Globalist Bilderberg Group

The meeting of the [Bilderberg Group](#) in 2012 is fast approaching, and the globalists (inset below) supported [Main stream media](#) further waive a coverage of the main events of the next meeting of the Bilderberg Group.

Who are the globalists and what is a Globalist?

The agenda of the globalists is real and the globalists themselves are the greatest threat to human civilization. Every day more and more people are affected in some way or form of the globalists and the agenda of the globalists. Considering the overall plan of the globalists, their ideology and propaganda, it's time to redefine what is a Globalist. The most

common definition what is a Globalist and who are the globalists, is the following: "the globalization movement is an alliance based on self-interest of private international financiers and the royal, dynastic and landowning families of Britain, Europe and America, which over the years through marriage policy banded together to create a self-regenerating power structure, whose aim is, through lies and deceit to control everything and everyone ". This definition is true, but I think that it does not go far enough to explain why the globalists want to advance new world order, why the globalists exist and where they want to lead the entire global society in 50, 100 and 200 years. It is now an appropriate time to review the standard definition of who are the globalists, because it now in almost every country in the world have invaded. Until 30 years ago the globalists had only an interest in the western countries and a limited number of African and Asian countries, where they were also present. A new definition of "Who are the globalists" After careful consideration, I would like the activists, freethinkers and propose anti-globalist movement to define the globalists as follows: the globalists are a conglomeration of individuals, interest groups and large companies that are actively trying to eliminate all the nations, to create a global borderless society, so that they all economies, the production and the processing of natural resources centralize, standardize and reduce so that they control, manipulate and influence our decisions directly to ensure their power, control, wealth and to preserve historical influence. This new definition of who are the globalists , provides a comprehensive view of the question of why they are there and for what purpose you are looking to implement their globalist agenda. As this definition is new, I would like to know what are your thoughts on that and whether you think we can define in improve any way.

[source](#)

The whole of controlled main stream media (yes that is exactly what they are and I do not apologize for using such a crude expression) has deliberately kept out and started the forthcoming meeting of the Bilderberg Group from all media reports, the alternative media and systematically attack detection Jour lists, which have sought to report on the Bilderbergers and their program. It is incredible and hard to understand why the main stream media have so obviously to forgo any reporting on the meeting of the Bilderberg group. One has to make clear that there is an annual event where the top globalists, politicians, bankers and owners of the world's largest corporations gather to plan "active" global political, economic and ecological programs and to develop strategies and behind the back to the public, in secret and without any accountability; and for the main-stream media is not reporting worth? To demonstrate how little the meeting of the Bilderberg Group is covered in the main-stream media, can with a simple Google search for news about the Bilderberg Group just 652 Results be found (most contained no news about the Bilderberg group, but only on the keywords found comments), with Bing News 23 results and delivered 13 results with Yahoo News. Let us once logical to draw conclusions about the results of the reporting of Google, Yahoo and Bing. the top globalists, politicians and

business leaders meet secretly to discuss political, economic and ecological programs, the results of which affect us all, but with the 3 top search engines were only 688 results world be found? comparisons I with 1,310,000 results for the search for "one direction" in Google News, I think I can say that is quite obvious is a news blackout on coverage of the Bilderberg group. the order to clarify the news blackout regarding Bilderbergers continue it may be noted that [Reuters News](#) 10 article about it published, most recently in December 2011. When the main-stream media even dream to publish news about the Bilderberg group, they strive usually, the image of Bilderberg to whitewash party and attempt to dismiss the stories about the group as a kind of conspiracy theory. the ' [Independent](#) ' recently criticized the Bilderbergers as a questionable group in the dark (conspiracy theory) in its coverage of a conference, which for the Google group as host their globalist friend held. They were quoted as saying,

"For conspiracy theorists, the conference, organized by the search engine giant, a smaller version of the Bilderberg group will be, this supposedly shadowy network of financiers who keeps a private annual meeting, a redeployment of the role of our technology-Master"

Fareed Zakaria [on CNN](#) , a further supported by the Bilderberg Group globalist institution, published a story about the meeting of the group in which he described it as,

"A conference like dozens of others in the world".

Zakaria says further,

"The idea that a finance minister or a banker would say something else in a group in front of 150 people, as what he says in public is crazy in today's world where everything transpires immediately".

I think it is appropriate to note that the second statement Zakaria is just ignorant.

- Believe Zakaria fact that the Bilderbergers sit there and talk about things that are already being discussed in public?
- If this is the case, why then publish the Bilderberg group not meeting minutes?
- Or better yet, why they load the alternative media not to a, to report on the events of the conference?

Recently wrote **Kenneth Vogel** from "[Politico](#) " an article in which he examines the emerging trends in the alternative media regarding the coverage of the Bilderberg Group. Essentially, the article underlines the lack of preparedness and the reluctance of the Main Stream Media, to report on the operations and objectives of the Bilderberg group. Not once is placed in bird products the subject of the Bilderberg group in question. Bird products clearly shows the lack of interest of the [main-stream media](#) for the Bilderberg Group and its objectives. I think it's time, and obligations me probably in that we all stop talking with reference to the Bilderberg group of a conspiracy theory, but rather from a genuine institution that collectively has the capacity to produce programs and changes on a global scale. the Bilderberg group inherent ability to make such decisions, *is unwanted and a threat to the stability and future of the world*. Where else do the 1%, which direct the remaining 99% in the world gather in secret and why media shun the main-stream this like the plague? I think the last part of the question needs to be further explored and only the alternative media have the courage to do this. As long as the hand that feeds the dog, is not eliminated, the main-stream media will not change.
