

# SACRED GEOMETRY: FLOWER OF LIFE

## Introduction

The "Flower of Life" can be found in all major religions of the world. It contains the *patterns of creation* as they emerged from the "Great Void". Everything is made from the Creator's thought. After the creation of the *Seed of Life* the same vortex's motion was continued, creating the next structure known as the *Egg of Life*. This structure forms the basis for music, as the distances between the spheres is identical to the distances between the tones and the half tones in music. It is also identical to the cellular structure of the third embryonic division (The first cell divides into two cells, then to four cells then to eight). Thus this same structure as it is further developed, creates the human body and all of the energy systems including the ones used to create the *Merkaba*. If we continue creating more and more spheres we will end up with the structure called the *Flower of Life*.

*The Flower of Life (left) and the Seed of Life (right).*

**The Flower of Life**

**The Egg of Life**

The flower of life holds a secret symbol created by drawing 13 circles out of the Flower of Life. By doing this, one can discover the most important and sacred pattern in the universe. This is the source of all that exists; it's called the *Fruit of Life*. It contains 13 informational systems. Each one explains another aspect of reality. Thus these systems are able to give us access to everything ranging from the human body to the galaxies. In the first system, for example, it's possible to create any molecular structure and any living cellular structure that exists in the universe. In short every living creature.

The most common form of the "Flower of Life" is hexagonal pattern (where the

center of each circle is on the circumference of six surrounding circles of the same diameter), made up of 19 complete circles and 36 partial circular arcs, enclosed by a large circle.

The "Seed of Life" is formed from seven circles being placed with sixfold symmetry, forming a pattern of circles and lenses, which acts as a basic component of the Flower of Life's design.

The Temple of Osiris at Abydos, Egypt contains the oldest to date example. it is carved in granite and may possibly represent the Eye of Ra a symbol of the authority of the pharaoh. Other examples can be found in Phoenician, Assyrian, Indian, Asian, Middle Eastern, and medieval art.

*Flower of Life - Turkey*

*Flower of Life - Amistar, India*

*Flower of Life - Amistar, India (close up)*

*Leonardo da Vinci has studied the Flower of Life's form and its mathematical properties. He has drawn the Flower of Life itself, as well as components therein, such as the Seed of Life. He has drawn geometric figures representing shapes such as the platonic solids, a sphere, a torus, etc., and has also used the golden ratio of phi in his artwork; all of which may be derived from the Flower of Life design.*

*Flower of life made of intersecting spheres instead of circles.*

## Sacred Geometry - Flower of Life

*By Andrew Monkman*

<http://thecompletefloweroflife.blogspot.com/>

I believe the complete ancient flower of life is an inter-dimensional tool, a portal, a stargate, a window into what some call the inter space plains. The original flower of life (found on several pillars within "the Osireion" at abydos in Egypt) is incomplete, because it is only the first layer of three (pic1+2).

*1. Flower of Life carved on a temple wall*

*2. The Flower of Life set in stone at the Temple of Osiris at Abydos, Egypt.*

The complete flower has the other two layers added, making it three dimensional (pic3). If you relax (sit three feet away from the screen) and let the flower slowly draw your eyes out

of focus, the flower will open. Try and not focus on any one point, blankly stare, take the flower in as a whole. You may get a headache and itchy eyes, this will quickly disappear. We do not see with our eyes, we see through our eyes. Let your mind focus, don't fight it.

*3. Flower of life with two layers added.*

What appears is a reptilian entity. This creature is very frightening and fierce looking, but I can assure you it can do you no harm. I know this sounds mad, but it is true and very real. After you get used to interacting with the reptilian, you can move on to the next entity. To interact with the second being you must rotate the flower by 30 degrees and repeat the steps.

*Flower of Life - Beijing, China*

The second being is the Chinese dragon ( the fu dog). This creature is even more frightening than the first, so be prepared. Again, this creature cannot harm you in anyway. Somehow these entities are in suspended animation. They are real but they do not and cannot move. I know within freemasonry, they call the first entity "the khaibit man". You need to have been initiated into the 10th degree to be aware of the khaibit man. As part of the initiation into the 10th degree, the khaibit man is conjured up in front of you. I am not a freemason, but my father has been a freemason for over 40 years. He has been through the 10th degree. When I made this discovery and drew the complete flower, I was living in Edinburgh. I phoned my father who was living at home in Kirkwall

on the Orkney isles. When I told my father what I had seen, he could not believe what I was saying. He told me that the only way I could know what I was telling him was if I had been through the 10th degree. Obviously I'm not a mason and hadn't been through the 10th, so from that day on my father has told me everything he knows about freemasonry. He also told me that his granny (my great granny Fox) told him when he was 16 years old, that someday one of his children would discover something that would affect the whole world. He is now convinced that the complete flower is this discovery.

You may know that the complete flower contains the kabbalah `s tree of life, the fruit, the egg and the seed of life (pic. 4 & 5).

*4. The Kabbalah Tree of Life derived from the Flower of Life.*

*5. The Kabbalah Tree of Life derived from the Flower of Life.*

The complete flower also contains the three dimensional metatron cube (pic6), which holds all the Platonic solids (pic7). Not just the building blocks of life, but the building blocks of creation itself.

### 6. Metatron Cube

### 7. Platonic Solids

I found this symbol on a **knights templar tombstone** (pic. 9), found within the St Magnus cathedral in Kirkwall, Orkney (pic. 8).

8. St Magnus cathedral in Kirkwall

*9. Knights Templar tombstone from St Magnus cathedral in Kirkwall*

I believe this symbol is a representation of the egg of life (pic.10), which is the second rotation of the first layer of the complete flower of life (pic. 11).

*10. The egg of life (left)*

*11. The second rotation of the first layer of the complete flower of life (right)*

I was born and bred and now live back in Kirkwall. At no time did I ever get taught at school, that there was any knights templars who came from or to Orkney.

For whatever reason, the computer generated flower (pic. 13) does not work for the contemplation. It does contain all Freemasonry's sacred symbols.

12. The origin of the G of freemasonry

13. A computer generated version of the complete flower

I thought I'd add this picture as you will recognize the pattern (pic14).

*14. Pattern of snake's skin*

The complete flower of life does have another use. If you overlay a map (after getting the correct scale) with the complete flower of life, all sacred sites, standing stones etc, will sit at the centre of six points. This picture gives you idea how the grid looks (pic.15).

*15. If you overlay a map (after getting the correct scale) with the complete flower of life, all sacred sites, standing stones etc, will sit at the centre of six points.*

*16. I have also attached an image of the flower overlaid with the square and compass of freemasonry. I believe the flower is what the square and compass really symbolize.*

---

Is this geometry the origin of the "Star of David"!?

## **Is this freemasonry's ultimate secret!?**

Could it be, world secret societies have kept this symbol hidden from humanity, since the dawn of time?

(Masonic symbols found within the the complete flower.)

Within this symbol ,all world secret societies (east and west)  
sacred symbols can be found.

Tree of life, the fruit, the egg and the seed of life. The complete flower also contains the three dimensional metatron cube which holds all the platonic solids. Not just the building blocks of life but the building blocks of creation itself.

Is it a coincidence, the buckminsterfullerene molecule  
and the complete flower are so alike?

The original unfinished "flower of life" can be found on several pillars within "The Osireon" (The tomb of Osiris) at Abydos in Egypt. World secret societies have made sure ,we either ignore the flower or have our attention drawn to other ancient sites. They have taken great care in keeping the significance of the flower hidden. If you contemplate the symbol it will open a part of the mind which has been lost (hidden)to modern man.
