III. During the last years of his life, Salem lived in Paris, where he was the president of the Sephardi congregation and a member of the central committee of the Alliance Israélite Universelle.

His son RAPHAEL (1898–1963) was a noted mathematician. He worked in the Bank of Paris until World War II, when he escaped to the U.S. There he taught at Harvard University and the Massachusetts Institute of Technology. In 1955 he became professor of mathematics at the Sorbonne in Paris. His works include *Theorie générale des Séries trigonométriques; Séries trigonométriques lacunaires et aléatoires; Ensembles parfaits et séries trigonométriques*; and *Algebraic Numbers and Fourier Analysis*. His collected works were published in 1967.

[Joseph Nehama / Yitzchak Kerem (2nd ed.)]

SALÉ-RABAT, twin towns on the Atlantic coast of *Morocco, separated by the Bou-Regreg River and situated on the site including the Merinid necropolis of Chella. Ancient Sala, ruins of which still exist in Chella, was an important Roman town known as a center for buying gold dust. The existence of a Jewish colony there during the second century C.E. is confirmed in an inscription on the tombstone of a hellenized Jew. The region was subject to Jewish influence over a long period, and the conversion of the country's inhabitants to *Islam in the eighth century gave rise to the heresy of the Berghwata, who were inclined to Judaism. The *Almohads, who liquidated the Berghwata in the 12th century, built the town of Rabat, which did not lose its position of importance to the more ancient town of Salé until the fall of the dynasty in 1269. Abraham ibn Daud mentions the Jewish community of Salé (Sala) in his *Sefer ha-Kabbalah*. The merchant shipowners of the western Mediterranean conducted an active trade in Salé, especially the Jews of Majorca during the 13th–14th centuries. Later, the Genoese gained the monopoly over trade in Salé, and in 1492 the Jewish exiles from *Spain were badly received by them. After 1550 the Jews of Salé were wealthy and numerous. They lived among the Muslims, who were mainly of Andalusian origin. A few Jews settled in Rabat, which at that time was only known by the name New Salé, in contrast to the neighboring town which was Old Salé; the twin towns became one of Morocco's most important trading centers. In Rabat the

Hornacheros, Muslims who had arrived from Spain in 1610, had little sympathy for the Jews; nevertheless, they welcomed them as soon as the privateering against Christendom, especially Spain, gained in intensity, calling for supplies of European arms and rigging, and pouring into the town goods and Christian captives, which the Christian nations hastily redeemed. At that time Rabat and Salé finally constituted themselves into independent republics.

Although the Jews conducted their affairs in Rabat, the majority lived in Salé, where Dutch Jews also settled. Between 1620 and 1660 the leading merchants in the two towns were Samuel b. Sofat, R. Aaron *Siboni, and the Dutchmen Benjamin Cohen and Aaron Querido. Moses Santiago was the counselor of the governor of Rabat, negotiating the truce with the king of *France in 1630. The peace treaty of 1683 with The Netherlands was negotiated by Isaac and Joseph Bueno de *Mesquita, merchants in Salé, the place of residence of Gideon *Mendes, the Dutch consul in 1699. Moreover, until the 1850s several Jews of Salé-Rabat acted as consuls for the European powers. The Shabbatean movement won many followers in the towns, where the *dayyan* of that period, R. Jacob *Sasportas, successfully overcame the resulting unrest. The yeshivot of Salé and Rabat were very active, and graduates included talmudists and legal authorities such as R. Ḥayyim b. Moses *Attar, author of the famous Pentateuch commentary, *Or ha-Ḥayyim*, who after many wanderings immigrated in 1741 to Erez Israel; R. Shem-Tov Attar, R. Samuel de *Avila and his son R. Eliezer, R. Abraham Rodriguez, R. Samuel Caro, R. Solomon Tapiero, R. Judah Anahory, and R. Joseph *Elmaleh. The Jews of Rabat were among the founders of the Jewish communities of *Gibraltar in 1705, *Mogador in 1767, *Lisbon in 1773, and Mazagan in 1825, as well as the community of the Azores which they founded in 1820. A short while later some of their distinguished families – Amzallag, Aburbi, Amiel, Ben-Tobo, and Moyal – settled in *Haifa, *Jaffa, and *Jerusalem, having transferred their assets to these places.

After 1750 the community of Salé was absorbed mainly by that of Rabat, which numbered over 6,000 persons. This population, a very active one, enjoyed considerable affluence, and its wealthiest elements obtained leases on the collection of customs duties, both in Rabat and other ports, later adding numerous other monopolies. In 1790 Governor Bargash saved the Jews of Salé-Rabat from the persecutions of the sultan Moulay Yazīd, but they were nevertheless compelled to pay the large sum of 600,000 gold mithkals to the sovereign. More than one half of the Jewish population of Salé-Rabat perished in the plague of 1799. In 1807 they were confined to two mellahs for the first time. This measure, which was painfully felt, initiated a wave of emigration, especially to South America, while a large number of families whose wealth was of recent acquisition converted to Islam. New elements, mainly from Tlemcen, established themselves in the mellah of Rabat in 1830. Both the old and the new communities were impoverished by the isolationist policy of the sultan Moulay Sliman. The *dahir*, which Sir Moses *Montefiore obtained in 1864 on

behalf of the Jews of Morocco, caused some of the Jews of Rabat to exceed their rights, thus setting off severe disturbances. The rabbis and the authorities only succeeded with difficulty in allaying the agitation. There were massive departures for *Casablanca, where the Zagury, Hayot, Lasry, Benchaya, and Marrache families, as well as others from Rabat, were the most influential in the new community for a long time. Under the French Protectorate (since 1912), various Jewish institutions were established in Rabat, notably the Supreme Rabbinical Tribunal (abolished by the government in 1965) which was headed by Rabbis Raphael Encaoua and Joseph Benatar over a long period.

In 1947 there were 20,000 Jews in the region of Salé-Rabat. Of these, 12,350 lived in Rabat and 3,150 in Salé. Until the mid-1950s there were also branches of the *Jewish National Fund and *WIZO in Rabat. In 1970 Salé had not a single Jewish inhabitant, while about 4,000 Jews still lived in Rabat. The majority of the Jews of Rabat had immigrated to France, the *United States, and *Canada, those of Salé going almost exclusively to Israel. By 2005, only several hundred Jews remained in Rabat. Ya'akov Mellul, chief rabbi of Rabat, noted at the end of the 20th century that, with the exception of the larger community of Casablanca, most other Moroccan Jewries, Rabat included, had no prospects for Jewish continuity. Most of the Jewish schools in Rabat were closed, including the wide network of the *Alliance Israélite Universelle and Ozar ha-Torah schools and a rabbinical seminary, founded in 1951. There were no rabbis, no infrastructure for community life, and the young left their homes for the West in pursuance of their higher education. Their parents followed the children to the West to preserve the close-knit nature of the family, as well as to protect them from marrying non-Jews.

SALERNO, city in Campania, S. Italy. A Latin tombstone of the daughter of a rabbi called Abundantius shows that a Jewish settlement existed in Salerno as early as the 3rd or 4th century. In the Middle Ages the town was the seat of a famous medical school founded in about 800. According to tradition, its founders included not only an Arab, a Greek, and a Latin, but also a Jewish teacher. Jews are mentioned in the town from 872, and the Jewish quarter (Judaica) of Salerno in a document of 1005. *Benjamin of Tudela, who visited Salerno around 1159, found there about 600 Jews, including several scholars. As a result of the persecutions in south Italy around 1290–94, 150

Jewish families were converted, but many continued secret allegiance to Judaism. In 1485 R. Obadiah of *Bertinoro was for some months in Salerno and apparently frequented the medical school. With the expulsion of the Jews from the Kingdom of *Naples in 1510, the much-reduced Jewish community of Salerno also ceased to exist.

SALFELD, SIEGMUND (1843–1926), German rabbi and historian. Salfeld, who was born in Stadthagen, Germany, served as rabbi in Dessau from 1870, and in Mainz from 1880. Salfeld received the title professor from the grand duke of Hesse in 1912. His scholarly interest was devoted to the history of German Jewry, and especially of the Mainz community. He described the political and social conditions of German Jews in the Middle Ages, based on research into source material, and his major work in this area was *Bilder aus der Vergangenheit der juedischen Gemeinde Mainz* (1903).

Salfeld’s most important work was *Das Martyrologium des Nuernberger Memorbuches* (1898), which connected the *Memorbuch found in Mainz with Nuremberg, a contention disputed by M. Weinberg who assigned it to Mainz (*Die Memorbuocher der juedischen Gemeinden in Bayern* (1937–38), 3–4). Many of Salfeld’s studies appeared in learned periodicals and *Festschriften*. In 1879 he published *Das Hohelied Salomo’s bei den juedischen Erklaerern des Mittelalters*.

BIBLIOGRAPHY: *Gedenkreden beim Heimgang des Altrabbiners S. Salfeld* (1926).

ŞĀLIḤ, ABRAHAM (c. 1825–1905), *dayyan* and preacher in *Yemen. ŞāliḤ was the great-grandson of Yaḥya b. Joseph *ŞāliḤ (Mahriṣ). He acted as *ḥazzan* and communal leader in the synagogue of the ŞāliḤ family. He held the position of *dayyan* for 38 years. Of an emotional nature, his sermons and *tokhaḥot* deeply moved his audiences. He was referred to as “the prophet Jeremiah,” because of the tears to which his listeners were moved.

[Yehuda Ratzaby]

ŞALİḤ, YAḤYA (Yihye) BEN JOSEPH (Maharis; c. 1715), Yemenite scholar; *av bet din* and rabbi of *San’a. His authority was recognized by all the Yemenite Jewish communities and even by the distant community of *India. Many halakhic questions were addressed to him from all parts of *Yemen. They all received clear and complete replies, the fruits of his meditation and casuistry, in which the legal point was clarified. He would not accept a salary from his rabbinate, and he earned his livelihood with difficulty as a Torah scribe. His work was artistic, and some of it is extant in various manuscripts. J. *Saphir, who visited Yemen in 1859, mentions the esteem and love which Yemenite Jewry accorded him: “his name is renowned throughout Yemen and his decisions are accepted as the law given by Moses at Sinai” (*Ḥadrei Teiman*, Lyell 1866, 101b).

He wrote *Zevaḥ Todah*, novellae and explanations on Shulḥan Arukh *Yoreh De’ah*, the laws of ritual slaughter (1851); *Sha’arei Kedushah*, a summary of *Zevaḥ Todah* in the form of legal decisions which was written to facilitate its study by *shoḥatim* and pupils (1841); *Ḥelek ha-Dikduk* (or *Toze’ot Ḥayyim*), biblical masorah, with punctuation and musical cantillation (published in full length by C.D. Ginsberg, *Ha-Masorah*, 3 (1885), 53–105); the section on the Pentateuch and *haftarot* was published in the editions of the Yemenite *Taj* (from 1889), *Sha’arei Tohorah*, the laws of *niddah* – written in Arabic, the prevalent tongue among women and the masses (1894); *Ez Ḥayyim*, a commentary on the *Tiklāl* (*siddur* of the prayers of the whole year), according to the plain and esoteric meaning (1894); *Pe’ullat Zaddik*, responsa and legal novellae on the four *Turim* (3 vols., 1946–45) – the most important collection of Yemenite Jewry’s responsa literature, containing 762 responsa which he dealt with during a period of about 40 years (1764–1803); *Me’il Katan*, a commentary on the *Shenei Luḥot ha-Berit* of R. Isaiah *Horowitz; and *Orah la-Ḥayyim*, a collection of Midrashim and explanations on three *megillot*, in symbolic and esoteric style (in manuscript). He wrote a chronicle of Yemenite Jewry (published by David Sassoon, see bibliography).

[Yehuda Ratzaby]

ŞALİḤ İBN YAḤYA (Yihye) İBN JOSEPH (17th century), San’a scholar and *paytan*. ŞāliḤ was the grandfather of R. Yaḥyā ibn Joseph *ŞāliḤ, who, in his works, makes considerable mention of his grandfather. Two works of his have been preserved: they deal with the laws of ritual slaughter (extant in Ms.). The *piyyutim* which he wrote deal with exile and redemption and echo the cruel exile from *Mawza^c which took place during his lifetime (his grandson R. Yaḥyā ŞāliḤ included ten of these in the Yemenite *maḥzor*, *Ez Ḥayyim*, 3 (1894) 158–65). In two of his *tokhaḥot* which have been preserved,

he calls upon his generation to repent. He had a reputation as a miracle worker.

[Yehuda Ratzaby]

SALINGER, JEROME DAVID (1919–), U.S. author. Born in New York City, Salinger attended the Valley Forge Military Academy, a preparatory school which resembled the one attended by the hero of his first celebrated novel, *Catcher in the Rye* (1951). After serving in the U.S. Army during World War II, Salinger published *Catcher in the Rye*, which established his reputation as a writer. The novel's hero, Holden Caulfield, has been described as a kind of latter-day Tom Sawyer or Huckleberry Finn. A fashionable as well as a popular author, Salinger contributed stories to leading magazines, including *The Saturday Evening Post*, *Esquire*, *Cosmopolitan*, and *The New Yorker*. He wrote *Nine Stories* (1953), *Franny and Zooey* (1961), and *Raise High the Roof Beam, Carpenters and Seymour: an Introduction* (both 1963). All of these deal with the adventures of the Glass family of New York, a family of mixed Irish-Jewish origin.

Salinger gave a new and dramatic presentation of estrangement and crises of faith through such characters as Holden and Franny and Seymour Glass. Moreover, he was one of the first American-Jewish writers to draw upon the themes of Zen Buddhism. Salinger had a great impact on the mores of his youthful readers with *The Catcher in the Rye* (the word “prince” became part of a signature vocabulary just as Holden's cap also became part of a younger reader's costume – as far afield as East Germany), and a welcome reception among an older public. Nonetheless, his works had little discernible influence on the major traditions of American-Jewish literature as Jewish writing within America. Although the Glass family is notable, given its mixed heritage and brilliance, crises of faith are often anguishingly felt problems about a transcendent guarantee for meaning. In this sense, the Glass “fictions” make a common front with Isaac Rosenfeld's *Passage from Home* (1946) and Edgar Lewis Wallant's *The Pawnbroker* (1961) which weld Christianity, *Yidishkeit*, and American culture together. What is at stake in these works is the capacity to have faith within, and often against, a secularizing, pluralistic America. These works look forward to Hortense Calisher's sweeping panorama of intermarriage and the commingling of faiths in *Sunday Jews* (2002).

Salinger's deeply reclusive life and decision not to publish further writings have led to various, if not contentious, biographical speculation.

SALISBURY, former capital of Rhodesia (renamed **Harare** and now capital of *Zimbabwe). Organized Jewish life in Salisbury dates from June 2, 1895, when, under the chairmanship of Joseph van Praagh (Salisbury's first Jewish mayor), a meeting of 20 men and two women founded the Salisbury Hebrew Congregation. The first synagogue was built in 1901 and the present one in 1920. The first minister was appointed in 1909. The first Sephardi arrived in Salisbury in 1895, and from 1905 there was a large influx into Rhodesia of Sephardim, mainly from the Aegean island of *Rhodes. They were scattered in all parts of the country, and it was not until 1931 that a separate Sephardi Hebrew Congregation was founded in Salisbury. Its first rabbi was appointed in 1944. There were a few Sephardim in centers outside Salisbury, but most have gravitated to the capital. The Ashkenazi and Sephardi congregations built imposing communal centers, comprising synagogues, schools, halls, and youth centers. A Reform Congregation was started in 1960. Both the Sephardi and Ashkenazi congregations maintained an afternoon Hebrew and religious school with a total enrollment of 220 pupils. A Jewish primary day school opened in 1960. In the decade between 1958 and 1968 the Salisbury Jewish community grew rapidly and eventually outstripped the one in *Bulawayo. Jews have played an active role in the developing Salisbury and the city has had a number of Jewish mayors: J. van Praagh (1900–01), H.L. Lexard (1914–17), H. Pichanick (1955–57), I. Pitch (1961–62, 1967–68), and B. Ponter (1964–65). In 1968 the Jewish population of Salisbury was about 2,500, two-thirds of them Ashkenazim and the rest Sephardim. With the outbreak of civil war in Rhodesia and the transfer of power to the black majority at the end of the 1970s, the Jewish population of the city dropped sharply, reaching barely 350 in 2003.

[Maurice Wagner]

SALIT, NORMAN (1896–1960), U.S. lawyer, rabbi, and communal leader. Born in Brooklyn, New York, Salit was admitted to the bar in 1920. The previous year he had received his rabbinical degree from the Jewish Theological Seminary of America. Salit became rabbi of Temple Israel in the Bronx in 1920 and served as rabbi of Shaaray Tefila synagogue in Far Rockaway, Queens, from 1924 to 1929. Salit combined his legal and rabbinical professions. He headed the Queens County Bar Association committee on legislation from 1933 to 1937, and in 1947 and 1949 ran, unsuccessfully, as a Democrat for the positions of presiding supervisor of Nassau County and of Children's Court judge, respectively.

During World War II he was executive director of the Wartime Emergency Commission for Conservative Judaism, which aided congregations whose rabbis had entered military service. In 1935–54 he was president of the Synagogue Council. Salit was an active member of many Jewish organizations. He was on the board of overseers of the Jewish Theo-

logical Seminary of America and the executive committee of the Zionist Organization of America. *The World of Norman Salit* (1966), edited by Abraham Burstein, contains sermons, essays, reports, comments on the weekly Torah portion, and miscellaneous material written by Salit.

SALITA, DMITRIY (“Star Of David,” “The Kosher Knock-out”; 1982–), U.S. boxer, NABA junior welterweight champion. Born in Odessa, Ukraine, Dmitriy moved with his family to Brooklyn at the age of nine. He originally started out with karate, but his older brother Michael introduced him to boxing, and he started boxing at 13 at the Starrett City Boxing Club. When his mother, Lyudmila, was diagnosed with breast cancer and then died when Salita was a teenager, he underwent a religious transformation with the help of a Lubavitch rabbi who comforted him through his ordeal. As a result, Salita is a strictly observant Jew who keeps kosher, will not fight on the Sabbath or holidays, and studies daily with a rabbi. He won the 2000 U.S. National Under-19 amateur championship, and on April 5, 2001, won the New York Golden Gloves championship, earning the Sugar Ray Robinson Award as the outstanding boxer in the tournament. He won his first professional fight on June 24, 2001, and claimed the NABA junior welterweight championship August 26, 2005. “He looks Russian, prays Jewish, fights black” said his trainer, Jimmy O’Pharrow. At the end of 2005, Salita was 24–0, with 14 KOs.

[Elli Wohlgelernter (2nd ed.)]

SALITERNIK, ZVI (1897–1993), Israeli physician. Saliternik was born in Proskurov, Ukraine, where he graduated in medicine (1918) and worked in local hospitals before emigrating to Palestine (1920). He specialized in clinical care and research in malaria as inspector at Hadassah Hospital, Jerusalem, from 1921, and as director of the anti-malaria department at the Ministry of Health from 1962, where his efforts led to the eradication of the disease in Israel. He also directed the eradication of the parasitic disease schistosomiasis from the country. He was awarded the Israel Prize for medicine (1962).

[Michael Denman (2nd ed.)]

SALK, JONAS (1914–1995), U.S. virologist. Salk was born in New York City, graduating in medicine from New York University Medical School (1939). Pursuing his commitment as a student to killed antiviral vaccination, he worked on influenza virus vaccines at the University of Michigan with Thomas Francis before moving to the University of Pittsburgh in 1947, where he became director of viral research. Exploiting Enders’ 1949 discovery of methods for growing poliomyelitis virus in tissue culture, Salk developed an inactivated anti-polio virus vaccine given by intramuscular injection. Clinical trials of the vaccine in the U.S. and Canada showed a dramatic fall of over 90% in the incidence of the polio virus-induced disease, paralytic poliomyelitis, by 1955. Initial problems of infectious virus persistence in one commercial vaccine preparation were overcome, and vaccination

with Salk vaccine was adopted routinely in the U.S. and other countries. Salk refused to profit financially from his vaccine. The efficacy of a killed virus vaccine led to the development of similar vaccines against other viruses. Albert *Sabin’s alternative oral live-virus antipolio vaccine, with the prospect of conferring lifelong immunity, supplanted the Salk vaccine in the U.S. and other countries, at least temporarily. The different approaches to antipolio vaccination in 1963 led to intense personal and general controversy. Salk founded the Institute for Biological Sciences named for him in La Jolla, California, where he continued his research, including attempts to develop an anti-HIV virus. His honors included the Lasker award for clinical medical research (1956), the U.S. Order of Merit, and a Congressional Gold Medal.

[Michael Denman (2nd ed.)]

SALKIND, JACOB MEIR (Zalkind, Yankev-Meyer; 1875–1937), Hebrew and Yiddish writer. Born in Kobrin (Belorussia), Salkind studied at the Volozhin yeshiva and at German and Swiss universities. After the *Kishinev pogroms in 1903, he organized a self-defense group in Bern. Moving to England around 1904, he organized in London a Zionist group, Aḥuzah (“Estate”), on behalf of whose members he went to Palestine in 1913 and obtained land at Karkur, on which they were able to settle in 1921. During World War I, he led the anti-war agitation among the Russian Jews in England and opposed *Jabotinsky’s efforts to form a Jewish Legion. For this purpose, he founded and edited *Di Yidishe Shtime* (1916), first as a weekly, then as a daily. After becoming an anarchist, he edited, along with Rudolf *Rocker, the anarchist organ, *Der Arbayter Fraynd* (1920–23). Salkind’s literary contributions began in *Ha-Tsefira* in 1900; he knew and published in many languages, chiefly Hebrew and Yiddish. His Hebrew plays for children (1903–22) were often staged in Jewish schools. He translated four tracts of the Talmud into Yiddish: *Berakhot* (“Blessings”) from the Babylonian Talmud; *Pe’ah* (“[Field]-Corner”), *Demai* (“Doubtfully Tithed Crops”) and *Kilayim* (“Hybrid”) from the Jerusalem Talmud (1922–32). He died in Haifa.

SALKINSON, ISAAC EDWARD (Eliezer; 1820–1883), Hebrew translator who converted to Christianity and became a missionary. Raised in Belorussia, he trained as a teacher, then studied grammar, Bible, and German, and translated the first act of Schiller’s *Kabale und Liebe* into Hebrew. While living in London he converted to Christianity (1849). He became a Presbyterian pastor in 1856, and in 1876 was sent as a missionary to Vienna, where he spent the rest of his life. Despite his conversion Salkinson regarded himself as a Jew. Emotionally and intellectually he had strong ties to the Hebrew language, which he believed should replace Latin as the sacred

language of Christianity. His translations reflect his dual motives and fall into two categories: some were intended to bring Jews closer to Christianity; others were done for purely artistic reasons. The first type included *Va-Yegaresh et ha-Adam* (1871), a translation of Milton's *Paradise Lost*; and *Ha-Berit ha-Hadashah* (The New Testament), published posthumously in 1883. The second type included translations of *Othello* (*Ithiel ha-Kushi*) and *Romeo and Juliet* (*Ram ve-Yael*; Vienna, 1874 and 1875). A conscientious craftsman who wrote in lucid, neo-biblical style, Salkinson was one of the finest translators of the Haskalah period.

SALMON, family of English caterers. ALFRED SALMON (1868–1928) was the eldest son of Barnett Salmon (1829–1897), partner in the firm of retail tobacconists, Salmon and *Gluckstein. With Joseph *Lyons and the brothers Isidore and Montague Gluckstein, he was a founder of the famous catering establishment, J. Lyons and Company. Alfred Salmon began by selling cigars in his father's concern at the age of 13. After learning the catering business, he started his career in Lyons as manager of the refreshment room at the Imperial Institute, and in 1922 succeeded Montague Gluckstein as chairman of the company, retaining the position until his death. He was also interested in hospital work and closely connected with the development of the London Hospital. His brother, SIR ISIDORE SALMON (1876–1941), began his career as a kitchen apprentice and later served at Olympia, London's great exhibition and entertainments center, where J. Lyons and Company were the catering contractors. He was active in the development of the company and followed his brother as its chairman. In World War I he organized the Army and Navy Canteen Board and revolutionized army catering. He also founded the Westminster Technical School for the training of waiters and cooks. From 1924 to 1941 he was Conservative member of parliament for Harrow and sat on numerous parliamentary committees. He also played an active part in the municipal administration of London and in Jewish communal affairs, being president of the South London Jewish Schools, vice president of the Board of Deputies of British Jews and of the Jewish orphanage, and closely connected with the United Synagogue. Isidore Salmon was knighted in 1933. Another brother, HENRY SALMON (1881–1950), was instrumental in developing the modern wholesale tea industry in Britain. Other members of the family were SIR SAMUEL (ISIDORE) SALMON (1900–1980), chairman of J. Lyons and Company from 1965 to 1968 and an active member of the London County Council; SIR JULIAN SALMON (1903–1978), deputy chairman of Lyons and catering adviser to the Royal Air Force; GEOFFREY ISIDORE HAMILTON SALMON (1908–1990), chairman of Lyons from 1968 and catering adviser to the British Army; and BRIAN SALMON (1921–2000), chairman of the firm from 1972 and the author of the Salmon Report on senior nursing staff structures.

SALMON, ALEXANDER (1822–1866), English traveler. Salmon was the son of a London banker, and while serving in the South Seas on a whaler, met and married Arii Tamai, 20-year-old chieftainess of the Teva clan on the island of Tahiti. He then became chief adviser to the rulers of Tahiti. Salmon, who was considered by the natives to be impartial, managed to persuade them not to resist the French when they established their rule over the island. In the late 1850s he went to Paris to see Napoleon III with a list of grievances from the natives which had been ignored by the French governor of Tahiti. He was not received and went off to London where, in 1858, he published his letter of complaint, *Lettre concernant l'état actuel de Tahiti*. His wife's memoirs, edited in part by Henry Adams, appeared in 1901. Their daughter Joanna married Maran Taroa, the last king of Tahiti, and their son Tati became an intimate friend of Robert Louis Stevenson.

BIBLIOGRAPHY: Ramsden, in: *Australian Jewish Historical Society Journal*, 1 (1949), 57–71 (includes bibliography).

SALMON, CYRIL BARNET, BARON (1903–1991), English judge. Born in London, the son of a member of the *Salmon family who co-owned J. Lyon & Co., and educated at Mill Hill school and Cambridge, Salmon was admitted to the Bar in 1929 and became a King's Counsel in 1945. His first judicial appointment in 1947 was as recorder of Gravesend, and in 1957 he was made a high court judge and knighted. In 1964 Salmon was promoted to lord justice of appeal and two years later he became chairman of the Royal Commission on Tribunals of Inquiry. In 1972 Salmon was appointed a Lord of Appeal in Ordinary in succession to Lord Donovan, and made a life peer as Baron Salmon. From 1974 to 1976 he was chairman of the Royal Commission of Conduct in Public Life. In 1967 he lectured at The Hebrew University on this subject, and his lecture was published as *Tribunals of Inquiry* (1967). Salmon was noted for consistently upholding liberal values.

SALMON, KAREL (Karl Salomon; 1897–1974), Israeli composer. Born in Heidelberg, Salmon studied composition with Max Reger and in Richard Strauss's "master class." From 1919 to 1933 he was active in Germany as conductor and singer (bass), and in 1933 he settled in Palestine. With the establishment of the Palestine Broadcasting Service (later Kol Israel), he became its musical director and remained at this post until 1958. He then was director of Kol Israel's transcription-exchange service for four years. Salmon also taught at the Academy of Music in Jerusalem and appeared as conductor and singer. Many of his works belong to the "Mediterranean style" period of Israel music and attempt a blending of his European heritage with Near Eastern and Jewish folklore material.

They include *Ali Be'er – Variations on a Hebrew Folksong* for orchestra (1937, the theme song is by Sara Levi-Tannai); four Greek folk dances, for orchestra (c. 1942, ending with a “Horah Stellenica”); *Israel Lives* (“*Am Yisrael Hai*”), variation for piano solo or string trio or string orchestra (1947); the “puppet opera” *David and Goliath* in which the composer often sang the part of Goliath; an *Israeli Youth Symphony*, and many other vocal, choral, and instrumental works.

[Bathja Bayer]

SALMON BEN JEROHAM (Sulaym ibn Ruhaym; tenth century), Karaite polemicist and writer, a fervent spokesman for the Mourners of Zion (*Avlei Zion), a native of Erez Israel or Iraq. According to Karaite tradition, he was the teacher of *Saadiyah Gaon, an impossibility since Salmon was much the younger man of the two. However, the tradition may possibly reflect some actual personal conflict between them, which could partially explain Salmon’s extreme hatred of Saadiyah. Salmon’s principal work, *Millhamot Adonai*, written in Hebrew, is a rhymed attack on the Rabbanites and on Saadiyah. Even for an age characterized by abusive polemics, the language of the book is unusually vehement, and the author treats Saadiyah more as a personal enemy than a theological adversary. In his subject matter, Salmon merely repeats the arguments of older Karaite polemicists, but the violent language and quasi-poetic form are all his own. If the hypothesis that Salmon is the same person as Ibn al-Sakawayh is correct, Saadiyah refuted his attacks in a special work, only fragments of which remain. In the 950s Salmon wrote a series of commentaries on the Bible. Complete mss, fragments and quotations identified so far include commentaries on Psalms, the Song of Songs, Lamentations, Ecclesiastes, and Isaiah. Though less violent in tone, they still contain many attacks on Saadiyah’s views, and on the Rabbanites in general. The commentary on Lamentations is especially interesting because it apparently constitutes the mourning rites and sessions of the Karaite Mourners of Zion. In his commentary on Ecclesiastes he expounds his ethical and intellectual views. Some scholars cast doubts on the authenticity of these two commentaries, because they contain much less anti-rabbinic bias. Salmon condemned all secular studies as ungodly and forbidden.

SALOME. A figure unnamed in the New Testament, but called Salome by Josephus. She was the daughter of Herodias and, through the latter’s remarriage, stepdaughter of the tetrarch Herod *Antipas, youngest son of Herod the Great (Jos., Ant., 18, 136). According to Mark (6:17–18): “For Herod [Antipas] himself had sent forth and laid hold upon John [the Baptist], and bound him in prison for the sake of Herodias, his brother Philip’s wife: he had married her. For John said unto Herod: It is unlawful for thee to have thy brother’s wife” (cf. Matt. 14:3–4; Luke 3:18–20). There is some confusion in Josephus as to when exactly the marriage between Herodias and Herod Antipas occurred and whether it was before or after John’s death. The problem was in Herodias having married her two uncles, while both were still alive, a union forbidden by Jewish law. Salome was the child of the first marriage. The point John would have made in his teaching is that such a union was not in keeping with Leviticus (18:6). The Gospels seem to suggest that Antipas had no plans to kill John, but that a set of circumstances led to his execution at the behest of Herodias, who suggested that Salome ask for his head. This occurred on the occasion of a banquet to celebrate Herod’s birthday in which he promised Salome anything that she desired because of her exquisite dancing. There are two passages dealing with the story (Matt. 14:1–12; Mark 6:14–29) and a comparison of the two is quite instructive. While the passage in Matthew is very factual in presentation, Mark’s account is much more colorful. While in Matthew Salome was “instructed” by her mother beforehand (i.e., Herodias planned the beheading in a premeditated fashion), the story in Mark is that it was the result of a whim, with Salome having to leave the banquet hall to consult her mother: “What shall I ask?”

Salome was a popular name in the Second Temple period: there are 52 recorded instances of the name and its variants (Heb. Shelomit, Shalom) in inscriptions and written sources. In the Gospels she is not mentioned directly by name and she is simply referred to there as “Daughter of Herodias” (Mark 6:22). It is Josephus who provides us with her exact name (Ant., 18:136). The Greek word associated with her in Mark indicates she was a very young girl, perhaps only 12, when she danced in front of Herod. Hence, she was probably born at the earliest in 16 C.E. Later, she is believed to have married Aristobulus, King of Lesser Armenia, but there have been some doubts about this. Jacobus de Voragine (c. 1230–1298) has preserved an apocryphal story about Salome’s death, perhaps reflecting the wishful thinking of Christian writers who could not accept the possibility that Salome might have gotten away with it, i.e., there had to be some retribution for her act (*Leg. Aur. Sanct.*). According to the story, she was walking across an icy pond when the ice gave way and she drowned. Another chronicler says that “the earth swallowed her alive.”

[Shimon Gibson (2nd ed.)]

In the Arts

In literature, the theme was not popular before the mid-19th century, and most writers have considerably embroidered the stark tale to heighten its dramatic effect. One of the very few Jewish writers attracted by the theme was Judah L. Landau, whose Hebrew drama, *Dam Tahat Dam*, appeared in 1897. The outstanding work on the subject was Oscar Wilde's tragedy, *Salomé*, which had a *succès de scandale* following its publication in French in 1893. Wilde made Salome a depraved personality driven on by her baffled lust for the Baptist, a treatment well calculated to outrage contemporary English opinion. An English translation by Lord Alfred Douglas appeared in 1894 and was subsequently published as *Salomé; La sainte courtesane; A Florentine tragedy* (1911). The play, first performed in Paris in 1896, only reached the English stage in 1931 when tastes had changed and censorship requirements had relaxed. Wilde provided an original dénouement by having the tetrarch order Salome's own execution amid her dreadful triumph. Another late 19th-century treatment of the subject was the German dramatist Hermann Sudermann's five-act tragedy, *Johannes* (1898²; *John the Baptist*, 1909). The theme retained its popularity in the 20th century, beginning with *Salome* (1908), a Swiss-German tragedy by Richard Zwez. Salome also inspired a poem by the French surrealist Guillaume Apollinaire and a Croatian drama by Miroslav Krleža. Her mother, Herodias, was the heroine of two French works of the 19th century on closely related themes: *Hérodiade* (1869), a verse drama by Stéphane Mallarmé, and "Hérodiad," the third of Gustave Flaubert's *Trois Contes* (1877), which imaginatively recreates the atmosphere of Roman-occupied Judea.

In art, there were from the 11th century a number of representations of the feast at which Salome danced. In these Herod presides, wearing a crown or a medieval Jewish conical hat. On a capital from the cloister of St. Etienne (Musée des Augustins, Toulouse) he is shown in the act of tenderly chucking Salome under the chin. In the oldest representations, Salome dances in an upright position with movements of the hips, but in those produced after the 12th century she turns somersaults and stands on her hands in the manner of medieval acrobats. She was known in medieval France as "la danserelle" or "la sauterelle" (the grasshopper) and an acrobatic dance was named after her. In art she is shown performing dances which vary according to the fashion of the period. The dance of Salome appears in medieval carvings, stained-glass windows, the 12th-century bronze doors at St. Zeno, Verona, and in 12th- and 13th-century mosaics at the Florence Baptistery and St. Mark's Cathedral, Venice. It was also a popular subject in the early Italian Renaissance, when it was treated by Giotto (1266/67–1337) in his fresco at St. Croce, Florence; by Donatello (1386–1466) in a bronze bas-relief in the Baptistery of St. Giovanni, Siena; and by Fra Filippo Lippi (1406–1469) in a fresco at Prato Cathedral. The subject later appears in 17th-century Russian frescoes and in a drypoint etching by Picasso in which Salome dances before Herod in the nude. The scene where Salome receives John's head on a charger

is usually shown together with that of his prior beheading. Salome's mother, Herodias, who is seated with Herod at the feast, is sometimes shown cutting a slit down the Baptist's forehead or piercing his tongue. Often, however, Herod and his wife cover their faces in horror, whereupon Salome faints. This scene is represented in a number of the sources already mentioned, and in paintings by Luini (Prado) and Lucas Cranach (1472–1553; Wadsworth Athenaeum, Hartford, U.S.). In the 19th century, the French symbolist painter Gustave Moreau (1826–1896) painted *The Apparition* (now in the Louvre) – an opulent study of the dancing Salome who sees the head of John the Baptist in a vision. A portfolio of the English artist Aubrey Beardsley's drawings to illustrate Oscar Wilde's play was published in 1920.

In Music

In music, the story has inspired general works, which the fancy of the librettists elaborated far beyond anything that can be found in the sources. Jules Massenet's *Hérodiade* (text by Paul Milliet and Georges Hartmann under the pseudonym of Henri Grémont) was first performed in Brussels in 1881 and has remained in the repertoire. Here, Salome loves John and does not know that she is the daughter of Herodias; Herod falls in love with her and in the final dénouement, Salome kills herself. The most famous universal treatment of the theme is Richard Strauss's opera, *Salome*, written in 1904–05 to a libretto by Hedwig Lachmann based on Oscar Wilde's play. The opera's gruesome theme and the horrors it contained aroused strong opposition wherever it was performed, the sensuousness of the text being faithfully paralleled by the music. The "Dance of the Seven Veils" which forms *Salome*'s climax is sometimes performed as a concert piece and, in the early 1920s, it was often presented as a vaudeville attraction. A setting of Wilde's play in the original French version was composed by Antoine Mariotte before 1905, but had its première only in 1908 (at Lyons), and this involved the composer in difficulties with Richard Strauss. Three works on the same subject followed almost immediately. Florent Schmitt's ballet, *La Tragédie de Salomé* (1907), included many Oriental themes which he had collected in 1900 on his travels in the Near East, especially in Palestine ("heard near the Dead Sea"). The same year saw the appearance of Karol Szymanowski's *Salome*, a circle of songs with orchestra (text by J. Kasprovicz; revised orchestration 1912), and Granville Bantock's opera, *The Daughter of Herodias*. Bantock also wrote incidental music for the Wilde play in 1918. Paul Hindemith's *Hérodiade* (1944), for chamber orchestra, was based on the verse drama by Mallarmé; it has also served for a ballet. Among compositions of incidental music for the play is that by Leonard Bernstein (1955).

SALOME ALEXANDRA (Heb. שְׁלֹמִיזִיּוֹן, *Shelomziyyon*; Gr. **Salina, Salampsio**; 139–67 B.C.E.), queen of Judea and wife of *Aristobulus I and *Alexander Yannai, upon whose death she ascended the throne to reign as sole Jewish monarch during the years 76–67. Josephus first mentions her as an accomplice in the plot to assassinate Antigonos, brother of her husband Aristobulus I, but most historians attribute this accusation to the animosity toward the Hasmonean rulers of those historians whom Josephus saw as his source. Upon the death of Aristobulus (103 B.C.E.), it seems that the widow of the presumably childless king was required to marry his brother Yannai, in accordance with the Jewish law of *levirate marriage. However, Josephus nowhere mentions this explicitly, and this has led some scholars to believe that Yannai in fact married another woman of the same name. It is probable that the first assumption is the more correct. On Aristobulus' death she released his three brothers (including Yannai), who had been imprisoned for some time. There are no reports of Alexandra's political influence during the reign of Yannai, although she seems to have opposed the king's persecution of the Pharisees. It is certain, however, that she won the affection of the Judean populace, thereby convincing her husband before his death that the Jews would bow to her authority as they would to no other. Alexandra's accession in 76 B.C.E. was considered a moral and political victory for the Pharisees, and the close relations between that sect and the queen are referred to in rabbinic traditions. Simeon b. Shetaḥ, leader of the Pharisees (see Ber. 48a; Gen. R. 91:3), was reportedly received by Salome at the palace at the period of her husband's dispute with the Pharisees. After her accession he was recalled from Egypt and appointed joint judicial and religious head of the Sanhedrin with *Judah ben Tabai. The Pharisees immediately demanded that the Temple ritual be reformed in accordance with their practices, and that the fixing of the calendar and judicial leadership be under their control. Josephus, while admitting that the Pharisees may have used the queen's favor to assume the practical administration of the state, nevertheless stresses that she retained the reins of government with regard to larger matters. The queen was a strict observer of religious traditions, and dismissed any violator of religious law. The Pharisees used their privileged position to settle old scores. In one instance they brought about the execution of Diogenes, one of the advisers of Yannai, who was accused of having incited the king to crucify 800 Pharisees. Alexandra took no reprisals, however, against the Sadducees who had fought under her husband and were at the mercy of their enemies.

Alexandra's foreign connections were extensive, and her influence was felt and respected by neighboring monarchs.

By continual recruiting, and by collecting foreign troops, she doubled the size of her army. However, the Pharisees were sufficiently powerful to prevent her from continuing the traditional Hasmonean wars abroad, although a military expedition to Damascus was led by her son Aristobulus. It proved ineffectual, and by means of treaties and gifts she warded off the occupation of her kingdom by Tigranes, king of Armenia, who had invaded Syria and was marching toward Judea (c. 70 B.C.E.). Shortly after this success the queen fell ill, and internal dissension again threw Judea into bitter turmoil. Of the queen's two sons by Yannai, the elder, *Hyrchanus, had been appointed high priest, and was considered sole heir to the throne. His younger brother, *Aristobulus, not content with the secondary role accorded him, courted the support of those elements whose power had diminished under the rule of the Pharisees. Gathering a large mercenary force, Aristobulus took possession of numerous fortresses throughout the country and proclaimed himself king. Before the queen could move against him, she died, leaving the incompetent Hyrchanus to agree to the terms dictated by Aristobulus. Josephus praises Alexandra for keeping the nation at peace. The rabbis relate how Erez Israel was so fertile in her reign that the grains of wheat, oats, and lentils grew to extraordinary sizes and were kept to show to future generations what piety could achieve.

SALOMON, ALBERT (1891–1966), sociologist. Born in Berlin, Salomon was professor of political sociology at the Deutsche Hochschule fuer Politik in Berlin from 1926 to 1931 and at the Berufspaedagogisches Institut in Cologne from 1931 to 1933. For some years he edited *Gesellschaft*, the journal of the Social-Democratic Party. Forced to emigrate after Hitler's advent to power, Salomon went to New York, where he was a professor of sociology at the graduate faculty of the New School for Social Research from 1935 until his death. Salomon followed the historical and philosophical traditions of French and German classical sociology. He paid attention to the importance of literature in a developing theory of society. His major books were *Autoritaet und Freiheit* (1936) and *Tyranny of Progress* (1955; *Fortschritt als Schicksal und Verhaengnis*, 1957).

[Werner J. Cahnman]

SALOMON, ALICE (1872–1948), German economist and educator. Born in Berlin of a merchant family that had settled in north Germany in the 18th century, Alice Salomon converted to Protestantism at the beginning of World War I. She was active mainly in the training of women for profes-

sional social work and their inclusion in that field. In 1908 she founded in Berlin a school for that purpose, which she directed until 1924. Expelled from Germany in 1937, she went to England and from there to the U.S., where until her death she continued her literary activity in the field of the social education of the woman and the protection of the working woman. Although she was not a suffragette in the political sense, she was active in the women's international movement. She founded and directed the Konferenz sozialer Frauenschulen Deutschlands, the Deutsche Akademie fuer soziale und paedagogische Frauenarbeit, and the Internationales Komitee sozialer Schulen. She was vice president of the International League of Women.

She wrote many books which became classics of social work: *Die Ursachen der ungleichen Entlohnung von Maenner- und Frauenarbeit* (1906); *Einfuehrung in die Volkswirtschaftslehre* (1909, 1921⁵); *Die Ausbildung zum sozialen Beruf* (1927); *Leitfaden der Wohlfahrtspflege* (1921, 1928³). Her autobiography was published many years after her death, first in German translation as *Charakter ist Schicksal* (1983, 1984), and later in the English original, *Character is Destiny* (2004). Salomon's collected works were published in three volumes under the title *Frauenemanzipation und soziale Verantwortung* (1997–2003).

BIBLIOGRAPHY: H. Muthesius (ed.), *Alice Salomon: die Begründerin des sozialen Frauenberufes in Deutschland* (1958), includes bibliography of her writings. **ADD. BIBLIOGRAPHY:** J. Wieler, *Erinnerung eines zerstörten Lebensabends* (1987); R. Orywa and A. Droegge (eds.), *Alice Salomon in ihren Schriften* (1989); M. Berger, *Alice Salomon* (1998); A. [Shalom Adler-Rudel / Noam Zadoff (2nd ed.)]

SALOMON, CHARLOTTE (1917–1943), German painter. The daughter of a Berlin physician, Salomon was sixteen when the Nazis came to power. She refused to continue her schooling because of the humiliations to which she was subjected, but in 1935 she was still able to attend the local Academy of Fine Arts. In 1939 she emigrated to France, where she married another refugee, Alexander Nagler. They lived in relative security until the Germans occupied the Riviera in September 1943, five months after their marriage. Then the Gestapo conducted one of the most brutal mass roundups in Western Europe, during which the young couple were dragged out of their home by the Gestapo, and both died in the gas chambers of Auschwitz. While a refugee from Nazi Germany, during 1941 and 1942, Salomon portrayed her life in an autobiography titled *Leben oder Theater? Ein Singspiel* ("Life or Theater? An Operetta"). It takes the unprecedented form of a musical drama in 1,325 gouaches of astonishing vividness and force, painted in flat, cool colors, with an unusual perspective and a great deal of purely decorative detail. "Life or Theater?" is peopled by characters based on her family and friends, ordered by acts and scenes, narrated by dialogues and commentaries, and accompanied by musical cues.

The autobiography makes one family emblematic of its era. Salomon records the creative milieu of Berlin through the experiences of her stepmother, Paula Salomon-Lindberg, a well-known opera singer, and of her mentor and lover, Alfred Wolfsohn, a philosopher of music. The autobiography also registers the impact of Nazism on an assimilated Jewish family: first Charlotte Salomon's grandparents emigrated from Germany, then her stepmother was restricted to performing for Jewish audiences; her father, Dr. Albert Salomon, was deprived of his professorship at the Berlin University Medical School, then imprisoned in Sachsenhausen. Charlotte Salomon was among the handful of Jewish students admitted to the Berlin Academy of Fine Arts, but was expelled in 1938, and left Germany in 1939.

Joining her grandparents in Villefranche on the French Riviera, Salomon witnessed her grandmother's suicide in 1940 and only then learned that her mother's death years earlier was also a suicide. The menace of suicide and the duress of exile forced her to decide, she said, "whether to take her own life or undertake something unheard of and mad" – an autobiography in art. After working more than a year on *Leben oder Theater?*, she gave its paintings and texts to a friend in Villefranche, saying: "Keep this safe. It is my whole life." The paintings often have explanatory captions: one reads, "I cannot bear this life, I cannot bear these times." When a collection of these gouaches was published in 1963 as *Charlotte, A Diary of Pictures*, Charlotte Salomon came to be regarded as the Anne *Frank of painting.

After the war, her father and stepmother brought *Life or Theater?* to Amsterdam, where it now resides in the Jewish Historical Museum. Exhibitions in Europe, the U.S., and Israel (Beth Hatefutsoth, 1985), as well as published reproductions, a film, and plays, have given *Life or Theater?* international standing as an artwork, autobiography, and historical document.

[Alfred Werner and Mary Felstiner]

SALOMON, ERICH (1886–1944), German photographer. Trained as a lawyer in Berlin, Salomon took up photography as a full-time profession when the 35-millimeter camera appeared in 1925. This small camera allowed a candidness and instantaneousness which had been the aim of documentary photographers since the invention of the camera. Salomon

first used this camera for behind-the-scenes glimpses of internationally famous political personalities at League of Nations conferences in the late 1920s. An audacious, ingenious cameraman, his many subterfuges included cutting a hole in his derby hat for a concealed lens; wearing an armsling which hid both camera and the little glass slides he first used; and carrying an impressive leather-bound volume hollowed out to serve the same purpose. Another of his famous tricks was to place the camera in a flowerpot, window sill, or desk, and trigger the shutter by a cable release hidden in flowers, carpet, or wall. Salomon was one of the world's first photo-historians. He covered the League of Nations, diplomatic and other meetings in Geneva, Paris, London, and Washington. Erich Salomon died with his family in the gas chambers of Auschwitz. A son, Peter Hunter-Salomon, survived the Holocaust and published a book on his father, *Portraet einer Epoche* (1963).

[Peter Pollack]

SALOMON, GAVRIEL (1938–), specialist in educational psychology. Salomon was born in Tel Aviv. In 1966 he received his M.A. degree in education and psychology from The Hebrew University of Jerusalem, and in 1968 he received his Ph.D. in educational psychology and communication from Stanford University. From 1969 until 1974 he was a lecturer at The Hebrew University, and in 1975–77 he was head of the educational psychology program there. From 1984 to 1987 he served as head of the computer and education program at Tel Aviv University. He served as editor of *Educational Psychologist* (1991–95) and as president of the Educational, Instructional and School Psychology Division of the International Association of Applied Psychology (IAAP) in 1990–94. Subsequently he became co-director of the Center for Research on Peace Education. In 1992 Salomon became a professor at Haifa University and in 1993–98 was the dean of the Faculty of Education there. His work covers a range of topics: the cognitive effects of media's symbol systems, the expenditure of mental effort, mindfulness and mindlessness, organizational change, the design of intelligent computer tools, the design and systemic study of technology-afforded learning environments, and education for peace. His books include *Interaction of Media, Cognition and Learning Communication and Education* (1981) and *Technology and Education in the Information Age* (Heb.). He also edited *Distributed Cognition* (1993) and *Peace Education: The Concept, Principles, and Practices Around the World* (2002). In addition he published more than 100 empirical, theoretical, and methodological articles. In 2001 he was awarded the Israel Prize for education.

[Shaked Gilboa (2nd ed.)]

SALOMON, GESKEL (1821–1901), Swedish artist and art historian. Born and educated in Denmark, he settled in Sweden in 1850 and became professor at the Stockholm Art Academy. Among his books on art history were *Die Statue des Venus von Milo* and *Die Statue des Belvederischen und Vatikanischen Apollo*. He painted historical events, portraits, and genre sub-

jects. These last include Jewish scenes which illustrate religious observances in 19th-century Scandinavia. *Lighting the Sabbath Candles* was painted when the artist was almost 80 years old.

SALOMON (Salomon de la Tour), GOTTFRIED (1892–1964), German sociologist. Salomon's father was Jewish and his mother was of French Protestant descent. Born in Frankfurt, he studied under Georg *Simmel, but later became assistant to Franz *Oppenheimer, an adherent of politico-historical sociology. In 1933 Salomon emigrated to France and in 1941 fled to the U.S., where he taught at the New School for Social Research, Columbia University, Hunter College, and Yeshiva University. In 1958 he returned to Frankfurt.

Salomon's publications (such as *Allgemeine Staatslehre*, 1930) are chiefly concerned with political ideology and the history of sociology and socialism. He became widely known as editor of the *Jahrbuecher fuer Soziologie* and of the works of Ludwig *Gumpowicz, Lorenz von Stein, and Giambattista Vico. His first publication was *Proudhon und der Sozialismus* (1920) and his last *Moderne Staatslehren* (1965).

[Werner J. Cahnman]

SALOMON, GOTTHOLD (1784–1862), German preacher and reformer. After receiving a thoroughly Orthodox education, at the age of 16 Salomon was sent to Dessau, where he was influenced by modern trends. He then became a teacher and preached his first sermon there in 1806. A frequent contributor to **Sulamith*, he also vigorously answered the antisemitic writings of the professors C.F. *Ruehs and J.F. *Fries in 1817 (in 1843 he answered Bruno *Bauer). Two years later he was called to the pulpit of the Hamburg Reform temple, where he collaborated with E. *Kley. His reputation as a preacher had been established by a collection of sermons (*Auswahl mehrerer Predigten*, 1816), the first of a voluminous series. Salomon's sermons, modeled, like those of other preachers, on Protestant examples, were praised by his contemporaries, notably H. *Heine. When in 1841 Isaac *Bernays banned the prayer book he had composed, Salomon defended his position in the subsequent fierce controversy (*Das neue Gebetbuch...*, 1841). He vigorously supported the rabbinical assemblies of the mid-1840s in Brunswick, Frankfurt, and Breslau.

SALOMON (Solomon), HAYM (1740–1785), early American merchant and Revolutionary War patriot. Salomon, who was born in Lissa, Poland, arrived in New York about 1775 after wandering in Europe and became one of the most prominent 18th-century American Jews. During the Revolutionary War he was a distiller and sutler to the American army, and

was captured as a spy by the British. His life was spared, and he served as an interpreter in their commissary department. Continuing to give information to the Americans, he assisted their prisoners to escape British captivity while operating a profitable victualing business in New York City under British occupation. Married to Rachel Franks in 1777, he had to flee a year later to Philadelphia, where he began a brokerage and commission business. In 1781 he became an assistant to Robert Morris, superintendent of the Office of Finance, after serving in a similar capacity as broker and treasurer for the huge expenses of the French army stationed in America. Morris characterized him as “useful to the public interest.” Salomon also lent money without charge to impecunious members of the Continental Congress, among them James Madison, who recommended him as “our little friend in Front Street.” In 1784 Salomon expanded his business activities to New York, opening a brokerage and auctioneering house there with Jacob Mordecai. A mason, Salomon was a major contributor in 1782 to the Congregation Mikveh Israel building, Philadelphia. He argued against a New Testament oath taken by officeholders in Pennsylvania and worked for political rights of Jews. Though a successful merchant, Salomon invested most of his money in Continental stocks and bonds, and his accounts showed a deficit at the time of his death. The newspaper obituary referred to him as “an eminent broker of this city... remarkable for his skill and integrity in his profession, and for his generous and human deportment.” He left four children and a widow, who later married David Hilborn. By 1799 she was living in the Batavian Republic. Benjamin Gomez was appointed guardian of Salomon’s son HAYM M. (1785–1858), and Joseph Andrews of his daughter DEBORAH (1783–1808). Exaggerated claims were made for Salomon’s services to the American Revolution, largely as a point of Jewish apologetics. Without question, however, he was a vigorous patriot at great personal risk, and a competent financial servant of American independence and of some of its leaders.

SALOMON, JOEL MOSES (1838–1912), Erez Israel pioneer and founder of Petah Tikvah. Born in Jerusalem, Salomon was a descendant of a pupil of *Elijah the Vilna Gaon and settled in Erez Israel in 1808. His grandfather, Solomon Zalman *Zoref, and his father, R. Mordecai Salomon, were leaders of the early Ashkenazi community in Jerusalem. Salomon was educated at yeshivot in Jerusalem and Lithuania. He studied printing at Koenigsberg, East Prussia, and, on his return to Jerusalem, he and several partners established a printing press. In March 1863, they printed the first issues of the first Erez Israel periodical, *Ha-Levanon (spelled by them *Halbanon*), edited by Jehiel *Brill, to which Salomon contributed.

Salomon was active in the Ashkenazi community and strove to obtain for it a status equal to that of the Sephardi community and to make peace between its factions. He joined a group of young community leaders who wished to extend the scope of Jewish settlement in Jerusalem and even engage in

agricultural work. Salomon was one of the founders of Jerusalem’s Naḥalat Shivah quarter (1869), one of the first to be built outside the walls of the Old City, and participated in the establishment of Me’ah She’arim and other quarters. He took active part in the Yishuv Erez Israel Association, which endeavored to purchase agricultural land for settlement. In 1877–78 he published the paper *Yehudah vi-Yrushalayim* (“Judea and Jerusalem”), in which he advocated plans for agricultural settlement and called for “action and deed.” In the autumn of 1878 he was among the founders of Petaḥ Tikvah; after the first settlers were severely affected by malaria, he helped establish the nearby settlement of Yahud and to attract to it scholars, in order to establish a yeshivah there. After living there for seven years, he returned to Jerusalem and took up his public work for the institutions of the old *yishuv*.

SALOMON, JULIUS (1853–1922), Danish archivist and historian of 19th-century Danish Jewry. Appointed librarian of Copenhagen’s newly established municipal library in 1897, Salomon assembled an outstanding collection of material for scholarly research. From 1907 to 1917 he was assistant secretary to the upper house of the Danish Parliament.

In 1914, to celebrate the centenary of the royal decree which granted Danish Jewry full civil liberties, he published *Mindeskift i Anledning of Hundredaarsdagen for Anordningen of 29 Marts 1814*. Together with J. Fischer, he wrote *Bidrag til dansk-jødisk Historie 1820–1845* (“Contribution to Danish-Jewish History 1820–1845,” 1918). He was a cofounder and editor of the Jewish journal *Tidsskrift for Jødisk Historie og Literature*, in which many of his studies of Danish-Jewish history appeared between 1917 and 1922.

[Herbert A. Strauss]

SALOMON-CALVI, WILHELM (1868–1941), German geologist. Salomon-Calvi was a member of the faculty of Heidelberg University from 1897, being appointed professor of geology in 1908. In 1934, despite the fact that he was a convert to Christianity, he left Germany and went to Turkey, where he became head of the geology department of the agriculture faculty at Ankara University.

His main work was connected with the Adamello-Marmolata and Gotthard massifs of the Alps, the tectonics of the rift valley of the Rhine, and the influence of magmatic upheavals on mountain building. Salomon-Calvi discovered thermal springs near Heidelberg and played a part in the groundwater exploration of Turkey. He was for many years editor of the *Geologische Rundschau* and an active member of the Heidelberg Academy.

[Leo Picard]

SALOMONS, SIR DAVID (1797–1873), first Jewish lord mayor of London. David Salomons was born in London, the son of Levi Salomons, a prominent Ashkenazi stockbroker. He became a member of the Stock Exchange in 1823 and a Lloyds underwriter in 1834. As a founder of the London and Westminster Bank in 1832, he was one of the few Jews to participate in the development of joint stock banking in Britain. An ardent fighter for Jewish emancipation, national and municipal, Salomons played a prominent part in the campaign to abolish the last Jewish disabilities. In 1835 he was elected a sheriff of London; after being twice refused, he was finally elected alderman in 1847; on both occasions special legislation was carried through to enable him to take the oath in a form acceptable to him. He became lord mayor of London in 1855 without any attempt being made to debar him. Elected to parliament in 1851, he took his seat in the House of Commons, but was forced to withdraw because he refused to recite the conclusion of the oath, “on the true faith of a Christian.” After the amendments to the oath brought about the bill of 1858, he sat in parliament as a Liberal from 1859 until his death. His particular interests were social problems and Jewish welfare.

Salomons was active on the Jewish Board of Deputies (twice replacing Sir Moses *Montefiore temporarily as president) and took an interest in the Westminster Jews’ Free School, Jews’ Hospital, and the Society for Hebrew Literature. In 1869 he was made a baronet, being succeeded by his nephew SIR DAVID LIONEL SALOMONS (1851–1925), a pioneer of electrical engineering and automobiles.

SALOMONS, SIR JULIAN EMANUEL (1836–1909), Australian politician and jurist. Born in Birmingham, England, Salomons, the son of a merchant, emigrated to New South Wales in 1853 and worked first for a bookseller and then for a stock jobber. His mother’s sister married Sir Saul *Samuel. Salomons became secretary of the Sydney Great Synagogue, and his ability as a public speaker led the synagogue to send him to England in 1858 to study law. In 1861 he returned to Sydney and was admitted to the bar. His keen powers of analysis and gift for submitting evidence rapidly led him to outstanding success. In 1868, he defended the Irish nationalist O’Farrell on a charge of shooting at the Duke of Edinburgh, a son of Queen Victoria. In 1869 Salomons was nominated a member of the New South Wales Legislative Council and in the same year became solicitor-general, representing the government in the Upper House. He resigned in 1870. Salomons was made chief justice of New South Wales in 1886, but resigned before even being sworn in because of the hostility of some members of the court. He was reappointed to the legislative council in 1887 and was vice president of the cabinet until 1889. He

served as agent-general for the colony in London from 1889 to 1890 and again from 1899 to 1900. Originally opposing the campaign for federation of the Australian colonies, after the passage of the 1900 Constitution Act he became a strong supporter and took part in working out the compromise federation agreement which was embodied in the Imperial Decree of July 1900. He was knighted in 1891. Salomons always outspokenly defended his Jewish background.

SALOMONSEN, CARL JULIUS (1849–1924), Danish physician and bacteriologist. Born in Copenhagen, Salomonsen began his bacteriological investigations in 1873 as an assistant at the Copenhagen Municipal Hospital. He studied with Julius Friedrich Cohnheim (1839–84), Robert Koch (1843–1910), and Louis Pasteur (1822–95), and then introduced bacteriology as a scientific discipline into Denmark and was appointed lecturer on bacteriology at the University of Copenhagen. Salomonsen was professor of pathology from 1893 to 1920 and rector magnificus (1919–20). With the introduction of serotherapy and the discovery of diphtheria antitoxin, Salomonsen established a serotherapeutic laboratory in 1895 which became the foundation of the well-known Danish State’s Serum Institute. Salomonsen was known as the last polyhistor at the University of Copenhagen. A great number of monographs on various branches of science afford evidence of his extensive knowledge and interests.

[Julius Margolinsky]

SALONIKA (Thessaloniki), port located in N.E. Greece. Although historical evidence is scarce, it is believed that the Alexandrian Jews who arrived in ca. 140 B.C.E. were among the first Jews to settle in Salonika. Several sources give evidence of the existence and growth of the Jewish community during the Hellenistic and Roman periods. It is known that the apostle Paul preached for three consecutive Sabbaths in the synagogue of Salonika and that afterward he was forced to leave the town. The Romans granted autonomy to the community, whose members lived in a neighborhood near the port; therefore, the Jews had the opportunity to develop strong commercial ties with many parts of the world. The Jews of Salonika during the Roman and Byzantine periods had Greek names and spoke Greek.

Byzantine Period

After the splitting up of the Roman empire in 395 C.E., Salonika became the second most important city – after Constantinople – in the *Byzantine Empire. The Byzantine emperors in their efforts to “Christianize” their subjects were hostile to the Jewish communities in their territory and especially to the Jews of Salonika. Constantine the Great (306–37) and Theodosius II (408–50) enforced anti-Jewish laws. Justinian I

(527–65) and Heraclius (610–42) prohibited public fulfillment of the *mitzvot*. Basil I (866–86), the Macedonian, and Leo III (717–41), the Philosopher, forced the Jews to convert or leave the country. One of the very few emperors who acted favorably toward the Jews was Alexius I Comnenus, who during the First Crusade alleviated the taxes imposed upon them. During the same period, in 1096, the messianic movement that had started in Germany as a result of the persecutions in Mainz and had spread throughout Europe also reached Salonika. In 1169 Benjamin of Tudela visited Salonika and mentions that at that time there were about 500 Jews in the city. The sufferings of the Jews continued during the Latin Empire, which was established by the Crusaders (1204–61), as well as under Theodore Ducas Angelus, the despot of Epirus, who ruled the kingdom of Salonika from 1223 or 1224 to 1230.

During the second half of the 14th century Salonika attracted Jews, among the first being Hungarian Jews in 1376. Refugees from the 1391 riots in the Iberian Peninsula, mostly from Catalonia, found refuge in Salonika. In 1394, Jews migrated to the city from Provence. Like the Ashkenazim, the immigrants from the latter two regions formed their own synagogues. In 1423, Andromachos, the governor of Salonika, sold the city to the Venetians. The Venetians imposed heavy taxes on the Jews, who sent a special delegation to Venice to convince them to alleviate the burden. In spite of the hardships they suffered during the Byzantine period, the Jewish community of Salonika flourished: most of the Jews were merchants, engaging especially in the silk trade. Jews from Sicily, Venice, and other Italian cities migrated to Salonika and formed the synagogues Sicilia Yashan and Italia Yashan. There was also a veteran Romaniot community in the city. It is to be noted that the oldest synagogues of Salonika – Etz ha-Hayyim (which existed until the 1917 fire) and Etz ha-Da'at – date as early as 142 B.C.E., and until the arrival of the Iberian expulsees in 1492, they observed the Romaniot prayer rite and customs. Nevertheless, it is impossible to affirm the continuity of the community.

Turkish Conquest – Sephardi Immigration (15th–16th Centuries)

In 1430 Salonika was occupied by the Turks. At approximately the same time waves of Jewish immigrants started arriving in the town. In 1470 Bavarian Jews arrived in Salonika and formed the Ashkenazi community near the existing Romaniot community. The two communities differed in every aspect: clothing, eating habits, religious rites, prayer books, etc. The Ashkenazi community continued to exist until the beginning of the 20th century and the members were not assimilated into the other Jewish groups in Salonika. During the 15th and 16th centuries many Jewish expellees from Spain, Portugal, Italy, Sicily, and France, and refugees from North Africa, settled in Salonika. The largest numbers came in 1492–3 and 1536. Once in Salonika they founded separate synagogues (“congregations,” *kahal kadosh*). These synagogues were named after their native countries or towns: Sicily, Calabria, Majorca, Lisbon,

etc. Salonika also received Marranos who were expelled from Portugal. In 1514 the rabbinical triumvirate of Salonika issued a special *haskamah* regarding the Marranos as Jews as far as marriage and divorce were concerned, i.e., they practically regarded the Marranos as Jews in every respect. Additionally, in 1555, when the Marranos from Ancona were persecuted by Pope Paul IV, the Jewish merchants of Salonika decided to boycott Ancona and incited the Jewish merchants all over the *Ottoman Empire to follow them in their act. Nevertheless, as a result of political and economic reasons, the boycott did not succeed. There was some emigration from Salonika, but not to a great extent. The reasons for the emigration were plagues and fires that ravaged the town in 1543, 1545, and 1548. It is estimated that by 1553 there were 20,000 Jews in Salonika: the location of the city and the fact of being a port – constituting a key point on the international trade route between the East and the West – helped attract settlers. Merchandise from the East came to Salonika and from there was transferred to the West and vice versa. The Jewish immigrants maintained their relations with their coreligionists and colleagues in their countries of origin – France, Flanders, Egypt, and especially with the Italian ports, above all Venice. They therefore had a relative advantage in international trade, Salonika’s location helping to exploit this advantage to the maximum. Troubles, of course, were not lacking, coming in the form of pirates and highwaymen. The Jews of Salonika also engaged in the crafts, and the city was famous for its Jewish weavers and silk and wool dyers. Nearby there were gold and silver mines in Siderokastro and many of the miners were Jews. Another craft was the manufacture of jewelry.

There were three main concentrations of Jews in Salonika: a quarter next to the city wall at the port, i.e., very close to the main artery of trade; the Francomahalla, i.e., the quarter of the “Francos” (foreigners from Europe), which presumably consisted of the elite of the Jewish inhabitants; and the quarter near the hippodrome, which was primarily Greek. Thus, the Jews did not live near the Turks, the rulers of the town. The organization of Jewish life in Salonika was of a special character. There were about 30 independent congregations who sometimes associated themselves as a voluntary body that took care of the common interests of the congregations. The *takkanot* issued by this body had to be accepted by every congregation to be valid for it. They included women’s rights, ethical matters, religious matters, etc. These *takkanot* were based on the *takkanot* of Toledo (1305), Aragon (1335), and Castile (1432). The heads of each community were called *parnasim*, *memunim*, *nivrarim*, and *anshei ma’amad*, and were elected by all the members of each congregation. A committee elected by the *parnasim* of each congregation decided what proportion of taxes each congregation had to pay to the Turkish authorities, according to the number of members and their financial state. Women, orphans, and the poor were exempt from taxes. Each congregation had the following communal organizations: *Hevra kaddisha*, which was also called *Hevrat kevarim*; *gemilut hasadim* (“philanthropic organization”); *bikkur holim*

(sick wards); yeshivah; and *bet din*. The religious head of each *kahal kadosh* was the *marbiz torah* or *hakham shalem*, who was elected for a limited period of time and usually came from the town or country of origin of the *kahal kadosh*. The *marbiz torah* taught at the yeshivah of the congregation, was usually also the *dayyan* of the congregation, and delivered sermons on Sabbaths and holidays. Jews were forbidden by the *halakhah* to go to the Turkish authorities for matters pertaining to inheritance and *ketubbot*. The Talmud Torah Hagadol was formed in 1520 as a communal solution to education, since maintaining a school for each of the more than 30 *kahalim* became an insurmountable burden. It was a very large institution of 200 teachers, serving more than 10,000 students, and was not only a school but also had a communal treasury, library, printing press, a fabric industry, and its own prayer congregation. Salonika became a center of Torah learning and attracted many students from abroad. During the 16th century there were numerous important rabbis whose influence spread beyond the borders of Salonika and even the Ottoman Empire. Among the most prominent were: Joseph *Caro, the famous rabbinic decisor who lived in Salonika during the years 1532–34 and continued to work there on his monumental *Bet Yosef*; Solomon *Alkabetz, the author of *Lekhhah Dodi*; Isaac *Adarbi, the author of *Divrei Rivot* and *Divrei Shalom*; Moses *Almosnino, the author of many important works including *Regimiento de la Vide* and inventor of an astrolabe; Moses de Boton (d. 1570) and his son Abraham de *Boton (d. 1592), the author of the responsa *Lehem Rav* and *Lehem Mishneh*, a commentary on Moses *Maimonides' 12th-century code of Jewish law, *Mishneh Torah*; and Samuel di *Medina ("RaSHdaM"), who left over 1,000 responsa and is considered among those halakhic authorities whose decisions both in *halakhah* and in practice can be relied upon. Salonika was also renowned as a center of Kabbalah. In addition to the rabbinical schools in Salonika in the 16th century, there was a *bet midrash* for *piyyutim* and singing, as well as a *bet midrash* for secular studies where medicine, natural sciences, astronomy, and other subjects were taught. Saadia Longo was a noted local poet, and Israel *Najara of Damascus, who was of Salonikan familial origin, spent time there. The physician *Amatus Lusitanus, who wrote treatises on circulation, taught in that above school of medicine when he settled in Salonika in 1558.

From 1515 the Jewish weavers of Salonika provided the Ottomans with cloth for army uniforms. Later the community could pay the mandatory poll tax (the *jizya*) as a protected minority religious group through this service. Thus, the Jewish community was recognized as "Musselemlik," recipient of "a freedom letter" which exempted it from other taxes and made it an autonomous administrative body directly under the Sublime Porte.

17th Century

At the beginning of the 17th century the city once again suffered from plagues and fires (1604, 1609, 1610, 1618, 1620, 1630, 1636, 1640, 1648), causing emigration; nevertheless,

by the middle of the century there were about 30,000 Jews, or half of the total population of the town. Trade continued to flourish in spite of the drop in Venetian trade, which resulted from the loss of Crete to the Turks in 1669 and the riots caused by the janissaries at the same time. The Jews continued to export grain, cotton, wool, silk, and textiles. Many Jewish women worked in growing tobacco and its industry. At the same time fewer and fewer Jews worked in the crafts. Toward the end of the century a decline in commercial activities took place as a result of the decline of the Ottoman Empire, which had entered a state of continuous war with various countries and peoples. In spite of all these troubles Salonika remained a center of religious studies and *halakhah*. The famous halakhic authority R. Hayyim Shabbetai (1556–1647), author of the *Torat ha-Hayyim* and *Teshuvot Rav Hayyim Shabbetai*, lived in the city during the first half of the 17th century; other important religious authorities included Aaron Cohen Perahiyah, the author of *Parah Matteh Aharon*, David *Conforte, author of *Kore ha-Dorot*, Eliya Judah Kovo, *av bet din* from 1670 and author of *Shenei Me'erot ha-Gedolim*, and the great talmudic scholar Aaron Hayyim ha-Kohen (1648–1698), author of the two-volume *Matteh Aharon*.

While in theory, the 1568 edict provided Salonikan Jewry protection from the whims of the local authorities, in practice local governors and government officials in the capital often ignored it. Dozens of firmans provide testimony as to how local authorities extorted additional sums from Salonikan Jewry for the poll tax. In 1636 the sultan ordered the execution of Rabbi Judah Covo when he underestimated the amount and quality of the cloth transmitted for tax payment from the Jews of Salonika to the authorities. Frequently, the Jews had to finance the sultan's wars by paying a special tax (*avarish*), and in 1646 a firman was issued for the rabbinical court judges of Salonika to issue a special tax to finance the war against Crete. The Jews, like other non-Muslims, were also frequently tormented by the Janissaries serving in the city.

The most influential event for the Jewish community in the 17th century was the appearance of the pseudo-messiah *Shabbetai Zevi. Expelled from *Izmir ca. 1651–54, he arrived in Salonika sometime afterward. In the beginning he was very well treated, and he preached in the Shalom synagogue; but later, when he married a Torah scroll, he was expelled after a decision made by the most important rabbis of the town. In 1666, after it was declared that he was the true messiah, he was arrested and given the choice by the sultan between death or conversion, he converted to Islam, and seven years after his death, in 1683, a group of believers – some 300 Jewish families – also converted to Islam. This sect was called the *Doenmeh (in Turkish "apostates") and their religious center was in Salonika, from which they spread to Constantinople and other places. *Shabbetai Zevi's passage from Salonika and the conversion in 1666 that ensued caused turmoil among the Jews in Salonika; the community consequently felt the need to unite. In 1680 the 30 congregations merged into one, with

a supreme council composed of three rabbis and seven dignitaries. The three rabbis were elected for life and could not be replaced unless all three died. The first triumvirate was composed of Moses b. Hayyim Shabbetai, Abraham di Botton, and Elijah Kovo. Another important step was the reorganization of all the rabbinical courts into three bodies along the following lines: matrimonial; rents, possessions (*Hazakot*); and ritual matters (*issur ve-hetter*). Each *bet din* was composed of three rabbis who were elected by the triumvirate; they were known for their justness, and many Muslims and Greeks preferred to try the cases they had with Jews in these courts instead of the Turkish ones.

18th–19th Centuries

As the Ottoman Empire declined, the community's financial situation in Salonika worsened, and French merchants began to gain control of business interests. In 1720–30, Portuguese Marranos, called "Francos," immigrated to Salonika. Most of them were well-educated, and among them were merchants and bankers, who had been established in Italy and in particular in Livorno.

They did not pay taxes to the sultan since they were considered as interpreters of the consuls. In the beginning they also refused to pay the relevant taxes to the Jewish community, but after a decision by the central committee of the community, they acceded to the community's demands. The Jewish population at that time was between 25,000 and 30,000. Nevertheless, both religious and secular studies declined, and only study of the *Kabbalah still flourished.

Leading rabbis of the 18th century were Asher Ben Emanuel Salem, author of *Responsa Asher* (1748), Moses ben Solomon Amararillo, who wrote the 3-vol. *Responsa Devar Moshe* (1742, 1743, 1750), and Joseph ben David, author of *Responsa Bet David* (1740).

End of 19th–Beginning of 20th Centuries

Toward the second half of the 19th century the Turkish governors of the city initiated a further expansion of the town. A new port was built in 1889, which helped to develop trade. European culture and technology also began to flow into Salonika, and signs of this "Westernization" became apparent among the Jewish inhabitants as well. In 1873 the *Alliance Israélite Universelle established a school, and additional schools along Western standards were also built. By the end of the 19th century, the Alliance educational system in Salonika and other locations had produced a new generation of European-educated entrepreneurs; prepared students to learn medicine, pharmacy, law, and education; created secular literacy; and enticed its graduates to pursue journalism, theatrical performance, and even the publication of novels, historical works, and short stories. Physicians who had studied in Europe helped to eliminate epidemics.

In 1864, Juda Nehama printed *El Lunar*, the first Judeo-Spanish newspaper in Salonika. Though it was short-lived, it was a new format of communication. He brought to the attention of the public items about science, translations from

noted rabbinic works, stories, historical pieces, folkloric stories, commercial issues, and the like.

The main Judeo-Spanish newspaper of Salonika, *La Epoca*, was founded in 1875 by Saadi Halevi Ashkenazi, who was an active publisher in Salonika and was a scion of a family that published many exegeses from Sephardi ḥakhamim in Salonika and elsewhere in the Ottoman Empire. This commercial and literary newspaper appeared twice a week until the summer of 1898, when it appeared also every Friday. The Halevis struggled financially to print the newspaper and keep it running, and it closed in 1912.

Parallel to Yiddish theater in the Ashkenazi world, the Sephardim of the Balkans had an active Judeo-Spanish theater. The Judeo-Spanish theater was the most active in Istanbul in the last quarter of the 19th century, but by the end of the 19th century it would be surpassed by the Salonikan stage. The first plays took place at the time of the opening of the local Alliance schools. The play *Saul* by Vittorio Alfieri was adapted into Judeo-Spanish by Joseph Errera, a local poet and train station manager who coordinated the dramatic productions of the organization. In 1882, *El Tiempo*, a translation of Racine's *Esther*, was also performed in Salonika, and in 1884, David Hassid adapted *L'Avare* of Molière into Judeo-Spanish for the local Salonikan stage. In the 20th century in Salonika, ideological movements like the Socialist Labor Federation, which essentially was a Jewish movement with 6,000 Sephardi Judeo-Spanish speaking members Jews, or Zionist movements and organizations like Betar, B'nai Mizrahi, Maccabi, Tiferet Israel, B'nai Zion, Cercle Max Nordau, and Po'alei Zion organized Judeo-Spanish theatrical productions. In 1914, the drama group of the Socialist Federation produced both Molière's *Garonudo* and the comedy *El hastron*. In 1919 the above group performed Tolstoy's *Resurreccion*.

Some of the Judeo-Spanish plays performed by the religious Westernization helped in the development of trade. In Istanbul and Izmir, the Jews could not compete against the Greek-Orthodox and Armenian merchants, as the latter were much more numerous and powerful, but in Salonika, where the Jews were a majority, they attained great wealth, developed the city industrially, and controlled the port, the commerce, banking, the tobacco trade, and the artisan professions. As a result of their European education, Salonikan Jews represented big European firms as maritime, commercial, insurance, and tobacco agents. As Salonika became connected to Mitrovitsa (1871), Belgrade (1880), Vienna (1888), Monastir (1893), and Istanbul (1895) by rail, exports from the city increased greatly, but the local Jews also developed industrial infrastructures, with small factories supplying Macedonia and Ottoman markets with flannel, knitted goods, and wool and cotton products. Nevertheless, the export of cotton, hides, silkworms, and wool continued to represent an important part of its activity. The volume of the Salonikan port rose from one to two million tons between the years 1880 and 1912.

As a result of this Westernization, liberalism became paramount among the Jews of Salonika. Nevertheless, this did not

undermine the traditional ways of the community, and many new yeshivot were established. The *Hevrat Kadimah* – for the spreading of the Hebrew language – was founded in 1899, and the well-known teacher Isaac *Epstein was brought to Salonika to teach Hebrew. In 1887 the rabbinical triumvirate was dismissed, and Jacob Kovo was appointed to the post of **hakham bashi* (chief rabbi). In 1900 there were approximately 80,000 Jews in Salonika (out of a total population of 173,000). In 1908, when the Young Turks rose against the Ottoman sultan Abdul Hamid II, Jews were among their numbers. One of the first actions of the Young Turks when they came to power was the recruiting of all non-Muslims into the Turkish army. As a result, many young Jews left Salonika and emigrated to the U.S. in order to avoid serving in the Turkish army.

The Jews and the Doenmeh in Salonika, in particular, and Jews in other parts of the Ottoman Empire were active in the Young Turk Movement, the Committee for Union and Progress. The religious minorities led by Muslim reformists united, and were optimistic that they could induce change and play a more integral part in the political life of the Ottoman Empire. Some Salonikan Jews like Emmanuel Carasso, Moise Cohen (who was born in Serres and later changed his name to Tekinalp to assert his patriotism to Turkey), the attorney Emmanuel Salem, Nissim Mazliah (initially from Izmir), and Sam Levy were active and were somewhat prominent in CUP, but their influence has been questioned by scholars. During the demonstration in Salonika at Freedom Square ushering in the Young Turk Revolution and declaring a constitution, Carasso was one of the four speakers. In 1908 Carasso was one of four Ottoman Jews elected to the Ottoman Parliament. He refused the appointment of minister of public works in 1910, but was elected to the Senate in 1912 (along with two other Jews).

Since the Jews believed that the new government was more liberal and tolerant than the former one, they openly organized socialist and syndicalist movements. Avraham Benaroya of Plovdiv, an active Bulgarian socialist and former student of Bochor Azaria, moved to Salonika in 1907 to try the challenge of organizing a socialist movement. The Socialist Labor Federation of Salonika became primarily a Jewish socialist movement of some 6,000 workers. Benaroya was ultimately exiled and imprisoned by both the Young Turk government and the Greek authorities after Salonika became part of Greece in 1912.

At the same time, the first Zionist organizations, *Agudath Bnei Zion* and *Maccabee*, appeared in Salonika. By the eve of World War II there were more than 20 Zionist organizations. The Young Turk revolution marked a new “golden” era for the Jews of Salonika, and they could be found in every profession: merchants, tobacco workers, lawyers, physicians, teachers, while the Jewish stevedores of Salonika were famous. On Sabbaths the town and the port came to a standstill since the Jews did not work.

When the Greek army entered the town in 1912, King George declared that Jews and all other minorities were to have the same rights as the Greek population. After the Balkan

Wars (1912–13), Salonika could no longer be used as the port for the Balkan states. Nevertheless, trade continued to flourish during World War I since Salonika became a center for Allied soldiers. In 1917 a great fire destroyed most of the town, leaving some 55,000 Jews homeless. The Greek government, which followed a policy of Hellenizing the town, was ready to compensate the Jews whose houses had been destroyed, but it refused to let the Jews return to certain parts of the town, causing many of them to leave the country and emigrate to the U.S., France, Italy, and Alexandria. In 1923, a separate electoral college was set up for the Jews of Salonika (as well as for the Muslims in Thrace). While this enabled several Jews to be elected to parliament, they could not participate in national elections for the prime minister. This discriminatory system, which the Salonikan Jews unsuccessfully tried to fight internationally, continued until after the 1933 elections. In 1924 a law (no. 236) was enacted which forced all the inhabitants of Salonika to refrain from working on Sundays, thus causing another wave of emigration. Some went to Palestine, while most immigrated to Paris, where they founded an important community. In the 1931 Campbell riots, which accompanied the elections and were antisemitic in tone, an entire Jewish neighborhood was burned to the ground by hooligans of the EEE (Greek National Front) student movement and Asia Minor refugees, and most of the Jews who lived in the Campbell neighborhood emigrated afterward to Palestine. In the 1930s, 15,000–18,000 Salonikan Jews immigrated to Erez Israel, and some 15,000 emigrated to France, mostly to Paris, but also to Marseilles and Lyons. In 1935 there were nearly 60,000 Jews in Salonika, and in spite of the drop in Jewish population from the turn of the century and all the riots and fires, the Jews continued to maintain their status in the economic activity of the town. The coup d'état of Metaxas (1936) brought a change for the better in the lives of the Jews of Salonika.

[Jacov Ben-Mayor / Yitzchak Kerem (2nd ed.)]

Holocaust Period

The Salonikan Jewish community, which was the most prolific Sephardi cultural and religious center in the world and which dominated the city as a plurality or majority throughout most of 450 years since the Spanish expulsion, suffered greatly in the Holocaust. Its pre-World War II population of 56,000 was almost totally annihilated in the Holocaust – 98 percent of its Jewish community, 54,000 Sephardi Jews, died in Auschwitz-Birkenau, or during the long, exhausting Death March from January to May 1945. Salonika, the heart of the Sephardi world, was thus destroyed, and everyday Sephardi life in a natural setting would never return. By the time of the Holocaust, whether in Turkey, Jerusalem, the Americas, or elsewhere, Sephardi communities had assimilated into local cultures to such an extent that Judeo-Spanish Sephardi culture had nearly vanished as a vital and dominant force. Only in Salonika, where the community had an active Judeo-Spanish theater, a thriving Judeo-Spanish press, a vast secular and religious literature, and a wide array of Sephardi musical performers, ensembles,

and choirs, was the Sephardi Judeo-Spanish culture an all-inclusive and self-perpetuating phenomenon.

World War II began for Greece and Greek Jewry on October 28, 1940, when Greek dictator Metaxas refused to surrender to Mussolini, and Italy attacked Greece from Albania. Greece fought valiantly to push back the Italians but finally capitulated on April 26, 1941. The Jews had a very active role in fighting for the Greek army, with 12,898 Jews conscripted for this special war effort. Four-thousand Jews fought on the front line in the Albanian campaign and in Macedonia, and 513 fought against the Germans. A total of 613 Jews were killed on both fronts, and at least 174 were from Salonika. Other Jewish casualties included 3,743 wounded, 1,412 of them severely. The Greek Macedonian Brigade 50 that fought in Albania was nicknamed the "Cohen Battalion," as it included many Jews from Salonika and other parts of Macedonia.

At first the German rule in Salonika was relatively quiet. The Jewish newspapers were closed, including *El Mesagero*, the last Judeo-Spanish newspaper to be published in traditional script. New pro-Nazi Greek newspapers, *Nea Evropi* and *Apoyevmatini*, appeared and spread vehement antisemitic sentiment. Jews were forced to guard train lines against sabotage by the resistance, and Jews had to give rooms in their homes to German soldiers. There was little terror against the Jews and very few restrictions. As the Germans neglected the Greek economy, there was mass starvation in 1941–42, with as many as 60 Jews dying each day in Salonika. The Rosenberg Commission entered Salonika in mid-June 1941 and confiscated massive amounts of Jewish books, documents, Torah scrolls, and religious artifacts, taking them back to the Nazi Institute for Jewish Research in Frankfurt. In the early 1990s, some of the communal documents from Salonika and Athens appeared as part of confiscated German documents in the Osobyi Archives in Moscow.

On July 11, 1942, the Germans assembled 9,000 Jewish males between the ages of 18 and 45 for forced labor. Waiting on the Sabbath in their holiday clothes, they were compelled to do humiliating calisthenics and many were beaten. Some 4,000 Jews were recruited for grueling road work from August to December 1942. The Jews were released from forced labor after paying an exorbitant ransom, but the Germans ordered the destruction of the 500-year-old Sephardi cemetery with its half-million graves.

From the beginning of German occupation in Salonika on April 9, 1941, until the end of the deportations of Salonikan Jewry to Birkenau from March 15, 1943, to August 1943, as many as 3,000–5,000 Jews fled Salonika, mostly by train, to the temporarily "safe" Italian zone below the Platona line (below Katerini and to the north of Larisa in the Thessaly region) and sought refuge in Athens. While most Salonikan Jewish families hesitated to leave their familiar surroundings and appear not to have known what was happening under German occupation in northern Europe, there were many Jews who were politically astute and succeeded in finding a way to flee.

At least 800 Salonikan Jews went to the mountains of Macedonia in early 1943 to join the ELAS Communist-leaning resistance movement. Some were organized Communists, but most just went to save themselves and became motivated to fight against the Germans. More would have gone if the large nuclear traditional Salonikan Sephardi families would have agreed to split up, and others were hesitant due to the rugged life in the mountains or due to the association of ELAS with the militant Communist movement. While ELAS opened its ranks to Jewish men and women as fighting soldiers or in the services, and harbored entire Jewish families in its village and mountain strongholds, the rightist royalist movement generally did not admit Jews, and there were only four known cases of Jews serving in that movement, which was most active in western Greece in Epirus. The Italian diplomats were lenient in consenting to protect Italian Jewish nationals, those of Italian descent, or others whom they could save by registering their applications to begin the citizenship process. They actively saved some 800 Jews in such a manner and transported them by car or Italian military train to the free Italian zone. They arrived in Athens and remained safe there until the Germans replaced Italian rule in September 1943. The local Spanish diplomats with their status of a neutral country tried to delay deportation for their nationals, but on August 2, 1943, a group of 367 Jews was deported to Bergen-Belsen. They stayed there under preferential conditions until they were transferred in February 1944 to Barcelona, and then on to Morocco and to Erez Israel. Some 144 Jewish Spanish nationals had escaped to Athens.

At the end of January 1943, the Nazis created three distinct neighborhood ghettos where there were large concentrations of Jews: Kalamaria (encompassing almost half the city to the east and where most of the Jews lived), Singrou (west of the White Tower) in the central area of the city, and Vardar/Agia Paraskevi (near the old train station in the western part of the city). Jews living outside these neighborhood ghettos were transferred in, and several families had to occupy a given residence. From these ghettos, Jews were transferred to the Baron Hirsch transit camp, where they arrived at least a day before deportation and often several weeks before, and waited for the transport which took them mainly to Birkenau (Auschwitz II). The crowded and dark cattle cars departing every few days took on anywhere from 1,000 to 4,000 Jews at a time, but most of the trains carried 2,200 to 2,800 Jews. The Salonikan Jewish population was so large that the deportations took several months. One deportation was sent to Treblinka, and there might have been one to Sobibor in view of the presence of a group of Salonikan Jews there.

At least 37,000 Salonikan Jews were gassed upon their arrival in Auschwitz-Birkenau, but the figure may be several thousand higher. There was a large Salonikan contingent of some 2,000 men in Buna (Auschwitz III) who worked in the I.G. Farben factory laying cables and digging. The Salonikan middleweight boxing champion Jacko *Razon organized boxing matches in the camp for Sunday's half-rest day entertain-

ment, and as a boxer worked in the kitchen and daily smuggled out a 25-liter soup barrel, which served as an extra ration at night for fellow Salonikans and other Jewish inmates. In Auschwitz, the Salonikan Jews were a main part of the work force throughout 1943 and 1944 since they numbered some 11,000. Jacko *Maestro, a crafty young Salonikan Sephardi youth who spoke German, became *Arbeitsdienst* coordinator in Auschwitz, assigning the daily work schedule to some 16,000 camp inmates and saving numerous lives by finding easier work places for the weak and the sick.

As a large part of the work force in Birkenau, the Salonikan Jews were also a large part of the **Sonderkommando*, the work group that labored by the gas chambers and pulled out the dead bodies and burned them in the crematorium. Since the prisoners in this *kommando* were witnesses to the German death process, they were executed after working three months in the gas chambers. When a general camp revolt was canceled, the Greek *Sonderkommando* Jews decided to revolt themselves, joined by the French and Hungarian Jews as well as by 19 Russian Jewish soldiers. Isaac Kabelli estimated that 135 Greek Jews participated in the revolt in Crematoria III and IV, which started at about 2:15–2:20 P.M. on October 7, 1944. After attacking two German guards in Crematorium IV and taking their weapons, a group of 25 Greek prisoners ran to Crematorium III. During the furious battle there, numerous German guards were killed when the Germans from outside shot at the prisoners inside. Historian Steven Bowman noted that some 20 guards were killed. Isaac Baruch, a Salonikan Jew of Skopjian familial descent, placed a bomb in the furnace of Crematorium III. The explosion demolished the building. Before the Germans killed all of the prisoners in the crematorium, the prisoners sang a tune from the Greek partisans and finally the Greek national anthem. The *Sonderkommando* in Crematorium II did not revolt, since at the beginning of the uprising the Germans acted quickly and locked up all of them in a crowded room for the day.

Auschwitz Salonikan Jewish prisoners, as foreigners who were unfamiliar with Polish Jewry and Warsaw, were sent to clean up the destroyed Warsaw Ghetto and establish a forced labor camp there. The Salonikan Jews were the first group sent from Auschwitz to Warsaw in August 1943 and physically built the camp. A second group of Salonikans was sent in October 1943. Together, the Salonikan Jews numbered over 1,000, and they were the largest group of any origin in the Genshovka camp. A Salonikan Jew, Shaul Senor, who had previously made aliyah to Erez Israel and returned to Salonika to organize further immigration under the pioneering Heḥalutz movement, tried to escape from Warsaw, was caught, and executed a month later on June 25, 1944, in front of all the Salonikan and other Jewish prisoners. His death inspired his Sephardi brethren not to give up hope and continue their struggle to survive despite the typhus, meager food, and terrible conditions. Most of the Salonikan and other Jewish prisoners were cleared out of Warsaw by foot at the end of July 1944 and headed toward Germany.

The Greek Jews – particularly the Salonikans but not exclusively – were victims of medical experiments in Auschwitz-Birkenau. Of 400 known experiments, the Greek Jews constituted about a quarter of the victims. Pregnant and single women had cancers implanted in their uterus, men had testicles removed, most twins did not survive, and others were frozen or victims of other heinous Nazi war crimes. The pregnant Salonikan Aliza Sarfati Baruch survived her two operations, was assisted in the infamous Auschwitz Bloc 10 by a Jewish doctor named Dr. Shmuel who later mysteriously disappeared, and miraculously bore children in Israel after the war; but most women, if they survived, never were able to conceive.

The deportations in Salonika, protested by Greek Archbishop Damaskinos and heads of national professional unions, signaled to most other Greek Jewish communities that the same terrible fate awaited them.

[Yitzchak Kerem (2nd ed.)]

Contemporary Period

After the war, survivors of the Salonikan community, together with remnants of smaller communities, concentrated in Salonika. As the Jews of the other communities spoke Greek, Ladino has all but disappeared as a spoken language in the community. The number of Jews fell from about 2,000 in 1946 to about 1,500 in 1971 as a result of emigration to Israel and, to a lesser degree, other countries. In 1971 there was an organized community, but only two synagogues were in use. Religious services took place on festivals, and there was a *minyán* for Sabbath services only. The children of the community studied in Greek schools, but provisions were made for Jewish education, which was handled mostly by teachers from Israel. In addition, there was a youth club and the *Maccabi organization. In the 1980s, the population of the community was around 800, but by the early 21st century it had grown to 1,100 due to increased family size. In the 1980s, the synagogue on Irakleon Street was renovated, and a Jewish study center and library was set up on an upper floor of the same office building. In the mid-1990s, Andreas Sephiha became community president and placed emphasis on cultural proliferation, Jewish religious continuity, and education. Rabbi Dayan was brought over from Israel and later replaced by the Athenian-born and Israeli-educated Mordechai Frizis. In 2005 the Jewish community had an active youth center and pedagogical resource staff and center, and employed two full-time rabbis. The elderly were cared for at the Modiano Old Age Home, and the community also ran a nursery school, elementary school with six grades, and a summer camp for all the Jewish youth of Greece. A new Jewish museum was founded at the turn of the century.

The major collections of archival material on the community of Salonika are located in Jerusalem, at the Central Archives of the Jewish People and Ben-Zvi Institute, and in the Instituto Arias Montano in Madrid. Until Greece took over the city in 1912, the great majority of the community's docu-

ments were written in Ladino in Oriental script; later, Greek became the language of use.

The Jews of Salonika constituted an important source of *aliyah*, particularly after World War I. They were active among the Sephardi community in Palestine, and played an important role in the construction of Tel Aviv. Among the notable families from Salonika were the Florentin, *Recanati, Molcho, and Uzziel families. Leon Recanati founded the Israel Discount Bank, which later developed into one of the most important banks in the country, and the Florentin quarter of Tel Aviv is a manifestation of the initiative of immigrants from Salonika.

Salonikan Jews made a unique contribution to the penetration of Jews into seamanship in Erez Israel. As early as 1914, Izhak *Ben-Zvi was sent to Salonika to encourage Jewish seamen to settle in Erez Israel, but the outbreak of World War I destroyed the plan. In 1924 a group of more than 40 fishermen immigrated to Palestine. They initially settled in Acre, but the group dispersed after the Arab riots in 1929, principally in Haifa and Tel Aviv. As a result of Abba *Khoushi's visit to Salonika in 1933, 300 seamen, stevedores, and porters and their families immigrated to Palestine and settled in Haifa. It was thanks to them that Jewish labor penetrated into the port of Haifa. Over the years other families from Salonika joined them. In 1936 some of them moved to Tel Aviv and laid the foundations of the port there. A moshav ovedim of Greek settlers, some of them from Salonika, was established at Zur Moshe in the Sharon Plain in 1937.

Hebrew Printing

Early in the 16th century (c. 1512), Don Judah *Gedaliah and his son (Moses) and daughter arrived in Salonika after fleeing from Portugal. Gedaliah had previously managed the printing press of Eliezer Toledano in *Lisbon; he brought at least some of the latter's typographical material with him, and later he had some new types cut. Many of his productions, in the main liturgical works, have been lost, but some important items have survived: a Pentateuch with Onkelos and Rashi (1513); the first edition of Jacob ibn Ḥabib's *Ein Ya'akov* (1515–23); parts of Hagiographa with Rashi (1515); the tractate *Yoma*; Tur, *Orah Ḥayyim*; a Pentateuch with Rashi's and Nahmanides' commentaries (1520); *Yalkut Shimoni* on Prophets and Hagiographa (1521); and Solomon *Molcho's sermons (1529). In 1525, Moses *Soncino left Rimini (Italy) for Salonika, and in 1526 he issued the *Yalkut* on the Pentateuch and a *maḥzor* of the Catalanian rite in 1527. His kinsmen Gershon and Eliezer arrived – also from Rimini – in 1526 and printed David Kimhi's *Sefer ha-Shorashim*, together with Abraham Bendersi's dictionary of biblical synonyms, *Hotam Tokhnit* (1527), and a *maḥzor* of the Aragonian rite (1529), before moving on to Constantinople.

The Italian Soncino printing house of Rabbi Gershon Soncino established a branch in Salonika in 1527 and later in Istanbul in 1530. The famous dictionary *Sefer Shoreshim*

of Rabbi David Kimḥi was published in Salonika, but due to epidemics and fires, the printing house closed.

Beginning in 1543 with Spanish refugees Solomon and Joseph *Jabez, a great variety of Hebrew books were printed in Salonika, among them a *maḥzor* of the Ashkenazi rite (1551–55). For a time, the enterprise had to be transferred to *Adrianople (1555). Eventually Solomon Jabez went to Constantinople, whereas Joseph returned to Salonika in about 1560 and until about 1572 printed many works, notably a series of Talmud tractates based on the Bomberg and Giustiniani editions; works by Moses *Almosnino; and translations into Judeo-Spanish and Provencal of parts of the Bible and prayer books. When he left, his typographical material was bought by David b. Abraham Azubib, who was active in printing from 1578 to 1588.

Shabbethai Mattathias *Basevi (d. 1601) acquired the Jabez press, and he and his son issued various works until 1605, including a *Midrash Rabbah* (1594), an *Ein Ya'akov*, and a *Shulḥan Arukh Oraḥ Ḥayyim* (1595). The Salonika *talmud torah* administration printed a *maḥzor* of the Catalanian rite in 1695, and some Talmud tractates in 1707. This press passed through various hands in the 18th century when many works were printed. During the time of Sultan Mustafa, the printing house of Raphael Yehuda Kalay and Mordecai Naḥman printed Rabbi David Pardo's *Le-Menaze'ah le-David* and *Minḥah le-David*, as well as Rabbi Eliyahu Mizraḥi and Rabbi Eliyahu Ben Ḥayyim's *Mayim Amukim* (1805), and more. Between 1814 and 1941, eight more Hebrew printers worked in Salonika, among them the presses of Isaac Jahon; the Gemilut Hasadim Society, which was founded about 1870 and printed selections from the Zohar; and the Etz ha-Ḥayyim Society, which was founded about 1875 and printed *maḥzorim*.

Bezalel Halevi Ashkenazi came from Amsterdam to Salonika (ca. 1738) and continued his family's tradition of printing. In his printing press, he published many books of responsa, derushim, and exegeses in Hebrew and Ladino. His descendants continued his printing activities. Saadi Halevi Ashkenazi (1820–1903) published the Judeo-Spanish newspaper *La Epoca* (1876–1912) in Judeo-Spanish Rashi script, but also coplas (a type of Judeo-Spanish balladry for holidays), and other ballads and *piyyutim* in Judeo-Spanish and Hebrew. The printing house existed until it was destroyed in the 1917 fire.

Leah Bornstein Makovetski noted the existence of 31 works of rabbinic *derashot* published in Salonika between 1750 and 1900. The last known publication of Hebrew rabbinic exegesis in Salonika was Rabbi Jacob Hanania Kovo's *Kokhav me-Ya'akov* in 1935.

SALONS. For almost two centuries, salons hosted by Jewish women were important sites for cultural performances and discussion of music, art, literature, philosophy, and politics. Until recently, such social gatherings had seemed an isolated moment in Jewish history: Emerging in Berlin in the last decades of the 18th century, they had reached their peak around 1800. The Prussian capital saw at least 17 Jewish homes that consistently welcomed guests to open houses, usually for tea. After the Prussian defeat at the hands of Napoleon in 1806, the importance of these informal institutions was believed to have diminished. But in fact this was not the end of the story. This model of artistic and intellectual conviviality, persistently arising at a site in urban society connected with the feminine and the Semitic and bringing together individuals of diverse

ethnic, religious, and social backgrounds, reappeared after 1815 and continued to be influential throughout the 1820s. Its reverberations survived into the late 19th and early 20th centuries with the emergence of comparable Jewish salons in Paris, London, and Rome. Versions of the salons survived World War II in cities as far away from Berlin as New York City and Los Angeles.

A 2005 exhibition at the Jewish Museum in New York City, entitled “Jewish Women and their Salons: The Power of Conversation,” represented the entire history of this social and communicative experiment. To the well-known names of early salonnières such as Rahel Levin *Varnhagen and Henriette *Herz of Berlin, Fanny von Arnstein and Caecilie von Eskeles of Vienna, historians now add Geneviève Straus, a friend of Marcel Proust in Paris; Ada Levenson, Oscar Wilde’s friend in London; Berta Zuckerkandel of Vienna along with her sister Sophie Clemenceau in Paris; Margherita Sarfatti in Rome; and the American writer Gertrude *Stein who resided most of the time in Paris. In New York City, Florine Stettheimer opened her house to regular cultural gatherings, while in Los Angeles Salka Viertel provided her co-emigrants from Germany and Austria with an environment in which to discuss ideas, creative achievements, and the events of the day. The intellectual, social, artistic, as well as political achievements of these women cannot be overestimated.

[Barbara Hahn (2nd ed.)]

SALONTA (Hung. **Nagyszalonta**), town in W. Romania: within Hungary until the end of World War I and between 1940 and 1944. The first Jews settled there around 1840, but it was only after the abolition of residence restrictions in 1848 that the Jewish population increased. An organized community was established in 1850, when the first synagogue was also erected. A *hevra kaddisha* was established in 1859. A large and magnificent synagogue (still standing) was opened in 1886. The community school functioned between 1869 and 1936; until the end of World War I, the language of instruction was Hungarian. The cultural character and the everyday language of the local Jews was mostly Hungarian, with very little Yiddish being spoken. From 1882 the rabbis of the Great Synagogue preached exclusively in this language, even after Salonta passed to Romania. After the schism within Hungarian Jewry of 1868–69 (see *Hungary), the community joined the Neologist organization. In 1927 a few members founded an Orthodox community. Prominent among the rabbis of Salonta was Abraham Isaac Nébel (1887–1967; d. in Jerusalem), who was appointed rabbi of the town in 1925. The small Orthodox community was headed by Nathan Brisk, who perished in the

Holocaust From 1885 the community also served as the official center for the Jews living in 15 villages in the vicinity. The Jewish-Zionist cultural activity initiated by R. Nébel caused some agitation in this assimilated community; but though it gave rise to ramified Zionist activities, it did not diminish the Jews' Hungarian acculturation and sense of belonging.

The Jewish population numbered 534 (42% of the total) in 1891; 843 in 1910; 740 (4.8%) in 1930; 593 (3.7%) in 1941.

The Jews of Salonta were involved in the processing of the agricultural produce of the entire region, which was then sold throughout the country and even exported. Many Jews were landlords and also involved in agricultural production.

After 1919 the majority of the Jewish population continued to support the Hungarians, even in the face of the conflict between the former rulers, the Hungarians, and the new ones, the Romanians.

Holocaust and Contemporary Periods

Under Hungarian rule, Jewish men were drafted into labor battalions in 1942–43, most of them perishing. In the summer of 1944, the Jews in Salonta were deported via Oradea to *Auschwitz. After the war the survivors returned to the town and reorganized the community. They numbered 190 in 1947. Monuments in memory of those who had perished were erected opposite the synagogue and in the cemetery. The number of Jews in Salonta dwindled to ten families in 1971, as a result of emigration to Israel and other countries, and was further reduced by the turn of the century.

[Yehouda Marton / Paul Schweiger (2nd ed.)]

SALSBERG, JOSEPH B. (1903–1998), Canadian labor leader, politician, journalist. Born in Lagev, Poland, Salsberg was 11 years old when he arrived in Toronto with his parents in 1913. He had only a few years of elementary education before he left school to help support his family. As a youth, he was associated with the Po'alei Zion movement, but, angered at the working conditions in the clothing manufacturing industry in Toronto, he joined the Communist Party in 1926 and was active in the trade union movement as Canadian vice president of the Hatters' International Union. During the 1930s he was a labor organizer for the Communist-affiliated Workers' Unity League. A skilled orator in both English and Yiddish, in 1938 he was elected alderman in a heavily Jewish inner-city Toronto neighborhood and in 1943 to the Ontario legislature for the Communist Labor Progressive Party. Salsberg was outspoken in his support for human rights and helped pass breakthrough anti-discrimination legislation. He was defeated by Conservative Alan *Grossman in the 1955 elections.

In 1956 Salsberg visited the Soviet Union to undertake an investigation of the condition of the Jews in the U.S.S.R. He interviewed major Soviet leaders, including Nikita Khrushchev, and became convinced that there was little hope of recognition of the cultural rights of Soviet Jewry, and that antisemitic views were deeply entrenched through all layers of Soviet leadership.

On his return to Canada, he wrote a long series of articles on his Russian visit in the left-wing Canadian Jewish Weekly, *Vokhenblat*. In 1957 Salsberg left the Communist Party and the United Jewish People's Order, which was Communist-inspired, taking a block of former Jewish Communist supporters. He went on to help to set up the left-leaning New Fraternal Jewish Association. A reborn Zionist, Salsberg was active on behalf of Israel and in fostering the Yiddish language. For many years Salsberg wrote a popular column for the weekly *Canadian Jewish News*.

[Ben Kayfetz (2nd ed.)]

SALT. Considered the most common and essential of all condiments, salt plays an essential role in Jewish life, ritual, and symbolism. It was plentiful in Erez Israel, with inexhaustible quantities being found in the area of the Dead Sea. Its first mention in the Bible is in reference to Lot's wife turning into a pillar of salt (Gen. 19: 26).

Salt was an essential requisite for all sacrifices. The possibility that the verse "with all thy sacrifices shalt thou offer salt" (Lev. 2:13) may, in fact, refer only to the meal-offering mentioned in the context, is denied by the Talmud (Men. 20a) which lays it down that the statement applies to all sacrifices. The significance of this injunction seems evident from the prohibition, in the same context, of honey and leaven to be used in sacrifices. Honey and leaven symbolize fermentation and subsequent decay and decomposition; salt is a preservative. The idea of permanence is the basis of the "covenant of salt" mentioned on various occasions in the Bible. The rights of the priests to their share of the offerings is "a due for ever, an everlasting covenant of salt" (Num. 18:19), and Abijah, king of Judah, assures Jeroboam, who had seceded from the House of David, that God has given the kingdom to the House of David by "a covenant of salt" (11 Chron. 13: 5). It is in this sense that the passage in Ezra (4:14), in which the enemies of the returned exiles protest their loyalty to the king of Persia "because we eat of the salt of the palace" is to be understood as an expression of abiding loyalty to the palace, and not as the Authorized Version's "maintenance of the palace." The extent to which salt was used in the sacrifices may be seen in the statement in Josephus (Ant. 12: 140) that Antiochus the Great made a gift of 375 medimni (bushels) of salt to the Jews for the Temple service, and there was a special Salt Chamber in the Temple (Mid. 5:3).

The cleansing and hygienic power of salt is reflected in Elisha's act of purifying the bad waters of Jericho by casting salt into the springs (11 Kings 2:20, 21), and in the custom of rubbing newly born infants with salt (Ezek. 16:4). On the other hand, it was known that salinity in soil caused aridity (Deut. 29:22; Job 39:6), and when Abimelech captured and destroyed Shechem, he "sowed it with salt" as a sign that it should not be rebuilt (Judg. 9:45).

The importance of salt as a condiment is also stressed in the Bible. Job asks rhetorically whether "that which hath no

savor be eaten without salt" (6:6), and Ben Sira includes salt among the nine essentials of life (Ecclus. 39:26). Salt was an essential element of the Jewish table, and it became customary to put salt on the bread over which grace before meals was recited. A Yiddish proverb has it that "no Jewish table should be without salt" which is in accordance with the homily that makes one's table "an altar before the Lord" (cf. Avot 3:4). The ability of salt to absorb blood (Hul. 113a) is the basis of the important laws of kashering meat so that all blood be removed (see *Dietary Laws). Salt of Sodom (*Melaḥ Sedomit*) was particularly potent, having an admixture probably of the acrid potassium chloride of the Dead Sea. Its presence in common salt ("one grain in a *kor* of salt"), and the harmful effect it might have on the eyes, caused the custom of *mayim aḥaronim*, the washing of one's hands after a meal, to be instituted, in addition to the statutory washing before meals (Hul. 105b). There is a difference of opinion as to whether this washing of the hands is obligatory or merely advisable. *Tosafot* (loc. cit.) lays it down that, since salt of Sodom does not exist in France, the custom of *mayim aḥaronim* did not obtain there. Despite this ruling, the retention of the custom is widespread today. Salt of Sodom was also an ingredient of the incense used in the Temple during the period of the Second Temple (Ker. 6a).

In modern Israel the custom has developed for the mayor of Jerusalem or the elders of the city to greet distinguished visitors with an offering of bread and salt at the entrance of the city, and not with bread and wine as Melchizedek, king of Salem (Jerusalem), greeted Abraham (Gen. 14:18). There is no rabbinic authority for this practice. Philo (Jos. 35: 210), however, states that Joseph invited his brethren to a meal of "bread and salt" (cf. Gen. 43: 16, 31), and among the ancient Arabs it was the custom to seal a covenant with bread and salt.

[Louis Isaac Rabinowitz]

SALTEN, FELIX (originally **Siegmund Salzmänn**; 1869–1945), Austrian novelist, playwright, and critic, creator of "Bambi." Born in Budapest, Salten studied in Vienna, where he became a writer of feuilletons for the *Neue Freie Presse*, continuing the high standard of his friend and predecessor, Theodor *Herzl. As a dramatic critic, he made and unmade literary and stage reputations and his best essays on the theater were collected in *Schauen und Spielen* (1921). However, his own plays, from the anti-militarist *Der Gemeine* (1899) and the comedy *Das staerkere Band* (1912), to *Louise von Koburg* (1932), had no lasting success. Salten's novels were notable for their humor, satire, and eroticism. He also wrote novellas and essays such as *Wiener Adel* (1905), *Das Burgtheater* (1922), and *Geister der Zeit* (1924). His international fame rests on his best-known animal story, *Bambi* (1923), about a deer's life in the forest. This became a juvenile classic and was filmed by Walt Disney. Salten's Jewish interests came to the fore in his novel *Simson* (1928), and in essays about his visit to Palestine, *Neue Menschen auf alter Erde* (1925). In 1938 Salten left

Austria for Hollywood but after World War II settled in Zurich, Switzerland.

[Sol Liptzin]

SALT TRADE AND INDUSTRY. Jews took a considerable part, from at least the tenth century, in the salt trade and its extraction – which were generally state monopolies – in a number of European countries, principally as lessees of the mines. In the main areas of salt extraction on the coast of the Bay of Biscay, for example, as well as in Germany, Poland, and Spain, Jews played a prominent role. Some surmise that in Muslim countries, too, Jews took part in the production and distribution of this commodity. The leasing of a salt mine required technical knowledge as well as financial resources, and was a large-scale enterprise undertaken mostly by wealthy and influential Jews as part of their overall activity. In some places, especially Poland, Jewish lessees were granted jurisdiction over their non-Jewish employees.

The Jewish traveler and geographer of the tenth century, *Ibrahim ibn Ya'qub, noted a salt mine operated by Jews near *Halle in Germany, and a little later in the same vicinity one Tidericus Judeus is mentioned as a partner in a salt-producing company. In 1132 Alfonso VII of Castile conferred the locality of Otos, next to the salt-rich Tagus, on the Ibn Zadok brothers (see Solomon *Ibn Zadok). In the 13th century a member of the same family, Isaac ibn Zadok, was known as Don Çag de la Maleha, evidently in reference to the large number of salt concessions he held. Also prominent among Jewish salt contractors in Spain was Judah de Cavalleria, bailiff of Saragossa, who was granted the total crown revenues from salt by the king of Aragon in 1264. In 1280 Abraham of Medinaceli obtained the rights to exploit the extensive salt deposits in the area of Velasco for four years.

In the 14th century the wealthy Cracow Jew, *Lewko, operated a large number of salt mines in *Wieliczka and Bochnia. The number of Jews in the Polish salt trade rose steeply during the 15th century, and a number of salt mines in *Drohobych, Jasienica, *Kolomyja, *Dolina, and *Zhidachow were leased to Jews by the king during this period. At the beginning of the 16th century the minor nobility of Poland embarked on a century-long struggle to wrest this rich source of revenue from the Jews. The nobles succeeded in intimidating the heads of the *Councils of the Lands, who in 1580 prohibited, *inter alia*, the leasing of any "zupa" (Pol. "salt mine") from the king or the nobility. The wars which afflicted Poland at the end of the 18th century and led to its partition put an end to the leasing of salt mines to Jews; salt trade by Jews on a lower level continued in the partitioned regions: 3,651 of the 5,450 salt traders in Polish towns in 1823 were Jews. In 1824 local authorities were prohibited from granting any new salt concessions to Jews until the number of Christian salt traders equaled that of the Jewish. The decree was repealed in 1830, though in Warsaw, for example, in 1840 there were 151 Jewish and only 64 Christian salt traders.

Dutch Jews in the 17th century played a prominent part in importing salt to their country. The firm of Curiel, for example, imported salt from Tripoli. Jeronimo Nuñez da Costa imported salt from Portugal where there was a big salt production at *Setubal, and exported it to *Gdansk. In Germany the *Court Jews, purveyors to kings and princes, played an important part in the leasing of salt mines—granted sometimes in lieu of paying their debts, or sometimes for services rendered – from the middle of the 17th and throughout the 18th centuries. Noah Samuel Isaac of Sulzbach, in the 17th century, having furnished the crown prince of Bavaria with one million talers for his wedding celebrations, received the revenues of three Bavarian salt mines. In the same century the Bavarian salt monopoly was leased to Nathan Moyses, the Schwabach Court Jew. He and his partners were known as the “salt Jews.” In 1698 the Court Jew of Palatinat, Lemle Moses Reinganum, advanced 120,000 florins for the exclusive rights to trade in salt. Samson *Wertheimer, who was responsible for the prosperity of the salt industry in Transylvania, also organized the salt trade monopoly in Poland, both advancing the necessary capital and supervising the transportation of salt from Wieliczka to Silesia and Hungary. At the end of the 18th and beginning of the 19th century, David Seligman signed a series of contracts for salt production in Bavaria. The part played by Jews in the German salt trade came to an end with the disappearance of the Court Jews from the stage of history.

[Jacob Kaplan]

SALTZMAN, HARRY (1915–1994), film producer. Harry Saltzman was born in Saint John, New Brunswick. While a child, he moved to the United States but is said by one biographer to have returned to Canada to serve in the Canadian military during World War II. He did not see overseas duty but was attached to a Canadian Air Force supply unit. In the late 1940s he was back in the United States, where he spent several years working in early American and British television. In the 1950s he emerged as one of the pioneers in London's New Wave/Angry Young Man movement. His first major film work was with Woodfall, the company that produced Saltzman's well-received and money-making social dramas *Look Back in Anger* (1959), *Saturday Night and Sunday Morning* (1960), and *The Entertainer* (1960). In the later 1950s he became interested in the James Bond series of novels, and paid writer Ian Fleming \$50,000 for a six-month option, but could not interest a major film company until he teamed up with Albert R. “Cubby” Broccoli. They founded EON (Everything Or Nothing) Films and Danjaq, S.A. (an amalgam of their wives' first names, Dana and Jacqueline). After agreeing to a

film deal with United Artists in 1961, they jointly produced the Bond thrillers *Dr. No* (1962), *From Russia with Love* (1963), *Goldfinger* (1964), *You Only Live Twice* (1967), *On Her Majesty's Secret Service* (1969), *Diamonds Are Forever* (1971), *Live and Let Die* (1973), and *The Man with the Golden Gun* (1974). Saltzman made other films on his own, including the Harry Palmer spy series (with Michael Caine as Harry Palmer, “the thinking man's James Bond”). In 1975 Saltzman sold his interest in Bond to United Artists. He produced one more film, *Nijinsky* (1980), before he suffered a stroke at the age of 65 and was forced to retire.

[Joel Greenberg (2nd ed.)]

SALTZMAN, MAURICE (1918–1990), U.S. apparel manufacturer, philanthropist. Saltzman was born in Cleveland, Ohio, one of 10 children. Having lost both parents by the time he was four, he was raised in a local orphanage, but went on to become a preeminent maker of moderate-price women's sportswear and a leading philanthropist in the Cleveland area. His company, Bobbie Brooks Inc., was one of the first U.S. clothing manufacturers to reach an annual volume of more than \$100 million. Following his graduation from Cleveland Heights High School at the age of 16, Saltzman went to work in the shipping room of Lampl Fashions, a local dress manufacturer. Five years later, in 1939, he and Max Reiter borrowed a couple of thousand dollars and launched Ritmore Manufacturing Co., producing dresses with a label that said Barbara Brooks. A year later, they changed the label to Bobbie Brooks and switched from dresses to junior sportswear, then a relatively new clothing category. In 1953, when Reiter left to go into his own business, Ritmore became Bobbie Brooks Inc., with Saltzman as chairman and chief executive officer. Its concept of coordinated sportswear – pieces that could be purchased separately and worn in various combinations – was highly successful, and the company went public in 1960. In the 1970s, Bobbie Brooks reached \$100 million in volume, a mark attained by few apparel firms up to that time, but over-expansion was a problem. By 1977, the company initiated a restructuring program to sell or liquidate its marginal or losing units. It filed for Chapter 11 bankruptcy in 1982 and emerged a year later. In 1986, the company began licensing the Bobbie Brooks label to other manufacturers. After suffering a stroke in 1987, Saltzman retired. He was one of Cleveland's leading philanthropists, donating millions to such institutions as the Jewish Community Federation, Mt. Sinai Medical Center, and Bellefaire/Jewish Children's Home, formerly the Jewish Orphans Home, where he spent 11 years as a child. The campus of that home is now called the Saltzman Campus for Child Care. Saltzman, who was vice president of Cleveland's Temple Emanu-El, also founded the Saltzman-Wuliger Senior Citizens Center in Tel Aviv and a library and museum at the Children's Village of Gan Yavneh in Israel. He received a Humanitarian Medal from B'nai B'rith and a National Human Relations Award from the National Conference of Christians and Jews.

[Mort Sheinman (2nd ed.)]

SALUS, HUGO (1866–1929), Prague poet who wrote in German. A native of Česká Lípa, Salus was a gynecologist by profession, practicing in Prague. Between 1898 and 1928 he published volumes of impressionistic verse and was considered by contemporary critics as the foremost German lyricist.

Outstanding among his works are *Ehefruehling* (1900), *Trostbuechlein fuer Kinderlose* (1909), and *Die Harfe Gottes* (1928). Salus was a militant protagonist of German liberalism and Jewish assimilation. His views on the Jewish question are quoted in J. Moses' *Die Loesung der Judenfrage* (1907). Jewish themes appear in his poems "Ahnenlied" (about his grandfather, a peddler), "Der hohe Rabbi Loew," "Ahasver," "Sulamith," "Simson," and "Talmudische Legende," and in a short story, *Die Beschau* (1920). Salus was influenced by Rainer Maria Rilke and Hugo von Hofmannsthal and, in his turn, influenced Max Brod.

SALUZZO, town in Piedmont, N.W. Italy. From 1142 to 1548 Saluzzo was the capital of the marquisate of the same name, long a bone of contention between France and the house of Savoy. Jews are first mentioned there in the 15th century; they ran 16 loan-banks in 1588, four at Saluzzo, two at Carmagnola, and the others in minor centers like Venesco, Verzuolo, and Piasco. In 1589 Duke Charles Emmanuel I of Savoy confirmed the existing privileges granted to the Jews by the French kings. In 1616 he gave the monopoly of Jewish loan-banking in Saluzzo to Leon Segre, who was murdered a few years later, though it is not known whether his death was caused by Christian reaction or the vengeance of his Jewish competitors. The Jews at Saluzzo formed a community in 1724 and were confined to a ghetto in September of the same year, in spite of attempts by the governor, Count Rovero, and the bishop, Giuseppe Morazzo to prevent this. The Jews in the ghetto, who were required to wear a yellow armband, were excluded from military service and the magistrature, funerary honors were denied them, and they were forbidden to keep Christian servants. Vittorio Amedeo of Sardinia forbade the Jews to pawn at the local loan-bank (*Monte di Pietà*). A new ghetto was established in a more salubrious area in 1795. In that year the community founded a *talmud torah* and mutual aid institution aimed at propagating the Torah and providing assistance; special care was devoted to Jewish education. There were three Jewish burial grounds; the synagogue, located in the ghetto courtyard, was rebuilt in 1832. When in 1848 the Jews in the independent kingdom of Sardinia were granted a statute by King Charles Albert, those of Saluzzo also became full citizens. The community set up three important communal institutions, the Gemilut Ḥasadim (1865), Ḥevrat Baḥurim, and Ḥevrat Nashim. By a royal decree of September 1931, the community of Saluzzo became part of the larger one

in *Turin. Some Jews from Saluzzo distinguished themselves as magistrates or politicians, such as Consul David Segre and Emanuel *Segre, an attorney general in Turin. Noteworthy rabbis included Marco Tedeschi, B. Artom, E.D. Bachi, and R. *Segre. About 100 Jews lived in the marquisate in the middle of the 16th century. There were nine in 1759, 90 in 1767, 210 in 1807, 320 in 1860, and 59 in 1931: 29 of these were victims of the Nazis. There were five Jews in Saluzzo in 1970.

[Alfredo Mordechai Rabello]

SALVADOR, Sephardi London family that settled in colonial America. JOSEPH (1716–1786) was a wealthy London merchant who immigrated to America. Known in the Sephardi community of London as Joseph Jessurun Rodrigues, he was born into a wealthy family which had gone to England from Holland in the early 17th century. In 1738 he married Rachel, daughter of Isaac Lopes, third Baron Suasso. Salvador enhanced his wealth between 1738 and 1749 in the Spanish and Portuguese trade, working with his father, Francis. He also served as a liaison for the English merchants of Cadiz. Later he imported and exported coral and gems from India. Salvador was the first Jew to be made a director of the Dutch East India Company. He also was a financial adviser to the British government. Active in synagogue and philanthropic affairs, Salvador served as *parnas* of the Bevis Marks Spanish and Portuguese congregation in London. In his later years, Salvador suffered financial setbacks, notably with the failure of the Dutch East India Company. He sold part of a 100,000-acre holding in South Carolina's backcountry to his nephew and son-in-law, Francis (see below), who set up an indigo plantation in an effort to recoup the family losses. Later, Salvador sold most of his land, and in 1784 emigrated to South Carolina, presumably to support himself from remaining lands. He died in Charleston. FRANCIS (1747–1776), Revolutionary patriot; first Jew to serve in a legislative body in America. Francis was born in London and traveled extensively. When the family wealth was lost, young Salvador purchased some 7,000 acres of South Carolina land from Joseph. He emigrated there in 1773, on the eve of the American Revolution. Salvador early identified himself with the Colonial cause, and Carolina leaders, impressed with his education and ability, took him into their councils, despite his being a Jew. He was made a delegate to the Revolutionary Provincial Congresses of South Carolina (1775–76), which rejected British rule and constituted itself as the legislature of the newly independent state of South Carolina. Salvador thus became the first Jew to represent the people in a legislative body in America, and possibly the first Jew in the modern world to hold such public office. When the British attacked Charleston in 1776, Salvador quickly joined the patriot forces defending the frontier where his plantation lay. His detachment was ambushed by Indians near Keowee, s.c., and Salvador was shot

and scalped. He was the first Jew to give his life in the struggle for American independence.

[Thomas J. Tobias]

SALVADOR, JOSEPH (1796–1873), French scholar. Salvador, the descendant of Spanish Jews, was born in Montpellier. He studied medicine there and graduated at the age of 20. His thesis dealt with the “Application of Physiology to Pathology” (1816). Shortly afterward he settled in Paris, where he became known mainly for his scholarly interest in the history of religions. To the study of religion in general and Jesus in particular, he applied the methods of historical criticism and might thus be considered in some respects in advance of German scholarship. His *Jésus-Christ et sa doctrine* (1838) was violently criticized by the *Gazette de France* when it was published, but was favorably reviewed by A.I.S. de *Sacy in the *Journal des Débats* of the same year and by J.E. *Renan in his *Études d'histoire religieuse* (1857). In *Paris, Rome, Jérusalem, ou la Question religieuse au 19^e Siècle* (1859), Salvador attempted to outline a universal creed, founded on a kind of reformed Judaism, or on the fusion of Judaism and Christianity into one single doctrine of progress. Salvador imagined that the center of the syncretistic religion of which he dreamed would be in Jerusalem, and he saw this ultimate faith as the lineal outgrowth of what he imagined classic Judaism to have been. This emphasis on Jerusalem has led a number of historians of Zionism, beginning with Nahum Sokolow, to regard Salvador as one of the precursors of Zionism, but the Jerusalem of his dreams was a “heavenly Jerusalem,” and the society of which it was to be the center was a universal culture and not that of a restored Jewish people. In his search for a general religious synthesis, Salvador might also have been motivated by the urge to solve his own spiritual dilemma, as his mother was a Catholic. Moreover, Salvador’s outlook comes close to that of the Saint-Simonians; Benjamin Olinde Rodrigues, one of Saint-Simon’s foremost Jewish disciples, seems to have been influenced by Salvador’s writings (see *Saint Simonism).

He also wrote *La Loi de Moïse, ou, Système religieux et politique des Hébreux* (1822); *De quelques faits relatifs au système historique des Évangiles* (1839); and *Histoire de la domination romaine en Judée et de la ruine de Jérusalem* (1846). The Catholic Church put two of Salvador’s works, *Jésus-Christ et sa doctrine* and *Paris, Rome, Jérusalem...*, on its official index of forbidden books.

SALVENDI, ADOLF (1837–1914), rabbi, early adherent of Hovevei Zion, and organizer of charitable projects. Born in

Waag-Neustadt, Slovakia, Salvendi officiated as a rabbi in Berent, Prussia (from 1864), and from 1865 acted as the district rabbi of more than 30 communities in Frankenthal, Bavaria, while living in Duerkheim. He continued in this capacity until 1910, when he went to live with his daughter in Karlsruhe. He resisted the influence of the extreme Reform movement (whose leaders persecuted him throughout his life) in the communities under his control and did much to further traditional religious education. At the same time Salvendi became well known as an organizer of relief projects for needy Jews. At first he collected money for the Jews of Russia, Persia, and other countries, and from 1877 for Erez Israel. He published the names of donors and the sums collected in special lists, adding information about events in Erez Israel, especially in the new settlements. Over 1,100 such lists were published over a period of 30 years, and this contributed substantially to the strengthening of Hībbat Zion in Western Europe, especially in Germany. The articles accompanying the lists were also of outstanding value as informative and propaganda material for Hībbat Zion. As a result of these activities, Salvendi was made an honorary member of the central committee of Hovevei Zion at the *Kattowitz Conference.

[Getzel Kressel]

SALZ, ABRAHAM ADOLPH (1864–1941), Zionist leader in Galicia. Born in Tarnow, Salz studied in Vienna and in 1884 joined the Zionist student society *Kadimah there. After he completed his studies, he returned to Tarnow (1887) and began diversified Zionist activities. He succeeded in acquiring the support of the ḥasidic *rebbe* of Czortkow for the Jewish national idea and plans of settlement in Erez Israel. At the first conference of the Zionist societies in Galicia, which took place in Lemberg in 1893, he was elected president of the executive committee and was among the founders of the Polish-Zionist newspaper *Przyszłość* (“The Future”). Salz successfully combated assimilationist trends among Polish Jews. He also was among the founders of the Ahavat Zion society for the establishment of a settlement of Galician Jews in Erez Israel. Immediately after the appearance of Theodor *Herzl, he joined the Zionist movement, participated in the First Zionist Congress (1897), and was elected its vice president. He participated in all Zionist Congresses until the 11th in 1913. After World War 1 he concentrated his Zionist activities in Tarnow, where he published his memoirs on his activities from 1884 to 1914 in the Jubilee Book in honor of 50 years of the Zionist movement in Tarnow (Polish, 1934).

[Max Wurmland]

SALZBURG, city and province in W. Austria, formerly archbishopric and duchy. The first mention of Jews in the archbishopric occurred as early as 803 in a letter from Archbishop

Arno (798–821) asking for the settlement of a Jewish physician in his district. A customs list from 905 contains references to Jewish salt merchants, and the term “Judendorf” occurs in sources dating from 1074, 1107, and 1197. The first clear reference to Jewish settlement occurred, however, during the tenure of Archbishop Conrad I (1106–47), who utilized Jews as financial advisers. A Judenstrasse in the market town of Admont is mentioned in a source dating from 1124. The oldest gravestone in the archbishopric, dating from 1240, was discovered in Friesach; 13th-century settlements were noted in Muehldorf, Hallein, and Pettau (Ptuj). The first references to Jews in the city of Salzburg itself dates from 1282. In 1267 the district council prescribed for Jewish males the wearing of a horn-shaped hat (*cornutus pileus*), and forbade their visiting Christian baths and employing Christian domestics. Jews functioned as *moneylenders in the city of Salzburg, including among their customers members of the city administration; in 1285 a Jewish banker, Isaac, is noted among those who lent money to the treasury of the archbishop. Sources early in the 14th century indicate widespread Jewish commercial ventures with the investment of considerable capital. In the city a Jewish gate, Judenstrasse, and synagogue date from the period.

During the course of the *Black Death persecutions of 1349, some 1,200 Jews in the archbishopric lost their lives, despite two unsuccessful efforts on the part of Pope *Clement IV to intervene. Although the city councils prohibited the return of converted Jews to the faith they abandoned during the persecutions, Jews are found again in the archbishopric in 1352. Their return was facilitated by the liberality of Archbishop Ortolph (1344–65). Jews began to appear in large numbers in the city of Salzburg only in the 1370s, partly as a result of the bold economic policies of Archbishop Pilgrim II (1365–96). In 1377 a new place for worship was leased to the community to replace the one formerly used (in 1400 it was bought by three Jewish representatives of the community), and in the same year a cemetery was consecrated. Beginning in 1382 the archbishop began to call Jews to military service. The archbishopric in this period served as a sanctuary for Jews fleeing persecution elsewhere; in 1397, for example, a severe persecution of Jews in *Styria and *Carinthia brought a considerable number of refugees into Salzburg. A Salzburg scholar named Judah wrote a code on *shehitah* in this period. Despite the liberality of Salzburg’s administration, however, an accusation of desecrating the *Host (1404) was directed against the Jews of Hallein and Salzburg. In Salzburg many Jews were burned at the stake; the rest were driven out of the city and their property confiscated. By 1418 a relatively large number of Jews had once more settled in the city. In the same year the provincial council extended its regulation on the wearing of a distinctive hat for Jewish males to Jewish women as well, ordering that bells also be attached to their garments. From 1429 Archbishop John II followed a particularly enlightened policy toward the Jews, inviting Jewish refugees from Speyer, Zurich, Mainz, and Augsburg. Jews were given considerable freedom, e.g., they were allowed to acquire houses and other

real estate. In 1439 a new synagogue was constructed in the city; in 1448 a *mikveh* was built in Hallein, where a synagogue also was in existence. In 1498 Jews were, however, accused of having stolen a sacred object of the church; as a result, the synagogues of both Hallein and Salzburg were destroyed and the Jews were banished in perpetuity from the archbishopric. At that same time, a wooden image of a sow with Jewish children nursing from it was set up in the town hall. Later reproduced in marble, the figures were not removed until 1785. Jewish traveling merchants traded in Salzburg during the 17th and 18th centuries. The **Leibzoll* was repealed in 1790 and two *Court Jews were established in Salzburg by 1800. Nevertheless, until 1867 there was no permanent Jewish settlement in what had been the Austrian duchy of Salzburg for 350 years; in 1867 full equality was granted to the Jews. By 1869 there were 42 Jews in Salzburg, and by 1882 there were 115. In the 1890s an organization was set up to coordinate the religious and cultural needs of the Jews living in the duchy. In 1893 a new synagogue was dedicated in Salzburg and a *hevra kadisha* was formed. For a while, Theodor *Herzl practiced law in Salzburg, leaving the city in 1884. In 1894 a cemetery was consecrated in Aigen.

Adolf Altmann, who acted as rabbi in the community from 1907 to 1914, wrote extensively on the history of Salzburg’s Jews. Between the world wars, Salzburg’s Jews contributed significantly to the rich musical and literary life of the city. Both Stefan *Zweig and Bruno *Walter were among the many renowned Jewish personalities of the period. After the *Anschluss* almost all Jews were deported; in November 1938 the synagogue was destroyed and the cemetery desecrated; several Jewish enterprises were destroyed and 70 Jews arrested. After World War II Salzburg served as a center for some 200,000 Jewish displaced persons. In 1953 a community was reestablished, and in 1968 the newly rebuilt synagogue was rededicated. The Salzburg university library houses a significant collection of Hebrew manuscripts. Around 100 Jews lived there in 2005.

SALZMAN, PNINA (1924–), Israeli pianist. Born in Tel Aviv, Salzman began her music studies at the Shulamit Conservatory with Lina Hopenko. Alfred Cortot, on tour in Israel, heard her and immediately recommended that she study in Paris at the Ecole Normale de Musique under his supervision, where she graduated at the age of 12. She then studied at the Conservatoire National de Musique in Paris, and at 14 won

a *premier prix*. At 15 she made her concert debut. Bronislaw *Huberman attended one of her concerts and wrote to the Israel Philharmonic Orchestra to engage the brilliant young pianist. Salzman played three concertos with the IPO in one evening and was greatly acclaimed. From then on, she regularly performed with the orchestra in Israel and toured other countries. Salzman is an artist of great versatility, known for her brilliant virtuosity as an orchestral soloist, a recital pianist, and an enthusiastic performer of chamber music. She was considered the first Israeli-born pianist to attain international artistic rank. In 1963 she was the first Israeli invited to perform in the U.S.S.R. Again, in 1994, she was the first Israeli pianist invited to play in China. Professor Salzman was head of the piano department of the Rubin Academy of Music at Tel Aviv University and was constantly invited to give master classes at important music centers abroad. She was frequently requested to act as a jury member at international piano competitions. In 2006 she received the Israel Prize.

[Naama Ramot (2nd ed.)]

SALZMAN, WILLIAM (1883–1970), U.S. businessman and educator. Born in the Ukraine, Salzman emigrated in 1908 to New York City, where he founded the Standard Bag Corporation. He served as president and later chairman of the board until its merger with another company in 1966.

An amateur scholar of rabbinic and modern Hebrew literature, Salzman helped to found, finance, and maintain a number of important Hebrew educational institutions in New York City, among them the Herzliah Hebrew Teachers College, of which he served for many years as president, and the Institute of Hebrew Studies of New York University. He was an active member of Mordecai *Kaplan's Society for the Advancement of Judaism and chairman of the Israel Matz Foundation, which supports Hebrew writers in the United States and Israel. His Hebrew autobiography, *Netiv Hayyay* ("The Path of My Life") was published posthumously (1970).

SAMAEL, from the amoraic period onward the major name of Satan in Judaism. The name first appears in the account of the theory of angels in the Ethiopic Book of Enoch 6, which includes the name, although not in the most important place, in the list of the leaders of the angels who rebelled against God. The Greek versions of the lost Hebrew text contain the forms Σαμμανή (Sammāne) and Σεμιέλ (Semiel). The latter form takes the place of the name Samael in the Greek work of the Church Father Irenaeus in his account of the Gnostic sect of the Ophites (see below; ed. Harvey, I, 236). According to Irenaeus the Ophites gave the snake a double name: *Michael and Samael, which in the Greek work of the Church Father Theodoretus appears as Σαμμανή (Sammāne). The Greek version of Enoch used by the Byzantine Syncellus retained the form Σεμιέλ (Samiel). This form still retains the original meaning derived from the word *sami* (סמי), meaning blind, an etymol-

ogy which was preserved in various Jewish and non-Jewish sources until the Middle Ages. In addition to Samiel, the forms Samael and Sammuēl date from antiquity. This third version is preserved in the Greek Apocalypse of Baruch 4:9 (from the tannaitic period), which states that the angel Sammuēl planted the vine that caused the fall of Adam, and therefore Sammuēl was cursed and became *Satan. The same source relates in chapter 9, in an ancient version of the legend of the shrinking of the moon, that Samael took the form of a snake in order to tempt Adam, an idea which was omitted in later talmudic versions of the legend.

In the apocalyptic work "The Ascension of Isaiah," which contains a mixture of Jewish and early Christian elements, the names Beliar (i.e., Belial) and Samael occur side by side as names or synonyms for Satan. What is recounted of Samael in one passage is stated in another about Beliar. For example, Samael dominated King Manasseh and "embraced him," thus taking on the form of Manasseh (ch. 2). In chapter 7, Samael and his forces are stated to be under the first firmament, a view that does not accord with his position as the chief of the devils. Samael is mentioned among the "angels of judgment" in the Sibylline Oracles 2:215. In the tannaitic and amoraic period, Samael is mentioned as being outside the alignment of the hosts of the *Merkabah. Drawing from Jewish tradition, several Gnostic works refer to Samael as "the blind god" and as identical with Jaldabaoth, who occupied an important place in Gnostic speculations as one of, or the leader of, the forces of evil. This tradition apparently came down through the Ophites ("the worshipers of the snake"), a Jewish syncretistic sect (Theodore Bar Konai, Pagnon ed., 213). Partially ecclesiastical traditions of this period, such as the pseudepigraphic versions of Acts of the Apostles, Acts of Andrew, and Matthew 24, retain the name Samael for Satan, acknowledging his blindness. He is mentioned as head of the devils in the magical Testament of Solomon (*Testamentum Salomonis*), which is essentially a superficial Christian adaptation of a demonological Jewish text from this period (ed. Chester Charlton McCown (1922), 96). Undoubtedly Simyael, "the demon in charge of blindness" mentioned in Mandaean works (Ginzā, trans. M. Lidzbarski (1925), 200, and *The Canonical Prayer Book of the Mandaeans*, ed. E.S. Drower (1959), 246), is simply a variant of Samael.

In rabbinic tradition the name first occurs in the statements of Yose (perhaps b. Halafta or the *amora* Yose) that during the exodus from Egypt "Michael and Samael stood before the *Shekhinah*" apparently as prosecutor and defender (Ex. R. 18:5). Their task is similar to that of Samael and *Gabriel in the story of Tamar (Sot. 10b), in the statement of Eleazar b. Pedat. Samael retains the role of prosecutor in the account of Ḥama b. Ḥanina (c. 260 C.E.; Ex. R. 21:7), who was apparently the first to identify Samael with Esau's guardian angel during the struggle between Jacob and the angel. His name, however, does not appear in *Genesis Rabbah* (Theodor ed. (1965), 912), but he is mentioned in the old version of the *Tanḥuma*, *Va-Yishlah* 8. In the parallel version in *Songs of Songs Rabbah* 3:6, the *amora* has Jacob saying to Esau: "your countenance

resembles that of your guardian angel,” according to the version of the *Sefer Mattenot Kehunnah* (Theodor ed.). Surprisingly, in the section of the *Midrash Yelammedenu* on Exodus 14:25, Samael fulfills a positive function during the dividing of the Red Sea, pushing back the wheels of the chariots of the Egyptians. In *gematria*, Samael is the numerical equivalent of the word *ofan* (“wheel”; in Ms. British Museum, 752, 136b; and in the *Midrash Ha-Hefez ha-Teimani*, which is cited in *Torah Shelemah*, 14 (1941) to this verse).

Mention of Samael as the angel of death first occurs in Targum Jonathan on Genesis 3:6, and this identification frequently appears in late *aggadot*, especially in the legends on the death of Moses at the end of *Deuteronomy Rabbah*, at the end of *Avot de-Rabbi Nathan* (ed. Schechter (1945), 156). In *Deuteronomy Rabbah* 11, Samael is called “Samael the wicked, the head of all the devils.” The name “Samael the wicked” is repeated consistently in *Heikhalot Rabbati* (1948), chapter 5, an apocalyptic source. The Hebrew Enoch 14:2, acknowledges him as “chief of the tempters” “greater than all the heavenly kingdoms.” This text differentiates between Satan and Samael, the latter being none other than the guardian angel of Rome (*ibid.* 6:26). In traditions concerning the rebellion of the angels in heaven (PDR 13–14 (1852)), he is the leader of the rebel armies. Prior to his defeat he had 12 wings, and his place was higher than the *hayyot* (“holy heavenly creatures”) and the seraphim. Several tasks are attributed to him: Samael is in charge of all the nations but has no power over Israel except on the Day of Atonement, when the scapegoat serves as bribe for him (*ibid.* 46). It is he who rode on the snake in the course of the fall of Adam and hid in the golden calf (*ibid.* 45). In *Midrash Avkir* (see *Midrashim, Smaller), Samael and Michael were active at the time of the birth of Jacob and Esau, and even on the way to the **Akedah* of Isaac, Samael intervened as a prosecutor (Gen. R. 56:4). The war between him and Michael, the guardian angel of Israel, will not be completed until the end of days, when Samael will be handed over to Israel in iron shackles (Gen. R., ed. Albeck, 166, following Mak. 12a, and similarly in the messianic chapters (*pirkei mashi'ah*) in A. Jellinek, *Beit ha-Midrash* 3 (1938), 66f.).

Particular motifs on Samael in later *aggadah* include the following: Samael does not know the path to the tree of life, even though he flies through the air (Targ. Job 28:7); he has one long hair in his navel, and as long as this remains intact his reign will continue. In the messianic era, however, the hair will bend as a result of the great sound of the *shofar*, and then Samael will also fall (*Midrash Piyyutim*, quoted in a commentary on Ms. Munich 346, 91b). In Jewish astrological sources, which in time influenced those of other groups, Samael was considered the angel in charge of Mars. This idea recurs at first among the Sabans in Haran, who called him Mara Samia (D. Chwolson, *Die Ssabier und der Ssabismus*, 2 (1856); *Picatrix*, ed. H. Ritter (1933), 226) and later in medieval Christian astrological magic literature. He appears as the angel in charge of Tuesday in Sefer *Razi'el (Amsterdam, 1701), 34b; in *Hokhmat ha-Kasdim* (ed. M. Gaster, *Studies and Texts*, 1 (1925), 350; in

*Judah b. Barzillai's commentary on Sefer *Yezirah (1885), 247, and in many other works. In demonological sources known to the brothers *Isaac and *Jacob b. Jacob ha-Kohen, Spanish kabbalists of the mid-13th century, an echo of the ancient etymology is still retained and Samael is called Sar Suma (“blind angel”).

In later literature, Samael often appears as the angel who brought the poison of death into the world. These same demonological sources contain the earliest references to Samael and *Lilith as a couple in the kingdom of impurity (Isaac ha-Kohen's essay on *azilut*, *Madda'ei ha-Yahadut*, 2 (1927), 251, 260, 262). These sources are full of contradictory traditions concerning the roles of Samael and the war against *Asmodeus, then regarded as guardian angel of Ishmael. Different systems were constructed of the hierarchy of the leaders of the demons and their consorts (*Tarbiz*, 4 (1932/33), 72). According to one view, Samael had two brides (resp., *Sidrei de-Shimmusha Rabbah*, *Tarbiz*, 16 (1945), 198–9), an idea which also appears in *Tikkunei Zohar* (Mantua, 1558). The couple Samael and Lilith are mentioned many times in the *Zohar, mostly without specifically mentioning the name Lilith (e.g., “Samael and his spouse”), as the leaders of the *sitra a'hra* (“the other side”; i.e., evil). In *Ammud ha-Semali* by *Moses b. Solomon b. Simeon of Burgos, a contemporary of the author of the Zohar, Samuel and Lilith constitute only the eighth and tenth *Sefirah* of the left (evil) emanation (*Tarbiz*, 4 (1932–33), 217f.). In the Zohar, the snake has become the symbol of Lilith, and Samael rides on her and has sexual intercourse with her. Samael is cross-eyed and dark (*Zohar Hadash* 31, 4) and has horns (*Tikkunei Zohar* in *Zohar Hadash* 101, 3), perhaps influenced by the Christian idea about the horns of Satan. However, the image of Satan is linked with the goat in Targum Jonathan to Leviticus 9:3. The party, hosts, and chariots of Samael are mentioned in Zohar part 2, 111b; part 3, 29a. Different classes of demons, all called Samael, were known by the writer of *Tikkunei Zohar* (published in the main body of the Zohar 1, 29a). “There is Samael and there is Samael, and they are not all the same.”

The conjurations of Samael often appear in magical literature and in practical Kabbalah. In 15th-century Spain a system was developed in which the heads of the demons were Samael, the representative of Edom, and his assistant Amon of No, representing Ishmael. A legend telling of their downfall at the hands of *Joseph della Reina appears in several sources (G. Scholem, in *Zion*, 5 (1933), 124f.). After Isaac *Luria had introduced the practice of not pronouncing the name of Satan, the custom of calling him *Samekh Mem* became widespread (*Sha'ar ha-Mitzvot* (Salonica, 1852), Exodus; *Sha'ar ha-Kavvanot* (Salonica, 1852), *Derushei ha-Laylah* 1).

SAMAMA (Shemama?), NESSIM (1805–1873), Tunisian *qā'id*; born in *Tunis and died in Leghorn. After a long career as a textile merchant, Samama entered the service of the general Ben Ayad as a paymaster; in 1853 he went on to serve the prime minister Mustafa Khaznadar, quickly taking control of the functions of treasurer and controller of finances. In October 1859 he was appointed *qā'id* of Tunisian Jewry, and the following year he became director and chief revenue collector for the state. He was raised to the rank of brigadier general. In 1864 Samama left for *Paris on an official mission to negotiate a loan for *Tunisia. He carried 20 million gold francs with him and, without any intention of returning, he settled at first in Paris and then, in 1871, in Leghorn. As a result of the conduct of the Prime Minister Khaznadar, the bey of Tunis was compelled to file a suit challenging the rights of inheritance of Samama's considerable estate. The subsequent suits for and against the validity of the inheritance of the estate gave rise to numerous articles which were published in Arabic, Italian, French, and Hebrew. During his lifetime Samama contributed to the publication of several works of Tunisian and other rabbis, and also to the maintenance of a yeshivah in *Jerusalem which bore his name.

His nephew SALOMON SAMAMA (d. 1886) was also a *qā'id*, and was chief collector of Tunisian revenues from 1864 to 1866 and 1869 to 1873. When the estate of his uncle was disputed, Samama fled to Corfu, escaping with several million gold francs; a large part of the money was successfully recovered by the Tunisian government. He died in Paris.

[Robert Attal]

SAMANDAR, *Khazar town N. of the Caucasus, four days from Bāb al-Abwāb and seven or eight days from *Atil on the Volga. As in the case of *Balānjar, Samandar originally seems to have been the group name of the inhabitants. The Zabender (apparently = Samandar) are mentioned by the Greek writer Theophylact Simocatta as emigrating from Asia to Europe in about 598 C.E., while a town M-s-n-d-r (vowels uncertain) in the land of the Huns, north of Darband (Bāb al-Abwāb), occurs in the Armenian geography attributed to Moses of Chorene. According to Mas'ūdī (*Murūj*, 2 (1877), 7), in the earliest Arab period Samandar was the Khazar capital; subsequently *Atil on the Volga was made the capital, evidently to be out of reach of Arab attacks. Samandar figures regularly in accounts of the fighting in the second Arab-Khazar war. Al-İṣṭakhrī, the tenth-century geographer, describes the town as possessing many gardens and thousands of vineyards. There was a considerable Muslim population, but the king was a Jew and related to the king of the Khazars. According to the geographer Ibn Ḥawqal (tenth century, later than Al-İṣṭakhrī), Samandar was destroyed by the Russians in 968 C.E. (358 A.H.).

The exact site of ancient Samandar is unknown, but it is generally agreed to have been somewhere in the region of present-day Qizlar on the Terek, which, like Samandar, is noted for its vineyards. Remains of a large town which may be Samandar have been found deep in the woods along the lower Terek (communication of M.I. Artamonov to D.M. Dunlop, November 1964).

[Douglas Morton Dunlop]

SAMARIA (Heb. **Shomron**, modern **Sebaste**), city established as the capital of the northern kingdom of Israel during the reign of Omri c. 884 B.C.E. Prior to the Omride period the site appears to have been the center of an extensive wine and oil production area, which may have accounted for its choice as the new capital. Apparently the origin of the name of the site was from Shemer, the eponymous owner of the land that Omri purchased for two talents of silver (1 Kings 16:23–24).

The site has been excavated by two archaeological expeditions. The first was the Harvard Expedition, initially directed by G. Schumacher in 1908 and then by G.A. Reisner in 1909 and 1910 with the assistance of architect C.S. Fisher and D.G. Lyon. The second expedition was known as the "Joint Expedition," a consortium of five institutions directed by J.W. Crowfoot between 1931 and 1935, with the assistance of K. Kenyon, E.L. Sukenik, and G.M. Crowfoot. The leading institutions were the British School of Archaeology in Jerusalem, the Palestine Exploration Fund, and the Hebrew University. In the 1960s small-scale excavations directed by F. Zayadine were carried out on behalf of the Department of Antiquities of Jordan.

The city is built on the summit of a rocky hill, and the foundations of the monumental buildings from later periods often plowed down through the earlier strata to the bedrock, which was never far below. In modern times the site has been used as farmland by the villagers of neighboring Sebaste; this meant that most of the excavated areas had to be back-filled and returned to agricultural use. These two developments hindered excavation and later analysis of the remains. The earliest remains consist of extensive rock-cut installations, initially thought to date to the Early Bronze Age by Kenyon. These were reevaluated, first by Stager and then by Franklin, and are now recognized to be the remains of an extensive early Iron Age oil and wine industry (designated Building Period o).

Only the acropolis of Samaria has been extensively excavated down to the bedrock. The palace was excavated solely by the Harvard Expedition and recognized by it as the Palace of Omri (designated Building Period 1). The Omride palace was located on an elevated 4-meter-high rock-cut platform that isolated it from its immediate surroundings. Immediately below the palace, cut into the face of the bedrock platform, there are two rock-cut tomb chambers that have only

Plan of the site of Samaria. Based on Encyclopedia of Archaeological Excavations in the Holy Land, Jerusalem, 1970.

recently been recognized and attributed to Omri and Ahab. West of the palace there are meager remains of other Building Period I buildings, but much of the rock surface has been severely damaged by later buildings. The Omride palace continued in use during the next building phase (designated Building Period II), but it was no longer isolated on an elevated platform. The acropolis area was extended in all directions by the addition of a massive perimeter wall built in the casemate style; the new enlarged rectangular acropolis measured c. 290 ft. (90 m.) from north to south and at least c. 585 ft. (180 m.) from west to east, and the surface was now raised to a uniform elevation by the addition of a massive fill. This phase (Building Period II) was traditionally attributed to Ahab due to the misallocation of Wall 161 that runs parallel to the northern casemates and the identification of a large rock-cut pool near the northern casemate wall as the biblical "Pool of Samaria"; the wall (Wall 161) is now recognized to belong to

Building Period II and the "pool" is a rock-cut grape-treading area that originated in Building Period 0 and continued in a reduced form in Building Period I. Consequently the onset of Building Period II can only be relatively fixed. There is neither a biblical anchor nor securely dated pottery to establish the chronological affiliation of Building Period II. The Omride Palace was still in use and the royal tombs were still accessible (now via subterranean rooms) and there was an administrative building, the "Ostraca House" (named for the 63 ostraca retrieved from the floor's make-up) built west of the palace on the newly extended acropolis. The ostraca provide a wealth of data concerning oil and wine supplies, and can possibly be attributed to the period of Jeroboam II c. 785–749, thus providing a probable date for Building Period II. North of the palace a rich cache of Phoenician ivories (furniture ornamentation) was retrieved. This was mixed with later debris, but it was presumed by the excavators (the Joint) that it was

in this area that the “Ivory House” that Ahab built for Jezebel (1 Kings 22:39) stood. Northeast and below the acropolis a number of Iron Age tombs were found and their location probably delimits the area of the city in that direction. In essence only the acropolis was excavated down to the Iron Age, but it is presumed by the excavators (the Joint) that the city extended down over the northern and southern slopes of the hill. During the reign of the last king of the northern kingdom, Hosea (11 Kings 10), the Assyrians invaded in 722/721 B.C.E. (initially under Shalmaneser V and finally under Sargon II), when they established complete control over the capital city and the remainder of the northern kingdom. The fragment of a stela with an Assyrian inscription attributed to Sargon II was found on the eastern slope of the acropolis testifying to their presence. In addition, according to inscriptions from Sargon’s palace at Khorsabad, the inhabitants of Samaria were deported to Assyria. The remains of a wall relief in Room 5 of Sargon’s palace are thought to depict Samaria and its defeated defenders. New inhabitants were brought in (from Arabia and the Syro-Mesopotamian area, 11 Kings 17:24) and, together with the remnant not deported, they formed a new Samaritan population. The city together with the neighboring highland area became known as Samerina and was ruled by an Assyrian governor. There are only meager remains from the succeeding Babylonian period and it was only in the Persian period, in the mid-fifth century, that the city reemerged in importance. The tensions between the ruling family of Sanballat and Jerusalem under the governorship of Nehemiah are documented in the Bible (Ezra 4:10, Neh. 2:1–8). Samaria became a Hellenistic town in 332 B.C.E. and thousands of Macedonian soldiers were settled there following a revolt by the Samaritans. Three 13-m.-diameter round towers dating to that period have been excavated (the first two by Harvard, which attributed them to the Israelite period) and a later, massive, fortification wall with square towers. These fortifications were breached during the destruction of the city by John Hyrcanus in 108 B.C.E. Traces of the destruction wrought by *Hyrcanus were found by the excavators, but the city was apparently resettled under *Yannai. In 63 B.C.E. Samaria was annexed to the Roman province of Syria. In 30 B.C.E. the emperor Augustus awarded the city to *Herod, who renamed it Sebaste in honor of Augustus (Gr. Sebastos = Augustus). The outstanding remains from this period are: the Augusteum, consisting of a temple and a large forecourt built over the Omride palace at the summit of the acropolis; a city gate and an east-west colonnaded street; a theater on the northeast slope of the acropolis; a Temple to Kore on a terrace north of the acropolis; and a stadium to the northeast in the valley below. East of the acropolis and in an area that today links the ancient city with the modern village of Sebaste lies the forum, flanked on the west by a partially excavated basilica. Water for Roman Sebaste was provided by an underground aqueduct that led into the area of the forum from springs in the east. The city was encompassed by a city wall 2½ mi. (4 km.) long, with imposing towers that linked the gateways in the west and north. A number of mausole-

ums with ornate sarcophagi were excavated in the area of the modern village and adjoining fields.

The city was rebuilt without any major changes in the second century C.E. by Septimius Severus, when the city was established as a colony. Samaria has been associated with the burial place of John the Baptist and his tomb, reached by a steep flight of steps, is situated beneath the Crusader cathedral in the village. A small basilica church, first founded in the fifth century, was excavated on the southern slope of the acropolis. The church is traditionally the place of the invention of the head of John the Baptist. A monastery was added to it at a later date. In the 12th century C.E. a Latin cathedral dedicated to John the Baptist and marking the spot of his tomb, was built east of the Roman forum and combined elements of the Roman period city wall. It later became the Sebaste village mosque.

HISTORY

Samaritanism is related to Judaism in that it accepts the Torah as its holy book. Samaritans consider themselves to be the true followers of the ancient Israelite religious line. The Samaritan temple was on Mt. Gerizim near Shechem (modern Nablus), where dwindling numbers of Samaritans still live and worship today.

Passages in the Hebrew Bible indicate that Mt. Gerizim has a legitimate (albeit obscure) claim to sanctity through its association with those who visited it. Abraham and Joseph both visited Shechem (Gen. 12:6–7, 13:18–20), as did Joseph (Gen. 37:12–14 and Josh. 24:32). In Deuteronomy (11:29 and 27:12), Moses commanded the Israelites to bless Mt. Gerizim when they entered the land of Canaan. When the Israelites crossed the Jordan they built an altar on Mt. Ebal (opposite Mt. Gerizim), and six of the tribes faced Mt. Gerizim while blessing the people of Israel as Moses commanded (Josh.8:30–33). Throughout Samaritan history, Samaritans have lived near Mt. Gerizim (Pummer 1968, 8).

After the fall of Samaria (724 B.C.E.), the Assyrian conquerors sent much of the population into exile to be resettled in various parts in the Assyrian empire. Towards the end of the seventh century B.C.E., Josiah tried to reform the cult in Jerusalem and, from then on, the stories and laws of the five first books of the Bible (the Torah, or Pentateuch) were at the heart of Jewish monotheism.

The Samaritan tradition maintains that its Torah (the *Samaritikon*) dates to the time of Moses and that it was copied by Abiša ben Phineas shortly after the Israelite entered the land of Canaan. However, modern literary analysis and criticism does not support this position. In fact, there are two main versions of the Torah: the Jewish version and the Samaritan version, and they are almost the same, which can only mean that both derive from the same original. While the Torah is a composite of traditions from both northern and southern

Israel, the center of literary activity was Judaeen, starting with the work of the Yahwists and ending with the editorial work of the Judaeen diaspora (Pummer 1968: 93).

Samaritan Origins

There are a number of theories about the origins of the Samaritans, all of which have in common a tradition that originally the cult of YHWH was widespread through the land of Israel. Even so, the origins and early history of the Samaritans are quite problematic because the sources are far removed from the events and because the non-Samaritan sources tend to be hostile.

One tradition is that the Samaritans originated with the northern tribes of Israel because only a small proportion of these tribes was deported during the Assyrian conquests of the late eighth century B.C.E. and that those who remained on the land formed what later became the Samaritans (Mor 1989, 1).

Another Samaritan tradition claims Samaritan origins lie in the pre-exilic period, at the very beginnings of Israelite history, and that the split between Samaritanism and Judaism only arose when the heretical priest Eli stole the Ark of the Covenant and established a rival cult.

Until that time, the Ark of the Covenant had been kept at the sanctuary of YHWH on Mt. Gerizim. According to this tradition, the priest Eli was prevented from rising to the high priesthood because he was of the family of Itamar, not the high priestly family of Eleazar. Nevertheless, he took the Ark of the Covenant from Mt. Gerizim to Shiloh and established a rival cult there. As a result of this, two centers of the priesthood arose. One center was on Mt. Gerizim, at whose head stood the legitimate high priest, Uzzi (a descendant of Phineas and of the family Eleazar). The second (heretical) priesthood was at Shiloh, and the priest Eli, a descendant of Itamar, was at its head.

Thus, according to Samaritan tradition, Samaritanism is a perpetuation of the true Israelite faith, and Judaism only the continuation of Eli's heresy. This is the case, the Samaritan tradition claims, all the way through Samuel, Saul, David, and the Judaeen monarchy, with the rival cult of Eli eventually shifting from Shiloh to Jerusalem and continuing up to this day.

A non-Samaritan tradition from the same period claims that the Samaritans originated in the Assyrian post-conquest settlement of populations from Babylon, Cuthah, Avva, Hamath, and Sepharvaim in northern Israel (II Kings 17:24–41), and that they were forced to worship the god of Israel by the native peoples. These immigrant groups brought with them the idols of their native cities, whom they continued to worship in conjunction with the deity of their new home. (II Kings 17:24–41; Ezra 4:2, 10; Mor 1989, 1): "Even while these people were worshipping the Lord, they were serving their idols. To this day their children and grandchildren continue to do as their fathers did" (II Kings 17:41).

Another non-Samaritan tradition is that the Assyrian conquest of Israel was far from total, that significant num-

bers of Israelites remained on the land, and that the Assyrians settled a separate group of exiles in what used to be the Israelite northern kingdom. These populations eventually intermingled, in time becoming a discrete group of people who later came to be referred to as Cutheans and Samaritans (Jos., Ant. 9:288–391; Mor 1989, 1).

But, unfortunately, even Samaritan historical traditions are not in agreement on either the time or the circumstances of their return. The Samaritan text *Chronicle Adler* relates the story of two returns, one under the high priest Seraiah in the early seventh century B.C.E. and another under the high priest Abdiel in the late sixth century B.C.E.!

Samaritans in the Time of Nehemiah

The first direct references we have to the Samaritans come from the book of Nehemiah. In 445 B.C.E., when the person we know as the biblical Nehemiah was appointed by the Persian king Artaxerxes I (464–424 B.C.E.) to rebuild the temple at Jerusalem and later (during a second “tour of duty”) to be the governor of the province of *Yehud*. During some internecine rivalry surrounding the building of a wall around Jerusalem, Nehemiah named his enemies as Tobiah (the “Ammonite servant”), Geshem (the “Arab”), and *Sanballat (the “Haronite”). Tobiah was a member of an established Jewish family (see *Tobiads) from Transjordan (Neh. 2:10; 2:19; 4:7; 6:1). Geshem led the Arab tribes in the southern part of Judea. Sanballat the Haronite was a Samaritan who was coincidentally the Persian-appointed governor of Samaria, and therefore a direct rival of Nehemiah and a person with whom Nehemiah refused to have any contact (Mor 1989, 2–3).

Sanballat, as the Persian-appointed governor of Samaria, may indeed have been in direct competition with Nehemiah, since Jerusalem was to be refortified, whilst Samaria, a provincial center, was not. Urban wall systems of the mid-fifth century are found only at Lachish and Tel en-Nasbeh and at Jerusalem during the time of Nehemiah (Hoglund 1992, 211).

Another reason for Nehemiah’s rejection of the Samaritan contingent may have been that Judah had previously been part of the province of Samaria and that the Persian province of *Yehud* only came into being with the arrival of Nehemiah. This might explain why Sanballat wanted to be involved in the building project. If Samaria had controlled Judah up to this point (and there is a hint of this in the earlier attempts to stop the building program of Ezra), then the hostility towards Nehemiah may have been real. In the same vein, Nehemiah may have felt threatened by Sanballat, feeling that he might be trying to promote integration of *Yehud* back into the province of Samaria. In either case, there is no proof; only supposition and guesswork.

Nehemiah’s program of wall-building can also be seen as an indicator of a reversal in the Persian attitude towards Jerusalem by reference to an earlier and failed attempt to rebuild the fortifications (Ezra 4:7–23). During that earlier attempt, officials in Samaria reported it to the Persian court, and Artaxerxes I ordered that the work be stopped. Samaritan

officials used imperial military forces to make sure his order was enforced. This lends some support to the idea expressed above that Judea might once have been part of the province of Samaria, hence the rivalry between Sanballat and Nehemiah, both Persian officials.

One of Sanballat’s daughters married a son of the Jerusalem high priest Joiadah (Neh. 13:28; Jos, Ant. 11:306–12). Since Nehemiah believed in the “purity” ideology of the returnees, his reaction was to expel the couple from Jerusalem (Mor 1989, 4; Smith-Christopher 1994, 259).

The Samaritans in the Second Temple Period

Until the arrival of Alexander the Great in the near east in 332 B.C.E., there is little information about the Samaritans. Then, at least according to Josephus, they once more come into view in Judea, where Manasseh, the brother of the high priest Jaddus, married Nikaso, a daughter of Sanballat III (a descendant of the Sanballat of the time of Nehemiah) (Jos., Ant 11:302–3; Mor 1989, 4). Josephus reports that this Sanballat, like his ancestor a governor of Samaria, hoped that through the marriage of his daughter to the high priest’s brother he could establish ties with the Jewish community in Jerusalem. However, Manasseh was offered two choices by the Jerusalem hierarchy: to stay in Jerusalem and divorce his wife, or to leave the city and take his Samaritan wife with him. Manasseh chose the second option, whereupon his father-in-law promised to build a temple on Mt. Gerizim where Manasseh would be high priest and that, in addition, he would take over civic leadership of Samaria on the death of his father-in-law. According to Josephus, many priests left Jerusalem and followed Manasseh to Samaria (Ant. 11:306–12; Mor 1989, 5).

Sanballat III sent 8,000 soldiers to support Alexander’s campaigns and also convinced him that it would be to his advantage to allow the Samaritans to build a temple on Mt. Gerizim, where his son-in-law would be high priest. During this period when the Macedonians were consolidating their hold on the region and the Persians were not yet fully vanquished, the Samaritans quickly built their temple (it took less than nine months). The founding of a temple was not unusual; however, this temple was not far from its Jerusalem rival, and from the establishment of this temple the Samaritans and the Jews grew further apart, and it is from this period onwards that much of the anti-Samaritan polemic in the Hebrew Bible and extra-biblical texts (such as Josephus) originates.

The temple was completed around 332 B.C.E., at the time that Alexander finally took control of Gaza (Mor 1989, 7), and was also contemporary with the establishment of a Macedonian colony in the city of Samaria and the rebuilding and resettling of Shechem (Purvis 1968, 105).

However, Sanballat III died just two months into Alexander’s siege of Gaza (Jos., Ant. 11:325) and, according to the historian Quintus Curtius, after the siege of Gaza Alexander left a Greek official named Andromachus in charge of the region. Despite Sanballat III’s promise to his son-in-law, and for the first time since the Persian conquest, a Samaritan was not

in charge of Samaria (Mor 1989, 9). The Samaritan leadership reacted strongly to this, rebelled against the Macedonians, captured and burned Andromachus alive, and then fled from Shechem to a cave in the Wadi Daliyeh just north of Jericho (Cross 1985, 7–17). The Macedonians retaliated immediately, with Alexander himself said to have left Jerusalem to punish the Samaritans. All of the rebels were killed, all Samaritans were banished from Samaria, and the city of Samaria was settled with Macedonian veterans (Mor 1989, 10).

According to Josephus (Jos., Apion, 2:43), following the post-rebellion massacre, administrative control of the district of Samaria was given to the Jews because of their loyalty to Alexander. The Samaritans who survived the Macedonian massacre, and who had heretofore exercised control and political authority and cultural leadership in Samaria, were now wholly disenfranchised and they could not turn to Jerusalem for help.

From the death of Alexander the Great, nothing much is known about the Samaritans until the rise of the Seleucid empire in around 200 B.C.E. From Josephus (Ant. 12:5–10) we know that a number of Samaritans and Jews settled in Egypt and that relations between them were very strained, with each side demanding that sacrifices be directed to their respective sanctuaries. Any grace or favor to one side was seen as detrimental to the other, and so a tit-for-tat hostility developed.

In Palestine, the first report of open hostility between Shechemites and Jews in Jerusalem is dated to the time of Ptolemy V (Epiphanes) and Antiochus III in around 200 B.C.E. (Jos., Ant. 12:154–56). According to Josephus, the Jews were being harassed by Samaritans through raids on Jewish land and the capture and sale of Jews into slavery, and the Samaritans found themselves under pressure from Antiochus III, because they had allied themselves with pro-Ptolemaic policy, thinking that they would prevail against the Syrians. This was nothing new. This loyalty dated back to the Persian period when Sanballat the Horonite and Tobiah the Ammonite had allied against Nehemiah, the governor of the province of Judaea.

In 168 B.C.E. the two groups grew still further apart when the Seleucid king (Antiochus IV Epiphanes) ordered the Jews and the Samaritans to rededicate their temples to Zeus. In Judea, *Judah Maccabee organized a rebellion which culminated in the ousting of Zeus from the temple and its subsequent repurification. During this period, both Samaritans and Jews were subject to the persecutions of Antiochus IV Epiphanes (175–164 B.C.E.), as is seen in II Maccabees (5:23; 6:2), even though Samaria did not rebel against Antiochus IV.

What had been a religious division now became a political conflict as well. Judea, having fought for its freedom from Seleucid rule, became an independent state, ruled by a line of high priests derived from the Hasmonean dynasty. One of them was John *Hyrcanus (134–104 B.C.E.), whose political program included the expansion of the state along with a campaign of propaganda to advertise itself and, as part of this campaign, Hyrcanus utilized a policy of forced conversion to

Judaism. While Antiochus VII (Sidetes) was in the east, John Hyrcanus invaded northern Palestine and Syria.

Among the places he captured were Shechem and Mt. Gerizim. Later in his reign, Hyrcanus laid siege to Samaria and after a year's campaign took it (Jos., Wars 1:64ff; Ant. 13:275ff.). The bustling, cosmopolitan, and mainly non-Israelite city of Samaria was utterly destroyed by Hyrcanus (Isser 1999, 571), and in around 128 B.C.E., the sanctuary and temple on Mt. Gerizim were destroyed (Jos., Wars 1:62f.; Ant. 13:254ff.).

While the Jewish priesthood ceased to function after 70 C.E., the Samaritans continued to have an active priesthood with a high priest even after the temple on Mt. Gerizim was destroyed (Pummer 1998, 26–27), and whereas the inevitable dispersal of the Samaritans had not yet happened, the process was underway, not least because the Samaritans were now under the economic and political control of Jerusalem. However, a core group of Samaritans stayed near Mt. Gerizim in the town of Sychar (which may have replaced Shechem as the center of Samaritan religious authority).

There are very few sources other than Josephus to help outline the history of the Samaritans in the early Roman period, and those that do exist are often very hostile to their subject. Josephus, for instance, did not even consider the Samaritans to be Jews (Ant. 11:341).

Pompey's conquest of Palestine in 63 B.C.E. ended Jewish domination of Samaria (Jos., Wars 1:166). The cities that had been captured by the Hasmoneans were restored to their previous inhabitants. Samaria and other regions were joined to the Roman province of Syria and protected by two full Roman legions. Because so many of the people of Samaria had been killed or were too scattered to bring back together, the Romans repopulated the newly built town of Samaria with new colonists (Jos., Wars 1:169f.; Ant. 14:90f.; Isser 1999, 572).

The proconsul of Syria, Aulus Gabinius (57–54 B.C.E.) had to quell an uprising by another Hasmonean, Alexander, son of Aristobulus, during which Roman soldiers sought refuge and came under siege on Mt. Gerizim. (Jos., Wars 1:175ff.; Ant. 14:100). In 43 B.C.E., with Roman backing, *Herod the Great restored order in Samaria (Jos., Wars 1:229; Ant. 14:284; Isser 1999, 572). At the end of the Roman civil war, Herod declared his loyalty to Octavian, who confirmed him as the Jewish king and conferred on him new territories (Jos., Wars 1:396ff.; Ant. 14:217); among these new territories was Samaria. Herod rebuilt and extended the city of Samaria and added a further 6,000 colonists to its population. He renamed the city Sebaste in honor of Octavian (Jos., Wars 1:403; Ant. 14:295ff.; Isser 1999, 573).

There are numerous reports of acts of hostility against the Jews by Samaritans. How true these are is unknown, but there does seem to be a prevailing tradition of antagonism between the groups. As an example of the sort of thing reported, Josephus records that during the procuratorship of Coponius (6–9 C.E.) it had been the practice to keep the gates of the Jerusalem temple open after midnight at Passover. On one such occasion, a number of Samaritans are said to have

secretly entered and scattered human bones throughout the grounds, rendering them unclean (Ant. 18:29f.).

There is another account in Josephus (Ant. 18:85–89) about a massacre of Samaritans during the Procuratorship of Pilate (26–36 C.E.). Josephus reports that a man whom he describes as a rabble-rouser promised to show the Samaritans the sacred vessels of the *mishkan* (the ancient tabernacle) which, according to Samaritan tradition, Moses had buried in a secret place on Mt. Gerizim. This discovery would signal the Age of Divine Favor (the fulfillment of Samaritan eschatological belief involving Moses, the *mishkan* and a person (the “rabble-rouser”) who was a sort of messianic figure – the “restorer”). A large group gathered in a nearby village with the intention of climbing Mt. Gerizim, but Pilate interpreted this as the prelude to revolt and so the gathered Samaritans were intercepted by Roman troops and killed or captured. The leaders were executed at Pilate’s orders. This was too much for the Samaritan council, who complained to Vitellius, the governor of Syria, who accepted their accusations against Pilate and sent Marcellus to take over in Judea and ordered Pilate to return to Rome for trial before the emperor Tiberius. This Pilate did, but Tiberius had died, and we know nothing further about this episode (Grabbe 1994, 424; Isser 1999, 576).

An even more serious event occurred during the Procuratorship of Cumanus (48–52 C.E.) at a village named Gema (between Samaria and the Plain of Esdraelon to the north). Josephus reports that some Samaritans attacked a group of Galileans who were on their way to Jerusalem for a festival and killed either many or one (War 2:12:3, 232; Ant. 20, 6:1, 118; Tacitus, *Annals* xii, 54). When the Jews appealed to Cumanus he did nothing (allegedly because he had been bribed by the Samaritans). A mob of Jews took matters into their own hands and attacked some Samaritan villages. Cumanus then intervened, and both Jews and Samaritans appealed to the Syrian governor, Quadratus. After a preliminary investigation, Quadratus sent Cumanus, the military tribune Celer, some of the Samaritan notables, the high priests Jonathan and Ananias, and other Jewish leaders to Rome for trial before Claudius. Agrippa II petitioned Claudius on behalf of the Jews and Claudius found in their favor, executing the Samaritan delegation and exiling Cumanus. The tribune Celer was taken back to Jerusalem and executed publicly there (Isser 1999, 574–75).

Acts 8:4ff. reports a successful mission of the preacher Philip among the Samaritans. He performed healings, exorcisms, and baptized many in the name of Jesus. After this, Peter and John came from Jerusalem and bestowed on the new converts the Holy Spirit. Nothing more is mentioned about the Samaritan converts (Isser 1999, 576). In general, however, the Samaritans (as with the Jews) regarded Jesus as a false prophet (Isser 1981, 166ff).

It is clear from Josephus at least that the relation between Samaritanism and Judaism was tense, as is presupposed in the story about the good Samaritan. However, Jesus, especially in the Gospel of Luke, contrasts Samaritan openness with Jewish rigidity (Luke 10:30–37; 17:16; John 4; Acts 8:25).

While Josephus does not say that the Samaritans fought with the Jews during the war of 66–73 C.E., he does note that large numbers of them collected on Mt. Gerizim, ready for war. Even though the Romans faced a steep ascent to join battle with the Samaritans, thirst and desertion among the Samaritans made their work easier and quicker. Despite this, those Samaritans who remained would not surrender and died fighting (Josephus, Wars 3:307–15).

In the wake of the Jewish and Samaritan rebellion, the Emperor Vespasian founded the new town of Flavia Neapolis (Jos., Wars IV, 449; Pliny, *Natural History* v, 13:69) which later came to be called Nablus by the Arabs. This settlement became the new center for the Samaritans and remains so to this day (Isser 1999, 577).

Samaritans in the Graeco-Roman Diaspora

In the Diaspora, when Jews and Samaritans lived in the same communities, they would have had to explain their allegiances to the authorities from whom they requested privileges, and Josephus records difficulties between Jews and Samaritans in Egypt (Ant. 12:10, 74–79). Thus, while Jerusalem exerted its influence on Diaspora Jews, so Gerizim influenced the Diaspora Samaritans (Purvis 1968, 110).

In 1979, two inscriptions were found near the stadium on *Delos by Philippe Fraisse of the Ecole française d’Athènes. Both were found in an unexcavated area just beneath current ground level near the shoreline of the east of the island. Both are dedicated by the “Israelites who offer to Holy Argarizein.” The term *Argarizein* is the Greek rendering of the Hebrew *Har Gerizim*, that is, Mt. Gerizim, and these two inscriptions certainly provide evidence of a hitherto unknown community of Samaritans on the island (Matassa 2006; White 1987, 141–42).

The first inscription reads “The Israelites on Delos who make first-fruit offerings to Holy Argarizin crown with a golden crown Sarapion son of Jason of Knossos for his benefactions on their behalf,” and has been dated to between 150 and 50 B.C.E. (Bruneau 1982, 469–74; Matassa 2006). It is not clear whether the honoree is himself a Samaritan, Jew, pagan, resident of or visitor to Delos. It does, however, identify the dedicators as “the Israelites on Delos,” and there seems little doubt that this refers to a Samaritan community of some sort on this tiny island.

The second inscription reads, “[The] Israelites who make first-fruit offerings to holy Argarizin honor Menippos, son of Artemidoros of Heraclea, himself as well as his descendants to have established and dedicated its expenses, for an offering/prayer [to God], [- - - - -] and [- - - -] and crowned it with a golden crown and [- - -],” and is dated to around 250–175 B.C.E. (Bruneau 1982, 469–74; Matassa 2006).

The inscriptions show that the dedicators (on Delos or elsewhere) were connected to Mt. Gerizim, and it could be that offerings were sent to Mt. Gerizim while the Samaritan temple still stood there or that offerings continued to be made and sent to Samaria after the destruction of the temple. Or, in-

deed, it could be that the offerings were made on Delos, perhaps in the form of votives, and were dedicated by Samaritan visitors to the island, Samaritan residents of the island, or even friends or business partners of Samaritans elsewhere on their behalf – as the two inscriptions are the only evidence of Samaritans on the island, it is impossible to know. There is certainly no evidence of a synagogue (either Jewish or Samaritan) on the island, but the inscriptions do at least indicate there was a permanent colony of Samaritans on Delos in the Second Temple period (Matassa 2006).

Excavations on Mt. Gerizim

Yitzhak Magen's excavations on Mt. Gerizim uncovered some 480 marble inscriptions and around 13,000 coins. About 90% of the inscriptions were written in ancient Aramaic script, and the remainder in either Hebrew or Greek. The inscriptions were votive offerings brought to the sanctuary and dedicated there. According to Magen, those inscriptions indicate that the sanctuary was there as early as the end of the sixth century B.C.E. (Magen, Tsafania and Misgav 2000(c), 125–32).

The excavations on the top of Mt. Gerizim began in 1983, but only as late as 1998 did the profile of the temple begin to emerge. The temple was found under the remains of a fifth-century Byzantine church (the Church of Mary the Theodosios built by the Emperor Zeno in 484 C.E.). The excavation team uncovered six-foot-thick walls, gates, and altars, and it is thought that the totality of this find could provide the first real indication of what the Jewish temple, destroyed by the Romans in 70 C.E., might have looked like (Magen 2000(a), 74–118; Magen 2000(b), 133).

The Mt. Gerizim excavations show that the temple was surrounded by residential quarters, such as those in Jerusalem. Some 15,000 people lived in a city spread out over 100 acres, which the excavators have taken to indicate that Josephus was correct in saying that the Mt. Gerizim temple was a replica of the temple in Jerusalem. While the exact dimensions of the Jerusalem temple are not known, the foundation of the temple on Mount Gerizim appears to be about 400 × 560 feet (Magen 2000(a), 74–118; Magen 2000(b), 133).

[Lidia Domenica Matassa (2nd ed.)]

Late Roman to Crusader Period

After brief reports of the building of Tiberias and Caesaria in the reigns of Tiberius and Vespasian, the Samaritan Chronicle II narrates the events of Hadrian's time. Both Jews and Samaritans suffered under this emperor (117–38), according to one part of the chronicles, but a later addition tells of the success of the Samaritans in gaining Hadrian's favor by helping him to overcome the defenders of Jerusalem during his siege of the city. This version states that Hadrian was allowed to build a place of worship on Mt. Gerizim and that all Jews living in the area were forcibly removed. Samaritan guards were placed at the emperor's *beit kinshah*, as it was called (see Montgomery, 91, for further details from other sources), but while Hadrian was away in Rome his priests defiled the *beit kinshah* by burning corpses there. The defilement, in Samari-

tan eyes, resulted in a gathering of people destroying the building and then purifying the place ritually. The outcome was that Hadrian sent an army which attacked and killed many of the Samaritans. At last one clever Samaritan managed to put the blame on the Jews and managed to persuade Hadrian of the Samaritans' innocence, so that the emperor attacked the Jews instead. Throughout the chronicles, statements are made about the loss of Samaritan literature during times of persecution. The worst of these periods seems to have been during the rule of Hadrian (and later of Commodus and Severus), when most of the literature kept in Shechem was destroyed. The high priest lists, however, were probably preserved.

Both Samaritan and Jewish sources tell of the friendship of Antoninus Pius (138–61) for their respective peoples. For the Samaritans, the worst of all persecutions was that of Commodus (180–92). They were forbidden to read the Torah or teach it to their children, synagogues were closed, and many Samaritans suffered crucifixion for minor offenses. The reason for Commodus' persecutions given in Abu-al-Fatḥ and Chronicle II was a dispute between *Alexander of Aphrodisias and a Samaritan called Levi. A philosophical discussion, which was the starting point, led to the anger of the emperor and severe repression of Levi's compatriots, with the consequent destruction of their written documents and scrolls (some of which were hidden and saved). Claudius Gelenus (who died c. 200) is brought into the story, and it is claimed that he persuaded Commodus to force the Samaritans to eat the meat of pigs. Subsequent trials compelled many Samaritans to flee to other regions. At the end of Commodus' reign, 300,000 Samaritans were reported living in the Shechem area.

Nothing is reported of Septimius Severus (193–211), but Alexander Severus (222–35) is reported to have persecuted the Samaritans almost as severely as had Commodus. He enforced the worship of Roman gods, thus bringing about a series of rebellions against his rule, which he put down mercilessly. His reign was also a time of famine and pestilence. Since the Samaritans' great hero *Baba Rabbah is recorded as having lived during Alexander Severus' rule, it may be assumed that there is some confusion in the account (see Montgomery, 96, for an alternative view). Severus' successors are correctly stated to have been Gordianus (238–44), Philip (244–49), and Decius (249–51). This period seems to have been a difficult one for Samaria on the whole, but little more is heard from Samaritan sources until the advent of Muhammad. From the evidence of external sources, it is confirmed that Samaria suffered from the many political and military maneuverings of the era. The next source of trouble and change for Samaria was the Christianization of the empire. The edict of Constantius, which prohibited the marriage of Christian women to Jews (Montgomery, 100), led to social intolerance throughout Palestine. Circumcision, prohibited by Hadrian, seems to have been prohibited again in the time of Bishop Germanus, whose jurisdiction included Nablus.

The story of Baba Rabbah may properly be related to the period of Bishop Germanus. The chief importance of this Sa-

maritan hero was that he revived the Samaritan hopes of freedom. He organized Samaria into districts, built synagogues, encouraged literature, and raised a standing army. The Baba Rabbah story, despite some legendary accretions, is not as absurd as Montgomery claims (103), for a great change in Samaritanism undoubtedly took place at about this time (witness the work of *Markah and his family, who gave new shape to religious thinking and gave Samaritan religion a firm base).

During a long period of gradual Christianization in Palestine, the Samaritans fared badly; there were continual attacks by Samaritans on Christians and Christians on Jews and Samaritans, and the holy places of Israel were taken over by the Christians. Under certain rulers, a measure of protection was accorded to both Jews and Samaritans, but the long reign of Theodosius II (408–50) brought in its wake many deprivations, and both Jews and Samaritans became in effect second-class citizens with minimal rights. It was not until the latter part of the fifth century that the full fury of the new order was felt in Samaria, for under Zeno (474–91) Jews and Samaritans suffered terrible massacres, and the Samaritan chronicles tell of many incidents during this period which resulted in increasing repression. For the period of Anastasius (491–518) and Justinian I (527–65), the chronicles have little information, but external sources (see Montgomery, 113 ff.) reveal further devastations of the dwindling Samaritan community. Many small-scale uprisings had taken place almost annually throughout the Christian period, but the greatest seems to have occurred soon after Justinian I became emperor. This was in the year 529, and there are many sources of information about it (Montgomery, 114–6). It is clear that thousands of Samaritans died in the fighting and that they tried to establish their own state. Jews and Samaritans seem to have been treated alike by the Christian victors; sources speak of 50,000 Jewish and Samaritan soldiers being offered by the Samaritans to the Persian king if he would take over Palestine. This attempt, which was foiled, was symptomatic of the state of affairs in Samaria. The people of Samaria became increasingly desperate, and things were to become even worse as more repressive laws were promulgated by Justinian, for a rising number of Samaritans relinquished their faith and embraced Christianity, thus further reducing the number adhering to the ancient faith. Indeed the Samaritans, as a recognizable religious group, had all but been outlawed by Christianity. They lived in territory sacred to the Christians; they were regarded, with the Jews, as eternal enemies of the new faith; and even when they converted, they were not accorded the full rights of other Christians.

According to the chronicles, many Samaritans fled eastward after 634, when the Muslims were victorious at Yarmuk. Throughout the account of Samaritan history, from earliest times, there were frequent emigrations eastward, and contact between the émigrés and *Nablus seems to have been lost frequently until the 13th century, when migrations back to Nablus began. The story of life under the caliphs is one of revolt and suppression. Little information on the basic cause of the

troubles is available because Muslim and Samaritan historians hardly refer to the Samaritans in historical terms. During the early part of the reign of Hārūn al-Rashīd (d. 809), plague and famine blighted Samaria, but after these calamities the Samaritans enjoyed peace in his time. The reign of Ma'mūn (813–33) was a period of respite, on the whole, but the reign of his successor, Mu'taṣim (833–42), brought considerable calamity to Samaria when certain Muslim fanatics demolished many synagogues and all but destroyed Nablus.

As time went on, religious bitterness increased and the Muslims imposed prohibitions on religious practices, especially pilgrimages to Mt. Gerizim. During the tenth century, however, matters improved under the Fatimid caliphs. Samaritan, Islamic, or Christian sources tell little about the period of the Crusades. The Samaritan capital was the center of political intrigue and ecclesiastical debate during the early part of the 12th century. In 1137 Nablus seems to have undergone the catastrophe of further devastation and decimation of its inhabitants when the Saracens attacked it. Thereafter, until 1244, Muslims assumed rule of the Samaritan capital.

[John Macdonald]

Later History

The final destruction of crusader rule in Palestine by the Mamluks (1291), who established their own hegemony over the country, did not bring about an improvement in the situation of the Samaritans. Instead of the Christian rule that unceasingly pressured the thousands of Samaritans who remained true to their ways came the rule of the Mamluks, who were even more cruel and fanatic about their religion: and in place of forced conversion to Christianity came the conversion out of fear of entire Samaritan families. At the very beginning of their rule, the Mamluks plundered the Samaritan religious center in Shechem (Nablus) and turned it into a mosque, in addition to destroying all the other buildings there.

Muslim pressure created substantial opposition on the part of the Samaritans. It was expressed in the figure of the high priest, Phinehas b. Yūsuf (1308–63), who, together with his sons and other members of the family of high priests, established a religious movement among the Samaritans to reinforce their faith and stand up against the pressure to convert to Islam. In addition to their foremost center in Shechem, the Samaritans also had an important center in Damascus from the 11th century. In the course of the 14th century the two centers achieved the height of their social and religious development, and the contact between them, which sometimes reached the dimension of competition, brought about the strengthening and crystallization of the Samaritan life by the renewed writing of books on religious law, history, and the order of rituals. By the beginning of the Ottoman conquest, however, this movement was no longer intact.

During the same period the Samaritans had centers of secondary importance in Cairo and Gaza. Both these centers, as well as the one in Damascus, observed annual pilgrimages to Mt. Gerizim and the community centered in Shechem. The

family of the high priests in Shechem functioned as the supreme institution for all the Samaritan centers. The center in Cairo was influential in the Mamluk court. Its wealth aided the Mamluk authorities in their conquests, but was also a burden to the Samaritans themselves. Of the three sects in Egypt at the end of the 15th century – the Jews, the Karaites, and the Samaritans – the last were forced to pay half the royal taxes that were imposed on the three sects as a whole. The center in Damascus reached the height of its development in the 13th and 14th centuries, and a family of high priests, which was subordinate to that in Shechem and was a scion of Aaron's descendants, was even established there. The community produced important writers, poets, commentators, and grammarians, as well as physicians, some of whom became viziers in Mamluk courts.

With the beginning of the Ottoman conquest, the persecutions suffered by the Samaritans at the hands of their Muslim neighbors and local governors grew in strength and frequency. The beginning of the collapse of the Samaritan center in Damascus is recorded by Samaritan historians as taking place in the middle of the 16th century, with the transfer of the Damascus family of high priests, together with important members of the Damascus community, to Shechem to strengthen the community there. In 1625 the remaining Samaritans in Damascus were massacred, and their spiritual centers were transferred to Muslim hands.

The Samaritans in Egypt were, likewise, plagued by persecutions. The community there, which had been in existence since the age of Alexander the Great, reached the height of its development and wealth at the end of the 16th century, when their affairs with the Mamluks were under the control of the Jewish *nagid*. The Samaritans nonetheless frequently incited the Mamluks against the Jews. With the penetration of Ottoman rule into Egypt, the Samaritans were accused of supporting the Mamluks, and many of them were imprisoned and converted to Islam. The small Samaritan community remained in existence until the beginning of the 18th century, when the surviving members joined the community in Shechem and Samaritan settlement in Egypt came to an end.

The most important event relating to the decrease in the size of the Samaritan community was the disappearance of the line of high priests descending from Aaron. The last high priest of this line, Shalmiah b. Phinehas (1613–24), did not father any sons, and with his death the priesthood passed to the family of levites, the sons of Uzziel b. Kehat, which has filled this office until the present. After the death of Shalmiah, the persecutions by local Muslims against the Samaritans increased: houses and fields were plundered and many families were forced to convert to Islam for fear of their lives. Access to Mt. Gerizim was forbidden to the Samaritans by the Arabs, and they were forced to hold the Passover sacrifice on the eastern slope of the mountain. Beginning with the middle of the 17th century, there was a community of Samaritans in Shechem, a small but strong one in Gaza, and an even smaller one in Jaffa. The levite family descended from Uzziel the uncle

of Aaron was also about to die out as a result of internal conflicts, but at the last moment it was saved, due to a compromise when a Samaritan woman from Jaffa was married to the last offspring of the family, Tabia b. Isaac (1751–86).

At the beginning of the 19th century the Samaritans lived in a certain degree of comfort in Shechem, but once again the Muslims interfered and prevented them from ascending to the top of Mt. Gerizim for the Passover sacrifice. This prohibition was in effect until 1820, when the Samaritans were again allowed to go up the mountain due to the intervention of the British consulate with the Turks. During the same period, however, the community in Gaza came to an end as the result of its expulsion by the Muslims.

By the third decade of the 19th century, only the small community of Samaritans in Shechem remained. This community was also on the verge of extinction in 1842. The Arabs of Shechem, incited by their religious teachers, cruelly persecuted the Samaritans and threatened to murder the entire community, claiming that the Samaritans were atheists because the script in which the Samaritan Pentateuch was written was not recognized by the Muslims. After the Samaritans turned to the Jewish community in Jerusalem, they received an authorization from the chief rabbi, Abraham Hayyim, that “the Samaritan people is a branch of the Jewish people that confesses to the truth of the Torah.” In the same year the Samaritans were again forbidden to sacrifice on the top of Mt. Gerizim, and the prohibition lasted until 1849, when it was again rescinded through the influence of the British consulate.

It can be seen with certainty that the replenishment of the Samaritan community in Shechem by the survivors of other Samaritan centers was the factor that allowed the Samaritans to survive the 400 years of Ottoman rule. The surviving community was led by the high priest Jacob b. Aaron (Hārūn; 1874–1916), who reinforced the religious framework of Samaritan life in the hope of reviving the Samaritans, although scholars and writers of the end of the 19th century had begun to envision certain annihilation for the Samaritans. All the community's lands, riches, and property were taken from it, and the Samaritans remained in a dark ghetto, as it were, on the northern slope of Mt. Gerizim. Their situation deteriorated, both from a personal and economic point of view. The state of their industry and finances was expressed by the fact that most of the Samaritans engaged in copying documents for scholars and tourists who visited Shechem at the beginning of the 20th century. These books were sold for pennies, as it were, and the profit, in many cases, saved the Samaritans from starvation. The number of men was greater than the number of women, at a ratio of about two to one.

The Turkish administration tended to deal with the Samaritans harshly, and the latter were subject to the whims of the Arab families in Shechem, who competed for the local position of leadership at the office of the Turkish pasha in Acre. The Samaritans were often punished on accusations that they had cooperated with the party that lost the competition

for the ruling position. A number of Samaritan youth were even forced to join the Turkish army. The plague that broke out in Shechem at the time of the withdrawal of the Turkish army left the community with the smallest population in its history, 146 souls.

With the beginning of the British Mandatory administration in Palestine, the situation of the Samaritans improved. The family of Tsedaka from Shechem had moved to Jaffa and become acquainted with Izhak *Ben-Zvi already in 1907. Throughout his career in Palestine and the State of Israel, Ben-Zvi devoted attention to improving the situation of the Samaritans, from every possible point of view. He convinced the Samaritans, for lack of a viable choice, to cancel their prohibition against marrying women from outside the community, and as a result a number of Samaritans have done so over the decades (beginning in 1923). Ben-Zvi also established friendship leagues between Samaritans and Jews that helped the Samaritans culturally and economically (e.g., a school for Jewish studies was established in Shechem with their aid). He used his position and personal influence to contact important and influential institutions (e.g., the *American Jewish Joint Distribution Committee) and procure aid for the Samaritans.

The Samaritan population doubled within a span of 30 years. With the establishment of the State of Israel (1948), the Samaritan community split into two centers: the first was in Shechem, under the government of the Hashemite Kingdom of Jordan; the second was in Israel, under the leadership of Japheth b. Abraham Tsedaka. As a result of Tsedaka's activities and Ben-Zvi's influence, in 1949 the Samaritans were recognized as citizens under the Law of Return, a fact that contributed to the reunification of Samaritan families from Shechem and the growth of the Samaritan community scattered throughout Israel. In 1953 the Samaritans were allowed, for the first time, to cross the border to celebrate Passover with their brethren on Mt. Gerizim, and this privilege, attained through an agreement by the Israel-Jordan Mixed Armistice Commission, remained in effect until the Six-Day War (1967), when Shechem came under Israeli rule. In the same year the obligation of Samaritans in Israel to serve in the Israel Defense Forces was officially recognized, although Samaritans had been serving in the IDF since its establishment. In 1954 all the Samaritans scattered throughout the State of Israel relocated in permanent living quarters in Holon, and a unified Samaritan center was created in Israel. In 1963 President Ben-Zvi dedicated the first Samaritan synagogue in Israel.

The center in Shechem continued to exist in complete isolation under Jordanian rule. During the 19 years of Jordanian administration of the area, the Samaritans enjoyed the toleration and even support of the government. On the other hand, this sympathetic attitude also led to blind hatred of the Samaritans on the part of the Muslim inhabitants of Shechem, and every Arab demonstration in Shechem against Hashemite rule found its way into the small Samaritan quarter. Under the leadership of the high priests Abishua b. Phinehas (1941–60) and Amram b. Isaac (1960–1980), however, the Samaritans

were able to find a middle road between these two forces. The Six-Day War ended the isolation of the two branches of the Samaritan community.

By 1977 the Samaritan population of Israel, including both Shechem and Holon, had risen to 500, a level that was maintained into the 21st century. A study undertaken by the Samaritan journal *A.B.* in 1977 revealed that the community had been transformed from an aging and dwindling one, numbering only 150 at the end of the 1920s, to the youngest community in the world, 21% being within the age group 1–10 and the same percentage in the age group 11–20; the disproportion between the ratio of females to males is, however, 5:3. The average number of marriages per year increased from 1.23 between 1910 and 1948 to 4.53 during 1967–1974. The attempts of the four clans of the Samaritans, Kohen, Tsedaka, Danfi and Marchiv, to keep their females within their clans was causing genetic problems arising from interbreeding. A study undertaken by an anthropologist, Dr. Joseph Ginat, in 1975 revealed that 58% of the 128 marriages contracted between 1910 and 1974 were within the same clan, and in the same year Dr. Bat-Sheva Bonne, the head of the faculty of genetics of Tel Aviv University, pointed to the frequency of color blindness and to the considerable number who are in need of genetic guidance before marriage in order to avoid the birth of physically handicapped children. The percentage of marriages with Jewesses had increased to 5%.

[Benyamim Tsedaka]

Statistics

An inscription from the period of Sargon II describing the destruction of Samaria tells that 27,290 Samaritans were exiled (721 B.C.E.). It is clear, however, that this number is only a minority of the inhabitants of the northern Kingdom of Israel, which, in the days of Menahem b. Gadi (743 B.C.E.), numbered 60,000 landowners who each paid 50 shekels tax to Tiglath-Pileser III (II Kings 15:19–20). It can therefore be assumed that the Israelite majority, which included an alien minority that was brought by the Assyrian kings, numbered more than 100,000 people at the beginning of the seventh century B.C.E. This community developed and spread into the Assyrian provinces in the center of the country. It is possible to learn of the large number of Samaritans during the period from the expansion of their settlement from Samaria into Gaza and Egypt in the south, and Beth-Shean, Acre, and Sidon in the north.

Clearer figures are known for the first centuries of the Common Era. In the three uprisings against the Byzantines (484, 529, and 579), the Samaritans lost tens of thousands of soldiers. In the largest uprising (in 529), which was a reaction to the Justinian persecutions, the Samaritans lost 100,000 soldiers, according to Procopius, or 20,000, according to the version of Malalas. Theophanes and Malalas related that the Samaritans sent emissaries to the king of Persia suggesting that he conquer the country from the Byzantines and agreeing to place 50,000 Samaritans and Jews at his disposal for this purpose. These sources imply that there were hundreds

of thousands of Samaritans in the country. The decisive decrease in this number was a result of the frequent uprisings against the Byzantines.

The massacre of Samaritans continued even after the collapse of Byzantine rule. Tens of thousands were massacred or taken captive at the time of the Arab conquest, which led to the flight of the Samaritans eastward. In 1163 *Benjamin of Tudela found some 1,000 Samaritans outside of Shechem. It is therefore possible to surmise that the total Samaritan population of the country was about 2,000. The Arab writers a-Bīrūnī (1048), Idrīsī (1173), Yāqūt al-Ḥamawī (1125), al-Dimashqī (1300), and others relate that there was a large number of Samaritans in Shechem, and some of them estimated the population at more than 1,000.

In 1480 Meshullam of Volterra found 50 Samaritan clans in Egypt and 700 other Samaritans outside Shechem. According to the testimony of all the above-mentioned writers, and if one takes into account that the census was restricted to adults only, it can be assumed that in Palestine alone there were 5,000–6,000 Samaritans before the beginning of Mamluk rule, and 2,000–2,500 remained by the beginning of Ottoman rule.

The *Defters* (land records of Palestine kept in Constantinople which were published by Bernard Lewis) determined that in 1525–26 there were 25 Samaritan families in Gaza; in 1533 there were 15 families in Gaza and 29 in Shechem; and in 1548 there were 18 families in Gaza and 34 in Shechem. The high priest Shalma b. Tabia notes in his letter to Europe in 1820 that “we number less than 500 souls,” and even then he was exaggerating the size of the Samaritan population, which stood at less than 200 people, as Shechem was the only center that remained. According to a letter of the British consul James Finn in 1851, there were 35 tax-paying Samaritans in Shechem, a fact which raises the number of Samaritans to over 150. The traveler M.E. Rogers related, on the basis of testimony from the high priest Amram b. Shalma, that in 1855–59 there were 196 Samaritans in Shechem. According to the census of the British consulate, there were 160 Samaritans in 1881; 196 in 1902; and 162 in 1904. M. Gaster counted 103 in 1905, and P. Kahle 173 in 1909.

With the end of Ottoman rule, a total of 146 Samaritans remained in Shechem, but suddenly their numbers began to grow. One of the causes for this was marriages to Jewish women, so that in 1934 the community numbered 206 (according to the testimony of the high priest published in that year). In 1948 there were 58 Samaritans in the State of Israel and 250 in Shechem. As a result of the unification of families (from Shechem to Ḥolon), in 1954 there were 87 in the State of Israel and 200 in Shechem; in 1963 there were 350 Samaritans in all, and in 1970 there were 430. In 2005 the two communities numbered around 500.

[Benyamim Tsedaka]

RELIGION AND CUSTOMS

The sources of knowledge of the Samaritan religion are the Samaritan Pentateuch and Targum, *Memar Markah*, the lit-

urgy, and various expositions of law and commentaries on the books of the Pentateuch (see Language and Literature). Aside from the Pentateuch, the sources span a period of about 1,400 years. In terms of religious development these may be divided into three broad periods: (1) from the completion of the Pentateuch (date uncertain) to the Roman period, the period of formulation; (2) the third to fourth centuries C.E., the period of consolidation; (3) the 13th–14th centuries, the period of expansion. Religious writing in other centuries, though important in several respects, did not radically change the general nature of Samaritan religion.

It is likely that the Samaritan creed in its earliest form was a simple statement of belief in God and in the Pentateuch. Belief in Moses as the sole prophet of God, so prominent a feature of Samaritanism, probably developed long before the Roman conquest of Palestine, and almost certainly belief in Mt. Gerizim as the one true sanctuary chosen by Israel's God was well established before Alexander the Great (witness the large sacred area on Mt. Gerizim dated to his time). Belief in the resurrection, which is stated in many of the religious writings, certainly was in existence before the fourth century C.E., as it is to be found, but in a less developed form, in *Memar Markah*. As basis for this belief the Samaritan exegetes of all periods provide the “proof-text,” Gen. 3:19 (see below), but it seems certain that such “proof-texts” were pegs on which to hang beliefs that came into Samaritan religion at a later time. Belief in the *taheb*, i.e., restorer (or according to some “returner”), as one who would restore all things prior to the last day, the cataclysm, the judgment, and finally paradise, is undoubtedly the latest of the creedal tenets. This tenet probably took hold in Samaritan soil during the time of religious ferment in Palestine around the destruction of Jerusalem in 70 C.E.

The doctrine of God is clear, simple, and mainly biblical. The absolute oneness of God is expressed on every hand. He is wholly “other” in substance and essence, present in all things, all-powerful, without peer, and beyond attribution. His purposes for mankind, especially Israel, were once and for all communicated to the world through Moses. The six beliefs can only be understood in terms of Moses. He was God's “Man,” “the son of His house (= world),” almost His vice regent on earth; he it was who “wrote” the five books of the Pentateuch; it was he who authorized Mt. Gerizim as “the place which God chose” (not “will choose” as in Deut. 12:5 in the MT). There is some uncertainty about how Moses came to be associated with the *taheb*. It is in the didactic hymns of the 13th–14th-century part of the liturgy (many of which are to be found in manuscripts in various libraries, but see the long festival hymns in Cowley, *The Samaritan Liturgy*, vol. 2) that Moses is associated with the resurrection and judgment and with the restorer. Samaritan religious development did not quite formalize this association in the way that the other tenets were formalized, but in general it may be said that Samaritanism attributes to Moses every word and action, both for this world and beyond, which relates to the divine will for mankind.

The problem of belief in the resurrection in sectarian Samaritanism is fraught with difficulties. *Dositheanism may or may not have been one large sect. It may have comprised two or more sects stemming from an initial "heresy." Whether or not Dositheanism as a whole, or originally, believed in the resurrection as distinct from the priestly authority, there is no lack of evidence in the mainstream of Samaritan religious writing for such a belief. It is hardly likely that all such literature is "heretical."

The best view of essential Samaritan religion may be gained from a study of what the religious literature claims about Moses in relation to God and Israel. "Lord of all worlds," "the word of living truth," Moses is preeminent in all things; as the word in creation, the light shining on and in men, men's intercessor before God, lawgiver, teacher, priest, savior. All these and many other attributes, which are commonplace from the *Memar Markah* onward, indicate how far Samaritanism is "Mosaism." Almost a christological position is reached when Markah writes: "He who believes in him [= Moses] believes in his Lord" (*Memar Markah*, 4:7). Gnostic elements are prominent in the religious literature. These are elements found in common with the early Jewish and Christian literatures, but their influence on Samaritanism is often terminological rather than doctrinal. However, the emphasis on Moses as the word and the light seems to be best explained by reference to Gnosticism.

A typical Samaritan feature is the prominence of their priesthood in the life of the community. The priests are the interpreters of the law and the keepers of the secret of the calendar, upon which the true observation of their festivals depends. The famous *Baba Rabbah was the firstborn of a high priest.

Since the Samaritans possessed only the Pentateuch as against the threefold Bible of Judaism and had no codified second law corresponding to the Mishnah, the outlines of their beliefs were easier to delineate. Moses was "the prophet" to the Samaritans, and Joshua alone of all the other biblical prophets is held in high esteem, even called king, because he is mentioned in the Pentateuch as the servant of Moses, who was initiated by him to fill his place. This last remark gives the clue to the development of Samaritan doctrine, namely that no concept which had no warrant in the Pentateuch could be regarded as valid. So the resurrection doctrine is bound up with the Samaritan text of Gen. 3:19, "to your dust you shall return." There are many instances of Samaritan and masoretic textual disagreements, mostly insignificant, but a few are of the significance of the example just quoted, where a doctrine is at stake. The Ten Commandments of the masoretic Bible are regarded as nine by the Samaritans, who have a tenth of their own (of considerable length) stipulating the prime sanctity of Mt. Gerizim.

Some of the differentiae of Samaritan and Judaic religion are explained in this way. Other doctrines developed during certain eras, such as the belief in the judgment day. Belief in a day of vengeance and recompense, as it is called, could well

have sprung from or given rise to Deuteronomy 32:35, where the Samaritan text reads "on the day of" against the masoretic text's "mine," a difference of two Hebrew letters.

Most of the beliefs about paradise are set in Islamic-type terms, and no doubt many details of the pictures of "the garden" were supplied during the long Islamic period, but as early as the *Memar Markah* there is sufficient evidence of such beliefs. The parallelism with early Jewish and Christian teachings on the subject is often striking, but not surprising if one takes into account the influence of Gnosticism on them.

There is no sign in Samaritan writings of the religious malpractices of which the Samaritan syncretists were condemned in 11 Kings 17:29ff.; indeed, the religion which emerges from the sources is remarkably pure and free from pagan influences. There is no indication anywhere of dove worship (R. Nahman ben Isaac, Hul. 6a) or the adoration of a "god" called Ashima (Ibn Ezra, introduction, *Commentary on Esther*). This last accusation was based on a misunderstanding, as Ibn Ezra was not cognizant of the Samaritan usage to evade pronunciation of the Tetragrammaton by applying a surname "*Shema*" or "*Ashema*" instead (like *ha-Shem* in Jewish religious practice).

On the practical side of religion, the Samaritans have developed their code of religious practice by direct interpretation of biblical laws. A *halakhah* came into being, though not in the same way as in Judaism. It often differs from the rabbinical *halakhah* by its stricter adherence to the letter of the law, as in the laws of Sabbath and festivals or marriage between close relatives. In other cases it is based on different interpretation, as in the law concerning the levirate marriage (Deut. 25:5-10) or fixing the date of Pentecost, etc. There was no systematic codification of the law, and the few extant Samaritan halakhic compendia are arranged very loosely. Jewish, Karaite and Rabbanite, influence on their legal literature is evident in *Kitāb al-Mirāth* ("Book of Inheritance"), probably belonging to the 12th century C.E., and in the classification of the 613 commandments of the Pentateuch. Mention of the number 613 is found even earlier in *Kitāb al-Kāfi* (1042 C.E.), but a systematic enumeration and classification is found first in a liturgical poem by Aaron b. Manir of the 13th-14th century. His system shows striking dependence upon that of Maimonides. These influences are not surprising, as large Samaritan communities in Damascus and Cairo lived close to Jews, Rabbanites and Karaites.

Continuation of the festivals prescribed in the Torah was contingent on the political circumstances of the times, but throughout the vicissitudes of all these, the celebration of the Passover according to the strict regulations of the Torah was and is continued, whenever possible on Mt. Gerizim itself. Two other festivals, Pentecost and Tabernacles, were like Passover, regarded as pilgrimages, according to the Pentateuch (Ex. 23:17; 34:24; Lev. 23; Deut. 16), and to this day these pilgrimages are carried out as such (see M. Gaster, *The Samaritans*, pp. 168, 178 for details).

[John Macdonald]

Holidays and Festivals

THE SABBATH. The seventh day of the week serves as the basic rite for all Samaritan holidays and festivals. On the Sabbath the Samaritans hold four prayers. The first, which is held on the Sabbath eve, lasts for about an hour until the setting of the sun. The second is the Sabbath morning service, which begins, on regular Sabbaths, between three and four o'clock. The third is the afternoon prayer, which is held only on regular Sabbaths and those that fall during the counting of the Omer; it begins at noon and continues for about two hours. The fourth prayer is held at the end of the Sabbath and continues for about half an hour until the setting of the sun.

On Sabbaths and holidays the Samaritans dress in special clothing consisting of a long-sleeved, striped robe. During the prayers a long-sleeved white *tallit* made out of simple cloth is worn over the robe. The Samaritan synagogue is always oriented toward Mt. Gerizim. The worshipers stand on rugs spread out on the floor, and before one enters the synagogue he must remove his shoes. In addition, the worshipers must have a head covering while praying. The portion of the week is read at home by the head of the family, after the service, from *siddurim*.

The Samaritans do not light fires on the Sabbath or travel. They eat hot meals prepared beforehand only on the Sabbath eve, when they also kindle the lights that will remain on throughout the Sabbath; neither do they leave the vicinity of their community. The priests wear white miters on the Sabbath, to distinguish from the red ones worn during the week. They also lead the services and religious rites and open the reading of the weekly portion.

THE FESTIVALS. The Samaritans celebrate seven *mo'adim*, four of which are called *mo'adim* and three *ḥaggim*. The *ḥaggim* are the pilgrimages ordered in the Torah, e.g., Ex. 23:14–19. This special designation seems to have arisen under the influence of the Arabic *hajj*, which means “pilgrimage.” The first *mo'ed* is Passover, which falls on the 15th day of the first month. On the eve of the festival, the Samaritans carry out the ceremony of the sacrifice on Mt. Gerizim. The second *mo'ed* is the Festival of the Seventh Month, which is celebrated on the first day of the seventh month and is parallel to the Jewish holiday of Rosh Ha-Shanah, except that it is celebrated for one day only. The third *mo'ed* is the Day of Atonement, which is celebrated on the tenth day of the seventh month from evening to evening. The fourth *mo'ed* is Shemini Azeret, which is celebrated on the 22nd day of the seventh month.

The first *ḥag* is Ḥag ha-Mazzot (“Feast of Unleavened Bread”), which is celebrated on the 21st day of the first month. The Samaritans make a pilgrimage to the top of Mt. Gerizim for the first time (in their cycle of *ḥaggim*). The second *ḥag* is the Festival of the Pentecost, which takes place on the day after the seventh Sabbath counted from the first Sabbath following Passover. As a result, it is traditional to celebrate this holiday on a Sunday. At this time the Samaritans make a pil-

grimage for the second time. The third *ḥag* is Sukkot, which takes place on the 15th day of the seventh month, and the Samaritans make their third pilgrimage of the annual cycle. The Samaritans do not celebrate Purim or Ḥanukkah, because these holidays are not mentioned in the Pentateuch and were declared after the split between the Samaritans and the Jews. On the other hand, they celebrate the Independence Day of the State of Israel.

It should be noted that the Jews and the Samaritans rarely celebrate their holidays and festivals on the same days, as the determination of the beginning of the month and the intercalation of the years are made according to different calendar systems. Therefore, the differences of time between the Jewish and Samaritan holidays sometimes reach an entire month.

Passover. Passover is the time when the Samaritans celebrate the sacrifice of the paschal lamb on Mt. Gerizim. The ceremony is held 800 meters from the summit of the mountain, near the Samaritan center of 70 homes. At twilight on the 14th day of the first month all the members of the community gather at the site of the altar in two groups: the first carries out the sacrifice and the second, composed of community dignitaries and priests, participate in prayer. The high priest climbs upon a large stone and gives the signal to prepare to slaughter the sheep, while reading the story of the Exodus from Egypt (beginning with Exodus 12). The Samaritans have brought to the spot a number of sheep, corresponding to the number of families in the community, and, following the order of the high priest, the sheep are slaughtered as the congregation raises its voice in prayer. Immediately after the *kashrut* of the slaughter has been checked, the wool of the sheep is plucked with the aid of boiling water from two barrels placed upon the altar. Afterward, the sheep are hung from hooks and their intestines are cleaned and burned on the altar (together with those parts which are forbidden as food, according to the Samaritan Pentateuch).

At the end of cleaning and rinsing, the sheep are salted and laid aside for two hours, until the blood is absorbed by the salt. At about eight o'clock in the evening the sheep are carried on spits and placed into ovens for more than six hours. These ovens are dug into the earth and are sealed by means of shrubs and wet earth. At midnight the Samaritans return with bowls, open the ovens, remove the sheep, and divide the meat into the bowls. Each family takes its portion home, where it quickly eats the sacrifice together with *mazzot* and bitter herbs; any remains are returned to the altar and burned. Throughout the entire ceremony, the Samaritans continually sing, pray, and retell the story of the Exodus.

Festival of Pentecost (Shavuot). On this festival, as on Ḥag ha-Mazzot, the Samaritans make a pilgrimage to Mt. Gerizim. The holiday is celebrated on the 50th day of *sefirat ha-Omer*, which is on a Sunday. The Samaritans divide the period of the *sefirah* into seven weeks, and on each of the Sabbaths

during the period they devote the service to one of the seven stations the Children of Israel passed on their Exodus from Egypt until they arrived at Mt. Sinai: the (Red) Sea (Exodus 14:26–15:21); the second Sabbath is called *Shabbat Marah* (Exodus 15:22–26); the third Sabbath is called *Shabbat Elim* (Exodus 15:27–16:3); the fourth Sabbath is *Shabbat ha-Man* (Ex. 16:4–36); the fifth is *Shabbat ha-Zur ba-Horev* (Ex. 17:1–7); and the seventh *Shabbat Amalek* (Ex. 17:8–17).

On the fourth day after the sixth Sabbath of *sefirat ha-Omer*, the Samaritans celebrate the day of standing at Mt. Sinai. According to their tradition, the Pentateuch was given to the Children of Israel from above Mt. Sinai on this day. They pray and read from the Pentateuch from the middle of the night until the following evening. The seventh Sabbath during *sefirat ha-Omer*, the 49th day of the period, is called the Sabbath of the Ten Commandments (Ex. 19:120:14).

The pilgrimage on the Festival of Pentecost begins early in the morning, and during the processional all the places holy to the Samaritans that are situated on the peak are visited: Givat Olam, on which Moses' tabernacle stood; Isaac's altar, the spot where Abraham bound his son; and the site of the 12 rocks that Joshua placed before erecting Moses' tabernacle, according to Samaritan tradition.

The Festival of the Seventh Month. The Samaritan calendar begins with this festival each year, and it is the beginning of the Days of Awe for the Samaritans. The festival is celebrated one day only, the first day of the seventh month. At the close of this day begin the prayers of the Ten Days of Repentance each evening and each morning until the Day of Atonement.

Day of Atonement. This holiday begins during the late afternoon and the fast continues for 25–26 hours of prayer and continuous reading of the Pentateuch and *piyyutim*. Every member of the community over the age of one year must fast.

Sukkot and Shemini Azeret. On the eve of Sukkot, the Samaritans place palm branches on the net roof of the *sukkah*, put interwoven twigs on the palm branches, hang citrus fruit on string from the net roof of the *sukkah*, and hang willow branches from the roof, which is supported by four poles. The *sukkah* is erected inside the house. The Arab riots that plagued the Samaritans during various periods forced them to build their *sukkot* in their houses, and over hundreds of years this has become a tradition. The eve of Sukkot is devoted to building the *sukkah*, and on the morning of the holiday the Samaritans make the third pilgrimage to the top of Mt. Gerizim.

The periods are of *hol ha-mo'ed* Sukkot and also of Passover are devoted to special prayers each morning and evening. The Samaritans sit in the *sukkah* but do not sleep there.

Shemini Azeret begins on the 22nd day of the seventh month and is also called Simḥat Torah. After prayers, which begin shortly after midnight and continue for more than ten hours, like the prayers of all holidays and festivals, the priest

carries the Torah around the synagogue for one round, while the worshippers clap hands.

Religious Ceremonies

CIRCUMCISION. The Samaritans are obligated to circumcise their sons at the age of eight days, for any male who is not circumcised eight days after birth is not considered an "Israel Samaritan" (Genesis 17:14). Because of the limited number of Samaritans who can perform the circumcision ceremony, this act has been handed over to non-Samaritans. The high priest officiates at the circumcision ceremony, which must take place immediately after morning prayers, at dawn. At the end of the ceremony, the high priest gives his blessing by reciting a poem on the subject ascribed to Markah (fourth century). The father of the infant then honors his guests and pays the high priest.

THE LAWS OF RITUAL IMPURITY AND PURITY. These laws are completely binding within the Samaritan community. During her menstrual period, for seven days, the woman is obliged to remain separated from her family, who must wait upon her and supply all her needs. She is forbidden to touch any household vessels, and anything upon which she sits must be rinsed with water. On the seventh day she bathes in water and becomes clean at sundown. A man who has had a nocturnal emission must wash his body in water and is unclean until nightfall. He sits during prayers in a special place outside the worshippers' hall, is forbidden to raise his voice, and is forbidden to touch holy articles until evening comes. A woman giving birth to a son is unclean for 40 days, and if the child is a daughter she is unclean for 80 days, after which she purifies herself (Lev. 12 and 15). The redemption of the circumcised firstborn son takes place only after the mother is cleansed of impurity of her childbirth. The high priest collects the redemption money.

COMPLETION OF THE TORAH. The completion of the Torah sets the official seal upon the beginning of the Samaritan's way of life in his tradition. In content it is reminiscent of the Jewish *bar mitzvah ceremony, but the difference is fundamental. The Jewish bar mitzvah takes place at the age of 13, while the Samaritan's bar mitzvah is dependent upon his education and ability. Only after he has learned the whole Pentateuch can the ceremony of completing the Pentateuch be arranged for a boy by his father. At the age of four or five, the father takes his son or daughter to the *hakham* (scholar) of the community, or to one of the priests, to have them taught Samaritan traditions and the principles of their faith. In an emergency, the father himself teaches his children. The child reads the Pentateuch in the ancient Hebrew script and in the special Samaritan pronunciation, as transmitted from generation to generation, and also learns writing. Able children complete the reading of the Pentateuch at the age of six, but some take as long as until the age of ten. On completing the reading, the child learns the blessing of Moses (Deut. 33–34) by heart. The father gathers all the Samaritans to the place of the rejoicing and the high priest

gives the signal. The child, standing in the center upon a high chair, clothed in his best outfit, recites the blessing of Moses, following it by a speech (by heart) prepared for him by his teacher. He then descends from the chair, kisses the hands of the priests and other dignitaries, and receives gifts from them. He is now regarded as one of the quorum needed for community prayers. On the following Sabbath after the prayers he reads a portion of the Pentateuch immediately after the high priest. The Samaritans are then invited to a feast prepared by the parents of the child. The ceremony takes place to the accompaniment of liturgical hymns and poems written by Samaritan **paytanim* of all eras.

KIDDUSHIN. The proposal is the first of three stages in Samaritan marriage: *kiddushin*, *erusin*, *nissu'in*. They express the status of the girl in family life. When a Samaritan girl is certain of her choice, she urges him to request his parents to ask her parents for her hand. Occasionally, when a young man is in love he may request his parents to approach the girl's parents even without telling her of it. On being asked, the girl's parents reply: "We will call the damsel and inquire at her mouth" (Gen. 24:57). The girl's wish is now tested. If she desires the man, though her parents are opposed, she may reply affirmatively. She then appoints a guardian to perform the *erusin* (betrothal) ceremony on her behalf. The *kiddushin* ceremony takes place in the girl's home, and even a minor priest can sustain the bond and bless it by "recital of the *Shema*" and similar verses from the Pentateuch. The breaking of the *kiddushin* does not require divorce. Whenever conditions do not permit the continuation of the attachment, the man informs the girl's parents of it in writing or by word of mouth, and he is not liable for damages.

ERUSIN. The betrothal usually takes place a short time after the *kiddushin*. Release from *erusin* requires a divorce. The girl is herself not present, but her representative, her father or her uncle, or, in the event of her father not consenting to the betrothal, the guardian, sits opposite the young man. They clasp right hands together as a sign of the bond. The high priest sitting opposite, places his right hand upon their clasped hands and pronounces the *erusin* blessings over the bond. The high priest then receives a tied handkerchief containing six silver shekels from the young man and hands them to the girl's representative as a symbol of the dowry. When the priest finishes reading, "It is not good that the man should be alone; I will make him a helpmeet for him" (Gen. 2:18–25), the fiancé kisses the hand of the priest and of the notables. The fiancé and his fiancé are now regarded as husband and wife.

NISSU'IN. Marriage is the final stage, the formal act whose purpose is to complete the betrothal. Rejoicing on these occasions is greater than at any joyful Samaritan ceremony. The bridegroom's family proclaims a week of rejoicing to begin the Sabbath before the wedding. This is called the *Shabbat ha-Petiḥah* ("the Opening Sabbath" of the rejoicing). On this Sabbath the weekly portion of the law is read in the house of

the groom's father. When the afternoon service is completed, the groom's relatives walk in procession from house to house and invite the guests to take part in the week of rejoicing. On the termination of the Sabbath, the men have a great feast in the house of the groom's father and sing wedding songs. The father of the groom bestows gifts upon the honored guests. On Sunday evening the women arrange their feast in the house of the bride's mother and they, too, indulge in much singing and music. On Monday evening one of the groom's relatives invites the men to a feast prepared in his house, and they again indulge in hymn singing and praises. In the center of the party sit the men, who sing, verse by verse, the account of Rebekah's marriage to Isaac (Gen. 24), each man taking a turn, with the bridegroom completing the reading. The evening of the third day is called "the red night," the night of the rejoicing of the bride. She is clothed in red garments symbolizing the purity of her virginity. The women prepare a splendid feast for her, the high point of which is the dance of the bridegroom's mother holding a parcel decorated with flowers containing the garments of the groom. The wedding takes place on the fourth day when the luminaries, symbolized by the bridegroom and bride, were created. During the day the bridegroom takes a piece of parchment to one of the scholars among the priests and asks him to write the marriage contract (*ketubbah*). He also rewards him for his trouble. In the evening the men assemble in the house of the groom, where they partake of the marriage feast. Afterward the groom's father invites the high priest to the place of rejoicing where the marriage is to take place. The high priest, the bridegroom, and the guests await the coming of the bride. She is accompanied by her relatives, who sing the Song of the Red Sea (the song of the prophetess Miriam) to the music of tambourines and with dancing. On the bride's arrival the priests break out in poetic song and marriage psalms. When the singing is finished, the groom rises, hands the marriage contract to the high priest, and kisses his right hand. The priest reads it slowly, and then details the virtues and rank of the families of the bridegroom and bride and the conditions upon which their marriage is taking place. When the reading ends the contract is handed to the bride's representative, her father, uncle, or guardian, for safekeeping. The groom kisses the hands of the high priest, gives him his fee and receives a wedding gift from him. The groom then turns to the bride, lifts the veil from her head, kisses her, and places a ring upon the finger of her right or left hand (a new custom). Sometimes they strengthen the bond by both drinking wine from the same cup (there is no canopy or breaking of a glass). During the following Sabbath prayers, songs signifying the joy of marriage are added. These are sung by the priest except when the groom is of a priestly family, in which case a lay Samaritan sings them. The groom reads the weekly portion of the law. The meal that takes place after the reading of the portion concludes the week of marriage.

INTERMARRIAGE. Samaritan *halakhah* permits intermarriage with the Jewish community on authorization by the

high priest, after he is convinced that the convert will be fit to bear the brunt of observing Samaritan tradition. The attitude of the Samaritans toward Jews is expressed as: the Jews are children of the Jewish people who have deviated from the right path but will return to it “on the day of vengeance and recompense.” A Samaritan may marry a Jewess only if she declares herself ready to observe Samaritan tradition. In such cases the Jewess lives in the bridegroom’s house for at least six months and learns the customs of the community. The high priest tests her knowledge of what is required of her and only then gives his authorization. A Samaritan girl can be married to a Jew only if he declares his willingness to become a Samaritan.

Such marriages, which Samaritans regard as a sign of a renewed tie between the two sectors of Israel – the Samaritan and the Jewish – are recognized by the Ministry of the Interior, and the marriage certificates are official forms of the ministry, which recognizes the high priest’s right to register the marriage. Up to 1970 six such cases had occurred, and in each case Samaritan men married Jewesses. The first case took place in 1923 and the last in 1969, despite the opposition in all cases of the Jewish chief rabbinate, which is not recognized by the Samaritan high priesthood.

DIVORCE. Divorce is very rare in the Samaritan community. In the 20th century, up to 1970, only three cases had taken place, the last being in 1962. Divorce releases from betrothal or marriage. Three causes are recognized by Samaritan *halakhah*:

- (1) abominable practices committed by either party, or by both together;
- (2) quarreling that makes the life of either party unbearable;
- (3) immorality, i.e., rumors or proofs that either party maintains extramarital relations. In each case the cause must be confirmed by two or three witnesses. The high priest imposes upon the applicants a period for appeasement of at least a year, and when all efforts have failed, the man and woman go to the house of the high priest together with a limited number of their relatives. The high priest reads the bill of divorce in the hearing of the couple, tears the marriage contract, and removes the rings from their fingers. The divorced woman may not remarry her husband if either she or he marries another after the divorce. The guilty party must pay damages, as fixed by the high priest.

MOURNING. Samaritans bury their dead in their cemetery on Mount Gerizim. They place the corpse in a coffin with its head pointing in the direction opposite to the peak of Mt. Gerizim in order that his face should be toward the mountain. After the death, they read the Pentateuch all night long. On next morning they wash the corpse. Anyone touching it becomes unclean and is obliged to bathe. They place the body in the coffin and carry it to the cemetery. The high priest eulogizes the person but does not make himself ritually unclean by touching the body (Lev. 21:10–15). When the party returns from

the burial, a family unrelated to the dead invites those who were at the funeral to a meal of comfort. Samaritans mourn their dead seven days, as did Joseph his father. They do not stay indoors seven days as do Jews, but satisfy themselves by visiting the grave and delivering memorial addresses every morning and evening. On the seventh day the mourning is over. At the end of 30 days the relatives of the dead invite the Samaritans to a memorial meal, and this officially concludes the mourning ceremonies. They display no external signs of mourning for the dead (Deut. 14:1), they tear no garment nor do they place earth upon the head. On the Sabbath the whole of the Pentateuch is read in the home of the relatives of the dead. This is repeated daily in order to purify the soul of the deceased. For a year after the death, no festivity takes place in the house of the deceased. At the recital of the *piyyutim* of the festivals, special stanzas are said in his memory. On each festival, when the prayers are finished, the high priest recites **Kaddish* for the exaltation of souls of all “the community of Israel who prostrate themselves before the holiest of mountains, Mt. Gerizim.”

[Benyamim Tsedaka]

SAMARITAN CHRONOLOGY

No extant Samaritan work explains the Samaritan chronology, and the facts relating to this topic must therefore be gleaned from their writings.

The Samaritan Calendar

Based on a lunisolar system, the Samaritan calendar year (lunar year) has 354 days, divided into 12 months of 29 or 30 days each. The first day of the month is fixed by the conjunction (*zimmūt* or *kibbuẓ*) of the moon with the sun (not by the appearance of the new moon). If the conjunction occurs at night or in the morning, not later than six hours before noon, that day is considered the first of the new month, which has 30 days; if it occurs later, the first of the new month is counted from the following and the month has 29 days. The civil year and the counting of the *shemittot* begin in the seventh month, Tishri; the religious year begins in Nisan (in their present-day calendars and in their astronomical tables the Samaritans count the *shemittot* from Nisan). In accordance with the Pentateuch, the months had no special names, but were counted as the first, the second, etc., starting with the month of Aviv (Ex. 12:2; Deut 16:1). This system is still practiced. In their historical and halakhic writings, however, one also encounters the later, non-pentateuchal names of Nisan, etc.

In the Pentateuch, Nisan is called “the month of Aviv” (Deut. 16:1), which is explained as the “month of ears of corn,” when the barleycorn begins to ripen. This description means that Nisan must always occur in the same season, which is impossible in a strict lunar year. Therefore, the Samaritans (like the Jews) had to bind their lunar year to a solar year and thus arrived at a lunisolar year. This solar year is a mixture of the Persian and the older Julian (or Syrian) year, as evident from the Samaritans’ astronomical tables. It has 365¼ days. In order to keep the lunar months in the solar seasons, it was

necessary to intercalate one month in each second or third year, seven times in the 19-year moon cycle. In contradistinction to the Jewish calendar, the Samaritan leap years are not bound to a fixed year in this cycle but are decided upon according to need. The intercalated month comes before Nisan. The Samaritan rule for intercalating is as follows: they calculate whether the conjunction of the first month will occur before or after the 12th of Adar (one of the Syrian solar months; March of the Julian calendar). In the latter case, the day of the conjunction is fixed as the first of Nisan; if it occurred on or before the 12th of Adar, the month is intercalated and the new year is a leap year.

The religious duty of intercalation is alluded to in the poems of the fourth-century Samaritan writers Amram Darah, and Markah: "...He [God] gave them feasts that do not shift and bound their names to the [celestial] lights" (Darah, Song 16, Ben-Hayyim, III. 2 p. 74). According to Samaritan tradition, the calendar was always based on calculation, not on observation of the new moon. This system, much venerated by them, is called *Heshbān Kishtah* (True Reckoning) or *Maḥshav Ayyamim* (Reckoning of the Days). The oldest description of it is found in the *Abu-al-Ḥasan of Tyre's compendium of law, *al-Ṭabbākh* (11th century), in which he explains why the Samaritan rite of fixing the first of each month according to the conjunction is the only way of arriving at the true beginning of the new month, as the conjunction signifies a real new occurrence each month, whereas the new moon differs only in degree from its later phases during the month.

A detailed account is given in the *Tolidah* (earliest part, 12th century). The origin of this "True Reckoning" is there attributed to Adam, who received the system from God through the angels and from whom it was passed on to Shem, Eber, Noah, Abraham, Isaac, Jacob, and finally Moses, who fixed the month of Nisan as the first month of spring and who taught the system to Phinehas, Aaron's grandson. When the Israelites entered the Promised Land, Phinehas applied this reckoning to the latitude of Mt. Gerizim. This passage explaining the principles of his system is written in Aramaic, showing that it was composed when this language was still used by Samaritan scholars, i.e., around the tenth century. The fixation of this date for the existence of the Samaritan calendar, more or less in its present form, can be corroborated by the external evidence of the tenth-century Karaite scholar Kirkisānī, who polemized vehemently against the Samaritan system of fixing the first of the month by conjunction and reckoning, instead of by observation of the new moon. From Phinehas onward, the duty and privilege of fixing the calendar remained a heritage of the family of high priests. To this day, they issue the calendar twice a year (in the months of Av and Shevat). It is binding on the entire community, and each of its male members is obliged to buy a copy. The principles underlying its calculation are a secret of the family.

At the end of the 16th century, when European scholars came in contact with the Samaritans, they were interested in learning the secret of the calendar, but their questions re-

mained unanswered. Finally, in 1831, S. de Sacy was able to obtain astronomical tables from Nablus and published a specimen, and in 1896 M. Heidenheim followed suit; however, neither could explain the use of the table to compute the calendar. That was accomplished in 1939 by E. Robertson (in BJRI), whose work was supplemented by A.A. Akavyah in 1950 (in *Melilah*), who translated Robertson's paper into Hebrew, annotating it, and adding a short article of his own. Thanks to the efforts of all these scholars, it has become possible to understand a great deal about the calculation of the Samaritan calendar. About 600 tables were composed by Murjān al-Danfī and his two sons, Muslim and Abdallah. They were calculated for 200 Muslim years (1101–1300 A.H. = 1689–1883 C.E.) and their copying was finished in 1712.

The specimen published by Robertson comprises the tables relating to 1101 A.H. They bear the caption: "The year 6128 [after Creation], 3328 [after the settlement of the Israelites in Canaan], the 21st in the [solar] cycle of 28 [years] and the 9th in the [lunar] cycle of 19 [years], excerpt for the Hebrew [= Samaritan] solar year 1058 according to the era of Jezdegerd." The inscription implies that the calculations are based on a solar year, which is counted according to the era of Jezdegerd, the last Persian king of the Sassanid dynasty, who lost his empire to the Arabs. The era, named after him, begins in 632 C.E., the year he ascended the throne. The Persian solar year differs from the older Julian one and was used by the Arabian scholars for their astronomical calculations, which reached greatest perfection in the eighth–ninth centuries. Together with the Arabic astronomical tables, the Samaritans adopted the counting of the solar years according to this era. They did not take over its exact system, however, but kept to the solar year of the older Julian calendar, which they had probably learned (like the Jews) from the Byzantines. This last fact allows the inference to be made that the Samaritan system of calculating the calendar was developed during the time of Byzantine rule and revised later by the advanced system of their Arab overlords.

An interesting feature in the tables is the designation of the Samaritan lunar months by their Muslim names, in addition to their old names, the first, second, etc; the two designations are still applied in their present-day calendar. However, as the Muslim year, being strictly lunar, revolves through all the seasons, there are permanent changes in the coincidence of the Muslim with the original Samaritan names.

Historical Chronology

In the Pentateuch, which is also regarded by the Samaritans as a historical book for Samaritans, no fixed date era is given as the starting point from which years are counted successively; instead, the time of a certain event is given in relation to one preceding or following it. Nonetheless, several eras are mentioned in the Samaritan chronicles and datings of their manuscripts. The main era, to which all the others are related, after the Creation of the World or from Adam, is based on the lifespan of each of the Patriarchs in the Pentateuch, from

Adam to the death of Moses, i.e., until the entry of the Israelites into Canaan. According to the Samaritan Pentateuch, this era extended for 2,794 years. The continuation of this calculation is founded on the lists of Samaritan high priests in their chronicles, especially the *Salsalah* and *Tolidah* (see below, Samaritan Language and Literature), and several other eras are mentioned. The Table: Beginning of Eras in Six Samaritan Chronicles, shows the beginning of some of the more important eras in six Samaritan chronicles.

The date of the entry into Canaan is identical in all six chronicles, except for a slight deviation of two years in the oldest, the *Asatir*. This conformity is a result of computations based upon figures mentioned in the Samaritan Pentateuch. From then on, one must rely on the other five Chronicles – one begun in the 12th century C.E., two from the 14th century, and two from the beginning of the 20th century. The date of the beginning of the divine disfavor is alike in all of them; it is reached by adding 260 years, the reign of six high priests, to the date of the entry into Canaan. The disappearance of the holy Tabernacle, which was the beginning of the divine disfavor, occurred one year before the death of Uzzi, the sixth high priest, when Eli b. Jafni usurped the functions of the high priest. The *Tolidah* and the chronicle from 1908 (edited partly by J. Mac-Donald) postpone this event to the year of Uzzi's death. There are wide discrepancies in dates given for the start of three of the last eras. One of the reasons for the differences is omissions or additions in the lists on which they are based.

Some scholars surmise that all the numbers in the Samaritan chronicles are founded on the theological concept that the world, in its present state, was meant to exist for 6,000 years – 3,000 years of divine favor (*Rahutah*) followed by 3,000 years of divine disfavor (*Fanutah*), after which the Messiah (*Taheb*) would appear, and return the holy Tabernacle and bring redemption and peace to all the world. The date 3054 after creation fits approximately into that theory as marking the end of the period of the divine favor. From then to the appearance of Alexander the Great, about 1,000 years elapsed, i.e., one third of the period of divine disfavor. The date

4600 A.C. for *Baba Rabbah places the salvation he brought his people in the middle of this period of hardship and distress. Another 500 years from then to the rise of Muhammad fix the end of the divine disfavor and the advent of the *Taheb* at around 1,000 years after Muhammad.

Like their Muslim surroundings, the Samaritans began to reckon their dates according to the Muslim era, which they denoted as according to the Kingdom of Ismā'īl, Ismā'īliyya (= of Ismā'īl) or Hijriyya (= of the Flight). The use of this era became dominant and even more widespread than the appellation “after the Creation,” which kept its place in the chronicles but served to a lesser degree for dating documents. All dated Samaritan inscriptions mentioned in *Sefer ha-Shomronim* are dated by the Muslim era only. Even in the Samaritan calendar, issued twice a year by the high priest, the dating is by the Muhammadan year, sometimes synchronized to other systems, in addition to the counting of the years of *shemittah*, probably the oldest Samaritan way of dating events by starting from a fixed point.

In the Pentateuch (Lev. 25:8ff.) the Children of Israel are ordered to count Sabbatical (*shemittah*) Years (every seventh year) and Jubilees (every 50th year) after their entry into Canaan. The Samaritan tradition understood this to mean that the first year of their entry into Canaan was a Sabbatical Year, as it was the seventh year after their arrival in Transjordan. The second redactor of the *Tolidah* states that he finished his work in the year 747 A.C., which was the fourth year of the fifth Sabbatical in the 61st Jubilee since the entry of the Israelites into Canaan, the 5778th year A.H. and the 714th of Jezdegerd. Synchronization of several eras was widespread in Muslim writings, its aim being to exclude dating errors by later copyists, after that the writer of the *Tolidah* proceeds to outline the Samaritan system of counting the Jubilees. The first is counted 50 years, after which 49 are added for each following till the end of the fifth (= 246 years). This total is doubled to get the 10th Jubilee (= 492 years). He proceeds in this fashion to the 40th Jubilee (= 1968 years). After that he skips to the 55th (= 2706 years). From then on he adds only one or two at a time until he comes to the 65th Jubilee (= 3196 years), which is more than

Beginning of Eras in Six Samaritan Chronicles

Advent of Muhammad. Era of the Flight				5047	4921	4893

* All the years in this table are counted After Creation of the World (A.C.).

four Jubilees after the time of the composition of that part of the *Tolidah* and ten years short of the year 6000 A.C., the time of the expected advent of the *Taheb*.

The antiquity of the system of counting according to Jubilees is borne out by the apocryphal Book of Jubilees (second century B.C.E.). It seems to have been used by the Samaritans throughout the ages, alongside younger and more convenient systems. Today they count only the Sabbatical Years, dispensing with the Jubilees. It remains, however, undecided whether this system or the Era of the Contracts was the oldest used by them. It is not known when the Samaritans started to count by their main era, i.e., after Creation, as their oldest extant manuscripts are from the 12th century. As example for its use at that time serves the colophon of one fragmentary manuscript of the Pentateuch: “[Written by]... son of Abraham son of Joseph Zarfataah in the year 5579 A.C., which is the year 544 A.H.” Dating by this system was common throughout the Byzantine Empire, in Christian and Jewish circles alike, for documents, tombstones, and manuscripts from the seventh century C.E., and the same probably applies to the Samaritans. The system is first known from fragments of a “Book of Kings,” whose author was Demetrius (third century B.C.E.), a Hellenic Jew from Alexandria. Byzantine sources from the seventh century cite fragments of Christian, Syrian, and Alexandrian chronologers from the third and fifth centuries C.E. who built their systems on the era “After the Creation of the World.” In Jewish sources, the system is first mentioned in the fifth century C.E. (Av. Zar. 9b). The length of this era differs in Jewish, Samaritan, and Christian tradition, being the longest in the Christian (5492 or 5501 years until the beginning of the Common Era) and the shortest in the Jewish (3761 years), the Samaritans occupying a position in between.

The colophon of the Samaritan chronicle completed in 1900 C.E. (ed. by Adler-Seligsohn) includes the era after Creation (6179 years), that from the Entry into Canaan (3385 years), the Common Era (1900 years), the Muslim era (1317 years), and mention of the Era of Diocletian (1616 years). The latter, also called Era of the Martyrs, was inaugurated in Alexandria in 284 C.E., the year Diocletian ascended the throne. Its importance lay in the introduction of the 19-year moon cycle, which enabled the Christian Church Fathers to calculate more exactly than by their former 8-year cycle the date of Easter, which must fall on a Sunday after the first full moon in the month of spring. The 19-year moon cycle is used by the Samaritans to the present, although it is not known when they began to employ it or when they first dated by the Diocletian era.

LANGUAGE AND LITERATURE

Language

Throughout their history the Samaritans have used four languages: Hebrew, Greek, Aramaic, and Arabic. Apart from the Pentateuch (see Samaritan *Pentateuch), Hebrew was retained as the language of liturgy, revived from the 14th century on. This later Hebrew was mixed with Aramaic words

and grammatical forms and developed under the influence of the Samaritan Arabic vernacular. Likewise, Hebrew translations of Aramaic and Arabic works done by 19th- and 20th-century writers for European scholars, notably Moses Gaster, show clear Arabic influence in words, grammar, and syntax. A peculiarity of post-biblical Hebrew is the confusion of the gutturals.

Only scanty literary fragments have survived from the Hellenistic era and they testify to the use of the Greek language among the Samaritans. They are all excerpts from Alexander Polyhistor, a Roman historian (c. 80–40 B.C.E.), which were transmitted by Eusebius in his *Praeparatio Evangelica* (third to fourth century C.E.; for further information see Montgomery, op. cit., pp. 283–6). Fragments of a Greek translation of the Samaritan Pentateuch have been found in Egypt. Origen refers in his Hexapla to a “Samareitikon,” which is understood by most scholars to mean a Greek translation of the Samaritan Pentateuch. In 1953 a Greek archaeologist found a Samaritan synagogue inscription in Greek in Thessalonika which might belong to the fourth century C.E. (Kippenberg, p. 148). Samaritan Aramaic, a dialect of Western Aramaic, has been preserved in compositions dating from the early Roman period to the 11th century C.E. (see *Aramaic). Arabic has been used by the Samaritans as a spoken language for many centuries. It is not known exactly when Aramaic fell into disuse, but it seems to have died out as a written language in about the 11th century, and most of the non-Hebrew writings from that time on are in Middle Arabic.

Many manuscripts in Western libraries and in the Samaritan community set out a text in three parallel columns: Hebrew, Aramaic, and Arabic. These include the Pentateuch, *Memar Markah*, and some later exegetical works. There is also a glossary to the Pentateuch called *Ha-Meliz*, meaning “dictionary,” which sets out in parallel columns the Aramaic and Arabic equivalents of the Hebrew words of the Pentateuch. It was edited for the first time by Z. Ben-Ḥayyim (I, II no. XI). Ben-Ḥayyim showed that it was composed in two stages, the first part being the Hebrew-Aramaic from the 10th to the 11th centuries. Later, when Aramaic began to fall into disuse, another author added the Arabic column, very often translating not the Hebrew word but its Aramaic translation, which he no longer understood properly. This part was added to between the second half of the 11th to the 14th century. The only extant manuscript was copied in 1476. This glossary is today the most important source for knowledge of Samaritan Aramaic.

Literature

Extant Samaritan literature is relatively rare. The earliest work is the Pentateuch, which is the center of Samaritan life. To this day, the Samaritans jealously guard their most precious scroll, known as the Abisha Scroll, which they believe to be the actual copy of the Pentateuch made by Abisha, grandson of Eleazar, in the 13th year of the settlement of the Israelites in Canaan. All scholars agree that it belongs to a later period, but there is no agreement as to the exact time, and opinions vary between

the first (M. Gaster) and the 14th century C.E. (P. Kahle). Perez Castro reached the conclusion that the scroll consists of one older part, which belongs to the 12th or 13th century C.E., and of more recent additions from the 14th century. *Abu al-Faṭḥ ends his account on *Sefer Avisha* with the encouraging message that after having been lost it had reappeared in his days, “this being a sign of the approaching return of the Divine Favor” (p. 35). Next in order comes the Targum written in the Aramaic type similar to that of the *Defter* and *Memar Markah* (see *Markah). It is a fairly literal translation, but manuscripts exist with interpretive additions. The presence of a number of Greek words suggests a date between the first and fourth centuries C.E., as Greek was probably still in use as a literary medium alongside Aramaic during the early part of that period in Samaria. Apart from some fragments, the oldest manuscript is the Barberini Triglot of 1226 C.E.

The *Defter* (Gr. *diphtera*, book) constitutes the oldest part of the liturgy and was probably composed in the fourth century C.E. (for the text, see A.E. Cowley, I, pp. 1–92; Z. Ben-Ḥayyim, III, 2, pp. 41–274). Additions were made in later times in Aramaic and Hebrew. This part of the liturgy contains some early hymns (e.g., the Hymn of the Angels, the Hymn of Joshua), and these, together with the hymns of Amram Darah, Markah, and Nanah, the son of Markah, may be described as the basic prayer book of the Samaritan community. The *Memar Markah* is of prime importance for the study of Samaritan Aramaic and for the history of Samaritan concepts.

LITURGISTS. Liturgists of a later period who still wrote in Aramaic were Taviya ben Darta of the 10th–11th century C.E., Abu al-Ḥasan al-Ṣurī of the 11th century, al-Dustān before the 13th century, and Av Gillugah of the 12th century. Aaron b. Manīr of Damascus from the 13th to 14th centuries, and Mattanah Hamazri from the Samaritan community in Egypt, wrote in Hebrew, like the high priest of Shechem, Phinehas b. Yusuf, the reviver of the Samaritan *piyyut* in Hebrew (1308–1367 C.E.), and his sons Eleazar and Avisha. Phinehas himself and his son Eleazar occasionally still used Aramaic in attempting to write “verses of Markah,” i.e., to imitate the style of “the Samaritan Poet.” Avisha, who received the epithet *baāl ha-mēmar* (i.e., “the writer”) and, after Markah, perhaps the most famous and beloved liturgist in the Samaritan community, wrote in the Samaritan Hebrew that began to emerge by then and consisted of a mixture of classical Hebrew and Aramaic forms and words. He was a very prolific writer and his poems were included to a large extent in the Samaritan liturgy. Another famous liturgist was the scholar Ibrāhīm b. Ya‘qūb al-Ayya of the 18th century. In the 19th century the outstanding Samaritan scholar Phinehas b. Isaac (d. 1898), who was surnamed Fard Zavneh (“unique in his time”), composed liturgical poems of great beauty.

CHRONICLES. A number of chronicles are extant.

(1) The earliest is the *Asāṭir* (see *al-Asāṭir), a midrashic work written in late Aramaic and probably composed in the tenth or 11th century C.E.

(2) *Al-Tolidah* (“genealogy”), written in Hebrew, except for one Aramaic section dealing with the meridian of Mt. Gerizim, contains mainly genealogical lists from Adam to the entry into Canaan, and from then on lists of the high priestly and other important Samaritan families, interspersed at places by short historical accounts. The chronicle begins with a description of the Samaritan system in fixing their calendar, counting the Jubilees, etc. (see Historical Chronology). This work was composed by Jacob b. Ishmael, himself of high priestly origin, in 1346 C.E. He testifies that he copies the main part from an earlier work written by his ancestor Eleazar b. Amram in 1149 C.E. From then on it was added to by each generation.

(3) The Samaritan *Book of Joshua* (in Arabic) recounts the history of the Samaritan people from the initiation of Joshua by Moses to the days of Baba Rabbah. It contains much legendary material, and the place of origin and name of its author are not mentioned. In the opening sentences the writer states that he translated his work from a Hebrew source, which has not yet been discovered. The Hebrew *Book of Joshua*, which M. Gaster claimed to have found, is actually only one part of another Samaritan chronicle, a late compilation composed in about 1900 by Jacob b. Hārūn, as shown by P. Kahle, D. Yellin, and S. Yahuda. An Arabic *Book of Joshua* is enumerated by Abu al-Faṭḥ as one of the sources which he used for the composition of his *Annals*. The oldest manuscript (in the Leiden Library) consists of two parts: the first from 1362 C.E. (chs. 1–46); the second from 1513. The manuscript was sold to J. Scaliger in 1584 by the Samaritan community in Cairo (Juynboll, p. 340).

(4) The *Annals* (*Kitāb al-Ta‘rikh*) by Abu al-Faṭḥ were composed in Arabic in 1355 C.E.

(5) *Shalshalah* (“chain”) is a genealogy of high priests ascribed to Eleazar b. Phinehas of the 14th century C.E. and added to up to Jacob b. Hārūn (19th–20th century C.E.).

(6) The *New Chronicle* or *Chronicle Adler* (one of the editors) was written in Samaritan Hebrew by Av-Sakhva b. Asad ha-Danfī. It relates from Adam to 1900 C.E., the year of its composition, uses the earlier chronicles, and shows acquaintance with historical books of the Bible.

(7) Another *New Chronicle* in Samaritan Hebrew was written by Taviyah b. Phinehas in 1908 (see review to MacDonald’s edition of *Chronicle II* by Z. Ben-Ḥayyim in *Leshonenu*, 30 (1971), 293–302). M. Gaster refers to this chronicle in *The Samaritans* (p. 157), saying that it was first ascribed to Taviyah and then to Phinehas. The writer used the earlier Samaritan chronicles, mainly the *Annals* of Abu al-Faṭḥ and great parts of the historical books of the Bible. The chronicle ends with the narration of the events in the writer’s own time.

HALAKHIC LITERATURE. Several halakhic works have survived, all in Middle Arabic:

(1) *Al-Kāfi* (“the [all] sufficient”) composed by Yūsuf al-‘Askarī in 1042 C.E.

(2) *Kitāb al-Ṭabbākh* of the same period by *Abu al-Ḥasan of Tyre. Abu al-Ḥasan is also said to be the translator of the

Samaritan Pentateuch into Arabic. His translation, however, fell into disuse, because of the many interpolations, which had crept into it from the Rabbanite Arabic translation of Saadia. It was revised in the 13th century by the Samaritan scholar Abū Saʿīd (B.H. I, pp. xxxiv, xxxv).

(3) *Masāʾil al-Khilāf* (the differences between the Samaritan and Jewish communities, Rabbanites and Karaites alike) of the 12th century by Munajja b. Ṣadaqa, the physician of Damascus. He is also said to be the author of a treatise on forbidden degrees of marriage, *Sefer ha-Ervah*; others ascribe this treatise to a certain Baraka of Shechem from the 14th century. The John Rylands Library contains a bilingual manuscript in Arabic and modern Samaritan Hebrew, translated and copied in 1930 by Avisha b. Phinehas from an old Arabic manuscript owned by his father (no. 250). Munajja polemicized against the Jewish scholar Saadia and the Karaite al-Kirkisānī.

(4) *Kitāb al-Mirāth* or *Sefer ha-Yerushot* ("The Book of Inheritance") is ascribed to Ibrāhīm b. Iṣḥāq b. Mārūth, surnamed "The Sun of the Learned" (*Shams al-Ḥukamāʾ*) physician to Ṣāliḥ al-Dīn, who lived in Damascus (or Baalbek?) in the 12th century.

(5) *Kitāb al-Farāʾid* ("Book of Laws"), composed by Abu al-Faraj Nafīs al-Dīn-al-Kathār of the 13th or 14th century, is an important halakhic work. In this compendium of religious usage, the author mentions 613 commandments divided into 365 prohibitions (like the days of the year) and 248 orders (like the parts of the human body). The 613 commandments are referred to earlier in *Kitāb al-Kāfi*, but without such division or enumeration.

(6) *Shirat ha-Mitzvot*, a long poem by the 13th–14th-century liturgical poet Aaron b. Manīr of Damascus, enumerates the 613 commandments in accordance with the above-mentioned division. His system shows striking resemblance to that of Maimonides.

(7) The *Ḥillūk* or *Khilāf al-Irshād* ("Differences in Teaching"), a late Samaritan halakhic work, is ascribed by the sons of Phinehas b. Isaac ha-Kohen and of Jacob b. Hārūn to their fathers, respectively. It is divided into ten chapters and contains differences between Jews and Samaritans, based on readings in the Pentateuch. It ends with a section on death, divine punishment, and resurrection. The first chapter contains a brief sketch on Samaritan history, and Samaritan communities such as Aleppo, Damascus, Cairo, and Gaza are mentioned as places where Samaritans continue to live, although these communities disappeared long ago. This shows that the book was compiled from old materials.

None of these works presents a systematic codification of Samaritan oral law; the nearest to attain this aim is *Kitāb al-Farāʾid*. All contain polemics against Karaite and Rabbanite Jews, and even against certain Muslim philosophical teachings and Christian beliefs (e.g., in *Kitāb al-Tabbākh*). Vast sections are commentaries to passages of the Pentateuch.

PENTATEUCH COMMENTARIES. Like the halakhic writings, the Samaritan commentaries to the Pentateuch, still extant,

are all from the Arabic period and are written in Middle Arabic. Apart from lexicographical and grammatical material contained in them, they show familiarity with medieval philosophy, astrology, astronomy, and even medicine, as famous Samaritan physicians were among the commentators. The influence of Karaite or Rabbanite writings is discernible in some commentaries.

(1) A commentary on Genesis 1–28:10 by an unknown author (composed in 1053 C.E.), a specimen of which has been published by Neubauer, is of Karaite provenance. It was adapted to the Samaritan pentateuchal text in an external and very perfunctory manner prior to the year 1348, when the single extant manuscript was copied (Loewenstamm, *Perush Karaʾi al ha-Torah bi-Levush Shomroni*).

(2) Ṣadaqa b. Munajja al-Ḥakīm (d. 1223 in Haran), physician to Malik al-Ashraf, composed a philosophical treatise *Kitāb al-Tawḥīd* ("Book of [God's] Oneness"), in which he adduces proofs for the absolute oneness of God from verses of the Pentateuch. A commentary to Genesis is ascribed to him (M. Steinschneider, *ALJ*, 331).

(3) Abu al-Faraj Nafīs al-Dīn (author of *Kitāb al-Farāʾid*) wrote a commentary on Leviticus 26 called *Sharḥ* ("interpretation") "*im be-Ḥukkotai*." In it he cites from a lost Aramaic commentary of al-Dustān, well known as a liturgical poet in the Aramaic language.

(4) Several treatises are ascribed to Ghazzāl or Tabiah b. alDoweik of the 13th–14th century: (a) the Story of Balaam, (b) the Affirmation of the Second Kingdom (Rylands' Catalogue, p. 110, Cod. VIII), and (c) an unfinished commentary to Exodus.

(5) Ibrāhīm al-Kabāṣī, noted scholar and liturgist of Damascus (16th century), wrote a book *Sair al-Qalb* ("Conducts of the Heart"), wherein he expounds the need to conduct a life in accordance with divine teachings. He, too, enumerates 613 commandments. His system, like that of Aaron b. Manīr, shows striking resemblance to that of Maimonides. His second book, a commentary to Deuteronomy 32:3, 4 called "*Sharḥ Efshem*" or "*al-Fātiḥa*," deals with the power of the divine name. Deuteronomy 32:3, 4, like the first Sura of the Koran, became the basic verses in the Samaritan prayers. This book is of special interest as it shows influence of esoteric teachings.

(6) An important midrashic work from 1537 C.E., *Molad Moshe*, a panegyric to Moses, was composed in Arabic by Yishmael Haramḥī (Ismāʿīl al-Rumyḥī) of Damascus, a disciple of Ibrāhīm al-Kabāṣī, who honored him by writing the introduction to his pupil's work (edited by S.J. Miller, New York, 1949, together with a Samaritan Hebrew version by Phinehas b. Isaac ha-Kohen).

(7) the most comprehensive commentary to Genesis, Exodus, Leviticus, and Numbers was composed in the 18th century. Begun by Meshalma or Muslim b. Murjān, of the Danafite family, renowned for its scholars and scribes, it was continued and partly rewritten by his nephew and disciple Ibrāhīm b. Yaʿqūb al-ʿAyya from Genesis 46:28 to the end. Ibrāhīm al-ʿAyya, commentator, liturgist, grammarian, chrono-

nologer, and scribe, was one of the most famous Samaritan scholars. He took part in the correspondence between Samaritans and European scholars. Parts of his commentary have been edited as doctoral dissertations.

(8) At about the same time (1753/54), Ghazzāl ibn Abu al-Sarūr al-Ghāzi composed an aggadic commentary called *Kāshifal-Ghayāhib* or *Megalleh Temirin* (“Revealer of Hidden Things”).

GRAMMATICAL WORKS. Although the Samaritan Pentateuch is not bound by a masorah, like that of the Jews, there is a fixed pronunciation of the Torah, which is transmitted very carefully by oral teaching from generation to generation. An extant work from the end of the 10th–11th century by the poet Taviya ibn Dartah called “A Canon on the Rules of Reading” deals with the accents used in reading the text of the Pentateuch. The treatise was composed in Arabic, but the Aramaic names of the accents and the Aramaic verse at its close testify to the antiquity of the sources from which it was gleaned. Dealing with the same topic is the “Treatise Concerning the Reading” by Ibrāhīm al-ʿAyya, who wrote several other grammatical treatises, one about the vowel signs, another concerning the articulation of the 22 letters of the Hebrew-Samaritan alphabet, and a third on “Words Similar in Pronunciation.” The works of Ibn Dartah and of al-ʿAyya were edited for the first time by Z. Ben-Ḥayyim in *Ivrit ve-Aramit Nosah Shomron* (I, 11), together with other Samaritan grammatical and lexicographical writings. Here it may suffice to refer to the earliest Samaritan grammar (Sect. 1), *Kitāb al-Tawṭīʿa* (“Book of Introduction”) by the physician Abu Ishāq b. Ibrāhīm b. Faraj. b. Mārūth of Damascus (or Baalbek?) from the 12th century (supposed composer of *Kitāb al-Mirāth*). Abu Ishāq does not mention any predecessor, and his work is in accordance with that of Jewish and Arabic grammarians of his time. Like them he accepts the assumption of the three-radical stem of the word (in contradistinction to that adduced in the commentary of the unknown author from 1053 and in the dictionary “*Ha-Meliṣ*”). On this basis, he succeeds in creating his own grammatical system of the Hebrew language according to the pronunciation typical of the Samaritan community. His treatise shows that, from his time until today, only a few minor changes occurred in this pronunciation. His work, however, seems not to have been very popular in the Samaritan community, as shown by the single extant manuscript and by a later abridgment called *Mukhtaṣar al-Tawṭīʿa* by Eleazar b. Phinehas b. Joseph, high priest of the Samaritan community from 1363 to 1387. This work seems to have enjoyed great popularity, as shown by the many extant manuscripts and the number of different names given to it (Ben-Ḥayyim I, Sect. 111).

Some minor grammatical treatises were written by Phinehas b. Isaac Ha-kohen (d. 1898): on the *hifil* perfect and imperfect of hollow verbs (Ben-Ḥayyim I, Sect. VI, a.b.g.). Phinehas stood in high esteem as scholar and liturgist and, in addition to “Fard Zavnēh” (“Unique of his Time”), was surnamed Ḥashov Ḥeshbān Kishṭah” (“Reckoner of the True Reckoning”)

because of his proficiency in Samaritan chronology and fixing of the calendar. He is said to have encouraged Av-Sakhva to compile his chronicle (i.e., the *New Chronicle*), as the high priest Phinehas b. Yūsuf of the 14th century asked Abu al-Faṭḥ to compose his *Annals* (B.Ḥ. I pp. xlvi, xlvi). Another modern chronicle is ascribed to him. Like many contemporaries, among them the high priest Jacob b. Hārūn, he translated Samaritan manuscripts from Arabic into Samaritan Hebrew.

Samaritan literature, only part of which has been dealt with here, is wholly centered around the Pentateuch and the religious life of the community. The liturgical, halakhic, midrashic, grammatical, lexicographical, philosophical, and chronological literature all developed with the same aim: to guide the community to understand the very meaning and intention of the divine book and to teach them to fulfill its commandments. Even the historical literature fits into this system, as it sets out to show that man’s welfare depends on his obedience to the laws of “The Book.”

[Ayala Loewenstamm]

IN ISLAM

In the Koran, al-Sāmīrī is a strange figure. He incited the people of Israel to make the Golden Calf and Aaron’s warnings were of no avail. Al-Sāmīrī succeeded by using sorcery and was punished by having to proclaim forever: *lā misāsa* (“touch me not!,” Sura 20:85–97). The name al-Sāmīrī is difficult to explain and usually is interpreted as an allusion to the Samaritans, who according to Muhammad bore some of the responsibility for calf worship in Samaria. Speyer, however, believes that it alludes to the act of Zimri b. Salu, who was killed by Phinehas for his misconduct with a Midianite woman (Num. 25:1–15). This assumption appears to be forced and the tale of the Sāmīrī remains a mystery.

[Haïm Zew Hirschberg]

MUSICAL TRADITION

The musical tradition of the Samaritans, which is closely linked to their linguistic tradition, is completely devoid of instrumental music; in fact, the Samaritans do not even sound the *shofar*. Moreover, the Samaritans have no formal theoretical system of tones, meter, or rhythm. The two main styles of the Samaritan *melos* are the *kal* (“light”) and the *kaved* (“heavy”) style. The *kal* style is mainly syllabic. Its rhythm is linked to that of the text and its range is extremely limited. The center tone generally serves as the axis of the melody, with seconds on either side, and only occasional extensions to a third, fourth, and fifth. The *kaved* style is basically nonsyllabic and rich in embellishments. The melodic axis in this style consists of the center tone with the embellishments adjacent to it, but at times the melody projects over larger intervals such as the fifth, sixth, seventh, or even the octave, and then returns to its center. The manner of rendering Samaritan songs is chiefly characterized, in almost every melodic texture and prominently so in the *kaved* style, by strong vibrato, by glissando to the degree that it is difficult to fix the duration of the tone,

and especially by the *zā'ak* – the sforzato ejaculation, which is extremely loud and often precedes or succeeds the vibrato or appears on either side of the glissando.

In the vibrating *kaved* style, the pronunciation of the text is often extended by filler-syllables, which stretch and support the melodic line. A word such as *'at* may be transformed in the *kaved* cantillation to *'a-ta-wa-nu-wa*. An intermediate style called *ḥazi kaved* (“half-heavy”) is also recognized. The Samaritan Bible cantillation is not based upon a system of *masoretic accents. The present usage is regulated by just four cadential formulas: the half-*rakza* and *rakza* which mark the hemistichs; the *waqfa* at the end of the verse; and the *nāhwa*, placed at the end of the *qiṣṣa* does the melodic impetus quicken and the melodic curve becomes more pronounced. There are distinct melodic schemes for cantillation on various occasions – for certain Sabbaths and feasts, readings by the priests, private study, etc. An old and obscure tradition utilizes a different system: the ten *sidrei mikreta* (pronounced *sedari maqrata*), i.e., “rules” or “principles of reading,” effected by signs placed after words or phrases. The signs seem to have had a combined exegetical-syntactical-musical function similar, in principle, to the Jewish accentual system and its cognates in the Near East (especially the Syriac). The signs and their Aramaic names are as follows (pronunciation bracketed):

(‘enged or ‘nēged).. נגד
(‘fāsaq or ‘afsa): פסק
(ānā’ū)° אנהו°
(er’kānu) / ארכנו
(sīy’yāla) “שאיילה” <
(zā’ēiqa). – זעיקה
(et’mā’u) <: אתמחו
(‘bā’u) <. בעו
(zā’if):= זעפ
(‘tūru) |: תורו

The signs are no longer used either in the Samaritan scrolls of the Law or the prayer books, and their precise meaning and application were apparently lost many centuries ago.

The most interesting rendition of the *piyyutim* is the antiphonal performance which the Samaritans call “lower and upper” or “right and left.” The congregation divides itself into two groups on either side of the *parokhet*, and simultaneously recite different parts of the hymn, each with its own melody. A polyphony, which is extremely dissonant to the Western ear, is thus created, although the Samaritans execute it most naturally and each member of the congregation is habituated to his “half” of the performance.

The Samaritans do not seem to possess any truly secular songs. However, on special occasions, such as weddings and circumcisions, they sing *piyyutim* in an easy and metrical “light” style.

On the periphery of the Samaritan tradition there are light songs, usually Arabic ditties with overtly secular themes, bearing the imprint of the Arab *melos* and poetical form. But for the Samaritans, a song such as *Sir binā sihrā nadīmī* is an allegorical song and not one merely of love and desire.

These elements, however, have become an integral part of the musical tradition of the Samaritan community. Some manuscripts of religious poems have headings which indicate, in Arabic, the melody or style in which the poems are to be sung.

A feature often apparent in all genres of Samaritan singing-songs, hymns, and prayers is the phenomenon designated by the musicological-historical term *parallel organum*: the rendition of one melody by a group of singers, adults and/or children, in which each individual or subgroup proceeds on an independent tonal level, thus creating a polyphony of strictly parallel strands. The procedure is entirely unconscious and spontaneous, and the Samaritans themselves do not have a term for it (a very similar usage is also found among the Yemenite Jews and in a few other cultures in various parts of the world).

The characteristics of Samaritan song (which has only begun to be subjected to a thorough musicological analysis) give it a peculiarity which is apparent at first hearing. All the elements – vibrato, glissando, *zā’aq*, the melodic curve itself, “right and left,” and *organum* – combine to make a strongly original style, which has no parallel either in the musical traditions of the Jewish communities or those of any present Near Eastern culture. Samaritan music evinces the survival of archaic elements whose import has yet to be explored.

SAMARKAND, capital of Samarkand district, Uzbekistan. Jews are mentioned there from hearsay for the first time by *Benjamin of Tudela (12th century) as a large community. It

was apparently destroyed when the town was captured by Bab Mehmet Khan in 1598. The Jews later suffered from Muslim oppression. In 1843, at the request of the Jews, a special area was allocated to them for the construction of a Jewish quarter: they were led by a *nasi*, named Kulantur, approved by the emir of *Bukhara. The situation of the Jews improved after the Russian conquest (1868), and in 1887 there were 3,792 Jews in Samarkand, the overwhelming majority of them of the Bukharan community.

Settlement of Ashkenazi Jews from *Russia began with the construction of the railroad to Samarkand in 1888; they played an important role in the commercial development of the city. In 1897 there were 4,307 Jews (c. 8% of the total population). Their number subsequently increased with Jewish immigration from the emirate of Bukhara and from Russia. The Russian authorities were opposed to this immigration, and, in contrast to the local Jews, the “foreign” Jews (from Bukhara) and the Jews of European Russia were subjected to persecutions. In 1907 the Jewish population numbered 5,266.

With the outbreak of the Revolution of 1917, the Zionist movement in Samarkand gained in strength and served as a factor unifying the various communities there. A communal center and Hebrew secondary school were established. Under the Soviet regime a Jewish-Bukharan branch of the Communist Party was formed in Samarkand; for a number of years it carried on a struggle with the *Yevseksiya over the right of the local Jews to maintain a Hebrew school. The Yevseksiya took steps to oppose the national and religious traditions of the Jews. By 1933 15 of the synagogues in the Jewish quarter had been closed down. In 1935 “sovietization” of the Jewish Museum (founded in 1922) expurgated its national-religious character and the evidence of the close ties existing between the Jews of Samarkand and Erez Israel. The Jews of the Bukharan community numbered 7,740 in 1926, and 9,832 in 1935 (8% of the total population); of those 8,898 lived in the Jewish quarter, whose name was changed in 1926 to “Eastern Quarter,” while 95% of the inhabitants were Jews. According to the census of January 1939 there were 7,593 Jews – 5.57% of the total. The Jewish school, whose language of instruction was Tajiki (or Judeo-Tajiki; the language spoken by the Bukharan Jews), was attended by over 1,400 children. During World War II many Jewish refugees from the western part of the Soviet Union arrived in Samarkand.

Contemporary Period

In the late 1960s the Jewish population was estimated at 15,000 (mainly Bukharan Jews), most of whom resided in the former Jewish quarter. There remained one synagogue in the old part of the city, where the Jewish quarter is located; it included a separate section for the Ashkenazi Jews. Samarkand retained a Jewish cemetery. In 1951 the rabbi Ḥakham Ezekiel was sentenced to 25 years imprisonment for “religious activity,” but was released in 1957, having served six years. In March 1964 the community was compelled by the authorities to protest against the sending of matzot from Israel and the baking of

matzot was carried on at home. Since Uzbekistan attained independence in 1991 there has been a steady exodus of Jews to Israel and the West (mainly the United States), with around 2,000 remaining in Samarkand in 2005. One of the city's two synagogues is still in use, but often there is no *minyān* for Sabbath services.

[Yehuda Slutsky]

SAMAU'AL BEN JUDAH IBN 'ABBĀS AL-MAGHRIBĪ, convert to Islam, mathematician, physician, and author of an anti-Jewish manual. He converted to Islam in 1163 and died ca. 1170. He left a polemical attack on the Jews and on Judaism, composed following his conversion, as well as an autobiographical account of his conversion, besides other works on scientific, especially mathematical, subjects. The name “al-Maghribi” indicates a connection with the Islamic west, and he may have been born there, but he spent most of his life in the east, converting to Islam in the city of Maragha (now in Azerbaijan). The son of a well-known father (Judah b. 'Abbās was a poet and a friend of *Judah Halevi), Samau'al refrained from converting for a long time out of respect for his father, but he eventually became a Muslim shortly before his father's death.

The reasons behind his conversion were of two kinds. The Prophet *Muhammad appeared to him in a dream, which he recounts in his work. However, while dreams are known quite often to lead to conversion, Samau'al did not accept religious experience as a legitimate argument for conversion. Only rational argument was acceptable to him. Thus, in his autobiography he describes his conversion as the product of a process of study and intellectual analysis which took place over a considerable period of time (an exchange of letters with an anonymous correspondent, published together with the autobiography, attempting to justify the conversion, wears the appearance of a literary construct).

Samau'al's main surviving work is his *Iḥām al-Yahud* (*Silencing the Jews*). In this work Samau'al claims that the Bible is merely an invention by Ezra, that its transmission was unreliable, and that it cannot be regarded as authentic divine revelation. Nonetheless, like many a polemicist before and after (e.g., *'Abd al-Ḥaqq al-Islāmī), Samau'al is prepared to recognize the biblical text as authentic when it suits his case: he identifies several examples of biblical texts prophesying the advent of Muhammad (in particular Gen. 17:20 and Deut. 18:15–18) and uses *gematria* to show that Muhammad is referred to in the Bible (in the phrase *bi-me'od me'od*, Gen. 17:20, referring to the descendants of Ishmael, the sum of the numerical values of the letters of the Hebrew words equals the sum of the values of the letters in the name “Muhammad”). Above all, though, Samau'al claims that Judaism is to be rejected because the same arguments that can be made for Moses can also be

made for Jesus and Muhammad – either all are to be accepted or all are to be rejected.

The argument of the equivalence of faiths might have led to atheism or to retention of Judaism, but Samau'al uses it to justify acceptance of Islam, on the ground that that faith includes all of the faiths that have preceded it. Acceptance of the faith of the majority thus has an intellectually respectable, as well as a socially pragmatic, aspect.

Samau'al's conversion was one of several at the time: besides Samau'al, we know also of the doctor and philosopher Abū al-Barakāt Ḥibbat Allāh, who converted at the end of his life, and of Isaac the son of Abraham b. Ezra. As all three were acquainted, there have been suggestions that Ḥibbat Allāh may have acted to influence the other two to convert, or that all these converts were part of a circle of intellectuals with shared interests and paths to Islam, but Stroumsa argues persuasively that this supposition is unfounded and that the conversions were independent.

[David J. Wasserstein (2nd ed.)]

SAMBARI, JOSEPH BEN ISAAC (known by the name **Qātāya**), Egyptian chronicler, who lived in the 17th century, and was apparently a member of the Cairene, Musta'rib congregation (see *Musta'ribs). Sambari wrote two Hebrew chronicles: *Divrei Ḥakhamim*, a historical account from Adam to Rabbanan Savorai (see *Savora), that is not extant, and *Divrei Yosef*, which was completed on January 23, 1673 and is extant in five different manuscripts (= mss.). Two of the mss. contain most of the original written by Sambari, i.e., that of the Alliance Israélite Universelle library (ATU H130A), Paris, and that of the Bodleian (Neubauer Cat., No. 2410), Oxford. An annotated edition of the chronicle was published by Sh. Shtober on the basis of the corpus of the mss. (See *Sefer Divrei Yosef* [= SDY], Jerusalem: the Ben-Zvi Institute, 1994.) Another book written by Sambari is the *Porat Yosef*, in which he deals exclusively with the topics of Massorah and biblical cantillation. This work is extant in a unique manuscript in the Alliance Israélite Universelle library (ATU H41A).

There is no information about Sambari's life in any of the sources, and what is known about him is found in *Divrei Yosef*. He was a pupil of R. Hananiah Barhun, the pupil of R. Abraham Iskandari, and may have been one of the latter's young disciples in *Cairo. According to Sambari's own testimony, Iskandari's rich library aroused in him an intense curiosity in history, and later on he made extensive use of it in writing his works. In the 1660s he earned his livelihood as a clerk or a scribe working for Raphael Joseph, the minister of

finance (*sarrafbashi*) of the governor of Ottoman Egypt. Owing to the close contacts of his patron with *Shabbetai Zevi, it is most likely that Sambari himself also became one of the adherents of that messianic movement. The collapse of Shabbateanism after the apostasy of the false messiah had made Sambari disillusioned, and this was one of the main drives that brought about the accomplishment of the SDY in 1673. Sambari began this historical work with the emergence of Islam, presenting the figure of *Muhammad, as seen through Jewish eyes. Henceforth he included the history of the Jewish people in the history of the Islamic nations. The full scope of the eastern Islamic dynasties from the earliest, the *Umayyads to the Ottomans, served him as backdrop to the Jewish historical materials. Sambari's uniqueness lies in the fact that he successfully integrated these two histories, connecting them through the chain of cause and effect. His access to the Arabic material enabled him to enrich the Islamic chapters of his book with the essentials found in the Islamic biographical literature (Sira), in *Hadith traditions, and in Muslim historiography. In dealing with the Muslim kingdoms he mainly relied on al-Maqrizi, Ibn Taghri-birdi, and Ibn Zunbul.

The centrality of Egypt in the SDY made Sambari enter into great detail in describing the Jewish settlements that existed in the Nile Valley during the 10th–16th centuries; portraits of their leaders, foremost among them *Maimonides, his descendants and other *negidim* (i.e., heads of the Jews); the persecutions they had undergone there; and even the hydrological regime of the Nile. Indispensable for an understanding of Jewish life in *Fatimid and *Mamluk Egypt are Sambari's details about the various synagogues in Fustat, Cairo, Jizeh, and other places in the region of the Delta.

Sambari's main sources for his history of the Jews were *Yuḥasin* by Abraham Zacuto; *Shevet Yehudah* by Solomon Ibn Virga; *Divrei ha-Yamim* by Joseph ha-Kohen; *Shalshet ha-Kabbalah* by Gedaliah Ibn Yahya, and *Seder Eliyahu Zuta* by Elijah Capsali, *Kore ha-Dorot* by David Conforti. He also integrated into his work archival documents, excerpts of Responsa (of Maimonides and R. David Ibn Abi Zimra) and bio-bibliographical notes about prominent sages living in Spain and later on in the Eastern provinces of the Ottoman Empire.

As Sambari was imbued with Jewish mysticism, he was fascinated by *Kabbalah, and therefore he depicted outstanding kabbalists who were active in *Safed during the 16th and 17th centuries. Moreover, he includes in his work the complete, most precise, and earliest version of the hagiography of R. Isaac Luria, *Sefer Toledot ha-Ari*. In the wake of his personal involvement in the messianic experience of his generation, Shabbateanism, Sambari incorporated in the SDY the stories of eight messianic and prophetic figures, beginning with David Alroy and concluding with ha-Ari and Shabbetai Zevi. It is especially significant that Sambari wrote down "the story of *Nathan of Gaza who prophesied concerning Shabbetai Zevi, his prophet," but unfortunately this has been torn out from the manuscripts of the work.

The circulation of the holograph of Sambari's historical work was very limited in the 17th–19th centuries, and only small sections dealing with the Ottoman sultans, messianic figures and kabbalists were published in *Sippur Devarim* (Constantinople, 1728) and in *Me'ora'ot Olam* (Smyrna, 1756). The *edition princeps* of 1728 was translated into Ladino (Constantinople, 1767), named *Sippur Malkhey Otmanlis es declare del Reyno di Otmanjik*.

[Shimon Shtober (2nd ed.)]

SAMBATYON (also **Sanbasyon** and **Sabbatyon**), a legendary river across which part of the ten tribes were exiled by the Assyrian king, Shalmaneser, and which rested on the Sabbath. The river is mentioned in the Targum Pseudo-Jonathan (Ex. 34:10): “I will take them from there and place them on the other side of the Sambatyon River.” The rabbis declared that the ten tribes were exiled three times: once beyond the Sambatyon River, once to Daphne of Antioch, and once when the divine cloud descended upon them and covered them (TJ, Sanh. 10:6, 29c; Lam. R. 2:9; cf. Gen. R. 73:6). The first ascription of miraculous qualities to this river is found in the Talmud. When *Tinneius Rufus asked R. Akiva how he could prove that the Sabbath was divinely ordained as the day of rest, he replied, “Let the River Sambatyon prove it” (Sanh. 65b). It was unnavigable on weekdays because it flowed with strong currents carrying along stones with tremendous force, but it rested on the Sabbath (Gen. R. 11:5). These passages give no indication as to the supposed location of the river or of the origin of its name. The only inference that can be drawn from them is that it was located in Media. The most extensive description of both its name and locality is given by Naḥmanides (to Deut. 32:26). He identified the river with the River Gozan of the Bible (e.g., 11 Kings 17:6), explaining the name (on the basis of Num. 11:31) as meaning “removed,” i.e., the ten tribes were “removed” from the rest of their people. Naḥmanides also held that its name derived from its Sabbath rest, since *Sabbat* was the local word for the Sabbath.

Pliny the Elder (24–79 C.E.) described the river in his *Natural History*, and his observations agree with the rabbinic sources. He also claimed that the river ran rapidly for six days in the week and rested on the Sabbath (31:24). This characteristic of the Sambatyon prevented the ten tribes from leaving their place of exile, since they could not cross the river during the six days of the week, and though it rested on the seventh day, the restrictions on travel on the Sabbath rendered the crossing equally impossible (see *Ten Lost Tribes). Josephus, however, described the periodicity of this river in a different fashion, claiming that it was quiescent on weekdays and flowed only on the Sabbath. He related that when Titus marched from Beirut to the other Syrian cities, displaying the Jewish captives, he observed a unique river. It ran between Arce, at the northern extremity of the Lebanon range, and Raphanea. Josephus adds: “It has an astonishing peculiarity. For, when it flows, it is a copious stream with a current far from sluggish; then all at once its sources fail, and for the space of six days it presents the spectacle of a dry bed; again, as though no change had occurred, it pours forth on the seventh day just as before. And it has always been observed to keep strictly to this order; whence they have called it the Sabbatical river, so naming it after the sacred seventh day of the Jews” (Jos., Wars, 7:96–99). According to this description there is no explanation for the inability of the ten tribes to cross the Sambatyon during the weekdays.

In the post-talmudic period, especially in the apocryphal literature, legends about the Sambatyon increased. The exact date that the ten tribes were to return from their places of exile during the messianic period was recorded in the *Sefer Eliyahu*. Tishrei 25 was designated for the return of those beyond the Sambatyon. Although 17,000 men and women would leave this area, 20 men and 15 women would be killed on the way to the Holy Land (Judah ibn Samuel, *Midreshei Ge'ullah* (1954²) 31f., 43; cf. Num. R. 16:25). *Eldad ha-Dani claimed that the Sambatyon did not surround the land of the ten tribes but rather that of the children of Moses. These people originated as a result of God's promise to Moses that “I will make of thee a great nation” (Ex. 32:10). Eldad depicted the river as consisting entirely of sand and stones. His description was as follows:

“The children of Moses are surrounded by a river resembling a fortress, which contains no water but rather rolls sand and stones with great force. If it encountered a mountain of iron it could undoubtedly grind it into powder. On Friday, at sunset, a cloud surrounds the river, so that no man is able to cross it. At the close of the Sabbath the river resumes its normal torrent of stones and sand. The general width of the river is 200 ells, but in certain places it is only 60 ells wide, so that we may talk to them, but neither of us can cross to the other one's side” (A. Epstein 5f.).

*Pethahiah of Regensburg, the 12th-century Jewish traveler, claimed that in Jabneh there was a spring which ran six days a week, but ceased to flow on the Sabbath (*Travels of Rabbi Petachia*, ed. by A. Benisch (1865), 56f.). Interest in the Sambatyon legend was revived in the 17th century through

the fantastic stories of Gershon b. Eliezer ha-Levi in his *Gelilot Erez Yisrael* and by *Manasseh Ben Israel in his *Mikveh Yisrael*. The former related that, in his journey through India in 1630, he heard the clattering noise of the Sambatyon River, which was a distance of two days' journey from where he was staying. He claimed that the Sambatyon was 17 miles wide and threw stones as high as a house. On the Sabbath it was dry and resembled a lake of snow or of white sand. The river ceased to flow on Friday, two hours before sunset, and during this interval before the start of the Sabbath, the Jews beyond the river raided the neighboring lands. Manasseh Ben Israel, while attempting to prove the existence of the river, claimed that even when its sand is kept in a glass, it is agitated during six days of the week and rests on the Sabbath (*Mikveh Yisrael*, ch. 10, Lemberg, 1847 ed., p. 10a–b). The Sambatyon also figured in kabbalistic works. In 1260 the kabbalist Abraham *Abulafia traveled to Erez Israel, where he started to search for the Sambatyon. He was trying to contact the Ten Lost Tribes. Sambatyon was also associated with *Shabbetai Zevi. The students of *Nathan of Gaza circulated a story after Shabbetai Zevi's death that he had gone to the Ten Lost Tribes that live on the other side of the Sambatyon. There he married the daughter of Moses. For a similar tale, see the Letter of Nathan of Gaza to Raphael Joseph (1665; published in *Ziziat Novel Zevi*, ed. Tishby (1954), 11–12). The students were to wait for Shabbetai Zevi to return after the seven-day wedding celebration and to redeem them – if they were worthy of it. If they were not worthy, he would stay beyond the Sambatyon and great troubles would befall Israel (*Zikkaron li-Venei Yisrael* (1676), 68).

[A.Ro.]

SAMBERG, ISAAC (Aizik; 1889–1943), Polish Yiddish actor. Samberg helped to organize the Warsaw Central Theater in 1920 and acted in Sholem Asch's *Motke the Thief* and Gogol's *Inspector-General*. Joining the Vilna Troupe in 1923, he appeared with them in various productions. A relative of the Kaminskis, he also acted with their company in Shalom Aleichem, Peretz, and Shakespeare. He visited the U.S. in 1932, London in 1934, and played in the film version of *Der Dybbuk*, 1937. He and his wife Regina Zukor perished in Maidanek, or possibly in Dachau.

SAMBOR, town in Lvov oblast, Ukraine; annexed by Poland in 1349; from 1772 to 1918 under Austrian rule (eastern Galicia); and from 1918 until 1939 once more under Polish rule. Jews came as settlers to the recently acquired land in the 15th century. Some engaged in trading salt, which was mined in the region of the town, while others were tax-farmers. In 1542 the

townsmen of Sambor obtained a royal privilege *de non tolerandis Judaeis* which was ratified by Queen Bona in 1551, and Jews were moved to the suburb of Blich. In the middle of the 17th century the municipal authorities of Sambor prevented Jewish merchants and craftsmen from entering the town and endeavored to expel the Jews from Blich, where there was an organized community under the jurisdiction of that of *Przemysl, but they were allowed to remain on payment of an indemnity, guaranteed by the Przemysl community (1682). A privilege granted by King Augustus II in 1725 authorized the Jews to reside in the area controlled by the fortress of Sambor and placed them under the jurisdiction of the royal governor. The king also permitted them to trade freely and to maintain a synagogue, a cemetery, and one slaughterhouse. This privilege was ratified by King Augustus III in 1740. Permission to build a synagogue was officially granted in 1763; this magnificent building, which took a number of years to complete, remained standing until World War II. In 1764 the Jewish community numbered 513 persons. At the close of the 18th century there was a Jewish press in Sambor which specialized in printing calendars. In the 1790s the Austrian authorities ordered a reduction in the size of the Jewish quarter. Throughout the 19th century Hasidism exerted a powerful influence on the community.

The Jewish population of Sambor numbered 2,129 (42% of the total population) in 1880, rose to 3,072 (48%) in 1900, and 4,073 (38%) in 1910, decreasing slightly to 4,067 (42%) in 1921. The majority earned a livelihood as small craftsmen and shopkeepers, while the wealthy families engaged in the wholesale trade of wood and cereals. At the beginning of the 20th century the municipal council was headed by a Jewish delegate, Dr. Steierman. A Jewish commercial school, which received government recognition, was founded at that time. There was also a Jewish hospital and a hostel for Jewish students of the local high school, where 150 Jewish youths studied in 1910. At the end of 1918, a Jewish national council was established. Between the two world wars *Tarbut and Beth Jacob schools functioned in the town. Zionist parties and organizations played a considerable role in the Jewish public life of Sambor. According to the 1931 census, there were 6,068 Jews in Sambor. Estimates for 1939 put the number of Jews at about 8,000.

[Meir Balaban and Arthur Cygielman]

Holocaust Period

When war broke out, a wave of refugees from further west came to Sambor. During the period of Soviet occupation, which lasted from the end of September 1939 until the end of June 1941, Jewish communal activities were banned, the only exception being the synagogues, which continued to function while paying heavy taxes. In the summer of 1940 hundreds of Jews were deported to the Soviet Union. When war with Germany broke out in June 1941, many young Jews from Sambor joined the Soviet Army. When the city fell to the Germans (July 1, 1941), about 100 Jews were immediately killed by the Ukrainians, with German support. In the winter of 1941–42 the able-bodied Jewish men were sent to labor camps to work

on road constructions. Many of them succumbed to the harsh conditions. In March 1942 an open ghetto was established in the suburb of Blich, into which Jews from Sambor district and the vicinity were brought. The Judenrat was headed by Dr. Schneitscher.

The first mass *Aktion* took place on Aug. 4, 1942, when 4,000 Jews were "selected" and sent to *Belzec death camp. On September 4 about 100 aged persons were executed; 2,000 Jews were sent to Belzec, followed by 3,000 on October 17, and more on October 22. On Dec. 1, 1942, the ghetto was closed down. A small number of remaining Jews were sent to the labor camp of Janowska, in Lvov. At the beginning of 1943 there was an attempt to organize a Jewish underground. A group of young Jews, one of whose most active members was Artur Sandauer (d. 1989), acquired firearms, and began training in the area of the Jewish cemetery. A series of *Aktionen* carried out by the Nazis interfered with the preparations for active resistance: on March 14, 1943, the remnants of the Jewish community were brought to the Jewish cemetery. Mothers were ordered to put their children in a central open space, where they were forced to watch them being shot. Nine hundred persons were killed on this day. Two months later 1,200 Jews were murdered. An attempt by some Jews to leave the ghetto through sewage canals was thwarted. By July 1943 the Jewish community of Sambor ceased to exist, and the city was declared "judenrein." The last remaining Jews were executed in a forest near Radlowice. In the summer of 1944, 165 Jews in hiding were found and executed. When the Russians occupied the city in August 1944, a handful of Jews were still alive. No Jewish community was reestablished.

SAMBURSKY, DANIEL (1909–1977), composer. Born in Koenigsberg, brother of Samuel *Sambursky, he studied at the Danzig Conservatory and at the University of Berlin, went to Palestine in 1932, and settled in Tel Aviv. In Berlin he had written the music for Shaul (Sally) Levin's Zionist play *Die einzige Loesung* (1931), and in 1933 composed the songs for the Keren *Hayesod film *The Promised Land*. He worked as a music teacher in schools and at teachers' seminars, and from 1935 to 1950 also led the weekly singing meetings (*shirah be-zibbur*) at the Histadrut's Brenner House, and in radio broadcasts. In 1947, together with M. Bronzaft (later Gorali), he edited the three-volume anthology *Sefer Shirim u-Manginot*, one of the standard collections of Israel songs, which went into several editions.

Many of Sambursky's own songs have entered the folk repertoire, such as: *Ba'ah Menuḥah la-Yage'a*, *Hakh Pattish*, *Be-Harim Kevar ha-Shemesh Melahetet* (all to works by Nathan *Alterman), for the film *The Promised Land*; the latter taken over from *Die einzige Loesung* and given new words; *Zemer ha-Peluggot* (N. Alterman), for O. Wingate's Special Night Squads (1938); *Ner Dakkik*, children's Hanukkah song (Levin *Kipnis; 1935, *Paneinu el ha-Shemesh ha-Olah* (I. Shenhar), also taken over from *Die einzige Loesung* and given new words. *Sisu ve-Simḥu be-Simḥat Hag*, which appears in most collections as an anonymous folk melody, and in some as by "Galinka" (an erroneous transliteration from the Hebrew), is actually an adaptation by Sambursky of a polka by Glinka. Sambursky published a short autobiography in *Tazlil*, 9 (1969), 180–2.

SAMBURSKY, SAMUEL (1900–1990), Israeli scientist and historian. Born in Koenigsberg, Germany, Sambursky studied physics before going to Palestine in 1924. Four years later he joined the physics department of the Hebrew University of Jerusalem. His sense of history and his humor made him a particularly successful lecturer. In 1945, in order to harness the country's scientific potential to the development of Palestine, the Mandatory government set up the Board of Scientific and Industrial Research, with Sambursky as its executive secretary. This board was the forerunner of the Research Council of Israel established in 1949, with Sambursky as its architect and first director (1949–56). He remained vice chairman when, in 1957, he returned to full-time academic life as dean of the Hebrew University's faculty of science. In 1959 he became professor of the history and philosophy of science in a new department he helped to create. Sambursky was active in UNESCO, serving for some years as vice chairman of Israel's national committee for the organization. In 1968 he received the Israel Prize for Humanities.

His works include *Ha-Kosmos shel ha-Yevanim* (1954; *The Physical World of the Greeks*, 1956); *Physics of the Stoics* (1959); and *Physical World of Late Antiquity* (1962). A revised edition of these three works appeared in 1965 in one volume under the title *Das Physikalische Weltbild der Antike*. His brother was the composer Daniel *Sambursky.

[Paul G. Werskey]

SAMEGAH, JOSEPH BEN BENJAMIN (d. 1629), Italian rabbi and author. Samegah was born in Salonika where he later became rabbi. Compelled to leave, seemingly because of persecution by his community, he went to Venice, where he served as rabbi and head of a yeshivah. According to Isaac Ḥayyim *Cantarini in his *Paḥad Yizḥak*, Samegah headed a yeshivah in Padua. Among his pupils were Ḥayyim *Benveniste and Joseph Solomon *Delmedigo.

Joseph was the author of *Mikra'ei Kodesh* (2 pts., Venice 1586), on the meaning of the precepts of the Torah; *Porat*

Yosef (Pt. 1, Venice, 1590), novellae on the works of Isaac *Alfasi and *Nissim b. Reuben Gerondi to *Ketubbot*, *Hullin*, and *Bezah*, and a few novellae on other tractates of the Talmud; *Perush Derekh Yemin* (*ibid.*, 1606), a criticism of the *Yemin Adonai Romemah* of Menahem Azariah Da *Fano. Joseph's responsum, permitting the use of the *mikveh* of *Rovigo, about the ritual fitness of which arose a great controversy involving many scholars, was published in the *Mashbit Milhamot* (*ibid.*, 1606). In the introduction to *Mikraei Kodesh* he refers to two other works he wrote: *Binyan Olam*, homilies, and *Kevod Elohim*.

SAMEKH, the fifteenth letter of the Hebrew alphabet; its numerical value is 60. The early Proto-Canaanite form of this letter has not yet been attested, but in the tenth century B.C.E. it consisted of three horizontal strokes crossed by a vertical downstroke Ꞥ. Later there was a tendency to draw the various strokes continuously; thus in the Hebrew script Ꞥ, in the Phoenician Ꞥ, while in the Aramaic the *samekh* developed as follows: Ꞥ → Ꞥ → Ꞥ → Ꞥ → Ꞥ. Hence the Jewish Ꞥ and Nabataean *samekh*, Ꞥ, evolved. In the Arabic script the *samekh* has been replaced by س (*sin*), which developed from the Aramaic *shin* (Arabic *shin* = ش). See *Alphabet, Hebrew.

[Joseph Naveh]

SAMFIELD, MAX (1844–1915), Reform rabbi. Samfield was born in Marsksteft, Bavaria. His father was a rabbi. He completed his rabbinical studies and his secular education in Germany before coming to the United States as part of the great migration from Central Europe in 1867.

In the United States he first served as a rabbi of B'nai Zion Congregation, Shreveport, Louisiana, and then went to Temple Israel in 1871 (when it was called Congregation Children of Israel), Memphis, TN, where he served until his death. The advertisement of his position read: "Wanted: A Minister and reader at a salary of \$2500 who can preach in English and German." His initial sermon pledged "the vigor of my youth, the faculties of my soul, the energies of my mind, nay my very life, I consecrate to your moral welfare and to the welfare of Judaism and humanity." He was true to his word. By the time he came the synagogue had ceased being Orthodox and affiliated with the nascent Reform movement. Samfield moved it more so toward the Reform camp, asking and receiving permission to remove his hat. From 1875 on worship was hatless during his rabbinate. In 1871 the synagogue was one of 28 congregations that formed the *Union of American Hebrew Congregations and contributed toward the establishment of *Hebrew Union College.

Rabbi Samfield was recalled with admiration for his courage during the yellow fever epidemics that afflicted Memphis three times during the 1870s, in 1873, 1878, and 1879. He

remained in Memphis and ministered to the sick, helping the orphans and burying the dead regardless of race or conditions. In 1878, 20,000 people fled the city, cutting the population by more than half. Eight in ten of those who remained contracted yellow fever and 5,150 people died, more than one in four. In seven weeks 51 Jews were buried in the synagogue cemetery; nearly twice as many as had died the entire year before. Samfield served all the citizens of the community. He also adopted three orphans whose parents had died during the epidemic, in addition to his four natural children. He was recognized as a scholar and as a leader in public affairs, also taking on public school work. The times required that he be a man of action as well as a visionary in his performance as a speaker relating to matters of public utility.

Samfield's marriage registries show he converted individuals prior to officiating at their marriage. He was also the editor of the *Jewish Spectator*, a weekly newspaper, from October 1885 to his death. By the time he died, the newspaper was being published in New Orleans. It started as the only Jewish weekly in the South since the Jews had first settled in this region of the United States.

Locally, he was one of the founders of The Tennessee Society for the Prevention of Cruelty to Animals and Children, The United Charities of Memphis, The Hebrew Relief Association, and The Young Men's Hebrew Association, Memphis. He was one of the organizers and a member of Board of Memphis Howard Association for the promulgation of Prison Reforms, a group of Memphis doctors and prominent businessmen. He was also a trustee of the New Orleans Orphan Asylum Home and a member of the board of governors of the Hebrew Union College.

Under his leadership the congregation welcomed new immigrants and began construction of its new, prominent downtown building.

He was widely respected throughout the community. At his death local businesses closed their doors; the Memphis Railway Company cut its power and brought every street car to a halt for one full minute.

SAMINSKY, LAZARE (1882–1959), composer. He studied mathematics and philosophy at the University of St. Petersburg, and simultaneously composition with Rimsky-Korsakov at the Conservatory there. In 1908 he was among the founders of the *Society for Jewish Folk Music. In 1913 he went to the Caucasus as a member of Baron *Guenzburg's ethnological expedition. In 1923 Saminsky settled in New York. There he was appointed music director of Temple Emanu-El and held the position until his death.

He wrote five symphonies (the last, with chorus, subtitled *Jerusalem, City of Solomon and Christ* (1929–30)), liturgical choruses, and services to Hebrew words. He was active

as choral conductor and lecturer. He published several books: *Music of Our Day* (1939²), *Music of the Ghetto and the Bible* (1934), and *Living Music of the Americas* (1949).

SAMOGITIA (Yid. and Heb. **Zamet** or **Zamut**; Lith. **Žemaitis**; Pol. **Żmudź**; Rus. **Zhmud**), historical region of W. Lithuania. Jewish settlement in the area dates from the 14th century, and it gained in importance under the grand duke Witold of Lithuania, who granted the Jews a number of significant privileges. In the 16th century, especially after the union of Poland and Lithuania (1569), several Jewish communities were established. The Jews acted as government tax collectors, exporters of raw materials to Germany (timber, grain, etc.), and importers of silver and gold objects and manufactured goods.

Samogitia played an important role in the second half of the 17th century, when Lithuanian Jewry had a semiautonomous organization. This came about because of the growth of the already established communities and the creation of many new ones. The area attracted immigrants from other parts of Lithuania and Poland, and in particular refugees from the *Chmielnicki massacres, from which Samogitia itself had been spared. In the early period of the Lithuanian Council (see *Councils of the Lands; which lasted officially from 1623 to 1764) most of the communities of the Samogitia region belonged to the province of Brest-Litovsk, except for those in the vicinity of the Niemen River, which belonged to the Grodno district. In the third quarter of the 17th century Samogitia became a separate administrative unit, named *Medinat Zamet*, and consisted of three districts: *Kedainiai (in the southwest), *Birzai (in the northwest), and Vyžuonis in the east. At its beginning, the entire Samogitia unit had a single rabbinical court, but in the course of time several of the larger communities appointed their own rabbis.

The Kedainiai district, which was the largest, comprised the communities of *Jurbarkas, *Plunge, *Siauliai, *Raseiniai, *Palanga, *Kelme, Kraziai, *Skuodas, and *Telsiai, the spiritual leaders of the district being the rabbis of the *Katzenellenbogen family. The Birzai district consisted of the communities of Salantai, Pasvalys, Seta, Pumpenai, and Pakrojus. The Vyžuonis district comprised the communities of *Braslav, *Druya, *Kraslava, *Utena, and Anyksciai, and its spiritual leaders were the rabbis of the Ginsburg family. Samogitia continued to maintain administrative links with Brest-Litovsk, and the rabbi of Brest-Litovsk attended the Samogitia district meetings and affixed his signature to their minutes. Samogitia was one of the 11 central districts which came under the jurisdiction of the Lithuanian Council, and its name is frequently mentioned in the protocols of the early meetings of the Council which listed the communities paying the poll tax. (The "Council" was abolished in 1764, but the communal

organizations that had been established in Samogitia continued to function for another two decades.) The first census of Lithuanian Jewry, conducted in 1764 and the beginning of 1765, showed a total of 157,250 taxpayers, Samogitia accounting for 15,759, or 10% of the total. In the Third Partition of Poland (1795), Samogitia became a part of the Russian Empire and remained so until 1915, when Lithuania was occupied by German troops. After World War I it became a part of independent Lithuania. At first the main center of the district was Raseiniai and later, Telsiai. During the Nazi occupation (1941–44), Samogitia was a part of Generalbezirk Litauen, and its Jews shared the tragic fate of the rest of Lithuanian Jewry.

As a center of Lithuanian Jewry, Samogitia was also famous as a center of Jewish religious life and learning. There were a number of world-renowned yeshivot in the area, and some of the communities were headed by great rabbis, whose authority extended far beyond their constituencies. When the *Haskalah movement spread in Lithuania, it also found adherents in Samogitia; the influence of German Haskalah was especially strong, due to the geographic proximity of the region to its sources.

[Joseph Gar]

SAMOILOVICH, RUDOLPH (Reuben) LAZAREVICH (1881–1939), Soviet mining engineer and Arctic explorer. Born in Azov-on-Don, Samoilovich qualified as a mining engineer at Freiberg, Germany, and studied law in St. Petersburg. Twice convicted of revolutionary activities, he was exiled to Archangel in 1908 and to Pinega two years later. During the years 1910–15 he joined three expeditions to Spitsbergen, where he discovered high-quality anthracite, and also worked on the Kola peninsula immediately before the Bolshevik Revolution. In 1918 Samoilovich was a founder of what was to become the Leningrad Institute for Arctic Research, which he later headed. His research work took him to the Arctic islands of Novaya Zemlya in 1925–26. He became an international celebrity, however, when he led a Soviet expedition in 1928 to rescue the survivors of General Umberto Nobile's ill-fated Arctic flight in the dirigible *Italia*. After a voyage of seven weeks Samoilovich, on his icebreaker *Krassin*, managed to rescue Nobile and eight other members of the original Italian crew of 15, who by then were facing certain death on a rapidly melting iceberg. The operation made headlines throughout the world and Samoilovich was awarded the Soviet Red Banner of Labor. His account of the expedition, *S.O.S. v Arktike*, was published in 1930, a year after he became a professor at the University of Leningrad. He later explored Franz Josef Land and in 1931 made a flight over the North Pole in a Soviet airship.

SAMOKOV, town in Bulgaria. During the 18th century, the Jews of Samokov were not listed in the tax registers and did not pay taxes. They therefore objected to the arrival of coreligionists from other countries, lest this would prejudice their position. Toward the end of the Ottoman rule (which lasted until 1877), the Jews owned mines, muslin factories, and tanneries. In 1874 the Alliance Israélite opened a mixed school from which many *maskilim* graduated; they later played an important role in banking and commerce. In 1873 there were about 600 Jews in the town; in 1919, 1,000; and in 1943, 374. After the establishment of the State of Israel, the Jews of Samokov immigrated there, together with most of the rest of Bulgarian Jewry.

[Simon Marcus]

SAMOKOVLIIJA, ISAK (1889–1955), Yugoslav author. Samokovlija, who was born in Goražde, Bosnia, was a practicing physician. He published his first story in 1927 and wrote nine volumes of short stories, beginning with *Od proljeća do proljeća* ("From Spring to Spring," 1929) and including post-World War II books such as *Nosač Samuel* ("Samuel the Porter," 1946), *Solomonovo slovo* ("Solomon's Letter," 1949), and *Djerdan* ("The Necklace," 1952). Three volumes of Samokovlija's collected tales appeared in 1951–56.

Samokovlija wrote entirely about Jewish life in Bosnia. Although many of his stories deal with the isolated Jewish existence of the Bosnian Sephardim during the 19th century, a few relate the tragic events of the Holocaust era. Samokovlija generally presents the picture of a Sephardi community in some small town, where the Jews live in self-imposed isolation, having much in common with their non-Jewish fellows, but refusing to assimilate. Between the world wars, Samokovlija also wrote plays: *Hanka* (1931), *Plava Jevrejka* ("The Blonde Jewess," 1932), *On je lud* ("He is Crazy," 1935), and *Fuzija* ("Fusion," 1939).

SAMPTRAS, PETE ("Pistol Pete," "The King of Swing"; 1971–), U.S. tennis player, 1997 U.S. Olympic Committee "Sportsman of the Year." Sampras is considered by many tennis analysts to be the greatest tennis player of all time. He was born in Washington, DC, to a Greek family, though his paternal grandmother was a Sephardi Jew. At the age of seven he began playing tennis, and by the age of 11 was spotted by a tennis enthusiast who correctly identified his talent and arranged for personalized formal training. Sampras turned professional

at age 17 and within two years won his first titles, including the 1990 U.S. Open, where he defeated Andre Agassi to become the youngest player ever to win that tournament. Ironically, Sampras' final match before retirement would be another defeat of Agassi for the U.S. Open title, this time making Sampras the oldest player ever to win the Open. As a professional from 1988 to 2002, he won 762 of 984 matches, capturing 64 singles titles, including a record 14 Grand Slam victories, with eight of them won in straight sets. Throughout his career, Sampras was known for his intense concentration, and especially for his highly accurate 130 mph (209 kph) serve – in 1993, he became the first player to serve over 1,000 aces in a season. Amongst Sampras' other records are his six consecutive years finishing as the Association of Tennis Professionals (ATP) No. 1 ranked player in the world (1993–98), 286 consecutive weeks at No. 1 in the ATP, and seven Wimbledon titles (tied with Willie Renshaw).

[Robert Klein (2nd ed.)]

SAMPTER, JESSIE ETHEL (1883–1938), U.S. poet and Zionist writer. Although she grew up in a highly assimilated home, her father being one of the pioneers of *Ethical Culture, Jessie Sampter became a staunch Jewess, partly under the influence of an elder sister of the poet Emma *Lazarus and of Henrietta *Szold. Her first book, *The Great Adventurer* (1908), was dedicated to Josephine Lazarus. Henrietta Szold, whom she first met in about 1912, persuaded her to write educational material for *Hadassah, notably the popular manual, the first edition of which was entitled *A Course in Zionism* (1915, reissued as *A Guide to Zionism*, 1920, and *Modern Palestine*, 1933). Although a childhood attack of infantile paralysis had left her a semi-invalid, Jessie Sampter emigrated to Palestine in 1919 and at first lived in Jerusalem, where she established evening classes for Yemenite working girls, one of whom she adopted. In 1920 she helped to organize the country's first camp for Jewish scouts at Rehovot. Four years later she herself moved to Rehovot and continued to do social work among the Yemenite Jews there. Her tour of the Jewish pioneering settlements in the Jezreel Valley inspired a series of 15 prose poems, published in 1927 as *The Emek*. These vivid sketches of kibbutz life had an important influence on U.S. Zionist circles before World War II. In 1933 she joined kibbutz Givat Brenner and used the proceeds of the sale of her Rehovot house to build a convalescent home at the kibbutz.

Jessie Sampter's writing – which she sometimes published under the pen name Hashunamit – include *Brand Plucked from the Fire* (1937), a collection of poems on her attitude to Judaism and Zionism, which was translated into Hebrew by Pinhas Lander in a specially vocalized text (*Ud Mužal me-Esh*, 1944–45). Like *The Emek*, her last poem, "Palestinian Portrait," described the harsh realities of Jewish immigrant life in her day. Her prose works include *The Seekers* (1910); *The Book of the Nations* (1917); and "Testimony," a documentary account of the Arab riots and Hebron massacre of 1929 (published in *The New Palestine*, Sept. 27 / Oct. 4, 1929). She also wrote a

volume of poems entitled *The Coming of Peace* (1919); *Around the Year in Rhymes for the Jewish Child* (1920); *Far Over the Sea* (1939), translations of *Bialik's poems for children; and two essays on Ecclesiastes, which appeared posthumously in Hebrew and English. *The Speaking Heart* and *In the Beginning*, two works of autobiography, were not published.

BIBLIOGRAPHY: B. Badt-Strauss, *White Fire* (1956).

SAMRA, DAVID (d. 1960), Iraqi jurist. After practicing law, he was appointed a judge to the *Mosul court of appeals in 1908. The following year he was appointed to a similar post in *Syria. Returning to *Baghdad, he resumed his legal practice, maintaining it until after the British conquest of *Iraq, when he was reappointed to the bench. In 1919 he became a judge on the Baghdad court of appeals and in 1923 deputy president of the court, the highest rank held by an Iraqi (the president of the court being British). From 1921 until his death he also served as a lecturer at the law school in Baghdad.

[Haim J. Cohen]

SAMSON (Heb. שִׁמְשׁוֹן; from *shemesh*, "sun"), son of Manoah, a Danite living in Zorah, a judge in Israel. Samson's heroic exploits are recounted in Judges 13–16.

His father was married to a woman who long remained childless. An angel of the Lord appeared to her to announce that she would give birth and that since the son whom she was carrying was to be a Nazirite from the womb, she herself was forbidden to partake of wine or strong drink or to eat anything unclean; it is possible that her husband was under the same restriction. Once the child was born, she was not to allow his hair to be cut (cf. Num. 6; see also 4Q Sam. 1:23 where Samuel is similarly described as a Nazirite from birth). The angel also announced that this child was destined to "begin to save Israel from the hand of the Philistines." In a second appearance, this time before Manoah as well as his wife, the angel substantially repeated his earlier message and then rose to heaven in the flames of Manoah's burnt offering, to the awe-struck wonder of the couple (Jud. 13:2–25).

All of the incidents recorded from the life of Samson stem from his involvement with three women. The first was a Philistine woman from Timnah (not to be confused with the Judahite town of that name). Samson demanded that his parents arrange his marriage to her. They were reluctant to have their son marry a woman from among the "uncircumcised" Philistines, but they were unaware that this was part of the Lord's plan by means of which an excuse to attack the Philistines would be obtained (14:1–4).

Samson's first heroic adventure took place on his way to Timnah to arrange the marriage. About to be attacked by a lion, he was seized by the spirit of the Lord, and he slew the beast barehanded. He later returned to the scene of this adventure and, finding that a swarm of bees had collected in the carcass of the lion, lustily partook of their honey, even

bringing some to his parents, whom he did not inform of its origin (14:5–9).

Arriving at Timnah, Samson held a wedding feast at which he posed a riddle based on his adventure with the lion, and bet with the guests that they would not be able to solve it. The Philistines, unable to solve the riddle, enlisted the help of Samson's bride, who cajoled him into telling her the answer. When the Philistines responded correctly, Samson realized that his secret had been betrayed. He was again infused with the spirit of the Lord and rushed to Ashkelon, where he single-handedly slew 30 men in revenge and then angrily returned to his parents' home, leaving his wife behind to be given to a companion (14:10–20).

When Samson returned to discover the fate of his wife, he vented his rage on the Philistines by tying 300 foxes in pairs by their tails with firebrands inserted between them and letting them run loose through the fields of the Philistines. When the latter took revenge on the family of his Timnaite wife, Samson in turn wreaked terrible vengeance upon them and then withdrew to the rock of Etam in Judah (15:1–8).

When the Philistines then encamped at Lehi, the Judahites, fearful of attack, sent a 3,000-strong delegation to Samson demanding that he surrender himself to the enemy. Samson agreed on a Judahite promise of safe-conduct. He was bound with two new ropes and brought to the Philistine camp where the spirit of the Lord came upon him, enabling him to snap the ropes and to kill 1,000 Philistines with the jawbone (*lehi*) of an ass. This story is an etiology for the place name. A second etiology explains the name of a spring at Lehi. This spring is said to have appeared after Samson called upon the Lord to provide water with which to quench his great thirst after the battle. Accordingly the spring was called En-Hakkore, "the spring of him who called" (15:9–20).

The second Philistine woman with whom Samson became involved was a prostitute from Gaza. The Philistines surrounded her house in the hope of seizing Samson when he emerged in the morning, but the plan was foiled when he arose in the middle of the night, uprooted the city gate, and carried it off to a hill in the vicinity of Hebron, about 40 miles away (16:1–3).

The third woman, who caused Samson's ultimate downfall, was *Delilah. Although not specifically identified as a Philistine, she conspired, for a price, with the Philistine rulers to ascertain the source of Samson's strength. After three unsuccessful attempts, she finally induced him to divulge that the secret lay in his unshorn locks of hair. Thereupon, she (see Sasson) shaved off his seven locks while he slept. Deprived of his strength, Samson was seized by the Philistines, who blinded and incarcerated him (16:4–21).

Some time later, the Philistines gathered in their temple for a religious festival and had Samson entertain them there. Samson, whose hair had meanwhile grown again, had his guide place his hands on the temple pillars. Then, uttering a final prayer to the Lord for vengeance, he seized them and brought the building toppling down, killing himself and the

3,000 worshipers (16:22–30). The final note of Samson's burial in his ancestral tomb between Zorah and Eshtaol closes the narrative (16:31).

The Samson stories are significant in that although their present form contains late linguistic features, they paint a picture of life in the Shephelah on the border between Judah, Dan, and Philistia during the late 12th or early 11th century B.C.E., before the Danite migration to the north. At this time, although Philistine pressure was beginning to be felt, as is reflected in the narrative, there was still open intercourse and trade between the Philistine and Israelite populations, a fact attested by the numerous Philistine artifacts found in the excavations of the Israelite settlement at Beth-Shemesh from this period. Since Israel at this time was not engaged in full-scale hostilities with the Philistines, Samson, unlike all the other judges, is never depicted as leading an army in battle or as having "saved" Israel from the Philistines. Rather it is told that he "began to save Israel" from them (13:5). He is the only judge who fell into enemy hands and who died in captivity. He is said to have "judged" Israel for 20 years (15:20; 16:31).

Elaborate theories about the possible mythical nature of the Samson narratives have been widespread, inspired particularly by the fact that the name Samson obviously contains the word for sun (*shemesh*) and that Samson's home was in Zorah which was situated on a mountain ridge north of the Wadi Sorek, directly opposite Beth-Shemesh, a place whose very name means "Temple of the Sun." Further evidence of mythology has been sought in the name Delilah, in which the Hebrew word for night (*laylah*) may be construed to appear. However, although some elements in these narratives may have been inspired by mythological heroic tales, their overall nature with their exuberant earthiness seems to point overwhelmingly to their folk origins as tales of the daring adventures of a superhuman hero against the foreign oppressor.

[Myra J. Siff]

In the Aggadah

Samson's birth is a striking example of the shortsightedness of humans. The judge Ibzan (identified as Boaz) had not invited Samson's parents to any of the 120 feasts in honor of the marriages of his 60 children because he thought that "the sterile she-mule" would never be able to repay his courtesy. However, Samson's parents were blessed with an extraordinary son, while Ibzan's 60 children died during his lifetime (BB 91a).

Samson's strength was superhuman and the dimensions of his body were gigantic. He measured 60 ells between his shoulders, but was maimed in both legs (Sot. 10a). He uprooted two great mountains and rubbed them against each other as though they were pebbles. Whenever the Holy Spirit rested on him he emitted a bell-like sound which could be heard from afar. While the spirit remained with him he could cover the distance between Zorah and Eshtaol in one stride (Lev. R. 8:2; Sot. 9b–10a). Samson's supernatural strength made Jacob think that he would be the Messiah (Gen. R.

98:14). Abraham's covenant of peace with the Philistines was only valid for three generations (Gen. R. 54:2), and for this reason Samson was permitted to wage war with them.

Samson was not without virtues. He was totally unselfish and never asked for the smallest service for himself. When Samson told Delilah that he was a "Nazirite unto God," she was certain that he had divulged the true secret of his strength since she could not imagine that Samson would couple the name of God with an untruth. But he allowed sensual pleasures to dominate him, with the result that "he who went astray after his eyes, lost his eyes" (Sot. 9b). He continued his profligate life in prison, and the Philistine women set aside all consideration of marital bonds in the hopes of gaining offspring who would inherit his strength and stature (Sot. 9b–10a).

Before his death, he entreated God to realize in him the blessing of Jacob (Gen. 27:28) and to endow him with divine strength (Gen. R. 66:3). He expired with these words upon his lips: "O Master of the Universe, vouchsafe unto me in this life recompense for the loss of one eye. For the loss of the other I will wait to be rewarded in the future." So great was the fear he inspired that the Philistines did not attack the Israelites for 20 years after his death (TJ, Sot. 1:8, 17b). Identified with Bedan (1 Sam. 12:11), and so called because he belonged to the tribe of Dan, he is regarded as one of the most unworthy of leaders. Nevertheless "Bedan in his generation is as Aaron in his" (RH 25a–b).

[Aaron Rothkoff]

In the Arts

Samson, as one of the classic heroes of the Jewish people, has inspired innumerable writers, artists, and musicians. In the early literature of the Church he was generally seen as a prefiguration of Jesus and this interpretation was particularly evident in Christian works of the Middle Ages, although he was sometimes also equated with Hercules in classical legend. However, Samson was not given special prominence in the medieval mystery plays and only began to figure prominently in the works of Renaissance writers. Among these were Alessandro Roselli's Italian miracle play, *La Rappresentatione di Sansone* (Florence, 1551); the German *Meistersinger* Hans Sachs's tragedy, *Simson* (1556); a Hungarian verse play by Péter Kákonyi (1550–60); and *Samson* (1599), a Danish play by H.J. Ranch of Vibourg. The theme became increasingly popular in the 17th century, particularly among Protestant writers who tended to regard Samson as a symbol of the Reformation's struggle with the tyranny of Rome. In England, *Sam(p)son*, a biblical drama by the writers Rowley and Jewby, was staged in 1602 and in one scene Samson appeared carrying the town gates on his neck, to the delight of the Elizabethan audience. In Germany the baroque writer Philipp von Zesen turned to a new literary genre with his novel, *Simson* (1679). Interest in the subject was not, however, confined to Protestants. The English Catholic *Stonyhurst Pageants* (c. 1625) include one about Samson, and in Holland Joost van den Vondel, a Protestant convert to Catholicism, published the five-act tragedy

Samson (1660). The Converso writer Juan Pérez de Montalván (1602–1638) wrote *El divino nazareno Sanson* (published in Seville, c. 1720) and, in the Marrano diaspora, the playwright Antonio Enriquez *Gómez published a biblical epic, *El Sansón nazareno* (Rouen, 1656). The outstanding 17th-century treatment of the theme – and, perhaps, the loftiest interpretation in Western literature – was John *Milton's *Samson Agonistes* (1671), a drama in the strict Greek classical tradition that has been more studied than performed. In the blind Hebrew judge Milton clearly saw a representation of his own plight, and echoes of the story reverberate throughout his writings. Milton's Samson is, by comparison with the figure portrayed in the Bible, highly idealized; and his drama has been acclaimed as the zenith of biblical playwrighting in the Protestant tradition, the English of the Puritan Commonwealth representing the "New Israel." In the late 19th century a Hebrew translation of *Samson Agonistes* was published by the Manchester writer J. Massel (*Shimshon ha-Gibbor*, 1890).

Apart from oratorios, a five-act opera by Voltaire (1733) that never reached the stage, some Spanish *Relaciones burlescas* of the 1760s, and a poem by William *Blake (in *Poetical Sketches*, 1783), the only significant treatment of the 18th century was Moses Ḥayyim *Luzzatto's early verse play, *Shimshon ve-ha-Pelishtim*, best known as *Ma'aseh Shimshon* (1724), a product of the Italian Hebrew revival written in a colorful style. However, the political and literary conflicts of the 19th century revived serious interest in the theme. A. Carino's Italian poem, *Nascita, vita, e morte di Sansone* (Naples, c. 1820), was followed by S.S. Raschkow's Hebrew poem, *Ḥayyei Shimshon* (1824) and by another in Hungarian by Mihály Tompa (1863). An unusual interpretation of the biblical story was the French poet Alfred de Vigny's "La Colère de Samson" (in *Les Destinées*, 1864). Here the betrayed and outraged Hebrew expresses Vigny's own stoicism and violent misogyny. There have been many treatments of the subject by writers of the 20th century, notably dramas such as Frank Wedekind's *Simson oder Scham und Eifersucht* (1914); the Albanian Fan S. Noli's *Israélite dhe Filistine* (1907); Sven Lange's Danish *Samson og Dalila* (1909); and a five-act tragedy by the Russian dramatist Leonid Nikolayevich Andreyev (translated by Herman Bernstein as *Samson in Chains*, 1923).

Predictably, the theme has proved especially attractive to modern Jewish writers, who have laid varying interpretations on the character of Samson. Two early 20th-century works, Jaroslav *Vrchlický's dramatic Czech *Trilogie o Simsonovi* (1901) and Hugo *Salus' German biblical poem, "Simson," led the way, to be followed by Samson Zuckerman's four-act Hebrew drama, *Gevurat Shimshon* (1906), and the more original *Samson* (1907), a French drama by Henri-Leon *Bernstein, in which Delilah, a gold digger, is typical of the writer's unattractive anti-heroines. Most of the later literary treatments by Jews have been in the form of the novel. These include *Simson de Godgewijde* (1927–29) by the Dutch writer Israël *Querido; Vladimir *Jabotinsky's *Samson nazorey* (1927; *Samson the Nazirite*, 1930); Felix *Salten's *Simson, das Schicksal eines Er-*

wahlten (1928; *Samson and Delilah*, 1931); and Saul Saphire's Hebrew novel, *Shimshon ha-Gibbor* (1935). Two works on the theme by writers of the post-World War II era were Kazimierz Brandys' Polish novel, *Samson* (1948), which forms part of a tetralogy (*Między wojnami*, 1948–51), and *Ahavat Shimshon* (1951–52) by the Israeli poet Lea *Goldberg.

In art, too, the Samson theme has enjoyed an enduring popularity. The story of Samson is represented in five fourth-century bas-reliefs in marble from the Santa Restituta chapel in Naples Cathedral. It is later found in many manuscripts including scenes in Hebrew manuscripts such as the 13th-century French *British Museum Miscellany* (add. 11639) and the 15th-century *Second Nuremberg Haggadah* (Schocken Collection, Jerusalem). The story was also illustrated in stained glass and in the round. Later the subject held a particular fascination for *Rembrandt, who painted many pictures of Samson. Early works by Rembrandt are his Samson's wedding (Judg. 14:10; Dresden), in which the sprawling giant propounds the riddle to his guests, and Samson threatening his father-in-law (Judg. 15:3; Berlin Museum). In the Middle Ages, Samson was regarded as one of the many prototypes of Jesus. The most popular episode in medieval art was therefore Samson rending the lion (Judg. 14:5–6) because it was understood to represent Jesus triumphing over Satan and breaking the jaws of Hell. It was very common in 12th-century sculpture and enamelwork throughout Western and Central Europe.

Samson and Delilah (Judg. 16:4–20) has been a favorite subject of artists in recent centuries. There is a grisaille painting by Mantegna (1431–1506; National Gallery, London) and a painting by Tintoretto in the collection of the Duke of Devonshire. The subject was particularly popular in northern Europe. In a painting now in the Augsburg Museum, Lucas Cranach showed Samson asleep on Delilah's lap against a mountainous landscape. There are paintings by Rubens (private collection), Van Dyck (1599–1661; Dulwich Gallery, London), and Rembrandt (Berlin Museum). Max *Liebermann painted a violent, sensual, and strangely modern study of Samson and Delilah, with both characters in the nude, and Jacob *Steinhardt made a similarly erotic woodcut of the subject. The capture and the binding of Samson (Judg. 16:21) and the final scene of the story, Samson tearing down the temple of Dagon (Judg. 16:29–30), were often favorite subjects for artists.

A musical dialogue between Samson and Delilah, *Samson dux fortissime*, appears in the Harleian Ms. 978 (13th century) and is something of a historical enigma (cf. G. Reese, *Music in the Middle Ages* (1940), 244). In the second half of the 17th century there were stock Italian oratorios, including *La caduta de' Filistei* by Veracini (1695; libretto only survived) and *Samson vindicatus* by Alessandro Scarlatti (1696; music lost). Voltaire's *Samson* was set by Rameau (1732), but not performed; another setting was made at the beginning of the 19th century by Stanislas Champein, and a third in 1890 by Wekerlin. Milton's *Samson Agonistes* was the basis of Newburgh Hamilton's libretto for Handel's oratorio, *Samson*, which had

its première at the Covent Garden Theatre, London, in 1744. Works on the subject composed at the end of the 18th and beginning of 19th century are notable only for the fact that they mark the transfer of the subject to the stage. Camille Saint-Saëns' opera, *Samson et Dalila* (text by Fernand Lemaire), had its first performance at Weimar, in a German translation, in 1877. Delilah's aria, "Softly awakes my heart..." has remained a standby for every mezzo-soprano. Rubin *Goldmark was the composer of a symphonic poem, *Samson* (1913); Nicholas Nabokov wrote incidental music to Milton's *Samson Agonistes* (1938); and Bernard *Rogers devoted a one-act opera, *The Warrior*, to the Samson and Delilah story (1947). At the beginning of the Israel War of Independence Marc *Lavry wrote his *Z'ed Shimshon* (text by Avigdor *Hameiri) for tenor solo, three-part men's choir, and orchestra ("March, Samson, towards Philistia... march, thou regiment of a desperate nation...") as a topical choral piece.

SAMSON, BENJAMIN ABRAHAM (1916–), Indian naval officer. Samson, a member of the *Bene Israel community, was born in Poona. He received a direct commission as lieutenant to the Royal Indian Navy in 1939. After serving in the Royal Navy in the Mediterranean, the Red Sea, and the Bay of Bengal, his was the last vessel out of Rangoon, the capital of Burma, when it fell to Japanese forces. He was commissioned in the Indian Navy when India gained its independence and, in 1948, was appointed naval adviser on the staff of the High Commissioner for India in the United Kingdom. In 1951 he was promoted to rear-admiral, the youngest to hold this rank in the Indian Navy. He served as commandant of the Indian National Defence College and was appointed flag officer of the fleet in 1965. In the following year he received the Vishisht Seva (Distinguished Service) Medal, Class I, for "distinguished service of a most exceptional order." On his retirement in 1968 he became superintendent of the Magazon Naval Dock Yards in Bombay, and in 1972 was promoted to the honorary rank of vice admiral by the president of India, for "loyal and dedicated" service.

SAMSON BEN ABRAHAM OF SENS (late 12th–early 13th century), one of the great French tosafists, known also as

Ha-Sar ("the prince") of Sens. He was the brother of *Isaac b. Abraham (Rizba) and grandson of *Samson b. Joseph of Falaise, brother-in-law of Jacob *Tam. In his youth he studied under Tam and Ḥayyim *ha-Kohen, but his main teacher was *Isaac b. Samuel of Dampierre. His authority was widely recognized, even beyond France. During the first *Maimonidean controversy (1202), the French rabbis were requested to express their views in the dispute between Meir *Abulafia, who attacked Maimonides, and *Aaron b. Meshullam of Lunel, who defended him. Samson replied on behalf of the French rabbis in lengthy letters. He sharply criticized the *Mishneh Torah*, describing its defects, and even advising against its study. He particularly opposed Maimonides' view on resurrection. On the other hand, he expressed profound esteem for Maimonides himself, concluding "that the gates of understanding were opened to him, enabling him to see wonders in the divine Torah." However, his attitude did not satisfy the opponents of Maimonides. On a much later occasion (1235), Abraham, the son of Maimonides, referring to an unconfirmed report that Samson had disagreed with his father, vigorously denied that he had excommunicated him.

The extent of Samson's ties with Germany is not known. However, his works circulated and were accepted there. Isaac of Vienna (see *Or Zaru'a*, 3 (1887); BK, no. 436) writes of him, "he was unique in his knowledge and his wisdom." He composed *tosafot*, known as *Tosafot Sens*, on almost the whole of the Talmud (see Urbach, *Tosafot*, p. 232ff. for detailed list).

Some of those printed in the standard editions of the Talmud are actually from his pen (RH, Suk., Men., Bek.), while others are the work of his disciples and their disciples (Shab., Er., Yev., Ket., BM, BB). Other collections of *tosafot*, such as those of Touques and of Asher b. Jehiel, are based on them. His *tosafot* on *Pesahim* were published (1956), others are still in manuscript. His commentary on the *mishnayot* of *Zera'im* (excluding *Berakhot*) and *Tohorot* (excluding *Niddah*) is the most important commentary on these orders, and it was made use of by all later commentators, such as Asher b. Jehiel and Obadiah of Bertinoro. He is known to have written a commentary on *Shekalim*, *Eduyyot*, and *Kinnim*, which has not come down to us. The one printed as *Tosafot Sens* on *Eduyyot*, *Makkot*, and *Sotah*, as well as the commentary on the *Sifra*, have been erroneously attributed to him. Jacob of Courson, one of his disciples, collected his responsa and halakhic decisions in a work which has not been preserved. Urbach gives a list of his responsa which are scattered among the works of the halakhic authorities (*Tosafot*, 264).

At the beginning of the 13th century Samson migrated to Erez Israel (Graetz' view that he went with the 300 French rabbis in 1211 is unsupported), and he is therefore sometimes referred to as "of Erez Israel" or "of Jerusalem." Maimonides' son Abraham states that they did not meet because Samson did not pass through Egypt; he would therefore appear to have sailed directly to Acre. He lived in Jerusalem and Acre, where he died, and was buried at the foot of Mount Carmel.

Urbach gives the date of his death as before 1216, but others date it c. 1230.

[Shlomoh Zalman Havlin]

SAMSON BEN ELIEZER (b.c. 1330), German scribe and authority in his vocation. Samson was born in Saxony. When still a child he was taken to Prague by his parents, who died there when he was eight years old. The community thereupon apparently apprenticed him to a Torah scribe called Issachar. Issachar passed on to Samson many oral traditions and much professional lore, and also gave him an ancient *Tikkun* (“compendium on the laws of writing *tefillin*”) compiled by the scribe Abraham b. Moses of Sinzheim, who had been a pupil of Meir b. Baruch of Rothenburg and who had devoted his life to clarifying the regulations concerning the writing of scrolls of the Pentateuch, *tefillin*, and *mezuzot*, in which all the pertinent material was carefully collated. Samson eventually became so proficient in this craft, particularly in the writing of *tefillin*, that his fame spread throughout Germany. He revised Abraham’s work and added his own notes, the resulting work being known as *Sefer Barukh she-Amar*. Samson was also known as *Barukh she-Amar* from the melodious manner in which he rendered the prayer beginning with these words whenever he functioned as *hazzan*. Samson achieved great importance as a preserver of the German tradition in the sphere of *halakhah*, based as it was primarily upon the authority of Meir of Rothenburg. Samson’s work was written after he had emigrated to Erez Israel and had seen the great neglect of his profession in that country. He succeeded in introducing there many improvements in the writing of *tefillin* and was instrumental in the disqualification of scribes whose writing he found unacceptable. Samson is known to have traveled in various places, and to have examined and invalidated *tefillin* with the approval of the local scholars in the district of Lausitz and in Erfurt, Germany.

An incomplete version of *Sefer Barukh she-Amar* was published in Dubnow in 1796, under the title *Dinei Ketivat Tefillin*. The complete version was apparently first published in Shklov in 1804. The published work contains the notes of Yom Tov Lipmann Muelhausen – which can possibly be distinguished from the text of the book since they are devoted exclusively to the laws of the *Sefer Torah*. The *Perush... Al Zurot Otiyyot ha-Alef Bet*, which is the second part of the book, is entirely the work of Yom Tov Lipmann – based upon Samson’s work. The text in our possession is in a state of considerable disorder, text and notes by many hands being so intermingled as to be practically indistinguishable, though later additions can sometimes be recognized. Similar disorder is to be found in the many manuscripts of the book still in existence. The book was known to all the great *posekim*, among them Jacob

*Moellin, Joshua *Soncino, David Blumes, who lived in Erez Israel (cf. *Responsa Maharshah*, no. 37), and Elijah *Shapira.

[Israel Moses Ta-Shma]

SAMSON BEN ISAAC OF CHINON (14th century), one of the last French tosafists. Samson was nevertheless the first tosafist to write a work on talmudic methodology, *Sefer Keritut*. In it he incorporated the whole of the methodological material embodied in the *tosafot* literature. The first four parts of the book deal with the *hermeneutical rules, with the chronology of the *tannaim* and *amoraim*, and with the principles on which the *halakhah* is decided in cases of difference of opinion. The fifth part, *Leshon Limmudim*, which is also the most comprehensive, deals with the methods of talmudic hermeneutics, and with the methods of the Mishnah, *baraita*, and Talmud. In the course of his presentation Samson enters into detailed discussion, in the manner of the tosafists, maintaining that from such discussion there emerge more principles and methodological rules. Early methodological works, such as *Seder Tanna'im ve-Amora'im* and the letter of Sherira Gaon, served Samson chiefly for the first four chapters, the last chapter, his main work, being based entirely on the tosafists. The work shows little originality, but its main importance lies in the systematic assembly of the material and the manner in which he clarifies it. The *Sefer Keritut* was first published in Constantinople in 1515 and has been frequently republished, together with commentaries by various scholars, among them Jacob *Hagiz. In his work Samson speaks of having written *tosafot* on the Talmud, but none of these is extant. In the responsa of *Isaac b. Sheshet (no. 157) Samson is reported, in the name of Perez b. Isaac ha-Kohen, to have opposed Kabbalah and the doctrine of the *Sefirot, saying: “I pray child-like.” Isaac b. Sheshet referred to him as the “greatest rabbi of his generation.”

[Israel Moses Ta-Shma]

SAMSON BEN JOSEPH OF FALAISE (12th century), French tosafist. Samson was an older contemporary of Jacob Tam, with whom he corresponded and who addressed him with exceptional humility (see *Sefer ha-Yashar*, responsa, nos. 3 and 4). He may have been a pupil of Rashi. His sister Miriam was the second wife of Tam, and after his death she was consulted by scholars as to her husband’s customs and observances. Some of Samson’s teachings are included in the novellae section of the *Sefer ha-Yashar*, and he is mentioned in the printed *tosafot* to several tractates. The *rishonim* quote from an extensive halakhic work by him which is no longer extant. Samson apparently met a martyr’s death and his remains were handed over for burial only six months after his death. The two renowned tosafists, *Isaac b. Abraham and his brother Samson of Sens, were his grandsons. The Eliezer of

Falera mentioned in the *tosafot* to *Bava Batra* (79b) may have been his son-in-law.

BIBLIOGRAPHY: Gross, Gal Jud, 477–8; Urbach, *Tosafot*, index.

[Israel Moses Ta-Shma]

SAMSON BEN SAMSON OF COUCY (called **ha-sar mi-Coucy**; 13th century), French tosafist. Samson, a descendant of Joseph *Bonfils, belonged to a distinguished family of French scholars. Judah of Corbeil was his uncle and *Moses of Coucy his brother-in-law. He was one of the younger pupils of *Isaac b. Samuel of Dampierre, but his main teacher was *Judah b. Isaac, Judah Sir Leon of Paris. His words are quoted frequently in the standard *tosafot* on several tractates, and many citations from his rulings and responsa, as well as remnants of his *tosafot*, have been preserved in the works of *rishonim*. Samson was a teacher of *Isaac b. Moses Or Zaru'a, and also, apparently, of *Hezekiah b. Jacob of Magdeburg.

[Israel Moses Ta-Shma]

SAMSON HA-NAKDAN (13th century), Hebrew grammarian and vocalizer, who lived in Germany. It may be conjectured that Samson lived in Xanten, and he was apparently the grandfather and teacher of *Joseph b. Kalonymus ha-Nakdan of Xanten. He was the author of *Maftē'ah ha-Dikduk* (Cat. de-Rossi No. 3891) which Steinschneider believed to be identical with the *Sefer Kelalei ha-Dikduk* (Cat. Berlin no. 29; Vatican No. 296). He also wrote the *Hibbur ha-Konim*, which is also called *Sefer ha-Shimshoni*, on the *masorah. In his book he quotes the main medieval grammarians.

Eldan, “*Mi-Kitvei Askolat ha-Dikduk ha-Ashkenazit-ha-Shimshoni*,” in: *Leshonenu*, 43 (1979), 100–111; 201–210; D. Ben-Menahem, *Hibbur ha-Konim le-Rabbi Shimshon ha-Nakdan* (1987)

SAMTER, ERNST (1868–1926), German historian of ancient religions. Samter, who was born in Posen, taught in Danzig and Berlin before being appointed professor at the Berlin Gymnasium zum Grauen Kloster in 1925. In 1913 he founded the Institute for the Study of Religions, bringing together theologians, philologists, philosophers, ethnologists, and folklorists for the comparative study of religion.

His works include *Familienfeste der Griechen und Roemer* (1901); *Geburt, Hochzeit und Tod, Beitrage zur vergleichenden Volkskunde* (1911); *Die Religion der Griechen* (1914); *Griechische Sagen* (1925); and *Die Goetter der Griechen* (1926). His interest in education is indicated by several books, including his work on folklore in the teaching of classical languages, *Volkskunde im altsprachlichen Unterricht*, 1 (1923). He also contributed to Jewish history, including studies on antisemitism in ancient Greece and Rome.

[Irwin L. Merker]

SAMUDA, JOSEPH D'AGUILAR (1813–1885), British ship-builder and railway pioneer. Born in London to Sephardi parents – his father was a broker and overseas merchant – Samuda became an engineer in partnership with his brother JACOB (1811–1844). From 1832 to 1848 Samuda Brothers, their firm, were leading builders of marine engines and, from the early 1840s, leading iron shipbuilders, especially for the Royal Navy, responsible for many engineering innovations. Samuda was vice president of the Institution of Naval Architects and, from 1865 to 1880, served as a Liberal member of Parliament. He is best remembered, however, as a pioneer with his brother of “atmospheric railways,” engineless trains propelled by creating a vacuum in front of the train in a pneumatic tube adjacent to the track. The Samuda brothers patented this invention in 1839. Although some examples of “atmospheric railways” were built by the Samudas and others, especially a route they constructed in south Devon in the early 1840s, the technology simply did not exist at the time for these to work on a regular basis, and steam-driven trains remained unchallenged for many decades.

BIBLIOGRAPHY: ODNB online.

[William D. Rubinstein (2nd ed.)]

SAMUEL (Heb. שְׁמוּאֵל), Israelite judge and prophet who lived in the 11th century B.C.E. His name is very close to that of the ancient Babylonian royal ancestor of Hammurapi, Sūmū-la-il, and similar in form to other *Amorite names such as Sūmū-Abum, Sūmū-Samas, and others (HALOT, 1438). Standing at the close of one era and the beginning of another, Samuel was instrumental in the painful, but necessary, transition from a loose confederation of Hebrew tribes to a centralized monarchy. He played a part in events which eventually saw his people completely freed from subjection to the Philistines and from the threat of the utter loss of national life.

The Biblical Account

The record of Samuel's career in 1 Samuel 1–16, which is intricately interwoven with that of Saul, the first king, involves many baffling questions. It tells a story about the birth of a “child of prayer” to Hannah and Elkanah in an Ephraimite home in Ramathaim-Zophim (1:1) or Ramah (1:19). His mother dedicated him to a Nazirite life in the important sanctuary of Shiloh (1:11, 28; 2:11; 3:1). Here the aged priest *Eli, whose sons were lewd and impious good-for-nothings, officiated (2:12–17, 22–25). A rare divine revelation came to the boy in the night, involving terrible judgment on the house of Eli; and this was the beginning of a career that marked Samuel as a “prophet of YHWH” (3:20). Chapters 4–6 recount the shattering defeat of the Hebrews by the well-equipped Philistines; worst of all, the ark of YHWH was captured, the immediate house of Eli wiped out, and, probably (Jer. 7:12, 14), the vital Shiloh sanctuary was permanently razed.

Samuel is next depicted as a “judge” (1 Sam. 7), first in the sense of a charismatic deliverer in a battle of miraculous proportions (verse 13 seems to be highly idealized) and then

as an arbiter of disputes, traveling over a considerable area covering Bethel, Gilgal, Mizpah, and Ramah (7:16–17). Samuel was married and had two sons, Joel and Abijah, who acted as judges in Beer-Sheba (8:2; cf. 1 Chron. 6:13).

Two or more divergent accounts of the founding of the monarchy follow. One (9:1–10:16) is favorable to the kingship regarding it as the answer to the desperate needs of the hour. Another (7:3–8:22; 10:17–19; 12:1–25) reacts, sometimes violently, against such a move. Some think there is a third account (10:20–11:15; see *Samuel, Book of; see below, Critical Evaluation). One cannot be completely certain about Samuel's attitude toward the people's request for a king (cf. 10:1 with 10:19). It is clear, however, that the political crisis demanded a much more closely knit government if the Hebrews were to survive as an entity.

One account has an Ammonite attack on Jabesh-Gilead pushing the handsome Benjaminite Saul into a position where, after an impressive victory, he was publicly acclaimed as king (chapter 11). Another shows Samuel's gift of clairvoyance aiding Saul in locating his father's lost donkeys. Samuel then acted as priest at the local hill shrine and by divine revelation he anointed, the next morning, the surprised Saul as leader or prince (*nāgid*) of Israel to rescue her from her pressing foes. Shortly thereafter, in a public conclave at Mizpah, Samuel cast the sacred lot and Saul was chosen; then the older man delivered an address explaining the rights and responsibilities of a king, and a written record was made. An immediate clash with the Philistines followed; first a small-scale outpost skirmish, then a significant victory. However, in 7:3–8:22; 10:17–19; and 12:1–25, Samuel denounces the idea of monarchy as apostasy, since the Lord has always been the king and savior of Israel. Yet by divine revelation Samuel is directed to give grudging consent (8:22).

Chapter 15, a later account evidently based on earlier tradition, portrays a heartrending break between Samuel and Saul, a permanent and devastating rejection of the king (15:34–35; but cf. 19:24). This had already been foretold (e.g., 13:13–14). It is not clear whether the issue was simply the king's failure to obey the provisions of the **herem* of the holy war, or whether it was that Samuel surmised that Saul was aspiring not only to political but also to religious prerogatives. At any rate, except for his mention as head of a band of ecstatic prophets in 19:18–20, his death notice in 25:1, and a séance in which his ghost was brought back in chapter 28, Samuel permanently leaves the stage.

Critical Evaluation

Scholars (e.g., A. Weiser) have moved somewhat away from seeing completely mutually exclusive (pro-monarchical and anti-monarchical) accounts in 1 Samuel 1–16. The alternative is a series of varying concepts that developed in different circles, and existed side by side. Such traditions were finally strung together somewhat loosely without an attempt at reconciling them. Moreover I. Mendelsohn showed that the Israelites would have been quite aware of the dangers of oppressive

monarchical government from what they saw around them in their own century. Thus Samuel 8:11–17 does not need to be a late reminiscence, as was once claimed. Nonetheless, one must allow for idealization in certain of the traditions. While many questions cannot be answered with certainty, it is clear that Samuel played a powerful part in the formation of the monarchy, and the titles of seer, prophet, judge, and priest are indicative of his influence, perhaps in different circles. As is true of Moses, so many roles are assigned to him that it is difficult to define the historical nucleus of the Samuel traditions. He was later claimed as a levite (1 Chron. 6:12–13), as one of the founders, with David, of the system of gatekeepers of the Tent of Meeting (1 Chron. 9:22), as a great intercessor comparable to Moses (Jer. 15:1), and as ranking with Moses and Aaron. According to Ps. 99:6, God spoke to Samuel along with Moses and Aaron in the Cloud Pillar. The Bible portrays Samuel as an incorruptible leader (1 Sam. 12:3–5), and as the Lord's spokesman in guiding Israel, in critical days, from the old era into the new, and her greatest leader since Moses.

[John H. Scammon / S. David Sperling (2nd ed.)]

In the Aggadah

Even before his birth, "a heavenly voice went forth" and proclaimed the imminent delivery of a righteous man. When people observed his deeds, they were certain that he was this righteous individual (Mid. Sam. 3:4). Shortly before Samuel's novitiate in the sanctuary, Eli succeeded to the three highest offices in the land, those of high priest, president of the Sanhedrin, and ruler over Israel (Tanḥ. Shemini, 2). However, Eli's sons were not worthy to succeed him, but "Before the sun of Eli set, the sun of Samuel rose" (Gen. R. 58:2). The greatness bestowed on Samuel was not granted to any other king or prophet. No one ever challenged his authority and five terms of praise were applied to him: faithful, honored, prophet, seer, and man of God (*Mishnat R. Eliezer*, p. 151). He rebuked the people shortly before his death, refraining from doing so earlier lest people be embarrassed upon meeting their censurer (Sif. Deut. 2). Samuel was an incorruptible judge, who refused compensation even when he was legitimately entitled to it (Ned. 38a). He went on circuit to judge the people in order to spare them the trouble of coming to him. Accordingly, God spoke directly to Samuel, unlike Moses who first had to go into the tabernacle to receive the divine message (Ex. R. 16:4). He refused to enjoy hospitality at public expense, taking his personal requirements with him on his journeys (Ber. 10b). Despite the fact that his sons did not follow in his way, Samuel did have the satisfaction of seeing one of them mend his ways and become the prophet Joel (Mid. Sam. 1:6).

Samuel did not object to the appointment of a king in principle, since it was commanded in the Bible (Deut. 17:15). His objection was to the fact that the people demanded a king "that we may be like other nations" (Sanh. 20b). Samuel's failure to recognize David until he was revealed to him was a punishment for his arrogance in saying to Saul "I am the seer"

(1 Sam. 9:19; Sif. Deut. 17). Although Saul should have died immediately after his sin during the Amalekite war, Samuel interceded for him. He prayed that his life be spared at least for the duration of his own life, pleading that his action in anointing Saul be not destroyed before his eyes. God was hesitant to grant this request since the time of David's succession was rapidly approaching. In order to fulfill Samuel's request and to prevent the people from ascribing Samuel's death to his sins, Samuel was made to age rapidly, and though he was only 52 when he died, the people were under the impression that he died as an old man (Mid. Sam. 25:2; Ta'an. 5b). Samuel wrote only part of the book which bears his name. It was completed by Gad the seer and Nathan. He also wrote the books of Judges and Ruth (BB 15a).

[Aaron Rothkoff]

In Islam

In Sura 2:247–9 it is related that the people of Israel requested that the prophet appoint a king to rule them. However, when the prophet informed them that Allah had chosen Ṭālūt (Saul), they refused to crown him as their king. In post-Koranic literature it is said that this reference is to the prophet Samuel (Shamwil); details are also related about his life and deeds, which are interwoven in the tales of Saul and David. It is noteworthy that the name Shamwil is no longer used in the Arabic language and only the name of al-Samaw'al is to be found.

[H.Z. Hirschberg]

In the Arts

Treatment of the prophet Samuel in the arts generally involves the two kings of Israel whom he anointed, Saul and David, although Samuel himself does figure independently in some works, particularly in art. Literary interest in the subject has been somewhat restricted. In the English verse epic *Dauides* (1656) by Abraham Cowley, Samuel expresses the writer's own antagonism toward the concept of monarchy during Oliver Cromwell's republican Commonwealth. The theme later inspired Pieter t'Hoen's Dutch novella, *Samuël de Profeet; of De Joodsche regeering hoe langer hoe erger* (1796), but interest thereafter lapsed until the 20th century. Samuel then makes a dramatic appearance in D.H. Lawrence's play *David* (1926), and is denigrated in *Samuel the Kingmaker* (1944), one of the English writer Laurence Housman's fiercely anti-biblical *Old Testament Plays* (1950), which makes the prophet a spiteful, jealous impostor. This treatment finds a contrast in the respectful approach of *Abraham l'hébreu et Samuel le voyant* (1946), a biblical verse epic by the French Jewish writer Emmanuel *Eydoux. A related subject is treated in two 20th-century plays about Eli, Samuel's priestly guardian and mentor: *Beit Eli; o Aron ha-Elohim Nilkeḥah* (1902), a Hebrew drama by Meir Foner, and *Silo is krank...* (1956), a drama in Afrikaans by the South African writer Daniel François Malherbe.

In Christian art, Samuel's attributes are the lamb he offered in sacrifice (1 Sam. 7:9) and his horn of unction. Figures of Samuel with the lamb are found on the Gothic cathedrals of Chartres and Rheims; at Chartres he is placed between Moses

and David. The presentation of Samuel to Eli by his mother Hannah, who dedicated him to God (1 Sam. 1:24–28) is a subject found in the third-century C.E. murals of the synagogue at *Dura-Europos. It also occurs in medieval wall painting and manuscripts, including the 13th-century *St. Louis Psalter*, the 14th-century *Queen Mary Psalter*, and the 15th-century German *Second Nuremberg *Haggadah* (Schocken Library, Jerusalem). There are a number of examples from the 17th-century Dutch school, including a painting by *Rembrandt (Bridgewater Collection, London) and one by his pupil, Barent Fabritius (Art Institute, Chicago). A touching study of Samuel and Eli was painted by the U.S. portraitist John Singleton Copley (Wadsworth Atheneum, Hartford, Connecticut) whose painting of Samuel denouncing Saul is in the Boston Museum of Fine Arts. The English artist Sir Joshua Reynolds painted studies of Samuel as a child and the infant Samuel in prayer (1 Sam. 3:4); these are at Dulwich College and in the National Gallery, London. Samuel's slaying of Agag, whom Saul had failed to kill (1 Sam. 15:32–33), appears in a 13th-century Hebrew manuscript from France (British Museum Miscellany, add. 11639) and in a mural in the Basle town hall by Hans Holbein (1497?–1543). The anointing of David by Samuel (1 Sam. 16:13) appears in the murals of Dura-Europos. This subject has also been popular in Christian art, where David is regarded as the "anointed one" par excellence, the type and ancestor of Jesus. The scene appears in medieval frescoes, carvings from the Gothic cathedrals, and in Byzantine and Western manuscript illumination. Samuel's posthumous appearance before Saul on the latter's visit to the witch of Endor (1 Sam. 28:8ff.) was a rare subject in the Middle Ages. It later received melodramatic treatment from the 17th-century painter Salvator Rosa (Louvre); and there is a watercolor by William *Blake in the National Gallery of Art, Washington.

Musical works in which Samuel is the main figure are few; they include Andreas Hammerschmidt's songs to a play by Keimann, *Samuel* (1646); Anton Cajeta Adlgasser's oratorio, *Samuel und Heli* (= Eli; 1763); a Spanish oratorio by José Duran, *Samuel presentado al Templo* (1765); Simon Mayr's oratorio, *Samuele* (1821); an early American oratorio, *Samuel*, by Homer Newton Bartlett (1845–1920); and *Die Jugend Samuel's*, an oratorio by Victor *Hollaender (1866–1940). A recent work is the *Inbal troupe's *The Boy Samuel*.

Tomb of Samuel

Traditionally sited on al-Nabi-Samwil, the highest mountain overlooking Jerusalem. Theodorus Lector records that the Byzantine emperor, Arcadius, in 406 removed the bones of Samuel to Constantinople where he built a church next to the Hebdomon (Eccles. Hist., 2:63). The 10th-century geographer, al-Muqadasi, mentions a monastery at al-Nabi-Samwil. Ramah of the Bible was later identified with *Ramleh and consequently Samuel's grave was located there (cf. 1 Sam. 25:1; 28:3). The Karaites had a synagogue at Ramleh in 1013. Benjamin of Tudela records in 1173 that the crusaders had removed Samuel's remains from there to al-Nabi-

Samwīl (A. Asher, *The Itinerary of Rabbi Benjamin of Tudela* (1927), p. 42).

In 1099 the site was named by the crusaders Montjoie (Mons Gaudii) because it was from there that they caught their first sight of Jerusalem; among the Jews and the Latins al-Nabi-Samwīl was generally called *Shiloh (Silo) through mistaken identity. Baldwin II (1118–31) gave the hill and surrounding land to the Premonstratensian order who built a church on the site in 1157 on the hill al-Burj, south of al-Nabi-Samwīl. In 1187 the church was captured and ruined by Saladin. Muslims and Jews turned the ruins into prayer houses. Jewish pilgrims also identified the site with the graves of Hannah, Elkanah, and his two sons as well as with the *mikveh* of Hannah. On the 28th of Iyyar (the traditional date of Samuel's death) thousands of Jews gathered in medieval times at the shrine from all over the Diaspora and Erez Israel to light lamps there, offer charity, and pray. It was so usual for them to drink wine at these festivities, that owing to excesses a *takkanah* was passed by the Jerusalem rabbi forbidding "those under the influence of drink from going to al-Nabi-Samwīl" (*Zikhron bi-Yrushalayim*, 503). Pantaléo de Aveiro reports that in 1560 Jews went to the grave every eight days to light candles and had obtained the right of residence on the site from the sultan (*Itinerario da Terra Sancta* (1927), 424) and an English traveler in 1601 reported that the Jews cut their hair there (*The Travels of John Sanderson* (1931), 100). From other sources it appears that fathers took their sons there to trim their hair as an offering. The Karaites also spent two days of Passover on the site singing special hymns to Samuel.

In the 18th century Jews used to bring money, clothes, and jewelry there and burn them there as an offering, but about 1730 the Turks closed up the cave, built a mosque and prayer house there, and forbade the Jews to enter. After this few Jews went, and they had to pay for entrance. The land around the shrine was acquired by the group Naḥalat Israel Ramah in 1887 but attempts to settle there failed. The mosque and tower were almost completely destroyed in World War I and later rebuilt. Few Jews pray there now owing to the doubtfulness of the site's authenticity.

SAMUEL (Mar or Samuel Yarhina'ah; end of second century to mid-third century), Babylonian *amora*. Samuel was born at Nehardea and studied with his father, *Abba b. Abba ha-Kohen (Zev. 26a) and also with Levi b. Sisi (Shab. 108b), who had emigrated to Babylonia from Erez Israel. His principal teachers, however, are unknown. From the story that Samuel cured Judah ha-Nasi of an eye ailment (BM 85b) some scholars infer that he attended the latter's *bet midrash* in Erez Israel, and that Judah ha-Nasi was his main teacher. This is not conclusive evidence; Samuel could have sent the medicine to Judah ha-Nasi by a messenger. In any event, Samuel quotes no *halakhot* which, it may be asserted, he would have heard from Judah ha-Nasi, nor does he report any custom he saw in the latter's home, although this was a practice of the scholars of both the Babylonian and Jerusalem Talmuds. D. Hoffmann contends that Samuel studied in Erez Israel under Ḥanina b. Ḥama, inasmuch as both used the drawing of a palm branch as their signatures (TJ, Git. 9:9, 50d) and prescribed identical cures. However, there is no conclusive evidence for this assertion, as the same was true of different people living in widely separated areas.

Samuel's sons died in their youth (Shab. 108a; MK 18a), two of his daughters were taken captive and later ransomed in Erez Israel (Ket. 23a), and another daughter married a non-Jew (who was subsequently converted to Judaism: see Rashi, Ber. 16a). His economic circumstances were extremely good, his father having left him fields (Ḥul. 105a) and plantations which were cultivated by tenant-farmers and laborers (BK 92a), and the household chores were attended to by maidser-vants (Nid. 47a).

Samuel was the head of an important *bet midrash-bet din* at Nehardea in the middle of the third century (Git. 36b). He was the outstanding authority of his day in civil law (Bek. 49b), in which sphere later generations accepted his pronouncements as decisive (*ibid.*). Samuel was the author of the momentous principle that in civil matters "the law of the state is the law [for its Jews]" (BK 113b), which has influenced the entire Diaspora. Other principles of his are: "The obligation of producing proof rests on the claimant" (*ibid.* 46a) and "In pecuniary cases we do not follow the majority" (*ibid.* 46b). His concern for orphans led him to rule that their money may be lent out on interest (contrary to the rule that money was not to be lent to Jews on interest; BM 70a). As a *dayyan* he was on his guard against even the slightest taint of bribery. Thus, he refused to act as a judge in the case of a man who had put out his hand to assist him in fording a river on a board (Ket. 105b). His integrity is revealed in other instances. He refused to take advantage of a seasonal scarcity to obtain higher prices for his products (BB 90b), and he vigorously opposed those who arbitrarily raised prices. When after Passover the merchants, reacting to an increased demand, raised the prices of pots (the Babylonian Jews not using those in which leaven had been cooked before the festival), Samuel warned that, unless they took fair prices, he would permit the use of the old pots (Pes. 30a). Similarly, when those who sold myrtle branches (for the

Four Species in the Festival of Tabernacles) charged exorbitant prices, Samuel warned that, unless they asked a reasonable price, he would declare permissible even such myrtle branches whose tips were broken off (Suk. 34b). The great authority enjoyed by his *bet din* was entirely owing to his prestige; only his *bet din* and that of Rav at Sura were allowed to write a *prosbul* (a declaration, made in a *bet din*, that the limitation of the Sabbatical Year shall not apply to the loan about to be made; Git. 36b). He held that in certain cases *dayyanim* were entitled to use their discretion in judging (BB 35a, and Tos. to *ibid.*), and he would order lashes (Er. 44b), as well as arrest and detention in prison (Nid. 25b), indicating his great authority.

Samuel had many contacts with his distinguished colleague, Rav, who appreciated his erudition (Hul. 59a), showed him every respect (Meg. 22a), and, when on a visit to Nehardea, observed the customs instituted by Samuel (Er. 94a). After Rav's death in 247 C.E., Samuel became the preeminent authority and was recognized as such by all the Babylonian sages (*Iggeret Rav Sherira Ga'on*, ed. by B.M. Lewin (1921), 81), whereas during Rav's lifetime the Jews of Sura and its neighborhood had adopted the usages laid down by Rav, while the Jews of Nehardea and its neighborhood adopted those of Samuel (Ket. 54a).

Samuel was close to the exilarch and his officials (TJ, Ta'an. 4:2, 68a) and would sit in front of Mar Ukva, the exilarch, when the latter judged a case (MK 16b). He was also personally acquainted with Sapor, the king. Samuel's extensive knowledge of medicine and astronomy assisted him in the establishment of various *halakhot*. He discovered a salve, known as "*killurin de-Mar Shemu'el*," for curing eye ailments (Shab. 108b), and asserted that he could cure all maladies except three (BM 113b). He was known as Samuel Yarhina'ah ("Samuel the Astronomer": BM 85b), and such was his knowledge of *astronomy that he declared: "The paths of heaven are as familiar to me as the streets of Nehardea" (Ber. 58b). Though his knowledge of this science enabled him to fix and draw up a calendar (RH 20b), according to his own testimony he did not devote much time to its study (Deut. R. 8:6). It may have been his knowledge of astronomy which brought him into contact with non-Jewish Babylonian scholars, with one of whom, Avlet, he dined (Av. Zar. 30a) and discussed nature (Shab. 129a, 156b). Samuel also met non-Jewish scholars in the Bei-Avidan (*ibid.* 116a, and Rashi *ibid.*). But because his chief activity centered on his industrious acquisition and dissemination of the knowledge of the Torah, he was called *shoked* (TJ, Ket. 4:2, 28b) or *shakud* (TB, *ibid.* 43b), that is, "the industrious Torah scholar."

He ruled that it was forbidden to deceive non-Jews as well as Jews (Hul. 94a), and that whoever puts a slave to shame must compensate him accordingly (Nid. 47a). Samuel made some interesting observations on the past and future of the Jewish people. He traced the ascendancy of Rome and the subsequent destruction of the Temple to Solomon's marriage with Pharaoh's daughter, who introduced idolatry into Jerusalem (Shab. 56b). In his view the Messiah will come only after the Jewish people will have suffered cruel persecutions (Ket. 112b),

and he maintained that the only difference between present and messianic times will be freedom from oppression by foreign powers in the latter period (Ber. 34b). Samuel was opposed to a life of mortification (Ta'an. 11a) and declared even those who imposed restrictions upon themselves in fulfillment of a vow to be wicked (Ned. 22a). He favored the enjoyment of the things of this world (Er. 54a), provided that it is preceded by the appropriate blessing (Ber. 35a).

Rav and Samuel were accorded the honorable title of "our rabbis in Babylonia" (Sanh. 17b) or "our rabbis in the Diaspora" (TJ, Shab. 5:4, 7c).

[Moshe Beer]

SAMUEL, BOOK OF, the eighth book of the Hebrew Bible and the third in the subdivision known as the Former Prophets. Originally a single unit, the Septuagint and the Vulgate divide the book in two, titling the resulting parts First and Second Kingdoms (I and II Samuel), followed by Third and Fourth Kingdoms (I and II Kings). In the later Vulgate tradition "Kingdoms" becomes "Kings." Hebrew manuscripts continued to treat Samuel as one book until the introduction of the printed Bible in the 15th century, when the division into I and II Samuel was accepted. English Bibles follow the same division, I and II Samuel appearing in ninth and tenth positions (Ruth intruding after Judges as in LXX).

Title, Authorship and Text

The title of the book (or books) in the Hebrew canon is Samuel, no doubt because Samuel is the first major personality to appear in it rather than because of any theories of authorship such as we encounter in I Chronicles 29:29 and *Bava Batra* 14b–15a (cf. I Samuel 10:25). In fact, the title of the book has no serious bearing on authorship. It is now generally agreed that the finished form of the book comes from the hand of a Deuteronomic compiler in the sixth century B.C.E. It has often been surmised that one or more of the sources in Samuel were written by a high official(s) in the court of David or Solomon, such as *Abiathar the priest, or *Jehoshaphat the *mazkir*, or Ahimaaz son of Zadok the priest (for Ahimaaz was himself one of Solomon's provincial governors; I Kings 4:15). That a royal official was responsible for the archival materials is certain, and it is plausible that such an official wrote some of the extended narrative sources; but no exact identification is compelling.

The text of Samuel has been badly preserved in the Masoretic Text, apparently because the book fell into neglect in some circles once a more idealized version of the same period was provided by Chronicles. Fortunately the Masoretic Text of Samuel can be frequently corrected with the help of Chronicles and of the Septuagint. The discovery at Qumran of portions of Samuel in a Hebrew text that closely corresponds to the Septuagint enhances the value of the Greek version for

textual criticism of Samuel, in that the Septuagint now appears to have relied upon a generally more accurate Hebrew text tradition than has been preserved in the Masoretic Text.

Contents and Major Themes

The narrative of Samuel, chiefly concerned with the rise and succession of rulers in the early united monarchy of Israel, falls into divisions determined by the succession of principals who provide the central action. Complexity is introduced by the fact that the protagonists (Samuel, Saul, David) are involved in intricate relationships or interdependence and rivalry. When David emerges triumphant, the dynamics shift toward the king's relations with his sons. A division based on the principals may be schematized as follows:

- (1) I Samuel 1–7 – Samuel.
- (2) I Samuel 8–15 – Samuel and Saul.
- (3) I Samuel 16–31 – Saul and David.
- (4) II Samuel 1–8 – David's rise to power.
- (5) II Samuel 9–20 and I Kings 1–2 – Court history or succession story of David.
- (6) II Samuel 21–24 – Appendix concerning the reign of David.

Number (6) was inserted before the end of (5) as a dramatic summary of the rule of David. This had the effect of making the deathbed deliberations of David (now I Kings 1–2) an introduction to the reign of Solomon, and the division of the Deuteronomic history into separate books recognized this fact by beginning a new book with it.

The basic narrative tells how the monarchy arose and how the line of kings was maintained in early Israel (see *History). The thematic stresses make it abundantly clear, however, that the chief interest is not in giving an account for future historical reference. Annalistic materials are included in the narrative but the overriding concern of the book is to establish the national-religious significance of the monarchy for Israel. The shaping of the materials themselves and the location of the book within the vast Deuteronomic history as the record of one phase in the history of Israel from Moses to the Exile, indicate that the intent is to assess the national-religious benefits and perils in monarchy, under the curse and blessing of Israel's God. The narrative is finally shaped by a later historical context in which Israel has lost the independent monarchy and, therefore, reads the record of the rise of the monarchy with critical questions in mind: In what way was the monarchy a gift of God? In what way was the monarchy a rejection of God? Can we identify the junctures at which the divinely granted monarchy became an occasion for apostasy? How does God overrule human sin? If Israel is to survive and be renewed as a people, what must be learned from the ambivalent experience of monarchical government?

Within the overarching set of questions posed by the Deuteronomic final stage of Samuel, many proximate thematic emphases emerge in complex sequences and patterns. Among the teeming monarchic sub-themes are the following: the triumph of David's dynastic line over Saul's; the triumph of

one of David's sons over his brothers (Solomon over Absalom and Adonijah); the subduing of the enemies of Israel by Saul and David (Philistines, Amalekites, Transjordanian peoples, Arameans); the reward of Jonathan's loyalty to David (in his treatment of Mephibosheth); the giving way of the institution of judgeship to that of monarchy (Samuel both prepares for and loses out to Saul and David); prophecy as support for, and critique of, the king (Nathan and Gad); the securing of the unity of north and south by the establishment of the capital in Jerusalem; the installation of the ark in Jerusalem and the preparation for building of the Temple; the replacement of the line of Eli by the Zadokite priesthood and its immediate rival Abiathar; the expiation of the sins of kings (and of their sons and officials): as punishment for Saul's murder of Gibeonites, famine and the death of seven of his sons; as punishment for David's murder of Uriah, the death of Bath-Sheba's firstborn, the rebellion of Absalom, and the king's passive acceptance of the curse of Shimei; for Amnon's rape of Tamar, his death; for Absalom's rebellion, his death; for David's census, a plague and the building of an altar on the site of the future temple; for Joab's murder of Abner and Amasa, his death.

These sub-themes are joined, on the one hand, in the Deuteronomic Exilic context with its searching existential theological questions about the survival of Israel. They are anchored, on the other, in the immediate historical contexts in which the various single units and sub-blocs of the book emerge. The materials in Samuel, therefore, require examination in the light of the whole range of their traditional-historical development, in terms of the reasons for the preservation and compilation of the traditions and their meaning at each stage of development. They must be seen as the product of the history of Israel's ideas, as a series of widening reflections on the history of this people – particularly of its royal leaders and institutions – extended over more than five centuries from approximately 1000 to 550 B.C.E.

The Basic Building Units

Samuel is not a simple homogeneous composition by a single author, although a single hand shaped its final form. In order to understand the composition of the book, it is necessary to characterize the main kinds of primary literary units employed in it.

NARRATIVES. The majority of the basic units in Samuel are narratives which typically display unity of character, time, and place and a number of compositional features such as fondness for dialogue (sometimes expanded into lengthy disquisitions), repetition of formulas (keywords and refrains), framing by means of similar beginnings and endings (so-called "envelope" or "ring" composition), foreshadowing and retrospection, retardation of action, stylized descriptions of scene and action, and a predilection for certain numbers (notably three and seven).

For the most part, the separate narratives can be distinguished by their highly circumstantial treatment of events. At times, however, the narrative is compressed and abstract,

serving to sum up a series of actions of one type or to point forward to subsequent events. The more compressed and abstract narratives are usually signs of an attempt to link up the more episodic narratives. The extent to which the distinguishable narratives form coherent sequences is a critical consideration for determining the existence of pre-Deuteronomistic sources in Samuel.

POEMS. Samuel contains poetic compositions which have been introduced into narratives as words attributed to characters in the story (I Sam. 2:1–10; 15:22–23; II Sam. 1:17–27; 3:33–34; 20:1; 22:1–51; 23:1–7). The fact that some of these same poetic pieces appear in other contexts (II Sam. 20:1 in I Kings 12:16; II Sam. 22 in Ps. 18) and are often very general in their references, raises the question in each instance as to whether the composition should indeed be attributed to the speaker or even to his period or circle. The laments over Saul and Jonathan and over Abner are usually attributed by modern scholars to David; the Song of Hannah is usually not attributed to Hannah. The Song of David and David's "last words" probably stem from royal psalmic circles but whether from the time of David, or from David himself, is in doubt. The source of the lament over Saul and Jonathan is said to have been the Book of Jashar (II Sam. 1:18).

ORACLES. Speeches from God in the form of instructions or pronouncements are fairly common in Samuel, sometimes addressed directly to a person (I Sam. 3:11–14; 8:7–9; 9:15–16; 15:10–11; II Sam. 7:4–7; 21:1; 24:11–12), but more often as a prophetic or cultic speech delivered to the addressee by a spokesman for God (I Sam. 2:27–36; 6:3–9; 8:10–18; 10:17–19; 12:6–17, 20–25; 17:45–47; II Sam. 7:3, 8–16; 12:7–14; 24:13). The private and public forms of the oracle are complexly related in some contexts in typical messenger style, the private oracle instructing God's spokesman concerning what he is to say publicly. For the most part the oracles appear as elements within narratives, but, on occasion, they constitute virtually the entire literary unit (e.g., I Sam. 12; II Sam. 7).

LISTS AND ANNALS. Frequently the narrative flow is broken by lists of persons, such as sons and officials of the king, or of foreign peoples and districts and cities in Israel. There are annals or annalistic summaries which catalog military or administrative actions. In their sharpest form the lists and annals stand as separate units (I Sam. 7:13–17; 14:47–52; II Sam. 3:2–5; 5:13–16; 8:15–18; 20:23–26; 21:15–22; 23:20–39). More often they are subordinated stylistically to the narrative or are themselves expanded by narrative detail (I Sam. 13:1–3; 22:2; 30:26–31; II Sam. 2:8–11; 5:4–5, 9, 17–25; 8:1–14; 12:26–31; 23:8–19; 24:5–9). The lists and annals read like materials drawn from official archives, sometimes expanded in a more popular narrative style. Literary devices for working the lists and annals into the narratives are numerous and intricate, as illustrated in II Samuel 23 where a list of the three mighty men of David and a list of the 30 mighty men of David have been worked together with annalistic expansions concerning the three and concerning

two of the 30. An inaccurate total of mighty men for the present form of the text is given as 37 (II Sam. 23:39).

MISCELLANEOUS. Other types of basic literary units may be noted. A prayer by David occurs at a climactic point in II Samuel 7:18–29. On two occasions, accounts of alleged crimes requiring adjudication by the king are presented to David in order to serve as quasi-parables by which the king is tricked into condemning himself (II Sam. 12:1–6; 14:4–17). Popular proverbs or rulings are frequent on the lips of figures in the narratives (I Sam. 10:12; 18:7; 19:24; 21:11; 24:13; 29:5; 30:24–25; II Sam. 11:21; 20:18). Occasional explanatory remarks provide background information for understanding terms, situations, or practices which might otherwise be obscure to the reader (I Sam. 2:13–14; 9:9; 13:19–22; 28:3b; II Sam. 13:18; 18:18).

Pre-Deuteronomistic Sources

It is widely agreed that the Book of Samuel received its finished form at the hands of the Deuteronomist, who constructed the great sequence of tradition down to Kings. However, the scope and details of the final composition and its relation to the preceding development of the contents are much disputed.

The question is whether the Deuteronomist simply compiled the separate units described above, supplying the necessary arrangement and links, or whether he made use of definite preexistent sub-blocs, or sources, so that his major contribution consisted in the articulation of the sources. Given that such sources existed, the question remains whether they can be delineated and whether they are at all related to the narrative sources which have been identified in Genesis through Numbers and perhaps also in Joshua and Judges (i.e., J and E sources). Another question is whether there was a pre-Deuteronomistic edition of Samuel which the D compiler employed, expanding and deleting it in accordance with his purposes. In short, the problem is that of clarifying the process by which the distinguishable units of Samuel were linked up, either in stages or all at once, to form the extant edition.

At one extreme is the claim that the final compiler simply gathered totally separate narratives, poems, oracles, and other units and constructed his book. At the other extreme is the contention that the final compiler used a number of sources, each covering different parts of the story he wanted to tell. By arranging the sources consecutively or interweaving them, the impression of a continuous account was created.

The evidence for sizable pre-existent sources is cumulatively impressive. To be sure, the criteria for distinguishing these sources by their literary, historical, and ideological features cannot be applied with equally convincing results in all cases. Yet it is evident that Samuel is not simply a single compilation of random fragments. The materials cluster together in groupings and the constant features which link the units in the various clusters are not demonstrably Deuteronomistic in origin.

Among the pre-Deuteronomistic clusters which can be discerned in Samuel are the following:

(1) A story of the boyhood of Samuel (1 Sam. 1–3) recites the birth and call of Samuel and the venality and prophesied doom of the priesthood of Eli.

(2) A story of the ark (1 Sam. 4:1–7:2) recounts the capture of the ark, the deaths of Hophni, Phinehas, and Eli, the destruction which the captured ark visited on the Philistines, and the return of the ark, first to Beth-Shemesh and then to Kiriath-Jearim. 11 Samuel 6:1–15 is the logical continuation of this story which the compiler moved to its present position because 20 years had elapsed between the placing of the ark in Kiriath-Jearim and its transfer to Jerusalem by David. Possibly, the original nucleus of 11 Samuel, which seems to have anticipated how the ark would be placed in a temple, also belonged to the ark source.

(3) A story of Samuel and Saul and the rise of the monarchy associated with Mizpah and Ramah (1 Sam. 7:3–12; 8:1–22; 10:17–27; 12:1–25; 15:1–35) is composed of units in which the oracles are dominant and in some cases almost crowd out narrative altogether. Samuel is the deliverer of the people from the Philistines, but, in his old age, the people call for a king rather than face the prospect of his corrupt sons becoming his successors. The kingship is condemned as contrary to God's will, and a description of the oppressive nature of kingship is supplied. Nevertheless, Saul is chosen as king by lot. Samuel gives a "farewell speech" affirming his just leadership, reviews the saving deeds of God in the past, and warns the people not to continue in the rebellion they have exhibited in demanding a king. Finally, when Saul fails to destroy all the Amalekites and their booty in accord with the sacred ban, his rejection by God is announced by Samuel. The farewell speech of chapter 12 is worked and expanded by the D compiler, but its essential structure belongs to the older source. The units 7:3–12 and 15:1–35 are not so clearly of the same source as the other units but there are substantial if not conclusive reasons for including them.

(4) A story of Samuel and Saul and the rise of the monarchy associated with Gilgal (1 Sam. 9:1–10:16; 13:1–14:46) is composed of narratives in which the oracular elements are more terse and more effectively subordinated to the narrative than in the Mizpah-Ramah source. Saul is selected by Samuel to be king at the direct initiative of God, the sign of his efficacy as king being his inspired participation in the prophesying of a band of prophets. Samuel sends Saul to Gilgal where he is to wait for seven days for further directions. At Gilgal the Philistine threat mounts, and Saul offers the sacrifices to initiate the war. Samuel arrives to condemn him for this independent sacral action and to announce Saul's rejection as king. Saul's and Jonathan's successes against the Philistines are then related. 1 Samuel 31 may also belong to this source since it describes the death of Saul with dignity and compassion. Less certain is the inclusion of 1 Samuel 28 in which Saul's recourse to a medium at En-Dor to raise up the spirit of Samuel is sympathetically presented. The problem in the present form of the story is that it is linked with the Amalek story of 1 Samuel 15, which may be the compiler's editorial adjustment.

1 Samuel 11 is frequently assigned to the Gilgal story, but it is an erratic bloc that does not fit smoothly into either story of the rise of the monarchy. Conceivably, 11:1–11 belonged to the Gilgal source and had as its aim the demonstration of Saul's inspired military prowess against the Ammonites preparatory to his attacks on the more powerful Philistines. However, 11:12–15 can only be understood as yet another version of how Saul was made king, this time at Gilgal. The disruption of the story line is only imperfectly dealt with by the harmonizing reference, "Let us go to Gilgal, and there renew the kingdom" (11:14).

The remaining materials in Samuel may best be approached by demarcating the most obvious source first and then working backward to the less easily demarcated sections.

(5) An expiatory court history or succession story of David (11 Sam. 9–20; 1 Kings 1–2) consists of a series of beautifully proportioned episodes, expertly linked in a virtual novella (comparable to the Joseph story in Genesis), which focuses on the relation between David and his sons and specifically on the issue of which of David's sons will succeed him on the throne. The whole sequence is profoundly affected by the problem of David's expiation for his sin in murdering Uriah in order to possess Bath-Sheba. The death of Bath-Sheba's firstborn, the rape of Tamar and the death of Amnon, and the rebellion of Absalom and his death are connected with the initial sin of David. Joab's sin in killing Abner and Amasa is expiated by his death. The final sign that all David's wrongdoing has been adequately expiated is given in the raising of Solomon, his favorite son by Bath-Sheba, to the throne.

It is curious, however, that this superbly molded source lacks a clear beginning. 11 Samuel 9 is usually assigned as the start because it introduced Mephibosheth who is integral to the story later on, and 11 Samuel 10 is included because it accounts for the wars against Ammon in which Uriah perishes. However, 11 Samuel 9 is not an adequate starting point for the source. Either the beginning has been lost or it is to be found somewhere between 1 Samuel 16 and 11 Samuel 8. There are some clues in the court history that it may indeed have begun at an earlier point in David's life. In 1 Kings 2:5, David urges the death of Joab because he killed Abner, and Shimei's curse of David in 11 Samuel 16:8 says, "YHWH has avenged on you all the blood of the house of Saul," which seems to make David responsible in his eyes for either the deaths of Saul and Jonathan or the death of Ishbaal, or both. These references may be construed to demonstrate that the court history went back at least to the story of Ishbaal and Abner (11 Sam. 3–4). Moreover, the common theme of making a claim to royal power by lying with the king's concubine appears not only in 11 Samuel 16:20–22 and 1 Kings 2:13–25 but also in 11 Samuel 3:6–11.

That parts of the court history may be present in sections of 1 Samuel 16–31 is hinted at by the way in which David's decision "to show kindness for the sake of Jonathan" to Mephibosheth alludes back to the covenant of David with Jona-

than in 1 Samuel 18:1–4; 20:8, 14–17, 42. The story of David's acquisition of Abigail, wife of Nabal (1 Sam. 25), is told in such a way as to constitute a dramatic foil to the manner in which he later acquired Bath-Sheba, wife of Uriah. So the possibility must be entertained that what is known as the court history is the culmination of a larger account of the public life of David which may have begun as early as 11 Samuel 2 and perhaps even as early as 1 Samuel 16. If this is the case, the early parts have been excerpted and lack the tight cohesion of 11 Samuel 9–20 and 1 Kings 1–2.

At this point it is necessary to consider the remaining materials in Samuel, extending from 1 Samuel 16 to 11 Samuel 8. The segment in 1 Samuel gives an account of the anointing of David as king, by Samuel, his introduction to the court of Saul, his victories over the Philistines, Saul's growing jealousy, David's flight and exile in the Negev both as a freebooter and as a client of Achish of Gath, his marriage to Abigail, and the stroke of fortune by which he was saved having to fight with the Philistines against Saul in the latter's mortal defeat. Typical of these stories is a large number of doublets which repeatedly disturb the continuity: two versions of David's coming to Saul's court, two accounts of David's escape from Saul, two descriptions of David's desertion to the Philistines, two episodes concerning David's sparing of the life of Saul, and two explanations of the death of Saul.

These doublets are commonly seen as reflections of two parallel sources which are in turn linked with the two accounts of the rise of the monarchy and frequently regarded as segments of the J and E sources of the Pentateuch. The case for seeing two continuous sources in 1 Samuel 16 through all or part of 11 Samuel is very insecure. The doublets when separated do not form two sources with anything like the cohesion of the two stories of the rise of the monarchy. If these materials were drawn from two continuous sources, they must have been drastically excerpted, and, if they formed the continuations of J and E, their reworking has been so extensive that their original forms are no longer discernible. It is possible, as noted above, that the court history did in fact once begin with the public emergence of David, but its unity prior to 11 Samuel 9 has been shattered by the D compiler in two primary ways: for the period prior to David's enthronement the court history version of events was extracted and worked in with many other accounts of the same events (largely drawn from the various locales where the actions took place), and for the period of the early reign of David it was worked in with lists and annals, as well as with the end of the ark story transferred to 11 Samuel 6–7.

The Deuteronomical Compiler

From the foregoing it may be concluded that the D compiler of Samuel had in hand the following major blocs of material: the story of the boyhood of Samuel, the story of the ark, the Mizpah-Ramah story of the rise of the monarchy, the Gilgal story of the rise of the monarchy, and the court history or succession story of David. In addition, he had access to court archives

with lists and annals, some unattached poems and oracles, and a number of single (or paired) narratives concerning David which had not been drawn into any of the larger blocs.

There is no firm evidence that these preexistent materials had been arranged in parallel sources analogous to or a continuation of the pentateuchal sources. There is also no need to posit a pre-Deuteronomical linkage of the separate blocs in a larger composition. All the signs of editorial linkage can be explained either as the work of those who shaped each of the original blocs or as the work of the Deuteronomical compiler. Similarly, there is no basis for the claim that 11 Samuel 21–24 was added by a post-Deuteronomical editor.

The essential method of composition of the compiler was to arrange the blocs in approximate chronological order and then to make adjustments where necessary by transferring units from one place to another in order to produce a better chronology or to associate themes, or by interweaving two accounts of the same chain of events. Thus the conclusion of the ark story in 11 Samuel 6 (and perhaps the original 11 Sam. 7) was moved to the proper chronological spot at the beginning of David's reign in Jerusalem. The section of the Mizpah story of the rise of the monarchy that told of Samuel's military exploits (1 Sam. 7:3–12) was separated from the rest of the source by a summary of the work of Samuel (1 Sam. 7:13–17), and the Mizpah version of the rejection of Saul (1 Sam. 15) was placed after a summary of the work of Saul (1 Sam. 14:47–52). The two stories of the rise of the monarchy were joined by splicing the Gilgal version into the Mizpah version in an effort to make them continuous. Portions of the Gilgal story were put at later points in the account since they told of the latter days of Saul (1 Sam. 28:1–25; 31:1–13).

Into the resulting basic framework composed of the joined, interwoven, and readjusted blocs, the compiler introduced lists, annals, poems, and single or paired narratives at appropriate points. 1 Samuel 11:12–15 supplied yet a third version of the enthronement of Saul. Several duplicate accounts concerning the early fortunes of David (including some from the probable beginning of the court history) were introduced into an account of David's rise to power, from 1 Samuel 16 on. Lists of David's officials and sons and annalistic accounts of his wars were inserted into the materials that told of his early reign at Hebron and Jerusalem (11 Sam. 2–8).

An impression of unity was given to the resulting account by inserting annalistic summaries of the external and internal accomplishments of the chief leaders at crucial junctures in the overall story: of Samuel, in 1 Samuel 7:13–17; of Saul, in 1 Samuel 14:47–52; of David, in 11 Samuel 8 and again in 11 Samuel 20:23–26; 21:15–22; 23:8–39. It is noteworthy that in each instance the summary comes long before the leader described actually disappears from the story. These summaries are in fact alerting devices which indicate to the reader that a new phase of the story has been reached in which a different balance in the relationships among the principals is to be expected. After Samuel's "summary," he is important only as the one who prepares for Saul and David. After Saul's "summary," he is impor-

tant only as the one who decreases as David increases in importance. After David's initial "summary," he is secure on his throne in Jerusalem, and the interest shifts to which of his sons will gain the succession; after David's final "summary," the stage is set for the entrance of Solomon as the new monarch.

Apart from these annalistic summaries, there are a few framework-like notes (in the manner of Judges and Kings) and a few harmonizing additions. By and large, the D compiler refrains from rewriting or inserting extensive interpretations of his own. 1 Samuel 12 and 11 Samuel 7 display the fullest rewriting or expansion on the part of D, and even there the extent of the D work is debated. The compiler was largely content to let the edited story speak for itself once it was placed within the comprehensive framework of Deuteronomy through Kings. The materials in 11 Samuel 21–24 which separate the end of the succession story (1 Kings 1–2) from the main body (11 Sam. 9–20) are arranged in a chiasmic structure as follows:

A. Narrative of the expiation of Saul's murder of Gibeonites.

B. Annalistic report of the battles of David's heroes with Philistines.

C. Song of David.

C¹. Last words of David.

B¹. Annalistic report of battles with Philistines and lists of David's heroes.

A¹. Narrative of the expiation of David's census-taking.

The appendix should be read with the three pairs arranged in the order: C–C¹; B–B¹; A–A¹. The center of the supplement is the innermost pair of poems which extol the virtues of the king as military and judicial leader and which are grouped on formal analogy with the Song of Moses (Deut. 32) and the Blessing of Moses (Deut. 33). From this center the lines radiate outward, both forward and backward, through two paired layers of tradition: exploits of David's heroes, which portrays the king as military leader; and successful expiations of guilt, in one of which David satisfies God by delivering up members of the guilty family and in the other he himself submits humbly to the judgment of God. The resulting thematically radiating chiasm is an impressive dramatic summation which brings the story of David to its effective climax.

Historical and Religious Value

Samuel is a source of incalculable importance for the understanding of the circumstances of the rise and establishment of the monarchy in Israel and for a grasp of the various ethical-religious valuations placed upon that institution by ancient Israel. Clearly there is no simple homogeneous historical account in Samuel nor is there a single undifferentiated religious perspective. Yet there is ample evidence of a firsthand nature to reconstruct the main stages in the evolution from the tribal league to the monarchy and to discern the domestic and foreign policies through which Saul and David established and consolidated power. There is also ample indication of the struggle to understand the monarchy in terms of the religious ideology of Israel. The Mizpah and Gilgal stories of

the rise of the monarchy and the oracle of 11 Samuel 7 are classical texts for this inquiry. The former assumption of scholars that all the pro-monarchical materials in Samuel are early and all the anti-monarchical materials are late (i.e., at least post-Solomonic) is now generally discarded. It is recognized that divergent attitudes toward the monarchy were present from earliest times and that, if anything, the anti-monarchical religious sentiments were more persuasive in the time of Saul than were the pro-monarchical religious sentiments.

Likewise, the D compiler is seen to entertain a highly ambivalent stance toward the monarchy. In fact he reads the whole history of Israel from Saul to the Exile in terms of the paradoxical reality that the God-given monarchs again and again violated the will of God but, thanks to the divine grace, the line of David was continued. D's reading of Israel's history in terms of the divine curse and the divine blessing incorporates the disparate blocs of material in Samuel in such a way that even the apparently "profane" court history of David appears as an instance of the conflict between disobedience and obedience and their active consequences in curse and blessing. The D compiler was able to give this effect largely by periodizing the separate blocs within the total framework of his ethical-theological interpretation of history (notably expressed in the programmatic prospectus of Deuteronomy and in the framework of Judges and Kings). While the developed schematic form of his evaluation can be distinguished from the earlier more naive or one-sided interpretations in his sources, it is evident that the early sources and the circles they stemmed from were already shaped by a troubling mixture of gratitude and praise for the kingship, on the one hand, and of misgiving and tormented conscience toward that same institution, on the other hand. To one degree or another, the historical and religious origins of the monarchy as preserved in Samuel attest the compiler's judgment: Israel's king is both the anointed of God and a man of bloodguilt.

SAMUEL, EDWIN, Second Viscount (1898–1978), public administrator and writer. Samuel served in the British army in Palestine in World War I and on the staff of the Zionist Commission headed by Chaim Weizmann. He joined the British Colonial Service and was appointed a district officer in Palestine, where he was director of broadcasting during the last three years of the Mandate. In 1945 he established the nucleus of what later became Israel's Institute of Public Administration, of which he was principal. He divided his time between Britain and Israel, where he lectured on British institutions and political theory. He was the *Encyclopaedia Judaica* departmental editor for the State of Israel. He published a number of books, among them *Problems of Government in the State of Israel* (1956), *The Theory of Administration* (1947), and *The Social Structure of Israel* (1969). His memoirs, *A Life Time in Jerusalem*, were published in 1970. He also wrote short stories.

SAMUEL, HAROLD (1879–1937), pianist and composer. Born in London, Samuel began his studies at the Royal College of Music at the age of 17, where he later became a professor. The course of his concert career was changed dramatically in 1921 when he appeared before the public in a series of six brilliant recitals, given within one week, in which he played all Bach's keyboard works from memory. He became most famous as an interpreter of J.S. Bach. Samuel frequently toured in the United States and other countries. Samuel's few compositions include music for *As You Like It* (1907), a comic opera, *The Hon'ble Phil*, songs, and piano pieces.

SAMUEL, HAROLD, Baron Samuel of Wych Cross (1912–1987), British property developer and art collector. A qualified property surveyor who was educated at Mill Hill school and at the College of Estate Management, in 1944 Samuel became chairman of Land Securities, which took over City Centre Properties and other companies, becoming the largest property company in the world. Samuel served as a member of the Covent Garden Market Authority from 1961 to 1974, which had the complex task of relocating the Central London fruit and vegetable market from its Covent Garden site to a new building at Nine Elms. He was active in other public work, including the presidency of the Central London Housing Trust for the Aged and vice presidency of the British Heart Foundation. He was knighted in 1963 and created a life peer in 1972. He was active in support for university education. He was also a noted art collector, bequeathing his collection, and his country house, Wych Cross Place in Sussex, to the Corporation of London. He was a cousin of the property developer and publisher Howard *Samuel.

[Vivian David Lipman]

SAMUEL, HERBERT LOUIS, First Viscount (1870–1963), British statesman and philosopher. Born in Liverpool, the son of Edwin Samuel (elder brother of Samuel *Montagu, the first Lord Swaything), Samuel was raised in London, where his father, who died in 1876, became senior partner in the firm of Samuel and Montagu (later Samuel Montagu and Company), bullion brokers. He was educated at University College School and Balliol College, Oxford, of which he later became visitor. His Jewish background was Orthodox, but he was not a practicing Orthodox Jew, although he retained his membership in the New West End Synagogue in London throughout his life and in later years attended services on festivals and formal occasions. Although raised in a politically conservative home, by the age of 18 Samuel had become an active Liberal, standing for Parliament unsuccessfully in 1895 and 1900. Between graduation and becoming a member of Parliament, he played an active role in the transformation of the Liberals into a party with a program of constructive social reform.

Samuel entered Parliament in 1902 and, after the Liberal victory of 1906, held his first junior ministerial office in the Home Office, promoting the new Workmen's Compensation for Accidents Bill, the establishment of a probation system in England, and the Children's Act, popularly known as the "Children's Charter." Appointed a privy counselor in 1908, he became chancellor of the duchy of Lancaster, with a seat in the cabinet (the first held by a professing Jew) in 1909, postmaster general in 1910, and president of the local government board in 1914. In 1914 he was responsible for the absorption of 250,000 Belgian refugees, most of whom returned to Belgium at the end of the war. In 1915, when Prime Minister Herbert Asquith formed his coalition government, Samuel became postmaster general again, temporarily losing his seat in the cabinet; but early in 1916 he was promoted to home secretary. When Lloyd George succeeded Asquith as prime minister in 1916, however, Samuel remained loyal to Asquith and refused to serve in the new government.

Before 1914 Samuel had taken no part in Zionist activities because he did not regard them as practicable. On the day Great Britain declared war on Turkey, however, he broached the subject of Zionism and the establishment of a Jewish state in Palestine, first with D. *Lloyd George and later with the foreign secretary, Sir E. Grey, and found them most enthusiastic. Later he prepared a special memorandum on the subject, which he circulated among the members of the cabinet in January and March 1915. In his memorandum he advocated a British protectorate under which "facilities would be given to Jewish organizations to purchase land, to found colonies, to establish educational and religious institutions, and to cooperate in the economic development of the country, and that Jewish immigration, carefully regulated, would be given preference,

so that in course of time the Jewish inhabitants, grown into a majority and settled in the land, may be conceded such degree of self-government as the conditions might justify." Palestine was a small country "the size of Wales" and, as such, it could not absorb all the Jews, but it could absorb some 3,000,000 people and thus bring some relief to Jews in Russia and elsewhere. But what was more important was the effect upon the Jewish people throughout the world. Therefore, "let a Jewish center be established in Palestine, let it achieve, as it may well achieve, some measure of spiritual and intellectual greatness, and insensibly the character of the individual Jew, wherever he might be, would be raised." Nothing came out of this proposal because of the opposition of Prime Minister Asquith. But in the field of practical politics, Samuel helped Chaim Weizmann, whom he first met in December 1914, in the work that ultimately led to the *Balfour Declaration.

As a result of his close connection with the policy of a Jewish National Home, Samuel was appointed the first high commissioner of Palestine (1920–25), thus being the first Jew to rule the Land of Israel in 2,000 years. His term of office can be roughly divided into two parts: from 1920 to 1922 when British policy was crystallized, and from 1922 to 1925. In the first period Transjordan was excluded from the area destined to become the Jewish National Home, and a new concept about immigration to the country was formulated, namely that of the "economic absorptive capacity." An advisory council consisting of ten British officials, four Muslims, three Christians, and three Jews was established, but it ceased functioning after two years because of Arab refusal to cooperate. As a capable administrator, Samuel laid the foundations of the country's civil administration. During his term of office the Jewish population doubled (from 55,000 in 1919 to 108,000 in 1925), extensive Jewish settlement was carried out, and the number of settlements rose from 44 to 100. Official recognition was given to Jewish representative bodies, local councils were organized, and the chief rabbinate was established. Great improvements were carried through in the legal and judicial system, and education, sanitation, and communications were much improved. The Hebrew language was recognized as one of the three official languages of the country. However, Samuel's efforts to appease Arab anti-Zionism by appointing the young extremist Hajj Amin al-*Husseini as Mufti of Jerusalem, thus investing him with the highest Muslim authority in Palestine, and by stopping, and later restricting, Jewish immigration under Arab pressure, were severely criticized by many Zionists. The sharpest critic of Samuel's policy was Vladimir *Jabotinsky, but also in the Zionist labor movement, and the *yishuv* in general, Samuel's policy eventually caused deep disappointment.

Samuel's interest in the National Home and the development in the Jewish community never diminished. In 1936 he became the chairman of the board of the Palestine Electric Corporation. He was also a constant supporter of The Hebrew University and member of its board of governors. He

fought against the anti-Zionist policy adopted in the 1939 White Paper, and after World War II he also attacked the anti-Zionist policy of the British foreign secretary, Ernest *Bevin.

Samuel returned to Liberal politics in England and re-entered the House of Commons in 1928. By this time, however, the Liberals were no longer one of the two major parties, having been superseded by the Labour Party. During the government crisis of 1931 he was one of those who advised the king to form a national government to be led by Ramsay MacDonald. In this government he was home secretary, until he resigned over policy differences in 1932. He never held office again, though Neville Chamberlain did invite him to join his government in 1938. He had been knighted in 1920 and in 1937 was made a viscount. He led the Liberal Party in the House of Lords from 1944 to 1955. In 1958 he received the distinction of the Order of Merit to mark 50 years as a privy councillor.

Samuel also wrote considerably on philosophy, succeeding Lord Balfour as president of the British Institute of Philosophy. In his works he mainly developed the ideas of the liberal philosophy. Among his philosophical works are *Liberalism* (1902), *Practical Ethics* (1935), *Belief and Action, an Everyday Philosophy* (1937, 1953³), *Creative Man* (1949), *Essays in Physics* (1951), and *In Search of Reality* (1957). He played a leading role in the movement to aid German refugees, visiting the United States and various European countries to raise funds and working for the admission of German Jewish children to Britain before World War II broke out. He also played a leading role on important Anglo-Jewish occasions, presiding in 1956 over the Tercentenary of Jewish Resettlement in England. As a minister Samuel was immensely diligent, lucid, and competent, rather than a brilliant front-rank politician. In later life his clarity of expression, aided by his superbly mellow voice, won him wide popularity as a broadcaster. In his last years his integrity and balanced judgment made him perhaps the most respected of British elder statesmen. In 1945 Samuel published his *Memoirs*. Samuel's career lasted for an extraordinarily long period of time. As an undergraduate he met William E. Gladstone; the last entry in his diary concerns the Cuban missile crisis of 1962. He was possibly the leading example of the spirit of "meliorism," the widespread belief long held by many acculturated British Jews that they lived in a country inevitably evolving towards liberalism and tolerance, although Samuel, unlike many of his background, was also a leading Zionist. Bernard Wasserstein's *Herbert Samuel: A Political Life* (1992) is the standard biography. His son was Edwin, Second Viscount *Samuel.

[Vivian David Lipman and Daniel Efron]

SAMUEL, HOWARD (1914–1961), British property developer and Labour publisher. Born in London, the son of a prominent jeweler, Howard Samuel was the cousin of the property developer Harold *Samuel, Baron Samuel of Wych Cross. Howard Samuel was educated at St. Paul's School and founded his own estate agency with his brother Basil. After 1945 Samuel's firm, Land Securities, emerged as Britain's largest property developer and estate agent. The holding company Samuel formed, Great Portland Estates Ltd., also became nationally known. Although one of the richest men in the country, Samuel was a strong supporter of the Labour Party and was actively involved in financing the left-wing periodicals *Tribune* and the *New Statesman*. He was also a close friend of the radical Labour leader Aneurin Bevan. Samuel died in Greece of a heart attack at the age of only 48, leaving a fortune of £3.8 million, making him probably one of the twenty richest men in Britain at the time.

[William D. Rubinstein (2nd ed.)]

SAMUEL, MAURICE (1895–1972), U.S. author and translator. Born in Macin, *Romania, Samuel spent his boyhood in Manchester, England, migrating to the U.S. in 1914. At home in both Jewish and Anglo-American culture, he tried to maintain an equilibrium between them, but before long saw dangers in this bicultural experience. In provocative volumes beginning with *You Gentiles* (1924) and *I, the Jew* (1927), and continuing with *Jews on Approval* (1931), *The Great Hatred* (1941), and *The Gentleman and the Jew* (1950), he came to the conclusion that Jewish and gentile approaches to ultimate questions were antithetical. Antisemitism was not a Jewish problem, but an affliction of the gentiles to which Jews had to accustom themselves. It was "the great hatred" in the amoral pagan soul in Western man for the Jewish-Christian jailer who had bound it with fetters of moral law. Samuel also contrasted the Jewish with the gentile ideal of man. During the years between the Balfour Declaration of 1917 and the establishment of the Jewish state in 1948, Samuel was a most influential and popular exponent of Zionist ideology. Having spent ten years in Erez Israel, he believed that the Jews would succeed in building a moral commonwealth and gave expression to his faith in *Harvest in the Desert* (1944), calling upon American Jews to assist this venture on their ancient soil. In *Level Sunlight* (1953) Samuel reiterated his faith in the messianic aspects of Zionism, maintaining that the objective of classical Zionism went beyond the mere building of a state. It included the regeneration of the Jewish people in all lands with the help of the Jewish center in Israel, and in this process American Jewry had a vital part to play. Samuel also wrote fiction, including the novels, *Beyond Woman* (1934); *Web of Lucifer* (1947); *The Devil That Failed* (1952); and *The Second Crucifixion* (1960), the story of a Jewish girl in Hadrian's Rome. Among other works of Jewish interest are *On the Rim of the Wilderness* (1931), a study of the Palestine Arabs and the Zionist movement; *The World of Sha-*

lom Aleichem (1943); *Prince of the Ghetto* (1948), on I.L. *Peretz; *Certain People of the Book* (1955), studies of biblical figures and biblical morality; *Little Did I Know* (1963), recollections and reflections on the worthwhileness of being a Jew; *Blood Accusation* (1966), a reexamination of the notorious *Beilis trial; *Light on Israel* (1968); and *In Praise of Yiddish*. Samuel translated novels by Sholem *Asch and Isaac Bashevis *Singer; *Bialik's *Selected Poems* (1926); the Passover *Haggadah* (1942); and works by Peretz and Shemaryahu *Levin. In *The Professor and the Fossil* (1956) he wittily and effectively answered Arnold J. Toynbee's treatment of the Jews in his *Study of History* (1934–54). A brilliant orator and conversationalist, he reached a wide audience through his broadcast discussions on biblical topics with the poet and critic Mark van Doren.

[Sol Liptzin]

SAMUEL, RALPH E. (1892–1967), U.S. investment banker. Born in Rochester, New York, Samuel joined the family business and served as president of this retail chain until 1932. He then became a partner in a Wall Street brokerage firm, and in 1938 organized and headed his own firm. In 1954 he started one of the first mutual funds in the United States. From the beginning of his career he took an interest in Jewish and general community work. He was a voluntary fund raiser for the Federation of Jewish Philanthropies and served as its president from 1948 to 1951. He was a vice president and chairman of the board of the American Jewish Committee and instrumental in founding its publication, *Commentary*. His other activities included the chairmanship of the American-Jewish Tercentenary Committee (1954–55), and the vice chairmanship of the Board of Trustees of the New York School of Social Work at Columbia University. Despite his conservative financial views and approaches toward business, he supported liberal Democrats such as Franklin D. Roosevelt and Adlai E. Stevenson. He died during a visit to Israel.

[Joachim O. Ronall]

SAMUEL, RAPHAEL (1934–1996), British historian. Samuel was born in London. His father was a solicitor and his mother, Minna (Nerenstein, 1909–1999), was both a left-wing activist and a composer of note, who wrote under the name of Minna Keal. Samuel's interest in history was aroused by his uncle, the well-known historian of Jewish socialism CHIMEN ABRAMSKY (1917–), who was professor of Jewish studies at University College, London. Samuel was educated at Oxford, where he became a dedicated Communist, abandoning his party membership after Khrushchev's famous speech of 1956 detailing Stalin's crimes. Samuel was one of the founders of the *Universities and Left Review*, which, after 1960, became known as the *New Left Review* and was one of the main or-

gans of Britain's intellectual "new left." His academic career was rather unorthodox: he spent almost all of his career as a tutor at Ruskin College, Oxford, a working-man's institution funded by the trade unions, although he was briefly a professor at the University of East London shortly before his death. Samuel originated the "history workshops," and, in 1976, was one of the founders of *History Workshop Journal*. His best-known works include *Village Life and Labour* (1975), an edited three-volume work, *Patriotism* (1989), and *Theatres of Memory* (1996). Samuel's theatrical style of lecturing made him a charismatic figure on the British left and added greatly to his important impact. His autobiographical essay, "The Lost World of British Communism" (*New Left Review*, 154 (1985) and 156 (1987)) sheds much light on the appeal of Communism to some British Jews.

SAMUEL, SIR SAUL (1820–1900), Australian politician and communal figure. Born in London, Samuel emigrated to Australia with his widowed mother in 1832 to join her brother, a successful Sydney merchant. Samuel became a leading merchant in Sydney and Bathurst and a large-scale pastoralist on the Macquarie River. In 1846 he became the first Jew to be appointed a justice of the peace in Australia. From 1851 he was involved in the search for gold in Victoria. In 1854 he was appointed a member of the Legislative Council of New South Wales, and in 1859 became New South Wales' first elected Jewish member of Parliament. When first taking his seat, he stated that he was happy that no difficulties existed in New South Wales regarding his taking the oath, since it was only one of allegiance and not based, as in England, "upon an exclusive and sectarian prejudice." Samuel sat in Parliament for over 20 years and held numerous ministerial posts. He was three times colonial treasurer and was responsible for the financial arrangements for separating Queensland from the parent colony of New South Wales. As postmaster general he negotiated a postal service to Great Britain in 1872, and as agent-general of New South Wales in London from 1880 was responsible for loans running into millions of pounds. He was knighted in 1882 and created a baronet in 1898. Samuel was a director of numerous companies, especially in mining and insurance. He was prominent in Jewish communal affairs as president of the Sydney Great Synagogue and was active in Jewish education. After 1880 he lived chiefly in London, dying at his South Kensington home.

[Israel Porush / William D. Rubinstein (2nd ed.)]

SAMUEL, SIGMUND (1867–1962), Canadian industrialist, philanthropist, patron of the arts. Samuel was born in Toronto to Lewis and Bavarian-born Kate, who emigrated to Canada from England in 1855. Sigmund's father, Lewis, and his brother Mark began a successful hardware and scrap metal business

that grew into a major steel production enterprise, raising the Samuel family to the first rank of Canada's early industrialists. Unlike some other early Canadian industrialists of Jewish heritage, the Samuel family retained a connection to their traditional roots. Members of the family were founding members of the then Orthodox Holy Blossom Congregation in its new quarters on Richmond Street, where Sigmund was first called to the Torah. Sigmund attended the elite Upper Canada College and the Toronto Model School. Reflecting the Toronto of his day, he notes in his autobiography that, even as a wealthy and acculturated industrialist with entrée to the best social circles, he was subject to antisemitism.

As a young man Samuel entered the family business and helped expand its operations, including the purchase of Algoma Steel in Sault St. Marie, Ontario. In 1930, with Samuel at the helm, the firm was a major producer of hardware items of every type, including steel tubing, pig iron, and flat sheets of steel. Samuel continued to lead the firm until his death, when it was taken over by his grandson, Ernest L. Samuel.

Samuel's legacy is enshrined in two key Toronto institutions. A keen supporter of the arts, he bequeathed money to the Royal Ontario Museum for its Canadiana Gallery of Art (formerly the Sigmund Samuel Collection). In 1954 he also gave the University of Toronto money to build a library for the humanities. Dubbed "Sig Sam" by subsequent generations of University of Toronto students, the library remains a fixture on the university's King's College Circle.

SAMUEL, SYDNEY MONTAGU (1848–1884), British journalist. Born in London and educated at London University, a nephew of the first Baron Swaythling, Samuel was active in Jewish social welfare work. A prolific writer, he ranged from poetry to finance and wrote an annual financial survey for the *Times*. In 1878 he acquired part ownership of the *Jewish Chronicle* and wrote for that paper on many subjects. His series of travel articles was published as a book, *Jewish Life in the East* (1881). He was also active in the theater and wrote a comedy, *A Quiet Pipe* (1880). Samuel was a merchant banker in the City of London, dying, it is said, of overwork, at the age of 36.

SAMUEL, WILFRED SAMPSON (1886–1958), British businessman and historian. Born in London, the son of a steel pen manufacturer who died soon after his birth, Samuel was educated in Belgium and Germany. In 1904, with several of his cousins who had been piano manufacturers, he founded the Decca gramophone and record company in London. Samuel served as an officer in World War I. He and his cousins developed Decca into one of the largest recording companies in the world. He then engaged in research on the history of the Sephardi community in London, which resulted in his *The First*

London Synagogue of the Resettlement (1924), placing the story of the beginnings of the London community on a new basis. He subsequently published many papers on the period, and on the history of the Jews in the West Indies, mainly in the *Transactions of the Jewish Historical Society of England*. With Cecil Roth he founded the Jewish Museum in London in 1932, of which he was chairman until his death. His cousin FRANK SAMUEL (1889–1954), the son of a piano manufacturer, was educated at Clifton and was also one of the founders of Decca. In 1928 he sold his interest in the company at the peak of the boom and, a few years later, became managing director of the United Africa Company, a commodity trading subsidiary of Unilever. Although generally very successful in this venture, he is best remembered for the ill-considered Tanganyika “groundnuts scheme” of 1946–51. Samuel was, nevertheless, a leading figure in the economic development of east Africa. Wilfred’s son EDGAR SAMUEL (1929–), who was educated at Clifton and London University, is one of the best-known historians of the early modern period of Jewish, especially Sephardi, settlement in England. He served as director of the Jewish Museum in 1993–95 and was president of the Jewish Historical Society of England in 1988–90. Many of his essays were collected in his *At the Ends of the Earth: Essays on the History of the Jews in England and Portugal* (2004).

[Cecil Roth / William D. Rubinstein (2nd ed.)]

SAMUEL BEN ALI (Samuel ha-Levi ben al-Dastur – “the Aristocrat”; d. 1194), one of the *geonim* of the post-geonic period (which lasted for about 200 years after the geonic period proper). He was the most prominent and important of the 12th-century Babylonian scholars, and the only one of the neo-geonic period whose written work has survived. Samuel was head of the academy in Baghdad for about 30 years. He was also the recognized leader of the neighboring countries, according to the statement of the traveler, Pethahiah of Regensburg: “In the whole of Assyria, in Damascus, in the towns of Persia and Media and in Babylon, they have no *dayyan* except one assigned by Samuel, head of the academy, and he appoints judges and teachers in every town” (ed. by L. Greenhut (1905), 10). Both Benjamin of Tudela and Pethahiah describe in the diaries of their travels the manner of Samuel’s influence and his conduct of the academy, which resembled to a certain degree the customs of both the *geonim* and of the exilarchs. Samuel is chiefly known for his polemics with Maimonides both on halakhic matters and on Maimonides’ attitude to the resurrection of the dead (*Maamar TeHiyyat ha-Metim*, in: *Kovez Teshuvot ha-Rambam* (1859) pt. 2, 8df.). Samuel wrote glosses to the *Mishneh Torah* of Maimonides, who replied in a letter to his pupil in Baghdad, Joseph b. Judah (*She’elot u-Teshuvot ha-Rambam*, ed. by J. Blau, 3 (1961), 142 no. 464). In addition to his well-known responsum on the subject of traveling on

rivers on the Sabbath (*ibid.*, 2 (1960), 570 no. 309), several of his responsa have been published by Poznański (responsum to Moses of Kiev, a pupil of Jacob Tam; see bibl., 53–56), Aptowitz (on the minutest quantum of *Hamez*), and Mann (a responsum of 1166; HYY, 6 (1922), 104ff. A large and important collection of letters by Samuel and his contemporaries was published by Assaf in *Tarbiz*, Year 1 (1930).

Samuel had one daughter who was well versed in the Bible and the Talmud, and she taught Bible through a window of the building in which she sat, the pupils outside below unable to see her (Pethahiah, p. 9f.). There is also a reference to his two sons-in-law, Zechariah b. Berachel of Aleppo, “the *av bet din* of the yeshiva” (letter of Samuel, in: *Tarbiz* 1, no. 2 (1930), 61), who was greatly praised by his father-in-law, and “his beloved son-in-law and pupil... head of the academy, Azariah (Eleazar ha-Bavli, *Diwan*, ed. by H. Brody (1935), no. 10, p. 13). Some (S. Assaf) think that Azariah is a copyist’s error (though it occurs twice) for Zechariah, while others hold that Samuel had two daughters married to these two scholars. A third view is that his only daughter was betrothed to Azariah, who died before the marriage, and that she subsequently married Zechariah. There is no sufficient basis to the statement that the daughter died the same day as her father, although it is possible that Azariah died the same day as Samuel.

[Samuel Abba Horodezky]

SAMUEL BEN AVIGDOR (1720–1793), Lithuanian rabbi. Samuel b. Avigdor was Vilna’s last official rabbi. His father, Avigdor b. Samuel (d. 1771) was nicknamed *Harif* (“the sharp one”). Between 1719 and 1746 he served as rabbi of Pruzhany, Zelwa, Volkovysk, and Ruzhany. His approbations are found in many works. He is mentioned in responsa in *Mekom Shemu’el* (Altona, 1738) and *Givat Sha’ul* (Zolkiew, 1774). In his old age he lived with his son.

Samuel was at first a merchant who contracted several business agreements with the Vilna community (1745), but was appointed rabbi of Vilna in 1750, succeeding his influential father-in-law, Judah b. Eliezer (known as *Yesod*). Later Samuel was also appointed rabbi of *Smorgon. As a result of complaints against him that he intended to dominate the community by the infiltration of members of his family into the communal organizations of Vilna, in 1777 the community decided to oust him from the rabbinate. The civil government also intervened in the ensuing battle. That year a temporary compromise was reached whereby the rabbi obtained several posts for the members of his family, he in his turn relinquishing several of his financial demands, but the furore broke out

again in 1782. The dispute was brought before several courts, both Jewish and gentile. The resolution of the community on the dismissal of the rabbi from his post that was finally adopted in 1785 was endorsed by the civil court in 1787. In the second stage of the dispute (1782–91), Samuel was supported by merchants and artisans in the town, who represented a new power in the community and demanded that the community alleviate their situation and associate them in the conduct of its affairs. One of the chief opponents of the domination of Vilna by the wealthy was Simeon b. Ze'ev Wolf, who did not refrain even from false allegations and calumny. Although all the reforms were not achieved, some of them were implemented. In the end neither side won a clear victory, but, as a result of the controversy, no one was thereafter officially appointed rabbi of Vilna. Samuel was an opponent of Ḥasidism and was among the first signatories of the Vilna excommunication of Ḥasidim in 1772. Samuel published no writings (his novellae, in pilpulistic style, and *Hadrat Zekenim*, his novellae on the entire Talmud, are still in manuscript), but he is mentioned with great reverence in rabbinic literature.

[Yehoshua Horowitz]

SAMUEL BEN AZARIAH (13th century), *exilarch in *Baghdad. Samuel b. Azariah was the grandson of *Samuel, the exilarch of Baghdad, and the last exilarch under the *Abbasid dynasty. During the period of his office the *Mongols conquered Baghdad (1258). He retained his position under their rule and was even appointed as adviser to Il-Khan Hulagu, the Mongolian ruler who conquered Baghdad. It is not known until when Samuel remained in office.

[Abraham David]

SAMUEL BEN DANIEL ABU RABĪ'A HA-KOHEN (13th century), last *gaon* of *Baghdad, succeeding his father R. Daniel Abu Rabīa. Samuel wrote two letters in 1288 on the controversy over the ban (*herem*) on *Maimonides' *Moreh Nevukhim*. In one of the letters, sent to R. *David Maimuni ha-Nagid and the rabbis of Acre, Samuel states that he has issued a ban against R. Solomon b. Samuel Petit, Maimonides' bitter opponent.

SAMUEL BEN DAVID (known from his acronym as **Rashbad**; 12th century), Provençal commentator, *posek*, and preacher. Samuel was born in Narbonne and studied under Moses b. Joseph, head of its yeshivah. He later moved to Lunel where he became a member of the group of scholars known as *Ḥavurat Lunel* ("company of Lunel"). He then went to Montpellier where he served as rabbi. Samuel wrote a commentary to the Talmud, but only fragmentary quotations from the orders *Mo'ed*, *Nashim*, and *Nezikin*, and the tractate *Berakhot*, have survived in the works of Provençal scholars. It therefore seems that his commentary embraced at least these three orders, together with those tractates whose laws are of practical application. In his commentary Samuel mostly follows the Provençal traditions, and, like his teacher, aimed at arriving at the definitive *halakhah*. Samuel was also the author of a book of sermons mentioned by Judah *Lattes. Among his pupils was *Asher of Lunel, author of *Sefer ha-Minhagot*. The high esteem his contemporaries held him in is demonstrated by *Abraham b. David of Posquières. Samuel doubted the ritual fitness of the *mikveh* of the head of the Montpellier community that had been constructed according to the *mikveh* built by Abraham b. David for himself. Abraham b. David adduced a number of arguments to prove the correctness of his views, and he ended his responsum with the words: "and now tell the scholar [Samuel] not to be angry, nor to be jealous because his view has been challenged and his reasoning confuted, for this is one of the matters left to us [by heaven] whereby we may distinguish ourselves." Samuel's influence prevailed in Provence for many generations.

[Binyamin Zeev Benedikt]

SAMUEL BEN DAVID (d. 1673), *Karaite traveler. Samuel set out in 1641 from *Yevpatoriya in the Crimea, journeyed via *Istanbul and *Egypt to Erez Israel, and returned home through *Syria. The account he left of his travels contains valuable information on the Karaite communities in the Near East, as well as his own impressions of the countries and peoples visited. Samuel's account was published by J. Gurland in his *Ginzei Yisrael* (1865) and in A. Yaari's *Masot Erez Yisrael* (1946), 221ff.

BIBLIOGRAPHY: Mann, *Texts*, 2 (1935), 721.

[Leon Nemoy]

SAMUEL BEN DAVID MOSES HA-LEVI (1625?–1681), Polish rabbi. Samuel was born in Poland and studied under *David b. Samuel ha-Levi and Shabbetai *Horowitz. He lived at first in Mezhirech in the district of Poznan. When Mezhirech was destroyed by Czarniecki in 1656, Samuel escaped to Halberstadt, where for three years he lived in great poverty and was assisted by a number of friends he made there. From Halberstadt he went to another town (whose name he refrained from mentioning because of the suffering caused

him by its inhabitants), and remained there for a year and a half. In 1660 he was appointed regional chief rabbi of Bamberg, but since the authorities would not permit the rabbi of Bamberg to live in the town itself, his seat was at Zeckendorf, a village about two hours' journey from Bamberg. Samuel based his rulings almost exclusively upon the *halakhah*, without regard to the local customs which originated with the scholars of Germany. As a result, he aroused the opposition of the rabbis and laymen of the district and was compelled to leave Bamberg in 1665. For a time he was without a post, until he was appointed rabbi of Kleinsteinbach, where he remained until his death.

Samuel's fame rests upon his *Naḥalat Shivah*, which he finished in 1664 and the publication of which he personally supervised (Amsterdam, 1667). In 49 sections he deals with the formula of legal deeds of every kind, both in matrimonial and civil law, and clarifies all the relevant laws in accordance with the earlier and later *posekim*. Toward the end of his life Samuel succeeded in publishing the *Mahadura Batra* ["second edition"] *le-Sefer Naḥalat Shivah* (Frankfurt, 1681), which includes corrections and additions, as well as replies to the strictures upon it which appeared after its first publication, especially those of Jair Ḥayyim *Bacharach in his *Ḥut ha-Shani* and those of Aaron Samuel *Koidanover. *Naḥalat Shivah* became very popular among rabbis because of its practical value in the drawing up of documents, particularly *gittin*, *ketubbot*, and the like. After Samuel's death, his son Abraham republished the book in Fuerth in 1692, adding a second part containing 85 of his own responsa as well as others, including those of Aaron Samuel Koidanover. The importance of the work is evidenced by its frequent reprinting: Frankfurt, 1694; Fuerth, 1724, 1739, 1784; Russia, 1818; Lemberg, 1874, et al.; and as late as 1962 in Jerusalem.

[Shlomo Tal]

SAMUEL BEN ELIEZER OF KALWARIA (mid-18th century), preacher and kabbalist. His only extant book is a homiletical work, *Darkhei No'am*, printed in Koenigsberg in 1764 and probably written before 1760. Among the *haskamot* (recommendations) in the foreword to the work is one by the Gaon of Vilna. It is a homiletical exposition of Lurianic Kabbalah, in the form of an interpretation of the *aggadot* of Rabbah b. Bar Ḥana in the Talmud, which he explains by the four methods of *pardes. The book contains some calculations as to the time of the redemption, and it appears that Samuel expected it to begin in the year 1781. Some of his moralistic admonitions seem to be directed against the early groups of the Ḥasidim, which proves that such ḥasidic groups existed in Lithuania before the death of *Israel b. Eliezer Ba'al Shem Tov in 1760.

SAMUEL BEN HANANIAH (12th century), **nagid* of Egyptian Jewry. Samuel, who was known by the Arabs as Abu Maṣṣūr, was descended from a family of scholars. He himself was well versed in Jewish learning. Like his father, he was a physician and was one of the physicians in the court of the *Fatimid caliphs. In 1134, when Caliph al-Ḥāfiẓ requested that he prepare a poison for his son Ḥasan, he refused; a Christian physician agreed to do so. Later, the caliph regretted his action, the Christian physician was put to death, and Samuel was appointed chief court physician. The documents found in the Cairo **Genizah* which mention Samuel as *nagid* are dated between 1142 and 1159. When the poet *Judah Halevi arrived in *Alexandria, Samuel invited him to *Cairo. Judah Halevi then became friendly with him and praised him in several poems. Samuel was supplanted for a short time by *Zuta.

[Eliyahu Ashtor]

SAMUEL BEN HOPHNI (d. 1013), *gaon* of *Sura; he was a descendant of scholars of the *Pumbedita academy, his grandfather *Kohen Zedek was *gaon* of Pumbedita, as was his uncle Nehemiah. His father held the post of *av bet din* at the same academy. Samuel was not appointed to the Pumbedita academy, but became the *gaon* of the Sura academy about the year 997. *Hai, the noted *gaon* of Pumbedita, was his son-in-law.

Samuel was one of the most prolific writers of the geonic period. The scope and pattern of his literary activity followed closely the creations of *Saadiah, his great predecessor in office. His literary works, however, did not share the good fortune of Saadiah's; the greater part of his works is no longer extant and is known mainly through book lists, quotations by subsequent scholars, and other indirect references. But significant fragments are slowly coming to light out of the *Genizah. The works of Samuel range over the following central themes: responsa and talmudic treatises, biblical exegesis, philosophy, theology, and polemical writings.

Samuel possessed an orderly, analytical mind which is reflected in both his talmudic and exegetical works. He shows a special predilection for systematic, numbered classification of subjects under discussion. He was the first to write an introduction to the Talmud, summarizing and classifying its basic principles. This work is mentioned by early scholars and is currently being recovered from the *Genizah*. *Samuel ha-Nagid made use of this work in his *Mavo la-Talmud*. He also wrote a book of precepts – on the commandments. Some 15 other works on various subjects are known; fragments of some of them have been published. Samuel translated and wrote a commentary on the Pentateuch in Arabic. Scholars differ as to whether it covered the whole Pentateuch or merely completed the work begun by Saadiah and *Aaron ibn Sargado (*Gaon* of Pumbedita). The translation and commentary of the last three portions of Genesis (ch. 41–50) were published in Arabic by I. Israelsohn (1886). Other scattered verses of

the commentary have been published in various periodicals. His commentary was used widely by authors of note such as Abraham *Ibn Ezra, *Abraham b. Moses b. Maimon and *Baḥya b. Asher. The author of the *Midrash ha-Gadol also made use of his work.

In the Bible commentary he employs the above-mentioned method of classification in elaborating on concepts, on meaning of individual words, and on implied talmudic principles. This frequently led him to digressions far from the subject under immediate discussion. His commentary is basically rooted in talmudic-midrashic tradition. At times he offers explanations different from those mentioned in the above sources. Grammatical treatment of words is infrequent, nor does he show acquaintance with the triliteral theory of Hebrew stems advanced by his contemporary Judah ibn Ḥayyuj. Jonah *Ibn Janah in the 11th century refers to him as a commentator of *peshat* ("literal exegesis").

Of his philosophical works, one is known through references by later authors. He was apparently well acquainted with the classical philosophic writings, and was basically a rationalist. In one connection, his son-in-law Hai speaks disparagingly of him for this reason. Maimonides and his son Abraham refer to his philosophic concepts in support of their own ideas. Samuel makes use of the ideas of the philosophers in his Bible commentary, though he does not quote them directly. There is some uncertainty as to whether Samuel wrote a specific polemical work against the heretics of his time. His books, however, contain direct and indirect refutation of the arguments advanced by numerous skeptical or atheistic groups.

According to revised opinions based on *Genizah* sources, Samuel died in the year 1013. He was not the last *Gaon* of Sura, as has been assumed, being succeeded by Dosa son of Saadia. Following Dosa's death in 1017, Samuel's own son Israel succeeded to the gaonate, and even after his death in 1034, the Sura academy continued to function. The bibliography of his published works and letters was edited by A. David in the preface to the book *Me'assef Nidaḥim* by A.E. Harkavy (1970), a great part of which was dedicated to Samuel b. Hopfni.

[Aaron Greenbaum]

SAMUEL BEN JACOB OF KELMY (1797–1867), rabbi. Samuel came from Neustadt (district of Kovno) and lived in Kelmy (Lithuania). In 1858 he immigrated to Erez Israel, associating in Jerusalem with Meir *Auerbach of Kalisch and Sundeḥ *Salant. In 1860 he went back to Europe but returned to Jerusalem in 1866. Samuel was a brother of Elijah Rogoler.

In 1870 after Samuel's death his son, A.L. *Frumkin, went to Israel, and he called the first edition of his *Toledot Ḥakhmei Yerushalayim, Even Shemu'el* (1874) after his father. At the end of Part I of this edition he incorporated *Naḥalat Ya'akov*, containing responsa and Torah novellae by his father and uncle (145–55). Many of Samuel's responsa, his novellae to tractates of the Talmud, and glosses to the *Sha'agot Aryeh* are still in manuscript.

[Yehoshua Horowitz]

SAMUEL BEN KALONYMUS HE-ḤASID ("The Pious") **OF SPEYER** (12th century), one of the first leaders of the *Ḥasidei Ashkenaz movement and a member of the most important Jewish family in medieval Germany. His father moved from Mainz to Speyer after the persecutions of 1096 and Samuel was born there. Nothing is known of his life, and very few of his writings have survived. It seems that he wrote some exegetical works on the Torah and the Midrash. However, only a few quotations in later works have survived. He undoubtedly studied esoteric theology, and probably even wrote in this field. The titles, "the Pious, the Saint, and the Prophet" by which he was known to later generations, seem to indicate that he was regarded as a mystic. He contributed to the authorship of *Sefer Ḥasidim*. It has been proved that he wrote the first part of the book (in the Parma Ms. version), which deals with the fear of God and the subject of repentance. It is probable that some other sections of that book are his, and were included in it by its main author, his son *Judah he-Ḥasid. Hebrew and Yiddish collections of stories of the 15th and 16th centuries incorporate many tales of his magical powers. According to these, he competed against gentile magicians and used his powers to save Jews from their oppressors. Such stories were also told about his son Judah. Though knowledge of Samuel's work is extremely limited, there is no doubt that he served as a creative link between the oral traditions of the Kalonymus family in the fields of ethics, theology, and mysticism, and the literature of the Ḥasidei Ashkenaz movement which developed in the late 12th and the 13th centuries. The Ḥasidim regarded Samuel as their earliest leader and the movement reached its peak under the leadership of his son Judah he-Ḥasid. Another son, Abraham, was one of the leading halakhic scholars of his generation.

[Joseph Dan]

SAMUEL BEN MEIR (**Rashbam**; c. 1080–85–c. 1174), commentator on Bible and Talmud. Born in Ramerupt in northern France, Samuel was the son of Meir, one of the first tosafists and a prominent disciple of *Rashi, whose daughter, Jochebed, Meir married. Samuel was the elder brother of Jacob

*Tam and was a colleague of Joseph Kara. In his early youth he studied under his father, but mainly under his grandfather, Rashi, in Troyes. He entered into discussions with Rashi on biblical and talmudic subjects. In some instances Rashi accepted his grandson's opinion and amended his own commentary accordingly.

Samuel b. Meir earned his livelihood from sheep-farming and viticulture. He led a life of extreme piety and modesty, but resolutely holding to his own opinion when he felt it necessary. He used to pray that he might be privileged to know the truth and to love peace. He was well versed in worldly matters and may have had a knowledge of Latin. He participated in disputations with Christians. His scholarly activity was comprehensive. In addition to his commentaries on the Bible and Talmud he devoted himself to *piyyutim* and wrote a grammatical work, *Sefer Daikut*.

Bible Commentary

He apparently wrote a commentary on all the books of the Bible; only his commentary on the Pentateuch, however, has come down almost in its entirety. It was well edited from a manuscript by David Rosin (1881) who also wrote a comprehensive treatise on Samuel as Bible commentator. The edition by A.I. Bromberg (1965) is inaccurate. Of the remainder of Samuel's commentaries only fragments have survived in the works of later commentators, notably in the *Arugat ha-Bosem* of Abraham b. *Azriel (ed. by E.E. Urbach, 4 (1963), index, s.v. Shemuel (Samuel) b. Meir). A. Jellinek published part of the commentary on Esther, Ruth, and Lamentations (1855); he wrongly attributed to Rashbam the commentary on Ecclesiastes and Song of Songs, which he also published (see detailed discussion in Rosin's edition, xviii–xxii).

Samuel's biblical commentaries are characterized by his extreme devotion to the literal meaning (*peshat*). He constantly refers to "the profound literal meaning of the text." He strongly condemns earlier commentaries, including those of his grandfather, Rashi, even referring to some as "nonsense," "lies," and "crooked explanations," without naming their authors; in point of fact he generally refrains from mentioning other commentators by name. This method of literal interpretation he adopted in his youth, and he relates how he argued on the subject with his grandfather, who conceded that "if he had the time, he would have had to write another commentary, more in accordance with the literal approach, than daily gaining ground" (Rashbam, on Gen. 37:2).

On rare occasions he bases his interpretation on halakhic or midrashic interpretations if these seem to him to agree with the literal meaning. At times he even interprets a verse against the *halakhah* (e.g., Gen. 1:5; Ex. 21:6, 10), despite the fact that he considered the *halakhah* as authoritative and "every word and interpretation of our sages are correct and true" (on Gen. 1:1). His uncomplicated faith and spiritual wholeness prevented him and those who followed his method from any feeling of tension or contradiction. In his opinion *peshat* and *derash* belong to different categories. While the former ex-

plains Scripture according to the laws of language and logic, the latter bases itself on redundancies in language employing the hermeneutical rules by which the Torah is expounded. He states: "Let every sensible person know and understand that, although they are of primary importance, I have not come to explain the *halakhot* ... derived as they are from textual redundancies. They can partly be found in the commentaries of Rabbi Solomon, my maternal grandfather. My aim is to interpret the literal meaning of Scripture" (preface to section "*Mishpatim*").

Samuel was greatly influenced by Rashi, and to a considerable extent regarded his commentary as complementing that of Rashi, especially in those cases where Rashi did not follow the *peshat*. He sometimes remarks that, since Rashi had already commented on a certain matter, there is no need to repeat what he had said. Some of his explanations, however, are completely identical with those of his grandfather.

His exposition is concise and lucid and confined to explanation of the subject matter and language. He does not usually state the difficulties explicitly; but these may be inferred from their solutions in the commentary. Unlike Rashi, he gives one explanation only. In his commentary he takes *cantillation into consideration. Like Rashi he often uses French glosses to explain words, and he often interprets verses in accordance with contemporary custom and usage (e.g., Gen. 49:24). Samuel enters deeply into grammatical questions, generally relying upon Menahem b. *Saruk and Dunash b. *Labrat. In some cases he disagrees with them, demonstrating his own superior scholarship. In contrast to Rashi he insists that biblical Hebrew differs from mishnaic, and the meaning of a biblical word cannot therefore be determined by its meaning in mishnaic Hebrew (on Ex. 12:7). Occasionally, however, when he cannot find a biblical parallel, he deviates from this rule (on Ex. 1:13).

He took pains to find accurate texts of the Bible, especially from Spain, according to them – and sometimes even according to his own opinion – amending the Bible texts before him (Ex. 23:24). Sometimes he quotes biblical verses different from the accepted text (e.g., Gen. 1:5, 21; Deut. 32:11). This seems in some cases to be the result of adjusting the text in accordance with his explanation, but in others it is due to the fact that he had a different text before him. He laid down an important rule with regard to biblical poetry (cf. on Ex. 15:6) which was accepted by his grandfather who, accordingly, amended his own commentary. Another principle widely applied by Rashbam is that the details which appear to be redundant are necessary, however, for the elucidation of the events that follow. Targum *Onkelos on the Pentateuch is one of his major sources. He also quotes the Palestine Targum on the Pentateuch once and the Targum to the Hagiographa twice. Twice he quotes the Vulgate but rejects its readings (Gen. 49:10; Ex. 20:13). He was the first Bible commentator to incorporate in his commentaries attacks on christological exposition. In this connection he gives reasons for certain laws, especially those whose validity was challenged by Christians. In

some cases his extreme adherence to the literal meaning of the text may be attributed to those controversies with Christians. This emerges from the oft-repeated expression “according to the literal meaning of the text and in answer to sectarians.”

His self-confidence in his ability as a commentator emerges clearly from his commentary. That self-confidence may explain his vigorous criticism of other commentators, his limiting himself to single explanations, the complete absence of the admission “I do not understand” (often found in Rashi), and his preparedness to make textual amendments. S.Z. Ashkenazi wrote a supercommentary *Keren Shemu'el* (Frankfurt on the Oder, 1727) on Samuel b. Meir's commentary.

[Avraham Grossman]

As Tosafist

In addition to his importance as a biblical commentator, Samuel b. Meir is also one of the first, and the most important, of the *tosafists. Only part of his halakhic writings have come down to us. The most significant and important are his supplements to Rashi's commentary on the Talmud where Rashi did not manage to complete his final version. Two of these were published instead of Rashi's missing commentary – one on chapter 10 of *Pesahim*, and the other on most of *Bava Batra*, from folio 29a. The commentary on *Bava Batra* was written after Rashi's death. Two versions of the commentary which differ considerably exist: that of the Bomberg edition (Venice, 1521), and that of the Pesaro edition (1510). Some scholars ascribe to him the anonymous commentaries on a few of the small tractates of the Talmud, but there is no evidence for this. The commentary to *Bava Batra* was in the hands of Abraham b. Isaac of *Narbonne during Samuel b. Meir's lifetime. His commentaries are characterized by their excessive prolixity, so that at times one of his comments is as long as a whole passage of *tosafot*. In addition to explaining the text, he propounds and answers difficulties, proposes alternative explanations, weighing one against the other, and all within the framework of a running commentary on the Talmud. He also wrote *tosafot* to various tractates; only a number of quotations and a greater number of references have been preserved in the standard *tosafot* and in the works of other *rishonim*. A larger number of fragments occur in the *tosafot* to the third chapter of *Makkot*, from folio 20 onward, which are introduced with the words *perush ha-kunteres*. The commentary to *Alfasi's compendium there ascribed to Rashi is also his. Large sections of his commentary to *Avodah Zarah* have come down in the works of other *rishonim*, when they discuss the themes of this tractate. Many quotations from his commentary to *Avot* are preserved in the anonymous commentary to this tractate in the Maḥzor *Vitry and in that of Isaac b. Solomon of Toledo. Samuel b. Meir was also the first scholar of northern France to make frequent use of Alfasi's compendium, to which he even wrote a kind of *tosafot*. Various manuscripts refer to his commentary on *piyyutim*.

SAMUEL BEN MOSES AL-MAGHRIBĪ (ha-Ma'aravi; 15th century), *Karaitic physician and author living in *Cairo. In 1434 Samuel completed a code of Karaite law in Arabic entitled *al-Murshid* (“The Guide”), divided into 12 sections. His exposition is orderly and lucid, with infrequent polemics against the *Rabbanites, and he readily adopted Rabbanite customs that seemed to him unobjectionable. Samuel's work is apparently the last Karaite legal code to have been written in Arabic; all the later codes were, so far as is known, written in Hebrew. Although soon superseded by the code of *Bashyazi, Hebrew translations of “The Guide” were still current in the 18th century.

[Leon Nemoy]

SAMUEL BEN NAḤMAN (Naḥmani; late third and early fourth centuries C.E.), Palestinian *amora*. He was one of the most renowned aggadists of his time (TJ, Ber. 9:1, 12d). A native of Lydda in Erez Israel (Lev. R. 35:12), Samuel apparently paid a short visit to Babylon in his youth. On his return, he studied under *Joshua b. Levi (TJ, RH 4:4, 59b) and *Jonathan b. Eleazar (Pes. 24a), in whose name he quotes several sayings (Yoma 9b). Samuel, who may have come into contact with *Judah ha-Nasi in his youth, was on intimate terms with *Judah II. The two went to Tiberias on Diocletian's order (c. 286), and bathed in the hot springs there (TJ, Ter. 8, 110, 46b; Gen. R. 63:8). Among his other colleagues were *Simeon b. Jehozadak, *Ammi, Ḥanina b. Papa, and *Ḥelbo. Samuel is known to have made two official visits to Babylon. The first was to determine the intercalation of the calendar, a function which, for political reasons, he could not perform in Erez Israel (TJ, Ber. 2:1, 2d). The second was in his old age, when he petitioned the empress *Zenobia (267–73) to pardon an orphaned youth who had committed a grave political crime (TJ, Ter. 8:10, 46b). His halakhic decisions are recorded in the Babylonian (e.g., Meg. 2a) and Jerusalem Talmuds, and his authority is illustrated by his refusal to allow Ammi to lift a ban on a certain colleague (MK, 17a).

Samuel was considered an authority on the *aggadah* (Pes. 15b). Among his sayings was, “Whoever associates the name of Heaven with his suffering [by blessing God for the evil, or by prayer], his sustenance shall fly to him like a bird, as it says, in Job 22:25, ‘And silver shall fly to thee’” (Bet. 63a, JPs “And precious silver unto thee”). His vivid description of the grief of Abraham, Isaac, Jacob, and Rachel over the destruction of

the Temple, written in Hebrew and accompanied by dirges in Aramaic (Lam. R. Proem 24), reveals his poetic mind. Among those who transmitted his sayings were Ḥelbo, Levi, and Abbaḥu (Lev. R. 35:12), and Eleazar b. Pedat.

He was survived by two sons, Naḥman and Hillel; sayings have been preserved from both of them (Gen. R. 10:5, TJ; King. 1:9, 61c).

BIBLIOGRAPHY: Bacher, Pal Amor; Hyman, Toledot; Ḥ. Albeck, *Mavo la-Talmudim* (1969), 266–7.

SAMUEL BEN NATRONAI (between 1100 and 1110–before 1175), German scholar. Samuel was the brother-in-law and teacher of *Joel b. Isaac ha-Levi and married the daughter of *Eliezer b. Nathan some time before 1133. His birthplace and the names of his teachers are unknown, but it is known that he studied in Regensburg and that on various occasions he was in Bonn, Mainz, and Cologne. Many of his teachings, which are conspicuous for the sharpness of his style, are contained in the *Sefer Raban* (Prague, 1610) of his father-in-law and in the *Sefer Ravyah* of *Eliezer b. Joel ha-Levi of Bonn, the son of his brother-in-law. His rulings were highly regarded by the great scholars of the time. Samuel is known to have written *tosafot* to several tractates, and a book of his halakhic decisions is quoted by the *rishonim*; he also wrote a *seliḥah* for the Day of Atonement that has survived.

BIBLIOGRAPHY: V. Aptowitz, *Mavo le-Sefer Ravyah* (1938), 69–75; Urbach, *Tosafot*, index.

[Israel Moses Ta-Shma]

SAMUEL BEN SAMSON (13th century), Erez Israel settler, who emigrated from France to Erez Israel in 1210 and described his journey in an extant letter. Samuel was one of a large group that emigrated from France and England; he entered the country by way of Egypt together with Jonathan b. David ha-Kohen of Lunel, a Provençal scholar. Samuel then traveled throughout the country with two of the company of immigrants, Saadiah and Tobiah, as well as the exilarch from Mosul who had come to pray at the holy places and the graves of the pious. In his letter to the Diaspora Samuel described his arrival in Jerusalem and its holy places. From there he went to the cave of Machpelah, entering with the help of a dyer of wool, the only Jew there. From Hebron he returned to Jerusalem and went by way of Bethel, Shiloh, and Shechem to Beth-Shean and Tiberias, describing the tombs of the pious in the latter's vicinity. Traveling from there to Safed, he toured its environs. His descriptions include not only the graves of the pious in the Upper Galilee, but also ruins of ancient synagogues he saw, and which he believed to be some of the 24 synagogues erected by Simeon b. Yoḥai. He also visited Kefar Biram, Kefar Nivvata, Gush Ḥalav, Meron, and Almah, and testified that "in all these places there are communities of more than eight *minyanim*" (A. Yaari, *Iggerot...*, (1943), 80, 81), i.e., in each village of Upper Galilee mentioned he found more than 80 Jewish families. This pointed to the remnants of an agricultural settlement in Upper Galilee, even after the

conquest of the country by the crusaders. From there he went to Dan and Damascus, later visiting Naveh in Transjordan, where he saw the ruins of the ancient synagogue which has been rediscovered in modern times.

SAMUEL BEN SHILAT (first half of third century C.E.), Babylonian *amora*. Samuel was a pupil of Rav, whose sayings he transmitted. He is distinguished in the Talmud, however, as an outstanding pedagogue, utterly devoted to teaching children. Rav recognized his devotion and sincere dedication to his disciples and held him in high esteem, considering Samuel the ideal instructor of the young. Once Rav found him standing in his own garden during school hours and asked him whether he had forsaken his calling. Samuel answered, "For 13 years I have not seen my garden, and even now my thoughts are of pupils." Whereupon Rav applied to him the verse (Dan. 12:3), "they that turn the many to righteousness [shall shine] as the stars for ever and ever" (BB 8b).

SAMUEL BEN SOLOMON OF FALAISE (Sir Morel; 13th century), tosafist. All that is known of Samuel's father is that he was a scholar, as was his father-in-law Abraham b. Ḥayyim ha-Kohen, possibly the son of the tosafist *Ḥayyim ha-Kohen. His teachers included *Judah Sir Leon, Solomon of Dreux, and *Baruch b. Isaac of Worms. He wrote a commentary on the **kero-vah El Elohei ha-Ruḥot le-Khol Basar* in which he explains all the Passover laws in the *piyyut* according to the traditions of the elders of Falaise and Dreux. Samuel's teachings are incorporated in the *Or Zaru'a* of his colleague, *Isaac b. Moses of Vienna. Samuel was patently apprehensive about rendering halakhic decisions and hesitated to permit what it had been customary to forbid, even when he was certain that the custom was an erroneous one and not a definite tradition. The most eminent of his pupils was *Meir b. Baruch of Rothenburg. The standard *tosafot* mention Samuel only in the *tosafot* to the tractates *Pesaḥim* and *Yoma*, but the standard *tosafot* to *Avodah Zarah* are simply adaptations of his *tosafot* and often quote him verbatim. His biblical exegesis is included in the various collections of the biblical commentaries of the tosafists. He was a participant in the *disputation in Paris with Nicholas *Donin.

[Israel Moses Ta-Shma]

SAMUEL BEN URI SHRAGA PHOEBUS (second half of 17th century), Polish rabbi and author of a well-known com-

mentary on the Shulḥan Arukh *Even ha-Ezer* called *Beit Shemu'el*. In his youth, he studied with R. *Joshua Heshel in Cracow. Upon his teacher's death, he continued his studies under R. Heshel's successor, R. Leib Fischeles, whose daughter he married. Samuel first officiated as rabbi in Szydłowiec, Poland, where he wrote the first version of his commentary. In his introduction he states that he was isolated in Szydłowiec and could not benefit from the counsel of students and colleagues. The work was published in 1689 in Dyhernfurth, with the text of the *Even ha-Ezer*, and was the first Hebrew book printed there. In 1691 Samuel was called to the important and lucrative rabbinate of Fuerth, Germany, where he displayed great activity. Together with the students who gathered around him in Fuerth, he reviewed and revised his work, and the second and final version was published there in 1694. This clear and comprehensive work is regarded as one of the best commentaries of its kind and was accepted in all scholarly circles as the standard and authoritative commentary to *Even ha-Ezer*. It has frequently been reprinted, together with the text. Despite his achievements in Fuerth, he was not happy there and longed for his former, smaller rabbinate. In 1694 he received a call to return to Szydłowiec. It appears that he accepted the invitation, since he is mentioned as the rabbi of that town in the approbation to *Ir Binyamin* which appeared in Frankfurt on the Oder in 1698. He also wrote responsa, one of which is published in *Hinnukh Beit Yehudah* of R. Enoch b. Judah of Schneitach (Frankfurt, 1708) no. 131.

SAMUEL COMMISSION, inquiry commission sent in 1919 by the British government to Poland to examine the causes of antisemitic tension and disturbances which had aroused sharp criticism in the West. The Commission arrived after the *Morgenthau Commission had already completed its inquiries there and remained in Poland from September until December 1919. Sir Stuart Samuel, who headed the Commission, was president of the *Board of Deputies of British Jews between 1917 and 1922 (he was a brother of Herbert *Samuel). Also prominent on the Commission was Capt. Peter Wright, who had been influenced by the preconceived ideas prevalent in Poland concerning Jews.

The Commission visited many areas, especially those with evenly mixed populations, such as eastern *Galicia, and gathered reliable testimonies on recent incidents of violence. Meetings were held with the Polish premier I. Paderewski and government ministers. At the conclusion of their journey, Samuel and Wright did not share the same opinions, and the subsequent published report comprised Samuel's account only, a fact which weakened its influence on public opinion. In an effort to ameliorate the tensions between Poles and Jews, Samuel advanced the following 12 proposals:

- (1) Implementation of the clauses of the agreement concerning rights of Jewish citizens in Poland
- (2) The practice of true equality
- (3) Prosecution of criminal acts to persons or property committed out of motives of racism or religious bigotry
- (4) Restoration of Jewish civil servants in Galicia to their former posts
- (5) Restoration of Jewish railway workers to their positions throughout Poland
- (6) Abolition of the **numerus clausus* for Jewish university students
- (7) Prohibition of discriminatory trade practices
- (8) Immediate judicial examination of all those being held in detention camps
- (9) Facilitation of the founding of new industries
- (10) The guarantee of British government aid in Jewish migration overseas (to Palestine, Canada, South Africa, etc.)
- (11) Aid for the establishment of banks in which the Jewish public would have confidence
- (12) Attachment of a Yiddish-speaking secretary to the British embassy in Warsaw

Samuel himself intended to establish a bakelite factory in Poland to employ thousands of Jewish workers, but the government disapproved when he requested that Jewish workers be allowed to work on Sunday instead of Saturday. His book, *Mission to Poland*, was published in 1920.

[Moshe Landau]

SAMUEL HA-KATAN (early second century C.E.), *tanna*. Some explain that the name *ha-Katan* ("the small") was given him because of his extreme modesty, while others maintain that he was so called because he was only a little inferior to the prophet Samuel (TJ, Sot. 9:13). His modesty and greatness are best illustrated by the following incidents. When the patriarch *Gamaliel II called a conference of seven scholars and eight appeared, he asked the outsider to withdraw. Samuel, not wanting the intruder to be embarrassed, rose and said, "I am the one without invitation." Nevertheless, Gamaliel understood that it could not be he and ordered him to sit, praising him in very high terms (Sanh. 11a). On another occasion, when a heavenly voice proclaimed at an assembly of scholars that "there is one here who is worthy that the *Ru'ah ha-Kodesh* [Holy Spirit] should descend upon him," everyone understood that the reference was to Samuel (*ibid.*). Samuel is best known for *Birkat ha-Minim*, which expressed anathema against Judeo-Christians, sectarians, and informers. It was composed at the request of Gamaliel II and incorporated into the daily **Amidah* (Ber. 28b). He explained the verse, "There is a righteous man that perisheth in his righteousness" (Eccles. 7:15) as meaning that the Creator of the world knows that the pious sometimes sin, therefore God says, "I will take him away in his righteousness before he has the opportunity to err" (Eccles. R. 7:15). Samuel was childless, and at his funeral Gama-

liel II and Eliezer b. Azariah eulogized him: "For Samuel it is proper to cry and mourn. Kings die and leave their crowns to their sons, wealthy men their riches to their children. Samuel died and took his treasures with him" (Sem. 8). It is told that before his death he prophesied the persecutions of Trajan and the killing of the Ten Martyrs (Sanh. 11a).

[Elliott Hillel Medlov]

SAMUEL HA-NAGID (Ismail ibn Nagref'a; 993–1055 or 1056), vizier of *Granada, statesman, poet, scholar, and military commander. The meteoric rise and political and military career of Samuel ha-Nagid marks the highest achievement of a Jew in medieval Muslim Spain. Samuel was born in Córdoba to a prominent family which originally came from Merida. He received an excellent Jewish and general education, including training in Arabic and the Koran, and studied *halakhah* under *Ḥanokh b. Moses of Cordoba. While a young man, he made his first allusions to his Davidic descent, a belief which inspired his confidence in his rise to power and his career. In 1013 Samuel was among those forced to flee Cordoba in the wake of the Berber conquest. According to the 12th-century historian, Abraham *Ibn Daud, he opened a spice shop in Malaga, and shortly afterward, was approached by a maid-servant of Ibn al-'Arif, *kātib* (secretary) to the vizier of Granada, who asked him to write letters to her master. The vizier was so favorably impressed by Samuel's Arabic style that he advised King Ḥabbūs, the Berber ruler of Granada, to appoint Samuel to his staff (Ibn Daud, Tradition, 72–73). Samuel advanced from tax collector to *kātib* (after Ibn al-'Arif's death) to assistant to the vizier Abu al-'Abbas in 1020. Later he himself became vizier. In 1027 the Jews conferred upon him the title *nagid* of Spanish Jewry. In 1038, after Ḥabbūs' death, a struggle for succession between his sons Bādīs and Bullugin took place. With Samuel's aid, Bādīs eventually won the throne. As a result of this steadfast loyalty, Samuel became the leading influence on Bādīs.

Much of Samuel's work as vizier entailed leading the army of Granada, which was occupied in constant warfare with Arab Seville. It was indeed remarkable that a Jew stood at the helm of a Muslim army, which from 1038 to 1056 (the span of Samuel's command) knew only two years of respite from fighting. A major source of information on Samuel's campaigns is his poetry in the *Diwan*, some of which is addressed to his son *Jehoseph ha-Nagid. Samuel is credited as having introduced poetry of war and battle into Hebrew literature. In 1038–39 Samuel fought his first major battle, against the army of Almeria, ruled by Zuhayr, a Slav, and his fanatic Arab vizier Ibn 'Abbās. Both were killed and Samuel's victory elicited the celebration of a special "Purim" by Granada's Jews. In 1039 a heroic victory over Seville – celebrated in a poem – took place around Carmona; the latter was finally taken in 1043. In 1042 Samuel successfully came to the aid of Lorca in eastern Spain. His difficult campaigns against Abu Nūr of

Ronda in 1045 and against Malaga in 1049 resulted in narrow escapes from death. In the 1050s Samuel was constantly on the move throughout Andalusia, fighting against Seville and her allies. His triumphs were viewed by the Jews as national victories. The constant travel weakened him considerably and in 1055–56 he died on a campaign. His position was inherited by his ill-fated son Jehoseph.

In addition to being a poet (see below) Samuel was a halakhist and communal leader. His major work in *halakhah*, *Sefer Hilkheta Gavrata* (published as *Hilkhoh ha-Nagid*, ed. by M. Margalio, 1962), is a compilation and explanation of *halakhah* based on both Talmuds, the decisions of the *geonim* (sometimes criticized), Midrash, and the *She'iltot* of *Aḥai of Shabḥa. To judge from the surviving fragments, it was written in Aramaic and Hebrew and possibly partly in Arabic. *Hilkheta Gavrata* apparently was completed in 1049, though parts appeared earlier, and directly influenced later Spanish halakhists such as Isaac *Ibn Ghayyat, Isaac *Alfasi, and *Judah al-Bargeloni. Its appearance was viewed by some, including the poet Solomon ibn *Gabirol, as the victory of the Spanish grandee over *Hai Gaon of Pumbedita. Accused of insulting the gaonate, Samuel wrote a poetic apology acknowledging its supremacy. Abraham ibn Daud, however, cites Samuel as one of "the first of the generation of the rabbinate" (Ibn Daud, Tradition, 78) who marked the end of the geonic predominance in talmudic and halakhic scholarship. The Nagid was also the author of criticism of the Koran, which was cited by a contemporary Muslim author. After reading the latter's version of Samuel's critique, the Arab historian-philosopher, Ibn Ḥazm, wrote a bitter polemic against it.

As leader of Spanish Jewry Samuel corresponded with the important contemporary scholars, including R. *Ḥushi'el, R. *Hananel, and R. Nissim of Kairouan, whose daughter married Samuel's son Jehoseph. His relations with the Babylonian gaonate were generally good. While no correspondence between Hai Gaon and the Nagid has been discovered, Hai's successor, the exilarch *Hezekiah b. David, was a friend of Samuel. He also maintained friendly relations with the Palestinian communities, supplying the synagogues in Jerusalem with olive oil (*ibid.*, 75). Samuel was one of the patrons of Solomon ibn Gabirol, who addressed the Nagid as "my father, my rider, my chariot," and dedicated several poems to him.

As Poet

Samuel's poems have come down in three works: *Ben Tehillim*, *Ben Mishlei*, and *Ben Kohelet*. The poems are refined and reflect profound worldly wisdom, as well as the many facets of his life as Jew, father, intellectual, *nagid*, vizier, and military commander. Samuel's poetry is more developed and diversified than that of his contemporaries, the first generation of Hebrew poets in Spain. His war poems, which evince great skill in creating epics, are unique in Hebrew poetry. The pleasures and vanities of life, which he knew well, stimulated his poetic inspiration. Besides poems devoted to love and wine,

he composed poems of praise and glory, friendship and polemic, mourning and holiness, wisdom, morality, and meditation. Just as he wrote of wine and victory, he wrote of the illnesses of his children, and of the death of his brother Isaac. A literary artist of high order, his sure command of language is demonstrated by the great variety of subjects he chose for poetic expression. Despite the success he attained through his poetry, worldly wisdom, and pleasant manners, he was never content: the canker of melancholy continually gnawed at him. Even in his poems of love and wine a note of pessimism is sounded. He saw in the suffering of the Jews in exile his own personal suffering, and the poems reveal his yearning for Zion. At the royal court many secretly envied him and others were openly hostile. In their quest for royal favor these courtiers often acted treacherously, shifting or betraying loyalties without hesitation.

Just as he influenced the poets of his day so too they influenced him. He translated poems from Arabic and also composed in that language. The boasting and self-exaltation traditional to medieval Arabic and Hebrew poetry are recognizable in Samuel's poems, but to a more limited degree than in the work of other poets, such as Solomon ibn Gabirol. As was usual in those times, Samuel's poems were read at gatherings of poets, some of whom found them faulty in grammar and style, while others praised their novelty and inventiveness. Samuel bestowed gifts on his favorite poets, who then praised him in their poems; those from whom he withheld his generosity deprecated his poetry.

In 11th-century Granada no one was considered educated unless he could compose poetry. Children copying the poems of their father also characterized Arabic culture at that time. For these and other reasons Samuel educated his children to value and study poetry. He charged his sons with the copying and arranging of his poems and paid them for each completed work. When they performed their task well he praised them. Samuel had three sons and one daughter. Of the daughter and the son, Judah, nothing is known, but both probably died during their father's lifetime. The most beloved of his children was the first born, Jehoseph, regarded by Samuel as his successor. Jehoseph began to copy his father's poems (*Ben Tehillim*) at the age of eight and a half. Another son, Eliasaf, also copied his father's poems (*Ben Kohelet*), beginning when he was only slightly more than six years old. The children added captions descriptive of the poetry's contents and origins. *Ben-Mishlei*, a book of poems, was dedicated by Samuel to Jehoseph and Eliasaf.

The poems were copied many times during the Middle Ages, and it appears that Samuel himself took pains to ensure that they were circulated among knowledgeable people. The first author to refer to his poems was Moses *Ibn Ezra in *Shirat Yisrael* (66). Samuel's non-sacred poetry, however, came to be known only in the 19th century. The first to publish a substantial number of the poems was A.E. Harkavy (St. Petersburg, 1879). The three volumes of his poetry were published by David S. Sassoon (Oxford, 1934). Only

in later editions did these works appear with vocalization and commentaries, as in the *diwan* containing *Ben Tehillim* (1947) published by A.M. Habermann, and in *Ben Mishlei* (1948) and *Ben Kohelet* (1953) issued by S. Abramson. New editions of the "*Shirei ha-Milhamah*" (1963) and the *diwan* (1966) were published by A.M. Habermann and Dov Yarden respectively.

[Abraham Meir Habermann]

SAMUEL HA-SHELISHI BEN HOSHANA (d. after 1012), Palestinian liturgical poet. His name is mentioned in many documents of the Cairo *Genizah*, from which it appears that he was a member of the Erez Israel academy in Jerusalem. He progressively rose in importance until he was awarded the title of *Ha-Shelishi* ("third of the company"), that is, the third man in the seating order at the side of the *Gaon* in the academy. For unknown reasons, he went to Egypt and settled in Fostat, where he became friendly with *Shemariah b. Elhanan. His disciples included R. *Nathan b. Abraham (1). On Shevat 3, 4772, at the time of the funeral of Putiel ha-Hazzan, he was a witness to and also a victim of the three-day riots perpetrated by the Muslims against the Jews of Fostat. He commemorated these events in a special scroll entitled *Megillat Mizrayim* ("The Scroll of Egypt"), which has become an important historical source. He also wrote *kerovot* and *seliḥot* in memory of these events. Upon his death in Egypt *Sahlan b. Abraham eulogized him, mentioning among other achievements his erudition in Torah and his wide knowledge of talmudic and midrashic literature.

Samuel was one of the most prominent liturgical poets of his century, but only some of the hundreds of his extant *piyyutim* have been published, by various scholars. Samuel composed many *yozerot*, of every category, on all the weekly portions of the Pentateuch. Some of his *piyyutim* are written in a concentrated style and are filled with allusions, while others are written in an easy and colorful style. A few were signed *Shemu'el Yizkeh* or *Shemu'el he-Haver Yizkeh*.

[Abraham David]

SAMUEL IBN ʿĀDIYĀ (al-Samawal b. Ghārid Ablāq; mid-sixth century), poet in *Tayma, Hejaz, N. Arabia. Samuel b. ʿĀdiyā's Arabic poetry ranks with the finest heroic traditional Arabic battle poetry of the pre-Islamic period and shows little trace of Jewish origins and themes. For a time he resided in the citadel of Ablāq near Tayma and was called "King of Tayma" by the local Arabs. His mother was an Arab of the Ghassan tribe. He was Jewish, although Shaikho, the Jesuit who published his diwan, attempted to prove that he was a Christian, or at least belonged to a Judaeo-Christian sect. He lived to be an old man and was known for his loyalty and fulfillment of pledges. When the noble Imruʿal-Qays deposited his arms in Samuel's home, and the castle was besieged by his enemies after he left for Byzantium, Samuel allowed his own son to be killed rather than surrender Imru's arms to the invader. This act earned him lasting fame among Arabs, and he is the subject of several poems by later authors. A popular proverb on the extent of one's loyalty was coined, "more loyal than Samuel" (Ar. *Awfā min al-Samawʿal*). His descendants were landowners in the region of Taima during the Umayyad dynasty and later converted to Islam. Moses Ibn Ezra in his book *Shirat Israel* (Helper edition, 49) notes Samuel as a Jewish poet. One of his sons and a grandson are said to have been poets, too.

Poetry

Nine poems and fragments attributed to Samuel were collected by the philologist Niṭawayh (d. 935). Most scholars agree that these poems were composed by a Jew but doubt that all were written by Samuel. The first poem is considered an example of classical Arabic poetry. Called *Lāmiyyat al-Samawʿal*, it expounds the virtues of purity of blood, generosity, honor, and strength. The battles of his people and their deaths on the battlefield are extolled, indicating the extent of the cultural assimilation of the Jews to Arab society. The second poem, however, expresses his belief in resurrection and glorifies the kings and prophets of Israel, also mentioning the splitting of the Red Sea. Its philological importance lies in the rhyming of certain stanzas as an aid to exegesis of the *Koran and in the traces of the Arabic dialect of the Jewish tribes. Poem number 6 exalts the fortress of Samuel's father and his loyalty to Imruʿal-Qays. A 26-line poem attributed to Samuel appears in the collection edited by Sheikho, who interpreted the phrase "our prophet came and brought peace to all men" as evidence of the poet's Christian origin. His opinion has been contested, as the poem possesses a koranic style and hence indicates its later composition by a Jew refuting Muslim claims. A fragment from the Cairo **Genizah*, signed Samuel of the *Qurayza (al-Qurazi) tribe, had previously been attributed to Samuel ibn ʿĀdiyā. H.Z. Hirschberg, however, presumes that the author wrote this poem during the period of struggle between the Jews and *Muhammad, and therefore is not Samuel ibn ʿĀdiyā. Hirschberg sees the influence of the Jewish *aggadah* and Midrash in Samuel's poetry, rather than their Koranic adaptations. Schwartzbaum perceives these verses as poetic examples of the *Israʿiʿliyyāt* and *Qīṣaṣ al-Anbiyāʾ* literature. The

Muslim–Arab legends are literature which draws upon Jewish aggadic and midrashic sources, and especially upon the Jewish elements in the Koran.

[Shmuel Moreh / Leah Bornstein-Makovetsky (2nd ed.)]

SAMUEL OF EVREUX (also called **Ha-Sar mi-Evreux**, "the prince from Evreux," first half of 13th century), talmudist and tosafist of Normandy. He was apparently a pupil of *Isaac b. Abraham and was also in contact with *Jehiel of Paris and *Nethanel of Chinon, to whom he addressed halakhic problems. The sources (see *Orḥot Ḥayyim and *Kol Bo) speak of his pious customs. Samuel, together with his brothers *Moses and *Isaac, headed the yeshivah of Evreux where, except for a brief stay in Chateau-Thierry, he dwelt most of his life. His halakhic methods are incorporated in the works written jointly with his brothers that were known as *Shittat Evreux* ("the school of Evreux"), and the particular contributions of each brother are not always distinguishable. Samuel's pupils included *Jonah Gerondi, *Isaac of Corbeil, *Perez b. Elijah, and *Meir b. Baruch of Rothenburg.

[Israel Moses Ta-Shma]

SAMUELSON, SIR BERNHARD (1820–1905), British ironmaster and promoter of technical education. Samuelson was born in Hamburg and taken by his father, a merchant, to Hull in England's northeast soon afterwards. By the 1840s he had become a merchant engaged in selling British locomotives and engines in Europe and had acquired considerable engineering knowledge. From 1848 Samuelson was an agricultural implements manufacturer and, after 1853, an ironmaster at Middlesbrough, also in England's northeast. By the end of the 19th century he was one of the largest ironmasters in Britain, and one of the few Jewish entrepreneurs in Britain directly engaged in running a successful heavy industry. Samuelson served as a Liberal member of Parliament in 1859 and from 1865 to 1895. In Parliament he served on many committees and commissions concerned with technical education and did much to advance it in Britain. He was made a baronet (a hereditary knight) in 1884.

SAMUELSON, PAUL ANTHONY (1915–), U.S. economist. Born in Gary, Indiana, Samuelson received his B.A. from Chicago University in 1935 and his M.A. (1936) and Ph.D. (1941) from Harvard University. He first taught at Harvard (1937) and from 1940 at the Massachusetts Institute of Tech-

nology, where he was appointed professor in 1960. From 1941 to 1943 he served as consultant to the National Resources Board, from 1945 to the War Production Board, and from 1945 to 1952 to the U.S. Treasury. In 1948 and 1949 he was chairman of the U.S. President's Task Force for Maintaining American Prosperity. His major interests were economic theory, statistics, business cycles, mathematical programming and econometrics.

In 1970 he was the first American to be awarded the Nobel Prize for Economics for his efforts to "raise the level of scientific analysis in economic theory." From 1966 to 1981 he wrote a regular column in *Newsweek*.

After retiring from teaching, he became professor emeritus at MIT.

Among his many published and widely translated works are *Foundations of Economic Analysis* (1947); *Economics – An Introductory Analysis* (1948, 18th edition 2004), the bestselling economics textbook of all time; *Readings in Economics* (1952, third edition 1958); *Linear Programming and Economic Analysis* (with R. Dorfman and R.M. Solow, 1958); *Stability and Growth in the American Economy* (Stockholm, 1963); *International Economic Relations* (1969); *Economics from the Heart* (1983); and *The Collected Scientific Papers of Paul A. Samuelson* (five volumes, 1966–86).

Tashlikh—a ceremony held near a sea or a running stream on the first day of Rosh Ha-Shannah—the name deriving from “You wilt cast [*tashlikh*] all their sins into the depths of the sea” (Micah 7:19). *Photo: Ya’acov Sa’ar, Israel Government Press Office.*

THE JEWISH HOLY DAYS AND FESTIVALS FALL INTO TWO CATEGORIES: THOSE COMMANDED BY THE PENTATEUCH, SUCH AS SABBATH, ROSH HA-SHANAH, DAY OF ATONEMENT (YOM KIPPUR), AND THE PILGRIM FESTIVALS (PASSOVER, SHAVUOT, AND SUKKOT), AND THOSE ADDED LATER, SUCH AS PURIM (1ST–2ND CENTURY C.E.) AND HANUKKAH (2ND CENTURY). ALL THESE ARE OBSERVED IN VARIOUS WAYS BY JEWS AROUND THE WORLD.

SABBATH AND FESTIVALS

The “*halakah*”—first haircut for a three-year-old boy on the Lag Ba-Omer festival at Meron near Zefat. *Photo: Hanan Isachar.*

Priestly blessing during the Sukkot festival. In the days when the Temple stood in Jerusalem, it was a pilgrimage site, where people used to come to receive the blessings of the priests (kohanim). Today the ceremony is held at the Western Wall. The men with the white prayer shawls, *tallitot*, are the kohanim blessing the assembled. *Photo: Z. Radovan, Jerusalem.*

A man sits on a mattress and reads from a prayer book late in the evening on Tishah Be-Av, which marks the destruction of the Temple, 2000.

A young girl pours water into Miriam's cup as her mother and another woman look on during a women's *seder* in New York City, 2001. Traditional *seders* place a cup of wine on the table for the prophet Elijah, but women's *seders* also add a cup of water in honor of Miriam, who was associated with a well of water that miraculously followed the Jews as they wandered in the desert. *AP Images*.

A clown in a *dreidel* costume entertains children at a Hanukkah party at the Jewish Museum in New York City, 2005.
